6.8.5 The cost of any Work Involved may include necessary general conditions costs to the extent those costs increase or decrease on account of, or are directly attributable to, the performance of the furnishing and/or performance of the additional Work Involved, or are required due to an extension in Contract Times or Delays. Such costs may include payroll costs of personnel, temporary facilities at the site, liability insurance and bond premiums, Subcontractors, royalty payments and fees for permits and licenses and taxes on the Work Involved.

6.8.6 A contractor or subcontractor who performs the Work may charge a fee of up to 15% of the cost of Work involved for overhead and profit. Contractor may charge a mark-up fee of up to 5% of its Subcontractor's cost excluding fees if the Work is performed by the Subcontractor. If Work is to be performed by lower tier subcontractor(s), intermediate subcontractors must share a fee of up to 5% of the lowest tier subcontractor's cost excluding fees. The total mark-up fees for the Work must not exceed 25% of the lowest tier subcontractor's cost excluding fees. If the adjustment to the Contract Price incorporates a contractor reservation of rights to claim additional adjustments, the fees must be reduced by one-third. Contractor's administrative costs and home office overhead must be non-reimbursable expenses covered by the Fee for the Work.

6.9 Changes in Contract Time:

6.9.1 If a justified extension beyond the Contract Time is not reasonably anticipatable under the circumstances, the Owner may approve an extension to the Contract Time through the Bulletin authorization process at no additional cost to the Owner. Examples of events that may justify an extension in the Contract Time include acts of God; acts of the public enemy; fires; floods; and strikes.

6.9.2 If, at any time during the life of this Contract, the Contractor finds that for reasons beyond its control, it will be impossible to complete the Work on or before the Contract completion date, a written request for a change to the Contract extending the

time of completion must be submitted. Such a request must set forth in precise detail the reasons believed to justify an extension and must be in such format as the State may require.

6.9.3 When submitting a quotation for a Contract change authorization for extra work or change in plans, the Contractor must include as part of the quotation, a statement requesting any extra time necessary to complete the related Work. Lack of such a statement will serve as notification that the extra time will not be required to complete the Contract work and will waive the right to a later claim. The Owner will not pay additional compensation to the Contractor for performing Contract Work during any extension period granted.

6.9.4 If the Progress Schedule and the funding allow for an early completion date, the Contractor may submit to the Owner for approval, a request to shorten the Contract Time. If approved by the Owner, the new Contract Time applies to the Project and liquidated damages, if any, will be assessed for any delays after the new completion date.

6.10 Price Reduction for Defective Cost or Pricing Data: Whenever the Contractor signs a proposal for a change in the Contract or claim settlement, the Contractor will be deemed to have certified on behalf of itself, Subcontractors and Suppliers, to its best knowledge and belief that the proposal and its contents (a) were made in good faith and are consistent with the facts and the provisions of the Contract; and (b) are current, complete and accurate. If the Contract Price/Time is increased by any Change Order, claim or dispute settlement because the Contractor, Subcontractor or Supplier, at any tier, represented or furnished cost or pricing data of any kind that were false, contained math errors or were incomplete, the Contract Price must be correspondingly reduced by Change Order. If there is a good cause to doubt the Contractor's compliance with the Defective cost and pricing data requirements, the Owner must be entitled to make an appropriate withholding from any payment otherwise owed to the Contractor.

7. Payments

7.1 **Schedule of Values:** The Schedule of Values must be approved by the Professional and accepted by the Owner and must divide the Work into pay items for significant Sections and areas, facilities or structures, with subtotals for first tier Subcontractors. If required in Division 1, the accepted Schedule of Values must be supported by a more detailed breakdown allocating the pay items to the Progress Schedule Activities. It must tabulate labor costs, Subcontract costs and material and equipment costs. Labor costs must include appropriate sums for construction equipment costs, general conditions costs, administrative costs and profit, unless separate pay items are itemized for those costs. The Schedule of Values must include two percent of the Contract Price for each of the following close-out pay items: (a) fire safety inspection, certificate of occupancy and other code approvals, as specified in the Contract Documents, (b) manufacturer warranties, finalized operating and maintenance documentation, Owner training documentation, and test and balance reports, and (c) finalized as-built/Record Documents.

7.2 **Requests for Payment:** Not more than once every thirty Calendar Days, the Contractor may submit to the Professional a Request for Payment on the Owner's form signed by the Contractor certifying Work completed and enclosing all supporting documentation. A draft copy of the payment request may be submitted to the Owner Field Representative for review and comments. For projects under $50,000, the Contractor may not submit more than two requests in addition to the final payment request. Each Request for Payment must certify that all monies owed by the Contractor to Subcontractors and Suppliers for which payment previously has been sought has been paid from payments received. No Request for Payment must include amounts for a Subcontractor or Supplier if the Contractor does not intend to use the payments requested, when received, to reduce the Contractor's outstanding obligations on the Work. The Owner will pay the Contractor within thirty Calendar Days after the Owner receives and approves a certified Request for Payment from the Professional. The Contractor will provide a certification in writing that the payment request submittal is true and accurate. If payment is requested based on materials and equipment stored at the site or at another location agreed to in writing, the Request for Payment also must be accompanied by (a) consent of surety, (b) a bill of sale, invoice or other documentation warranting that the Owner has received the materials and equipment free and clear of all liens, and (c) evidence that the materials and equipment are covered by appropriate property insurance and other arrangements to protect them and the Owner's interests. The Contractor warrants and guarantees that title to all Work, materials and equipment covered by any Request for Payment, whether incorporated in the Work or not, will pass to the Owner free and clear of all liens no later than at the time of payment by the Owner to the Contractor.

7.3 **Review of Request for Payment; Intent of Review:** Within ten Calendar Days after receipt of a Request for Payment, the Professional must certify to the Owner the amount the Professional determines to be due, or must return the Request for Payment to the Contractor indicating the reasons for withholding certification. The Professional's certification of any Request for Payment constitutes a representation to the Owner that the Work has progressed to the point indicated; that to the best of the Professional's knowledge, information and belief, the quality of the Work is in accordance with the Contract Documents; and that the Contractor is entitled to payment in the amount certified. In the case of final payment, the Professional's certification of final payment and recommendation that the Work is acceptable must be a further representation that conditions governing final payment to the Contractor have been met.

7.4 **Refusal to Make or to Recommend Payment:** The Owner may withhold from any payment an amount based on the (a) Professional's refusal to recommend payment or (b) Owner's estimate of the fair value of items included in the payment request. The Owner will give the Contractor reasonably prompt written notice supporting such action. The Professional may

refuse to recommend any part of any payment, or because of subsequently discovered evidence, inspections or tests or the value of the Punch List, nullify all or any portion of any payment previously recommended, as the Professional may consider necessary to protect the Owner from loss because:

(a) the Work is Defective or completed Work has been damaged requiring correction or replacement,
(b) the Contract Price has been reduced by Change Order,
(c) it has been necessary that the Owner correct Defective Work or complete Work,
(d) reasonable evidence exists that all or a part of the Work will not be completed within the corresponding Contract Time,
(e) the Contractor failed to comply with any material requirements of the Contract, including, but not limited to the failure to submit Progress Schedule Submittals or as-built/Record Documents when due,
(f) stored materials for which payment has been made or is sought has been determined by the Professional or the Owner Field Representative to be damaged or missing, or
(g) the Professional reasonably believes or knows of the occurrence of an event justifying termination for cause.

7.5 **Request for Final Inspection:** The Contractor must complete the Substantial Completion Punch List within the Contract Time and date. The Contractor must assemble all required documentation before requesting final inspection in writing. The Contractor may request final inspection of the entire Work, or the part of the Work for which final payment is specified in the Contract Documents. Upon this written notice, and if deemed appropriate by the professional, the Professional will make a final completion inspection with the Owner and Contractor and notify the Contractor of all incomplete or Defective Work revealed by the Final Inspection. The Contractor must immediately correct and complete the Work.

7.6 **Close-out Documents:** The Contractor must prepare and submit the following documentation before requesting final inspection or final payment: final operating and maintenance documentation (with revisions made after Substantial Completion), warranties, inspection certificates, as-built/Record Documents, release of payment claim forms, and all other required documents.

7.7 **Request for Final Payment:** The Contractor may request final payment after correcting or completing the Work to the satisfaction of the Professional and delivering close-out documentation (7.6). The Contractor's request for final payment must also enclose:

(a) evidence of completed operations insurance and an affidavit certifying that the insurance coverage will not be canceled, materially changed, or renewal refused,
(b) an affidavit certifying that the surety agrees that final payment does not relieve the surety of any of its obligations under the Performance Bond and Payment Bond,
(c) a completed DTMB-0460 Form close out checklist,
(d) a list of all pending insurance claims rising out of or resulting from the Work being handled by the Contractor and/or its insurer
(e) Contractor's 'Guarantee and Statement' (DTMB-0437) containing a statement of guaranteed indebtedness acceptable to the Owner in the full amount of the Contract Price, or a release of payment claims in the form of a release of liens, or a Bond or other security acceptable to the Owner to indemnify the Owner against any payment claim.

7.8 **Final Payment and Acceptance:** If the Professional is satisfied that the entire Work, or the part of the Work for which final payment is specified in the Contract Documents, is complete and the Contractor's other obligations under the Contract Documents has been fulfilled, the Professional will furnish to the Owner and Contractor the Professional's certification of final payment and acceptance within thirty Calendar Days after receipt of the final payment request. If the Professional is not satisfied, the Professional will return the request to the Contractor indicating in writing the reasons for not certifying final payment. If the final payment request is returned, the Contractor must correct the deficiencies and re-request final payment. If the Owner concurs with the Professional's certification of final payment the Owner will, within thirty Calendar Days after receipt of the Professional's certification of final payment, pay the balance of the Contract Price subject to those provisions governing final payment specified in the Contract Documents. If the Owner does not concur with the Professional's determination, the Owner will return the request for final payment to the Contractor with written reasons for refusing final payment and acceptance.

7.9 **Contractor's Continuing Obligation:** The following does not constitute acceptance of the Work in the event the Work or any Work is not in accordance with the Contract Documents, and therefore does not release the Contractor from its obligation to perform and furnish the Work in accordance with the Contract Documents:

(a) a certification by the Professional of any Request for Payment or final payment;
(b) the issuance of a Substantial Completion certificate;
(c) any payment by the Owner to the Contractor;
(d) any Partial Use;
(e) any act of acceptance by the Owner or any failure to do so;
(f) any review and approval of a Shop Drawing, sample, test procedure or other Submittal;
(g) any review of a Progress Schedule;
(h) any On-Site Inspection;
(i) any inspection, test or approval;

(j) any issuance of a notice of acceptability by the Professional; or
(k) any correction of Defective Work or any completion of Work by the Owner.

7.10 **Waiver of Claims:** The making of final payment does not constitute a waiver by the Owner of any rights as to the Contractor's continuing obligations under the Contract Documents, nor will it constitute a waiver of any claims by the Owner against the Contractor still unsettled, or arising from unsettled payment claims, Defective Work appearing after final inspection or failure by the Contractor to comply with the Contract Documents or the terms of any special warranties provided by the Contract Documents or by Law. The acceptance of final payment will constitute a waiver of all claims by the Contractor against the Owner, other than those claims previously made in writing, on a timely basis.

8. Other Work: During the Contract Time, the Owner may self perform or Contract for other work at the site. By doing so, the Owner or its representative will coordinate the operations of the Contractor and the other work. Whenever the other work interfaces with the Contractor's Work on site, the Contractor must coordinate its activities with the interfacing work, inspect the other work and promptly report to the Professional in writing if the other work is unavailable or unsuitable. The Contractor's failure to do so will constitute an acceptance of such other work as fit and proper for integration with the Work except for latent or non-apparent defects and deficiencies in the other work. The Contractor must provide proper and safe access to the site for handling, unloading and storage of their materials and equipment and for the execution of the other work. The Contractor must do all cutting, fitting, patching and interfacing of the Work that may be required to make any part of the Work come together properly and integrate with other work. If the Contractor becomes party to a dispute or claim due to damages caused to its Work/property or other work/their property, the Contractor must promptly attempt, without involving the Owner or the Professional or their agents, to settle with the other party by agreement or otherwise resolve the claim. If the Owner determines that the other work resulted in a delay to the Work to be performed by the Contractor and such delay justifies a Change Order, the Owner will authorize the necessary adjustment in Contract Price and/or Time.

9. Stop Work Orders and Suspension of Work: The Owner may order the Contractor in writing to defer, stop, suspend or interrupt all or part of the Work, in the event any of the following situations:

(a) any Work is Defective,
(b) any Work, when completed, will not conform to the Contract Documents,
(c) any materials or equipment are unsuitable,
(d) any workers are insufficiently skilled,
(e) failure of the Contractor to implement appropriate measures for the SESC, or
(f) as the Owner may determine appropriate for its convenience. The Contractor is responsible for the Delays and any additional costs if at fault. Any justified increase in Contract Price/Time due to suspension of Work must be submitted within thirty Calendar Days of knowing the extent of Delays and before submitting the final payment.

10. Termination:

10.1 **Termination for Breach**: The Owner may elect to terminate all or any part of the Work if:

(a) the Contractor fails to complete the Work, or a specified part of the Work, within the corresponding Contract Time; fails or refuses to supply sufficient management, supervision, workers, materials or equipment; or otherwise fails to prosecute the Work, or any specified part of the Work, with the diligence required to comply with the Contract Time(s);
(b) the Contractor persistently disregards the authority of the Professional or violates or disregards a provision of the Contract Documents or the Laws of any Political Subdivision with jurisdiction;
(c) the Contractor admits in writing, or the Owner otherwise establishes, the Contractor's inability or refusal to pay the Contractor's debts generally as they become due;
(d) in response to the Owner's demand, the Contractor fails to provide adequate, written assurance that the Contractor has the financial resources necessary to complete the Work within the Contract Time;
(e) the Contractor fails to comply with the Michigan Residency requirements (1984 PA 431, as amended, MCL 18.1241a); or is found to be in violation of Section 4 of 1980 PA 278 concerning unfair labor practices, or any nondiscrimination requirements imposed by Law;
(f) at any time, the Contractor, Subcontractor or Supplier is in violation of unfair labor practices prohibited by Section 8 of Chapter 327 of the National Labor Relations Act, 29 U.S.C. 158; or
(g) the Contractor violates or breaches any material provision of the Contract Documents, which provides contractually for cause termination or rescission of the Contract or of the Contractor's right to complete the Work.

Within seven Calendar Days after the Contractor receives a notice requiring assurance of due performance for any of the above occurring non-conformances, the Contractor must meet with the Owner and present the Contractor's plan to correct the problems. If the Owner determines that the Contractor's plan provides adequate assurance of correction, that determination does not waive the Owner's right to subsequently default the Contractor or affect any rights or remedies of the Owner against the Contractor and/or surety then existing or that may accrue in the future. The Owner, after giving the Contractor and surety seven Calendar Days' written notice of intent to default, may declare the Contractor in default and terminate the services of the Contractor for cause. Unless otherwise agreed between the Owner and Contractor, at the expiration of the Seven-Calendar Day (intent to default) period, the Contractor must immediately stop all Work and proceed in accordance with the Owner's instructions. Following the expiration of the Seven-Calendar Day (intent to default) notice, the Contractor will be

sent a default letter – notice of termination for cause. The Owner will issue a Contract Change Order to revise the name of the contract party to the name of the surety company. The surety company must undertake to perform and complete the Work, in accordance with the Contract Documents, in place of the Contractor, either through the surety's agents or by executing agreements with qualified contractors (excluding the Contractor and any of the Contractor's affiliates), or both.

The Owner may issue a fifteen-Calendar Day notice of intent to default the surety company if they fail to execute in a timely manner the completion of the Contract Work. Without an adequate plan of correction, the Owner may issue a notice of termination for cause letter to the surety. If a termination of the contract with the surety occurs, the Owner reserves the right to complete the Work.

If the Owner has terminated the Contractor, any such termination will not affect any rights or remedies of the Owner against the Contractor or surety, or both, then existing or that may accrue after termination. All provisions of the Contract Documents that, by their nature, survive final acceptance of the Work must remain in full force and effect after a termination for cause of the Contractor or default of the surety, or both. The Owner may, in its sole discretion, permit the Contractor to continue to perform Work when the Contractor is in default or has been defaulted. Such decision by the Owner in no way operates as a waiver of any of the Owner's rights under the Contract Documents or Performance Bond, nor in the event of a subsequent default, entitle the Contractor or surety to continue to perform or prosecute the Work to completion.

10.2 **Termination on Non-Bonded Project**: For non-bonded projects, the Owner will follow the termination protocol in Paragraph 10.1 without involving a surety.

10.3 **Termination for Convenience of the Owner**: Upon fifteen Calendar Days' written notice to the Contractor and surety, or sooner if reasonable under the circumstances, the Owner may, without cause and without prejudice to any other right or remedy it may have, elect to terminate any part of the Work, or the Contract in whole or in part, as the Owner may deem appropriate for its convenience. Upon receipt of any such termination notice, the Contractor must immediately proceed in accordance with any specific instructions, protect and maintain the Work, and make reasonable and diligent efforts to mitigate costs associated with the termination. In such termination, the Contractor must be paid in accordance with the terms of this Contract for only services rendered before the effective date of termination. Upon termination for convenience, the Contractor must be released from any obligation to provide further services and the Owner must have full power and authority to take possession of the Work, assume any agreements with Subcontractors and Suppliers that the Owner selects, and prosecute the Work to completion by Contract or as the Owner may deem expedient.

10.4 Termination for Lack of Funding: If expected or actual funding is withdrawn, reduced or limited in any way before the completion date set forth in this Contract or in any amendment, the State may, upon written notice to the Contractor, terminate this Contract in whole or in part in accordance with Paragraph 10.3.

11. Disputes: All claims, counterclaims, disputes and other matters in question between the Owner and Contractor arising out of or relating to the Contract Documents must be submitted in writing to the Professional and otherwise processed and resolved as provided in this Article. The Contractor must carry on the Work with due diligence during all disputes or disagreements. Work must not be delayed or postponed pending resolution of any disputes or disagreements. The Contractor must exercise reasonable precautions, efforts and measures to avoid situations that would cause delay.

11.1 **Notice of Claim**: Except for Owner claims for liquidated damages, no claim is valid unless it is based upon written notice delivered by the claimant to the other party promptly, but in no event later than thirty Calendar Days after the Professional's or Project Director's determination giving rise to the claim. The notice must state the nature of the dispute, the amount involved, if any, and the remedy sought. The claim submittal with all supporting data must be delivered within sixty Calendar Days after the determination giving rise to the claim (unless the Professional allows an extension). The responsibility to substantiate claims rests with the claimant. A claim by the Contractor must be submitted to the Professional and Project Director for a recommendation or decision from the Professional. A claim by the Owner must be submitted to the Contractor and the Professional for a written recommendation or decision by the Professional. The Owner reserves the right to audit any Contractor claim (or claim package) that the Contractor values at more than $50,000.00. Pending final resolution of any claim under this Article, the Contractor must proceed diligently with the Work and comply with any decision of the Owner and/or Professional. For all Contractor claims seeking an increase in Contract Price or Contract Time, the Contractor must submit an affidavit, certifying that the amount claimed accurately reflects any Delay and all costs that the Contractor is entitled from the occurrence of the claimed event and that supporting cost and pricing data are current, accurate, complete and represent the Contractor's best knowledge and belief. The affidavit must be signed in the same manner as required in Item 6 of Section 00100.

11.2 **Recommendations or Decisions from the Professional:** For claims under $100,000.00, if requested in writing by the Contractor, the Professional will render a recommendation or decision within thirty Calendar Days after the request and the Owner will issue, if necessary, a determination within thirty Calendar Days after the Professional's recommendation or decision. For claims exceeding $100,000.00, the Professional will issue its recommendation or decision and the Owner, if necessary, will issue its determination, within sixty Calendar Days.

If the Professional denies a Contractor claim or agrees with an Owner claim, that decision must be final and binding on the Contractor, without any determination by the Owner, unless the Contractor files a request for a presentation with the Director-

FBSA within thirty Calendar Days. To the extent that any recommendation from the Professional is partly or wholly adverse to a claim from the Owner, that determination must be final and binding on both the Owner and Contractor unless either party files a request for a presentation with the Director-FBSA within thirty Calendar Days. If the Professional recommends payment of any Contractor claim which increases the Contract Price, that recommendation is subject to the Owner's written approval. In the event any such determination from the Owner is partly or wholly adverse to the preceding recommendation from the Professional, that determination must be final and binding on the Contractor unless the Contractor files suit in the Michigan Court of Claims within thirty Calendar Days after receipt of such determination. The claim is waived if not made in accordance with these requirements.

If either the Contractor or Owner is not satisfied with any decision of the Professional on a claim, that party must, within thirty Calendar Days of receiving that decision, file a written appeal with complete supporting documentation with the Director-FBSA.. The Director-FBSA has discretion concerning the allowability of evidence submitted, and is not bound to any rules of evidence. If the right to a presentation is waived or if a presentation is conducted and the dispute remains unresolved, the Director-FBSA, at the Director-FBSA's sole option, must specify in which forum the dispute must be conducted by issuing a written determination to the Contractor that the dispute if the Contractor so elects, be submitted in writing to the Michigan Court of Claims. The Director-FBSA's determination on the dispute is final and binding on the Contractor unless the Contractor files a lawful action in the Michigan Court of Claims within thirty Calendar Days after receiving the Director-FBSA's determination. After settlement or final adjudication of any claim, if payment by the Contractor is not made to the Owner, the Owner may offset the appropriate amounts against (a) payments due to the Contractor under any other Contract between the Owner and the Contractor, or (b) any amounts for which the Owner may be obligated to the Contractor in any capacity. The Director-FBSA may designate someone to fulfill the Director-FBSA's duties under these terms and conditions.

END OF SECTION 00700

SECTION 00750 SPECIAL WORKING CONDITIONS

1. The Work is for the Department of Management, Technology & Budget and their special working conditions are included in Appendix II. Contractor must comply with all security regulations. Access to and egress from the buildings and State Agency grounds must be via routes specifically designated by the State Agency. Whenever the Contractor has caused an operating security or fire system to go out of service, or left unsecured openings in existing facilities or security fences, the Contractor must furnish a security guard or fire watch acceptable to the Owner to maintain security of the facility outside of normal working hours and will be held responsible for any losses from the facility.

2. The Contractor must maintain at all times dust control measures to the satisfaction of the Owner.

3. Hours of building operations: Monday through Friday 8:00 am to 5:00 pm. Contractor is not required to work nights or weekends, but may obtain approval if they require.

END OF SECTION 00750

SECTION 00800 SUPPLEMENTARY CONDITIONS

1. The following conditions must supplement the general conditions:

   (a) The contractor and sub-contractors shall meet the following experience qualifications and provide references regarding the installations at the time of bidding:
      (1) The general contractor shall have a minimum of (5) five years work experience of project similar in scope and cost, without complaint.
      (2) The installing roofing contractor shall have a minimum of (5) years installation experience with successful warranted watertight installations of similar system specified.
      (3) The installing mechanical contractor shall have minimum of (3) three water cooled chiller system installations (with or without ice storage) with similar size and scope, all of which have operated successfully for a minimum of (5) five years.
      (4) The installing solar array system contractor shall have a minimum of (3) three completed installations of 15kw solar system or larger, all of which have operated successfully for a minimum of (3) three years.
   (b) On-site parking is not available.
   (c) Security clearance and documentation of background checks are required as detailed in the DTMB Facilities and Business Services Administration Security Clearance Request Contractor Instructions, Appendix II Special Working Conditions.
   (d) No on-site storage is available other than the immediate construction area.
   (e) The freight elevator capacity is 4,500 lbs.

END OF SECTION 00800

SECTION 00850 WAGE DETERMINATION SCHEDULE

The Contractor and all Subcontractors must comply with all Laws pertaining to occupational classifications and to the following requirements:

1. The rates of wages and fringe benefits to be paid to each class of construction mechanics must not be less than the wage and fringe benefit rates issued by the Michigan Department of Licensing and Regulatory Affairs (DLARA), Wage and Hour Division in its schedule of occupational classification and wage and fringe benefit for the locality in which the Work is to be performed. These prevailing wage rates are included in Appendix IV.

2. The Contractor must keep posted on the construction site, in a conspicuous place, a copy of all prevailing wage and fringe benefit rates as prescribed in the Contract and the address and telephone number of the DLARA's, Wage and Hour Division office responsible for enforcing these provisions, and must keep an accurate record showing the name and classification of each Person performing Work on the site, the dates on which Work was performed, the hours each Person worked on the site and the actual hourly wage and benefits paid to each Person. This record must be notarized by a Notary Public and must be available to DTMB-FBSA and DLARA for an audit or inspection, at any time, upon their request. In addition, as per section 6.10 of this Document, the Contractor must have available to DTMB and DLARA, certified payroll of those working on the project.

3. If any trade is omitted from the schedule of wages and fringe benefit rates included in Appendix IV, the trades omitted must also be paid not less than the wage and fringe benefit rates prevailing in the locality in which the Work is to be performed.

4. The Contractor must keep posted on the construction site, in a conspicuous place, notice that construction mechanics, as the intended beneficiaries of 1965 PA 166, as amended, who have not been paid in accordance with the Act may file a claim with the LARA.

A finding by the DLARA that the Contractor or any Subcontractor is in violation of these requirements is final.

END OF SECTION 00850

SECTION 00900 ADDENDA

1. Each Bid submittal must include acknowledgement of receipt and review of all Addenda issued during the Bidding period.

END OF SECTION 00900

DIVISION 01

GENERAL REQUIREMENTS

SECTION 01010 SUMMARY OF WORK

1. **General**

1.1 General information covering the "Scope of Work" is specified on the Invitation to Bid.

1.2 The Agency will provide the following Work:

(a) State Salvage: The State reserves the right to salvage certain items and equipment and those salvaged items will be identified to the Bidder at the time of their inspection of the proposed Work. The State will remove salvaged items before commencement of the Work.

(b) Moving Furnishings and Equipment: The Contractor must give timely notice to the State Agency representative identified in the pre-construction meeting of all furnishings, window covering and movable equipment that will interfere with the Work or which the Contractor cannot protect with coverings of paper, plastic, drop cloths or clean tarpaulin. The Contractor must furnish, install, maintain and remove all coverings used to protect furnishings, window coverings and movable equipment.

END OF SECTION 01010

SECTION 01020 ALLOWANCES

1. **Allowances**

1.1 **Cash Allowances: N/A**

(a) Bidders must include in their Base Proposal Sum an allowance of $_____ to cover _____ specified in Section. The base bid shall include bonds and insurance on the value of the allowance.
(b) Monies in the allowance will be used only if directed in writing by the Project Director and Professional.
(c) Payments under a Cash Allowance must be on actual cost and exclude cost for supervision, handling, unloading, storage, installation, testing, fee, premiums for bond and insurance, etc.
(c) Unused allowances will be deducted from the contract amount through contract change order.

1.2 **Provisional/Contingency Allowances:**

(a) Bidders must include in their Base Proposal Sum a contingency allowance of $45,000.00The base bid shall include bonds and insurance on the value of the allowance.
(b) Monies will be used in the contingency allowance only if directed in writing by the Project Director and Professional.
(c) Payments under a Provisionary Allowance will include not only the purchase/furnished cost of the materials and equipment involved, but also all related labor costs, subcontract costs, construction equipment costs, general conditions costs and Fee, provided they are calculated in accordance with the requirements of the contract documents.
(c) Unused allowances will be deducted from the contract amount through contract change order.

END OF SECTION 01020

SECTION 01025 MEASUREMENT AND PAYMENT

1. **Schedule of Values**: If required, before the construction start date, the Contractor must submit a Schedule of Values to the Professional for review and approval, of the various tasks that must be performed to complete all the Work. The schedule must show each task and the corresponding value of the task, including separate monies allocated for General Condition items and Project close-out. The aggregate total value for all tasks must be equal to the total Contract sum.

END OF SECTION 01025

SECTION 01030 ALTERNATES

1. **Use of Alternates**: Determination of the lowest three Bidders shall be on the basis of the sum of the Base Bid and any additive and deductive Alternates the Owner accepts, in the order in which they are listed only. The Owner will accept an Alternate only if all other previously listed Alternates are also accepted, unless acceptance by the Owner of Alternates in a different order does not affect determination of the lowest three bidders in any way.

2. **Execution:** (a) Coordinate pertinent related Work and modify surrounding work as required to complete the Project for each alternate.

(b) Description of Alternates:

Alternate No. 1: State the amount to be deleted from the Base Proposal Sum to provide all labor and materials required to eliminate installation of all work related to the installation of the Ice Storage System including the structural support platform.

END OF SECTION 01030

SECTION 01040 COORDINATION

1. **Project Coordination:**

(a) Before beginning Work the Contractor must coordinate with the State Agency representative to implement the schedule for the Project. Once the Project is started, it must be carried to completion without delay.(b)Any building utility service interruptions or outages including security required by the Contractor in performing the Work must be prearranged with the staff of the State Agency and must occur only during those scheduled times.(c) The Contractor is not responsible for removing room furnishings unless is required by the Contract Documents.

2. **Cutting and Patching:**

(a) The Contractor must do all cutting, fitting or patching of the Work that may be required to make its several parts fit together properly or make new Work join with the existing structure. The Contractor must take proper precautions so as not to endanger any existing Work. The Contractor must not cut or alter existing structural members or foundations unless specifically required by the Contract Documents.
(b) Holes or openings cut in exterior walls and roofs for installation of materials or equipment must be waterproofed by appropriate, approved materials and methods.
(c) All adjacent finished surfaces that are damaged by the new Work must be patched with materials matching existing surfaces. Joints between patched and existing material must be straight, smooth and flush. Workers skilled in its installation must apply all patching material.

END OF SECTION 01040

SECTION 01050 FIELD ENGINEERING

1. When applicable, the Contractor must employ a surveyor who must establish and maintain all lines and levels required for laying out and constructing the Work. The Contractor agrees to assume all responsibility due to inaccuracy of any Work of the surveyor, and including incorrect bench marks, their loss or disturbance. Upon completion of the Project, the Contractor must submit two copies of site layout Drawings prepared for the Project and certified by the surveyor.

END OF SECTION 01050

SECTION 01060 REGULATORY REQUIREMENTS

1. **Laws:** The Contractor and its Subcontractors/Suppliers must comply with all Federal, State and local Laws applicable to the Work and site.

2. **Codes:** All Works must be provided in accordance with the State Construction Code Act, 1972 PA 230, as amended, MCL 125.1501 et seq., International Building and Residential Codes and all applicable Michigan construction codes and fire safety including but not limited to: Michigan Building Code, Michigan Residential Code, Michigan Uniform Energy Code, Michigan Electrical Code, Michigan Rehabilitation Code for Existing Buildings, Michigan Mechanical Code, Michigan Elevator Code and Michigan Plumbing Code. If the Contractor observes that any Contract Document conflicts with any Laws or the State Construction Code or any permits in any respect, the Contractor must promptly notify the Professional in writing. If the Contractor provides any Work knowing or having to reason to know of such conflict, the Contractor must be responsible for that performance.

3. **Permits:** All required construction permits must be secured and their fees including inspection costs must be paid by the Contractor. The time incurred by the Contractor in obtaining construction permits must constitute time required to complete the Work and does not justify any increases to the Contract Time or Price, except when revisions to the Drawings and/or Specifications required by the permitting authority cause the Delays. The Contractor must pay all charges of Public Utilities for connections to the Work, unless otherwise provided by Cash Allowances specific to those connections.

4. **Taxes:** The Contractor must pay all Michigan sales and use taxes and any other similar taxes covering the Work that are currently imposed by legislative enactment and as administered by the Michigan Department of Treasury, Revenue Division. If the Contractor is not required to pay or bear the burden or obtains a refund of any taxes deemed to have been included in the

Bid and Contract Price, the Contract Price must be reduced by a like amount and that amount, whether as a refund or otherwise, must ensure solely to the benefit of the State of Michigan.

5. **Safety and Protection:** The Contractor and its Subcontractors/Suppliers must comply with all applicable Federal, State and local Laws governing the safety and protection of persons or property, including, but not limited to the Michigan Occupational Safety and Health Act (MIOSHA), 1974 PA 154, as amended, MCL 408.1001 et seq., and all rules promulgated under the Act. The Contractor is responsible for all damages, injury or loss to the Work, materials, equipment, fines, penalties as a result of any violation of such Laws, except when it's due to the fault of the Drawings or Specifications or to the Act, error or omission of the Owner or Professional. The Contractor is solely responsible for initiating, maintaining and supervising all safety precautions and programs and such responsibility must continue until such time as the Professional is satisfied that the Work, or Work inspected, is completed and ready for final payment. In doing the Work and/or in the event of using explosives, the Contractor must take all necessary precautions for the safety of, and must erect and maintain all necessary safeguards and provide the necessary protection to prevent damage, injury or loss to: (a) all employees on the Work and other persons who may be affected by the Work, (b) all the Work and materials and equipment to be incorporated into the Work, whether stored on or off the site, and (c) other property at or adjacent to the site, including trees, shrubs, lawns, walks, pavements, roadways, structures, utilities and Underground Utilities not designated for removal, relocation or replacement. In the event of severe weather, the Contractor must inspect the Work and the site and take all reasonably necessary actions and precautions to protect the Work and ensure that public access and safety are maintained.

6. **Fire Hazard Conditions:**

(a). The fire hazard classification of finish materials where used in the specification must be in accordance with the current Michigan Building Code.

(b) Classification must be determined by tunnel test in accordance with National Fire Protection Association (NFPA-255), American Society for Testing Materials (ASTM E-84) or Underwriters' Laboratories, Inc. (UL-723).

7. **Flame/Smoke Resistance Standards**: The Contractor must provide carpeting complying with "Class B" requirements as set forth in Michigan Department of State Police State Fire Safety Board "Health Care Facilities Fire Safety Rules' R29.1243, Rule 243, when tested in accordance with the following procedures:

(a) Tunnel Test: Test for surface burning characteristics, with ratings for flame spread, fuel contribution, and/or smoke density; ASTM E 84, UL 723, or NFPA No. 255.
(b) Pill Test: Test for flammability; ASTM D 2859, or DOC FF-1-70.
(c) Floor Radiant Panel Test: Test for burning under varying radiant energy levels; ASTM E 648, with minimum average radiant flux ratings not less than 0.45 watts/sq. cm.
(d) Smoke Density Test: Test in radiant heat chamber, with and without flame, for density of smoke generated; ASTM E 662, or NFPA No. 258, also known as NBS Smoke Density Chamber Test.

8. **Michigan Right-To-Know Law:** The Contractor and its Subcontractors/Suppliers must comply with MIOSHA, Michigan Right-to-Know Law (Public Act 80 of 1986) and the rules promulgated under it. The Act places certain requirements on employers to develop a communication program designed to safeguard the handling of hazardous chemicals through labeling of chemical containers and development and availability of Material Safety Data Sheets (MSDS), and to provide training for employees who work with these chemicals and develop a written hazard communications program. The Act also provides for specific employee rights, including the right to be notified of the location of MSDS and to be notified at the site of new or revised MSDS within five Business Days after receipt and to request MSDS copies from their employers. The Contractor, employer or Subcontractor must post and update these notices at the site.

9. **Environmental Requirements:** The Contractor and its Subcontractors/Suppliers must comply with all applicable Federal, State and local environmental Laws, standards, orders or requirements including but not limited to the National Environmental Policy Act of 1969, as amended, Michigan Natural Resources and Environmental Protection Act, P.A. 451 of 1994, as amended, the Clean Air Act, as amended, the Clean Water Act, as amended, the Safe Drinking Water Act, as amended, Pollution Prevention Act, as amended, Resource Conservation and Recovery Act, as amended, National Historic Preservation Act, as amended and Energy Policy and Conservation Act and Energy Standards for Buildings Except Low-Rise Residential Buildings, ANSI/ASHRAE/IESNA Standard 90.1-1999.

10. **Nondiscrimination:** For all State Contracts for goods or services in amount of $5,000 or more, or for Contracts entered into with parties employing three or more employees; in connection with the performance of Work under this Contract, the Contractor and its Subcontractors and Suppliers must comply with the following requirements:

10.1 Not to discriminate against any employee or applicant for employment because of race, color, religion, national origin, age, sex, height, weight or marital status and take affirmative action to ensure that applicants are employed and the employees are not subject to such discrimination. Such action must include, but is not be limited to, the following: employment, upgrading, demotion or transfer; recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training.

10.2 To state in all solicitations or advertisements for employees that all qualified applicants will receive consideration for employment without regard to race, color, religion, national origin, age, sex, height, weight or marital status.

10.3 To send, or have its collective bargaining representative send, each labor union or representative of workers with which there is a collective bargaining agreement or other contract or understanding, a notice advising the labor unions or workers' representative of the commitments under this provision.

10.4 To comply with the Elliot-Larsen Civil Rights Act, 1976 PA 453, as amended , MCL 37.2201 et seq.; the Michigan Persons With Disability Civil Rights Act, 1976 PA 220, as amended, MCL 37.1101 et Seq.; and all published rules, regulations, directives, and orders of the Michigan Civil Rights Commission (MCRC) which may be in effect on or before the date of Bid opening.

10.5 The Contractor must furnish and file compliance reports within the times, and using the forms prescribed by the MCRC. Compliance report forms may also elicit information as to the practices, policies, programs, and employment statistics of the Contractor and Subcontractors. The Contractor must permit access to Records by the MCRC and its agent for purposes of ascertaining compliance with the Contract and with rules, regulations, and orders of the MCRC.

10.6 If, after a hearing held under its rules, the MCRC finds that the Contractor has not complied with the nondiscrimination requirements of the Contract Documents, MCRC may, as part of its order, certify its findings to the Administrative Board of the State of Michigan, which may order the cancellation of the Contract and/or declare the Contractor ineligible for future contracts with the State until the Contractor complies with the MCRC's order.

11. Michigan Residency for Employees: Fifty percent of the persons employed on the Work by the Contractor must have been residents of the State of Michigan for not less than one year before beginning employment on the Work. This residency requirement may be reduced or waived to the extent that Michigan residents are not available or to the extent necessary to comply with the federal funds used for the Project. This requirement does not apply to employers who are signatories to collective bargaining agreements that allow for the portability of employees on an interstate basis.

END OF SECTION 01060

SECTION 01090 REFERENCES

1. References will be made in an abbreviated alpha numeric form to specific standard specifications, reference publications and building codes of federal or state agencies, manufacturers, associations or trade organizations. Such references will be identified by the alphabetic abbreviation which identifies the government agency, the association or organization followed by the rule, section or detail number that are to form a part of these specifications, the same as if fully set forth herein, and must be of latest issued date in effect three months before the Bid opening date shown on the Proposal and Contract. The abbreviations used are referred to as follows:

Abbreviation	Agency, Association or Organization
ACI	American Concrete Institute
AISC	American Institute of Steel Construction, Inc.
AMCA	Air Moving and Conditioning Association
ANSI	American National Standards Institute, Inc.
ASHRAE	American Society of Heating, Refrigerating and Air Conditioning Engineers
ASME	American Society of Mechanical Engineers
ASSE	American Society of Sanitary Engineering
ASTM	American Society of Testing and Materials
AWS	American Welding Society
AWWA	American Water Works Association
BOCA	Building Officials and Code
CDA	Copper Development Assn., Inc.
CLFMI	Chain Link Fence Manufacturer's Institute
CISPI	Cast Iron Soil Pipe Institute
CRSI	Concrete Reinforcing Steel Institute
CS	Commercial Standard
F/M	Factory Mutual Research Corporation
FS	Federal Specifications
HEW	United States Department of Health Education and Welfare
MDOT	Michigan Department of Transportation
NFPA	National Fire Protection Association
NSF	National Sanitation Foundation Testing Laboratory, Inc
NSWMA	National Solid Waste Management Association
PCA	Portland Cement Association
PDI	Plumbing and Drainage Institute
SMACNA	Sheet Metal & Air Conditioning Contractors

UL	Underwriters Laboratories, Inc.
USBM	United States Bureau of Mines
USDC	United States Department of Commerce

END OF SECTION 01090

SECTION 01100 PROJECT PROCEDURES

1. **Signage and Safety:** The Contractor must post appropriate construction signs to advise the occupants and visitors of occupied facilities of the limits of construction work areas, hardhat areas, excavations, construction parking and staging areas, etc. Advertising signage by contractors, subcontractors, or suppliers is not allowed. The Contractor must maintain safe and adequate pedestrian and vehicular access to fire hydrants, commercial and industrial establishments, churches, schools, parking lots, hospitals, fire and police stations and like establishments. The Contractor must obtain written approval from the Owner ten Calendar Days before connecting to existing facilities or interrupting the services on site.

2. **Barrier and Enclosures**:

(a) The Contractor must furnish, install and maintain as long as necessary and remove when no longer required adequate barriers, warning signs or lights at all dangerous points throughout the Work for protection of property, workers and the public. The Contractor must hold the State of Michigan harmless from damage or claims arising out of any injury or damage that may be sustained by any person or persons as a result of the Work under the Contract.

(b). **Street Barricades**: The Contractor must erect and maintain all street barricades, signal lights and lane change markers during the periods that a traffic lane is closed for their operations. There must be full compliance with rules and ordinances respecting such street barricading and devices must be removed when hazard is no longer present.**4. Construction Aids:**

(1) The Contractor must furnish, install, and maintain as long as necessary and remove when no longer required, safe and adequate scaffolding, ladders, staging, platforms, chutes, railings, hoisting equipment, etc., as required for proper execution of the Work. All construction aids must conform to Federal, State, and local codes or Laws for protection of workers and the public.
(2) **Debris Chute**: The Contractor must use a chute to lower debris resulting from their Work. The chute must be the enclosed type with its discharge directly into the truck or approved container.
(3) **Pumping and Drainage**: The Contractor must provide all pumping necessary to keep excavations and trenches free from water the entire period of Work on the Contract. The Contractor must construct and maintain any necessary surface drainage systems on the Work site so as to prevent water entering existing structures or to flow onto public or private property adjacent to the Agency's land, except for existing drainage courses or into existing drainage systems. The Contractor must prevent erosion of soils and blockage of any existing drainage system.

END OF SECTION 01100

SECTION 01200 PROJECT MEETINGS

1. **Pre-Construction Conferences**: The Project Director will schedule a pre-construction conference to be attended by the Professional, State Agency staff, and the Contractors. A project procedure as outlined in Form DTMB-0460, will be established for the Work during the pre-construction meeting. When no organizational meeting is called, the Contractor, before beginning any Work, must meet with the staff of the Agency and arrange a Work schedule for the Project. Once the Project has been started, the Contractor must carry it to completion without delay.

2. **Progress Meetings**: The Professional will schedule progress meetings to be held on the job site whenever needed to supply information necessary to prevent job interruptions, to observe the Work or to inspect completed Work. The Contractor must be represented at each progress meeting by persons with full authority to act for the Contractor in regard to all portions of the Work.

END OF SECTION 01200

SECTION 01300 SUBMITTALS

1. **Shop Drawings, Samples and Technical Submittals**: .

1.1 Contractor's Review: Before each submission, the Contractor must:
(a) determine and verify all field measurements, quantities, dimensions, instructions for installation and handling of equipment and systems, installation requirements (including location, dimensions, access, fit, completeness, etc.), materials, color, catalog numbers and other similar data as to correctness and completeness, and
(b) have reviewed and coordinated that technical Submittal with other technical submittals and the requirements of the Contract Documents.

1.2 Notice of Variation: The Contractor must give the Professional specific written notice of any variation from the requirements of the Contract Documents.

1.3 Contractor's Approval: The Contractor shall not submit unapproved submittals. Each submittal shall be stamped/certified to indicate that the submittal satisfies the requirements of the Contract Documents before submission to the Professional.

1.4 Responsibility and Authority: Neither the Owner's authority to review any of the Submittals by the Contractor, nor the Owner's decision to raise or not to raise any objections about the Submittals, creates or imposes any duty or responsibility on the Owner to exercise any such authority or decision for the benefit of the Contractor/Subcontractor/Supplier, any surety to any of them or any other third party. The Contractor is not relieved of responsibility for errors or omissions in shop drawings, product data, samples, or similar submittals just because the Professional approved them.

1.5 Final As-Built/Record Documents and Submittals: The approved Submittals are a part of the final As-Built/Record Documents required for processing final payment to the Contractor.

1.6 Submissions: Contractor must submit to the Professional:

(a) an electronic file(s) of the drawing(s) and mylar or sepia together with the prints of all Shop Drawings;
(b) all required samples; and
(c) all other technical submittals (test, results, test and safety procedures, O&M manuals, etc.) that are required by the Contract Documents

1.7 Professional's Review and Return: Submittals will be returned to the Contractor within fifteen Calendar Days. The Contractor is responsible for any time Delay and any cost incurred by the Professional, Contractor or Subcontractors/Suppliers as a result of resubmissions and re-reviews of a particular Submittal. The Contractor shall revise and correct submittals returned for revision and resubmittal until approval by the Professional is achieved. Time consumed by resubmissions and reviews of a particular submittal

2. **Progress Schedule:** Upon request, the Contractor must submit **four (4)** copies of the Progress Schedule for the Professional and Owner review. The Progress Schedule Submittals are intended to show:

(a) the priority and sequencing by which the Contractor intends to execute the Work (or Work remaining) to comply with Contract Times, those sequences of Work indicated in or required by the Contract Documents;
(b) how the Contractor anticipates foreseeable events, site conditions and all other general, local and prevailing conditions that may in any manner affect cost, progress, schedule, performance and furnishing of the Work; and
(c) how the Means and Methods chosen by the Contractor translate into activities and sequencing; and
(d) the actual timing and sequencing of completed Work.

Contractor must resolve the issues arising from the review by the Professional and/or the Owner and submit Progress Schedule Revision. The review of the Progress Schedule by the Professional or the Owner does not create or impose on the Owner or the Professional any responsibility for the timing, planning, scheduling or execution of the Work or the correctness of any such Progress Schedule detail. The Contractor must update the schedule monthly. The correctness of Progress Schedule remains the sole responsibility of the Contractor.

Shop Drawings: The Contractor shall deliver shop drawings of products, materials, assemblies, or equipment to the Professional.

2. Samples: The Contractor must deliver all samples of material or equipment to the job site for examination by the State Agency and the Professional. Samples will be examined by the Professional for conformance with the design concept of the Project and for compliance with the information given in the Contract Documents. The Contractor must furnish all Work in accordance with approved samples. The following general classifications of material and equipment require submission of samples. Samples of other items may be requested by the Professional at any time.

Item of Work	Type of Sample	Section Number
Unit Masonry	Sample Units	04200
Stone	Sample Units	04400
RFA Board Insulation	Sample Units	07220
Fiberglass Shingles	Color Samples	07312
Gutters and Downspouts	Sample Units	07631
Ceramic Tile	Sample Panel	09310
Ceramic Mosaics	Sample Panel	09320
Quarry Tiles	Sample Units	09330
Terrazzo Bonded	Color Plates	09411
Plastic Matric Terrazzo	Color Plates	09440
Epoxy Terrazzo	Color Plates	09441
Acoustical Ceilings	Sample Units	09510
Resilient Flooring	Sample Units	09650
Carpeting	Sample Units	09680
Special Flooring	Sample Panels	09700
Seamless Quartz Flooring	Sample Panels	09721
Coating System	Color Samples	09872
Painting	Color Samples	09900

END OF SECTION 01300

SECTION 01400 QUALITY CONTROL

1. **Testing Laboratory Services**: All tests required by the Owner must fulfill ASTM, ANSI, Commercial and other Standards for testing. The Contractor must submit a minimum of three copies of each test report to the Professional for evaluation and subsequent distribution. The following general classifications of Work require submission of test reports and/or certificates of inspection. Additional submissions may be requested by the Professional at any time.

Item of Work	Test Type	Section Number
Steel Fabrications		055000

2. **Tests:**

   (a) Paid by Owner

3. **Concrete/Asphalt Materials**: Before placement of any concrete, the Contractor must submit for the Professional's approval complete data on the trial concrete mix formulation and a testing laboratory report for ASTM C94, twenty-eight-day standard cylinder test for compressive strength of a sample of the concrete mix. For asphalt paving, the Contractor must submit the data and testing reports for ASTM D946, AC-5. The mix must have 4.5 to 6 percent of asphalt cement by weight for binder course and 5 to 7 percent of asphalt cement by weight for surface course in accordance with Asphalt Institute Manual MS-4, MS-13 and the current Michigan Department of Transportation (MDOT) Standard Specifications for Construction.

   (a) The Contractor must furnish to the Professional tickets showing mix formulation, Contractor's name, Project name, mix identification for each load of concrete/asphalt delivered and installed. If the technical specifications allow added water to the concrete mix after leaving the batch plant, the delivery ticket must reflect the added water. The Owner Field Representative must receive a copy of each delivery ticket for transmittal to the Professional for evaluation.

   (b) The Professional may require the Contractor to core drill questionable cast-in-place concrete/asphalt for laboratory testing. Should the laboratory analysis indicate the concrete/asphalt fails to meet specification requirements, the Contractor must pay all costs for core drilling and testing in the laboratory and replace the concrete/asphalt found to fail meeting the specification requirements. Should the laboratory analysis confirm that the concrete/asphalt meets specification requirements, the Owner will pay the Contractor for their costs for core drilling, concrete/asphalt patching and the laboratory fee for testing of the concrete/asphalt core samples.

END OF SECTION 01400

SECTION 01500 CONSTRUCTION FACILITIES AND TEMPORARY CONTROLS

1. The Contractor must furnish and install all temporary facilities and controls required by the Work, must remove them from State property upon completion of the Work, and the grounds and existing facilities must be restored to their original condition.

2. If water or electricity is available in the area where Work will be performed, the Contractor will not be charged for reasonable use of these services for construction operation. The Contractor must pay costs for installation and removal of any temporary connections including necessary safety devices and controls. Use of services must not disrupt or interfere with operations of the State Agency.

3. **Temporary Sanitary Facilities**:

   (a) **State Toilets**: the State Agency will designate a permanent toilet facility on the premises for use by personnel employed in the Work. The Contractor must repair any damage to the toilet facility caused by their employees and maintain it in a clean and sanitary condition.

4. **Field Office**: The state Agency will designate an area to be utilized for a field office.

END OF SECTION 01500

SECTION 01600 MATERIAL AND EQUIPMENT

1. The Contractor must furnish and be responsible for all materials, equipment, facilities, tools, supplies and utilities necessary for completing the Work. All materials and equipment must be provided as described in the Contract Documents and of good quality, free of defect and new and must be applied, installed, connected, erected, used, cleaned and conditioned following the manufacturer's and Suppliers' instructions.

2. **Delivery, Storage, and Handling**: All materials and equipment delivered to and used in the Work must be suitably stored and protected from the elements. The areas used for storage must only be those approved by the State Agency. The Owner assumes no responsibility for stored material. The ownership and title to materials will not be vested in the Owner before materials are incorporated in the Work, unless payment is made by the Owner for stored materials and equipment. After delivery, before and after installation, the Contractor must protect materials and equipment against theft, injury or damage from all causes. For all materials and equipment, the Contractor must provide complete information on installation, operation and preventive maintenance.

   (a) The Contractor must cover and protect bulk materials while in storage which are subject to deterioration because of dampness, the weather or contamination. The Contractor must keep materials in their original sealed containers, unopened, with labels plainly indicating manufacturer's name, brand, type and grade of material and must immediately remove from the Work site containers which are broken, opened, watermarked and/or contain caked, lumpy or otherwise damaged materials.

   (b) The Contractor must keep equipment stored outdoors from contact with the ground, away from areas subject to flooding and covered with weatherproof plastic sheeting or tarpaulins.

   (a) The Contractor must certify that any materials stored off-site are:

      a) Stored on property owned or leased by the Contractor or owned by the agency.
      b) Insured against loss by fire, theft, flood or other hazards.
      c) Properly stored and protected against loss or damage.
      d) In compliance with the plans and specifications.
      e) Specifically allotted, identified, and reserved for the project.
      f) Itemized for tracking and payment.
      g) Subject to these conditions until the items are delivered to the project site.

END OF SECTION 01600

SECTION 01650 FACILITY START-UP

1. **Tests**: The complete installation consisting of the several parts of equipment and systems installed according to the requirements of the Contract Documents must be ready in all respects for use by the State Agency and must be subjected to a test at full operating conditions and pressures for normal conditions of use.

2. **Adjustments**: Contractor must adjust and replace the Work which is necessary to fulfill the requirements of the Contract Documents and to comply with the directions and recommendations of the manufacturer of the several parts of equipment, and to comply with all provisions of architectural and/or engineering drawings/specifications and all codes and regulations which may apply to the entire installation.

3. **Demonstration**: Contractor must provide an on-site demonstration and training of all systems operations to the Owner when it is substantially completed.

END OF SECTION 01650

SECTION 01700 CONTRACT CLOSE-OUT

1. **Substantial Completion**: The Contractor must notify the Professional, the Project Director and the Agency when the Work will be substantially complete. If the Professional, Owner, and Agency agree that the project is Substantially Complete, the Professional and Project Director will inspect the Work. The Professional, upon determining that the Work, or a portion of the Work inspected, is substantially complete, will prepare a Punch List and will attach it to the respective Certificate of Substantial Completion. The Contractor must be represented on the job site at the time this inspection is made and thereafter must complete all Work by the date set for final acceptance by the Owner.

2. **Cleaning**:

   (a) **Regular Cleaning**: The Contractor must remove all scrap or removed material, debris or rubbish from the Project work site at the end of each working day and more frequently whenever the Owner Field Representative deems such material to be a hazard. The Contractor cannot discard materials on the grounds of the State Agency without the express permission of the Project Director. No salvage or surplus material may be sold on the premises of the State Agency. No burning of debris or rubbish is allowed. Any recycled materials must be recycled and the Contractor will be required to provide recycling plan.

   (b) **Final Cleaning**: Before final acceptance by the State, the Contractor must clean all of the Work and existing surfaces, building elements and contents that were soiled by their operations and make repairs for any damage or blemish that was caused by the Work.

END OF SECTION 01700

SECTION 01800 MAINTENANCE

1. The Contractor is responsible for maintaining the following parts of Work in good order and proper working conditions and must take all necessary actions for their protection until they are placed for use by the Owner: (*** Professional to list the items***)

END OF SECTION 01800

APPENDIX I

GLOSSARY

GLOSSARY

Activity–An element in the Progress Schedule establishing a requisite step, or the time and resources required, for completing the part of the Work associated with that Activity.

Addenda–Written instruments that are used by the Owner and/or Professional to incorporate interpretations or clarifications, modifications and other information into the Bidding Documents. An Addendum issued after Bid opening to those Bidders who actually submitted a Bid, for the purpose of re-bidding the Work without re-advertising, is referred to as a **post-Bid** Addendum.

Agency- Any unit, section, division, department or other instrumentality of the State that benefits from the Work.

Alternate–Refers to work specified in the Bidding Documents for which the Bidder must bid a Bid Price.

Apparent Low Bidders: Those Bidders whose Base Bid, when added to those specific Alternates the Owner intends to accept, yields the three lowest sums of Bid and Alternates. Additional Bidders may be considered Apparent Low Bidders if their Bid, when added to those specific Alternates the Owner intends to accept, yields a sum within 10% of the lowest of the Apparent Low Bidder's sum. If a qualified disabled veteran meets the requirements of the contract solicitation and with the veteran's preference is the lowest Bidder it is considered the Apparent Low Bidder.

Archaeological Feature–Any prehistoric or historic deposit of archaeological value, as determined by a representative of a State agency that is duly authorized to evaluate such findings and render such judgments. An Archaeological Feature deposit may include, but is not limited to Indian habitations, ceremonial sites, abandoned settlements, treasure trove, artifacts or other objects with intrinsic archaeological value and that relate to the history and culture of the State of Michigan. The Archaeological Features are listed under Section 00800 Supplementary Conditions.

Authorized Technical Data–Information and data contained in a report of exploration and tests of subsurface conditions. Also, any physical data (dimension, location, conditions, etc.) contained in those Drawings of physical conditions of existing surface and subsurface facilities.

Best Value-The bids will be evaluated for best value based on price and qualitative components that may include but are not limited to technical design, technical approach, quality of proposed personnel, and management plans, per PA 430 of 2012.

Bid–Written offer by a Bidder for the Work, as specified, which designates the Bidder's Base Bid and Bid Prices for all Alternates. The term *Bid* includes a *re-bid*.

Bidder–The Person acting directly, or through an authorized representative, who submits a Bid directly to the **Owner**.

Bidding Documents–The proposed Contract Documents as advertised, and all Addenda issued before execution of the Contract.

Bid Price– The Bidder's price for a lump sum item of work, or the product of the Bidder's unit price for an item of Unit Price Work times the quantity given on the Bid Form for that item.

Bid Security–Security serving as a guarantee that the Bidder will conform to all conditions.

Bidding Requirements–The Advertisement, Instructions to Bidders, Supplementary Instructions, Information for Bidders, Bid Form, Bid Form Attachments and qualification submittals, as advertised and as modified by Addenda, and any other Section included within Division 0 of the Bidding Documents for the purpose of governing bidding and award of the Contract.

Board–The Administrative Board of the State of Michigan.

Bond– Security furnished by the **Contractor**, as required by the Contract Documents.

Business Day–Any Day except Saturdays, Sundays and holidays observed by the **Owner.**

Bulletin–A request used by the **Owner** to describe a change in the Work under consideration by the **Owner** and to request the **Contractor** to submit a proposal for the corresponding adjustment in Contract Price and/or Contract Time, if any.

Calendar Day–Every day shown on the calendar, Saturdays, Sundays and holidays included.

Cash Allowance–An **Owner**-specified sum included within the Contract Price to reimburse the **Contractor** for the actual purchase/furnished cost of materials and/or equipment or other designated items, as specifically provided in the Contract

Documents. Although the scope (e.g., the required quantity) of any Work covered by a Cash Allowance is sufficiently detailed in the Contract Documents for the purposes of bidding the required labor costs, Subcontract costs, construction equipment costs and general conditions costs and Fee, it is understood that the required materials, equipment or other designated items are of uncertain purchase cost at the time of Bid or are yet to be specified in more detail by the **Professional** as to quality, appearance, durability, finish and such other necessary features affecting purchase price.

Change Order–A written order issued and signed by the **Owner**, which amends the Contract Documents for changes in the Work or an adjustment in Contract Price and/or Contract Time, or both.

Contract Award–The official action of the **Board** or the **Director-FBSA** awarding the Contract to the **Contractor**.

Contract Documents–Written and graphic documents that form the legal agreement between the **Owner** and the **Contractor**, consisting of this document, completed Bid and Contract forms, terms and conditions of the contract, specifications, drawings, addenda, Notice of Award, Notice-to-Proceed and contract change orders.

Contract Price–The total compensation, including authorized adjustments, payable by the **Owner** to the **Contractor** (subject to provisions for Unit Price Work).

Contract Times–The Contract Times for the entire Work are the periods allowed, including authorized adjustments, for Substantial Completion and final completion of the Work. The Contract Times for a designated portion of the Work are the periods allowed for Substantial Completion and final completion of any such portion of the Work, as specified in the Contract Documents.

Contractor–Business enterprise with which the **Owner** has entered into the Contract.

Correction Period–Period during which the **Contractor** must, in accordance with the Contract Documents, (a) correct or, if rejected, remove and replace Defective Work, and (b) maintain warranties for materials and equipment in full force and effect.

Cost of the Work Involved–The sum of all costs that would be, or actually were, necessarily incurred by the **Contractor** in providing any Work Involved with the related change, less the costs that would be, or would have been, incurred by the **Contractor** to provide such Work without the related **change**.

Defective–As determined by the Professional, an adjective which when referring to or when applied to the term "Work" refers to (a) Work not conforming to the Contract Documents or not meeting the requirements of an inspection, test or approval, or (b) Work itemized in a Punch List which the **Contractor** fails to complete or correct within a reasonable time after issuance of the Punch List by the **Professional**.

Delay–Any act or omission or other event that in any manner adversely affects or alters the schedule, progress or completion of all or any part of the Work. Delay is a generic term intended to include deferral, stoppage, slow down, interruption and extended performance, and all related hindrance, rescheduling, disruption, interference, inefficiency and productivity and production losses.

Department (DTMB)–Department of Technology, Management and Budget of the State of Michigan.

Director is the Director of the **Department.**

Director-FBSA is the Director of **DTMB** Facilities and Business Services Administration.

Division–Each of the numbered, distinct parts (starting with Division 0) into which the Specifications are divided.

Drawings–Part of the Contract Documents showing the Work. Drawings must neither serve nor be used as Shop Drawings.

Emergency–A condition affecting the safety or protection of persons, or the Work, or property at or adjacent to the site.

Facilities and Business Services Administration (FBSA)-Entity in the **Department** responsible for design, construction, and operations and maintenance of facilities.

Fee for the Work Involved (Fee)–An established, percentage mark-up on the Cost of the Work Involved which is allowed to the **Contractor** for (a) reasonable administrative costs, and (b) negotiated, reasonable profit on the Cost of the Work Involved.

Hazardous Material–Asbestos containing materials (ACMs), Polychlorinated biphenyls (PCBs), petroleum products, such construction materials as paint thinners, solvents, gasoline, oil, etc., and any other like material the manufacture, use, treatment, storage, transportation or disposal of which is regulated by federal, State or local Laws governing the protection of public health, natural resources or the environment.

Invitation To Bid (ITB) -The solicitation document presenting the terms and conditions that will become part of the Contract when the Bid is accepted.

Law(s)–Means federal, State and local statutes, ordinances, orders, rules and/or regulations.

MCL–The Michigan Compiled Laws of the State of Michigan.

Means and Methods–Includes means, methods, techniques, sequences and/or procedures applicable to the Work.

Notice of Award–Written notice accepting the Bid to the lowest responsive, responsible Bidder and designating the Contract Price (and establishing the Alternates accepted by the **Owner**).

Notice-to-Proceed–Written notice issued by the Project Director directing the Contractor to commence the construction activities and establishing the start date of the Contract Time.

On-Site Inspection–The **Professional's** on-site examination of the **Contractor's** completed or in progress Work to determine and verify to the Project Director that the quantity and quality of all Work complies with the requirements of the Contract Documents.

Owner–The State of Michigan, with whom the **Contractor** has entered into the Contract and for whom the Work is to be provided.

Owner Field Representative–A State employee or consultant, acting under the direction of the Project Director, providing on-site, periodic observation and documentation of the Work for compliance with the Contract Documents.

Partial Use–Use by the **Owner** of a designated portion of the Work before accomplishing Substantial Completion of the entire Work. Partial Use does not mean Substantial Completion of the portion of the Work placed in use by the **Owner**.

Person–Individuals, partnerships, corporations, receivers, trustees, joint ventures or any other legal entity and any combinations of any of them.

Political Subdivision–Any county, city, village or other local unit of the State, including any agency, department or instrumentality of any such county, city, village or other local unit.

Post–Bid Submittal –A Qualification Submittal required of the Bidder selected under Section 00100 - 22 before Contract Award, and which is used by the Owner in the evaluation of the Bid of the selected Bidder.

Professional Services Contractor *(PSC or* ***Professional****)*–The individual or business entity who has the authority to practice the design disciplines required by the Contract Documents. An Agency with appropriate licensing may replace the PSC in their role if a consultant is not used.

Project–The total construction, which includes the Work and possibly other work completed by others, as indicated in the Contract Documents.

Project Director*-D*esignated State employee(s) (a) Responsible for directing and supervising the **Professional's** services during the period allowed for completion of the Work; and/or (b) Acting as representative for the **Owner** and for the enforcement of the Contract Documents, approving payment to the **Contractor** and coordinating the activities of the State, **Owner, Professional** and **Contractor.**

Project Schedule–Work Schedule that shows the **Contractor's** approach to planning, scheduling and execution of the Work and that accurately portrays completed Work as to sequencing and timing, as provided in the Contract Documents.

Project Specifications–The Contract Documents organized into Divisions. "Technical Specifications" means Divisions of the Specifications consisting of technical descriptions of materials, equipment, construction systems, standards and workmanship.

Provisionary Allowance–An amount included within the Contract Price to reimburse the **Contractor** for the cost to furnish and perform Work that is uncertain because, for example, it is indeterminate in scope and may not be shown or detailed in the Contract Documents.

Punch List–A list of minor items to be completed or corrected by the **Contractor,** any one of which do not materially impair the use of the Work for its intended purpose.

Qualified Disabled Veteran (QDV)-*QDV as defined by* Public Act 22 of 2010, MCL 18.1241.3 and supported by a DD214 Proof of Service and Discharge, a Veterans Administration rating decision letter, proof of disability (if the disability is not indicated on the DD214), and appropriate legal documents setting forth the 51% natural persons QDV ownership.

Record Documents–Drawings, Specifications, Addenda, Change Orders, Change Authorizations, Bulletins, inspection, test and approval reports, photographs, written clarifications and interpretations and all other documents recording, or annotated to show, all revisions and deviations between the as-built installation and the Contract Documents, all approved Submittals and all clarifications and interpretations.

Records–Books, reports, documents, electronic data, and other evidence relating to the bidding, award and furnishing and performance of the Work.

Recycled Material–Recycled paper products, structural materials made from recycled plastics, re-refined lubricating oils, reclaimed solvents, recycled asphalt and concrete, recycled glass products, re-treaded tires, ferrous metals containing recycled scrap metals and all other materials that contain (a) waste materials generated by a business or consumer, (b) materials that have served their intended purpose, and/or (c) materials that have been separated from solid waste for collection, recycling and disposition in the percentage determined by the State as provided by Law.

Request for Payment–The form provided by the **Owner** (Payment Request DTMB-0440) to be used by the **Contractor** in requesting payment for Work completed, which must enclose all supporting information required by the Contract Documents.

Schedule of Values–A schedule of pay items, which subdivides the Work into its various parts and which details, for each itemized part, cost and pricing information required for making payments for Work performed. The sum of all pay item costs in the Schedule of Values must equal the Contract Price for the Work.

Shop Drawings–Includes drawings, diagrams, illustrations, standard schedules, performance charts, instructions and other data prepared by or for the **Contractor** to illustrate some part of the Work, or by a Supplier and submitted by the **Contractor** to illustrate items of material or equipment.

Soil Erosion and Sedimentation Control–The planning, design and installation of appropriate Best Management Practices designed and engineered specifically to reduce or eliminate the off-site migration of soils via water runoff, wind, vehicle tracking, etc. Soil erosion and sedimentation control in the State of Michigan is regulated under The Natural Resources Environmental Protection Act; Soil Erosion and Sedimentation Control, 1994 PA 451, Part 91, as amended, MCL 324.9101 et seq. Soil erosion and sedimentation control associated with this Contract is monitored and enforced by the DTMB-FBSA.

State–The State of Michigan in its governmental capacity, including its departments, divisions, agencies, boards, offices, commissions, officers, employees and agents. Non-capitalized references to a state refer to a state other than the State of Michigan.

State Construction Code–The Michigan State Construction Code Act, 1972 PA 230, as amended, MCL 125.1501 et seq.

Subcontractor–A Person having an agreement with the Contractor to provide labor at the site and furnishing materials and/or equipment for incorporation into the Work.

Submittals–Includes technical Submittals, Progress Schedules and those other documents required for submission by the Contract Documents. The term "technical Submittal" includes Shop Drawings, brochures, samples, Operation and Maintenance (O&M) Manuals, test procedures and any other Submittal the Contract Documents require the **Contractor** to submit to demonstrate how the items covered, after installation or incorporation into the Work, will conform to the information given in the Contract Documents and be compatible with the design of the completed Work as a functioning whole as indicated in the Contract Documents.

Substantial Completion–The Work, or a portion of the Work designated in the Contract Documents as eligible for separate Substantial Completion, has been completed in accordance with the Contract Documents as determined by the PSC, to the extent that the **Owner** can use or occupy the entire Work, or the designated portion of the Work, for the use intended without any outstanding, concurrent Work at the site, except as may be required to complete or correct Punch List items.

Supplier–A manufacturer or fabricator, or a distributor, material man or vendor representing a manufacturer or fabricator, who has an agreement with the Contractor to furnish materials and/or equipment.

Underground Utilities–Pipelines, piping, conduit, duct, cables, wells, tanks, tunnels and appurtenances, or other similar facilities, installed underground to convey or support conveyance of potable water, sprinkler or irrigation water, fire protection systems, electricity, gases, steam, petroleum products, sewerage and drainage removal, telephone, communications, cable TV, traffic or control systems.

Unit Price Work–Work involving specified quantities (i.e., related Work quantities) which when performed is measured by the **Professional** and paid using the measured quantities and unit prices contained in the Contract Documents. Performance of Unit

Price Work for undefined quantities is contingent upon conditions encountered at the site, as determined and authorized by the **Professional**.

Unit Price Work, Specified–Work of specified and defined quantities (i.e., quantities are detailed in, and can be taken-off from, the Contract Documents) that when performed is measured by the **Professional** and paid based on the measured quantities and unit prices contained in the Contract Documents.

Work (as in *"the Work,"* "*the entire Work*")–The entire *completed Construction* required by the Contract Documents. The Work results from furnishing and performing all services, obligations, responsibilities, management, supervision, labor, materials, equipment, construction equipment, general conditions, permits, taxes, patent fees and royalties, testing, inspection and approval responsibilities, warranties, temporary facilities, small tools, field supplies, Bonds, insurance, mobilization, close-out, overhead and all connections, devices and incidental items of any kind or nature required and/or made necessary by the Contract Documents.

Work Involved, any Work Involved–Existing or prospective Work (a) reflected in any notice, proposal or claim, or (b) reflected in changes ordered or in process, or (c) affected by Delay.

APPENDIX II

SPECIAL WORKING CONDITIONS

DTMB Facilities and Business Services Administration
Security Clearance Request

Contractor Instructions

The purpose of this document is to establish security and supervision requirements for contract personnel requiring access to Department of Technology, Management and Budget (DTMB) facilities.

A DTMB Security Clearance form must be completed before an individual is granted access to a facility. Access approval will be in effect for one year from date of DTMB Facility Services approval or until estimated project completion date (whichever occurs first).

Contract personnel agree to adhere to all DTMB rules and regulations which in DTMB facilities. Access will only be granted for normal business hours. (Monday-Friday, 8:00 a.m.-5:00 p.m. except State holidays). DTMB Facilities and Business Services Administration, Facility Services section must clear any exception in advance.

Contract personnel will be required to submit the following to DTMB Facility Services Manager or Regional Manager before entering a DTMB facility:

Procedure for submitting form electronically (preferred and recommended)

1. Complete a *DTMB Security Clearance form* (using Microsoft Excel) and include the following:

   - Company name
   - Company Contact name and phone number
   - Complete name (**last name first**) and date of birth for all employees requiring access.

2. Email completed form to DTMB Facility Manager for an individual building or DTMB Regional Facility Manager for multiple building requests.

Procedure for submitted in person or mail delivery

1. Complete a *DTMB Security Clearance form* (using Microsoft Excel) and include the following:

   - Company name
   - Company Contact name and phone number
   - Complete name (**last name first**) and date of birth for all employees requiring access.

2. Return completed form to DTMB Facility Manager for an individual building or DTMB Regional Facility Manager for multiple building requests.

Note: This request must be received a minimum of 48 hours before enter a DTMB Facility.

DTMB Facility Access Criteria:

1. Present pictured ID.
2. Name must appear on the clearance list.
3. Sign-in and wear a dated visitor's pass *(must be visibly displayed at all times).*
4. Return visitor pass to security desk at days end.

Note: Individuals whose name does not appear on the clearance list are required to be signed in by a member of the DTMB Facility Services staff.

Failure to comply with the above procedure will result in the individual(s) being delayed and may be cause for denying access to DTMB facilities.

DEPARTMENT OF HUMAN SERVICES

The Work comprising this Project will be performed at a Department of Human Services (DHS) Facility and the Contractor must comply with the following special working rules:

1. Contractor must submit a list of names, driver's license numbers, birth dates, and additional information when requested, on all persons expected to be employed on the Project site. Such list must be submitted directly to the Superintendent's office or to the Owner Field Representative for approval before any person's appearance at the site for Work assignments.

2. Contractor will be allowed to work within or on State Agency confines from 7:00 a.m. to 6:00 p.m., Monday through Friday only. No Work must be performed outside these hours without written permission from the State Agency.

3. All employees of the Contractor may be subject to individual body search each time they enter the State Agency confines. Packages or containers of any kind may be opened for inspection. All employees of the Contractor will be required to have identification cards or badges furnished by the Contractor.

4. There must be no fraternization between the State residents and the Contractor's employees. Any attempt by any resident to engage in conversation or interfere in any way with a Contractor's employee must be reported immediately to State Agency staff.

5. No firearms, weapons, explosives, alcoholic beverages, drugs, or medicines may be brought into the confines of the Agency.

6. Any tools or material left within the confines of the State Agency overnight must be in locked cabinets, locked rooms of otherwise secured.

7. There will be no exchange, loaning or borrowing of tools, equipment or manpower between DHS personnel and the Contractor.

8. Sanitary facilities will be assigned by the State Agency for the use of the Contractor's employees and it must be the responsibility of the Contractor to keep said sanitary facilities in clean and neat condition.

9. Contractor must follow rules pertaining to foot and vehicle traffic as established by the State Agency. Contractor must observe all off-limit restricted areas beyond which no unauthorized personnel may trespass. The Contractor and his workmen may not leave the assigned Work areas.

10. Security staff may be assigned to the work areas. They may inspect and search areas under construction at any time, including the Contractor's equipment.

11. Keys to certain doors may be assigned to the Contractor. Such doors must be kept locked at all times.

12. The Superintendent of the State Agency reserves the right to revise these rules as required to meet the security needs of the Agency.

APPENDIX III

SPECIAL PROJECT PROCEDURES

DEMOLITION/REMODELING PROJECT PROCEDURES

Furnish all equipment, materials, labor and services necessary to complete all building demolition required in connection with the existing building, in order to permit the installation of new Work. The goal of the Owner is to generate the least amount of waste or debris possible. However, inevitable waste and debris that are generated shall be reused, salvaged, or recycled, and disposal in landfills shall be minimized to the extent economically feasible. The Contractor will be required to prepare waste management plan for the collection, handling, storage, transportation and disposal of the waste generated at the construction site for the Owner's review and approval. The Contractor will be required to produce waste management progress reports.

1. Locations: Notations are made in various places on the Drawings to call attention to building demolition which is required; however, these Drawings are not intended to show each and every item to be removed. The Contractor and the Subcontractors for the various trades must remove the materials related to their respective trades as required to permit the construction of the new Work as shown.

2. Permits: The Contractor must secure from the appropriate agencies all required permits necessary for proper execution of the work before starting work on the project site. All fees for securing the permits must be paid by the Contractor, including all inspection costs which may be legally assessed by the Bureau of Construction Codes in accordance with the authority granted under the Public Act 1980 PA 371, as amended.

3. Enclosures: Where it is necessary to make alterations to walls, floors or roof of the existing building, the Contractor must provide and maintain dustproof partitions to separate the parts where Work is being done from the adjoining parts occupied by the State Agency. Where any parts are opened and exposed to the elements, the Contractor must provide weather tight enclosures to fully protect the structure and its contents.

4. Waste Management Plan: The management plan must address waste source identification and separation, returns, reuse and salvage, recycling, landfill options, alternatives to landfilling, materials handling procedures and transportation.

5. Preparation: Protect all existing Work that is to remain and restore in an approved manner any such Work that becomes damaged.

   5.1 Rubbish and debris resulting from the Work must be removed immediately from the site by the Contractor. However, any recyclable materials must be recycled; the Contractor will be required to use alternatives to landfills for waste disposal such as reuse or recycle of asphalt, bricks, concrete, masonry, plastics, paint, glass, carpet, metals, wood, drywall, insulation and any other waste materials to the extent practical.

   5.2 Unless otherwise specified, the Agency will remove existing furniture, drapery tracks, draperies, window blinds, and other equipment items, which might interfere with the new construction.

6. Coordination: Demolition work, in connection with any new unit of Work, must not be commenced until all new materials required for completion of that new item of Work are at hand.

7. Waste Management Plan Progress Reports: Submit an updated report with the payment requests. The progress reports shall include:
   a. The amount of waste sent to a landfill, tipping fees paid and the total disposal cost. Include supporting documents such as manifests, weight tickets, receipts and/or invoices.
   b. Records for each material recycled/reused/salvaged from the project including the amount, date removed from the job site, final destination, transportation cost, recycled materials and the net cost/ savings.
   c. Breakdown of waste by type generated to date.
   d. Recycling/salvage/landfill rates.
   e. Percent of waste recycled/salvaged to date.

HAZARDOUS MATERIALS PROJECT PROCEDURES

1. The Contractor must use, handle, store, dispose of, process, transport and transfer any material considered a Hazardous Material in accordance with all Federal, State and local Laws. If the Contractor encounters material reasonably believed to be a Hazardous Material and which may present a substantial danger, the Contractor must immediately stop all affected work, give written notice to the Owner of the conditions encountered, and take appropriate health and safety precautions.

2. This project has been identified by the DTMB-FBSA as having a possibility of containing Hazardous Waste materials to be legally removed from the Project job site in order to complete the Work as described in the Proposal And Contract. If removal of friable asbestos material is required, the Contractor must contact the Air Quality Division, Department of Environmental Quality, at **(5I7) 284-6773**, for a permit and furnish all training, labor, materials, services, insurance, and equipment necessary to carry out the removal operations of all Hazardous Materials from the Project job site, as identified by the Scope of Work, or encountered on the Project job site, in accordance with State and Federal Hazardous Waste Codes. A Contract Change Order will be written to modify the existing Contract to pay for the additional cost.

3. Environmental Hazards (air, water, land and liquid industrial) are handled by the Waste and Hazardous Materials Division, Michigan Department of Environmental Quality (DEQ) in carrying out the requirements of the Federal Environmental Protection Agency (EPA). For general information and/or a copy of the latest regulations and publications call (517) 335-2690.

4. The Michigan Occupational Safety and Health Administration (MIOSHA) provides protection and regulations for the safety and health of workers. The Department of Licensing and Regulatory Affairs provides for the safety of workers. The Department of Community Health provides for the health of workers (517/373-3740) (TDD 517/373-3573).

   4.1 Contractor must post any applicable State and/or Federal government regulations at the job site in a prominent location.

   4.2 Contractor must be responsible for training their workers in safe work practices and in proper removal methods when coming in contact with hazardous chemicals.

5. Applicable Regulations:

   5.1 Natural Resources and Environmental Protection Act – PA 451 of 1994, as amended, including Part 111 – Hazardous Waste Management, Part 121 – Liquid Industrial Waste and Part 147 – PCB compounds.

   5.2 RCRA, 1976 - Resource Conservation and Recovery Act: This federal statute regulates generation, transportation, treatment, storage or disposal of hazardous wastes nationally.

   5.3 TSCA, 1979 – Toxic Substances Control Act: This statute regulates the generation, transportation, storage and disposal of industrial chemicals such as PCBs.

6. Definitions: Hazardous substances are ignitable, corrosive, reactive, and/or toxic, based on their chemical characteristics.

   6.1 Under Federal and Michigan Law, a Small Quantity Generator of hazardous waste provides from 220 to less than 2,000 lbs./month or never accumulates 2,200 lbs. or more.

   6.2 A Generator size provider of hazardous waste provides 2,200 lbs. or more/month or accumulates above 2,200 lbs.

7. Disposals: To use an off-site hazardous waste disposal facility, the Contractor must use the Uniform Hazardous Waste Manifest (shipping paper). Small quantities of hazardous waste may not be disposed of in sanitary landfills used for solid waste.

8. Federal, State and local Laws and regulations may apply to the storage, handling and disposal of Hazardous Materials and wastes at each State Agency. Contact the **Environmental Assistance Center** of the Michigan Department of Environmental Quality (MDEQ) at **1-800-662-9278**, Fax to: 517-241-0673 or e-mail to: DEQ-EAD-env-assist@michigan.gov for general MDEQ information including direct and referral assistance on air, water and wetlands permits; contaminated site clean-ups; underground storage tank removals and remediation; hazardous and solid waste disposal; pollution prevention and recycling; and compliance-related assistance. The Center provides businesses, municipalities, and the general public with a single point of access to MDEQ's environmental programs.

ASBESTOS ABATEMENT PROJECT PROCEDURES

Should this Work require the renovation or demolition of a building or structure initially constructed on or prior to 1980, the Contractor will use the attached copy of a Comprehensive Asbestos Building Survey for those portions of the building or structure being impacted and must plan his or her work to minimize disturbance of any known or assumed asbestos containing materials (ACM). In addition, if this building or structure was constructed on or prior to 1980, the Contractor's On-Site Superintendent and all Subcontractor On-Site Superintendents for trades that could potentially disturb known or assumed ACM, must, as a minimum, have and provide documentation of current Asbestos Awareness Training.

If the Comprehensive Asbestos Building Survey identifies known or assumed ACM that will potentially be disturbed as a part of the Contractor's renovation or demolition activities, the Contractor must remove, transport and dispose of these materials at no additional cost to the Owner and prior to any other work taking place within the immediate vicinity of said material. If required, the Contractor must provide the Owner a minimum of 10 working day notification prior to the start of any asbestos abatement activities with abatement in occupied buildings being completed even if they will be conducted during off hours (nights, weekends and state holidays).

If the Contractor encounters a suspected ACM that was not previously identified within the Comprehensive Asbestos Building Survey, the Contractor must immediately stop all affected work, give written notice to the Owner of the conditions encountered, and take appropriate health and safety precautions. If, after providing Owner notification, the Contractor is directed to sample and/or remove the suspected ACM in question, a Contract Change Order will be written to modify the existing Contract to pay for the additional cost. Any abatement shall be completed in accordance with the requirements of this Section.

If removal of ACM is required, removal must be completed by a contractor currently licensed to remove asbestos by the State of Michigan, Department of Licensing and Regulatory Affairs (DLARA) Asbestos Program and abatement must be performed in accordance with all Federal, State and local Laws and Regulations. Prior to commencing any asbestos abatement activities, the licensed abatement contractor must submit, as required by Federal, State and Local Laws and Regulations, a "Notification of Intent to Renovate/Demolish" to both the State of Michigan, Department of Environmental Quality (DEQ), Air Quality Division and to the DLARA, Asbestos Program, to comply with National Emission Standards for Hazardous Air Pollutants (NESHAP), and the Clean Air Act (CAA). All regulated ACM must be disposed of at an approved Type II (general refuse) landfill and must be in leak-tight wrapping or containers. ACM that is non friable and is not in poor condition or will not become regulated ACM at any time can be disposed of in a Type III (construction debris) landfill.

At the completion of each abatement activity, the Contractor must perform clearance testing in accordance with National Institute for Occupational Safety and Health (NIOSH) 582 "Sampling and Evaluating Airborne Asbestos Dust". All air samples shall indicate concentrations of less than 0.01 fibers/cc for clearance to be met. Clearance testing shall be performed by a third party Asbestos Consultant. The Asbestos Consultant selected by the Contractor shall be experienced and knowledgeable about the methods for asbestos air sampling and be able to select representative numbers and locations of samples. It is mandatory that the Asbestos Consultant's on-site hygienist performing sampling and analysis have certification that he/she has passed a NIOSH 582 or equivalent course.

The NESHAP asbestos regulations, notification form, guidelines and fact sheets are available on DEQ's web site www.michigan.gov/deq under heading Air; then click on Asbestos NESHAP Program. For guidelines on submitting notifications pursuant to the Asbestos Contractors Licensing Act, contact the DLARA, Occupational Health Division, Asbestos Program at (517) 322-1320 or visit DLARA's web site www.michigan.gov/asbestos.

LEAD ABATEMENT PROJECT PROCEDURES

Should this Work require the renovation or demolition of a building or structure, the workers are assumed to be exposed to lead or materials containing lead above acceptable levels until proven otherwise through personal air sampling and analysis. The Contractor shall take all steps necessary to assure that his/her employees, are not exposed to lead at concentrations greater than the Permissible Exposure Limit as per the State of Michigan Department of Licensing and Regulatory Affairs Occupational Health Standards Part 603 "Lead Exposure in Construction". In addition, the Contractor shall convey this same requirement to all subcontractors that may be under his/her control.

The employer shall comply with the Michigan Lead Abatement Act, as amended, and the Lead Hazard Control rules and must communicate information concerning lead hazards according to the requirements of Michigan Occupational Safety and Health Administration (MIOSHA) Part 603 and the Occupational Safety and Health Administration's (OSHA's) Hazard Communication Standard for the construction industry, 29 CFR 1926.59, including but not limited to safety equipment (e.g. personal fit-tested and approved respirators and protective clothing), worker rotation (on a short-cycle and regular basis), working practices (e.g. sanding, cutting, grinding, abraded, burning and heat-gun stripping of lead based paint are not allowed), the requirements concerning warning signs and labels, material safety data sheets (MSDS), and employee information and training. Employers shall comply with the requirements of 29 CFR 1926.62(l) - Employee Information and Training.

If lead or materials containing lead will be disturbed as a part of the work to be performed, the Contractor must remove, transport and dispose of these materials at no additional cost to the Owner and prior to any other work taking place within the immediate vicinity of said material. The Contractor must provide the Owner a minimum 10 working day notification prior to the start of any lead abatement activities with abatement in occupied buildings being completed even if they will be conducted during off hours (nights, weekends and state holidays). Abatement is defined as an activity specifically designed to permanently remove lead paint, lead-contaminated dust or other lead containing materials, the installation of a permanent enclosure or encapsulation of lead paint or other lead containing materials, the replacement of lead-painted surfaces or fixtures, the removal or covering of lead-contaminated soil, and any preparation, cleanup, disposal and post-abatement clearance testing associated with these activities. Renovation, remodeling, landscaping, or other activity, that is not designed to permanently eliminate lead paint hazards, but is instead designed to repair, restore, or remodel a structure, or housing unit even though the activity may incidentally result in a reduction or elimination of a lead paint hazard is not considered abatement.

If abatement of lead or materials containing lead is required, abatement must be completed by a currently certified Lead Abatement Contractor as certified by the State of Michigan, Department of Community Health. In addition, the Lead Abatement Contractor's workers and supervisors must also be currently certified by the State of Michigan, Department of Community Health. Lead abatement including clearance testing shall be performed in accordance with the State of Michigan, Lead Abatement Act, Part 54A Lead Abatement and with all other Federal, State and local Laws and Regulations that may apply. Prior to commencing any lead abatement activities, the abatement must be designed by a currently certified Lead Professional Project Designer. At the completion of abatement, the abated area shall meet clearance requirements with clearance testing to be performed by a Clearance Technicians currently certified by the State of Michigan Department of Community Health.

For additional information about certifications, guidance and regulations for lead hazard control activities, visit www.michigan.gov/leadsafe.

APPENDIX V

PREVAILING WAGE RATES

RICK. SNYDER
GOVERNOR

STATE OF MICHIGAN

Prevailing Wages
PO Box 30476
Lansing, MI 48909
517-284-7800

Informational Sheet: Prevailing Wages on State Projects

REQUIREMENTS OF THE PREVAILING WAGES ON STATE PROJECTS ACT, PUBLIC ACT 166 OF 1965

The State of Michigan determines prevailing rates pursuant to the Prevailing Wages on State Projects Act, Public Act 166 of 1965, as amended. The purpose of establishing prevailing rates is to provide minimum rates of pay that must be paid to workers on construction projects for which the state or a school district is the contracting agent and which is financed or financially supported by the state. By law, prevailing rates are compiled from the rates contained in collectively bargained agreements which cover the locations of the state projects. The official prevailing rate schedule provides an hourly rate which includes *wage and fringe benefit totals* for designated construction mechanic classifications. The overtime rates also include *wage and fringe benefit totals*. Please pay special attention to the overtime and premium pay requirements. Prevailing wage is satisfied when wages plus fringe benefits paid to a worker are equal to or greater than the required rate.

State of Michigan responsibilities under the law:

- The department establishes the prevailing rate for each classification of construction mechanic ***requested by a contracting agent*** prior to contracts being let out for bid on a state project.

Contracting agent responsibilities under the law:

- If a contract is not awarded or construction does not start within 90 days of the date of the issuance of rates, a re-determination of rates must be requested by the contracting agent.
- Rates for classifications needed but not provided on the Prevailing Rate Schedule, ***must*** be obtained ***prior*** to contracts being let out for bid on a state project.
- The contracting agent, by written notice to the contractor and the sureties of the contractor known to the contracting agent, may terminate the contractor's right to proceed with that part of the contract, for which less than the prevailing rates have been or will be paid, and may proceed to complete the contract by separate agreement with another contractor or otherwise, and the original contractor and his sureties shall be liable to the contracting agent for any excess costs occasioned thereby.

Contractor responsibilities under the law:

- Every contractor and subcontractor shall keep posted on the construction site, in a conspicuous place, a copy of all prevailing rates prescribed in a contract.
- Every contractor and subcontractor shall keep an accurate record showing the name and occupation of and the actual wages and benefits paid to each construction mechanic employed by him in connection including certified payroll, as used in the industry, with said contract. This record shall be available for reasonable inspection by the contracting agent or the department.
- Each contractor or subcontractor is separately liable for the payment of the prevailing rate to its employees.
- The prime contractor is responsible for advising all subcontractors of the requirement to pay the prevailing rate prior to commencement of work.
- The prime contractor is secondarily liable for payment of prevailing rates that are not paid by a subcontractor.
- A construction mechanic *shall only* be paid the apprentice rate if registered with the United States Department of Labor, Bureau of Apprenticeship and Training and the rate is included in the contract.

Enforcement:

A person who has information of an alleged prevailing wage violation on a state project may file a complaint with the State of Michigan. The department will investigate and attempt to resolve the complaint informally. During the course of an investigation, if the requested records and posting certification are not made available in compliance with Section 5 of Act 166, the investigation will be concluded and a referral to the Office of Attorney General for civil action will be made. The Office of Attorney General will pursue costs and fees associated with a lawsuit if filing is necessary to obtain records.

Informational Sheet: Prevailing Wages on State Projects

General Information Regarding Fringe Benefits

Certain fringe benefits **may** be credited toward the payment of the Prevailing Wage Rate:

- If a fringe benefit is paid directly to a construction mechanic
- If a fringe benefit contribution or payment is made on behalf of a construction mechanic
- If a fringe benefit, which may be provided to a construction mechanic**,** is pursuant to a written contract or policy
- If a fringe benefit is paid into a fund, for a construction mechanic

When a fringe benefit is not paid by an hourly rate, the hourly credit will be calculated based on the annual value of the fringe benefit divided by 2080 hours per year (52 weeks @ 40 hours per week).

The following is an example of the types of fringe benefits allowed and how an hourly credit is calculated:

Vacation	40 hours X $14.00 per hour = $560/2080 =	$.27
Dental insurance	$31.07 monthly premium X 12 mos. = $372.84 /2080 =	$.18
Vision insurance	$5.38 monthly premium X 12 mos. = $64.56/2080 =	$.03
Health insurance	$230.00 monthly premium X 12 mos. = $2,760.00/2080 =	$1.33
Life insurance	$27.04 monthly premium X 12 mos. = $324.48/2080 =	$.16
Tuition	$500.00 annual cost/2080 =	$.24
Bonus	4 quarterly bonus/year x $250 = $1000.00/2080 =	$.48
401k Employer Contribution	$2000.00 total annual contribution/2080 =	$.96
Total Hourly Credit		$3.65

Other examples of the types of fringe benefits allowed:

- Sick pay
- Holiday pay
- Accidental Death & Dismemberment insurance premiums

The following are examples of items that **will not** be credited toward the payment of the Prevailing Wage Rate

- Legally required payments, such as:
  - Unemployment Insurance payments
  - Workers' Compensation Insurance payments
  - FICA (Social Security contributions, Medicare contributions)
- Reimbursable expenses, such as:
  - Clothing allowance or reimbursement
  - Uniform allowance or reimbursement
  - Gas allowance or reimbursement
  - Travel time or payment
  - Meals or lodging allowance or reimbursement
  - Per diem allowance or payment
- Other payments to or on behalf of a construction mechanic that are not wages or fringe benefits, such as:
  - Industry advancement funds
  - Financial or material loans

MARTHA B. YODER
DIRECTOR

OVERTIME PROVISIONS for MICHIGAN PREVAILING WAGE RATE COMMERCIAL SCHEDULE

1. Overtime is represented as a nine character code. Each character represents a certain period of time after the first 8 hours Monday thru Friday.

	Monday thru Friday	Saturday	Sunday & Holidays	Four 10s
First 8 Hours		**4**	**8**	**9**
9th Hour	**1**	**5**		
10th Hour	**2**	**6**		
Over 10 hours	**3**	**7**		

Overtime for Monday thru Friday after 8 hours:
the 1st character is for time worked in the 9th hour *(8.1 - 9 hours)*
the 2nd character is for time worked in the 10th hour *(9.1 - 10 hours)*
the 3rd character is for time worked beyond the 10th hour *(10.1 and beyond)*

Overtime on Saturday:
the 4th character is for time worked in the first 8 hours on Saturday *(0 - 8 hours)*
the 5th character is for time worked in the 9th hour on Saturday *(8.1 - 9 hours)*
the 6th character is for time worked in the 10th hour *(9.1 - 10 hours)*
the 7th character is for time worked beyond the 10th hour *(10.01 and beyond)*

Overtime on Sundays & Holidays
The 8th character is for time worked on Sunday or on a holiday

Four Ten Hour Days
The 9th character indicates if an optional 4-day 10-hour per day workweek can be worked ***between Monday and Friday* without paying overtime after 8 hours worked, unless otherwise noted in the rate schedule. To *utilize a 4 ten workweek, notice is required from the employer to employee prior to the start of work on the project.***

2. Overtime Indicators Used in the Overtime Provision:
   H - means TIME AND ONE-HALF due
   X - means TIME AND ONE-HALF due after 40 HOURS worked
   D - means DOUBLE PAY due
   Y - means YES an optional 4-day 10-hour per day workweek can be worked without paying overtime after 8 hours worked
   N - means NO an optional 4-day 10-hour per day workweek *can not* be worked without paying overtime after 8 hours worked

3. EXAMPLES:
   HHHHHHHDN - This example shows that the 1½ rate must be used for time worked after 8 hours Monday thru Friday *(characters 1 - 3);* for all hours worked on Saturday, 1½ rate is due *(characters 4 - 7).* Work done on Sundays or holidays must be paid double time *(character 8).* The N *(character 9)* indicates that 4 ten-hour days is not an acceptable workweek at regular pay.

   XXXHHHHDY - This example shows that the 1½ rate must be used for time worked after 40 hours are worked Monday thru Friday *(characters 1-3);* for hours worked on Saturday, 1½ rate is due *(characters 4 – 7).* Work done on Sundays or holidays must be paid double time *(character 8).* The Y *(character 9)* indicates that 4 ten-hour days is an acceptable alternative workweek.

ENGINEERS - CLASSES OF EQUIPMENT LIST

UNDERGROUND ENGINEERS

CLASS I

Backfiller Tamper, Backhoe, Batch Plant Operator, Clam-Shell, Concrete Paver (2 drums or larger), Conveyor Loader (Euclid type), Crane (crawler, truck type or pile driving), Dozer, Dragline, Elevating Grader, End Loader, Gradall (and similar type machine), Grader, Power Shovel, Roller (asphalt), Scraper (self propelled or tractor drawn), Side Broom Tractor (type D-4 or larger), Slope Paver, Trencher (over 8' digging capacity), Well Drilling Rig, Mechanic, Slip Form Paver, Hydro Excavator.

CLASS II

Boom Truck (power swing type boom), Crusher, Hoist, Pump (1 or more 6" discharge or larger gas or diesel powered by generator of 300 amps or more, inclusive of generator), Side Boom Tractor (smaller than type D-4 or equivalent), Tractor (pneu-tired, other than backhoe or front end loader), Trencher (8' digging capacity and smaller), Vac Truck.

CLASS III

Air Compressors (600 cfm or larger), Air Compressors (2 or more less than 600 cfm), Boom Truck (non-swinging, non-powered type boom), Concrete Breaker (self-propelled or truck mounted, includes compressor), Concrete Paver (1 drum, ½ yard or larger), Elevator (other than passenger), Maintenance Man, Mechanic Helper, Pump (2 or more 4" up to 6" discharge, gas or diesel powered, excluding submersible pump), Pumpcrete Machine (and similar equipment), Wagon Drill Machine, Welding Machine or Generator (2 or more 300 amp or larger, gas or diesel powered).

CLASS IV

Boiler, Concrete Saw (40HP or over), Curing Machine (self-propelled), Farm Tractor (w/attachment), Finishing Machine (concrete), Firemen, Hydraulic Pipe Pushing Machine, Mulching Equipment, Oiler (2 or more up to 4", exclude submersible), Pumps (2 or more up to 4" discharge if used 3 hrs or more a day-gas or diesel powered, excluding submersible pumps), Roller (other than asphalt), Stump Remover, Vibrating Compaction Equipment (6' wide or over), Trencher (service) Sweeper (Wayne type and similar equipment), Water Wagon, Extend-a-Boom Forklift.

HAZARDOUS WASTE ABATEMENT ENGINEERS

CLASS I

Backhoe, Batch Plant Operator, Clamshell, Concrete Breaker when attached to hoe, Concrete Cleaning Decontamination Machine Operator, Concrete Pump, Concrete Paver, Crusher, Dozer, Elevating Grader, Endloader, Farm Tractor (90 h.p. and higher), Gradall, Grader, Heavy Equipment Robotics Operator, Hydro Excavator, Loader, Pug Mill, Pumpcrete Machines, Pump Trucks, Roller, Scraper (self-propelled or tractor drawn), Side Boom Tractor, Slip Form Paver, Slope Paver, Trencher, Ultra High Pressure Waterjet Cutting Tool System Operator, Vactors, Vacuum Blasting Machine Operator, Vertical Lifting Hoist, Vibrating Compaction Equipment (self-propelled), and Well Drilling Rig.

CLASS II

Air Compressor, Concrete Breaker when not attached to hoe, Elevator, End Dumps, Equipment Decontamination Operator, Farm Tractor (less than 90 h.p.), Forklift, Generator, Heater, Mulcher, Pigs (Portable Reagent Storage Tanks), Power Screens, Pumps (water), Stationary Compressed Air Plant, Sweeper, Water Wagon and Welding Machine.

Requestor: DTMB
Project Description: /Flint State Office Building Reroof Existing Building, Ice

Project Number: File No. 071/12354.JAN – Index No. 53322
County: Genesee

Official Rate Schedule

Every contractor and subcontractor shall keep posted on the construction site, in a conspicuous place, a copy of all prevailing wage and fringe benefit rates prescribed in a contract.

Classification Name / Description		Last Updated	Straight Hourly	Time and a Half	Double Time	Overtime Provision
Underground Laborer Open Cut, Class II						
Mortar and material mixer, concrete form man, signal man, well point man, manhole, headwall and catch basin builder, guard rail builders, headwall, seawall, breakwall, dock builder and fence erector.	LAUC-Z3-2	10/30/2014	$33.75	$44.14	$54.53	X X X X X X X D Y
Apprentice Rates:						
0-1,000 work hours			$29.18	$37.29	$45.39	
1,001-2,000 work hours			$30.10	$38.67	$47.23	
2,001-3,000 work hours			$31.01	$40.04	$49.05	
3,001-4,000 work hours			$32.84	$42.78	$52.71	
Underground Laborer Open Cut, Class III						
Air, gasoline and electric tool operator, vibrator operator, drillers, pump man, tar kettle operator, bracers, rodder, reinforced steel or mesh man (e.g. wire mesh, steel mats, dowel bars, etc.), cement finisher, welder, pipe jacking and boring man, wagon drill and air track operator and concrete saw operator (under 40 h.p.), windlass and tugger man, and directional boring man.	LAUC-Z3-3	10/30/2014	$33.87	$44.32	$54.77	X X X X X X X D Y
Apprentice Rates:						
0-1,000 work hours			$29.27	$37.42	$45.57	
1,001-2,000 work hous			$30.19	$38.80	$47.41	
2,001-3,000 work hours			$31.11	$40.18	$49.25	
3,001-4,000 work hours			$32.95	$42.94	$52.93	
Underground Laborer Open Cut, Class IV						
Trench or excavating grade man.	LAUC-Z3-4	10/30/2014	$33.92	$44.40	$54.87	X X X X X X X D Y
Apprentice Rates:						
0-1,000 work hours			$29.31	$37.48	$45.65	
1,001-2,000 work hours			$30.23	$38.86	$47.49	
2,001-3,000 work hours			$31.15	$40.24	$49.33	
3,001-4,000 work hours			$33.00	$43.02	$53.03	

Official Request #: 1277

Official Rate Schedule

Every contractor and subcontractor shall keep posted on the construction site, in a conspicuous place, a copy of all prevailing wage and fringe benefit rates prescribed in a contract.

Classification Name / Description		Last Updated	Straight Hourly	Time and Half	a Double Time	Overtime Provision
Underground Laborer Open Cut, Class V						
Pipe Layer	LAUC-Z3-5	10/30/2014	$34.06	$44.61	$55.15	X X X X X X X D Y
Apprentice Rates:						
0-1,000 work hours			$29.41	$37.64	$45.85	
1,001-2,000 work hours			$30.34	$39.03	$47.71	
2,001-3,000 work hours			$31.27	$40.42	$49.57	
3,001-4,000 work hours			$33.13	$43.22	$53.29	
Underground Laborer Open Cut, Class VI						
Grouting man, top man assistant, audio visual television operations and all other operations in connection with closed circuit television inspection, pipe cleaning and pipe relining work and the installation & repair of water service pipe & appurtenances	LAUC-Z3-6	10/30/2014	$31.36	$40.56	$49.75	X X X X X X X D Y
Apprentice Rates:						
0-1,000 work hours			$27.39	$34.60	$41.81	
1,001-2,000 work hours			$28.18	$35.79	$43.39	
2,001-3,000 work hours			$28.98	$36.99	$44.99	
3,001-4,000 work hours			$30.57	$39.38	$48.17	
Underground Laborer Open Cut, Class VII						
Restoration laborer, seeding, sodding, planting, cutting, mulching and topsoil grading and the restoration of property such as replacing mail boxes, wood chips, planter boxes, flagstones etc.	LAUC-Z3-7	10/30/2014	$28.51	$36.28	$44.05	X X X X X X X D Y
Apprentice Rates:						
0-1,000 work hours			$25.25	$31.40	$37.53	
1,001-2,000 work hours			$25.90	$32.37	$38.83	
2,001-3,000 work hours			$26.56	$33.36	$40.15	
3,001-4,000 work hours			$27.86	$35.31	$42.75	

SECTION 024119 - SELECTIVE DEMOLITION

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Demolition and removal of selected portions of building or structure.
   2. Demolition and removal of selected site elements.

1.2 MATERIALS OWNERSHIP

A. Unless otherwise indicated, demolition waste becomes property of Contractor.

1.3 PREINSTALLATION MEETINGS

A. Pre-demolition Conference: Conduct conference at Project site.

1.4 INFORMATIONAL SUBMITTALS

A. Engineering Survey: Submit engineering survey of condition of building.
B. Proposed Protection Measures: Submit report, including Drawings, that indicates the measures proposed for protecting individuals and property, for environmental protection , for dust control and , for noise control. Indicate proposed locations and construction of barriers.
C. Schedule of selective demolition activities with starting and ending dates for each activity.
D. Predemolition photographs or video.

1.5 FIELD CONDITIONS

A. Owner will occupy portions of building immediately adjacent to selective demolition area. Conduct selective demolition so Owner's operations will not be disrupted.
B. Conditions existing at time of inspection for bidding purpose will be maintained by Owner as far as practical.
C. Notify Architect of discrepancies between existing conditions and Drawings before proceeding with selective demolition.
D. Hazardous Materials: It is not expected that hazardous materials will be encountered in the Work.
   1. Hazardous materials will be removed by Owner before start of the Work.
   2. If suspected hazardous materials are encountered, do not disturb; immediately notify Architect and Owner. Hazardous materials will be removed by Owner under a separate contract.
E. Storage or sale of removed items or materials on-site is not permitted.
F. Utility Service: Maintain existing utilities indicated to remain in service and protect them against damage during selective demolition operations.
   1. Maintain fire-protection facilities in service during selective demolition operations.
G. Arrange selective demolition schedule so as not to interfere with Owner's operations.

1.6 WARRANTY

A. Existing Warranties: Remove, replace, patch, and repair materials and surfaces cut or damaged during selective demolition, by methods and with materials and using approved contractors so as not to void existing warranties.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Regulatory Requirements: Comply with governing EPA notification regulations before beginning selective demolition. Comply with hauling and disposal regulations of authorities having jurisdiction.
B. Standards: Comply with ASSE A10.6 and NFPA 241.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verify that utilities have been disconnected and capped before starting selective demolition operations.
B. Inventory and record the condition of items to be removed and salvaged.

3.2 UTILITY SERVICES AND MECHANICAL/ELECTRICAL SYSTEMS

A. Existing Services/Systems to Remain: Maintain services/systems indicated to remain and protect them against damage.
B. Existing Services/Systems to Be Removed, Relocated, or Abandoned: Locate, identify, disconnect, and seal or cap off utility services and mechanical/electrical systems serving areas to be selectively demolished.
    1. Owner will arrange to shut off indicated services/systems when requested by Contractor.
    2. Arrange to shut off utilities with utility companies.
    3. If services/systems are required to be removed, relocated, or abandoned, provide temporary services/systems that bypass area of selective demolition and that maintain continuity of services/systems to other parts of building.

3.3 PROTECTION

A. Temporary Protection: Provide temporary barricades and other protection required to prevent injury to people and damage to adjacent buildings and facilities to remain.
B. Temporary Shoring: Design, provide, and maintain shoring, bracing, and structural supports as required to preserve stability and prevent movement, settlement, or collapse of construction and finishes to remain, and to prevent unexpected or uncontrolled movement or collapse of construction being demolished.
C. Remove temporary barricades and protections where hazards no longer exist.

3.4 SELECTIVE DEMOLITION

A. General: Demolish and remove existing construction only to the extent required by new construction and as indicated. Use methods required to complete the Work within limitations of governing regulations and as follows:

1. Neatly cut openings and holes plumb, square, and true to dimensions required. Use cutting methods least likely to damage construction to remain or adjoining construction. Use hand tools or small power tools designed for sawing or grinding, not hammering and chopping. Temporarily cover openings to remain.
2. Cut or drill from the exposed or finished side into concealed surfaces to avoid marring existing finished surfaces.
3. Do not use cutting torches until work area is cleared of flammable materials. At concealed spaces, such as duct and pipe interiors, verify condition and contents of hidden space before starting flame-cutting operations. Maintain portable fire-suppression devices during flame-cutting operations.
4. Maintain fire watch during and for at least 2 hours after flame-cutting operations.
5. Locate selective demolition equipment and remove debris and materials so as not to impose excessive loads on supporting walls, floors, or framing.
6. Dispose of demolished items and materials promptly.

B. Site Access and Temporary Controls: Conduct selective demolition and debris-removal operations to ensure minimum interference with roads, streets, walks, walkways, and other adjacent occupied and used facilities.

C. Existing Items to Remain: Protect construction indicated to remain against damage and soiling during selective demolition. When permitted by Architect, items may be removed to a suitable, protected storage location during selective demolition and cleaned and reinstalled in their original locations after selective demolition operations are complete.

3.5 CLEANING

A. Remove demolition waste materials from Project site and dispose of them in an EPA-approved construction and demolition waste landfill acceptable to authorities having jurisdiction.
1. Do not allow demolished materials to accumulate on-site.
2. Remove and transport debris in a manner that will prevent spillage on adjacent surfaces and areas.
3. Remove debris from elevated portions of building by chute, hoist, or other device that will convey debris to grade level in a controlled descent.
4. Comply with requirements specified in Section 017419 "Construction Waste Management and Disposal."

B. Burning: Do not burn demolished materials.

C. Clean adjacent structures and improvements of dust, dirt, and debris caused by selective demolition operations. Return adjacent areas to condition existing before selective demolition operations began.

END OF SECTION 024119

SECTION 051200 - STRUCTURAL STEEL FRAMING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Structural steel.

1.2 DEFINITIONS

A. Structural Steel: Elements of the structural frame indicated on Drawings and as described in AISC 303, "Code of Standard Practice for Steel Buildings and Bridges."

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.
B. Shop Drawings: Show fabrication of structural-steel components.

1.5 INFORMATIONAL SUBMITTALS

A. Qualification Data: For Installer and fabricator.
B. Welding certificates.
C. Field quality-control and special inspection reports.

1.6 QUALITY ASSURANCE

A. Fabricator Qualifications: A qualified fabricator that participates in the AISC Quality Certification Program and is designated an AISC-Certified Plant, Category STD.
B. Installer Qualifications: A qualified installer who participates in the AISC Quality Certification Program and is designated an AISC-Certified Erector, Category CSE.
C. Welding Qualifications: Qualify procedures and personnel according to AWS D1.1/D1.1M, "Structural Welding Code - Steel."
D. Comply with applicable provisions of the following specifications and documents:
   1. AISC 303.
   2. AISC 360.
   3. RCSC's "Specification for Structural Joints Using ASTM A 325 or A 490 Bolts."

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Connections: Provide details of simple shear connections required by the Contract Documents to be selected or completed by structural-steel fabricator to withstand loads indicated and comply with other information and restrictions indicated.
   1. Select and complete connections using schematic details indicated and AISC 360.
   2. Use Allowable Stress Design; data are given at service-load level.
B. Moment Connections: Type FR, fully restrained.
C. Construction: Combined system of moment frame and braced frame.

2.2 STRUCTURAL-STEEL MATERIALS

A. W-Shapes: ASTM A 992/A 992M.
B. Channels, Angles, Shapes: ASTM A 36/A 36M.
C. Plate and Bar: ASTM A 36/A 36M.
D. Cold-Formed Hollow Structural Sections: ASTM A 500/A 500M, Grade B, structural tubing.
E. Steel Pipe: ASTM A 53/A 53M, Type E or Type S, Grade B.
F. Welding Electrodes: Comply with AWS requirements.

2.3 BOLTS, CONNECTORS, AND ANCHORS

A. High-Strength Bolts, Nuts, and Washers: ASTM A 325 (ASTM A 325M), Type 1, heavy-hex steel structural bolts; ASTM A 563, Grade C, (ASTM A 563M, Class 8S) heavy-hex carbon-steel nuts; and ASTM F 436 (ASTM F 436M), Type 1, hardened carbon-steel washers; all with plain finish.
   1. Direct-Tension Indicators: ASTM F 959, Type 325 (ASTM F 959M, Type 8.8), compressible-washer type with plain finish.
B. High-Strength Bolts, Nuts, and Washers: ASTM A 490 (ASTM A 490M), Type 1, heavy-hex steel structural bolts; ASTM A 563, Grade DH, (ASTM A 563M, Class 10S) heavy-hex carbon-steel nuts; and ASTM F 436 (ASTM F 436M), Type 1, hardened carbon-steel washers with plain finish.
   1. Direct-Tension Indicators: ASTM F 959, Type 490 (ASTM F 959M, Type 10.9), compressible-washer type with plain finish.
C. Zinc-Coated High-Strength Bolts, Nuts, and Washers: ASTM A 325 (ASTM A 325M), Type 1, heavy-hex steel structural bolts; ASTM A 563, Grade DH (ASTM A 563M, Class 10S) heavy-hex carbon-steel nuts; and ASTM F 436 (ASTM F 436M), Type 1, hardened carbon-steel washers.
   1. Finish: Hot-dip or mechanically deposited zinc coating.
D. Shear Connectors: ASTM A 108, Grades 1015 through 1020, headed-stud type, cold-finished carbon steel; AWS D1.1/D1.1M, Type B.

2.4 PRIMER

A. Primer: Comply with Section 099600 "High-Performance Coatings."
B. Primer: SSPC-Paint 25, Type I, zinc oxide, alkyd, linseed oil primer.
C. Primer: Fabricator's standard lead- and chromate-free, nonasphaltic, rust-inhibiting primer complying with MPI#79 and compatible with topcoat.

2.5 FABRICATION

A. Structural Steel: Fabricate and assemble in shop to greatest extent possible. Fabricate according to AISC 303, "Code of Standard Practice for Steel Buildings and Bridges," and to AISC 360.
B. Shear Connectors: Prepare steel surfaces as recommended by manufacturer of shear connectors. Use automatic end welding of headed-stud shear connectors according to AWS D1.1/D1.1M and manufacturer's written instructions.

2.6 SHOP CONNECTIONS

A. High-Strength Bolts: Shop install high-strength bolts according to RCSC's "Specification for Structural Joints Using ASTM A 325 or A 490 Bolts" for type of bolt and type of joint specified.
   1. Joint Type: Snug tightened.

B. Weld Connections: Comply with AWS D1.1/D1.1M and AWS D1.8/D1.8M for tolerances, appearances, welding procedure specifications, weld quality, and methods used in correcting welding work.

2.7 SHOP PRIMING

A. Shop prime steel surfaces except the following:
   1. Surfaces embedded in concrete or mortar. Extend priming of partially embedded members to a depth of 2 inches (50 mm).
   2. Surfaces to be field welded.
   3. Surfaces of high-strength bolted, slip-critical connections.
   4. Surfaces to receive sprayed fire-resistive materials (applied fireproofing).
   5. Galvanized surfaces.
   6. Surfaces enclosed in interior construction.
B. Surface Preparation: Clean surfaces to be painted. Remove loose rust and mill scale and spatter, slag, or flux deposits. Prepare surfaces according to the following specifications and standards:
   1. SSPC-SP 2, "Hand Tool Cleaning."
   2. SSPC-SP 3, "Power Tool Cleaning."
   3. SSPC-SP 7/NACE No. 4, "Brush-off Blast Cleaning."
C. Priming: Immediately after surface preparation, apply primer according to manufacturer's written instructions and at rate recommended by SSPC to provide a minimum dry film thickness of 1.5 mils (0.038 mm). Use priming methods that result in full coverage of joints, corners, edges, and exposed surfaces.

2.8 SOURCE QUALITY CONTROL

A. Testing Agency: Owner will engage a qualified testing agency to perform shop tests and inspections.
   1. Provide testing agency with access to places where structural-steel work is being fabricated or produced to perform tests and inspections.
B. Bolted Connections: Inspect shop-bolted connections according to RCSC's "Specification for Structural Joints Using ASTM A 325 or A 490 Bolts."
C. Welded Connections: Visually inspect shop-welded connections according to AWS D1.1/D1.1M and the following inspection procedures, at testing agency's option:
   1. Liquid Penetrant Inspection: ASTM E 165.
   2. Magnetic Particle Inspection: ASTM E 709; performed on root pass and on finished weld. Cracks or zones of incomplete fusion or penetration are not accepted.
   3. Ultrasonic Inspection: ASTM E 164.
   4. Radiographic Inspection: ASTM E 94.
D. Prepare test and inspection reports.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verify, with certified steel erector present, elevations of concrete- and masonry-bearing surfaces and locations of anchor rods, bearing plates, and other embedments for compliance with requirements.
B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 ERECTION

A. Set structural steel accurately in locations and to elevations indicated and according to AISC 303 and AISC 360.
B. Maintain erection tolerances of structural steel within AISC 303, "Code of Standard Practice for Steel Buildings and Bridges."

3.3 FIELD CONNECTIONS

A. High-Strength Bolts: Install high-strength bolts according to RCSC's "Specification for Structural Joints Using ASTM A 325 or A 490 Bolts" for type of bolt and type of joint specified.
   1. Joint Type: Snug tightened.
B. Weld Connections: Comply with AWS D1.1/D1.1M[and AWS D1.8/D1.8M] for tolerances, appearances, welding procedure specifications, weld quality, and methods used in correcting welding work.
   1. Comply with AISC 303 and AISC 360 for bearing, alignment, adequacy of temporary connections, and removal of paint on surfaces adjacent to field welds.
   2. Remove backing bars or runoff tabs, back gouge, and grind steel smooth.
   3. Assemble and weld built-up sections by methods that maintain true alignment of axes without exceeding tolerances in AISC 303, "Code of Standard Practice for Steel Buildings and Bridges," for mill material.

3.4 FIELD QUALITY CONTROL

A. Special Inspections: Owner will engage a qualified special inspector to perform the following special inspections:
   1. Verify structural-steel materials and inspect steel frame joint details.
   2. Verify weld materials and inspect welds.
   3. Verify connection materials and inspect high-strength bolted connections.
B. Testing Agency: Owner will engage a qualified testing agency to perform tests and inspections.
C. Bolted Connections: Inspect bolted connections according to RCSC's "Specification for Structural Joints Using ASTM A 325 or A 490 Bolts."
D. Welded Connections: Visually inspect field welds according to AWS D1.1/D1.1M.
   1. In addition to visual inspection, test and inspect field welds according to AWS D1.1/D1.1M and the following inspection procedures, at testing agency's option:
      a. Liquid Penetrant Inspection: ASTM E 165.
      b. Magnetic Particle Inspection: ASTM E 709; performed on root pass and on finished weld. Cracks or zones of incomplete fusion or penetration are not accepted.
      c. Ultrasonic Inspection: ASTM E 164.
      d. Radiographic Inspection: ASTM E 94.

END OF SECTION 051200

SECTION 055119 - METAL GRATING

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes industrial-type, straight-run stairs with steel-grating treads and railings attached to metal grating.

1.2 ACTION SUBMITTALS

A. Product Data: For metal grating.
B. Shop Drawings: Include plans, elevations, sections, details, and attachments.

PART 2 - PRODUCTS

2.1 METALS

A. Metal Surfaces, General: Provide materials with smooth, flat surfaces unless otherwise indicated. For components exposed to view in the completed Work, provide materials without seam marks, roller marks, rolled trade names, or blemishes.
B. Steel Plates, Shapes, and Bars: ASTM A 36/A 36M.
C. Steel Bars for Grating Treads: ASTM A 36/A 36M or steel strip, ASTM A 1011/A 1011M or ASTM A 1018/A 1018M.
D. Wire Rod for Grating Crossbars: ASTM A 510 (ASTM A 510M).

2.2 FASTENERS

A. Provide zinc-plated fasteners with coating complying with ASTM B 633 or ASTM F 1941 (ASTM F 1941M), Class Fe/Zn 12 for exterior use, and Class Fe/Zn 5 where built into exterior walls. Select fasteners for type, grade, and class required.

2.3 MISCELLANEOUS MATERIALS

A. Galvanizing Repair Paint: High-zinc-dust-content paint complying with SSPC-Paint 20 and compatible with paints specified to be used over it.

2.4 GRATING

A. Metal Bar-Grating: Form platforms to configurations shown from metal bar grating; fabricate to comply with NAAMM MBG 531, "Metal Bar Grating Manual."
   1. Fabricate treads and platforms from welded or pressure-locked steel grating with openings in gratings no more than 1/2 inch (12 mm) in least dimension.
   2. Surface: Plain.
   3. Finish: Galvanized.

2.5 RAILINGS (at ice storage platform)

A. Comply with applicable requirements in Section 055213 "Pipe and Tube Railings."
   1. Rails may be bent at corners, rail returns, and wall returns, instead of using prefabricated fittings.

2. Connect posts to stair framing by direct welding unless otherwise indicated.

2.6 FINISHES

A. Galvanizing: Hot-dip galvanize items as indicated to comply with ASTM A 153/A 153M for steel and iron hardware and with ASTM A 123/A 123M for other steel and iron products.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Cutting, Fitting, and Placement: Perform cutting, drilling, and fitting required for installing metal grating.
B. Field Welding: Comply with requirements for welding in "Fabrication, General" Article.

3.2 ADJUSTING AND CLEANING

A. Galvanized Surfaces: Clean field welds, bolted connections, and abraded areas and repair galvanizing to comply with ASTM A 780/A 780M.

END OF SECTION 055119

SECTION 055213 - PIPE RAILINGS AND GUARDRAILS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Steel pipe railings and guardrails.

1.2 ACTION SUBMITTALS

A. Product Data: For the following:
   1. Manufacturer's product lines of mechanically connected railings.
   2. Railing brackets.
B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.
C. Samples: For each type of exposed finish required.
D. Delegated-Design Submittal: For railings, including analysis data signed and sealed by the qualified professional engineer responsible for their preparation.

1.3 INFORMATIONAL SUBMITTALS

A. Product Test Reports: For pipe and tube railings, for tests performed by a qualified testing agency, according to ASTM E 894 and ASTM E 935.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. Delegated Design: Engage a qualified professional engineer, as defined in Section 014000 "Quality Requirements," to design railings, including attachment to building construction.
B. Structural Performance: Railings, including attachment to building construction, shall withstand the effects of gravity loads and the following loads and stresses within limits and under conditions indicated:
   1. Handrails and Top Rails of Guards:
      a. Uniform load of 50 lbf/ ft. (0.73 kN/m) applied in any direction.
      b. Concentrated load of 200 lbf (0.89 kN) applied in any direction.
      c. Uniform and concentrated loads need not be assumed to act concurrently.
   2. Infill of Guards:
      a. Concentrated load of 50 lbf (0.22 kN) applied horizontally on an area of 1 sq. ft. (0.093 sq. m).
      b. Infill load and other loads need not be assumed to act concurrently.

2.2 METALS, GENERAL

A. Brackets, Flanges, and Anchors: Cast or formed metal of same type of material and finish as supported rails unless otherwise indicated.
   1. Provide type of bracket with predrilled hole for exposed bolt anchorage and that provides 1-1/2-inch (38-mm) clearance from inside face of handrail to finished wall surface.

2.3 STEEL AND IRON

A. Pipe: ASTM A 53/A 53M, Type F or Type S, Grade A, Standard Weight (Schedule 40), unless another grade and weight are required by structural loads.
   1. Provide galvanized finish for exterior installations and where indicated.
B. Plates, Shapes, and Bars: ASTM A 36/A 36M.

2.4 FASTENERS

A. General: Provide the following:
   1. Ungalvanized-Steel Railings: Plated steel fasteners complying with ASTM B 633 or ASTM F 1941 (ASTM F 1941M), Class Fe/Zn 5 for zinc coating.
   2. Hot-Dip Galvanized Railings: Type 304 stainless-steel or hot-dip zinc-coated steel fasteners complying with ASTM A 153/A 153M or ASTM F 2329 for zinc coating.
B. Post-Installed Anchors: Torque-controlled expansion anchors capable of sustaining, without failure, a load equal to 6 times the load imposed when installed in unit masonry and 4 times the load imposed when installed in concrete, as determined by testing according to ASTM E 488/E 488M, conducted by a qualified independent testing agency.
   1. Material for Interior Locations: Carbon-steel components zinc-plated to comply with ASTM B 633 or ASTM F 1941 (ASTM F 1941M), Class Fe/Zn 5, unless otherwise indicated.

2.5 MISCELLANEOUS MATERIALS

A. Welding Rods and Bare Electrodes: Select according to AWS specifications for metal alloy welded.
B. Etching Cleaner for Galvanized Metal: Complying with MPI#25.
C. Galvanizing Repair Paint: High-zinc-dust-content paint complying with SSPC-Paint 20 and compatible with paints specified to be used over it.
D. Shop Primers: Provide primers that comply with Section 099600 "High-Performance Coatings.
E. Universal Shop Primer: Fast-curing, lead- and chromate-free, universal modified-alkyd primer complying with MPI#79 and compatible with topcoat.
F. Epoxy Zinc-Rich Primer: Complying with MPI#20 and compatible with topcoat.
G. Shop Primer for Galvanized Steel: Primer formulated for exterior use over zinc-coated metal and compatible with finish paint systems indicated.
H. Epoxy Intermediate Coat: Complying with MPI #77 and compatible with primer and topcoat.
I. Polyurethane Topcoat: Complying with MPI #72 and compatible with undercoat.
J. Bituminous Paint: Cold-applied asphalt emulsion complying with ASTM D 1187/D 1187M.

2.6 FABRICATION

A. Cut, drill, and punch metals cleanly and accurately. Remove burrs and ease edges to a radius of approximately 1/32 inch (1 mm) unless otherwise indicated. Remove sharp or rough areas on exposed surfaces.
B. Form work true to line and level with accurate angles and surfaces.
C. Welded Connections: Cope components at connections to provide close fit, or use fittings designed for this purpose. Weld all around at connections, including at fittings.
   1. Use materials and methods that minimize distortion and develop strength and corrosion resistance of base metals.
   2. Obtain fusion without undercut or overlap.
   3. Remove flux immediately.

4. At exposed connections, finish exposed surfaces smooth and blended so no roughness shows after finishing and welded surface matches contours of adjoining surfaces.

D. Form changes in direction by bending or by inserting prefabricated elbow fittings.

E. For changes in direction made by bending, use jigs to produce uniform curvature for each repetitive configuration required. Maintain cross section of member throughout entire bend without buckling, twisting, cracking, or otherwise deforming exposed surfaces of components.

F. Close exposed ends of railing members with prefabricated end fittings.

G. Provide wall returns at ends of wall-mounted handrails unless otherwise indicated.

H. Brackets, Flanges, Fittings, and Anchors: Provide wall brackets, flanges, miscellaneous fittings, and anchors to interconnect railing members to other work unless otherwise indicated.

1. At brackets and fittings fastened to plaster or gypsum board partitions, provide crush-resistant fillers or other means to transfer loads through wall finishes to structural supports and prevent bracket or fitting rotation and crushing of substrate.

2.7 STEEL AND IRON FINISHES

A. Galvanized Railings:

1. Hot-dip galvanize indicated steel railings, including hardware, after fabrication.
2. Comply with ASTM A 123/A 123M for hot-dip galvanized railings.
3. Comply with ASTM A 153/A 153M for hot-dip galvanized hardware.

B. Preparing Galvanized Railings for Shop Priming: After galvanizing, thoroughly clean railings of grease, dirt, oil, flux, and other foreign matter, and treat with etching cleaner.

C. Preparation for Shop Priming: Prepare uncoated ferrous-metal surfaces to comply with SSPC-SP 6/NACE No. 3, "Commercial Blast Cleaning."

D. Primer Application: Apply shop primer to prepared surfaces of railings unless otherwise indicated. Comply with requirements in SSPC-PA 1, "Shop, Field, and Maintenance Painting of Steel," for shop painting. Primer need not be applied to surfaces to be embedded in concrete or masonry.

1. Do not apply primer to galvanized surfaces.

E. High-Performance Coating: Apply epoxy intermediate and polyurethane topcoats to prime-coated surfaces. Comply with coating manufacturer's written instructions and with requirements in SSPC-PA 1, "Shop, Field, and Maintenance Painting of Steel," for shop painting. Apply at spreading rates recommended by coating manufacturer.

1. Color: As selected by Architect from manufacturer's full range.

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. Set railings accurately in location, alignment, and elevation; measured from established lines and levels and free of rack.

1. Do not weld, cut, or abrade surfaces of railing components that are coated or finished after fabrication and that are intended for field connection by mechanical or other means without further cutting or fitting.
2. Set posts plumb within a tolerance of 1/16 inch in 3 feet (2 mm in 1 m).
3. Align rails so variations from level for horizontal members and variations from parallel with rake of steps and ramps for sloping members do not exceed 1/4 inch in 12 feet (6 mm in 3.5 m).

B. Control of Corrosion: Prevent galvanic action and other forms of corrosion by insulating metals and other materials from direct contact with incompatible materials.
   1. Coat, with a heavy coat of bituminous paint, concealed surfaces of aluminum that are in contact with grout, concrete, masonry, wood, or dissimilar metals.

3.2 ATTACHING RAILINGS

A. Attach railings to wall with wall brackets. Locate brackets as indicated or, if not indicated, at spacing required to support structural loads.
   1. For steel-framed partitions, use hanger or lag bolts set into fire-retardant-treated wood backing between studs. Coordinate with stud installation to locate backing members.
   2. For steel-framed partitions, use self-tapping screws fastened to steel framing or to concealed steel reinforcements.
   3. For steel-framed partitions, use toggle bolts installed through flanges of steel framing or through concealed steel reinforcements.

3.3 ADJUSTING AND CLEANING

A. Touchup Painting: Immediately after erection, clean field welds, bolted connections, and abraded areas of shop paint, and paint exposed areas with the same material as used for shop painting to comply with SSPC-PA 1 requirements for touching up shop-painted surfaces.
B. Galvanized Surfaces: Clean field welds, bolted connections, and abraded areas, and repair galvanizing to comply with ASTM A 780/A 780M.

END OF SECTION 055213

SECTION 061053 - MISCELLANEOUS ROUGH CARPENTRY

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Rooftop equipment bases and support curbs.
   2. Wood blocking and nailers.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of process and factory-fabricated product.

1.3 INFORMATIONAL SUBMITTALS

A. Evaluation Reports: For the following, from ICC-ES:
   1. Fire-retardant-treated wood.
   2. Power-driven fasteners.

PART 2 - PRODUCTS

2.1 WOOD PRODUCTS, GENERAL

A. Lumber: DOC PS 20 and applicable rules of grading agencies indicated. If no grading agency is indicated, provide lumber that complies with the applicable rules of any rules-writing agency certified by the ALSC Board of Review. Provide lumber graded by an agency certified by the ALSC Board of Review to inspect and grade lumber under the rules indicated.
   1. Factory mark each piece of lumber with grade stamp of grading agency.
   2. For exposed lumber indicated to receive a stained or natural finish, mark grade stamp on end or back of each piece
   3. Dress lumber, S4S, unless otherwise indicated.

B. Maximum Moisture Content of Lumber: 15 percent unless otherwise indicated.

2.2 FIRE-RETARDANT-TREATED MATERIALS

A. Fire-Retardant-Treated Lumber and Plywood by Pressure Process: Products with a flame-spread index of 25 or less when tested according to ASTM E 84, and with no evidence of significant progressive combustion when the test is extended an additional 20 minutes, and with the flame front not extending more than 10.5 feet (3.2 m) beyond the centerline of the burners at any time during the test.
   1. Exterior Type: Treated materials shall comply with requirements specified above for fire-retardant-treated lumber and plywood by pressure process after being subjected to accelerated weathering according to ASTM D 2898. Use for exterior locations and where indicated.
   2. Interior Type A: Treated materials shall have a moisture content of 28 percent or less when tested according to ASTM D 3201 at 92 percent relative humidity. Use where exterior type is not indicated.
   3. Design Value Adjustment Factors: Treated lumber shall be tested according to ASTM D 5664, and design value adjustment factors shall be calculated according to ASTM D 6841. For enclosed roof framing, and where high-temperature fire-

retardant treatment is indicated, provide material with adjustment factors of not less than 0.85 modulus of elasticity and 0.75 for extreme fiber in bending for Project's climatological zone.

B. Kiln-dry lumber after treatment to a maximum moisture content of 15 percent.
C. Identify fire-retardant-treated wood with appropriate classification marking of qualified testing agency.
D. Application: Treat items indicated on Drawings, and the following:
   1. Concealed blocking.
   2. Roof framing and blocking.
   3. Wood nailers, curbs, equipment support bases, blocking, and similar members in connection with roofing.

2.3 DIMENSION LUMBER FRAMING

A. Non-Load-Bearing Interior Partitions: Construction or No. 2 grade of any species.

2.4 MISCELLANEOUS LUMBER

A. General: Provide miscellaneous lumber indicated and lumber for support or attachment of other construction, including the following:
   1. Blocking.
   2. Nailers.
   3. Rooftop equipment bases and support curbs.
B. Dimension Lumber Items: Construction or No. 2 grade lumber of any species.
C. Concealed Boards: 15 percent maximum moisture content of any of the following species and grades:
   1. Mixed southern pine or southern pine, No. 2 grade; SPIB.
   2. Eastern softwoods, No. 2 Common grade; NELMA.
   3. Northern species, No. 2 Common grade; NLGA.

2.5 FASTENERS

A. General: Provide fasteners of size and type indicated that comply with requirements specified in this article for material and manufacture.
   1. Where carpentry is exposed to weather, in ground contact, pressure-preservative treated, or in area of high relative humidity, provide fastener with hot-dip zinc coating complying with ASTM A 153/A 153M.
B. Screws for Fastening to Metal Framing: ASTM C 1002, length as recommended by screw manufacturer for material being fastened.
C. Power-Driven Fasteners: Fastener systems with an evaluation report acceptable to authorities having jurisdiction, based on ICC-ES AC70.

2.6 MISCELLANEOUS MATERIALS

A. Flexible Flashing: Composite, self-adhesive, flashing product consisting of a pliable, butyl rubber or rubberized-asphalt compound, bonded to a high-density polyethylene film, aluminum foil, or spunbonded polyolefin to produce an overall thickness of not less than 0.025 inch (0.6 mm).

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. Framing Standard: Comply with AF&PA's WCD 1, "Details for Conventional Wood Frame Construction," unless otherwise indicated.
B. Set carpentry to required levels and lines, with members plumb, true to line, cut, and fitted. Fit carpentry accurately to other construction. Locate nailers, blocking, and similar supports to comply with requirements for attaching other construction.
C. Do not splice structural members between supports unless otherwise indicated.
D. Comply with AWPA M4 for applying field treatment to cut surfaces of preservative-treated lumber.
E. Securely attach carpentry work to substrate by anchoring and fastening as indicated, complying with the following:
    1. Table 2304.9.1, "Fastening Schedule," in ICC's International Building Code.
    2. Table R602.3(1), "Fastener Schedule for Structural Members," and Table R602.3(2), "Alternate Attachments," in ICC's International Residential Code for One- and Two-Family Dwellings.
    3. ICC-ES evaluation report for fastener.

3.2 PROTECTION

A. Protect wood that has been treated with inorganic boron (SBX) from weather. If, despite protection, inorganic boron-treated wood becomes wet, apply EPA-registered borate treatment. Apply borate solution by spraying to comply with EPA-registered label.

END OF SECTION 061053

SECTION 075423 - THERMOPLASTIC POLYOLEFIN (TPO) ROOFING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Adhered thermoplastic polyolefin (TPO) roofing system.
   2. Roof insulation
   3. Cover board.

1.2 DEFINITIONS

A. Roofing Terminology: Definitions in ASTM D 1079 and glossary in NRCA's "The NRCA Roofing and Waterproofing Manual" apply to work of this Section.

1.3 PREINSTALLATION MEETINGS

A. Preinstallation Roofing Conference: Conduct conference at **Project site**.

1.4 ACTION SUBMITTALS

A. Product Data: For each type of product.
B. Shop Drawings: For roofing system. Include plans, elevations, sections, details, and attachments to other work.
C. Samples for Verification: For the following products:
   1. Sheet roofing, of color required.
   2. Walkway pads or rolls, of color required.

1.5 INFORMATIONAL SUBMITTALS

A. Research/Evaluation Reports: For components of roofing system, from ICC-ES.
B. Sample Warranties: For manufacturer's special warranties.

1.6 CLOSEOUT SUBMITTALS

A. Maintenance Data: For roofing system to include in maintenance manuals.

1.7 QUALITY ASSURANCE

A. Installer Qualifications: A qualified firm that is approved, authorized, or licensed by roofing system manufacturer to install manufacturer's product and that is eligible to receive manufacturer's special warranty.

1.8 WARRANTY

A. Special Warranty: Manufacturer agrees to repair or replace components of roofing system that fail in materials or workmanship within specified warranty period.
   1. Warranty Period: 20 years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
   1. Carlisle SynTec Incorporated.
   2. Firestone Building Products.
   3. GenFlex Roofing Systems.
   4. Johns Manville; a Berkshire Hathaway company.
   5. Verisico Incorporated
   6. Duro-Last Roofing, Inc.
   7. Stevens Roofing Systems
B. Source Limitations: Obtain components including **roof insulation, fasteners** for roofing system from **same manufacturer as membrane roofing or manufacturer approved by membrane roofing manufacturer**.

2.2 PERFORMANCE REQUIREMENTS

A. Accelerated Weathering: Roofing system shall withstand 2000 hours of exposure when tested according to ASTM G 152, ASTM G 154, or ASTM G 155.
B. Impact Resistance: Roofing system shall resist impact damage when tested according to ASTM D 3746 or ASTM D 4272.
C. Energy Star Listing: Roofing system shall be listed on the DOE's ENERGY STAR "Roof Products Qualified Product List" for **low**-slope roof products.
D. Energy Performance: Roofing system shall have an initial solar reflectance of not less than **0.70** and an emissivity of not less than **0.75** when tested according to CRRC-1.
E. Exterior Fire-Test Exposure: ASTM E 108 or UL 790, **Class A**; for application and roof slopes indicated; testing by a qualified testing agency. Identify products with appropriate markings of applicable testing agency.
F. Fire-Resistance Ratings: Comply with fire-resistance-rated assembly designs indicated. Identify products with appropriate markings of applicable testing agency.

2.3 TPO ROOFING

A. Fabric-Reinforced TPO Sheet: ASTM D 6878, internally fabric- or scrim-reinforced, uniform, flexible **fabric-backed** TPO sheet.
   1. Thickness: 60 mils (1.5 mm), nominal.
   2. Exposed Face Color: **Tan**.

2.4 AUXILIARY ROOFING MATERIALS

A. General: Auxiliary materials recommended by roofing system manufacturer for intended use and compatible with roofing.
   1. Liquid-type auxiliary materials shall comply with VOC limits of authorities having jurisdiction.
B. Sheet Flashing: Manufacturer's standard unreinforced TPO sheet flashing, 60 mils (1.5 mm) thick, minimum, of same color as TPO sheet.
C. Solar Panel Cradle Slip Sheet: Manufacturer's standard unreinforced TPO sheet flashing, 60 mils (1.5 mm) thick, minimum, of same color as TPO sheet. Additional membrane to be loose laid in continuous strips, full width at solar panel locations.
D. Bonding Adhesive: Manufacturer's standard.

E. Slip Sheet: Manufacturer's standard, of thickness required for application.
F. Fasteners: Factory-coated steel fasteners and metal or plastic plates complying with corrosion-resistance provisions in FM Global 4470, designed for fastening roofing to substrate, and acceptable to roofing system manufacturer.
G. Miscellaneous Accessories: Provide metal termination bars, metal battens, pourable sealers, preformed cone and vent sheet flashings, preformed inside and outside corner sheet flashings, T-joint covers, lap sealants, termination reglets, and other accessories.

2.5 ROOF INSULATION

A. Polyisocyanurate Board Insulation: ASTM C 1289, **Type II, Class 1, Grade 2**, felt or glass-fiber mat facer on both major surfaces.
   1. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
      a. Carlisle SynTec Incorporated.
      b. GAF Materials Corporation.
      c. Johns Manville; a Berkshire Hathaway company.
B. Provide preformed saddles, crickets, tapered edge strips, and other insulation shapes where indicated for sloping to drain. Fabricate to slopes indicated.

2.6 INSULATION ACCESSORIES

A. Fasteners: Factory-coated steel fasteners and metal or plastic plates complying with corrosion-resistance provisions in FM Global 4470, designed for fastening roof insulation **and cover boards** to substrate, and acceptable to roofing system manufacturer.
B. Insulation Adhesive: Insulation manufacturer's recommended adhesive formulated to attach roof insulation to substrate or to another insulation layer.
C. Cover Board: ASTM C 1177/C 1177M, glass-mat, water-resistant gypsum substrate, 1/2 inch (13 mm)] [5/8 inch (16 mm)] thick.
   1. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
      a. CertainTeed Corporation.
      b. Georgia-Pacific Building Products.
      c. National Gypsum Company.
D. Protection Mat: Woven or nonwoven polypropylene, polyolefin, or polyester fabric, water permeable and resistant to UV degradation, type and weight as recommended by roofing system manufacturer for application.

2.7 WALKWAYS

A. Flexible Walkways: Factory-formed, nonporous, heavy-duty, slip-resisting, surface-textured walkway **pads or rolls**, approximately 3/16 inch (5 mm) thick and acceptable to roofing system manufacturer.

PART 3 - EXECUTION

3.1 ROOFING INSTALLATION, GENERAL

A. Install roofing system according to roofing system manufacturer's written instructions.

B. Complete terminations and base flashings and provide temporary seals to prevent water from entering completed sections of roofing system at the end of the workday or when rain is forecast. Remove and discard temporary seals before beginning work on adjoining roofing.

3.2 SUBSTRATE BOARD INSTALLATION

A. Install substrate board with long joints in continuous straight lines, perpendicular to roof slopes with end joints staggered between rows. Tightly butt substrate boards together.
   1. Fasten substrate board to top flanges of steel deck to resist uplift pressure at corners, perimeter, and field of roof according to roofing system manufacturers' written instructions.

3.3 INSULATION INSTALLATION

A. Coordinate installing roofing system components so insulation is not exposed to precipitation or left exposed at the end of the workday.
B. Install tapered insulation under area of roofing to conform to slopes indicated.
C. Install insulation under area of roofing to achieve required thickness. Where overall insulation thickness is 2.7 inches (68 mm) or greater, install two or more layers with joints of each succeeding layer staggered from joints of previous layer a minimum of 6 inches (150 mm) in each direction.
   1. Where installing composite and noncomposite insulation in two or more layers, install noncomposite board insulation for bottom layer and intermediate layers, if applicable, and install composite board insulation for top layer.
D. Mechanically Fastened Insulation: Install each layer of insulation and secure to deck using mechanical fasteners specifically designed and sized for fastening specified board-type roof insulation to deck type.
   1. Fasten insulation to resist uplift pressure at corners, perimeter, and field of roof.
E. Install cover boards over insulation with long joints in continuous straight lines with end joints staggered between rows. Offset joints of insulation below a minimum of 6 inches (150 mm) in each direction. Loosely butt cover boards together **and fasten to roof deck**.
   1. Fasten cover boards to resist uplift pressure at corners, perimeter, and field of roof.
F. Install slip sheet over **cover board** and immediately beneath roofing.

3.4 ADHERED ROOFING INSTALLATION

A. Adhere roofing over area to receive roofing according to roofing system manufacturer's written instructions. Unroll roofing and allow to relax before retaining.
B. Accurately align roofing, and maintain uniform side and end laps of minimum dimensions required by manufacturer. Stagger end laps.
C. Bonding Adhesive: Apply to substrate and underside of roofing at rate required by manufacturer, and allow to partially dry before installing roofing. Do not apply to splice area of roofing.
D. In addition to adhering, mechanically fasten roofing securely at terminations, penetrations, and perimeter of roofing.

E. Seams: Clean seam areas, overlap roofing, and hot-air weld side and end laps of roofing and sheet flashings according to manufacturer's written instructions, to ensure a watertight seam installation.
   1. Test lap edges with probe to verify seam weld continuity. Apply lap sealant to seal cut edges of sheet.
   2. Verify field strength of seams a minimum of twice daily, and repair seam sample areas.
   3. Repair tears, voids, and lapped seams in roofing that do not comply with requirements.
F. Spread sealant bed over deck-drain flange at roof drains, and securely seal roofing in place with clamping ring.

3.5 MECHANICALLY FASTENED ROOFING INSTALLATION

A. Mechanically fasten roofing over area to receive roofing according to roofing system manufacturer's written instructions. Unroll roofing and allow to relax before retaining.
B. Accurately align roofing, and maintain uniform side and end laps of minimum dimensions required by manufacturer. Stagger end laps.
C. Mechanically fasten or adhere roofing securely at terminations, penetrations, and perimeter of roofing.
D. Apply roofing with side laps shingled with slope of roof deck where possible.
E. In-Seam Attachment: Secure one edge of TPO sheet using fastening plates or metal battens centered within seam, and mechanically fasten TPO sheet to roof deck.
F. Seams: Clean seam areas, overlap roofing, and hot-air weld side and end laps of roofing and sheet flashings according to manufacturer's written instructions to ensure a watertight seam installation.
   1. Test lap edges with probe to verify seam weld continuity. Apply lap sealant to seal cut edges of sheet.
   2. Verify field strength of seams a minimum of twice daily, and repair seam sample areas.
   3. Repair tears, voids, and lapped seams in roofing that do not comply with requirements.
G. Spread sealant bed over deck-drain flange at roof drains, and securely seal roofing in place with clamping ring.

3.6 BASE FLASHING INSTALLATION

A. Install sheet flashings and preformed flashing accessories, and adhere to substrates according to roofing system manufacturer's written instructions.
B. Apply bonding adhesive to substrate and underside of sheet flashing at required rate, and allow to partially dry. Do not apply to seam area of flashing.
C. Flash penetrations and field-formed inside and outside corners with cured or uncured sheet flashing.
D. Clean seam areas, overlap, and firmly roll sheet flashings into the adhesive. Hot-air weld side and end laps to ensure a watertight seam installation.
E. Terminate and seal top of sheet flashings **and mechanically anchor to substrate through termination bars**.

3.7 WALKWAY INSTALLATION

A. Flexible Walkways: Install walkway products in locations indicated. Heat weld to substrate or adhere walkway products to substrate with compatible adhesive according to roofing system manufacturer's written instructions.

3.8 PROTECTING AND CLEANING

A. Protect roofing system from damage and wear during remainder of construction period. When remaining construction does not affect or endanger roofing, inspect roofing for deterioration and damage, describing its nature and extent in a written report, with copies to Architect and Owner.
B. Correct deficiencies in or remove roofing system that does not comply with requirements, repair substrates, and repair or reinstall roofing system to a condition free of damage and deterioration at time of Substantial Completion and according to warranty requirements.
C. Clean overspray and spillage from adjacent construction using cleaning agents and procedures recommended by manufacturer of affected construction.

END OF SECTION 0754230

SECTION 076200 - SHEET METAL FLASHING AND TRIM

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes formed sheet metal fabrications and trim.

1.2 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.

1.3 SUBMITTALS

A. Product Data: For each type of product.
B. Shop Drawings: For sheet metal fabrications and trim, including plans, elevations, sections and attachment details. Distinguish between shop- and field-assembled work.
C. Samples: For each exposed product and for each color and texture specified.
D. Maintenance data.

1.4 QUALITY ASSURANCE

A. Fabricator Qualifications: Employs skilled workers who custom fabricate sheet metal flashing and trim similar to that required for this Project and whose products have a record of successful in-service performance.
B. Mockups: Build mockups to verify selections made under Sample submittals to demonstrate aesthetic effects and to set quality standards for fabrication and installation.

1.5 WARRANTY

A. Special Warranty on Finishes: Manufacturer agrees to repair finish or replace sheet metal flashing and trim that shows evidence of deterioration of factory-applied finishes within specified warranty period.
   1. Finish Warranty Period: 20 years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. General: Sheet metal fabrications and trim assemblies shall withstand wind loads, structural movement, thermally induced movement, and exposure to weather without failure due to defective manufacture, fabrication, installation, or other defects in construction. Completed sheet metal fabrications and trim shall not rattle, leak, or loosen, and shall remain watertight.
B. Sheet Metal Standard for Flashing and Trim: Comply with SMACNA's "Architectural Sheet Metal Manual" requirements for dimensions and profiles shown unless more stringent requirements are indicated.
C. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes.

2.2 SHEET METALS

A. General: Protect mechanical and other finishes on exposed surfaces from damage by applying strippable, temporary protective film before shipping.
B. Aluminum Sheet: ASTM B 209 (ASTM B 209M), alloy as standard with manufacturer for finish required, with temper as required to suit forming operations and performance required.

1. Color and Finish: Match existing metal siding.
2. Exposed Coil-Coated Finish:
   a. Two-Coat Fluoropolymer: AAMA 2605. Fluoropolymer finish containing not less than 70 percent PVDF resin by weight in color coat. Prepare, pretreat, and apply coating to exposed metal surfaces to comply with coating and resin manufacturers' written instructions.

2.3 MISCELLANEOUS MATERIALS

A. General: Provide materials and types of fasteners, protective coatings, sealants, and other miscellaneous items as required for complete sheet metal flashing and trim installation and as recommended by manufacturer of primary sheet metal unless otherwise indicated.
B. Fasteners: Wood screws, annular threaded nails, self-tapping screws, self-locking rivets and bolts, and other suitable fasteners designed to withstand design loads and recommended by manufacturer of primary sheet metal.
   1. General: Use blind fasteners whenever possible.
   2. Fasteners for Aluminum Sheet: Aluminum or Series 300 stainless steel.

2.4 FABRICATION, GENERAL

A. General: Custom fabricate sheet metal flashing and trim to comply with details shown and recommendations in cited sheet metal standard that apply to design, dimensions, geometry, metal thickness, and other characteristics of item required. Fabricate sheet metal flashing and trim in shop to greatest extent possible.
   1. Obtain field measurements for accurate fit before shop fabrication.
   2. Form sheet metal flashing and trim to fit substrates without excessive oil canning, buckling, and tool marks; true to line, levels, and slopes; and with exposed edges folded back to form hems.
   3. Conceal fasteners and expansion provisions where possible. Do not use exposed fasteners on faces exposed to view.
B. Expansion Provisions: Form metal for thermal expansion of exposed flashing and trim.
   1. Form expansion joints of intermeshing hooked flanges, not less than 1 inch (25 mm) deep, filled with butyl sealant concealed within joints.
   2. Use lapped expansion joints only where indicated on Drawings.
C. Sealant Joints: Where movable, nonexpansion-type joints are required, form metal to provide for proper installation of elastomeric sealant according to cited sheet metal standard.
D. Fabricate cleats and attachment devices from same material as accessory being anchored or from compatible, noncorrosive metal.
E. Fabricate cleats and attachment devices of sizes as recommended by cited sheet metal standard for application, but not less than thickness of metal being secured.
F. Seams for Aluminum: Fabricate nonmoving seams with flat-lock seams. Form seams and seal with epoxy seam sealer. Rivet joints where necessary for strength.

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. General: Anchor sheet metal flashing and trim and other components of the Work securely in place, with provisions for thermal and structural movement. Use fasteners, solder, protective coatings, separators, sealants, and other miscellaneous items as required to complete sheet metal flashing and trim system.

1. Install sheet metal flashing and trim true to line, levels, and slopes. Provide uniform, neat seams with minimum exposure of solder, welds, and sealant.
2. Install sheet metal flashing and trim to fit substrates and to result in watertight performance. Verify shapes and dimensions of surfaces to be covered before fabricating sheet metal.
3. Space cleats not more than 12 inches (300 mm) apart. Attach each cleat with at least two fasteners. Bend tabs over fasteners.
4. Install exposed sheet metal flashing and trim with limited oil canning, and free of buckling and tool marks.
5. Torch cutting of sheet metal flashing and trim is not permitted.

B. Metal Protection: Where dissimilar metals contact each other, or where metal contacts pressure-treated wood or other corrosive substrates, protect against galvanic action or corrosion by painting contact surfaces with bituminous coating or by other permanent separation as recommended by sheet metal manufacturer or cited sheet metal standard.
   1. Coat concealed side of uncoated-aluminum sheet metal flashing and trim with bituminous coating where flashing and trim contact wood, ferrous metal, or cementitious construction.

C. Expansion Provisions: Provide for thermal expansion of exposed flashing and trim. Space movement joints at maximum of 10 feet (3 m) with no joints within 24 inches (600 mm) of corner or intersection.
   1. Form expansion joints of intermeshing hooked flanges, not less than 1 inch (25 mm) deep, filled with sealant concealed within joints.
   2. Use lapped expansion joints only where indicated on Drawings.

D. Fasteners: Use fastener sizes that penetrate substrate not less than recommended by fastener manufacturer to achieve maximum pull-out resistance.

E. Conceal fasteners and expansion provisions where possible in exposed work and locate to minimize possibility of leakage. Cover and seal fasteners and anchors as required for a tight installation.

F. Seal joints as required for watertight construction. Prepare joints and apply sealants to comply with requirements in Section 079200 "Joint Sealants."

G. Rivets: Rivet joints in uncoated aluminum where necessary for strength.

3.2 CLEANING AND PROTECTION

A. Clean exposed metal surfaces of substances that interfere with uniform oxidation and weathering.

B. Clean off excess sealants.

C. Remove temporary protective coverings and strippable films as sheet metal flashing and trim are installed unless otherwise indicated in manufacturer's written installation instructions.

END OF SECTION 076200

SECTION 079200 - JOINT SEALANTS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Silicone joint sealants.
   2. Urethane joint sealants.
   3. Joint sealant backer rod.

1.2 PRECONSTRUCTION TESTING

A. Preconstruction Compatibility and Adhesion Testing: Submit to joint-sealant manufacturers six samples of materials that will contact or affect joint sealants.
   1. Use ASTM C 1087 or manufacturer's standard test method to determine whether priming and other specific joint preparation techniques are required to obtain rapid, optimum adhesion of joint sealants to joint substrates.
   2. Submit not fewer than six pieces of each type of material, including joint substrates, shims, joint-sealant backings, secondary seals, and miscellaneous materials.
   3. Schedule sufficient time for testing and analyzing results to prevent delaying the Work.
   4. For materials failing tests, obtain joint-sealant manufacturer's written instructions for corrective measures including use of specially formulated primers.
   5. Testing will not be required if joint-sealant manufacturers submit joint preparation data that are based on previous testing of current sealant products for adhesion to, and compatibility with, joint substrates and other materials matching those submitted.

B. Preconstruction Field-Adhesion Testing: Before installing sealants, field test their adhesion to Project joint substrates as follows:
   1. Locate test joints where indicated on Project or, if not indicated, as directed by Architect.
   2. Conduct field tests for each application indicated below:
      a. Each type of elastomeric sealant and joint substrate indicated.
      b. Each type of nonelastomeric sealant and joint substrate indicated.
   3. Notify Architect seven days in advance of dates and times when test joints will be erected.
      a. Test Method: Test joint sealants according to Method A, Field-Applied Sealant Joint Hand Pull Tab, in Appendix X1 in ASTM C 1193.
         1) For joints with dissimilar substrates, verify adhesion to each substrate separately; extend cut along one side, verifying adhesion to opposite side. Repeat procedure for opposite side.
   4. Report whether sealant in joint connected to pulled-out portion failed to adhere to joint substrates or tore cohesively. Include data on pull distance used to test each type of product and joint substrate. For sealants that fail adhesively, retest until satisfactory adhesion is obtained.
   5. Evaluation of Preconstruction Field-Adhesion-Test Results: Sealants not evidencing adhesive failure from testing, in absence of other indications of noncompliance with requirements, will be considered satisfactory. Do not use sealants that fail to adhere to joint substrates during testing.

1.3 ACTION SUBMITTALS

A. Product Data: For each joint-sealant product indicated.

B. Samples: For each kind and color of joint sealant required.

C. Joint-Sealant Schedule: Include the following information:
   1. Joint-sealant application, joint location, and designation.
   2. Joint-sealant manufacturer and product name.
   3. Joint-sealant formulation.
   4. Joint-sealant color.

1.4 INFORMATIONAL SUBMITTALS

A. Product test reports.

B. Preconstruction compatibility and adhesion test reports.

C. Preconstruction field-adhesion test reports.

D. Field-adhesion test reports.

E. Warranties.

1.5 QUALITY ASSURANCE

A. Testing Agency Qualifications: Qualified according to ASTM C 1021 to conduct the testing indicated.

B. Preinstallation Conference: Conduct conference at Project site.

C. Mockups: Build mockups incorporating sealant joints, as follows, to verify selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution:
   1. Joints in mockups of assemblies specified in other Sections that are indicated to receive elastomeric joint sealants, which are specified by reference to this Section.

1.6 PROJECT CONDITIONS

A. Do not proceed with installation of joint sealants under the following conditions:
   1. When ambient and substrate temperature conditions are outside limits permitted by joint-sealant manufacturer.
   2. When joint substrates are wet.
   3. Where joint widths are less than those allowed by joint-sealant manufacturer for applications indicated.
   4. Contaminants capable of interfering with adhesion have not yet been removed from joint substrates.

1.7 WARRANTY

A. Special Installer's Warranty: Manufacturer's standard form in which Installer agrees to repair or replace joint sealants that do not comply with performance and other requirements specified in this Section within specified warranty period.
   1. Warranty Period: Two years from date of Substantial Completion.

B. Special Manufacturer's Warranty: Manufacturer's standard form in which joint-sealant manufacturer agrees to furnish joint sealants to repair or replace those that do not comply with performance and other requirements specified in this Section within specified warranty period.

1. Warranty Period: 5 years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MATERIALS, GENERAL

A. VOC Content of Interior Sealants: Sealants and sealant primers used inside the weatherproofing system shall comply with the following limits for VOC content when calculated according to 40 CFR 59, Subpart D (EPA Method 24):
1. Architectural Sealants: 250 g/L.
2. Sealant Primers for Nonporous Substrates: 250 g/L.
3. Sealant Primers for Porous Substrates: 775 g/L.

B. Liquid-Applied Joint Sealants: Comply with ASTM C 920 and other requirements indicated for each liquid-applied joint sealant specified, including those referencing ASTM C 920 classifications for type, grade, class, and uses related to exposure and joint substrates.

C. Stain-Test-Response Characteristics: Where sealants are specified to be nonstaining to porous substrates, provide products that have undergone testing according to ASTM C 1248 and have not stained porous joint substrates indicated for Project.

D. Suitability for Immersion in Liquids. Where elastomeric sealants are indicated for Use I for joints that will be continuously immersed in liquids, provide products that have undergone testing according to ASTM C 1247 and qualify for the length of exposure indicated by reference to ASTM C 920 for Class 1 or 2. Liquid used for testing sealants is deionized water, unless otherwise indicated.

2.2 SILICONE JOINT SEALANTS

A. Medium Modulus Silicone Joint Sealant **(Sealant A)** ASTM C 920.
1. Subject to compliance with requirements, provide one of the following:
   a. 795, by Dow Corning, Midland, MI
   b. Silglaze II 2800, by GE Silicones
   c. Tremsil 600, by Tremco Incorporated, Ontario, CN
2. Type: Single component, neutral curing
3. Grade: nonsag (NS)
4. Class: 25
5. Color: As selected by Architect from manufacturer's full range of standard colors.
6. Application: Joints within aluminum frame systems, around plumbing fixtures, at countertop perimeters, and other wet areas as indicated.

2.3 POLYURETHANE JOINT SEALANTS

A. Polyurethane Joint Sealant **(Sealant B):** ASTM C 920.
1. Subject to compliance with requirements, provide one of the following:
   a. Dymonic, by Tremco Incorporated, Ontario, CN
   b. Sikaflex – 15LM, by Sika Corporation, Lyndhurst, NJ
   c. Sonolastic NP-1, by BASF, Shakopee, MN
2. Type: Single component, moisture curing.
3. Grade: nonsag (NS)
4. Class: 25
5. Color: As selected by Architect from manufacturer's full range of standard colors.
6. Application: Exterior masonry joints, and where indicated.

2.4 JOINT SEALANT BACKING

A. Cylindrical Sealant Backings: ASTM C 1330, Type C (closed-cell material with a surface skin) Type O (open-cell material) Type B (bicellular material with a surface skin) or any of the preceding types, as approved in writing by joint-sealant manufacturer for joint application indicated, and of size and density to control sealant depth and otherwise contribute to producing optimum sealant performance.

B. Bond-Breaker Tape: Polyethylene tape or other plastic tape recommended by sealant manufacturer.

2.5 MISCELLANEOUS MATERIALS

A. Primer: Material recommended by joint-sealant manufacturer where required for adhesion of sealant to joint substrates indicated, as determined from preconstruction joint-sealant-substrate tests and field tests.

B. Cleaners for Nonporous Surfaces: Chemical cleaners acceptable to manufacturers of sealants and sealant backing materials.

C. Masking Tape: Nonstaining, nonabsorbent material compatible with joint sealants and surfaces adjacent to joints.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine joints indicated to receive joint sealants, with Installer present, for compliance with requirements for joint configuration, installation tolerances, and other conditions affecting joint-sealant performance.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Surface Cleaning of Joints: Clean out joints immediately before installing joint sealants to comply with joint-sealant manufacturer's written instructions.
   1. Remove laitance and form-release agents from concrete.
   2. Clean nonporous joint substrate surfaces with chemical cleaners or other means that do not stain, harm substrates, or leave residues capable of interfering with adhesion of joint sealants.

B. Joint Priming: Prime joint substrates where recommended by joint-sealant manufacturer or as indicated by preconstruction joint-sealant-substrate tests or prior experience. Apply primer to comply with joint-sealant manufacturer's written instructions. Confine primers to areas of joint-sealant bond; do not allow spillage or migration onto adjoining surfaces.

C. Masking Tape: Use masking tape where required to prevent contact of sealant or primer with adjoining surfaces that otherwise would be permanently stained or damaged by such contact or by cleaning methods required to remove sealant smears. Remove tape immediately after tooling without disturbing joint seal.

3.3 INSTALLATION

A. General: Comply with joint-sealant manufacturer's written installation instructions for products and applications indicated, unless more stringent requirements apply.

B. Sealant Installation Standard: Comply with recommendations in ASTM C 1193 for use of joint sealants as applicable to materials, applications, and conditions indicated.

C. Install sealant backings of kind indicated to support sealants during application and at position required to produce cross-sectional shapes and depths of installed sealants relative to joint widths that allow optimum sealant movement capability.
   1. Do not leave gaps between ends of sealant backings.
   2. Do not stretch, twist, puncture, or tear sealant backings.
   3. Remove absorbent sealant backings that have become wet before sealant application and replace them with dry materials.

D. Install bond-breaker tape behind sealants where sealant backings are not used between sealants and backs of joints.

E. Install sealants using proven techniques that comply with the following and at the same time backings are installed:
   1. Place sealants so they directly contact and fully wet joint substrates.
   2. Completely fill recesses in each joint configuration.
   3. Produce uniform, cross-sectional shapes and depths relative to joint widths that allow optimum sealant movement capability.

F. Tooling of Nonsag Sealants: Immediately after sealant application and before skinning or curing begins, tool sealants according to requirements specified in subparagraphs below to form smooth, uniform beads of configuration indicated; to eliminate air pockets; and to ensure contact and adhesion of sealant with sides of joint.
   1. Remove excess sealant from surfaces adjacent to joints.
   2. Use tooling agents that are approved in writing by sealant manufacturer and that do not discolor sealants or adjacent surfaces.
   3. Provide concave joint profile per Figure 8A in ASTM C 1193, unless otherwise indicated.

G. Acoustical Sealant Installation: Comply with ASTM C 919 and with manufacturer's written recommendations.

H. Clean off excess sealant or sealant smears adjacent to joints as the Work progresses by methods and with cleaning materials approved in writing by manufacturers of joint sealants and of products in which joints occur.

3.4 JOINT-SEALANT SCHEDULE

A. Joint-Sealant Application: Silicone **(Sealant A)**
   1. Joint Locations:
      a. Joints between window frame pieces.
      b. Joints between metal panels.
      c. Joints in glass.
      d. Joints in metal sills.
      e. Other wet area joints as indicated.

B. Joint-Sealant Application: Polyurethane **(Sealant B)**
   1. Joint Locations:
      a. Control and expansion joints in unit masonry.
      b. Joints between different materials listed above.
      c. Perimeter joints between materials listed above and frames of doors, windows, and louvers.
      d. Other joints as indicated.

END OF SECTION 079200

SECTION 099600 - HIGH-PERFORMANCE COATINGS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes surface preparation and field application of high-performance coating systems to existing window lintels and shelf angles.

1.3 DEFINITIONS

A. Standard coating terms defined in ASTM D 16 apply to this Section.

1.4 SUBMITTALS

A. Product Data: For each coating system indicated.
   1. Material List: An inclusive list of required coating materials. Indicate each material and cross-reference the specific coating, finish system, and application. Identify each material by manufacturer's catalog number and general classification.
   2. Manufacturer's Information: Manufacturer's technical information, including label analysis and instructions for handling, storing, and applying each material specified.

B. Certification by manufacturer that products supplied comply with requirements indicated that limit the amount of VOCs in coating products.

C. Samples for Initial Selection: Manufacturer's color charts showing the full range of colors available for each type of finish-coat material indicated.
   1. After color selection, Architect will furnish color chips for surfaces to be coated.

D. Samples for Verification: For each color and material to be applied, with texture to simulate actual conditions, on representative samples of the actual substrate.

1.5 QUALITY ASSURANCE

A. Applicator Qualifications: Engage an experienced applicator who has completed high-performance coating system applications similar in material and extent to those indicated for Project and whose work has a record of successful in-service performance.

B. Source Limitations: Obtain primers and undercoat materials for each coating system from the same manufacturer as the finish coats.

C. Benchmark Samples (Mockups): Provide a full-coat benchmark finish sample of each type of coating and substrate required. Comply with procedures specified in PDCA P5. Duplicate finish of approved sample Submittals.
   1. Final approval of colors will be from benchmark samples.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials to Project site in manufacturer's original, unopened packages and containers bearing manufacturer's name and label with the following information:
   1. Name or title of material.
   2. Product description (generic classification or binder type).
   3. Manufacturer's stock number and date of manufacture.

4. Contents by volume, for pigment and vehicle constituents.
5. Thinning instructions.
6. Application instructions.
7. Color name and number.
8. Handling instructions and precautions.

B. Store materials not in use in tightly covered containers in a well-ventilated area at a minimum ambient temperature of 45 deg F. Maintain containers used in storage in a clean condition, free of foreign materials and residue.
   1. Keep storage area neat and orderly. Remove oily rags and waste daily. Take necessary measures to ensure that workers and work areas are protected from fire and health hazards resulting from handling, mixing, and applying coatings.

1.7 PROJECT CONDITIONS

A. Apply coatings only when temperature of surfaces to be coated and surrounding air temperatures are between 45 and 95 deg F.
B. Do not apply coatings in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures less than 5 deg F above the dew point; or to damp or wet surfaces.
   1. Allow wet surfaces to dry thoroughly and attain temperature and conditions specified before proceeding with or continuing coating operation.
   2. Work may continue during inclement weather only if areas and surfaces to be coated are enclosed and temperature within the area can be maintained within limits specified by manufacturer during application and drying periods.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Products: Subject to compliance with requirements, provide one the product indicated in the coating system descriptions.
B. Manufacturers' Names: The following manufacturer is referred to in the coating system descriptions by shortened versions of their names shown in parenthesis:
   1. ICI Devoe High Performance Coatings (Devoe).

2.2 COATINGS MATERIALS, GENERAL

A. Material Compatibility: Provide primers, undercoats, and finish-coat materials that are compatible with one another and substrates indicated under conditions of service and application, as demonstrated by manufacturer based on testing and field experience.
B. Material Quality: Provide manufacturer's highest grade of the various high-performance coatings specified. Materials not displaying manufacturer's product identification are not acceptable.
   1. Proprietary Names: Use of manufacturer's proprietary product names to designate colors or materials is not intended to imply that products named are required to be used to the exclusion of equivalent products of other manufacturers. Furnish manufacturer's material data and certificates of performance for proposed substitutions.
C. VOC Classification: Provide high-performance coating materials, including primers, undercoats, and finish-coat materials, that have a VOC classification of 450 g/L or less.

2.3 COLORS

A. Colors: As selected by Architect from manufacturer's full range.

2.4 EXTERIOR HIGH-PERFORMANCE COATING SYSTEMS

A. Product:
   1. Devthane 378 Aliphatic Urethane Semi-Gloss; Devoe High Performance Coatings (to be used at exposed locations.)
B. Description: High performance, multi-purpose, surface tolerant, two-component chemically-cured epoxy semi-gloss coating.
   1. Exceptional corrosion protection.
   2. Suitable for salt and fresh water immersion.
   3. Low temperature cure to 0 degrees F.
C. Cleanup Solvent: As recommended per manufacturer, T-10 Thinner.
D. Recommended Film Thickness: As recommended per manufacturer, 4 to 8 mils dry and 5.9 to 11.7 mils wet.
E. Remove paint and rust by sand blast or chemical stripper as recommended by finish manufacturer.
F. Provide finish coats as recommend per finish manufacturer.

PART 3 - EXECUTION

3.1 EXAMINATION

A. With Applicator present, examine substrates and conditions under which high-performance coatings will be applied, for compliance with coating application requirements.
   1. Apply coatings only after unsatisfactory conditions have been corrected and surfaces to receive coatings are thoroughly dry.
   2. Start of application is construed as Applicator's acceptance of surfaces within that particular area.
B. Coordination of Work: Review other Sections in which primers or other coatings are provided to ensure compatibility of total systems for various substrates. On request, furnish information on characteristics of specified finish materials to ensure compatible primers.
   1. If a potential incompatibility of primers applied by others exists, obtain the following from the primer Applicator before proceeding:
      a. Confirmation of primer's suitability for expected service conditions.
      b. Confirmation of primer's ability to be top coated with materials specified.
   2. Notify Architect about anticipated problems before using the coatings specified over substrates primed by others.

3.2 PREPARATION

A. Cleaning: Before applying high-performance coatings, clean substrates of substances that could impair bond of coatings.
   1. Schedule cleaning and coating application so dust and other contaminates from cleaning process will not fall on wet, newly coated surfaces.
B. Surface Preparation: Clean and prepare surfaces to be coated according to manufacturer's written instructions for each substrate condition and as specified.
   1. Use abrasive non-blast-cleaning methods to remove deleterious matter on steel surfaces.
   2. Provide barrier coats over incompatible primers or remove primers and reprime substrate.
   3. Ferrous-Metal Substrates: Clean ferrous-metal surfaces that have not been shop coated; remove oil, grease, dirt, loose mill scale, and other foreign substances. Use solvent or mechanical cleaning methods that comply with SSPC recommendations.

a. Clean steel surfaces as recommended by coating manufacturer and according to SSPC-SP 10/NACE No. 2.
b. Clean galvanized surfaces as recommended by coating manufacturer and according to SSPC-SP-1.

C. Material Preparation: Carefully mix and prepare coating materials according to manufacturer's written instructions.
1. Maintain containers used in mixing and applying coatings in a clean condition, free of foreign materials and residue.
2. Stir materials before applying to produce a mixture of uniform density. Stir as required during application. Do not stir surface film into the material. Remove film and, if necessary, strain coating material before using.
3. Use only the type of thinners approved by manufacturer and only within recommended limits.

D. Tint each undercoat a lighter shade to facilitate identification of each coat if multiple coats of the same material are to be applied. Tint undercoats to match color of finish coat, but provide sufficient difference in shade of undercoats to distinguish each separate coat.

3.3 APPLICATION

A. General: Apply high-performance coatings according to manufacturer's written instructions.
1. Use applicators and techniques best suited for the material being applied.
2. Do not apply high-performance coatings over dirt, rust, scale, grease, moisture, scuffed surfaces, or conditions detrimental to forming a durable coating film.
3. Coating colors, surface treatments, and finishes are indicated in the coating system descriptions.
4. Provide finish coats compatible with primers used.
5. The term "exposed surfaces" includes areas visible when permanent steel items are exposed after installation. Extend coatings in these areas to maintain system integrity and provide desired protection.

3.4 CLEANING

A. Cleanup: At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.
1. After completing coating application, clean spattered surfaces. Remove spattered coatings by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.

3.5 PROTECTION

A. Protect work of other trades, whether being coated or not, against damage from coating operation. Correct damage by cleaning, repairing, replacing, and recoating, as approved by Architect, and leave in an undamaged condition.
1. Provide "Wet Paint" signs to protect newly coated finishes. After completing coating operations, remove temporary protective wrappings provided by others to protect their work.
2. At completion of construction activities of other trades, touch up and restore damaged or defaced coated surfaces. Comply with procedures specified in PDCA P1.

END OF SECTION 099600

SECTION 23 05 19

GAGES AND METERS

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Pressure gages and Pressure gage taps.

B. Thermometers and thermometer wells.

1.2 REFERENCES: Material and/or equipment specified in this section shall meet or exceed one or more of the property requirements or installation requirements of the following specifications/publications as applicable to the specific product or end use:

A. ASME - B40.1 - Gages - Pressure Indicating Dial Type - Elastic Element.

B. ASTM E1 - Specification for ASTM Thermometers.

C. ASTM E77 - Verification and Calibration of Liquid-in-Glass Thermometers.

D. UL 404 - Gages, Indicating Pressure, for Compressed Gas Service.

1.3 SCOPE

A. The work covered by this specification consists of furnishing all labor, equipment, materials and performing all operations required, for the correct and complete fabrication and installation of gages and meters in accordance with the applicable project specifications, drawings, codes, regulations and standards.

1.4 ENVIRONMENTAL REQUIREMENTS

A. Do not install instrumentation when areas are under construction, except for required rough-in, taps, supports and test plugs.

PART 2 PRODUCTS

2.1 PRESSURE GAGES

A. Gage: ASME B40.1, UL 393 drawn steel case, phosphor bronze bourdon tube, rotary brass movement, brass socket, with front recalibration adjustment, black scale on white background.
   1. Case: Steel with brass bourdon tube.
   2. Size: 4½ inch diameter.
   3. Mid-Scale Accuracy: One percent.
   4. Scale: psi .

2.2 PRESSURE GAGE ACCESSORIES

A. Gage Cock: Ball valve.

B. Pulsation Damper: Pressure snubber, brass with 1/4 inch connection.

C. Siphon: ¼ inch angle or straight pattern.

2.3 STEM TYPE THERMOMETERS

A. Thermometer: ASTM E1, adjustable angle, liquid-in-glass, lens front tube, cast aluminum case with enamel finish, cast aluminum adjustable joint with positive locking device.
   1. Size: 9 inch scale.
   2. Window: Acrylic.
   3. Stem: die-cast zinc, length to suit.
   4. Accuracy: ASTM E77 1 percent.
   5. Calibration: Both degrees F and degrees C.
   6. Tube: Non-toxic, blue-reading organic filled, magnifying lens front.

2.4 DIAL THERMOMETERS

A. Thermometer: ASTM E1, stainless steel case, vapor or liquid actuated with brass or copper bulb, copper or bronze braided capillary, white with black markings and black pointer glass lens.
   1. Size: 4½ inch.
   2. Lens: Clear glass Lexan.
   3. Length of Capillary: Minimum 5 feet.
   4. Accuracy: 2 percent.
   5. Calibration: Both degrees F and degrees C.

2.5 THERMOMETER SUPPORTS

A. Socket: Brass separable sockets for thermometer stems with or without extensions as required, and with cap and chain.

B. Flange: 3 inch outside diameter reversible flange, designed to fasten to sheet metal air ducts, with brass perforated stem.

2.6 TEST PLUGS

A. Test Plug: Similar to Petes Plug, ¼ inch or ½ inch brass fitting and cap for receiving 1/8 inch outside diameter pressure or temperature probe with Nordel or Viton core for temperatures up to 275 degrees F.

B. Test Kit: Carrying case, internally padded and fitted containing two 3 ½ inch diameter pressure gages, two gage adapters with 1/8 inch probes, two 1 ½ inch dial thermometers.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install in accordance with manufacturer's instructions.

B. Provide one pressure gage per pump, installing taps on suction and discharge of pump. Pipe to gage.

C. Install pressure gages with pulsation dampners. Provide gage cock to isolate each gage. Provide siphon on gages in steam systems. Extend nipples and siphons to allow clearance from insulation.

D. Install thermometers in piping systems in sockets in short couplings. Enlarge pipes smaller than 2½ inch for installation of thermometer sockets. Ensure sockets allow clearance from insulation.

E. Install thermometer sockets adjacent to controls systems thermostat, transmitter, or sensor sockets, where thermometers are provided on local panels.

F. Provide instruments with scale ranges selected according to service with largest appropriate scale.

G. Install gages and thermometers in locations where they are easily read from normal operating level. Install vertical to 45 degrees off vertical.

H. Adjust gages and thermometers to final angle, clean windows and lenses, and calibrate to zero.

I. Locate test plugs adjacent to thermometers and thermometer sockets, adjacent to pressure gages and pressure gage taps, and adjacent to control device sockets.

END OF SECTION

MAI 2012-1529

SECTION 23 05 53

HVAC IDENTIFICATION

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Nameplates.

B. Tags.

C. Stencils.

D. Pipe Markers.

1.2 REFERENCES: Material and/or equipment specified in this section shall meet or exceed one or more of the property requirements or installation requirements of the following specifications/publications as applicable to the specific product or end use:

A. ANSI or equal standards for the Identification of Piping Systems.

PART 2 PRODUCTS

2.1 NAMEPLATES

A. Description: Laminated three-layer plastic with engraved black letters on light contrasting background color. Furnish and install on all mechanical equipment.

2.2 TAGS

A. Metal Tags: Brass with stamped letters; tag size minimum 1½ inch diameter with smooth edges.

B. Chart: Typewritten letter size list in anodized aluminum frame.

2.3 STENCILS

A. Stencils: With clean cut symbols and letters of following size:
   1. ¾ to 1¼ inch Outside Diameter of Insulation or Pipe: 8 inch long color field, ½ inch high letters.
   2. 1½ to 2 inch Outside Diameter of Insulation or Pipe: 8 inch long color field, ¾ inch high letters.
   3. 2½ to 6 inch Outside Diameter of Insulation or Pipe: 12 inch long color field, 1¼ inch high letters.
   4. 8 to 10 inch Outside Diameter of Insulation or Pipe: 24 inch long color field, 2½ inch high letters.
   5. Over 10 inch Outside Diameter of Insulation or Pipe: 32 inch long color field, 3½ inch high letters.

B. Stencil Paint shall be semi-gloss enamel, colors conforming to ASME A13.1.

2.4 PIPE MARKERS

A. Color: Match existing or conform to ANSI/OSHA standards.

B. Plastic Pipe Markers: Factory fabricated, flexible, semi- rigid plastic, preformed to fit around pipe or pipe covering; minimum information indicating flow direction arrow and identification of fluid being conveyed.

C. Plastic Tape Pipe Markers: Flexible, vinyl film tape with pressure sensitive adhesive backing and printed markings.

D. Underground Plastic Pipe Markers: Bright colored continuously printed plastic ribbon tape, minimum 6 inches wide by 4 mil thick, manufactured for direct burial service.

2.5 CEILING TACKS

A. Description: Steel with ¾ inch diameter color coded head.

B. Color code as follows:
   1. Yellow - HVAC equipment
   2. Red - Fire dampers/smoke dampers
   3. Green - Plumbing valves
   4. Blue - Heating/cooling valves

PART 3 EXECUTION

3.1 PREPARATION

A. Degrease and clean surfaces to receive adhesive for identification materials.

B. Prepare surfaces as required by manufacturer's installations for stencil painting.

3.2 INSTALLATION

A. Install plastic nameplates with corrosive-resistant mechanical fasteners, or adhesive. Apply with sufficient adhesive to ensure permanent adhesion and seal with clear lacquer.

B. Install tags with corrosion resistant chain.

C. Install plastic pipe markers in accordance with manufacturer's instructions.

D. Install plastic tape pipe markers complete around pipe in accordance with manufacturer's instructions.

E. Identify each piece of equipment with plastic nameplates. Small devices, such as in-line pumps, may be identified with tags.

F. Identify control panels and major control components outside panels with plastic nameplates.

G. Identify valves in main and branch piping with tags.

H. Tag automatic controls, instruments, and relays. Key to control schematic.

I. Identify piping, concealed or exposed, with plastic tape pipe markers or stenciled painting. Identify service, flow direction, and pressure. Install in clear view and align with axis of piping. Locate identification not to exceed 10 feet on straight runs including risers and drops, adjacent to each valve and tee, at each side of penetration of structure or enclosure, and at each obstruction.

END OF SECTION

MAI 2012-1529

SECTION 23 05 93

TESTING, ADJUSTING, AND BALANCING

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Testing, adjustment, and balancing of hydronic systems.

B. Measurement of final operating condition of HVAC systems.

1.2 RELATED SECTIONS AND DRAWINGS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.3 REFERENCES: Material and/or equipment specified in this section shall meet or exceed one or more of the property requirements or installation requirements of the following specifications/publications as applicable to the specific product or end use:

A. AABC - National Standards for Total System Balance.

B. ASHRAE 111 - Practices for Measurement, Testing, Adjusting, and Balancing of Building Heating, Ventilation, Air-conditioning, and Refrigeration Systems.

C. NEBB - Procedural Standards for Testing, Adjusting, and Balancing of Environmental Systems.

1.4 SUBMITTALS

A. Submit electronic draft copies of report for review prior to final acceptance of Project. Provide electronic final copies for Architect/Engineer review and for inclusion in operating and maintenance manuals.

B. Provide reports in 3-ring binder manuals, complete with index page and indexing tabs, with cover identification at front and side. Include set of reduced drawings with air outlets and equipment identified to correspond with data sheets, and indicating thermostat locations. Binder shall be high quality hard cover type.

C. Include detailed procedures, agenda, sample report forms and copy of AABC National Project Performance Guaranty prior to commencing system balance.

D. Test Reports: Indicate data on AABC National Standards for Total System Balance forms or forms approved in writing by Architect/Engineer.

1.5 PROJECT RECORD DOCUMENTS

A. Record actual locations of flow measuring stations and/or balancing valves and rough setting.

1.6 QUALITY ASSURANCE

A. Perform total system balance in accordance with AABC National Standards for Field Measurement and Instrumentation, Total System Balance.

B. Maintain one copy of each document on site.

C. The final air balance report shall be approved by the Architect/Engineer prior to final payment to the Contractor. The Engineer reserves the right to ask for and be furnished any additional information he deems necessary to be shown on air/water balance report.

1.7 QUALIFICATIONS

A. Agency: Independent company (not associated with the systems installing contractor) specializing in the testing, adjusting, and balancing of systems specified in this Section with minimum three years experience and NEBB certified. The test and balance agency selected by the Contractor shall be approved by the Engineer. The Mechanical Trades shall be responsible for any cost differences between the test and balance agency selected by the Contractor and the test and balance agency approved by the Engineer.

1.8 SEQUENCING AND SCHEDULING

A. Sequence work to commence after completion of systems and schedule completion of work before Substantial Completion of Project. Coordinate project schedule with contractor. The Mechanical Trades shall coordinate and schedule the on-site balancing with the Engineer to allow the Engineer the ability to be at the project site during the time of the balancing. If the Engineer is not scheduled to oversee the balance of systems, the Mechanical Trades shall be responsible for rebalancing the system in the presence of the Engineer and be responsible for all costs for such.

B. The Test and Balance Agency shall schedule/coordinate (through the Mechanical Contractor) with the Temperature Control Contractor. The Temperature Control Contractor should be on site during the air balance to verify proper operation of the system required for the air balance.

C. Acceptable Test and Balance Contractors.
   1. HiTech Test and Balance (Freeland, MI)
   2. Absolute Balance Company (South Lyon, MI)
   3. Enviro-Aire/Total Balance Company (St Clair Shores, MI)
   4. Ener-Tech Testing (Holly, MI)
   5. International Test & Balance (Southfield, MI)
   6. Pro-Mec Engineering Services, Inc. (Grand Ledge, MI)

PART 2 PRODUCTS - Not used

PART 3 EXECUTION

3.1 EXAMINATION

A. Verify that systems are complete and operable before commencing work. Ensure the following conditions:
   1. Systems are started and operating in a safe and normal condition.
   2. Temperature control systems are installed complete and operable.
   3. Proper thermal overload protection is in place for electrical equipment.
   4. Hydronic systems are flushed, filled, and vented.
   5. Pumps are rotating correctly.
   6. Proper strainer baskets are clean and in place.
   7. Service and balance valves are open.

B. Submit field reports. Report defects and deficiencies noted during performance of services which prevent system balance.

C. Beginning of work means acceptance of existing conditions.

3.2 PREPARATION

A. Provide a review of proposed design drawings and advise appropriate trades about additional balancing devices required to attain design conditions.

B. Advise Engineer about additional balancing devices required to attain design conditions.

C. Provide instruments required for testing, adjusting, and balancing operations. Make instruments available to Architect/Engineer to facilitate spot checks during testing.

3.3 INSTALLATION TOLERANCES

A. Hydronic Systems: Adjust to within plus or minus 10 percent of design.

3.4 ADJUSTING

A. Ensure recorded data represents actual measured or observed conditions.

B. Permanently mark settings of adjustment devices allowing settings to be restored. Set and lock memory stops.

C. After adjustment, take measurements to verify balance has not been disrupted or that such disruption has been rectified.

D. Leave systems in proper working order, replacing belt guards, closing access doors, closing doors to electrical switch boxes, and restoring thermostats to specified settings.

E. At final inspection, recheck random selections of data recorded in report. Recheck points or areas as selected and witnessed by the Owner.

F. Check and adjust systems approximately six months after final acceptance and submit report.

3.5 WATER SYSTEM PROCEDURE

A. Adjust water systems to provide required or design quantities.

B. Use calibrated Venturi tubes, orifices, or other metered fittings and pressure gages to determine flow rates for system balance. Where flow metering devices are not installed, base flow balance on temperature difference across various heat transfer elements in the system.

C. Adjust systems to provide specified pressure drops and flows through heat transfer elements prior to thermal testing. Perform balancing by measurement of temperature differential in conjunction with air balancing.

D. Effect system balance with automatic control valves fully open to heat transfer elements.

E. Effect adjustment of water distribution systems by means of balancing cocks, valves, and fittings. Do not use service or shut-off valves for balancing unless indexed for balanced point.

F. Where available pump capacity is less than total flow requirements or individual system parts, full flow in one part may be simulated by temporary restriction of flow to other parts.

G. Advise Mechanical Contractor about additional balancing devices required to attain design conditions.

H. If pump impellor trimming or size change is recommended to improve reliability or reduce operating cost, include the recommendation in the draft copy of the report, to allow the Owner to be informed of, and be responsible for, the recommendation for the change.

3.6 SCHEDULES

A. Equipment Requiring Testing, Adjusting, and Balancing shall include but not be limited to: hydronic systems such as pumps, chillers, flow control valves, coils, etc. See drawings for equipment utilized for this project and submit applicable report forms for this project air and/or water system(s).

B. Report Forms
   1. Title Page:
      a. Name of Testing, Adjusting, and Balancing Agency
      b. Address of Testing, Adjusting, and Balancing Agency
      c. Telephone number of Testing, Adjusting, and Balancing Agency
      d. Project name
      e. Project location
      f. Project Architect
      g. Project Engineer
      h. Project Contractor
      i. Project altitude
      j. Report date

2. Summary Comments:
   a. Design versus final performance
   b. Notable characteristics of system
   c. Description of systems operation sequence
   d. Summary of outdoor and exhaust flows to indicate amount of building pressurization
   e. Nomenclature used throughout report
   f. Test conditions
3. Instrument List:
   a. Instrument
   b. Manufacturer
   c. Model number
   d. Serial number
   e. Range
   f. Calibration date

4. Electric Motors:
   a. Manufacturer
   b. Model/Frame
   c. HP/BHP
   d. Phase, voltage, amperage; nameplate, actual, no load
   e. RPM
   f. Service factor
   g. Starter size, rating, heater elements
   h. Sheave Make/Size/Bore
5. Pump Data:
   a. Identification/number
   b. Manufacturer
   c. Size/model
   d. Impeller
   e. Service
   f. Design flow rate, pressure drop, BHP
   g. Actual flow rate, pressure drop, BHP
   h. Discharge pressure
   i. Suction pressure
   j. Total operating head pressure
   k. Shut off, discharge and suction pressures
   l. Shut off, total head pressure
   m. Heat output

END OF SECTION

MAI 2012-1529

SECTION 23 07 16

MISCELLANEOUS EQUIPMENT INSULATION

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Insulation of miscellaneous equipment such as storage tanks, air separators, chilled water pump impellor housings, etc. and any other miscellaneous items that drawings call for to be insulated.

1.2 REFERENCES

A. Thermal insulation materials shall meet the property requirements of one or more of the following specifications as applicable to the specific product or end use:

1. American Society for Testing of Materials Specifications:

a. ASTM C533, "Standard Specification for Calcium Silicate Pipe & Block Insulation"
b. ASTM C533, "Standard Specification for Mineral Fiber Blanket and Felt Insulation"
c. ASTM C612, "Standard Specification for Mineral Fiber Block and Board Thermal Insulation"
d. ASTM C1136, "Standard Specification for Barrier Material, Vapor," Type 1 or 2 (jacket only).

B. Insulation materials, including all weather and vapor barrier materials, closures, hangers, supports, fitting covers, and other accessories shall be furnished and installed in strict accordance with project drawings, plans and specifications.

1.3 SCOPE

A. The work covered by this specification consists of furnishing all labor, equipment, materials and accessories, and performing all operations required, for the correct fabrication and installation of thermal insulation applied to the following commercial systems, in accordance with applicable project specifications and drawings, subject to the terms and conditions of the contract:
1. Cold systems, fluid temperatures below 105°F

1.4 DEFINITIONS

A. The term "mineral fiber" as defined by the above specifications includes fibers manufactured of glass, rock, or slag processed from a molten state with or without binder.

1.5 SYSTEM PERFORMANCE

A. Insulation materials furnished and installed hereunder should meet the minimum economic insulation thickness requirements of the North American Insulation Manufacturers' Association (NAIMA) (formerly known as TIMA), to ensure cost-effective energy conservation performance. Alternatively, materials should beet the minimum thickness requirements of National Voluntary Consensus Standard 90.1 (1989), Energy Efficient Design of New Buildings", of the American Society of Heating, Refrigeration, and Air Conditioning Engineers (ASHRAE). However, if other factors such as condensation control or personnel protection are to be considered, the selection of the thickness of insulation should satisfy the controlling factor.

1. Insulation materials furnished and installed hereunder shall meet the fire hazard requirements of any one of the following specification:

a.	American Society for Testing of Materials	ASTM E84
b.	Underwriters' Laboratories, Inc.	UL 723
c.	National Fire Protection Association	NFPA 255

B. Calcium silicate products shall include a visual identification system to permit positive field determination of their asbestos-free characteristic.

1.6 QUALITY ASSURANCE

A. The contractor shall use whatever means are necessary to protect the insulation materials and accessories before, during, and after installation. No insulation material shall be installed that has become damaged in any way. The contractor shall also use all means necessary to protect work and materials installed by other trades.

B. If any insulation material has become wet because of transit or job site exposure to moisture or water, the contractor shall not install such material, and shall remove it from the job site. An exception may be allowed in cases where the contractor is able to demonstrate that wet insulation when fully dried out (either before installation, or afterward following exposure to system operating temperatures) will provide installed performance that is equivalent in all respects to new, completely dry insulation. In such cases, consult the insulation manufacturer for technical assistance.

PART 2 PRODUCTS

2.1 VESSELS, TANKS AND EQUIPMENT

A. Vessels, tanks, and equipment operating at temperatures up to 450°F shall be insulated with glass fiber or calcium silicate insulation selected to conform readily to the surface to which it will be applied.

B. For temperatures over +400°F, insulation shall be applied in double layers, staggering the joints of both the insulation and the lagging (if used) wherever practical. Observe manufacturer recommendations on maximum temperature/ thickness combinations, but should not be less than that specified for the piping system it is associated with. Outdoor installations require weather protection of insulation jacketing. Insulation may be one of the following type, depending on project requirements:

1. Small diameter tanks and vessels with diameters less than 30" in diameter may be insulated with any of the following, depending on the service class required.

   a. Heavy density Fiberglas pipe insulation with factory applied all service jacket (ASJ) and Doublesure* two-component adhesive closure system, rated for a maximum service temperature of 850°F. For large pipe sizes where SSL-II is not available, the single adhesive SSL closure may be substituted.

   b. Unjacketed Fiberglas heavy density pipe insulation rated for maximum operating temperature of 850°F may be installed using appropriate banding and then covered with metal or PVC jacketing or otherwise jacketed and/or finished in accordance with details shown.

   c. Owens-Corning Fiberglas pipe and tank insulation, heavy density fiberglass insulation with end-grain factory-applied to ASJ all-service jacket, for systems operating at temperatures to +650°F and where moderate abuse resistance is required.

   d. Owens-Corning Pink Calcium Silicate, rigid hydrous asbestos-free calcium silicate insulation for systems operating at temperatures from +300°F to +1200°F, where the equipment is expected to be exposed to impact or abuse. The insulation shall be protected from the effects of weather, water, moisture, or mechanical and chemical abuse with either metal or PVC jacketing or otherwise jacketed and/or finished in accordance with details shown.

2.2 ACCESSORY MATERIALS

A. Accessory materials installed as part of insulation work under this section shall include (but not be limited to):

   1. Closure Materials - Butt strips, bands, wires, staples, mastics, adhesives; pressure sensitive tapes.

   2. Field-applied jacketing materials - Sheet metal, plastic, canvas, fiberglass cloth, insulating cement; PVC fitting covers.

   3. Support Materials - Hanger straps, hanger rods, saddles.

   4. Fasteners, weld pins/studs, speed clips, insulation washers.

   5. Metal mesh or expanded metal lagging.

B. All accessory materials shall be installed in accordance with project drawings and specifications, manufacturer's instructions and/or in conformance with the current edition of the Midwest Insulation Contractors Association (MICA) "Commercial & Industrial Insulation Standards".

PART 3 EXECUTION

3.1 SITE INSPECTION

A. Before starting work under this section, carefully inspect the site and installed work of other trades and verify that such work is complete to the point where installation of materials and accessories under this section can begin.

B. Verify that all materials and accessories can be installed in accordance with project drawings and specifications and material manufacturers' recommendations.

C. Verify by inspecting product labeling, submittal data, and/or certifications which may accompany the shipments that all materials and accessories to be installed on the project comply with applicable specifications and standards and meet specified thermal and physical properties.

3.2 PREPARATION

A. Ensure that all tank, vessel, and equipment surfaces over which insulation is to be installed are clean and dry.

B. Ensure that insulation is clean, dry, and in good mechanical condition with all factory-applied vapor or weather barriers intact and undamaged. Wet, dirty, or damaged insulation shall not be acceptable for installation.

C. Ensure that pressure testing of tanks, vessels, and equipment has been completed prior to installing insulation.

3.3 INSTALLATION

A. General

1. Install all insulation materials and accessories in accordance with manufacturer's published instructions and recognized industry practices to ensure that it will serve its intended purpose.

2. Install insulation on tanks, vessels, and equipment subsequent to installation of heat tracing, painting, testing, and acceptance tests.

3. Install insulation materials with smooth and even surfaces. Rework poorly fitted joints. Do not use joint sealer or mastic as filler for joint gaps and excessive voids resulting from poor workmanship. Apply using staggered joint method for both single and double layer installation, applying each layer of insulation separately.

4. Coat insulated surfaces where specified on contract drawings with layer of insulating cement, troweled in a workmanlike manner, leaving a smooth and continuous surface. Fill in seams, broken edges, and depressions. Cover over wire mesh and joints with cement sufficiently thick to remove surface irregularities.

5. Maintain the integrity of factory-applied vapor barrier jacketing on all insulation, protecting it against puncture, tears or other damage.

6. Where specification calls for field-applied all-service vapor barrier jacketing, it shall be neatly fitted and tightly secured. Lap seams 2" (min.). Seal all joints with adhesive. Tape with 3" matching pressure-sensitive tape or 3" glass fabric and mastic.

B. Removable insulation

1. Provide removable insulation sections to cover parts of equipment which must be opened periodically for maintenance, such as vessel covers, fasteners, flanges, frames and accessories.

C. Areas left uninsulated

1. Items such as boiler manholes, handholes, clean-outs, ASME stamp, and manufacturers' nameplates, may be left uninsulated unless omitting insulation would cause a condensation problem. When such is the case, appropriate tagging shall be provided to identify the presence of these items. Provide neatly beveled edges at interruptions of insulation.

D. Equipment exposed to weather

1. Protect outdoor insulation from weather by installation of weather barrier mastic protective finish or jacketing as recommended by the jacketing manufacturer.

3.4 FIELD QUALITY ASSURANCE

A. Upon completion of all insulation work covered by this specification, visually inspect the work and verify that it has been correctly installed. This may be done while work is in progress, to assure compliance with requirements herein to cover and protect insulation materials during installation.

3.5 PROTECTION

A. Replace damaged insulation which cannot be satisfactorily repaired, including insulation with vapor barrier damage and moisture-saturated insulation.

B. The insulation contractor shall advise the general and/or the mechanical contractor as to requirements for protection of the insulation work during the remainder of the construction period, to avoid damage and deterioration of the finished insulation work.

3.6 SAFETY PRECAUTIONS

A. Insulation contractor's employees shall be properly protected during installation of all insulation. Protection shall include proper attire when handling and applying insulation materials, and shall include (but not be limited to) disposable dust respirators, gloves, hard hats, and eye protection.

B. The insulation contractor shall conduct all job site operations in compliance with applicable provisions of the Occupational Safety and Health Act, as well as with all state and/or local safety and health codes and regulations that may apply to the work.

END OF SECTION

MAI 2012-1529

SECTION 23 07 19

HVAC PIPE SYSTEM INSULATION

PART 1 GENERAL

1.1 SECTION INCLUDES PIPE INSULATION FOR:

A. Chilled ice storage water supply and return piping system.

B. Outdoor piping.

C. Valves and fittings.

D. Miscellaneous tanks, valves, chilled water ice pump impellor housings, piping, etc.

1.2 RELATED SECTIONS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification, including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself, but is supplementary to the entire specification and drawings.

1.3 REFERENCES

A. Thermal insulation materials shall meet the property requirements of the following specifications as applicable to the specific product or end use:

B. American Society for Testing of Materials Specifications:
   1. ASTM C547, "Standard Specification for Mineral Fiber Preformed Pipe Insulation"
   2. ASTM C533, "Standard Specification for Calcium Silicate Pipe & Block Insulation"
   3. ASTM C585, "Recommended Practice for Inner and Outer Diameters of Rigid Pipe Insulation for Nominal Sizes of Pipe and Tubing (NPS System)"
   4. ASTM C1136, "Standard Specification for Barrier Material, Vapor," Type 1 or 2 (jacket only)

C. Insulation materials, including all water and vapor barrier materials, closures, hangers, supports, fitting covers, and other accessories, shall be furnished and installed in strict accordance with project drawings, plans, and specifications.

1.4 SCOPE

A. The work covered by this specification consists of furnishing all labor, equipment, materials and accessories, and performing all operations required, for the correct fabrication and installation of thermal insulation applied to the following commercial piping systems, in accordance with the applicable project specifications and drawings, subject to the terms and conditions of the contract:

1. Cold Piping – Fluid temperature below 105°F.

B. Insulation, vapor barriers, jacketing, hangers, supports, accessory materials, etc. shall be installed according to manufacturers recommendations.

1.5 DEFINITIONS

A. The term "mineral fiber" as defined by the above specifications includes fibers manufactured of glass, rock, or slag processed from a molten state, with or without binder.

1.6 SYSTEM PERFORMANCE

A. Insulation material furnished and installed hereunder shall meet the minimum thickness requirements of Standard 90.1 (2007), "Energy Efficient Design of new Buildings" of the American Society of Heating, Refrigeration, and Air-Conditioning Engineers (ASHRAE) except minimum thickness shall be 1". However, if other factors such as condensation control or personnel protection are to be considered, the selection of the thickness of insulation should satisfy the controlling factor.

B. Insulation materials furnished and installed hereunder shall be Class A maximum of 25 flame spread, 35 fuel contributed and 50 smoke developed rating and shall meet the fire hazard requirements of each of the following specifications:

1.	American Society for Testing of Materials	ASTM E84
2.	Underwriters' Laboratories, Inc.	UL 723
3.	National Fire Protection Associations	NFPA 255

C. Calcium silicate products shall include a visual identification system to permit positive field determination of their asbestos-free characteristic.

1.7 QUALITY ASSURANCE

A. The contractor shall use whatever means are necessary to protect the insulation materials and accessories before, during and after installation. No insulation material shall be installed that has become damaged in any way. The contractor shall also use all means necessary to protect work and materials installed by other trades.

B. If any insulation material has become wet because of transit or job site exposure to moisture or water, the contractor shall not install such material, and shall remove it from the job site. An exception may be allowed in cases where the contractor is able to demonstrate that wet insulation when fully dried out (either before installation, or afterward following exposure to system operating temperatures) will provide installed performance that is equivalent in all respects to new, completely dry insulation. In such cases, consult the insulation manufacturer for technical assistance.

PART 2 PRODUCTS

2.1 PIPE INSULATION ON INDOOR SYSTEMS

A. Molded pipe insulation shall be manufactured to meet ASTM C585 for sizes required in the particular system.

B. Molded fibrous glass pipe insulation shall comply with the requirements of ASTM C547. Heavy density Fiberglas pipe insulation with factory applied all-service jacket (ASJ) and Doublesure* two-component adhesive closure system, or Fiberglas Pipe and Tank Insulation, heavy density fiberglass insulation with end grain adhered to ASJ all service jacket. Joints shall be sealed by butt strips having a two-component sealing system or by applying staples and pressure sensitive tape. When self-sealing lap systems are used, sufficient thickness of insulation shall be used to maintain the outer surface temperature of the operating system below +150°F. Manufacturer's data regarding thickness constraints in relation to operating temperature shall be followed. When multiple layers are required, all inner layer(s) shall be unjacketed.

C. Fittings and valves shall be insulated with preformed fiberglass fittings, fabricated sections of fiberglass pipe insulation, fiberglass pipe and tank insulation, fiberglass blanket insulation, or insulating cement. Thickness shall be equal to adjacent pipe insulation. Finish shall match that used on straight sections.

D. Flanges, couplings, chilled water pump impeller housings, valve bonnets etc, shall be covered with an oversized pipe insulation section sized to provide the same insulation thickness as on the main pipe section. An oversized insulation section shall be used to form a collar between the two insulation sections with sections of insulation being used to fill gaps. Jacketing shall match that used on straight pipe sections. Rough cut ends shall be coated with a suitable vapor resistant mastic.

E. On cold systems, vapor barrier performance is extremely important. Particular care must be given to vapor sealing the fitting cover or finish to the pipe insulation vapor barrier. Valve stems shall be sealed with caulking to allow free movement of the stem but provide a seal against moisture incursion. All penetrations of the ASJ and exposed ends of insulation shall be sealed with vapor barrier mastic.

F. All insulated, exposed piping inside the building within 8'-0" above the floor shall be additionally jacketed with a multi-ply, fabric reinforced, self adhesive insulation cladding material with a vapor barrier and a thickness of 0.015". Jacketing system shall be Venture Clad Plus #1579CW-E or equal.

2.2 PIPE INSULATION ON OUTDOOR SYSTEMS

A. Piping located outdoors, with installation temperature above 40°F, shall be insulated and covered with a weatherproof metal jacket as per the following:

1. Insulate outdoor piping with closed-cell, fiber-free elastomeric foam equal to Armaflex type AP insulation. Insulation shall be flexible elastomeric thermal insulation, black in color, flame-spread rating of 25 or less and a smoke developed rating of 50 or less as tested by ASTM E84-91A "Method of Test Surface Burning Characteristics of Building Materials." Thickness shall be as listed.

2. Fitting covers shall be fabricated from miter-cut sections. In all cases, butt joints and seams shall be sealed with Armstrong 520 adhesive. 520 adhesive is a contact adhesive; therefore, in all cases, both surfaces to be joined are to be coated with adhesive with installation temperature above 40°F.

3. On outdoor cold pipes, the insulation system shall be completely vapor sealed before the weather-resistant jacket is applied. The outer jacket shall not compromise the vapor barrier by penetration of fasteners, etc.

4. Jacketing shall be a multi-ply, fabric reinforced, self adhesive insulation cladding material with a vapor barrier and a thickness of 0.015". Jacketing system shall be Venture Clad Plus #1579CW-E or equal with moisture barrier, installed in accordance with the jacket manufacturer's recommendations. Each section of jacketing shall overlap the adjoining section by 3". Al seams shall be taped with Venture Clad joining/seaming tape.

2.3 SUPPORT FOR PIPE WITH INSULATION

A. All piping shall be supported in such a manner that neither the insulation or the vapor/weather barrier is compromised by the hanger or the effects of the hanger. In all cases, hanger spacing shall be such that butt joints may be made outside the hanger.

1. On all size piping of cold systems, the pipe hanger saddles shall be separated away from the pipe by utilizing inserts. The vapor barrier shall be continuous, including material covered by the hanger saddle.

3. For cold piping systems larger than 3" in diameter, Owens-Corning Calcium Silicate pipe insulation shall be used for high density inserts. Piping saddles for piping larger than 3" shall not be in contact with the piping.

4. Owens-Corning Calcium Silicate pipe insulation may be used to support the entire weight of the piping system provided the hanger saddle is designed so the maximum compressive load does not exceed 100 psi.

5. Where pipe shoes and roller supports are required, insulation shall be inserted in the pipe shoe to minimize pipe heat loss. Where possible, the pipe shoe shall be sized to be flush with the outer pipe insulation diameter.

6. Thermal expansion and contraction of the piping and insulation system can generally be taken care of by utilizing double layers of insulation and staggering both longitudinal and circumferential joints. Where long runs are encountered, expansion joints may be required where single layers of the insulation are being used.

7. On vertical runs, insulation support rings shall be used.

2.4 ACCESSORY MATERIALS

A. Accessory materials installed as part of insulation work under this section shall include (but not be limited to):

1. Closure Materials - Butt strips, bands, wires, staples, mastics, adhesives; pressure-sensitive tapes.

2. Field-applied jacketing materials - Sheet metal, plastic, canvas, fiberglass cloth, insulating cement; PVC fitting covers.

3. Support materials - Hanger straps, hanger rods, saddles.

B. All accessory materials shall be installed in accordance with project drawings and specifications, manufacturer's instructions, and/or in conformance with the current edition of the Midwest Insulation Contractors Association (MICA) "Commercial & Industrial Insulation Standards".

2.5 INSULATION THICKNESSES

A. Fittings, including valves, flanges, unions, etc. shall be insulated with the same thickness as the required pipe insulation and covered with PVC fitting cover as specified.

B. Fiberglass insulation thickness shall be as follows:

Piping System	Pipe Size	Insulation Thickness	Insulation Conductivity BTU in H-Ft2-F
Chilled water	Up thru 3" 4" and larger	1" 1½"	0.28
Chilled Water Air Separator Tank	All Sizes	2"	0.28

C. Elastomeric thermal insulation thickness shall be equivalent to fiberglass insulation thickness as indicated above or as indicated on drawing.

PART 3 EXECUTION

3.1 SITE INSPECTION

A. Before starting work under this section, carefully inspect the site and installed work of other trades and verify that such work is complete to the point where installation of materials and accessories under this section can begin.

B. Verify that all materials and accessories can be installed in accordance with project drawings and specifications and material manufacturers' recommendations.

C. Verify by inspecting product labeling, submittal data, and/or certifications which may accompany the shipments that all materials and accessories to be installed on the project may comply with applicable specifications and standards and meet specified thermal and physical properties.

3.2 PREPARATION

A. Ensure that all pipe and fitting surfaces over which insulation is to be installed are clean and dry.

B. Ensure that insulation is clean, dry, and in good mechanical condition with all factory-applied vapor or weather barriers intact and undamaged. Wet, dirty, or damaged insulation shall not be acceptable for installation. All damaged insulation installed will be removed and replaced by the Contractor at no extra cost to the Owner.

C. Ensure that pressure testing of piping and fittings has been completed prior to installing insulation.

3.3 INSTALLATION

A. General

1. Install all insulation materials and accessories in accordance with manufacturer's published instructions and recognized industry practices to ensure that it will serve its intended purpose.

2. Install insulation on piping subsequent to installation of heat tracing, painting, testing, and acceptance tests.

3. Install insulation materials with smooth and even surfaces. Insulate each continuous run of piping with full-length units of insulation, with single cut piece to complete run. Do not use cut pieces or scraps abutting each other. Butt insulation joints firmly to ensure complete, tight fit overall piping surfaces.

4. Maintain the integrity of factory-applied vapor barrier jacketing on all pipe insulation, protecting it against puncture, tears or other damage. All staples used on cold pipe insulation shall be coated with suitable sealant to maintain vapor barrier integrity.

B. Fittings

1. Cover valves, fittings, and similar items in each piping system using one of the following:
   a. Mitered sections of insulation equivalent in thickness and composition to that installed on straight pipe runs.
   b. Insulation cement equal in thickness to the adjoining insulation.
   c. PVC fitting covers insulated with material equal in thickness and composition to adjoining insulation.

C. Penetrations
1. Extend piping insulation without interruption through walls, floors, and similar piping penetrations, except where otherwise specified.

D. Joints
1. Butt pipe insulation against hanger inserts. For hot pipes, apply 3" wide vapor barrier tape or band over butt joints. For cold piping apply wet coat of vapor barrier lap cement on butt joints, and seal joints with 3" wide vapor barrier tape or band.
2. All pipe insulation ends shall be tapered and sealed, regardless of service.

3.4 FIELD QUALITY ASSURANCE

A. Upon completion of all insulation work covered by this specification, visually inspect the work and verify that it has been correctly installed. This may be done while work is in progress, to assure compliance with requirements herein to cover and protect insulation materials during installation.

3.5 PROTECTION

A. Replace damaged insulation which cannot be satisfactorily repaired, including insulation with vapor barrier damage and moisture-saturated insulation.

B. The insulation contractor shall advise the general and/or the mechanical contractor as to requirements for protection of the insulation work during the remainder of the construction period, to avoid damage and deterioration of the finished insulation work.

3.6 SAFETY PRECAUTIONS

A. Insulation contractor's employees shall be properly protected during installation of all insulation. Protection shall include proper attire when handling and applying insulation materials, and shall include (but not be limited to) disposable dust respirators, gloves, hard hats, and eye protection.

B. The insulation contractor shall conduct all job site operations in compliance with applicable provisions of the Occupational Safety and Health Act, as well as with all state and/or local safety and health codes and regulations that may apply to the work.

MAI 2012-1529

SECTION 23 21 00

HYDRONIC PIPING

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Pipe and pipe fittings.

B. Valves.

C. Chilled water piping system.

1.2 REFERENCES: Material and/or equipment specified in this section shall meet or exceed one or more of the property requirements or installation requirements of the following specifications/publications as applicable to the specific product or end use.

A. ASME - Boiler and Pressure Vessel Codes, SEC 9 - Qualification Standard for Welding and Brazing Procedures, Welders, Brazers, and Welding and Brazing Operators.

B. ASME B16.3 - Malleable Iron Threaded Fittings Class 150 and 300.

C. ASME B16.18 - Cast Copper Alloy Solder Joint Pressure Fittings.

D. ASME B16.22 - Wrought Copper and Copper Alloy Solder Joint Pressure Fittings.

E. ASTM A53 - Pipe, Steel, Black and Hot-Dipped, Zinc Coated Welded and Seamless.

F. ASTM A234 - Piping Fittings of Wrought Carbon Steel and Alloy Steel for Moderate and Elevated Temperatures.

G. ASTM B32 - Solder Metal.

H. ASTM B88 - Seamless Copper Water Tube.

I. ASTM F708 - Design and Installation of Rigid Pipe Hangers.

J. ASTM F1476 - Standard Specification for the Performance of Gasketed Mechanical Couplings for Use in Piping Applications.

K. AWS A5.8 - Brazing Filler Metal.

L. AWS D1.1 - Structural Welding Code.

M. MSS SP58 - Pipe Hangers and Supports - Materials, Design and Manufacture.

N. MSS SP69 - Pipe Hangers and Supports - Selection and Application.

O. MSS SP89 - Pipe Hangers and Supports - Fabrication and Installation Practices.

P. ANSI/AWWA C606 - Grooved and Shouldered Joints.

PART 2 PRODUCTS

2.1 CHILLED/ICE WATER PIPING, ABOVE GRADE

A. Chilled water piping 3" and smaller shall be:
1. Copper tubing: ASTM B88, Type L, hard drawn.
   a. Fittings: ASME B16.18 cast bronze tee tap or ASME B16.22 solder wrought copper.
   b. Tee Connections: Mechanically extracted collars with notched and dimpled branch tube.
   c. Joints: 95-5 tin-antimony or tin and silver with melting range 430°F to 535°F.
   d. Chilled water piping 2" through 3" may be Victaulic 'CTS' grooved piping system using EPDM gasketing as an option to soldering.
      1. Roll grooved ends as appropriate to type L hard drawn tubing, pressures, size and method of joining, Tubing ends shall be grooved in accordance with manufacturers current listed standards to copper tube dimensions. (flaring of tubing ends to accommodate alternate sized couplings is not allowed.
      2. Victaulic Style 607H Installation-Ready couplings shall consist of ductile iron housings, conforming to ASTM A395 and A536, cast with offsetting, angle-pattern bolt pads, coated with grade EHP gasket suitable for water temperatures to +250 degrees F, copper colored alkyd enamel, complete with type synthetic rubber gasket.
         a. Installation ready, for direct stab installation without field disassembly.
      3. Valves Victaulic Style 608 butterfly valve with grooved ends manufactured to copper tube dimensions.
      4. Victaulic 'CTS' Grooved End Fittings: ASME B16.18 bronze sand cast or ASME B16.22 wrought copper. Manufactured to copper tube dimensions. (Flaring of fitting end to IPS dimensions is not allowed).
      5. Gasketing shall be Grade "EHP" EPDM compound (red & green color coded) conforming to ASTM D-2000. Temperature operating range -30°F to +250°F.

B. Chilled/ice water piping 4" and larger shall be steel pipe: ASTM A53, Schedule 40, black steel, beveled ends for welding.
1. Fittings: ASME B16.3, malleable iron or ASTM A234, forged steel welding type.
2. Joints: AWS D1.1 welded.

C. Chilled water piping 2" and smaller may be Victaulic Vic Press 304™ System using EPDM "E" O-ring as an option to soldering, threading or flanging.

1. Piping shall be stainless steel schedule 10S pipe conforming to ASTM A312, Type 304/304L [316/316L]. Working pressures to 500 psi.

2. Coupling and fitting housings shall be Vic Press 304™ products formed of precision cold drawn stainless steel, with self contained O-ring seals in the coupling/fitting ends.

3. O-Ring Seals - O-ring seals shall be molded of synthetic rubber, Grade "E" EPDM recommended for water services from -30°F to +230°F.

4. Valves - Victaulic or equal Style P589 Vic Press 304™ end ball valve, 300 psi, ½" through 2" size range, forged brass body, ASTM B-16 chrome plated ASTM B283 brass ball and stem, TFE seats and stem washer, Fluoroelastomer O-ring.

5. Assembly- Pipe ends must be marked according to instructions supplied and fully inserted into the coupling/fitting housing up to the pipe stop. Fitting ends shall be pressed onto the pipe using only a Pressfit Tool (PFT-510 series) equipped with the proper size pressing jaws in accordance with the latest Pressfit System Product Assembly and Tool Operation Manual.

6. Pipe Preparation - Stainless steel pipe shall be square cut plus or minus 0.030", properly deburred and cleaned to ensure leak-tight O-ring seal, in accordance with latest Victaulic Vic Press 304™ System published information.

D. Chilled water piping 2½" and larger may be Victaulic grooved piping system using EPDM gasketing as an option to welding, threading or flanging.

1. Piping shall be ASTM A53, schedule 40 black steel with mechanical grooves.

2. All grooved components shall be of one manufacturer and shall conform to local code approval and/or as listed by ANSI B31.1, B31.9, ASME, UL/FM IAMPO or BOCA. Grooved end product manufacturer to be ISO-9001 certified.

3. Roll or cut grooved ends as appropriate to pipe material, wall thickness, pressures, size and method of joining. Pipe ends shall be grooved in accordance with manufacturers current listed standards conforming to ANSI/AWWA C606. Grooving tools shall be of the same manufacturer as the grooved components.

4. Mechanical couplings shall consist of ductile iron housings, conforming to ASTM A395 and A536, complete with synthetic rubber gasket.

   a. Victaulic style 07 (zero-flex) rigid coupling. Housings cast with offsetting, angle-pattern bolt pads to provide system rigidity for support and hanging in accordance with ANSI B31.1, B31.9 and NFPA 13. Victaulic style HP-70 rigid coupling for high pressure service.
      1. Installation ready, for direct stab installation without field disassembly, including grade EHP gasket. Victaulic Style 107H.
   b. Victaulic style 177 “Installation-Ready” and style 77 or 75 coupling shall be used where system flexibility is desired at pumps and other mechanical equipment to reduce noise and vibration. Noise and vibration reduction is achieved by installing (3) flexible couplings near the vibration source.
   c. 14” and Larger: Victaulic AGS series two segment couplings with lead-in chamfer on housing key and wide width FlushSeal® gasket.
      1. Rigid Type: Housing key shall fill the wedge shaped AGS groove and provide rigidity and system support and hanging in accordance with ANSI B31.1 and B31.9. Victaulic Style W07.

2. Flexible Type: Housing key shall fit into the wedge shaped AGS groove and allow for linear and angular pipe movement. Victaulic Style W77.

5. Mechanical reducing couplings shall be Victaulic Style 750 or equal for pipe runs for reducers.

6. Victaulic grooved end fittings manufactured from ASTM A395 and A536, ductile iron; ASTM A234 forged steel; or factory-fabricated from carbon steel pipe conforming to ASTM A53. Grooved ends in accordance with ANSI/AWWA C606.

7. Gasketing shall be grade EHP gasket suitable for water temperatures to +250°F or Grade "E" EPDM compound (green color coded) conforming to ASTM D-2000 designation 2CA615A25B24F17Z. Temperature operating range -30°F to +230°F.

2.2 EQUIPMENT DRAINS AND OVERFLOWS

A. Equipment drains, cooling coil drains, overflows and piping from relief valves 1" and smaller shall be Copper Tubing: ASTM B88, Type L, hard drawn.
1. Fittings: ASME B16.18 cast brass tee tap or ASME B16.22 solder wrought copper.
2. Joints: Solder, lead free, 95-5 tin-antimony, or tin and silver, with melting range 430 to 535 degrees F.

B. Equipment drains, cooling coil drains, overflows and piping from relief valves 1¼" thru 2" shall be ASTM A53, schedule 40 black steel with threaded joints.

2.3 PIPE HANGERS AND SUPPORTS

A. Refer to Section 23 05 00.

2.4 UNIONS, FLANGES, AND COUPLINGS

A. Unions for Pipe 3 Inches and Under:
1. Copper Pipe: Bronze, soldered joints.
2. Stainless Steel Pipe: Type 304/304L stainless steel, threaded-type, with Vic Press 304™ ends. Victaulic Style P584.
3. On piping systems where grooved joint mechanical couplings are used, unions are not required. (Couplings shall serve as unions).

B. Flanges for Pipe 4 Inches and Larger:
1. Ferrous Piping: 150 psig forged steel, slip-on.
2. Gaskets: 1/16 inch thick preformed neoprene.

C. Flange Adapters for Grooved Pipe and Fittings 2 ½ Inches and Larger:
1. Ferrous Piping: Class 125/150 for use with grooved end pipe and fittings. Victaulic Style 741/W741.

D. Grooved and Shouldered Pipe End Couplings when approved by Architect/Engineer:
1. Housing Clamps: Two ductile iron to engage and lock, designed to permit some angular deflection, contraction, and expansion where required.

2. Sealing Gasket: C-shape elastomer composition for operating temperature range from -30 degrees F to 230 degrees F for EPDM Grade E gaskets, and EPDM-HP for operating temperature range from -30 degrees F to 250 degrees F.
3. Accessories: Electroplated steel bolts, nuts, and washers conforming with ASTM A449.
4. Basis of Design: Victaulic Style 47.

E. Dielectric Connections

1. Dielectric nipples shall be non-conducting for connection of dissimilar piping materials. Dielectric nipples shall be similar to Victaulic Style 647 or Style 47. A brass adaptor dielectric union is not acceptable.

2.5 GATE VALVES

A. Up To and Including 3 Inches:
1. Bronze body, bronze trim, screwed bonnet, rising stem, handwheel, inside screw with backseating stem, solid wedge disc, alloy seat rings, solder ends.

B. Over 3 Inches:
1. Iron body, bronze trim, bolted bonnet, rising stem, handwheel, outside screw and yoke, solid wedge disc with bronze seat rings, flanged or grooved ends. (Grooved ends only if approved by Architect/Engineer.) Basis of Design: Victaulic Series 771V.

2.6 GLOBE OR ANGLE VALVES

A. Up To and Including 3 Inches:
1. Bronze body, bronze trim, screwed bonnet, rising stem and handwheel, inside screw with backseating stem, renewable composition disc and bronze seat solder ends.

B. Over 3 Inches:
1. Iron body, bronze trim, bolted bonnet, rising stem, handwheel, outside screw and yoke, rotating plug-type disc with renewable seat ring and disc, flanged ends.

2.7 BALL VALVES

A. Up To and Including 2 Inches:
1. Bronze one piece body, stainless steel ball, teflon seats and stuffing box ring, lever handle with balancing stops, solder ends.
2. Forged brass, two piece body, chrome plated brass ball and stem, PTFE seats and stem washer, lever handle, Vic Press 304™ ends. Victaulic Series P589.

B. Over 2½ Inches:

1. Cast steel body, chrome plated steel ball, teflon seat and stuffing box seals, lever handle, or gear drive handwheel for sizes 10 inches and over, flanged.
2. Ductile iron body, chrome plated carbon steel ball and stem, TFE seats, lever handle or gear operator, grooved ends. Victaulic Series 726.

2.8 BUTTERFLY VALVES

A. Body: PPS (Polypphenylene Sulfide) or enamel coated cast or ductile iron with resilient replaceable pressure responsive EPDM seat or disc mounted seal, wafer or lug ends or grooved ends if Victaulic grooved end fittings are used. Stem shall be offset from the disc centerline to provide full 360 degree circumferential seating.

B. Disc: Aluminum bronze, electroless-nickel or PPS coated ductile iron or stainless steel.

C. Operator: 10 position lever handle up to 4". Larger than 4" shall have gear drive handwheel.

D. Basis of Design: Victaulic MasterSeal™ or AGS-Vic300.

2.9 SWING CHECK VALVES

A. Up To and Including 3 Inches:
   1. Bronze body, bronze trim, bronze rotating swing disc, with composition disc, solder ends.

B. Over 3 Inches:
   1. Iron body, bronze trim, bronze or bronze faced rotating swing disc, renewable disc and seat, flanged ends or grooved ends if Victaulic grooved end fittings are used.

2.10 SPRING LOADED CHECK VALVES

A. Iron body, bronze trim, split plate, hinged with stainless steel spring, resilient seal bonded to body, wafer or threaded lug ends.

B. Ductile iron body, stainless steel spring and shaft, aluminum-bronze disc with elastomer seal or elastomer coated ductile iron disc with welded-in nickel seat, grooved ends. Basis of Design: Victaulic Series 716.

C. 14” through 24” Sizes: Ductile iron body, stainless steel spring, shaft, and dual disc(s), with EPDM seat, and AGS grooved ends. Victaulic Series W715.

PART 3 EXECUTION

3.1 PREPARATION

A. Ream pipe and tube ends. Remove burrs. Bevel or groove plain end ferrous pipe.

B. Remove scale and dirt on inside and outside before assembly.

C. Prepare piping connections to equipment with flanges, grooved joint couplings, or unions.

D. Keep open ends of pipe free from scale and dirt. Protect open ends with temporary plugs or caps.

3.2 INSTALLATION

A. Install in accordance with manufacturer's instructions.

B. Install piping to ASME B31.5 and B31.9.

C. Route piping in orderly manner, parallel to building structure, and maintain gradient.

D. Install piping to conserve building space, and not interfere with use of space.

E. Group piping whenever practical at common elevations.

F. Sleeve pipe passing through partitions, walls and floors.

G. Slope piping and arrange to drain at low points. Use eccentric reducers to maintain top of pipe level.

H. Install piping to allow for expansion and contraction without stressing pipe, joints, or connected equipment.
   1. For water systems, use adequate numbers of Victaulic Style 77 flexible couplings in header piping to accommodate thermal growth and contraction, and for the elimination of expansion loops. (In accordance with Victaulic instructions and as approved by the engineer). Where expansion loops are required, use Victaulic Style 77 couplings ion the loops.

I. Where more than one piping system material is specified, ensure system components are compatible and joined to ensure the integrity of the system is not jeopardized. Provide necessary joining fittings. Ensure flanges, union and couplings for servicing are consistently provided.

J. Grooved ends shall be clean and free from indentations, projections, and roll marks in the area from pipe end to groove.

K. The grooved coupling manufacturer's factory trained representative shall provide on-site training for contractor's field personnel in the use of grooving tools and installation of grooved joint products. The representative shall periodically visit the jobsite and review contractor is following best recommended practices in grooved product installation. (A distributor's representative is not considered qualified to conduct the training or jobsite visit(s)).

L. Use grooved mechanical couplings and fasteners as approved by the Architect/Engineer.

M. Use unions, flanges, and couplings downstream of valves and at equipment or apparatus connections. Do not use direct welded or threaded connections to valves, equipment or other apparatus.

N. Use non-conducting dielectric nipples or couplings, whenever joining dissimilar metals.

O. Provide pipe hangers and supports in accordance with ASTM B31.9 unless indicated otherwise.

P. Use gate, ball or butterfly valves for shut-off and to isolate equipment, part of systems, or vertical risers. All branch piping take-offs from mains, risers or branch piping shall have valves installed to allow isolation of branch piping and equipment/areas being served.

Q. Use globe, ball or butterfly valves for throttling, bypass, or manual flow control services.

R. Use butterfly valves interchangeably with gate and globe valves.

S. Use only butterfly valves in chilled and condenser water systems for throttling and isolation service.

T. Use lug or grooved end butterfly valves to isolate equipment.

U. Use check valves or triple duty valves on discharge of pumps where shown on drawings.

V. Use ¾ inch ball valves with cap for drains at main shut-off valves, low points of piping, bases of vertical risers, and at equipment. Pipe to nearest floor drain.

W. Pipe Hangers and Supports:
1. Install in accordance with ASTM B31.9, ASTM F708 and MSS SP89.
2. Support horizontal piping as scheduled.
3. Install hangers to provide minimum ½ inch space between finished covering and adjacent work.
4. Place hangers within 12 inches of each horizontal elbow.
5. Use hangers with 1½ inch minimum vertical adjustment. Design hangers for pipe movement without disengagement of supported pipe.
6. Support vertical piping at every floor. Support riser piping independently of connected horizontal piping.
7. Where several pipes can be installed in parallel and at same elevation, provide multiple or trapeze hangers.
8. Provide copper plated hangers and supports for copper piping.
9. Prime coat exposed steel hangers and supports. Hangers and supports located in crawl spaces, pipe shafts, and suspended ceiling spaces are not considered exposed.

X. Provide clearance in hangers and from structure and other equipment for installation of insulation and access to valves and fittings.

Y. Provide access where valves and fittings are not exposed. Coordinate size and location of access doors.

Z. Where pipe support members are welded to structural building framing, scrape, brush clean, and apply one coat of zinc rich primer to welds.

AA. Apply one coat of primer and one coat of paint to all unfinished exposed pipe, fittings, supports and accessories. For example, unfinished piping exposed within a mechanical room, outdoors, within any room shall be primed and painted.

BB. Install valves with stems upright or horizontal, not inverted.

CC. Provide balancing devices where indicated on drawings, as required to attain design quantities, and as recommended by balancing agency.

DD. After filling system, check for leaks and repair to leak-tight condition.

EE. After completion, clean strainers, flush and fill systems and test system to be sure all air is eliminated from piping, coils, etc.

3.3 TESTING

A. Hydrostatically test at 100 psi in excess of the working pressure for four (4) hours. This pressure to be on piping only, not on equipment.

END OF SECTION

MAI 2012-1529

SECTION 23 21 16

HYDRONIC SPECIALTIES

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Expansion tanks.

B. Air vents.

C. Combination air and sediment separator.

D. Strainers.

E. Pump suction fittings.

F. Combination fittings.

G. Flow indicators, controls, meters.

H. Radiator valves.

I. Relief valves.

J. Temperature control valves.

K. Glycol specialties.

1.2 REFERENCES: Material and/or equipment specified in this section shall meet or exceed one or more of the property requirements or installation requirements of the following specifications/publications as applicable to the specific product or end use.

A. ASME - Boilers and Pressure Vessel Codes, SEC 8-D-Rules for Construction of Pressure Vessels.

PART 2 PRODUCTS

2.1 AIR CONTROL SYSTEM

A. Furnish and install as shown on the plans and as follows a complete Air Control System consisting of an ASME Compression Tank with Airtrol Fitting, Tank Drain and Gauge Glass Set. The installer shall remove and clean the system strainers after 24 hours operation and after 30 days operation. Furnish National Board Form U-1 denoting compliance with ASME Code.

B. SRS Combination Air & Sediment Separator

1. Furnish and install, as shown on the plans, a centrifugal type air and sediment removal separator. The unit shall have inlet and outlet connections tangential to

the vessel shell. Vessel shell diameter is to be three times the nominal inlet/outlet pipe diameter. The unit shall have a solid separation efficiency of 98% of 200 mesh sand and water solution, and be capable of heavier-than-water, undissolved sediment separation of at least 40 microns. The unit shall be capable of air separation and elimination.

2. The unit shall have a welded sump at the bottom to collect sediment separated out by centrifugal action. Connections are to be provided by the contractor to purge the unit of collected sediment either manually of automatically.

3. The air and sediment removal separator must be designed, constructed and stamped for 125 psig @ 350F in accordance with Section VIII, Division I of the ASME Boiler and Pressure Vessel Code, and registered with the National Board of Boiler and Pressure Vessel Inspectors.

4. The air and sediment removal separator shall be manufactured by Bell & Gossett or equal by Patterson Pump Co.

C. Compression Tank

1. Furnish and install as shown on plans, a horizontal compression tank with two ½" NPT gauge glass tapings in one head and a minimum of two NPT tapings in the shell. The tank must be designed, constructed and stamped for at least 125 psig @ 650 F in accordance with Section VII, Division I of the ASME Boiler and Pressure Vessel Code, and registered with The National Board of Boiler and Pressure Vessel Inspectors. The Compression tank shall be painted with one shop coat of air-dry enamel.

2. Each compression tank shall be manufactured by Bell & Gossett, Wessels, or engineer's pre-approved alternate.

3. Each tank shall be furnished with a Bell & Gossett model "Airtrol" Tank fitting and on tanks 135 gallon and less, a Bell & Gossett model "Drain-O-Tank" fitting.

D. The Airtrol Tank Fittings and Air Separator are to be guaranteed for 20 years from the date of installation against defects in material and workmanship.

2.2 SAFETY RELIEF VALVES

A. Furnish and install as shown on plans a diaphragm-assisted operated bronze body ASME rated and nameplated safety relief valve with fail-safe disc to assure normal operation under emergency conditions. The valve shall have a low blowdown differential and shall be designed to relieve system pressure in excess of the operating pressure specified for the system, within the maximum operating limitations of the valve. The ASME safety relief valve shall be engineered to prevent the system fluid from entering the spring chamber under normal operating conditions. The permanent valve nameplate shall display the BTUH and relief pressure ratings certified by the National Board of Boiler and Pressure Vessel Inspectors. Manufacturer: Bell and Gossett or equal.

2.3 AIR VENTS

A. Manual Type: Short vertical sections of 2 inch diameter pipe to form air chamber, with ball valve and Bell & Gossett #87 or equal automatic air vent piped to accessible location.

2.4 TRIPLE DUTY VALVE

A. Furnish and install, as shown on plans, Bell & Gossett or equal (select one: straight or angle) pattern triple duty valves designed to perform the functions of a center guided nonslam check valve, shutoff valve and calibrated balancing valve.

B. The valve shall be of heavy-duty cast iron (NPT & flanged models) or ductile iron (grooved models) construction for operating temperatures up to 250 F and working pressure up to 175 psi. The valve shall be fitted with a bronze seat, replaceable bronze disc with EPDM seat insert or stainless steel stem, and chatter preventing stainless steel spring. The valve design shall permit repacking under full system pressure.

C. Cv rating shall be provided at every 10% increment opening for the straight and angle valve. Manufacturer shall supply the Cv rating for read-out of flow determination and system pressure drop.

D. The valve shall be equipped with brass readout valves (with integral check valve) to facilitate taking differential pressure readings across the orifice for accurate system balance. The valve shall be produced at an ISO 9001 approved facility.

E. Triple Duty Valves shall be warranted for a period of one year from date of start-up, or eighteen months from installation, whichever occurs first.

F. Triple-Duty Valve Assembly: Straight pattern, 300 psig pressure rating, ductile-iron body, pump discharge assembly consisting of a Victaulic MasterSeal butterfly valve with memory stop feature for shut-off and balancing and a Series 716 spring actuated check valve. Where flow measurement is required, a Victaulic Series 779 Venturi-check shall be used in lieu of the Series 716 check valve.
   a. For 14" and larger sizes, AGS-Vic300 butterfly valve with a Series W715 check valve.

2.5 SUCTION DIFFUSER

A. Furnish and install a Bell & Gossett or Patterson Pump Co. model SD or Victaulic Series 731 and W731 (for grooved end strainers) suction diffuser per size and capacities shown on plans.

B. The suction diffuser is an angle pattern flow straightening fitting equipped with a combination diffuser-strainer-orifice cylinder, stainless steel flow straightening vanes, start up strainer, permanent magnet and base support boss on adjustable support foot. The diffuser shall have a total free area equal to five times the cross sectional area of the pump suction opening. The length of the flow straightening vanes shall be no less than 2½ times the diameter of the pump suction connection. Strainer shall have 5/32 or

3/16 perforations. Start up strainer shall be 20 mesh stainless steel. Straightening vanes shall run the full length of the diffuser.

C. The suction diffuser shall be warranted to be free from defects in materials and/or workmanship for a period of one year from date of start-up, or eighteen months from installation, whichever occurs first.

2.6 STRAINERS

A. Size 2 inch and Under:
   1. Screwed brass body for 175 psig working pressure, Y pattern with 1/32 inch stainless steel perforated screen.

B. Size 2½ inch to 4 inch:
   1. Flanged or grooved ductile iron body for 300 psig working pressure, Y pattern with 3/64, 1/16, or 1/8 inch stainless steel perforated screen. Basis of Design: Victaulic Style 732.

C. Size 5 inch and Larger:
   1. Flanged iron body for 175 psig working pressure, basket pattern with 1/8 inch stainless steel perforated screen.
   2. Grooved end ductile iron body for 300 psig working pressure, wye-pattern with 1/16 or 1/8 inch stainless steel frame and mesh. Basis of Design: Victaulic Style 732.
   3. AGS grooved end factory-fabricated steel body with T-bolt hinged closure for 300 psig working pressure with 4x4 or 6x6 mesh stainless steel frame and mesh basket. Basis of Design: Victaulic Style W730.

2.7 BALANCE VALVES AND ACCESSORIES

A. Calibrated Manual Balance Valves

   1. Are only required on air handling units with multiple coils served by one control valve, and on pump discharges in lieu of the triple duty valve.
   2. Furnish and install as shown on plans with manufacturers recommendations model CB calibrated balance valves as manufactured by Victaulic / TA Hydronics. Other acceptable manufacturers: ITT Bell & Gossett, Griswold Controls, Preso Meters.
   3. Pre-Set Balance Procedure – Valves to be designed to allow installing contractor to pre-set balance points for proportional system balance prior to start-up in accordance with pre-set balance schedule.
   4. Valve Design Construction – All valves ½" to 2" pipe size to be of DZR brass (Ametal) body and 2-1/2" to 12" ductile iron body / globe valve construction or bronze body/brass ball construction with glass and fiber TFE seat rings. Valves to have differential pressure read out ports across valve seat area. Read our ports to be fitted with internal EPT inserts and check valves. Valve bodies to have ¼" NPT tapped drain/purge port. Valves to have memory stop feature to allow valve to be closed for service and then reopened to set point without disturbing balance position. All valves to have calibrated nameplates to assure specific valve settings. Valves

shall be designed for positive shutoff. Basis of Design: Victaulic Series 786 and 787 and 788 and 789.

5. Valves shall be designed for positive shutoff.
6. Design Pressure Temperature – All ½" – 3" NPT connection valves are rated for 300 psig at 230 degrees F. All ½" – 2" Sweat connection valves are rated for 200 psig at 230 degrees F.
7. Coil-Hook-up Connections: Victaulic Koil-Kits Series 799 or 79V may be used at coil connections. The kit shall include a Series 786/787/78K circuit balancing valve, Series 78Y Strainer-Ball, Series 78U Union-Port fitting, with Series 78T ball valve and required coil hoses. A Style 793 and/or 794 differential pressure controller shall be provided as required. A meter shall be provided by the valve manufacturer that shall remain with the building owner after commissioning.
8. 2 ½" – 16" Furnish and install as shown on the job plans, TA Series 788/789 balancing valves with provision for connecting to a portable differential (ft. of Head) pressure meter. Each meter connection shall have pressure/temperature probes. The balancing valves shall by Y-pattern globe style design with ductile iron body, all other wetted parts of nonferrous, pressure die cast Ametal®. Each valve shall provide three (3) functions. (1) precision flow measurement, (2) precision flow balancing, (3) shut-off feature, eliminating the need for an additional isolation valve. These valves shall have eight (1), twelve (12), sixteen (16), twenty (20) or twenty two (22) 360˚ adjustment turns of the handwheel for precise setting with hidden memory feature to program the valve with precision tamper-proof balancing setting. Handwheel shall have digital readout. The handwheel can be installed n any position without affecting performance.
9. 300 psi/2065 kPa, Y-pattern, globe type with flanged or grooved ends, ASTM A536 ductile iron body, all other metal parts of Ametal® brass copper alloy, EPDM O-ring seals. 8,12,16,20 or 22 turn digital readout handwheel for balancing, hidden memory feature with locking tamper proof setting, and connections for portable differential meter. TA Series 788-STAF or 789-STAG.

B. Automatic Flow Control Valves

Acceptable Manufacturers: Victaulic, Griswold, ITT Bell & Gossett, Victaulic

1. Required where shown on drawings and also in the piping arrangement to each 3-way valve equipment coil to balance the flow in the common return of 3-way valves, domestic hot water returns, and condensate or boiler feed pump discharges. All other systems are balanced by the temperature control valves. Flow limiting valves are to be factory tagged for terminal unit that it is being installed on.
2. Automatic flow control valve cartridges shall automatically control flow rates with ±5% accuracy over an operating pressure differential range of at least 14 times the minimum required for control. Two operating pressure ranges shall be available with the minimum range requiring less than 2 PSID to actuate the mechanism.
3. Valve internal control mechanism shall consist of a stainless steel one-piece cartridge with segmented port design and full travel linear coil spring, or the valve housing shall be made of DZR brass.

4. Manufacturer shall be able to provide certified independent laboratory tests verifying accuracy of performance. (Consult the factory for details).
5. All flow control valve cartridges shall be warranted by the manufacturer for five years from date of sale.
6. Body Styles
    a. Isolator Series Valve
        i) Isolator series valves, sizes 1/2" through 1-1/2", shall have a ASTM brass alloy body, rated at no less than 400PSI/250°F. Isolator series valves, sizes 1-1/2" Large through 3", shall have a CAST brass alloy body, rated at no less than 275PSI/250°F. These sizes shall be constructed in a one-piece body to include a handle ball valve, a flow control cartridge assembly, dual pressure or pressure/temperature test valves for verifying accuracy of flow performance for all sizes combined with a manual air vent, and a union end which will accept various end pieces. Available flow rates shall be from 0.25 GPM to 160.0 GPM.
        ii) The body design shall allow inspection or removal of cartridge or strainer without disturbing piping connections.
        iii) The body design shall allow inspection or repair of handle operated stem without disturbing piping connections. The repairable stem shall include two Teflon seals and one EPDM o-ring for protection against chemicals and modulating temperature.
        iv) The valve shall come fully assembled and be permanently marked to show direction of flow; shall have a body tag to indicate flow rate and model number.
    b. Victaulic Series
        i) Series 76T ½ – 2"/15 – 50mm: The valve shall operate by means of an automatic balancing cartridge with replaceable orifice plate and internal diaphragm. The pressure class of the valve shall be 365 psi/PN25. The valve housing shall be made of DZR brass. Available with sweat adapters upon request (Series 76S).
        ii) Series 76K ½ – 2"/15 – 50mm: The valve shall operate by means of an automatic balancing cartridge with replaceable orifice plate and internal diaphragm. The pressure class of the valve shall be 365 psi/PN25. The valve housing shall be made of DZR brass. The housing shall have one fixed threaded end and one union end. Available with sweat adapters upon request (Series 76S).
        iii) Series 76B With Ball Valve Kit (Series 722) ½ – 2"/15 – 50mm: The valve shall operate by means of an automatic balancing cartridge with replaceable orifice plate and internal diaphragm. The pressure class of the valve shall be 365 psi/PN25. The valve housing shall be made of DZR brass. The valve includes a factory-installed and leak tested ball valve with handle. Available with sweat adapters upon request (Series 76S).

iv) Series 76V With Ball Valve Kit (Series 722) ½ – 2"/15 – 50mm: The valve shall operate by means of an automatic balancing cartridge with replaceable orifice plate and internal diaphragm. The pressure class of the valve shall be 365 psi/PN25. The valve housing shall be made of DZR brass. The housing shall have one fixed threaded end and one union end. The valve includes a factory-installed and leak tested ball valve with handle. Available with sweat adapters upon request (Series 76S).

c. Wafer Style Valves

i) Class 150 Wafer valves shall consist of a gray iron (ASTM A126-61T, Class 30) body and stainless steel flow control cartridge assemblies; shall be rated at 200 PSI/250°F; shall be mechanically compatible with ANSI B16.5-1968 150 lb. steel flanges; valve shall be supplied with dual pressure or pressure/temperature test valves for verifying accuracy of flow performance for all sizes; shall be permanently marked to show direction of flow, shall have body tag to indicate model number and flow rate; shall have single or multiple, parallel-installed stainless steel cartridge assemblies to provide rated flow rate; shall include all plated steel studs required for installation; shall be available in 3", 4", 6", 8", 10", 12", 14", 16", 18", 20", and 24" sizes, with flow rates from 14.0 GPM to 11,000.0 GPM.

d. Grooved End Valves shall consist of steel pipe, schedule 40 or greater, and stainless steel flow control cartridge assembly (assembled with grooved end clamp on 1" to 3" sizes); shall be rated at 400PSI/200°F; shall be supplied with dual pressure or pressure/temperature test valves for verifying accuracy of flow performance for all sizes; shall have grooved ends compatible with Victaulic grooved end clamps; shall be permanently marked to show direction of flow, shall have body tag to indicate model number and flow rate; shall be available in 1-1/4" through 20" sizes with flow rates from 3.0 GPM to 6,800.0 GPM.

e. Or Series 76G 2½ – 12"/65 – 300mm: The valve shall operate by means of automatic balancing stainless steel cartridges with replaceable orifice plate and internal EPDM diaphragm. The pressure class of the valve shall be PN16/PN25. The valve housing shall be made of ductile iron type GGG40. The valve shall comply with flanges according to EN/ANSI standards. Features a No. 45R Flanged Adapter Nipple featuring a ductile iron body and hardware composed of zinc plated alloy steel.

f. Flange End

i) Class 150 Flange End Valves shall consist of steel pipe with flange ends, and stainless steel flow control cartridge assembly; 230PSIG/300ºF shall be supplied with dual pressure or pressure/temperature test valves for verifying accuracy of flow performance for all sizes; shall have flange ends compatible with ANSI B 16.5-1968 150 lb. Steel flanges; shall be permanently marked to show direction of flow, shall have body tag to indicate

model number and flow rate; shall be available in 2" through 20" sizes with flow rates from 14.0 GPM to 6,800.0 GPM.

ii) Or Victaulic Series 76F 2 – 32"/50 – 800mm The valve shall operate by means of automatic balancing stainless steel cartridges with replaceable orifice plate and internal EPDM diaphragm. The pressure class of the valve shall be PN16/PN25. The valve housing shall be made of ductile iron type GGG40. The valve shall comply with flanges according to EN/ANSI standards.

g. Threaded Iron Valves

i) Threaded flange valves shall consist of gray iron (ASTM A126-61T, Class 30) body and stainless steel flow control cartridge assembly; shall be rated at 300 PSI/275°F shall have female NPT threaded flange end connections; shall be supplied with plated steel studs and nuts; shall be supplied with dual pressure or pressure/temperature test valves for verifying accuracy of flow performance for all sizes; shall be permanently marked to show direction of flow; shall have body tag to indicate model number and flow rate; shall be available in 1/2", 2" and 2-1/2" sizes, with flow rates from 14.0 GPM to 150.0 GPM.

ii) Threaded high capacity valves shall consist of gray iron (ASTM A126-61T, Class 30) body and stainless steel flow control cartridge assembly; shall be rated at 200 PSI/250°F; shall have female NPT threaded end connections; shall be supplied with dual pressure or pressure/temperature test valves for verifying accuracy of flow performance for all sizes; shall be permanently marked to show direction of flow, shall have body tag to indicate model number and flow rate; shall be available in 3" size, with flow rates from 14.0 GPM to 450.0GPM.

7. Strainers

a. Isolator or Victaulic 78Y - Strainer (Combination Union Ball Valve and Y-Strainer)

i) Strainer shall be supplied a part of a Coil Piping Package on the inlet to each terminal device whether it is two-way or three-way. These packages shall be factory shrink wrapped and tagged along with the control valve or balance valve at the factory for easy field identification and installation.

ii) Strainer shall be Y-type configuration made of DZR brass. Maximum pressure rating of 400 PSI. Strainer shall include a union end which will accept various end pieces.

iii) The body design shall allow inspection or removal of 20 mesh stainless steel strainer without disturbing piping connections and hose end connection for proper draining.

iv) The body design shall allow inspection or repair of handle operated stem without disturbing piping connections. The repairable stem

shall include two Teflon seals and one EPDM o-ring for protection against chemicals and modulating temperature.

v) A pressure/temperature test valve and manual air vent shall be standard.

vi) Isolator S shall be offered with blow down option.

8. Differential Pressure Controllers
   a. Differential Pressure Control Valves 1/2" through 2":
      i) Maximum differential pressure is 51 psi / 350 kPa, maximum temperature is 248°F / 120°C for use in heating and cooling systems only. NPT threaded valve body and bonnet shall be manufactured of Ametal® copper alloy, O-rings, seat seal, and membrane manufactured of HBNR. Shall have adjustable differential control, single pressure temperature port, dead end service shut off capabilities, stainless steel spring, polymide handle, and drain if required by project engineer.

      ii) Shall be capable of stabilizing ΔpV ranges of 1.5- 8.7 psi/10-60 kPa in sizes 3/4-1"/15-25 mm or 2.9- 11.6 psi/23-80 kPa in sizes 11/4-2"/32-50 mm, as determined by project engineer or certified Victaulic/TA representative. TA Series 786- STAD, TA Series 787-STAS, TA Series 788-STAG, TA Series 789-STAF dependent on system size and connection requirements.

      iii) Capillary tube, hose kit, and all connection fittings shall be manufactured by Tour and Andersson to ensure proper operation of installed STAP valves. Mechanical contractor and balancing contractor shall be trained on installation, connection, and balancing procedures by certified Victaulic/TA representative.

   b. Differential Pressure Control Valves 21/2" through 4":
      i) Maximum differential pressure 51 psi/350 kPa, maximum temperature is 176°F / 80°C for use in heating and cooling systems only. ANSI Class 150 flange body to be cast of ductile iron and bonnet shall be manufactured of Ametal® copper alloy, O-rings, seat seal, and membrane manufactured of EPDM. Shall have adjustable differential control, single pressure temperature port, dead end service shut off capabilities, stainless steel spring, polymide handle, and drain if required by project engineer.

      ii) Shall be capable of stabilizing ΔpV ranges of 2.9-11.6 psi/20-80 kPa for spring option 1 and 5.8-23.3 psi/40-160 kPa for spring option 2, as determined by project engineer or certified Victaulic/TA representative. TA Series 786- STAD, TA Series 787-STAS, TA Series 788-STAG, TA Series 789-STAF dependant on system size and connection requirements. Capillary tube, hose kit, and all connection fittings shall be manufactured by Tour and Andersson to ensure proper operation of installed STAP valves. Mechanical

contractor and balancing contractor shall be trained on installation, connection, and balancing procedures by certified Victaulic/TA representative.

c. Differential Pressure Controller Assembly
   i) The manufacturer shall provide assistance to the mechanical and balancing contractors to aid in the installation, initial setup and adjustment of DP controller assembly devices. This assistance shall be provided only by the manufacturer's authorized representative.
   ii) The initial flow rate balancing setup information shall be calculated on factory-approved hydraulic software for each device by the manufacturer and provided to the contractors. The manufacturer shall identify each component with installation location.
   iii) The manufacturer shall provide on-site assistance to the contractors during installation and balancing of the project.

9. Accessories

   a. Meter kit shall be provided if scheduled as either a permanently mounted or as a single-hose portable or double-hose portable kit; pressure gauge with 4-1/2" dial shall have range of -14.7 to 150 PSI; portable kits shall be available with end connections for either pressure only or pressure/temperature test valves and shall include carrying cases; all kits shall include flow rate chart for determining flow rate.

   b. Identification tags shall be available for all valves; tags shall be indelibly marked with flow rate, model number, zone identification: tags shall be 3" x 3" aluminum.

   c. Pressure/temperature test valves or pressure only test valves shall be available at 1/4" NPT for measuring pressure or temperature in fluid systems.

   d. Hoses

      i) All hoses shall be equipped with swivel end connections at terminal unit. All end connections shall be crimped to meet stated pressure ratings. Serrated/slip fit connections are not acceptable.

      ii) Flame Retardant Hoses

         I. Hose materials shall be stainless steel braided over an EPDM liner.

         II. Hoses shall meet or exceed the ASTM-D380-83 standard and withstand working pressures of 375 PSI (1/2"), 300 PSI (3/4", 1", 1-1/4") at 211°F and 300 PSI (1-1/2", 2") at 200°F

         III. Hoses shall meet or exceed flame retardant testing per standards UL #723, NEPA #225, ANSI 2.5, UBC 42-1, and ASTM-E84A. after ten minutes and produce less than 5% smoke as compared to Red Oak flooring (100%)

      iii) Insulated Hoses

I. Hose materials shall be high quality polyethylene pipe insulation over a stainless steel braided inner core and withstand working pressure of of 375 PSI (1/2"), 300 PSI (3/4", 1", 1-1/4") at 211°F and 300 PSI (1-1/2", 2") at 200°F.

2.8 FLOW METERS (If shown or noted on drawings)

D. Orifice principally by-pass circuit with direct reading gage, soldered or flanged piping connections for 125 psig working pressure, with shutoff valves, and drain and vent connections.

E. Direct reading with insert pitot tube, threaded coupling, for 150 psig working pressure, maximum 240°F, 5 percent accuracy.

F. Cast iron, wafer type, orifice insert flow meter for 250 psig working pressure with read-out valves equipped with integral check valves with gasketed caps.

G. Carbon steel, grooved end orifice flow meters may be used in applicable grooved end piping systems. Flow meters shall be suitable for 250 psig working pressure with read-out valves equipped with integral check valves with gasketed caps. Victaulic Style 734.

H. Calibrated, plug type balance valve with precision machined orifice, readout valves equipped with integral check valves and gasketed caps, calibrated nameplate and indicating pointer.

I. Cast iron or bronze, globe style, balance valve with handwheel with venire type ring setting and memory stop, drain connection, readout valves equipped with integral check valves and gasketed caps.

J. Portable meter consisting of cast containing one, 3 percent accuracy pressure gage with 0-60 feet pressure range for 500 psig maximum working pressure, color coded hoses for low and high pressure connections, and connectors suitable for connection to read-out valves.

K. Manufacturer's representative shall be responsible for selecting proper size and capacities based on design and drawings and shall be responsible for final balance of the system including pumps balancing. Manufacturer's representative shall furnish water balance report. See testing and balancing section of specification.

2.9 TEMPERATURE CONTROL VALVES

A. Control valves shall be furnished by Temperature Control Contractor and installed by Mechanical Contractor. See Temperature Control System section for requirements.

2.10 GLYCOL FEED UNIT

A. Furnish and install the glycol feed unit according to plans and manufacturer's instructions. Unit shall consist of one phenolic plastic receiver including fill opening and level markings. Contractor shall drill top openings as required for system relief valve discharge tube, glycol pump discharge hose and power cord. 15' long power cord, 15'

long relief valve discharge tube and 15' long glycol pump discharge hose shall be furnished with feed unit. Contractor shall set the receiver on a concrete housekeeping pad.

B. The glycol feed pump shall be a submersible model SE85 as manufactured by Bell & Gossett. The pump casing and impeller shall be cast iron construction, and the shaft shall be corrosion resistant stainless steel. The mechanical seal shall be silicon carbide by silicon carbide sealing faces, with BUNA-N elastomers. The motor shall be fully submerged in high-grade turbine oil for lubrication and efficient heat transfer. Motor shall be ¾ horsepower, 115 volt, with Class B insulation, built-in overload with automatic reset, and capacitor start.

C. The diaphragm operated expansion tank, shall be factory pre-charged at 25 psig (field adjustable), 60 psig maximum operating pressure, with baked epoxy finish. Note: Contractor shall connect tank between PRV and fill connection. Contractor shall field set the pre-charge pressure as recommended by the feed system manufacturer.

D. The pressure reducing valve shall be furnished with the feed unit and installed by the Contractor. It shall be diaphragm operated with inlet side pressure check valve and inlet side strainer. The strainer must be easily removed without system shut-down. The valve seat, strainer and stem must be removable and of non-corrosive material. Body to be of brass construction. PRV shall be adjusted by the contractor as recommended by the feed system manufacturer . Contractor shall furnish and install ball valve in bypass around PRV and ball shutoff valve ahead of bypass and PRV.

E. The check valve shall be of the spring loaded silent type mounted by the Contractor on the pump discharge.

F. Low level cutoff shall be a mechanical, non-mercury float switch furnished and factory wired to pump.

G. A pressure operated limit switch shall be furnished with the feed units and installed by the Contractor to maintain a positive fill pressure equal to or greater than 25 psig.

H. All wiring shall be the responsibility of the Electrical Trades who will furnish and install a manual motor starter, wire the starter to the pressure switch and connect the pump power cord to the pressure switch.

I. Unit shall be manufactured by Wessels or Bell & Gossett.

2.11 GLYCOL SOLUTION

A. Contractor shall fill the glycol piping systems and the glycol feed tank with a mixture of ethylene glycol and water. Mixture shall be 33% glycol for chilled water systems. Glycol shall be Dowtherm as manufactured by the Dow Chemical Co. or equal, with annual testing service offered by the manufacturer. System and feed tank shall be full at completion of project. A pressure relief valve shall be furnished with the feed unit and installed by the Contractor. Relief valve discharge shall be piped into the top of the glycol feed tank.

B. If glycol/water mixture is required, clean and flush glycol system before adding glycol solution. Feed glycol solution to system through make-up line with pressure regulator, venting system high points. Perform tests determining strength of glycol and water solution and submit written test results.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install specialties in accordance with manufacturer's instructions.

B. Grooved end installations
   1. All grooved couplings, fittings, valves, and specialties shall be the products of a single manufacturer. Grooving tools shall be of the same manufacturer as the grooved components.
   2. All castings used for coupling housings, fittings, valve bodies, etc. shall be date stamped for quality assurance and traceability.
   3. Grooved ends shall be clean and free from indentations, projections, and roll marks in the area from pipe end to groove.

C. Where large air quantities can accumulate, provide enlarged air collection standpipes.

D. Provide manual air vents at system high points that could “trap” air in piping system and as indicated.

E. For automatic air vents in ceiling spaces or other concealed locations, provide vent tubing to nearest drain.

F. Provide air separator on suction side of system circulation pump and connect to expansion tank.

G. Provide valved drain and hose connection on strainer blow down connection.

H. Provide pump suction fitting on suction side of base mounted centrifugal pumps where indicated. Remove temporary strainers after cleaning systems.

I. Provide combination pump discharge valve on discharge side of base mounted centrifugal pumps where indicated.

J. Support pump fittings with floor mounted pipe and flange supports.

K. Provide relief valves on pressure tanks, low pressure side of reducing valves, heat exchangers, and expansion tanks.

L. Select system relief valve capacity so that it is greater than make-up pressure reducing valve capacity. Select equipment relief valve capacity to exceed rating of connected equipment.

M. Where one line vents several relief valves, make cross sectional area equal to sum of individual vent areas.

N. After completion, clean strainers, flush and fill systems.

3.2 TESTING

A. Hydrostatically test piping at 100 psi for four (4) hours. This pressure to be on piping only, not on equipment.

END OF SECTION

MAI 2012-1529

SECTION 23 21 23

HVAC PUMPS

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Circulating pumps.

B. Miscellaneous pump equipment.

1.2 REFERENCES

A. UL 778 - Motor Operated Water Pumps.

B. NFPA 70 - National Electrical Code.

1.3 PERFORMANCE REQUIREMENTS

A. Ensure pumps operate at specified system fluid temperatures without vapor binding and cavitation, are non-overloading in parallel or individual operation, and operate within 25 percent of midpoint of published maximum efficiency curve.

1.4 REGULATORY REQUIREMENTS

A. Products Requiring Electrical Connection: Listed and classified by UL as suitable for the purpose specified and indicated.

PART 2 PRODUCTS

2.1 CIRCULATING PUMP.

A. Refer to drawings and furnish all.

2.2 BASE MOUNTED PUMP

A. Furnish and install, as shown on plans, Bell & Gossett Series 1510 end suction base mounted centrifugal pumps with sizes, capacities, and characteristics as listed on equipment schedules.

B. Pumps shall be base mounted, single stage, end suction design with integrally cast pedestal volute support to allow removal and service of the entire rotating assembly without disturbing the pump piping, electrical motor connections or pump to motor alignment. Pumps with bearing assembly supports only shall not be acceptable.

C. Pump bearings shall be re-greaseable without removal of the bearings from the bearing assembly. Pumps shall be rated for 175 psi at 225 F. Working pressures shall not be de-rated at temperatures up to 250 F.

D. Pump volute shall be Class 30 cast iron with integral gauge tapping at suction and discharge flanges, vent tapping and volute drain. The impeller shall be cast bronze of the enclosed type, dynamically balanced, keyed to the shaft and secured with a locking capscrew.

E. The liquid cavity shall be sealed off at the pump shaft by an internally flushed mechanical seal with ceramic seat and carbon seal ring, suitable for continuous operation at 225 F. A replaceable bronze shaft sleeve shall completely cover the wetted area under the seal. Thermal expansion of the shaft toward the impeller shall be prevented via an inboard thrust bearing.

F. Pump base shall be fabricated steel channel, fully enclosed, with securely welded cross members. Pump motor shall be mounted directly to a steel saddle. Grouting area shall be fully open. The combined pump and motor baseplate shall be sufficiently stiff as to limit the susceptibility of vibration. The minimum baseplate stiffness shall conform to ANSI/HI 1.3.4-1997 for Horizontal Baseplate Design standards.

G. A flexible type, center drop-out design coupler, capable of absorbing torsional vibration, shall be employed between the pump and motor. Pumps for variable speed application shall be provided with a suitable coupler sleeve. The coupling shall be shielded by a dual rated ANSI B15.1, Section 8 & OSHA 1910.219 compliant coupling guard and contain viewing windows for inspection of the coupling.

H. Motor shall meet NEMA and EPACT'92 (where applicable) specifications and shall be of the size, enclosure, voltage and RPM as shown in motor specification section and plans, completely adequate for the maximum load for which the pump will operate. Motors shall be non-overloading across the entire operating range of the impeller. Pump and motor shall be factory aligned and hydrostatically tested per Hydraulic Institute standards. It shall be thoroughly cleaned and painted with at least one coat of high grade paint prior to shipment.

I. The pumps shall be manufactured, assembled and tested in an ISO 9001 approved facility.

J. All pumps with horsepower as noted below shall be laser aligned in the field by a manufacturer's representative prior to being put into service. The Alignment shall be performed after the pump piping has been completed and the baseplate has been grouted. Maximum acceptable shaft tolerances shall be as follows:

Motor Speed	Horsepower	Angularity in Mils/Inch	Offset in Mils
3600	All	.5 / 1"	3.0
1800	7.5 & Up	.7 / 1"	5.0
1200	15 & Up	1.0 / 1"	7.0

K. Test equipment printed report indicating the final pump shaft tolerances shall be furnished to the engineer prior to project completion. "Rim-face" methods using single dial indicators, and "Reverse dial" methods using double indicators shall not be accepted.

L. Pumps shall be warranted for a period of one year from date of start-up, or eighteen months from installation, whichever occurs first.

H. Pumps shall be Series 1510 as manufactured by ITT Bell & Gossett or Patterson Pump Co.

2.3 MISCELLANEOUS PUMP EQUIPMENT

A. Pump Change Over Panel:

1. Pump changer over panel shall be furnished with each pair of primary pumps designed to allow one pump to run at a time, and if the pump should fail for any reason, a controller shall energize the second pump after a 20 second delay, a red pilot light shall indicate the failure and remain until a reset button is pressed. All controls shall be mounted in a surface mounted panel with necessary pilots, relays, differential pressure controller, and, an additional set of contacts provided for external outdoor pump cutout control.

B. Flexible Pump Connectors shall be Metroflex SS or Neoprene as recommended by the manufacturer.

1. Stainless steel flexible connectors shall be manufactured of 300 series stainless steel convoluted metal bellows with 150# AS drilled bolts. All of the bellows are to be filled with Sioflex rubber and the integral gaskets are to be vulcanized to the flange surfaces. The connectors shall be sized (eg. 3") with the O/A dimension to be full live length. They shall be pressure tested at 225 psi and suitable for 300°F.

2. Neoprene connectors shall be Model MSRC Cablesphere.

C. Pump Pressure Indicator System:

1. Provide Flow Conditioning Corp. Hydronic Indicator Systems as shown on plans. These systems shall consist of Hydoronic Indicators and Trumpet Valves to provide accurate pressure indications where necessary.

2. Hydronic Indicator shall meet ASA Grade A specifications for pressures gauges, accurate to 1%. Case shall be 4-1/2" diameter, stem mounted, heavy steel with screwed ring and unbreakable crystal. Indicator shall have recalibrator, compound scale calibrated both in pounds and feet from full vacuum to selected pressure, and quick set dial for pressure comparison. Maximum indicator pressure shall at least equal pump shut off head (when system pressure is at relief valve setting) and shall exceed this minimum by no more than 50 psi.

3. Trumpet valve shall be spring return pushbutton manifold of rugged brass construction with ports for connection to system at indicated points and with test port connection for gauge calibration..

4. Hydronic Indicator System shall be attached to system piping with heavy bracket and convenient height to permit easy pushbutton operation and dial observation.

D. Inertia Bases

1. Base mounted pumps shall be mounted on a reinforced concrete inertia base when not installed on slab on grade. Concrete shall be poured within a steel channel perimeter frame. The steel channel perimeter frame shall be supplied by the isolation manufacturer and shall incorporate channel mounting template drilled for proper positioning of the pumps. 1" x 1" welded-in-place stiffening members running in two directions on nine inch centers. The inertia base thickness shall be determined from the following "weight ratio" table, but in no case shall be less than six inches in thickness.

Motor Horsepower	Concrete "Weight Ratio"
Up to 15	
20-50	1:1
60-100	2:1
125 & up	3:1

2. The height saving brackets shall be located to provide a one inch clearance between the base and floor slab. Inertia bases shall provide support for elbows or suction diffusers, and have a minimum static deflection of 1". The inertia base shall be supported by type "S" spring isolators.

3. Inertia bases shall be model "SN-OST" as manufactured by Vibration Eliminator Co. or equal.

PART 3 EXECUTION

3.1 PREPARATION

A. Verify that electric power is available and of the correct characteristics.

3.2 INSTALLATION

A. Install in accordance with manufacturer's instructions.

B. Provide access space around pumps for service. Provide no less than minimum as recommended by manufacturer.

C. Decrease from line size with long radius reducing elbows or reducing couplings. Support piping adjacent to pump such that no weight is carried on pump casings. For close coupled or base mounted pumps, provide supports under elbows on pump suction and discharge line sizes 4 inches and over.

D. Provide line sized shut-off valve and pump suction fitting on pump suction, and line sized combination pump discharge valve on pump discharge.

E. Provide air cock and drain connection on horizontal pump casings.

F. Provide drains for bases and seals, piped to and discharging into floor drains.

G. Check, align, and certify alignment of base mounted pumps prior to start-up.

H. Install close coupled and/or base mounted pumps on concrete housekeeping base, with anchor bolts, set and level, and grout in place.

I. Lubricate pumps before start-up.

J. Prior to initial start-up the pump representative shall be notified that all pumps are wired, lubricated, system filled, and ready for check test and alignment. A complete report shall be submitted to the Engineer covering the following:

1. Rotation Check
2. Base Grouted
3. Approved Piping
4. Voltage Check _____ Volts
5. Suction Pressure _____ psig
6. Discharge Pressure _____ psig
7. Actual Pump gpm _____ head_____ ft.
8. Amps L1____ L2____ L3____
9. Motor Hp _____
10. Any difficulties of operation.

K. Complete instructions/training on operation and maintenance of the circulating pump system shall be provided to the Owner by the circulating pump representative to the satisfaction of the Owner/Engineer prior to project close-out and final payment.

END OF SECTION

MAI 2012-1529

SECTION 23 25 00

HVAC SYSTEMS TESTING, CLEANING, WATER TREATMENT AND STARTUP

PART 1 - GENERAL

1.1 SECTION INCLUDES

A. Testing of piping systems.

B. Cleaning of piping systems.

C. Chemical feeder equipment.

D. Chemical treatment.

E. Substantial completion check list and sign-off forms.

1.2 PRODUCTS FURNISHED, BUT NOT INSTALLED, UNDER THIS SECTION

A. Chemical shot feeder, glycol feed system, placement of water coupon rack, etc. shall be furnished by the contractor responsible for chemical treatment of the systems, installed by the Mechanical Trade. Shot feeder shall be installed at a serviceable, low height.

1.3 QUALIFICATIONS

A. The chemical treatment company shall specialize in water treatment of mechanical systems. The company shall have local representatives with water analysis laboratories and full time service personnel.

1.4 REGULATORY REQUIREMENTS

A. Conform to applicable code for addition of non-potable chemicals to building mechanical systems, and for public sewage systems.

B. Products requiring electrical connection and listed and classified by UL as suitable for the purpose specified and indicated.

1.5 MAINTENANCE SERVICE

A. Furnish service and maintenance of treatment systems and system water for one year from date of substantial completion.

B. Provide monthly technical service visits to perform field inspections and make water analysis on site. Detail findings in writing on proper practices, chemical treating requirements, and corrective actions needed. Submit two copies of field service report to Owner after each visit.

C. Provide laboratory and technical assistance services during this maintenance period.

D. Provide training course for Owner's personnel, instructing them on installation, care, maintenance, testing, and operation of the water treatment systems. Arrange course at startup of systems.

E. Provide on-site inspections of equipment during scheduled or emergency shutdown to properly evaluate success of water treatment program, and make recommendations in writing based on these inspections.

1.6 MAINTENANCE MATERIALS

A. Provide sufficient chemicals for treatment and testing during warranty period.

PART 2 PRODUCTS

2.1 BYPASS (POT) FEEDER

A. 6.0 gallon quick opening cap for working pressure of 175 psig. See drawings for additional information.

2.2 DRIP FEEDER

A. Plastic reservoir with coil of capillary tubing with probe, weight, charging syringe, and clip.

2.3 SOLUTION METERING PUMP

A. Positive displacement, diaphragm pump with adjustable flow rate, thermoplastic construction, continuous duty fully enclosed electric motor and drive, and built in relief valve.

2.4 SOLUTION TANKS

A. 50 gallon capacity, polyethylene, self-supporting, 5 gallon graduated markings; molded fiberglass cover with recess for mounting pump, agitator, and liquid level switch.

2.5 AGITATOR

A. Totally enclosed electric motor, cast iron clamp and motor mount, 5/8 inch diameter Type 316 stainless steel propeller.

2.6 LIQUID LEVEL SWITCH

A. Polypropylene housing with integrally mounted PVC air trap, receptacles for connection to metering pump, and low level alarm.

2.7 CONDUCTIVITY CONTROLLER

A. Packaged monitor controller with solid state circuiting, five percent accuracy, linear dial adjustment, built-in calibration switch, on-off switch and light, control function light, output to control circuit and recorder.

2.8 WATER METER

A. Displacement type cold water meter with sealed, tamper-proof magnetic drive, impulse contact register, single pole, double throw dry contact switch.

2.9 SOLENOID VALVES

A. Forged brass body globe pattern, normally open or closed as required, general purpose explosion-proof and watertight solenoid enclosure, and continuous duty coil.

2.10 TIMERS

A. Electronic timers, infinitely adjustable over full range, 150 second and five minute range, mounted together in cabinet with hands-off-automatic switches and status lights.

2.11 TEST EQUIPMENT

A. Provide white enamel test cabinet with local and fluorescent light, capable of accommodating 4-10 ml, zeroing titrating burettes and associated reagents.

B. Provide the following test kits:
   1. Alkalinity titration test kit.
   2. Chloride titration test kit.
   3. Sulphite titration test kit.
   4. Total hardness titration test kit.
   5. Low phosphate test kit.
   6. Conductivity bridge, range 0-10,000 microhms.
   7. Creosol red pH slide complete with reagent.
   8. Portable electronic conductivity meter.
   9. High nitrite test kit.

PART 3 - EXECUTION

3.1 CHILLED WATER SYSTEMS

A. Testing
   1. Before equipment is connected, hydrostatically test at 1.5 times the maximum system pressure, but not less than 100 psig in excess of the working pressure for four hours. This pressure to be on piping only, not equipment.

B. Cleaning and flushing
   1. System shall be operational, filled, started and vented prior to cleaning. Use water meter to record capacity in system.
   2. Place terminal control valves in open position during flushing and cleaning.
   3. Verify electric power is available and of correct characteristics.
   4. Install cleaning chemicals. Concentration shall be one pound per 100 gallons of water or as recommended by the chemical manufacturer.
      a. Utilize liquid alkaline compound with emulsifying agents and detergents to remove grease and petroleum products.

b. Utilize biocide; chlorine release agents such as sodium hypochlorate or calcium hypochlorite, or micro biocides such as quartenary ammonial components, tributyl tin oxide, methylene bis (thiocyanate), or isothiazolores.

5. Circulate for 48 hours, then drain system as quickly as possible. Refill with clean water and circulate for 24 hours, then drain. Flush for one hour and refill with clean water and drain. Repeat until system cleaner and all material is removed. Water shall be clear upon last drain.
6. Use neutralizer agents as recommended by the system cleaner supplier.
7. Remove, clean and replace all strainer screens.
8. Inspect, remove sludge, and flush low points of piping system with clean water after cleaning process is completed. Include disassembly of components as required.
9. Install sequestering agent to reduce deposits, and adjust pH. Install corrosion inhibitors and conductivity exchangers. If system is to utilize a water glycol mixture, glycol shall have sequestering and corrosion inhibitors. All chemical types and concentrations shall be as recommended by the chemical treatment contractor.

C. System Water Treatment
1. Provide one bypass feeder on each system. Install isolating and drain valves and necessary piping. Install around balancing valve downstream of circulating pumps unless indicated otherwise.
2. Introduce chemicals through bypass feeder when required or indicated by a test.
3. Provide ¾" water coupon rack around circulating pumps with space for four test specimens.

3.2 SYSTEM COMPLETION CHECKLIST

A. The checklist which follows this specification section is to be considered part of the specifications.

B. The checklist is to be completed by the Installing Contractor and the prime Mechanical Contractor for each item as directed.

END OF SECTION

MAI 2012-1529

SYSTEMS COMPLETION CHECKLIST

Inspection/Review Item	Notice Required	Installing Contractor		Date	Owner's Representative Signature	Remarks
		Name	Signature			
HVAC Piping and Circulating Pump Systems						
Flushing and testing of chilled water piping system	48 hours					Flushed and tested per specification.
Valving	When completed					Verify that all valves have been installed at all branch locations.
Pipe and Fitting Insulation	When Completed					Verify all piping and fittings are per specification.
Circulating pumps installation complete, check, tested and started	7 days					Verify circulating pump rotation, operation and control are correct. Verify check, test and start-up of circulating pumps by manufacturer's representative.
Circulating pump V.F.D. System	7 days					Verify installation complete for all control components, system check tested and started by manufacturer's representative.
Glycol feed unit	7 days					Verify installation complete, system check, test and startup by manufacturer's representative.
Air Vents	When completed					Verify air vents at all high points of hydronic piping systems and all air bled from system.
Labeling and valve tagging identification	When completed					Verify system identification is complete per specification.
Owner's training	When completed					Verify that Owner has been instructed on operation and maintenance of systems.

By signing this form, the Contractor is certifying that he has personally witnessed completion of that item, and it is complete and complies with all respects to the drawings and specifications.

All items are to be signed off on and submitted to MacMillan Associates Inc. before a final project walk-thru by the Engineer is requested. If the Engineer discovers items incomplete and/or not in accordance with this checklist, the drawings, or the specifications, the Contractor will be backcharged for the Engineer's time and expenses.

SYSTEMS COMPLETION CHECKLIST						
Inspection/Review Item	**Notice Required**	**Installing Contractor**		**Date**	**Owner's Representative Signature**	**Remarks**
		Name	**Signature**			
Miscellaneous Requirements						
As-built drawings of all systems	At completion of installation					Per specification
Operation and Maintenance manuals	At completion of installation					Per specification
Water Balance Report	At completion of installation					Per specification
One complete set of shop drawings for Owner	At completion of project					Per specification
Inspection, local authority approvals, etc.	At completion of project					

By signing this form, the Contractor is certifying that he has personally witnessed completion of that item, and it is complete and complies with all respects to the drawings and specifications.

All items are to be signed off on and submitted to MacMillan Associates Inc. before a final project walk-thru by the Engineer is requested. If the Engineer discovers items incomplete and/or not in accordance with this checklist, the drawings, or the specifications, the Contractor will be backcharged for the Engineer's time and expenses.

SECTION 23 71 19

ICE STORAGE

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Ice Storage Tank

1.2 REFERENCES: Material and/or equipment specified in this section shall meet or exceed one or more of the property requirements or installation requirements of the following specifications/publications as applicable to the specific product or end use.

A. ARI Guidelines for Specifying the Thermal Performance of Cool Storage.

PART 2 PRODUCTS

2.1 SUMMARY

A. The contractor shall furnish and install ice storage system (Off Peak Air Conditioning OPAC system) as scheduled on the drawings.

B. Approved Manufacturers

1. CALMAC to match existing equipment.

2.2 GENERAL UNIT DESCRIPTION

A. The Off Peak Air Conditioning (OPAC) system shall be CALMAC and match the existing CALMAC system. The OPAC system shall be modular in design. It shall be a closed circuit single source system including; package polyethylene glycol chiller unit(s) with factory mounted ice making controls, separate modular ice storage tanks, DDC control system, and heat transfer fluid providing twenty-four hour system performance as indicated in the plans and specifications. The OPAC system, including chiller and controls as specified elsewhere shall be provided by a single organization. This organization shall have factory trained service technicians who will be responsible for the start-up and first year parts and labor warranty of the system including warranties listed elsewhere in the bid documents. The OPAC system equipment and vendor must have been employed in at least 10 systems of 800 ton hours or more capacity within a radius of 150 miles of the job site, all of which have operated successfully for five years. All storage vessels shall be of one size to facilitate balancing and shall be filled with water as a freezing fluid, such that the OPAC tank heat exchanger is totally submerged. The OPAC tank heat exchangers in all vessels, shall be piped in parallel and a chilled solution (polyethylene glycol) shall be circulated through the tubes. In the charging mode of operation, sub cooled glycol solution shall cause ice to form and build on the tube surfaces. In the load mode of operation, the glycol solution shall be cooled by the melting ice from around the tube surfaces. Internal melt comes from the load mode of operation of the ice melting from the tube surface, inside the ice, out.

B. OPAC System Performance: Suppliers shall provide information in accordance with the current ARI Guideline for Specifying the Thermal Performance of Cool Storage that

proposed equipment will meet minimum performance specified. Each OPAC tank shall have FACTORY RATED AND PUBLISHED charge and discharge performance curves that clearly indicate usable ton-hours of storage at the system design temperatures shown in the plans and specifications.

C. Off Peak Air Conditioning Storage Vessels

1. The modular ice storage tank design shall incorporate structure and storage fluid containment in a one piece (sides and bottom) seamless tank designed for a minimum 25 year service life and shall be constructed solely of corrosion-resistant materials. Non-seamless tank designs may be considered provided manufacturer submits, in writing with the bid forms, compliance with all parts of the OPAC specification, performance and warranties.

2. The OPAC tanks and tank covers shall be suitable for installation above or below ground with a maximum 12 inch deep covering, and shall produce a floor loading of no more that 238 pounds per square foot.

3. The OPAC tank farm shall be modular and each capable of being individually isolated so that each may be serviced without interrupting the operation of the total systems for system reliability.

4. The OPAC tank shall consist of a seamless one piece design manufactured with high density rotationally molded corrosion resistant polyethylene with a minimum thickness of 3/8 inch. Buried tanks shall be one-third thicker and installed in accordance with manufacturers recommended procedures. The tank shall include a factory assembled thermally isolated expansion chamber to prevent expansion water from forming capacity reducing ice caps

5. Stainless steel vessels fabricated with 16 gage minimum thickness Type 304 or 316 sheet metal meeting requirements of ASTHMA A167 with continuous welded joints or stainless steel bolted construction with pool type containment liners will be considered in lieu of seamless polyethylene. Galvanized steel will also be considered provided all galvanized steel parts (heat exchanger, all sides of tanks and all supports) are coated with a cross linked epoxy-phenolic cured coating with an alkaline curing agent such as Plasite 7122HAR to eliminate long term corrosion due to sweating and/or outdoor weather. Galvanized surfaces shall be cleaned and properly etched with a standard solution such as Galvaprep or a phosphating solution. After the surface is etched it shall be thoroughly rinsed with water and dried prior to applying protective coating. Coated galvanized steel tanks shall be reinforced with full width structural angles underneath on all four sides, and all seams are welded to ensure water tight construction. Non continuously welded tanks shall be provided with dual containment pool type liners with a ten year containment warranty for reliability and safety. Partially buried or totally buried galvanized steel tanks shall be surface coated with Ameron D9, 2-4 mils, and an intermediate coat 6-8 mils of Ameron 385 epoxy, and to coated with Ameron 450HS Urethane, 2-4 mils to minimize corrosion.

6. The fluid containment barriers shall each have a minimum tear resistance of 12,000 lbs./inch minimum in BOTH directions according to ASTM-1004. A zinc rich compound shall be applied to all exposed edges and welds. OPAC tank and fluid containment shall be warranted as designated under warranty section.

7. The phase change water containment integrity shall be totally repairable without removing the internal OPAC tank heat exchanger. Indoor installations shall require no more than three foot of overhead clearance for heat exchanger repair. Galvanized steel tanks shall enough room for a side removal of heat exchanger for tube repair.

8. The OPAC tank shall contain a spiral-wound, mat type heat exchanger consisting of translucent 5/8 inch O.D. tubbing arranged in multiple parallel circuits with opposite direction of flow in adjoining tubes for even ice making and burning. Tubes shall be connected to internal headers with compression fittings. One quarter inch glued heat exchanger "U" shaped tubes will be considered if manufacturer provides a self cleaning 5 micron glycol fluid filter and strainer system to filter glycol solution entering tank farm to eliminate tube blockages at bottom of 1/4 inch O.D. "U" tube. Steel heat exchanger tubes (1.05" O.D.) may be used provided steel frame work is hot dip galvanized after fabrication and coated as directed above in tank specification with PLASITE 7122 HAR. All OPAC heat exchangers shall be warranted as specified elsewhere. The heat exchanger must withstand a 90 psi maximum operating pressure and have a burst pressure rating of 300 psi. To avoid capacity reducing ice caps, heat exchanger tubes shall be totally submerged in the freezing liquid, and shall be kept evenly spaced by plastic spacer strips.

9. Glycol solution temperature drops across the heat exchanger in the charging mode must be large enough to permit full fluid flow through the ice making chiller.

10. The modular thermal storage vessels shall be piped parallel in reverse return for self balancing. At design conditions the OPAC tank flow shall not change greater than 3% by varying the pressure across the tank farm by one foot (.043psi). Manufacturer must provide pressure drop curves of OPAC tank with submittal package. Repair of a leak in the OPAC tank heat exchanger shall not require removal from the tank.

11. Each heat exchanger and its associated piping shall be factory hydrostatically pressure tested.

12. Connections to the tanks heat exchanger form the main headers shall be with 4-ply steel braided rubber hose having a burst pressure of 360 psi. The flexible connection hose must be long enough to permit one inch of movement in all directions. Follow manufacturers recommendations.

13. Covers shall be provided for all OPAC tanks. Covers for vessels shall be designed to support architectural landscaping wood chips, or other similar material, having a maximum depth of twelve inches. Covers shall also support the weight of an average adult person (200 pounds) at any point on the tank farm.

14. Covers shall be in modular sections that can be readily lifted, removed, and replaced by two men. Each section shall weigh no more than 200 pounds, and shall have smoothed edges or handles for easy and safe gripping.

15. Each vessel shall have at least one inspection port in the cover which can be used for visual inspection, determining liquid level, and for filling the vessel with water, without removing the cover(s). Each buried tank's inspection port shall have a Schedule 80 PVC pipe extending to six inches above grade, with a gasketed and easily removable cap.

16. Covers for stainless steel vessels shall be a minimum of 16 gauge stainless or 14 gauge for hot dipped galvanized steel tanks of same type used on sides and bottom.

17. The bottom, sides and cover(s) of each vessel shall be factory insulated. Insulation on the interior of the structural containment vessel is unacceptable.

18. Manufacturer must provide adequate insulation to limit standby losses not to exceed one percent of the total stored capacity when in an 85 degree F. environment for a period of twenty-four hours.

19. For plastic vessels that freeze solid the bottom and the sides of the tank shall be insulated externally with a minimum of two inches of extruded polystyrene or polyurethane applied in overlapping layers having a minimum R- factor of 9. Insulation of sides shall be covered with a .032 inch thick aluminum jacket for protection and reflectance.

20. The tops of all vessel types shall have a minimum of three inches of insulation applied to the interior cavity of the cover and have an R- factor of 24.

21. For stainless steel or galvanized vessels that do not freeze solid, insulation meeting the standby loss criteria shall be applied between the exterior of the containment wall or pool type liner and the interior of the structural support system. Insulation of sides and bottom of vessel shall be covered with a minimum 30 mil thick PVC or EPDM impermeable liner, with all seams and joints double lapped and solvent welded. All fastening materials used to hold the liner in place shall be non-corrosive plastic, or stainless steel.

D. OPAC System

1. A lug type, full flow shut off valve shall be included by the contractor in the supply and return lines of each tank on the system side of the removable flexible connector.

2. System leak protection shall be provided by liquid level and/or pressure switches in the expansion tank.

3. Tank bottoms shall be level and supported over the entire area and insulated from their supporting surface with insulation supplied by the tank manufacturer. Non plastic tanks must be set on pressure treated Douglas Fir sleepers. Follow manufacturers installation recommendations for partially buried or totally buried tanks. Metal tank manufacturers must provide a factory applied mastic coating for corrosion protection and a field installed cathodic corrosion protection system for each tank.

4. The thermal storage system shall be provided with an ice inventory measuring device which will indicate the amount of ice available at any time within an accuracy of +/- 5 percent. This inventory measuring device shall also be equipped with an electric transducer capable of producing a 4 - 20 ma. signal which can interface with the building automation system. This device is for indication only, not for control of ice system.

5. Hydrostatically flush clean and field pressure test all piping external to thermal storage tanks as specified elsewhere to remove welding slag, flux, and dirt. If hydrostatic test is with water the OPAC tanks must not be a part of this test and shall be valved off to eliminate filling the OPAC tanks with water which cannot be easily replaced with the pre-mixed glycol solution. After successful completion of the test, drain the system and add premixed glycol solution to the system as described in another part of the specification. Upon completion of the filling and removal of air, pressure test OPAC tanks in accordance with manufacturers recommendations.

E. Treatment Of Phase Change Water

1. The OPAC tank manufacturer shall supply ten years of water treatment chemicals required for treatment of the phase change water. The treatment must eliminate algae, bacteria, and metal corrosion (if metal tanks supplied). The submittal documents must contain the name(s), and quantities required for the ten year chemical treatment. Rules for handling, storing, amount of room required for storing, rules for handling, and rules for application must also be provided.

F. OPAC Tank Warranty

1. Manufacturer of OPAC tanks to warranty phase change fluid containment, insulation, corrosion, and structure of tank for ten years and free floating OPAC tank heat exchanger integrity for five years (ten years if heat exchanger is mechanically mounted to tank) from start up not to exceed 12 months from shipment to job site.

2.3 BUILDING MANAGEMENT SYSTEM

A. Provide Integrated Comfort System communication interface utilizing a single twisted wire pair link to existing JCI System. All operation codes, monitoring information, setpoint adjustments, chiller sequencing and diagnostic shall be available at Tracer display.

B. Provide 4-20 mA control signal from building automation system for leaving water temperature and demand limiting setpoint adjustment.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install in accordance with manufacturer's instructions.

3.2 MANUFACTURER'S FIELD SERVICES

A. Supply service of factory trained representative for a period of two days to supervise testing, start-up, and instruction on operation and maintenance to Owner.

END OF SECTION

MAI 2012-1529

SECTION 26 01 00

BASIC ELECTRICAL REQUIREMENTS

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Basic electrical Requirements specifically applicable to Division 26 Sections, in addition to Division 1 - General Requirements.

B. Information in this section is intended to clarify or make additions to the requirements set forth in the General Conditions, Supplementary Conditions and Division 1 of these specifications. Any conflict between Division 26 and those in the General Conditions or within the Division 26 drawings, Supplementary Conditions and Division 1 shall be brought to the attention of the Architect/Engineer in writing as a request for addendum prior to the bid opening.

C. Furnish all equipment, materials, articles, items, operations or methods listed, mentioned or scheduled on drawings, these specifications, manufacturer's installation instructions and include all labor materials, equipment and incidentals necessary for complete installation and operation.

D. All information contained in this section applies to all sections within Division 26 as it was part of each section.

E. Final walk-thru. Electrical Contractor shall submit in writing to the Architect's office or the Construction Manager advising that all of the Division 26 work has been completed in accordance with the plans and specifications. The intent is to acknowledge the Contractor is ready for a walk-thru. Open items that are part of the required construction work should be completed prior to the final walk-thru to avoid developing a so called construction completion list. The engineer reserves the right to reschedule the final walk-thru as determined accordingly.

F. Pre-bid questions. All pre-bid questions, clarifications, etc. must be submitted in writing to the Architect Office or the Construction Manager. All phone calls, faxes or e-mails from bidders and manufacturers, etc. directly received by the Engineers office during the bidding phase will be deferred back to the Architect Office or the Construction Manager.

G. Electrical Contractor shall review all of the project plans and specifications and not rely solely on the electrical drawings to establish a project bid. Refer to the structural and mechanical drawings for final mechanical equipment locations. Mechanical drawings shall govern over the electrical drawing locations.

H. The new electrical distribution shall be Series Rated to comply with 2014 NEC and the specifications sections. Contractor shall be responsible to obtain assistance from the manufacturer to provide Series Rated electrical distribution.

I. Unit Pricing: Contractor shall furnish pricing as listed in the Bid Proposal Forms.

J. The Contractor shall include in their bid any cost for requesting AutoCAD backgrounds for their use from the Architect or Engineer. The cost will be $150.00 for the first plan, and $50.00 for each additional plan that may be requested for AutoCAD use. A waiver of responsibility for the Architect and Engineer related to Contractor use of the CAD files shall be signed by the Contractor.

1.2 LAYOUT OF THE WORK

A. Examine the site and all the drawings before proceeding with the layout and installation of this work. Verify all door swings and clearances to cabinets, etc., before locating switch and outlet boxes. Locate conduit, boxes, etc., essentially as shown on the drawings but in exact layout determined on the job to suit actual conditions. Confer and cooperate with the other trades on the job so all parts will be installed in proper relationship. Precise locations of parts to coordinate with other work is the responsibility of the Contractor.

B. The Electrical Trades shall complete all cutting and patching for the electrical work, unless noted or specified otherwise. Division 26 Contractor shall be responsible to coordinate with the site Restoration Contractor for the new underground electrical work.

C. Arrange exposed work as closely as practicable to wall or ceiling surfaces in an accurate alignment. Locate concealed work so fittings, connectors and other projections will clear surfaces. Exposed work is defined as non-finished spaces, such as mechanical / electrical rooms or as indicated on architectural room schedules. All finished spaces, installation shall be concealed. Refer to Architectural drawing for room finish schedules.

D. During the bidding phase, if any design or discrepancy issues are discovered between the electrical drawings, specifications and other project plans, the contractor shall notify the Architect/Engineer. The intent is to resolve any issues during the bidding phase. For pertinent issues, addendums will be issued accordingly. After entering into a contract, it shall be considered there are no identified conflicts.

E. No drilling of existing laminated beams for new work is permitted without review with the project Structural Engineer

1.3 INTERFERENCES

A. The Electrical Contractor shall examine the plans of mechanical trades, the architectural and structural drawings and shall notify the Architect/ Engineer to resolve such interference or discrepancy. The Electrical Contractor bid shall not be based solely on the Electrical Plans and Specifications. Contractor shall obtain and review all project documents. The Contractor, when directed, shall make such changes or off-sets as required so that the work shall be properly located and coordinated with the other trades. Failure to comply with the foregoing will not relieve contractor's responsibilities of making such changes. Such changes shall be completed at no additional cost to the Owner.

B. All changes in location of equipment, fixtures, distribution equipment, receptacles, etc., from those shown on plans, shall be made without charge when directed by the

Architect/Engineer before installation. At this time, an agreement shall be made if such a change is an additional cost to the owner.

C. The Electrical Contractor shall confer with other trades regarding location and size of pipes, equipment, fixtures, conduit, duct openings, switches, outlets, etc., in order that there may be no interference in the installation of the work of any trades or delay in the progress of any work.

D. Any changes made, necessary through failure to make proper arrangement to avoid interference, shall not be considered as extra.

E. The Electrical Contractor shall cooperate with those performing work under other divisions in his preparation of interference drawings, to the extent that the location of plumbing piping, heating piping, and/or ventilation ducts, with respect to the installation of other trades, shall be mutually agreed on by those performing work under other divisions.

F. In the event the described work on the drawings doesn't match requirements described in the specification, the more stringent shall be provided.

G. Electrical Contractor shall review the Architectural work station, casework details and section drawings that show raceway details. Furnish the raceway as detailed.

H. Contractor shall carefully review the code sections pertaining to safe working clearances to avoid piping, ducts interferences and other equipment. Install the electrical equipment to meet Code requirements. Adjust the locations shown as required.

1.4 MATERIALS AND WORKMANSHIP

A. All materials and equipment furnished for installation on this project shall be new and in strict accordance with this specification. All packaged materials shall be delivered in the original containers which show the manufacturer's name and the identifying designations as to size, quality, etc. Materials delivered to the job in unmarked or mutilated packages will be ordered to be removed from the site at once. Materials or equipment judged as "damaged" by the Architect or Engineer shall be removed from the job. All electrical equipment shall bear the Underwriter's Label.

B. All work shall be performed in a professional manner under the supervision of a Contractor's manager. The project manager shall be considered the main point of contact for the Architect/Owner's daily communication.

C. Should any dispute arise as to the quality or fitness of the materials or workmanship, Architect, Owner, Engineer and Electrical Contractor shall mutually agree work is non-acceptable and shall be reworked at no additional cost to the Owner.

D. Division 26 equipment schedule descriptions shall govern if it is found that the manufacturer's catalog numbering shown on the drawing is not current, or changed by the manufacturer without notification. Division 26 Contractor shall notify the Architect/Engineer with any conflicts during the bidding phase to get clarifications. After entering into a Contract, it shall be considered the equipment schedules provide the information to meet the intended specifications for quality and performance.

1.5 GUARANTEES

A. All equipment and work performed under Division 26, 27 & 28 shall be guaranteed for one (1) year from time of substantial completion of project, unless directed otherwise in Division 1.

1.6 VOLUNTARY ALTERNATES

A. The Architect/Engineer will only accept voluntary alternate as a bid deduct. Alternate must maintain the same level of quality to meet the design intent. Voluntary alternates must be submitted with the bid for review by the Owner. Failure to comply will be no reason to accept any voluntary alternates after entering into a contract.

1.7 OWNERS ACCEPTANCE OF EQUIPMENT

A. Refer to Division 1.

B. Upon the Owner's written acceptance, the Electrical Contractor's guarantee period shall begin and the Owner shall accept the responsibility for operation and maintenance and the Contractor's liability shall be limited to the conditions covered in the guarantee as described in these specifications.

1.8 REFERENCES

A. Conform to requirements of 2012 Michigan Building Code, 2014 Electrical Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

1.9 SUBMITTALS

A. Submit 5 copies of shop drawings.

B. Proposed Products List: Include Products specified below:

1. Section 26 05 19 - Building Wire and Cable
2. PV Modules
3. Roof supports
4. Inverter
5. Data logger
6. Weather station
7. Provide PV module and rack support design calculations, including ballast weight for review.

C. Submit shop drawings and product data grouped to include complete submittals of related systems, products, and accessories in single submittals.

D. Mark dimensions and values in units to match those specified.

E. Shop drawings shall be reviewed and checked by the Electrical Contractor for specification compliance prior to release for the Engineer's review. Failure to comply will be no cause or reason for additional costs to the Owner with project delays.

F. Electrical distribution submittal shall include cut sheets for each piece of equipment. Written description is not acceptable.

G. Bill of materials shall be submitted as part of O&M Manual. Bill of Materials is not considered a shop drawing.

1.10 REGULATORY REQUIREMENTS

A. Conform to applicable Building Code.

B. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

C. Equipment: U.L. tested and approved for its purpose.

D. The Electrical Contractor shall obtain and pay for all permits and inspection fees. Copies of the Certificate of Inspection are to be provided to the Owner after final inspection and approval from authorities having jurisdiction.

E. State of Michigan, Bureau of Fire Services.

F. Equipment: Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

G. Life Safety NFPA 101 – The State of Michigan current adopted edition.

H. Fire Alarm Code NFPA 72 – The State of Michigan current adopted edition.

I. State of Michigan Uniform Energy Code.

J. ASHRAE 90.1 2007 Edition

1.11 PROJECT/SITE CONDITIONS

A. Install Work in locations shown on drawings, unless prevented by project conditions.

B. All bidders shall personally inspect the site and acquaint themselves with all existing conditions involved in execution of this contract, and make all necessary measurements. No “extra” will be considered for additional work required because of bidder’s failure to do so.

C. Arc flash warning labels. Provide arc flash generic warning labels in accordance with 2011 NEC Section 110 requirements.

1.12 TEMPORARY SERVICES

A. Division 26 Trades shall provide and maintain wiring for all interior construction lighting and power to meet OSHA Standards. Division 26 Trade shall provide and maintain all

required lamps and guards. Contractor's power tools, cords, etc shall be in strict accordance with National Electrical Code 2011, Article 590.

B. Electrical Contractor shall be responsible to review Division 1 requirements to provide project temporary lighting and power requirements for the construction and demolition phases.

1.13 RECORD DRAWINGS

A. The Electrical Contractor shall furnish as-constructed drawings, including all Addendums, Bulletins and associated Field Directed Changes included as part of the record drawings.

1.14 OPERATION AND MAINTENANCE MANUALS

A. Verbal instruction and written operational instructions are to be given on all equipment and systems under this contract. A time is to be scheduled with the Architect/Engineer and Owner for these instructions and a time submitted in writing for instructions at the facility.

B. Two (2) bound sets of Operating and Maintenance Manuals are to be submitted to the Architect/Engineer for approval. Manuals are to include complete parts list and maintenance procedures as well as operating instructions on all equipment supplied under Division 26.

END OF SECTION

MAI 2012-1529 SOLAR/ICE

SECTION 26 05 19

BUILDING WIRE AND CABLE

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Building wire and cable.

B. PV rated module cables.

C. MC cable

D. Non-metallic sheath cable.

1.2 RELATED SECTIONS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.3 REFERENCES

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

1.4 PROJECT CONDITIONS

A. Verify that field measurements are as shown on Drawings.

B. Conductor sizes are based on copper.

C. Routing shown on Drawings is approximate unless dimensioned. Field route as required to best suit Project Conditions.

D. Where wire and cable routing is not shown, and only a load destination is shown, determine exact routing and lengths required.

1.5 COORDINATION

A. Coordinate Work under provisions of Division 1.

B. Determine required separation between cable and other work.

C. Determine cable routing to avoid interference with other work.

1.6 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.1 BUILDING WIRE AND CABLE

A. Description: Single conductor insulated wire.

B. Conductor: Copper.

C. Insulation Voltage Rating: 600 volts.

D. Insulation: ANSI/NFPA 70, Type THW, THHN/THWN.

2.2 MC CABLE

A. Factory assembled multiple insulated conductors enclosed in armor of interlocking metal corrugated sheath.

B. Provide all clips and supports.

2.3 PV RATED MODULE CABLE

A. UL4703 rated Type XLPE -40˚ - 90˚C, 2000v.

PART 3 EXECUTION

3.1 EXAMINATION

A. Verify that interior of building has been protected from weather.

B. Verify that mechanical work likely to damage wire and cable has been completed.

3.2 PREPARATION

A. Completely and thoroughly swab raceway before installing wire.

3.3 INSTALLATION

A. Install products in accordance with manufacturer's instructions.

B. Use stranded conductors for control circuits.

C. Use conductor size not smaller than 12 AWG for power and lighting circuits.

D. Use 10 AWG conductors for 20 ampere, 120 volt branch circuits longer than 100 feet.

E. Use 10 AWG conductors for 20 ampere, 277 volt branch circuits longer than 200 feet.

F. Pull all conductors into raceway at same time.

G. Protect exposed cable from damage.

H. Support cables along roof module supports using UV-resistant zip ties.

I. Use suitable cable fittings and connectors.

J. Neatly train and lace wiring inside boxes, equipment, and panelboards.

K. Clean conductor surfaces before installing lugs and connectors.

L. Splices are not permitted.

M. All power wiring shall be installed in conduit. Low-voltage wiring shall utilize the cable tray or free-air method. Conduit drops for fire alarm devices and voice/data outlets shall be required. Low voltage cables installed in accessible ceiling space need to in conduit. However, the cables must be properly secured to the ceiling structure.

N. If the Division 26 Contractor elects, at their option, to combine homerun circuits installed in a single conduit, the derating 2014 NEC 310.15(b) Table must be utilized for allowable conductor ampacity values. If the derating method is utilized, then furnish and install properly derated cables and properly sized conduits to meet Code. The Division 26 Contractor shall be responsible to obtain inspection from the Electrical Inspector and pay all supplemental inspection and/or requested plan review fees.

O. Conform to NEC Section 690 to meet code requirements.

3.4 INTERFACE WITH OTHER PRODUCTS

A. Identify wire and cable under provisions of Section 26 05 53.

B. Identify each conductor with its circuit number or other designation indicated on Drawings.

3.5 FIELD QUALITY CONTROL

A. Perform field inspection and testing to assure proper operation.

B. Inspect wire and cable for physical damage and proper connection.

C. Measure tightness of bolted connections and compare torque measurements with manufacturer's recommended values.

D. Verify continuity of each branch circuit conductor.

MAI 2012-1529 SOLAR/ICE END OF SECTION

SECTION 26 05 26

GROUNDING AND BONDING

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Grounding electrodes and conductors.

B. Equipment grounding conductors.

C. Bonding.

1.2 RELATED SECTIONS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.3 REFERENCES

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

1.4 PERFORMANCE REQUIREMENTS

A. Resistance: Meet the NEC Code requirements.

1.5 PROJECT RECORD DOCUMENTS

A. Accurately record actual locations of grounding electrodes.

1.6 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.1 ROD ELECTRODE

A. Material: Copper-clad steel or copper-weld type.

B. Diameter: as scheduled on the drawings.

C. Length: as scheduled on the drawings.

2.2 MECHANICAL CONNECTORS

A. As scheduled on the drawings.

2.3 EXOTHERMIC CONNECTIONS

A. As scheduled on the drawings.

2.4 WIRE

A. Material: As scheduled on the drawings.

B. Foundation Electrodes: Size to meet NFPA 70 requirements.

C. Grounding Electrode Conductor: Size to meet NFPA 70 requirements.

PART 3 EXECUTION

3.1 EXAMINATION

A. Verify site soil conditions before driving rod electrodes.

3.2 INSTALLATION

A. Install Products in accordance with manufacturer's instructions.

B. Install rod electrodes at locations indicated. Install additional rod electrodes as required to achieve specified resistance to ground.

C. Provide bonding to meet Regulatory Requirements.

D. Provide supplemental grounding in accordance with 2014 NEC Section 690.

E. Equipment Grounding Conductor: Provide a separate grounding conductor for lighting and power circuits as noted or specified on the drawings.

F. Bond the paralleled service entrance conduits in accordance with NEC 2014 Section 310.10 requirements.

G. In the case of an isolation ground system, the metal raceway may be used as the equipment ground and an insulated grounding conductor as the isolated ground. If PVC conduit is utilized, then two insulated grounding conductors shall be installed.

3.3 FIELD QUALITY CONTROL

A. Inspect grounding and bonding system conductors and connections for tightness and proper installation.

B. Use suitable test instrument to measure resistance to ground of system. Perform testing in accordance with test instrument manufacturer's recommendations using the fall- of-potential method.

MAI 2012-1529 SOLAR/ICE

SECTION 26 05 29

SUPPORTING DEVICES

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Conduit and equipment supports.

B. Anchors and fasteners.

C. PV module roof supports.

1.2 RELATED SECTIONS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.3 REFERENCES

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

1.4 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.1 PRODUCT REQUIREMENTS

A. Materials and Finishes: Provide adequate corrosion resistance.

B. Provide materials, sizes, and types of anchors, fasteners and supports to carry the loads of equipment and conduit. Consider weight of wire in conduit when selecting products.

C. Anchors and Fasteners:
   1. Concrete Structural Elements: Use expansion anchors.
   2. Steel Structural Elements: Use beam clamps.
   3. Concrete Surfaces: Use self-drilling anchors and expansion anchors.

4. Hollow Masonry, Plaster, and Gypsum Board Partitions: Use toggle bolts and hollow wall fasteners.
5. Solid Masonry Walls: Use expansion anchors.
6. Sheet Metal: Use sheet metal screws.
7. Wood Elements: Use wood screws.

PART 3 EXECUTION

3.1 INSTALLATION

A. Attachments of electrical equipment to structural members are the responsibility of the installing trade. Structural members shall not be field cut, welded or otherwise modified without approval of the Architect/Engineer. Attachment to steel joist shall be made at panel points whenever possible. Structural members shall not be overloaded as a result of attachments. Attachment/equipment loading for all trades resulting in total load greater than an equivalent uniform 5 psf for any member shall be submitted to the Architect/Engineer for review. Electrical Trades are still responsible for design, layout, and fabrication and installation of electrical supports and support attachment methods. Electrical Trades shall submit attachment methods to the Structural Engineer for review.

B. Install products in accordance with manufacturer's instructions.

C. Do not fasten supports to pipes, ducts, mechanical equipment, and conduit.

D. Do not use spring steel clips and clamps.

E. Do not use powder-actuated anchors.

F. Do not drill or cut structural members without permission from Architect/Engineer.

G. Fabricate supports from structural steel or steel channel. Rigidly weld members or use hexagon head bolts to present neat appearance with adequate strength and rigidity. Use spring lock washers under all nuts.

H. Install surface-mounted cabinets and panelboards with minimum of four anchors.

I. Use sheet metal channel to bridge studs above and below cabinets and panelboards recessed in hollow partitions.

J. Construct generator and transformer concrete pad as detailed on the drawings.

K. No drilling of laminated wood beams without structural engineer review.

END OF SECTION

MAI 2012-1529 SOLAR/ICE

SECTION 26 05 33.13

CONDUIT

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Metal conduit.

B. Flexible metal conduit.

C. Liquidtight flexible non-metallic conduit.

D. Electrical metallic tubing.

E. Fittings and conduit bodies.

F. Conduit water sealant.

1.2 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and indicated.

1.3 RELATED SECTIONS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.4 REFERENCES

A. ANSI C80.1 - Rigid Steel Conduit, Zinc Coated.

B. ANSI C80.3 - Electrical Metallic Tubing, Zinc Coated.

C. ANSI C80.3 - Rigid Aluminum Conduit.

D. ANSI/NEMA FB 1 - Fittings, Cast Metal Boxes, and Conduit Bodies for Conduit and Cable Assemblies.

E. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

F. NEMA RN 1 - Polyvinyl Chloride (PVC) Externally Coated Galvanized Rigid Steel Conduit and Intermediate Metal Conduit.

G. NEMA TC 2 - Electrical Plastic Tubing (EPT) and Conduit (EPC-40 and EPC-80).

H. NEMA TC 3 - PVC Fittings for Use with Rigid PVC Conduit and Tubing.

1.5 DESIGN REQUIREMENTS

A. Conduit Size: ANSI/NFPA 70.

1.6 PROJECT RECORD DOCUMENTS

A. Submit under provisions of Division 1.

1.7 DELIVERY, STORAGE, AND HANDLING

A. Deliver, store, protect, and handle Products to site.

B. Accept conduit on site. Inspect for damage.

C. Protect conduit from corrosion and entrance of debris by storing above grade. Provide appropriate covering.

D. Protect PVC conduit from sunlight.

1.8 PROJECT CONDITIONS

A. Verify that field measurements are as shown on Drawings.

B. Verify routing and termination locations of conduit prior to rough-in.

C. Conduit routing shown is diagrammatic, field route conduit to avoid interferences.

1.9 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.1 CONDUIT REQUIREMENTS

A. Minimum Size: ¾ inch unless otherwise specified.

B. Underground Installations:

1. Use Schedule 40 PVC conduit for general underground installation.
2. Use Schedule 80 PVC conduit for heavy traffic areas.
3. Use direct burial seamless HDPE for underground installation.

C. Outdoor Locations, Above Grade: Use galvanized rigid steel conduit.

D. Wet and Damp Locations: Use galvanized rigid conduit or liquid-tight non-metallic flexible conduit.

E. Dry Locations:

1. Concealed: Use electrical metallic tubing.
2. Exposed: Use electrical metallic tubing.
3. Use minimum ¾" conduit for TV outlet and fire alarm drops.
4. Use flexible metal conduit for final wiring connections to motors, VFD units, light fixtures in accessible ceiling and interior transformers.
5. Use minimum 1" conduit for Cat 6 voice/data wiring.
6. Use minimum 1" conduit for Cat 5E voice/data wiring.

2.2 METAL CONDUIT

A. Rigid Steel Conduit: ANSI C80.1.

B. Fittings and Conduit Bodies: ANSI C80.5.

C. Intermediate Metal Conduit (IMC): Rigid Steel.

D. Fittings and Conduit Bodies: ANSI/NEMA FB 1; material to match conduit.

2.3 FLEXIBLE METAL CONDUIT

A. Description: Interlocked steel construction.

B. Fittings: ANSI/NEMA FB 1.

2.4 LIQUID-TIGHT NON-METALLIC FLEXIBLE METAL CONDUIT

A. Description: Type NM. Manufacturer with a spiral of rigid PVC embedded reinforcement with a flexible PVC wall.

B. Compatible fittings.

C. Use for wet or exterior location as final wiring connections to motors or electrical equipment, etc.

2.5 ELECTRICAL METALLIC TUBING (EMT)

A. Description: ANSI C80.3; galvanized tubing.

B. Fittings and Conduit Bodies: ANSI/NEMA FB 1; set screw type.

2.6 NONMETALLIC CONDUIT

A. Description: NEMA TC 2; Schedule 40 PVC.

B. Fittings and Conduit Bodies: NEMA TC 3.

2.7 WATER SEALANT

A. Use "Hydroblock" for a means and methods to seal leaking conduits. Follow the manufacturer's instructions.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install nonmetallic conduit in accordance with manufacturer's instructions.

B. Arrange supports to prevent misalignment during wiring installation.

C. Support conduit using coated steel or malleable iron straps, lay-in adjustable hangers, clevis hangers, and split hangers.

D. Group related conduits; support using conduit rack. Construct rack using steel channel; provide space on each for 25 percent additional conduits.

E. Fasten conduit supports to building structure and surfaces under provisions of Section 26 05 29.

F. Do not support conduit with wire or perforated pipe straps. Remove wire used for temporary supports.

G. Do not attach conduit to ceiling support wires.

H. Arrange conduit to maintain headroom and present neat appearance.

I. Route conduit parallel and perpendicular to walls or building centerlines.

J. Route conduit installed above accessible ceilings parallel and perpendicular to walls. Install metal conduit sleeves or fire rated assembly in all fire rated wall as identified on the electrical or architectural life safety plans.

K. Maintain adequate clearance between conduit and piping.

L. Maintain 12 inch clearance between conduit and surfaces with temperatures exceeding 104 degrees F.

M. Cut conduit square using saw or pipecutter; de-burr cut ends.

N. Bring conduit to shoulder of fittings; fasten securely.

O. Join nonmetallic conduit using cement as recommended by manufacturer. Wipe nonmetallic conduit dry and clean before joining. Apply full even coat of cement to entire area inserted in fitting. Allow joint to cure for 20 minutes, minimum.

P. Use conduit hubs or sealing locknuts to fasten conduit to sheet metal boxes in damp and wet locations and to cast boxes.

Q. Install no more than equivalent of three 90-degree bends between boxes. Use conduit bodies to make sharp changes in direction, as around beams.

R. Provide suitable fittings to accommodate expansion and deflection where conduit crosses, control and expansion joints. Use a UL listed expansion joint. If expansion length exceeds the manufactured expansion fitting, the use of PVC coated metallic flexible conduit is an acceptable method.

S. Provide suitable pull wire in each empty conduit except sleeves and nipples.

T. Use suitable caps to protect installed conduit against entrance of dirt and moisture.

U. Ground and bond conduit under provisions of Section 26 05 26.

V. Identify conduit under provisions of Section 26 05 53.

3.2 INTERFACE WITH OTHER PRODUCTS

A. Install conduit to preserve fire resistance rating of partitions and other elements, using materials and methods consistent with facility standards or this project specification. Contractor is responsible to review the Architectural drawings to determine fire rated locations.

B. Route conduit through roof openings for piping and ductwork or through suitable roof jack with pitch pocket or detail to match roof type specified.

END OF SECTION

MAI 2012-1529 SOLAR/ICE

SECTION 26 05 33.16

BOXES

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Wall and ceiling outlet boxes.

B. Pull and junction boxes.

C. Voice/data boxes.

1.2 RELATED SECTIONS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.3 REFERENCES

A. NEMA FB 1 - Fittings and Supports for Conduit and Cable Assemblies.

B. NEMA OS 1 - Sheet-steel Outlet Boxes, Device Boxes, Covers, and Box Supports.

C. NEMA 250 - Enclosures for Electrical Equipment (1000 Volts Maximum).

D. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

1.4 SUBMITTALS FOR REVIEW

A. Provide submittal as listed in Section 26 01 00.

1.5 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.1 BRANCH DEVICE BOXES

A. Sheet Metal Outlet Boxes: 4" square stamped steel box with single gang device ring.

B. Nonmetallic Outlet Boxes: NEMA OS 2.

C. Cast Aluminum Boxes: for exterior location us a single gang shallow box with thread hub connection. Provide gasketed cover by box manufacturer.

D. Use masonry box in masonry walls.

E. Use in line non-metallic type box in non-metal surface raceway assembly as scheduled and detailed on the drawings.

F. Non-metallic branch device are not permitted for this project unless noted otherwise.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install in locations as shown on Drawings, and as required for wire pulling, equipment connections and compliance with regulatory requirements.

B. Set wall mounted boxes at elevations to accommodate mounting heights indicated.

C. Electrical boxes are shown on Drawings in approximate locations unless dimensioned.

D. Orient boxes to accommodate wiring devices oriented as specified in Section 26 27 26.

E. Maintain headroom and present neat mechanical appearance.

F. Install pull boxes and junction boxes above accessible ceilings and in unfinished areas only.

G. Inaccessible Ceiling Areas: Install outlet and junction boxes no more than 6 inches from ceiling access panel or from removable recessed luminaire.

H. Install boxes to preserve fire resistance rating of partitions and other elements.

I. Coordinate mounting heights and locations of outlets for counters, backsplashes, benches in casework and workstations.

J. Locate outlet boxes to allow luminaires positioned as shown.

K. Align adjacent wall mounted outlet boxes for switches, etc.

L. Use flush mounting outlet box in finished areas. Surface mounted boxes are acceptable for non-finished spaces.

M. Locate flush mounting box in masonry wall to require cutting of masonry unit corner only. Coordinate masonry cutting to achieve neat opening.

N. Do not install flush mounting box back-to-back in walls; provide minimum 6 inches separation. Provide minimum 24 inches separation in acoustic rated walls.

O. Secure flush mounting box to interior wall and partition studs. Accurately position to allow for surface finish thickness.

P. Use stamped steel bridges to fasten flush mounting outlet box between studs.

Q. Install flush mounting box without damaging wall insulation or reducing its effectiveness.

R. Use adjustable steel channel fasteners for hung ceiling outlet box.

S. Do not fasten boxes to ceiling support wires.

T. Support boxes independently of conduit.

U. Use gang box where more than one device is mounted together. Do not use sectional box.

V. Use gang box with plaster ring for single device outlets.

W. Large Pull Boxes: Provide screwed cover or hinged enclosure in interior dry locations as noted or specified on the drawing.

3.2 INTERFACE WITH OTHER PRODUCTS

A. Coordinate installation of outlet box for equipment connected under other sections.

3.3 ADJUSTING

A. Adjust flush-mounting outlets to make front flush with finished wall material.

B. Install knockout closures in unused box openings.

END OF SECTION

MAI 2012-1529 SOLAR/ICE

SECTION 26 05 53

ELECTRICAL IDENTIFICATION

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Nameplates and labels.

B. Wire and cable markers.

C. Conduit markers.

D. Labeling methods and standards.

E. Conductor color coding and identification.

F. PV signage per NEC 690.

G. Arc flash warning labels.

H. Electrical distribution equipment.

1.2 RELATED SECTIONS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.3 REFERENCES

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

1.4 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and shown.

1.5 FACILITY STANDARDS

A. Refer also to specific labeling and identification requirements on the drawings in addition to these specifications.

B. Inspect labeling standards to confirm facility standards.

PART 2 PRODUCTS

2.1 NAMEPLATES AND LABELS

A. Nameplates:

1. Engraved three-layer laminated plastic, black letters on white background for normal power to match facility standard. Refer to labeling methods and standards for sizes.
2. Emergency power panels and associated equipment shall be white letters on red.

B. Locations:
1. Each electrical distribution panelboard, switchboard and power panel.
2. Each starter.
3. Each disconnect.
4. Inverters.
5. MDF/IDF frame patch panel ports.
6. Voice/data outlets.

C. Nameplate size minimum 1"x3" or match existing.
1. Match facility standards.

2.2 WIRE MARKERS

A. Manufacturers:
1. Brady or equal.

B. Description: Tape type wire markers.

C. Locations: Each conductor at panelboard gutters, pull boxes, outlet and junction boxes, and each load connection.

D. Legend:
1. Power and Lighting Circuits: Branch circuit or feeder number indicated on drawings.
2. Control Circuits: Control wire numbers.

2.3 CONDUIT MARKERS

A. Emergency raceway or specialty systems.

B. Location: Furnish stencil or painted stripe for each conduit longer than 10 feet. Stencil painted stripe shall not be less than 10" long (i.e. red or black).

C. Spacing: 20 feet on center.

D. Color:

1. 120, 208 or 480 Volt Normal Power System: Black.
2. 120, 208 or 480 volt Emergency Power Supply: Red.

E. Legend:

1. Normal Power Supply Panel Feeder: Indicate panel being fed and from where. (LPM fed from DP4)
2. Emergency Power Supply Panel Feeder: Emergency Power Supply LS, CB, EB respectively. (i.e. LSIA, CBIC, EBDP)

2.4 LABELING METHODS AND STANDARDS

A. Engraved Labels

1. All electrical panels, starters, disconnect switches, terminal cabinets, fire alarm panel, nurse call system cabinet, personnel patient TV system cabinet or similar central system cabinet shall be permanently identified using engraved labels. These labels shall be secured with double face type or mechanically fastened in applications where the tape may have a tendency to fail.

2. Normal power fed systems shall have white labels with black lettering. Emergency power fed systems shall have red labels with white lettering.

3. Lettering sizes may vary due to space constraints or to distinguish between main versus branch systems. Sizes should be consistent throughout the project, use the following guidelines:

Switchboard or Panelboard Main Label:	1” high minimum
Switchboard or Panelboard Branches	1/2" high minimum
Starters, Disconnects	1/2" high minimum
Manual Motor Starters	1/4" high minimum

4. All labels shall identify where panel or equipment is fed from. Ex (panel A fed from MDP)

B. Adhesive Tape Labels

1. All switches, receptacles, small manual motor starters or toggle switches shall have the circuit number identified on the device cover plate using clear adhesive tape labels with 1/4" high printed block characters in black. No handwritten or printed labeling will be accepted as final record, machine lettered adhesive tape labels shall be used upon project completion.

2. Provide circuit identification on junction or pull box covers for all circuits within.

3. Conductors in branch circuit panelboards shall have phase conductors, neutrals and grounds identified with adhesive labels within the panel at junction or pull boxes and at the device outlet box. Refer also to conductor color coding with respect to operating voltage.

2.5 CONDUCTOR COLOR CODING AND IDENTIFICATION

1. Feeder phase conductors shall be identified as to phase and operating voltage using colored tape as follows:

	480 Volt	120/208 Volt
Phase A	yellow	black
Phase B	brown	red
Phase C	orange	blue
Neutral	gray	white
Ground	green	green

2. Conductors from #18 up through #10 shall have colored insulating jackets to match the color code and phasing scheme as described above for feeders. Receptacle and lighting circuit conductors shall be #12 minimum for 15 or 20 amp circuits. Conductors #18 through #14 shall only be used for control circuits with colored jackets and wire numbers correlated to each system accordingly.

3. Spare conductors shall be clearly identified as such through color, labels, tags, etc.

PART 3 EXECUTION

3.1 PREPARATION

A. Degrease and clean surfaces to receive nameplates and labels.

3.2 APPLICATION

A. Install nameplate and label parallel to equipment lines.

B. Secure nameplate to equipment front using adhesive.

C. Secure nameplate to inside surface of door on panelboard that is recessed in finished locations.

D. Contractor shall review the drawings to confirm all label schemes or ID requirements listed or noted on the drawings. Review mechanical drawings for equipment ID designation to provide a ID tag that corresponds to the mechanical equipment.

E. Provide arc flash generic warning label on all electrical distribution equipment in accordance with NEC 2014 requirements.

F. Panelboard, switchboards, transformers, etc. shall include their source of power included in nameplate label. (i.e. LPA feed from PP2).

G. Provide proper signage to all solar PV equipment, disconnects, inverters, etc. to meet NEC 690.

END OF SECTION

MAI 2012-1529 SOLAR/ICE

SECTION 26 05 83

EQUIPMENT CONNECTIONS

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Mechanical equipment.

B. PV modules.

C. Inverters.

D. Data logger.

1.2 RELATED SECTIONS

A. All drawings and specification sections apply to work in this section. Furnish all items, articles, materials, equipment, operations or methods that are mentioned, listed or scheduled on drawings or are in this specification including all labor, equipment, materials and miscellaneous incidentals necessary and/or required for the completion of this project. The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.3 REFERENCES

A. NEMA WD 1 - General Purpose Wiring Devices.

B. NEMA WD 6 - Wiring Device Configurations.

C. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

1.4 COORDINATION

A. Coordinate work under provisions of Division 1.

B. Obtain and review shop drawings, product data, and manufacturer's instructions for equipment furnished under other sections.

C. Determine connection locations and requirements.

D. Sequence rough-in of electrical connections to coordinate with installation schedule for equipment.

E. Sequence electrical connections to coordinate with start-up schedule for equipment.

F. Mechanical Trades shall be responsible to furnish and install all temperature control components, associated conduit, wiring and 120 volt power supplies. Electrical Trades shall reserve 120 volt circuit breaker as scheduled in the panels for this purpose.

G. All VFD programming shall be completed as part of the Mechanical Trades work.

1.5 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.1 CORDS AND CAPS

A. Manufacturers:

1. Hubbell, Pass & Seymour, Leviton or equal.

B. Attachment Plug Construction: Conform to NEMA WD 1.

C. Configuration: NEMA WD 6; match receptacle configuration at outlet provided for equipment.

D. Cord Construction: ANSI/NFPA 70, Type SO multi-conductor flexible cord with identified equipment grounding conductor, suitable for use in damp locations.

E. Size: Suitable for connected load of equipment, length of cord, and rating of branch circuit over current protection.

PART 3 EXECUTION

3.1 EXAMINATION

A. Verify conditions under provisions of Division 1.

B. Verify that equipment is ready for electrical connection, wiring, and energization.

3.2 ELECTRICAL CONNECTIONS

A. Make electrical connections in accordance with equipment manufacturer's instructions.

B. Make conduit connections to equipment using metallic flexible conduit for all dry interior locations. Use liquid tight non-metallic flexible conduit with watertight connectors in damp or wet locations and kitchen areas.

C. Make wiring connections using wire and cable with insulation suitable for temperatures encountered in heat producing equipment.

D. Provide the NEMA configuration that matches receptacle.

E. Provide suitable strain-relief clamps and fittings for cord connections at outlet boxes and equipment connection boxes.

F. Install disconnect switches, power relays, motor starters and as noted on the drawings.

G. Provide and install fuses in mechanical trades furnished fused disconnects and combination starters per manufacturer's requirements.

H. Electrical Contractor shall complete all main power wiring to the mechanical equipment shown and noted.

I. VFD control wiring and programming shall be completed as part of the Mechanical Trades bid. VFD shall be factory installed with the equipment unless noted or specified otherwise.

B. UL 198C - High-Interrupting Capacity Fuses; Current Limiting Type.

C. UL 198E - Class R Fuses.

D. NEMA AB 1 - Molded Case Circuit Breakers.

E. NEMA ICS 2 - Industrial Control Devices, Controllers, and Assemblies.

F. NEMA ICS 2.3 - Instructions for the Handling, Installation, Operation, and Maintenance of Motor Control Centers.

1.4 SUBMITTALS

A. Provide submittal as listed in Section 26 01 00.

B. Shop Drawings: Include front and side views of enclosures with overall dimensions shown; conduit entrance locations and requirements; nameplate legends; size and number of bus bars per phase, neutral, and ground; electrical characteristics including voltage, frame size and trip ratings, withstand ratings, and time/current curves of all equipment and components.

C. Test Reports: Indicate field test and inspection procedures and test results.

D. Manufacturer's Installation Instructions: Indicate application conditions and limitations of use stipulated by Product testing agency specified under Regulatory Requirements.

Include instructions for storage, handling, protection, examination, preparation, installation, and starting of Product.

1.5 OPERATION AND MAINTENANCE DATA

A. Submit under provisions of Division 1.

B. Maintenance Data: Include spare parts data listing; source and current prices of replacement parts and supplies; and recommended maintenance procedures and intervals.

1.6 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by Underwriters Laboratories, Inc. as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.1 MOTOR CONTROL CENTER FUSING

A. As scheduled on the drawings.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install fuses in fusible switches.

B. Select and install heater elements in motor starters to match installed motor characteristics.

C. Provide engraved plastic nameplates under the provisions of Section 26 05 53.

3.2 FIELD QUALITY CONTROL

A. Field inspection and testing will be performed for proper operation.

B. Inspect and test motor control center and each controller to NEMA ICS 2.

The work covered under this section of the specifications is in no way complete within itself but is supplementary to the entire specification and drawings.

1.3 REFERENCES

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. NEMA FU 1 - Low Voltage Cartridge Fuses.

1.4 SUBMITTALS

A. Provide submittal as listed in Section 26 01 00.

B. Product Data: Provide data sheets showing electrical characteristics including time-current curves.

1.5 PROJECT RECORD DOCUMENTS

A. Record actual fuse sizes.

1.6 REGULATORY REQUIREMENTS

A. Conform to requirements of 2012 Michigan Building Code, 2014 National Electrical Code, 2014 State of Michigan Code Rules Part 8, 2003 ICC/ANSI 117.1 and local code requirements.

B. Furnish products listed and classified by UL as suitable for purpose specified and indicated.

PART 2 PRODUCTS

2.1 MANUFACTURERS

A. Bussman or equal.

2.2 FUSE REQUIREMENTS

A. Dimensions and Performance: NEMA FU 1, Class as specified or indicated.

B. Voltage: Provide fuses with voltage rating suitable for circuit phase-to-phase voltage.

C. Main Service Switches Larger than 600 amperes: Class L (time delay).

2.3 CLASS RK1 (TIME DELAY) CURRENT LIMITING FUSES

A. Manufacturers:

1. Bussman or equal.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install fuses in accordance with manufacturer's instructions.

B. Install fuse with label oriented such that manufacturer, type, and size are easily read.

C. Install spare fuse cabinet as shown on the drawing.

END OF SECTION

Importance: High

Hi All,

We had the opportunity to meet onsite this morning with our subs (LaSalle and Central Fabricators) who are involved in the pull ahead work for the week of 2/15 to review the area and discuss as a group. After reviewing the scope in depth and reviewing the existing conditions onsite a number of questions/items came up. I wanted to share those with you all and also propose a plan for us to get in there on Monday 2/8 to begin prep work on this pull ahead work so we can make sure everything goes smoothly and is complete the week of 2/15. We determined today as a group whole that if we delay the start to 2/15 there is a very good chance we won't be completed by 2/22 date for carpet installation. There is a number of items/actions that need to take place in order to have this run smoothly and I fear if we start on 2/15 we won't meet the expectations. Here is our proposed plan for review and approval: Note that we had a very quick discussion with Mike Noonan and a B&B rep about this onsite and they both seemed to believe it would be OK for us to go on Monday 2/8.

2/8
- Mobilize tools/materials onsite
- Install temp. protection, as needed
- Begin disassembly of ceiling grid (PLEASE INFROM THEM TO INSTALL NO MORE CEILING PADS. IT LOOKED TODAY AS IF THEY WERE INSTALLING IN AREAS THAT ARE GOING TO BE AFFECTED BY THIS WORK)
- Identify which electrical and mechanical components need to be disconnected and removed.
    - This could just be 1 or 2 lights or diffusers once we determine if they are within the grid area that must come down
        - Who will be disconnecting these and removing/reinstalling? Reps with B&B or SOM? We don't have provisions for this within our scope for this work
- Begin fire proofing removal
- Get 220v power installed for welder for Wednesday 2/10 (SOM to handle)

2/9
- finalize fire proofing removal
- All lighting removed
- All HVAC diffusers removed
- Confirm 220V power

2/10
- Steel sub onsite to weld stiffeners, plates, etc. (Fire HOT permit notice to be submitted by weeks end for next week's work)

2/11
- Continue with welding efforts for stiffeners, plates, etc.

2/12
- Finalize all welding efforts
- Clean up

2/15 (Monday)

- Roofing subcontractor onsite for roof penetrations and top temp. patch for water tight
- Steel subcontractor onsite to bolt on stub columns (pending stub columns are back from galvanizer)

2/16

- Continue with steel stub columns and roof patching

2/17

- Continue with steel stub columns and roof patching, if needed.
- Begin repairing all fire proofing and ceiling gird

2/18

- Continue with fire proofing patching and ceiling grid, if needed
- Reinstall lighting and mech. diffusers (B&B or SOM?)

2/19

- Final clean up and demobilization from site

You can see by the timeline above we will need every bit of 2 weeks to get this work completed now that we have all had a chance to dive in and understand what needs to happen as a group.

A couple of things we learned today and request that I wanted to make everyone aware of:

1. Harrison Rd. will be shut down completely when we do our scheduled crane picks (Dates TBD but our crane rep was onsite today to take measurements, elevations shots, etc.)
2. 220V power will be required for the welding efforts on the 7th floor and also for the welding efforts on the roof when we erect the structure so two (2) 220v access points will be needed for two (2) separate welders.
3. There are Johnson control T-stats that are mounted on the columns we need to do our work on. Can we get them disconnected and removed prior so we don't risk damaging these during the work?

Adam,
I know you scheduled a kick off meeting Thursday next week with B&B but unfortunately that will be too late in the game if we want to accomplish all this scope of work. I can make myself and our superintendent available for a phone conference tomorrow anytime or we can have a quick meeting Monday morning onsite when we kick off LaSalle with the ceiling grid/fire proof demo. Either way, I think we need to discuss in depth as a group before we go at this Monday AM.

Jan,
Can you please forward me the security clearance form that I need to submit with names, etc. since guys will, be coming into the building as early as Monday next week. I would like to get that submitted later today or first thing tomorrow.

Please let me know on this ASAP so we can plan accordingly. My cell # is below if you need to reach me today.

Thank everyone!!

Hi All,

We had the opportunity to meet onsite this morning with our subs (LaSalle and Central Fabricators) who are involved in the pull ahead work for the week of 2/15 to review the area and discuss as a group. After reviewing the scope in depth and reviewing the existing conditions onsite a number of questions/items came up. I wanted to share those with you all and also propose a plan for us to get in there on Monday 2/8 **(JAN WILL VERIFY THAT THE CONTRACTS ARE FULLY EXECUTED TOMORROW AS NO WORK CAN BEGINNING UNTIL ALL PAPER WORK IS COMPLETE)** JAN CONFIRMED CONTRACT WILL BE COMPLETED TODAY SO WE SHOULD BE ALL SET FROM MONDAY to begin prep work on this pull ahead work so we can make sure everything goes smoothly and is complete the week of 2/15. We determined today as a group whole that if we delay the start to 2/15 there is a very good chance we won't be completed by 2/22 date for carpet installation. There is a number of items/actions that need to take place in order to have this run smoothly and I fear if we start on 2/15 we won't meet the expectations. Here is our proposed plan for review and approval: Note that we had a very quick discussion with Mike Noonan **(THE SOM ELECTRICAL AND MECHANICAL TRADES WILL NEED TO BE COORIDNATED FOR THE DIFFUSER/LIGHT REMOVALS)** OK, I MENTIONED THIS TO EDDIE THIS MORNING BUT WE WILL DISCUSS FURTHER TOMORROW AM. and a B&B rep **(I WILL FOLLOW UP WITH B&B TO VERIFY THAT THEY HAVE NO ISSUES WITH AN EARLIER START DATE)** OK about this onsite and they both seemed to believe it would be OK for us to go on Monday 2/8.

2/8

- Mobilize tools/materials onsite **(THIS WILL NEED TO BE COORDINATED WITH B&B (AND BOD) TO VERIFY THAT NOTHING IS IN THERE WAY OF COMPLETING THEIR WORK)** OK
- Install temp. protection, as needed **(THIS WILL NEED TO BE COORDINATED WITH B&B (AND BOD) TO VERIFY THAT NOTHING IS IN THERE WAY OF COMPLETING THEIR WORK)** OK
- Begin disassembly of ceiling grid (PLEASE INFROM THEM TO INSTALL NO MORE CEILING PADS. IT LOOKED TODAY AS IF THEY WERE INSTALLING IN AREAS THAT ARE GOING TO BE AFFECTED BY THIS WORK) **THE CEILING GRID IS NOT A STANDARD CEILING GRID AND HAS INTEGRAL LOW VOLTAGE WIRING RUNNING THROUGH IT AND CAN NOT SIMPLY BE DISASSEMBLED – I BELIEVE THE INTENT WAS FOR IT TO REMAIN IN PLACE? ALSO, ROD SENT YOU CLARIFICATION ON THE PADS THAT B&B WERE DIRECTED NOT TO INSTALL** THE INTENT WAS ALWAYS TO DISASSEMBLE TO SOME DEGREE, KIM STEVENS DIFRECTED US ON THAT IN THE BEGINNING. WE WILL LOOK AT THIS FURTHER TOMORROW BUT I WOULD LIKE TO REQUEST TO PRODUT DATA INFO ON THIS GRID SYSTEM FROM WTA SO OUR CARPENTERS CAN REVIEW AND BE PREPARED FOR WHAT IT TAKES TO TAKE DOWN AND REINSTALL.
- Identify which electrical and mechanical components need to be disconnected and removed.
    - This could just be 1 or 2 lights or diffusers once we determine if they are within the grid area that must come down
- Who will be disconnecting these and removing/reinstalling? Reps with B&B or SOM? We don't have provisions for this within our scope for this work **THIS WILL BE SOM AND THIS WILL NEED TO BE COMMUNICATED TO BOD'S TRADES ON THE SPECIFIC ITEMS FOR DISCONNECTION/REMOVAL** OK
    -
- Begin fire proofing removal
- Get 220v power installed for welder for Wednesday 2/10 (SOM to handle) **VERIFY SOM BOD HAS IN PROCESS** OK, WILL CONFIRM WITH EDDIE AND BRIAN TOMORROW WHEN ONSITE

2/9

- finalize fire proofing removal
- All lighting removed **COORDINATE WITH BOD** OK
- All HVAC diffusers removed **COORDINATE WITH BOD** OK
- Confirm 220V power

2/10

- Steel sub onsite to weld stiffeners, plates, etc. (Fire HOT permit notice to be submitted by weeks end for next week's work) **ANY PROVISIONS POSSIBLE SHOULD BE TAKE TO MINIMIZE OR ELIMINATE ODOR FROM THIS WORK DURING WORKING HOURS** UNDERSTOOD. SMOKE HEATERS WILL BE PRESENT AND WE ALSO HAVE

DISCUSSED OTHER OPTIONS WITH VISQUEENING AREA OFF AND POTENTIALLY USING NEGATIVE AIR MACHINES. WILL DISCUSS FURTHER ONSITE TOMORROW AS A GROUP

2/11

- Continue with welding efforts for stiffeners, plates, etc. **ANY PROVISIONS POSSIBLE SHOULD BE TAKE TO MINIMIZE OR ELIMINATE ODOR FROM THIS WORK DURING WORKING HOURS** OK

2/12

- Finalize all welding efforts **ANY PROVISIONS POSSIBLE SHOULD BE TAKE TO MINIMIZE OR ELIMINATE ODOR FROM THIS WORK DURING WORKING HOURS** OK
- Clean up

2/15 (Monday)

- Roofing subcontractor onsite for roof penetrations and top temp. patch for water tight
- Steel subcontractor onsite to bolt on stub columns (pending stub columns are back from galvanizer)

2/16

- Continue with steel stub columns and roof patching

2/17

- Continue with steel stub columns and roof patching, if needed.
- Begin repairing all fire proofing and ceiling gird

2/18

- Continue with fire proofing patching and ceiling grid, if needed
- Reinstall lighting and mech. diffusers (B&B or SOM?)

2/19

- Final clean up and demobilization from site

You can see by the timeline above we will need every bit of 2 weeks to get this work completed now that we have all had a chance to dive in and understand what needs to happen as a group. **I WILL HAVE TO ADMIT THAT THIS SCHEDULE IS A BIT OF A SURPRISE TO ME AS WE WERE PLANNING TO START ON 2/15/16. TOMORROW, I WILL ATTEMPT TO VERIFY WITH ALL PARTY'S THE ACCEPTABILITY OF THIS PLAN.** AS DISCUSSED ON THE PHONE. THIS IS JUST A PROPOSED SCHEDULED. SOM/DTMB RESERVES THE RIGHT TO REJECT AND MODIFY BUT I HAVE CONCERNS WITH THE AMOUNT OF SCOPE INVOLVED IN THE SHORT AMOUNT OF TIME IF THE ABOVE IS NOT APPROVED. CAN DISCUSS FURTHER ONSITE TOMORROW.

A couple of things we learned today and request that I wanted to make everyone aware of:

1. Harrison Rd. will be shut down completely when we do our scheduled crane picks (Dates TBD but our crane rep was onsite today to take measurements, elevations shots, etc.) **WHEN ARE YOU PLANNING ON THIS HAPPENING? B&B HAS TWO LOCATIONS ON THE EXTERIOR OF THE BUILDING TO INSTALL AND WE NEED TO INSURE THAT YOU BOTH ARE NOT IN EACH OTHERS WAY.** TBD ON CRANE PICK WEEKENDS. WE NEED TO PIN DOWN LEAD TIMES ON ALL MATERIALS STILL BEFORE THIS CAN BE CORDINATED BUT I AM THINKING THERE COULD BE UP TO FOUR (4) SEPARATE ROAD CLOSURS AND CRANE PICKS – 1. ROOFING MATERIAL/EQUIPMENT 2. STEEL MATERIAL AND EQUIPMENT 3. MECHANICAL ICE STORAGE TANKS/EQUIPMENT 4. ELECTRICAL SOLAR PANEL MATERIAL/EQUIPMENT. THIS IS STILL A MOVING TARGET WITH OUR SUBS BUT WE ARE GOING TO DISCUSS WITH THEM OPTIONS ON HOW WE CAN POTENTIALLY PARTNER UP WITH CRANE PICKS SO WE ONLY HAVE TO DO IT TWICE IN LIEU OF FOUR (4) DIFFERENT TIMES, IF POSSIBLE
2. 220V power will be required for the welding efforts on the 7th floor and also for the welding efforts on the roof when we erect the structure so two (2) 220v access points will be needed for two (2) separate welders. **HAS THIS BEEN COORDINATED WITH BOD OR ARE THESE BLUE SPADER'S EFFORTS?** DISCUSSED WITH BOD THIS MORNING AND IS IN PROCESS
3. There are Johnson control T-stats that are mounted on the columns we need to do our work on. Can we get them disconnected and removed prior so we don't risk damaging these during the work? **NEEDS TO BE REVIEWED WITH BOD AND B&B.** OK, THIS ISN'T CRITICAL IF IT CAN'T HAPPEN BUT I THINK IT WOULD BE IN THE BEST INTEREST OF ALL PARTIES

Adam,
I know you scheduled a kick off meeting Thursday next week with B&B but unfortunately that will be too late in the game if we want to accomplish all this scope of work. I can make myself and our superintendent available for a phone conference tomorrow anytime or we can have a quick meeting Monday morning onsite when we kick off LaSalle with the ceiling grid/fire proof demo. Either way, I think we need to discuss in depth as a group before we go at this Monday AM. **I PLAN ON BEING ONSITE TOMORROW TO GO OVER THE SITE CONDITIONS/COORDINATION. IF AT ALL POSSIBLE, IT WOULD ALSO BE GOOD TO HAVE YOU AND SOMEONE FROM WTA ONSITE TO DISCUSS.** SCHEDULED TO BE THERE AT 8:30AM

Jan,
Can you please forward me the security clearance form that I need to submit with names, etc. since guys will, be coming into the building as early as Monday next week. I would like to get that submitted later today or first thing tomorrow.

Please let me know on this ASAP so we can plan accordingly. My cell # is below if you need to reach me today. **LEFT YOU A VOICEMAIL**

ALSO, I BELIEVE THAT WE NEED TO RESOLVE THE CREDIT FOR THE PAINTING OF THE STEEL AND COSTS FOR GALVANIZING AND SHOULD BE DONE PRIOR TO STARTING THE WORK. HAVE YOU SUBMITTED SHOP SUBMITTALS ON WHAT YOU ARE PLANNING ON USING FOR FIRE-PROOFING? PLEASE REMEMBER THAT NOT ONLY DO WE NEED THE SHOP SUBMITTALS, BUT BOD NEEDS ALL SDS SHEETS SUBMITTED PRIOR TO BRINGING MATERIALS ONSITE. STEEL SUB INFORMED ME THIS MORNING THAT IT IS ROUGHLY AN ADD OF $1,500.00 TO GO TO GALVANIZING ONCE THE CREDIT IT APPLIED FROM THE EPOXY PAINT. I HAVE REQUESTED THIS FROM HIM IN WRITING AND WILL FORWARD ONCE I RECEIVE. SUBMITTALS HAVE NOT BEEN SUBMITTED YET FOR FIRE PROOFING. WE WILL BE USING RUSSEL PLASTERING AND WILL FORWARD SUBMITTAL FOR REVIEW. UNDERSTOOD ON SDS SHEETS. WE WILL HAVE A COMPLETE SET OF ALL SDS SHEETS ONSITE AT ALL TIME

PLEASE REVIEW AND LET ME KNOW IF YOU HAVE ANY QUESTIONS. IF ANYONE ELSE HAS ANYTHING TO OFFER, PLEASE CHIME IN.

THANKS FOR PROVIDING A DETAILED PLAN FOR OUR REVIEW.

Thank everyone!!

Micro-Lok® *HP*

High Performance
Fiber Glass Pipe Insulation

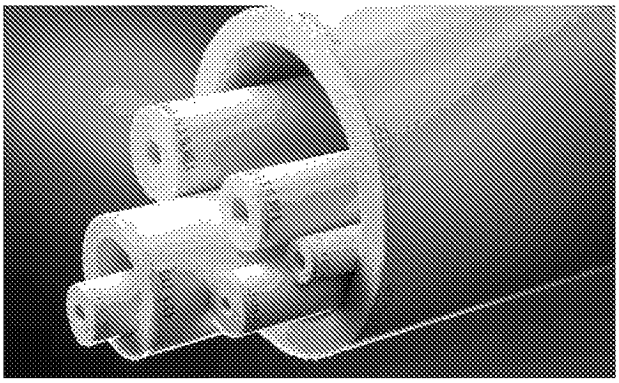
Description

Micro-Lok *HP* Fiber Glass Pipe Insulation is a high performance insulation made from rotary glass fibers bonded with a thermo-setting resin and produced in 36" (0.92 m) lengths. Micro-Lok *HP* is used to insulate standard iron pipe and copper tubing. The 3-foot (0.92 m) sections are available plain or with a factory-applied vapor-barrier jacket. The all-service (ASJ) vapor-retarder jacket includes a longitudinal, self-sealing closure lap. The jacket system is adhered to each fiber glass section using a specially formulated adhesive to ensure jacket securement. A latex paint may be applied to the Micro-Lok *HP* jacket after installation.

The factory-installed tape system permits installation at ambient temperatures down to 20°F (-7°C), and will not soften or separate when exposed to high ambient temperatures and humidity.

Uses

Micro-Lok *HP* fiber glass pipe insulation is suitable for installation over hot, cold, concealed and exposed piping systems with operating temperatures up to 850°F (454°C). Weather-protective jacketing is required for outdoor applications. Pipes operating below ambient temperatures require all joints to be sealed with the factory-applied, self-seal lap and butt strips.



Operating Temperature Limits: 0°F to 850°F (-18°C to 454°C)

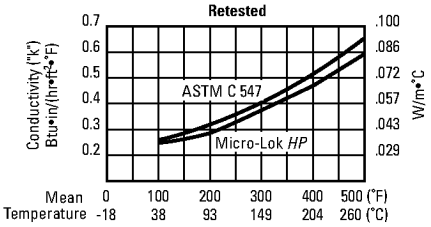
Specification Compliance

- ASTM C 547 Type I (Replaces HH-I-558B, Form D, Type III, Class 12, Class 13 up to 850°F [454°C])
- ASTM C 585 – Dimension Standard
- ASTM C 1136 (Jacketing) (Replaces HH-B-100B, Type I & II)
- MIL-I-22344D
- NRC 1.36, ASTM C 795, MIL-I-24244C
- Coast Guard/IMO Approved 164.109/56/0 (plain, unjacketed only – excluding ⅛ x ½ [22 mm x 13 mm], ½ x ½ [13 mm x 13 mm])
- New York City MEA # 330-85-M
- California Bureau of Home Furnishings and Thermal Insulation – Registry Number CA-T040 (CO)

Physical Properties

Service Temp. Range (ASTM C 411)	0°F to 850°F (-18°C to 454°C)
Moisture Sorption	<5% by weight
Alkalinity	<0.6% expressed as Na_2O
Corrosivity (ASTM C 665)	Does not accelerate
Capillarity	Negligible (after 24 hours)
Shrinkage (ASTM C 356)	None
Microbial Growth (ASTM C 1338)	Does not promote microbial growth
Surface Burning Characteristics	Composite FHC 25/50 per ASTM E 84, NFPA 255, CAN/ULC S102-M88
Limited Combustibility	NFPA 259
Jacketing	ASTM C 1136 (Type I)
Water Vapor Permeance (ASTM E 96 - Procedure A)	.02 perms max.
Burst Strength (ASTM D 774)	50 Beach Units (1.5 Joules min.)
Tensile Strength (ASTM D 828)	45 lbs./in. (7.9N/mm) width min. (MD) 30 lbs./in. (5.23N/mm) width min. (CD)

Thermal Conductivity ("k")



Green Building Attributes

Manufacturing Location	Defiance, Ohio (43512)	
Recycled Content	25%	
Volatile Organic Compounds (ASTM D 5116) (Analysis ASTM D 6196 & ASTM D 5197)	Total	0.15 g/l
Fiber Glass Pipe Insulation	Formaldehyde	0.009 ppm
	Aldehydes	0.009 ppm
Volatile Organic Compounds (Calculated)	Total	<49 g/l
Self-Sealing Lap & Butt Strips		

Green Building Certifications

GREENGUARD®	
• Indoor Air Quality	Certified
• Children and Schools	Certified
LEED® Credits LEED-NC	See JM.com/buildgreen JM LEED Credit Guide (HIG-1231)

GREENGUARD® certification is not intended for residential environments. Instead, the certification is intended only for buildings meeting ASHRAE 62.1-2007 commercial building ventilation rates. This certification is proof that the product meets the GREENGUARD Environmental Institute's indoor air quality standards and product emission standards for VOCs.

Notes:

[1] 2½" and 23" IPS not available in this insulation thickness.

[2] 22" and 23" IPS not available in this insulation thickness.

[3] 21", 22" and 23" IPS not available in this insulation thickness.

[4] 19" IPS not available in this insulation thickness.

[5] 3⅝" CTS not available in this insulation thickness.

Qualifications for Use

A sufficient thickness of insulation must be used to keep the maximum surface temperature of Micro-Lok *HP* below 150°F (66°C). In addition, at operating temperatures above 500°F (260°C), Micro-Lok *HP* pipe insulation must be applied in a thickness ranging from 2" (51 mm) minimum to 6" (152 mm) maximum.

During initial heat-up to operating temperatures above 350°F (177°C), an acrid odor and some smoke may be given off as the organic binders used in the fiber glass pipe insulation begin to decompose. When this occurs, caution should be exercised to ventilate the area well. This loss of binder does not directly affect the thermal performance of the pipe insulation, but the compressive strength and resiliency of the product are reduced. For applications with excessive physical abuse or vibration at high temperatures, consult your local Insulation Systems Market Development Manager for alternate material recommendations.

Chilled Water Systems

For chilled water systems, see Zeston® PVC Fitting Covers Brochure, CI-26.

Application Recommendations.*
Micro-Lok *HP* Pipe Insulation and Butt Strips.

1. Do not apply Micro-Lok *HP* if air temperature is below 20°F (-7°C) or above 130°F (54°C) due to the effect of temperature on tape performance. We recommend stapling when application falls outside this temperature range.

When stapling, we recommend mastic be applied over staples to prevent moisture penetration.

2. If stored below 20°F (-7°C) or above 130°F (54°C), insulation cartons should stand within the recommended temperature range for 24 hours prior to application.

3. Once release paper is removed, both adhesive and lap must be kept free of dirt and water, and the lap sealed immediately.

4. When adhered, the lap and butt strips must be pressurized by rubbing firmly with a plastic squeegee or the back of a knife blade to ensure positive closure.

* For complete application recommendations and installation instructions, see CI-32 brochure.

Earthwool™ 1000° Pipe Insulation

Submittal Date _____

Description

Knauf Insulation Earthwool™ 1000° Pipe Insulation is a molded, heavy-density, one-piece insulation made from inorganic glass fibers bonded with ECOSE® Technology. It is produced in 3' lengths with or without a factory-applied jacket.

ASJ+ is the newest generation all-service jacket composed of aluminum foil, reinforced with a glass scrim bonded to a kraft paper interleaving with an outer film layer leaving no paper exposed. A matching ASJ+ butt strip is furnished in the carton for each section. The jacket is white, and the longitudinal lap of the jacket has a self-sealing adhesive. The SSL+ Advanced Closure System creates a strong and lasting bond.

Earthwool

Earthwool is the new benchmark that stands apart for its genuine sustainability, unsurpassed performance and consistently high product quality.

ECOSE Technology

ECOSE Technology is a revolutionary binder based on rapidly renewable bio-based materials rather than non-renewable petroleum-based chemicals such as phenol, formaldehyde or acrylics. ECOSE Technology reduces Knauf Insulation's binder embodied energy and contains no phenol, formaldehyde, acrylics or artificial colors found in traditional fiber glass insulation.

Application

Earthwool 1000° Pipe Insulation is used to insulate iron and copper piping in industrial applications and in commercial and institutional buildings. Earthwool 1000° Pipe Insulation is suitable for hot, cold, concealed and exposed piping systems operating at temperatures from 0°F-1000°F (-18°C to 538°C). Additional weather protection is needed outdoors.

Features and Benefits

Energy Conservation

- Offers excellent resistance to heat loss or gain, which saves energy and lowers operating costs.
- A low thermal conductivity of .23 at 75°F (24°C).

Low-Cost Installation

- Available with self-sealing lap, which eliminates need for staples, additional material and tools.
- Fast, easy installation reduces labor costs.

Condensation Control

- Installed properly, the foil vapor retarder and pressure-sensitive lap assure a positive vapor seal.

UL Classified

- All Earthwool 1000° Pipe Insulation, plain or jacketed, meets the fire and smoke safety requirements of most federal, state and local building codes.

Easy Size Identification

- Pipe size, wall thickness and Proto 25/50 rated PVC fitting cover size are printed in a repeat pattern along the longitudinal lap.
- Easy identification at job site.
- Simplifies restocking.

ASJ+ SSL+

- Professional finished appearance — dimple and wrinkle resistant.
- Cleanable with a wet cloth and soapy water.
- Moisture resistant to intermittent, short duration liquid water exposure, such as precipitation during construction phase.
- ASJ+ has substantially less degradation and discoloration when exposed to UV.
- ASJ+ meets ASTM C1136 Type I, II, III, IV, and meets VIII based on the 85% better puncture resistance of ASJ+ (Mullen Burst).
- The SSL+ Advanced Closure System creates a strong and lasting bond.

Indoor Air Quality

- Certified for indoor air quality as a low emitting product by The GREENGUARD Environmental Institute to both the GREENGUARD Indoor Air Quality Certification Program℠ and the more stringent GREENGUARD Children and Schools standard and is verified to be formaldehyde free.

Sustainability

- Carbon negative: meaning Knauf Insulation products used for thermal insulating purposes recover the energy that it took to make them in just hours or a few days, depending on the application. Once installed, the product continues to save energy and reduce carbon generation as long as it is in place.
- Earthwool fiber glass insulation contains three primary ingredients:
- Sand, one of the world's most abundant and renewable resources
- A minimum 60% recycled post-consumer glass content and UL Environment verification every 6 months
- ECOSE Technology which reduces binder embodied energy by up to 70%
- It is anticipated to reduce its Global Warming Potential (GWP) by approximately 4%, a significant reduction in our carbon footprint

Specification Compliance

In U.S.:

- ASTM C 547; Type I, Type IV
- ASTM C 585
- ASTM C 795
- ASTM C 1136 (jackets); Type I, II, III, IV,VIII
- HH-I-558C; Form D, Type III, Class 12; Class 13 (to 1000°F, 538°C)
- GREENGUARD Certification
- GREENGUARD Children & Schools℠ Certification
- NFPA 90A and 90B
- MIL-I-PRF-22344E (except pH requirements)
- MIL-I-24244D
- NRC Reg. Guide 1.36 (certification needs to be specified at time of order)
- This product complies with Oregon Revised Statue 453.085 and contains less than 0.10% decabromdiphenyl ether (DecaBDE) by mass.

In Canada:

- CAN/ULC S102-M88
- CCG F1-304 (plain only)
- CGSB 51-GP-9M
- CGSB 51-GP-52M (jacket)

Technical Data - Earthwool 1000° Pipe Insulation

Surface Burning Characteristics

- UL Classified.
- Does not exceed 25 Flame Spread, 50 Smoke Developed when tested in accordance with ASTM E 84, CAN/ULC S102-M88, NFPA 255 and UL 723.

Temperature Range

- Pipe operating temperatures from 0°F to 1000°F (-18°C to 538°C) at a maximum recommended thickness of 6".

Corrosiveness (ASTM C 665)

- Does not accelerate corrosion on steel, copper or aluminum.

Corrosion (ASTM C 1617)

- The corrosion rate in mils/yr will not exceed that of 1 ppm chloride solution.

Microbial Growth (ASTM C 1338)

- Does not promote microbial growth.

Water Vapor Sorption (ASTM C 1104)

- Less than 0.2% by volume.

Linear Shrinkage (ASTM C 356)

- Negligible.

Technical Data - ASJ+

Surface Burning Characteristics

- UL Classified.
- Does not exceed 25 Flame Spread, 50 Smoke Developed when tested in accordance with ASTM E 84, CAN/ULC S102-M88, NFPA 255 and UL 723.

Specification Compliance

- ASTM C 1136 (jackets); Type I, II, III, IV, VIII

Water Vapor Transmission (ASTM E 96, Procedure A)

- Jacket has a water vapor permeance of .02 perms or less.

Water Vapor Sorption (ASTM C 1104)

- Less than 0.2% by volume.

Product Forms and Sizes

Produced in 3' (914 mm) sections:

- For iron pipe from ½" to 24" nominal pipe size (15 mm to 610 mm).
- For copper tube from ⅝" to 6 ⅛" (16 mm to 156 mm).
- Wall thicknesses from ½" to 6" (13 mm to 152 mm) in single layer (for most sizes).
- All insulation inner and outer diameters comply with ASTM C 585.

Packaging

- Four convenient carton sizes for easy ordering, inventory tracking and storage.
- Reinforced carton handles for strength and easy lifting.
- Bar-coded cartons for accurate shipments and tracking.
- Full product range stocked at distributors for fast availability.

Precautions

Hot Pipe

- May be installed while the system is in operation, at all temperatures up to 1000°F (538°C).
- Knauf Insulation recommends, for insulation thicknesses greater than 6" (152 mm) the temperature must be increased from 500°F (260°C) to maximum temperature at a rate not exceeding 100°F (56°C) per hour.

© 2012 Knauf Insulation GmbH.

Earthwool 1000° Pipe Insulation

Submittal Date _____

- During initial heat-up to operating temperatures above 350°F (177°C), a slight odor and some smoke may be given off as a portion of the bonding material used in the insulation begins to undergo a controlled decomposition.
- If natural convection is not adequate in confined areas, forced ventilation should be provided in order to protect against any harmful fumes and vapors that might be generated.
- Care must also be taken when using sealants, solvents or flammable adhesive during installation.
- A maximum of 6" (152 mm) wall thickness is recommended.

Cold Pipe

- Use a continuous vapor retarder on piping operating below ambient temperatures.
- Seal all joints, surfaces, seams and fittings to prevent condensation.
- On below freezing applications, and in high-abuse areas, the ASJ+ jacket shall be protected with a PVC vapor retarding outer jacket. In addition, exposed ends of insulation shall be sealed with vapor barrier mastic installed per the mastic manufacturer's instructions. Vapor seals at butt joints shall be applied at every fourth pipe section joint and at each fitting to isolate any water incursion.
- On chilled water systems operating in high humidity conditions, it is recommended that the same guidelines be followed as listed above for below freezing applications.
- Exterior hanger supports are recommended.

Outside Application

- Do not expose pipe insulation to weather. It must be covered with appropriate jacketing, mastic or vapor retardant adhesives.
- All exposed surfaces must be protected. Proto® Indoor/Outdoor PVC Jacketing is recommended. See Knauf Insulaiton Guide Specifications for recommended PVC jacketing application guidelines.
- Apply jacketing, mastics or vapor retardant adhesives per manufacturer's instructions.

For metallic jackets, factory-applied condensate retarders are recommended.

ASJ+ SSL+

- Keep adhesive and contact surfaces free from dirt and water, and seal immediately once adhesive is exposed.
- Apply when ambient and insulation temperatures are between 20°F and 130°F (-6.7°C and 54°C).
- If stored below 20°F or above 130°F, allow insulation cartons to stand within recommended temperature range for 24 hours prior to application.
- Do not store product below -20°F (-29°C) or above 150°F (66°C).
- When using Knauf Insulation's SSL+ Advance Closure System, make sure the longitudinal and circumferential joints are properly sealed by rubbing the closure firmly with a squeegee. Use of staples is not recommended.
- When using Earthwool 1000° Pipe Insulation, the surface temperature of the insulation should be between -20°F and 150°F (-29°C and 66°C) during the life of the insulation.

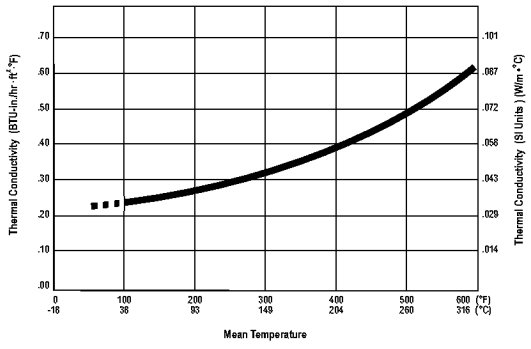
Fittings and Hangers

- Use Proto 25/50 Rated (ASTM E 84) PVC Fitting Covers, applying PVC fittings per Proto's Data Sheet.
- Fittings should be insulated to same thickness as the adjoining insulation.
- Apply fittings per manufacturer's instructions.
- When required by specification, a hard insert of sufficient length should be used to avoid compression of the insulation.

Additional Precautions

Fiber glass may cause temporary skin irritation. Wear long-sleeved, loose-fitting clothing, head covering, gloves and eye protection when handling and applying material. Wash with soap and warm water after handling. Wash work clothes separately and rinse washer. Use a disposable mask/respirator designed for nuisance-type dusts where sensitivity to dust and airborne particles may cause irritation to the nose or throat.

Thermal Efficiency (ASTM C 335)



Mean Temperature	k	k (SI)
75°F (24°C)	.23	.033
100°F (38°C)	.24	.035
200°F (93°C)	.28	.040
300°F (149°C)	.34	.049
400°F (204°C)	.42	.061
500°F (260°C)	.51	.074
600°F (316°C)	.62	.089

Application Guidelines

Storage

- Protect insulation from water damage or other abuse, welding sparks and open flame.
- Cartons are not designed for outside storage.

Preparation

- Apply only on clean, dry surfaces.
- Pipe or vessel should be tested and released before insulation is applied.

General Guidelines

- All sections should be firmly butted.
- Seal circumferential joint with a minimum 3" (76 mm) wide butt strip.
- Jackets, coating and adhesives should have a comparable F.H.C. rating.
- ASJ+ may be painted. As with traditional ASJ, Knauf Insulation does not encourage the painting of ASJ+ because the application of any paint may change the surface burning characteristics and will void the UL Classification and Knauf Insulation Limited Warranty. Where painting is necessary use common water, oil, or solvent-based paints. All paints should be tested for compatibility and adhesion before use.
- All piping should have continuous insulation.
- Position longitudinal lap downward to avoid dirt and moisture infiltration.
- Do not expose pipe insulation to excessive vibration or physical abuse.
- Faced insulation should not have a facing temperature above 150°F (66°C).

Recommended Thicknesses (ASHRAE 90.1-2010)

The minimum thicknesses are based on ASHRAE 90.1-2010 standards and do not necessarily represent the Economic Thickness of Insulation or the thickness required for proper condensation control. Rather, they serve as minimum recommendations for commercial applications. For recommended Economic Thickness, install according to Knauf Insulation or NAIMA 3E programs or as specified.

Fiber Glass and Mold

Fiber glass insulation will not sustain mold growth. However, mold can grow on almost any material when it becomes wet and contaminated. Carefully inspect any insulation that has been exposed to water. If it shows any sign of mold it must be discarded. If the material is wet but shows no evidence of mold, it should be dried rapidly and thoroughly. If it shows signs of facing degradation from wetting, it should be replaced.

Notes

The chemical and physical properties of Knauf Insulation Earthwool 1000° Pipe Insulation represent typical average values determined in accordance with accepted test methods. The data is subject to normal manufacturing variations. The data is supplied as a technical service and is subject to change without notice. References to numerical flame spread ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions. Check with your Knauf Insulation sales representative to assure information is current.

Johns Manville

Zeston® 2000 PVC

Insulated Fitting Covers and Jacketing

Description

Zeston 2000 fitting covers are designed to insulate and to provide a protective covering for pipe fittings. The fitting covers are supplied with Hi-Lo® Temp formaldehyde-free fiber glass insulation inserts from the factory. Zeston PVC jacketing provides a protective covering for insulated or bare pipes. Zeston 2000 PVC fitting covers and jacketing are manufactured from high-impact, gloss white, UV-resistant, polyvinyl chloride which provides a simple, quickly installed system.

Available Shapes and Sizes

Fitting Covers. Zeston 2000 Series PVC fitting covers are available for the following: 45° and 90° (0.8 and 1.6 rad.) short and long radius elbows, tees and valves, flanges, reducers, end caps, soil pipe hubs, traps and mechanical groove-type fittings.

Jacketing. Zeston PVC jacketing is available in rolls in thicknesses of 10, 15, 20 and 30 mil (0.3, 0.4, 0.5 and 0.8 mm).

Cut & Curled™ Jacketing. Zeston PVC Cut & Curled jacketing is available in thicknesses of 20 or 30 mil (0.5 mm or 0.8 mm) (30 mil [0.8 mm] recommended for outdoor applications). It is available in factory-cut sizes to fit up to 30" (762 mm) O.D. All sections of Zeston PVC Cut & Curled jacketing are 48" (1219 mm) in length and are factory curled to fit snugly.

Uses

Zeston 2000 PVC fitting covers and jacketing are ideally suited for indoor or outdoor use on chilled water, hot water, steam and other piping systems in commercial, institutional, and industrial applications. The fitting covers, when combined with Zeston PVC jacketing and Perma-Weld® solvent welding adhesive, form a completely sealed system which meets the requirements of the USDA and FDA for applications in food, beverage, and pharmaceutical facilities.

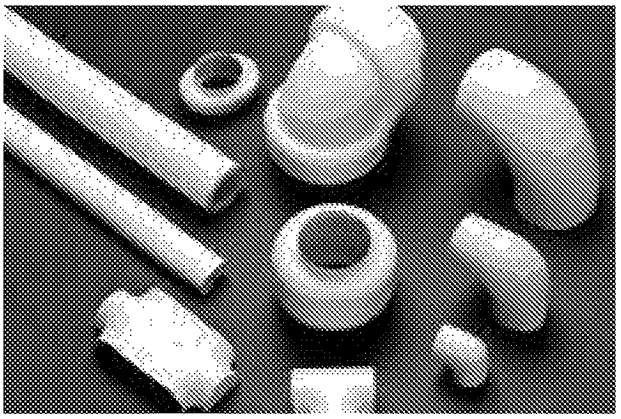
Qualifications for Use

Hot Systems

- PVC covers must be kept below 150°F (66°C) by use of proper insulation thickness.
- PVC covers should be kept away from contact with, or exposure to, sources of direct or radiated heat.
- For fittings where operating temperatures exceed 250°F (121°C), or where pipe insulation thickness is greater than 1½" (38 mm), two or more layers of Hi-Lo Temp insulation inserts are required beneath fitting cover.

Cold Systems

- An approved vapor retarder mastic compatible with PVC must be applied between pipe insulation and fitting cover, and on fitting cover throat overlap seam.
- For fittings where operating temperature is below 45°F (7°C) or where the pipe insulation thickness is greater than 1½" (38 mm), two or more layers of Hi-Lo Temp insulation inserts are required beneath fitting cover.



Operating Temperature Limits:
PVC: Up to 150°F (66°C)
Insert: 0°F to 450°F (-18°C to +232°C)
Flame Spread: 25 or less (up to 30 mil [0.8 mm])
Smoke Developed: 50 or less (up to 30 mil [0.8 mm])
Grade: Weatherable
Color: White
Finish: Gloss

Refrigerant Systems and Cold Systems in Severe Ambient Conditions

- Mitered pipe insulation segments. Fabricated or premolded insulation shapes may be used in lieu of Hi-Lo Temp insulation inserts.
- An intermediate vapor retarder compatible with PVC is required to completely seal the insulation prior to installing the Zeston 2000 PVC fitting cover. Care should be taken to ensure that the vapor barrier mastic is applied between the pipe insulation and the fitting cover, and on fitting cover throat overlap seam.

Totally Sealed Systems (USDA Approval)

- System requires that 20 or 30 mil (0.5 mm or 0.8 mm) Zeston PVC jacketing is applied to pipe insulation in conjunction with Zeston PVC fitting covers.
- All circumferential and longitudinal seams of jackets and fitting covers should be sealed with Zeston Perma-Weld solvent welding adhesive. Circumferential seams should be a minimum 1" (25 mm) overlap, and longitudinal seams should be 1½" to 2" (38 mm to 51 mm) overlap.
- Upon completion, all seams should visually be checked for seal and touched up, if necessary.
- Slip joints are required periodically between fixed supports and on continuous long runs of straight piping. Slip joints are achieved by increasing circumferential overlap to 8 to 10 inches (203 mm to 254 mm) and applying a flexible white caulking in the overlap area to maintain a sealed system.

Zeston® 2000 PVC

ITW Insulation Systems

PABCO - CHILDERS METALS

(SURE-FIT) (ELL-JACS)

ALUMINUM ELBOW COVERS

DESCRIPTION

ITW Insulation Systems Aluminum Sure-Fit (Pabco) or Ell-Jacs® (Childers) Insulation Fitting Covers are made in two precision formed matching halves and are sized to cover and weatherproof insulated 90° and 45° elbows along pipelines. They are manufactured from 1100 Aluminum alloy in .024" thickness. A moisture retarder coating is applied to the interior for resistance to electrolytic degradation, and a clear coating is applied to the exterior for corrosion protection.

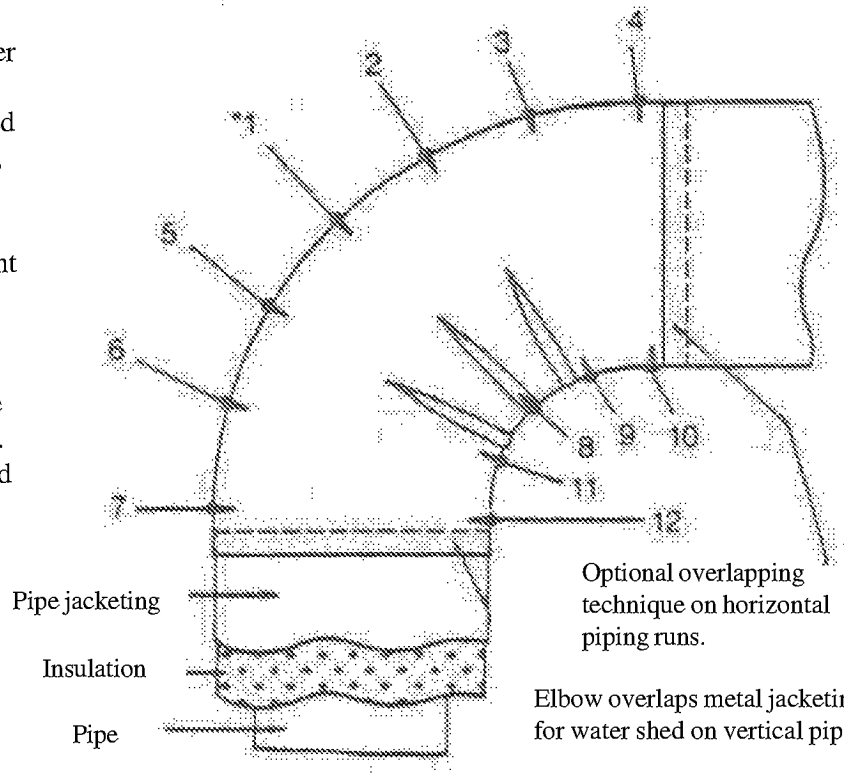
They can be used on long and short radius, butt weld, socket weld, and screwed pipe elbows from 1/2" to 12" Iron Pipe Size, inclusive. These insulation covers are also available in colors to harmonize with painted aluminum jacketing.

When ordering, long radius, short radius, 90° or 45° must be specified.

APPLICATION INSTRUCTIONS

ITW Elbow covers are made in two matching halves, and are applied over or under pipeline jacketing to shed water. The product should be applied using screws or rivets for hot piping, or strapping in conjunction with a vapor barrier for cold piping. Overlaps should be caulked with joint sealants.

The number of stainless steel screws (or rivets) are determined by the size of the elbow. Space screws 3" apart. The first screw on the elbow heel and throat must be started in the middle. Then, work from the center to the ends. Additional strapping at the ends is optional.



Note: See the O.D. chart on reverse side providing information on the maximum O.D. ITW's elbows will fit after allowing for a 7/16" overlap. There is an allowance for insulation that is oversized when measured against Table 3-A, ASTM C-585 designation.

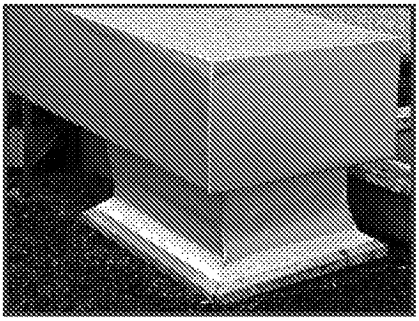
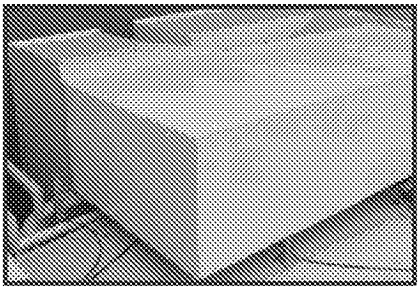
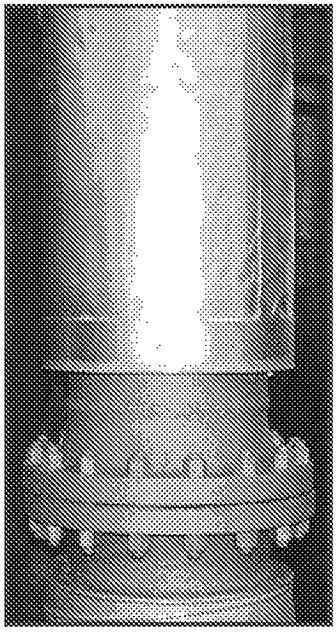
VentureClad™ Plus

JACKETING SYSTEM







VentureClad™ Plus (VentureClad™ 1579CW®) is a patented, zero permeability, absolute weather and vapor barrier for insulation cladding and jacketing applications. A 13-ply, self adhesive material is as tough as metal jacketing materials but installs quickly and easily with no special tools required.

VentureClad™ Plus exceeds most building code requirements and can be used for new construction as well as repair on existing structures.

Available in natural aluminum, white, and stucco embossed texture, both with and without adhesive, VentureClad™ Plus is the highest performing, highest value product on the market today.

FEATURES & BENEFITS

- *Flexible, strong, fabric reinforced insulation cladding product combines vapor barrier function with heavy-duty all weather mechanical protection*
- *Ultra high performance jacketing product performs well over a wide temperature range; -30°F to +300°F (-34°C to +149°C) service temperature*
- *Venture CW® cold weather acrylic adhesive applies easily at temperatures as cold as -10°F (-23°C)*
- *Zero permeability, absolute vapor barrier*
- *High puncture and tear resistance*
- *Contains tested and approved mold inhibiting agents*
- *Self adhesive material installs easily with no off-site fabrication required*
- *Ideal for use over all types of insulation materials including fiberglass, mineral wool, calcium silicate, perlite, urethane and polystyrene*
- *Exceeds standard exterior building design requirements (UL 723 50/75 Flame Spread/Smoke Rating)*

PRODUCT CONFIGURATIONS

- *Available in Natural Aluminum (1579CW®), Natural Aluminum Stucco Embossed (1579CW® - E), and White (1579CW® - W)*
- *Also available without adhesive in Natural Aluminum (1579NA) and White (1579NA - W)*
- *Standard widths: 23" (584mm), 30" (760mm), 35½" (900mm), and 46" (1170mm)*
- *Standard length: 25 yards (23m)*
- *Custom widths and lengths available, contact Venture Tape for specifications and requirements*

WR Ending October 16, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Working on formatting PSC Services Manual. Provided historical material to the Archives of Michigan. Reviewing bulletin responses for Land Bank demolitions.

Bob Adams:

Accomplishments:

MDOC Hiawatha CF Video Management and Perimeter Surveillance Enhancements, Personal Emergency Location System, Perimeter Security and Sally Port Improvements, and Fire Alarm System Upgrades Projects (total approx. $3.75M) – All projects to reopen the closed Kinross/Hiawatha CF began in January 2015. The agency then shortened the entire project design and construction process from 22 months to 10 months. Despite the schedule change, transfer of over 1,200 inmates to Hiawatha CF began 10/19, two weeks ahead of schedule. The projects were spearheaded by 3 different project directors (Adams, Patel & Gregorski), but the accomplishment is a credit to many within DTMB-DCD that worked seamlessly together and served MDOC to make this happen.

New Projects:

MDOC Alger CF Asphalt Maintenance and Repairs – Held PPP meeting.

MDOC Alger CF Housing Unit Heating Boiler Replacement – Held PPP meeting.

DNR Porcupine Mountains SP Ski Chalet Roof – Received revised MOP to include construction funding. Requested final design schedule from OHM. Construction schedule for summer 2016.

DHS Bay Pines Boiler Replacement – Issued ISID project statement to IDI.

Bidding:

MDOC MBP Fence and Warehouse – PSC issued post bid addendum with scope reduction.

MDOC MBP Perimeter Security – Received bids, MDOC evaluating available funding.

MDOC Baraga CF Fence B Upgrades – Received bids; PSC performing Best Value interview and will provide recommendation to bring project within budget.

Construction:

MDOC Newberry CF Boilers 2 & 3 Abatement and Demolition – Conducted substantial completion meeting.

MDOC Alger CF Roof Restoration – Conducted substantial completion meeting.

DNR Conely Point BAS – Conducted final completion meeting.

DNR Union Bay BAS – Contractor mobilized and installed SESC measures, and began clearing and rock excavation.

DNR Union Bay Campground Toilet Shower – Overall approximately 85% complete. Ahead of schedule.

DNR Craig Lake SP – Processed PSC Mod requested by DNR for additional road drainage structure design.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

New Projects:

DNR Hoffmaster SP Dune Stair Reconstruction – A pre-construction meeting was conducted at the project site on 10/15. The contractor is scheduled to begin work on site the week of 10/26.

Potential Issues/Solutions:
DNR Wilderness SP Lakeshore Campground Redevelopment Phase 1 – Conducted an issues resolution meeting between the contractor, the PSC, DNR and DTMB on 10/16 in Gaylord. The purpose of the meeting was to resolve discrepancies between the contracted party's opinions about what constitutes additional work and should be paid by the owner. The meeting was successful and a resolution to everyone's satisfaction is expected late in the week of 10/19.

Jerry Gregorski:
New Projects:
MDOC Oaks CF Elastomeric Coating on Membrane Roof on Housing Units 4 & 5 – The bid advertisement was posted on Buy4Michigan with the pre-bid meeting and site walk-through scheduled for 10/19 and bids due 10/28. Construction will not begin until spring 2016 due to weather conditions required for proper coating application.

MDOC Personal Emergency Location Systems Phase-2 at Six Locations –The contract award recommendation for the Gus Harrison Correctional Facility to Midstate Security was approved on the 10/13 Ad Board. The pre-bid meeting and site walk-through for the Parnall Facility was attended by two bidders with bids due 10/21.
Construction Starts:
MDOC Personal Emergency Location Systems Phase-2 at Six Locations – The pre-construction kickoff meetings were held at both sites for the Central Michigan and E.C. Brooks combination contract. The contractor again voiced concerns about upcoming winter weather conditions and possible delays in directional boring and fiber-optic cable work.

DTMB Grand Tower AHU Replacement – The additional VAV controller and communication network work is in process and ahead of schedule. This change order involves a substantial amount of overhead work in the tenants' office areas and is being performed after hours to avoid disruption. A project team meeting was held to set the scope of work for the phase-2 design work. The scope is reduced per realistic funding expectations.

DMVA/Grand Rapids Home for Veterans Kitchen Exhaust Replacement – The pre-construction kickoff meeting was held with Pleune Services. The kitchen shutdown is being coordinated with the National Guard mobile kitchen which will be providing cooking services during this time. Target for completion is mid-November.

MDOC Gus Harrison CF Perimeter Security Enhancements – The contract change order was approved to remove all security systems related work from the contractor's scope and have them concentrate strictly on the fencing upgrades. The fencing work is now proceeding on the new schedule. The security systems work re-design has begun and will be re-bid as a separate contract.

Jan Miller:
Accomplishments:
DNR Island Lake Rec Area Connector Trail – Received the revised work order from DNR that added additional funds to cover professional fees. Contacted and debriefed all eight firms that submitted proposals 7/30. Submitted a recommendation to the Directors Agenda for the award of a contract to Nowak & Fraus Engineers.
Potential Issues/Solutions:
DTMB Flint State Office Building, Window Replacement and Exterior Renovations – Facilitated a conference call meeting with the AG Office, PSC (WTA), Pat Mullen, and myself to discuss the letter received from DAV Carrier's Surety Company. There is pending litigation between the contractor and one of their subcontractors and DTMB has requested review services of the Attorney General's Office.

Dave Sproul:
Accomplishments:
MSP to GOB, CAR – The Christman Company received bids for 12 separate work scope packages concerning the MSP move into the GOB. A quick summary evaluation of the apparent low bids indicates

the overall construction at approximately $6.2M. This is within our construction estimate and Christman Company is currently evaluating the bids to provide recommendation for award. We are still working to begin actual construction by 11/2.

DCH Hawthorn Center, Outdoor Sports Fields – Reviewed and accepted substantial completion of the outdoor sports fields project. The contractor did not complete this project within the required schedule and we are accessing liquidated damages in the amount of 7 days x $200/day or $1,400. Due to weather delays and failure of the contractor to maintain his schedule, Hawthorn Center has been without the use of this outdoor exercise area all summer.

MDOC Ionia Energy Project – Conducted additional walk-throughs for the Ionia Complex Energy Performance project concerning the mechanical retrofit. We also received bids on the asbestos abatement and our design professional is evaluating the proposals. In addition, we are assembling a separate bid package for the direct digital controls and natural gas service.

DHHS Walter P. Reuther Hospital Boiler Control Replacement – Released the advertisement to rebid the boiler control replacement at WPRPH and the bids are due on 11/18.

Construction Start:

MSP Northville Forensic Laboratory – Conducted the pre-construction meeting for the polygraph unit improvements and the work should be completed within 60 days.

DTMB, Energy Center – Conducted the pre-construction meeting to provide the additional access platforms at the Energy Center. This project will provide increased safety and maintenance access to existing equipment indoors and outdoors.

Potential Issues:

State Police, SEOC – Exterior and interior building scope continues to be the major focus. We are scheduling multiple meetings with DMVA, IT groups, and Agency Departments to review any new issues and maintain our schedule. The concrete support slab for the National Guard modules has been placed and the new utility vault construction has begun. We continue to strive for a mid-January move in.

Steve Urban:

Accomplishment:

DTMB Mason Building Renovations; ORS Wayfinding – Presented wayfinding design scheme to ORS for their comment and approval. Scope of work involves capital complex sign installation to direct visitors to ORS Customer Service Retirement Center located on 1st floor Mason Bldg.

New Projects:

MSP Forensic Lab Exhaust Damper Replacement – Met with Frank Kane from BOD to review scope of work. Will utilize ISID contract with Laux Construction for this work.

DTMB Mason Building Renovations, 1st Floor East Wing – It was decided that CSM will be assigned to do the tenant improvement work (engineering and construction) for this area which will be occupied by IT, Enterprise Architecture. Surplus contingency allowances from CAR build out of DIFS, ORS and MIOSHA build out will fund the construction. CSM will provide a price within a week.

Construction Starts:

DTMB GOB Parking Lot Repair – Held construction kick-off meeting with Moore-Trosper and BOD. Repair work to be conducted in 3 phases. 1st phase 10/18–10/20, 2nd phase 10/21-10/23, 3rd phase 10/24-10/26.

Projects Complete:

DTMB Mason Building Renovations, 1st Floor Lobby Toilet Rooms – Punch list inspection occurred 10/16 with minor issue. CSM to correct minor issues and will turn over toilet rooms to BOD on 10/20.

Section Manager: Harold Belcher, Project Management B

Shiawassee State Game Area Siphon Tube meeting.

Chris Bahjet

Accomplishments:

DHHS – Walter Reuther Hospital – Activity Building – Coordinating between Dickinson Wright; Attorney representing the SBA, DTMB Real Estate, PEA; site civil engineer, City of Westland, Consumer Energy, Daniels Building Co. and DTMB survey team to vacate existing and re-draw new water, tunnel, gas and roadway access easements.

DHHS – Walter Reuther Hospital – Site Drainage /Parking – Met with agency and civil engineer (PEA) to look into sink holes that are appearing in Reuther and hospital drives. PEA to submit a proposal through Hobbs + Black's Site/drainage contract.

DNR – Belle Isle Kayak /Canoe Launch – Contractor agreed to remove concrete sidewalk sections that didn't comply with ADA maximum slope requirements. Met with DNR and agreed to arrange to pave limited sections of dilapidated parking.

MDOC – Macomb Correctional Facility – Emergency Breakers Replacement – Worked with MDOC, G.E. and design /builder to finalize scope and arrangement to start work.

Tim Hall

Accomplishments:

MDOC Women's HVCF Utility Tunnel Upgrades – Contractor has completed phase II steam which will activate Housing Unit 5 heating with tie in scheduled with WHVCF Physical Plant on 10/19. This is the last crucial milestone that impacts housing units/residents.

MDOC Women's HVCF Prisoner Service Building Renovation – Participated in bi-weekly progress meeting and contractor has achieved approval of all submittals pertaining to large scope modifications and is progressing well with work toward the revised completion date early spring 2016.

MDOC Women's HVCF ADA Paving Upgrades – Contractor has completed final undercuts and will complete final installation and grading of stone with paving and completion of the project expected late next week.

Non-Project Related Activities:

Participated on interview panel evaluations which finalized a candidate recommendation to fill open field representative position.

Bruce Hassen

Nothing significant to report.

Chris Kulhanek

New Projects:

Shawono Center – Miscellaneous Projects – Contacted agency, PPP meeting scheduled.

Potential Issue/Solutions:

Rose Lake Shooting Range – New Education Building – Bids received on 10/14. Low bid is above budget. Since funding is by grant and donation, there are no other sources to draw from. Solution – DNR is considering options for scope reduction versus supplementing funds.

Matt Miles

Nothing significant to report.

Rashmi Patel

Nothing significant to report.

Sadi Rayyan

Accomplishments:

DEQ Estey Service Station Site – Reviewed and recommended an award of construction contract to Rohde Environmental services to remove and dispose of petroleum impacted soils and restore the site.

Projects Complete:
DEQ Richfield Landfill Site – Processed final payment request to close out the design build contract with Ryan, Inc. Prepared closeout change order/MOP.
Potential Issues/Solutions:
EVR Inc. – EVR decided to close their doors for business. Contacted by the surety Aegis with regard to 3 DEQ bonded projects under contracts with EVR, Inc. Two of these projects have been closed and final payments have been made. The construction activities on the third project are finished, but a final payment request has not been submitted by EVR. Advised Aegis to instruct EVR to obtain a consent of surety document before submitting any future payment requests for the sites.
Non-Project Related Activities:
2016 Environmental Expanded Triage ISID Contracts – Finalized scope of work/RFP/sample contract and advertised on Buy4Michigan website. Proposals are due 12/15.

Attended DEQ's "Environmental Remediation and Risk Management Conference" Workshop.

Jud Sorensen
Projects Complete:
Repairs and painting of the Pine Street Pedestrian Bridge are now complete. There are localized areas where water is seeping through cracks in the deck. It was not the intention of this project to repair those leaks. Cracks will likely need to be injected with chemical grout in order to reduce this seepage. In addition, although not required by contract documents, the contractor insulated downspouts at no additional cost. The quality of this insulation is less than acceptable. DTMB will look at issuing an assignment through one of the piping insulation ISID contracts to have these pipes insulated properly.

Terry O'Brien
Accomplishments:
SESC authorization for DNR Pontiac Lake Rec Area, DNR Stoney Creek and DNR Foch Lakes Flooding.

Bruce Watkins

Section Manager: Irene Henry, Project Management Section 'A'
Nothing significant to report.

Bob Adams:
Design:
MDOC Baraga CF Roof Replacement – Adding services for non-destructive wet insulation testing/investigation.

MDOC Marquette BP Circulating Pump Replacement – Adding services for final design and construction administration.

MDOC Baraga Max Classroom – Held the 90% review meeting on site.
Bidding:
MDOC Marquette BP Fence and Warehouse Relocation – Held conference call with PSC and MDOC to review scope reduction options for re-bidding project.
Construction:
MDOC Chippewa CF Video Management and Perimeter Surveillance Enhancements – Held the pre-construction conference.
Projects Complete:
MSP Marquette Crime Lab – Processing contractor's final invoice.

DNR Union Bay Toilet/Shower – Conducted substantial completion meeting.

MDOC Camp Baraga Demo – Conducted substantial completion meeting.

MDOT Ironwood WC Roof – Processing final CCO.

Scott DeKorte:
Nothing significant to report.

Joel Gordon:
Nothing significant to report.

Jerry Gregorski:
Nothing significant to report.

Jan Miller:
Accomplishments:
DNR Silver Lake State Park Day Use & BAS Improvements – DNR has approved funding for phase 2 of the master plan which includes a toilet building, two (2) pavilions, sidewalks and playground. Awaiting the revised work order. Phase 1 is progressing on budget and on schedule.
Potential issues/Solutions:
Flint State Office Building, Interior Renovations – Metal panel subcontractor and fabricator have been replaced due to poor quality of workmanship. Met on site with PSC and contractor 11/3 to review and discuss acceptable quality of corrective work at the south entrance and matching the proposed work at the north entrance. Work in the lobby is progressing slow and not according to schedule. B&B is disputing the terrazzo work and has been told to proceed with the work according to the contract. They may submit a claim.

Dave Sproul:
Accomplishments:
MSP to GOB, CAR – Met to review and approve the bid tabulations with The Christman Company concerning the MSP move into the GOB. We are moving forward with a recommendation of award to subcontractors in the amount of $5,030,217. The first phase of the CJIC move is under way with the installation of the new high density filing system within GOB 1st floor.

DCH, Hawthorn Center, Boiler Replacement – Assisting Hawthorn Center with developing a probable cost estimate to replace several heating hot water boilers within the facility. Century A&E is helping with the request since they are currently working/finishing up on the outdoor sports fields. Hawthorn Center will be submitting the cost estimate to their leadership for direction on how to proceed.

DCH, Caro Center, Utility Backup Generator – Attended our regularly scheduled construction progress meeting and the contractor is proceeding with some minor schedule issues and should be complete by February 2016.

MDOC, Thumb Correctional Facility – Attended our regularly scheduled construction progress meeting and construction of the new water booster building is progressing. MDOC has requested that we integrate some control monitoring points with the new security system project.

MDOC, Ionia Energy Project – Released the construction bid documents to provide direct digital controls to be integrated with the mechanical retrofit project. In addition, we made recommendation for contract award concerning the asbestos abatement. The natural gas service installation work is also out for bids and we are scheduled to provide a pre-bid meeting on 11/18.

DSSH, Walter P. Reuther Hospital – Conducted the mandatory pre-bid Meeting concerning new boiler control replacement at WPRPH. Bids are still due on 11/18.

Non-Project Related Activities:

MDOC, Ionia Complex Tour – Conducted a tour of Michigan Reformatory and Bellamy Creek Correctional Facilities with Mike Turnquist. It gave Mike an opportunity to see firsthand a couple of Department of Corrections' facilities.

Potential Issues:

State Police, SEOC – Have conducted several tours of the overall construction progress and attended our regularly scheduled construction progress meeting as well. We are continuing to meet to review any new construction issues and resolve to maintain our completion schedule. The interior work of the addition and utility tunnel are the current main focus.

Steve Urban:

Accomplishment:

DTMB Lake Superior Hosting Center 208v/480v Power Upgrades Project – Construction documents posted on Buy4Michgan.

Projects Complete:

DNR Porter Ranch Facility Barn Re-roof – Conducted construction punch list inspection (minor comments) and received close out documents from the contractor (Ripman Construction).

Potential Issues/Solutions:

DTMB Mason Building Renovations – BOD has decided to install ceiling mounted LED fixtures in lieu of providing work station task lighting at select areas for ORS, DIF and MIOSHA. Low lighting levels at work stations resulted from the use of high office wall panels, tenants' choice of not installing upper cabinets at work stations and the office layouts relative to the new ceiling. Due to warranty issues CSM will manage the work, Centennial Electric will install the light fixtures (CSM's electrical subcontractor.)

Section Manager: Harold Belcher, Project Management B

DMVA Fort Custer Wind Funnel site visit; Kalamazoo River Valley Trail site visit; Silo presentation to Contract Section; Attended Michigan Energy Services Coalition awards event.

Chris Bahjet

Accomplishments:

MSP – Livonia Roof – Attended the progress meeting and reviewed the damage from roof leaks. Contractor was alerted and shown the damage and advised not to work on Saturday unless they give prior notice to MSP.

New Projects:

DTMB – Cadillac Place- Replace Air Handling Unit – Convened the PPP meeting for this project.

DNR – Belle Isle – Access To Fishing – Held the PSC selection meeting to select one of five proposals.

Tim Hall

Accomplishments:

DCH Center for Forensic Psychiatry Perimeter Lighting Upgrades – Conducted pre-construction meeting and issued Notice to Proceed. Preliminary projection for submittals and delivery time complete by year end and construction starting January 2016.

MDOC Women's HVCF Utility Tunnel Upgrades – Daniels pouring tunnel caps to re-open phase I and will follow immediately with phase II; preliminary demo for tie in and preparation to complete final phase. All connections affecting housing unit heat have been completed.

DTMB State Warehouse Facility Building 100 Renovation – Christman released bid documents to trade contractor for bidding, pre-bid meeting next week and bids due mid-November. Met with Kristi Thompson to review and discuss coordination of site utilization for Surplus operations.

MDOT Blue Water Bridge HVAC Replacement – Received all electronic closeout documents to accompany previously delivered paper copies; met with contractor to review reconciliation for final closeout change order.

Bruce Hassen

Accomplishments:

The formal bid walk-thru was held for the deconstruction of Highland Park High School on 11/4. Nearly 20 general contractors attended. Follow-up site inspections by bidders will be allowed, but time slots for these will be very limited.

Chris Kulhanek

Accomplishments:

Shawono Center – Improvement Projects – To expedite the project a D-B ISID project delivery was suggested and implemented. The D-B contractor visited the site within a few days of contact and by working with the facilities staff has already determined part of the project scope for a new generator is not necessary since the existing unit has enough capacity to do what they wanted. The Agency is pleased to be able to use the money saved by this on other parts of the project.

Potential Issue/Solutions:

MLHC – Automation Upgrade – Problems persist with the lighting controls as the warranty period draws closer to its end.

Solution – A meeting was held with the contracting team along with the engineers and manufacturer's rep to brainstorm a solution. The manufacturer has agreed to replace all controllers at no cost to the owner and restated their commitment for customer satisfaction with the system.

Kalamazoo Psychiatric Hospital – Improvement Projects – A special meeting was held to address several problems – bad soils and additional leaks at the tunnel where the porch is being replaced, and that some existing mechanical units were not tied into the controls system.

Solution – The bad soil replacement will be covered by the contingency. KPH addressed the leaks in-house. It was clarified that the controls issue was not in the project scope. A meeting is being set up with a sub-contractor to coordinate a solution.

Matt Miles

Nothing significant to report.

Rashmi Patel

Nothing significant to report.

Sadi Rayyan

Accomplishments:

DNR Otsego Dam Repairs Site – The second progress meeting held. Contractor completed the access road and collected soil samples from the river bed to help designing and installing cofferdam. Cofferdam configuration was proposed for review and approval.

DTMB Former Ithaca State Police Post Site – Signed and returned to DEQ an access agreement to conduct contamination screening of the site.

DEQ Commercial Street Industrial Site – Reviewed and recommended changes to the contract with DLZ to repair existing wells and install new monitoring wells.

DEQ Pioneer Auto Truck Stops Site – Reviewed and recommended changes to the contract with AECOM to modify the remedial investigation/focused feasibility study report.

DEQ Bob A Lu Market Site – Reviewed and recommended changes to the contract with Sagasser to conduct risk reduction activities and submit report.

DEQ Alexander Towing Site – Reviewed and recommended changes to the contract with Manik & Smith Group to provide installation, sampling and reporting of monitoring wells/soil vapor points.

DEQ Maeward, Inc. Site – Reviewed and recommended changes to the contract with ECT to abandon wells and procure restrictive covenants.

DEQ 1591 Oakman Site – Reviewed and recommended changes to the contract with AMEC to provide additional construction oversight services.

New Projects:

DEQ Cousins General Store Site – Assigned to Mannik and Smith under their ISID contract for soil/groundwater sampling services.

DEQ Simmons General Store Site – Assigned to Mannik and Smith under their ISID contract for soil/groundwater sampling services.

DEQ Herrick's Service and Grocery Site – Assigned to DLZ under their ISID contract to conduct remedial investigation services.

DEQ D&L Fuels Site – Assigned to DLZ under their ISID contract to conduct remedial investigation services.

DEQ Adams Plating Company Site – Assigned to Weston under their ISID contract for the installation/sampling of 2 soil borings/monitoring wells and reporting.

Non-Project Related Activities:

2016 Environmental Expanded Triage ISID Contracts – Received questions about the scope of work/RFP/sample contract and answered the questions in an addendum. Posted Addendum 1 on Buy4Michigan website.

Jud Sorensen

Potential Issues/Solutions:

A notice of claim in the amount of $35,947.83 was sent by Gary D. Quesada, the attorney representing B & B Construction Services, LLC to Mr. Donald White of Tower Pinkster indicating that the plans and specifications provided no indication that an automatic transfer switch was to be included in the project for the power plant substation. Tower Pinkster had indicated that this project represented a one for one replacement and as the existing substation includes an automatic transfer switch, a switch should also have been provided for the replacement switchgear. There is also a second issue in that B & B had initially listed Tri-County Electric as their electrical subcontractor prior to contract award and then switched to Shaw Electric at the time of the pre-construction meeting. Tri-County Electric has confirmed to Tower Pinkster

that their bid to B & B had included this automatic transfer switch. Per contract documents, the general contractor cannot switch a listed subcontractor if that results in additional cost or time to the project. Tower Pinkster now has 30 days to respond to the notice of claim letter.

In replacing the roof at Geagley Laboratory, the contractor is running into wet insulation scheduled to remain along with a number of other field conditions that could result in significant additional costs to the project. These costs are being monitored closely by the professional, but should these issues continue, contingency could be exceeded and may require reductions in work scope.

Attachments: Bioaerosol in Ambient Air Microbial Evaluation Flint Office Bldg, 125 Union Street, Flint, MI w Attachment.pdf

Adam,

Attached please find the subject report. Per our conversation yesterday, the results of the testing indicate that fungal reservoirs resulting from the water leak may still be present. Please do not hesitate to contact us if you have any questions concerning the information provided or if you would like us to perform additional services.

Sincerely,

Martin Gamble

Cardno ATC Project No: 188BS15361
Report Date: August 5, 2015

Prepared by:

Cardno ATC
46555 Humboldt, Suite 100
Novi, Michigan 48377

INTRODUCTION

The State of Michigan (Client) authorized Cardno ATC to perform air sampling for non-culturable mold spores in the Flint Office Building, located at 125 Union Street in Flint, Michigan. Based on information provided by the Client a water leak was identified and repaired in a pipe chase on the fourth floor during renovation activities. Water from a breached pipe in the pipe chase on the 4th floor traveled down the pipe chase to the 1st floor.

ASSESSMENT METHODS

On July 30, 2015, Cardno ATC conducted air sampling for non-culturable mold spores. The following methods were utilized.

Bioaerosol in Ambient Air – Total Countable Fungal Bioaerosols: Samples of ambient indoor and outdoor air were collected for laboratory analyses of bioaerosols (airborne particles that are living organisms or fragments that have originated from living organisms) in ambient air. Samples were collected by drawing air across an adhesive material within a "spore trap" cassette. Allergenco D cassettes were utilized. Ambient air was drawn over the spore trap using a high volume pump, calibrated to draw 15 liters of air per minute, for 10 minutes. Each spore trap was resealed and given a unique sample number. The sample number was entered onto the Chain of Custody at the conclusion of each sampling event.

Samples were submitted to IMS Analytical Laboratory for analysis of predominant mold species and estimated concentrations. IMS is accredited under the American Industrial Hygiene Association Environmental Microbiology Laboratory Accreditation Program (AIHA EMLAP) and participates in the AIHA Environmental Microbiology Proficiency Analytical Testing (EMPAT) quality control program.

BIOAEROSOL SAMPLING DATA FINDINGS

On July 30, 2015, Mr. Ryan Rae, Industrial Hygienist at Cardno ATC conducted bioaerosol sampling for non-culturable mold spores: in the 4th, 3rd , 1st floor pipe chase areas; 1st floor vending area and at the front entrance of the building exterior (for comparison to the natural environment).

Table 1: NON CULTURABLE MOLD AIR SAMPLE ANALYSIS (provided on the following page), summarizes the predominant fungal taxa reported for the non- culturable (spore-trap) sampling performed on July 30, 2015. The formal laboratory report prepared by IMS Analytical Laboratory is presented in Attachment A.

INTERPRETATION OF DATA

Bioaerosol Sample Data

The laboratory calculates estimated concentrations of fungal bioaerosols based on the number of identifiable spores observed in the sample trace and the volume of air drawn through the spore trap cassette.

The American Conference of Governmental Industrial Hygienists (ACGIH) considers comparison of indoor/outdoor (exterior) bioaerosol data a common method for evaluating indoor fungal reservoirs or concerns. In normal indoor environments, the total concentrations of fungi in the indoor air are commonly equal to, or less than, the total concentration outdoors (exterior). If indoor fungal bioaerosol concentrations are greater than those outdoors (exterior), then indoor fungal reservoirs are likely to be present. In addition, the types (i.e., taxa or groups) of fungal bioaerosols found inside a building should be qualitatively similar to the taxa recovered outdoors (exterior); presuming outdoor (exterior) air is the only source of indoor fungal bioaerosols. There are no regulatory standards or other widely accepted numerical guidelines available for interpretation of bioaerosol data. Current ACGIH guidelines (Macher, 1999) refrain from providing numerical thresholds for bioaerosols. A study by Horner, et al (2004) suggests that most indoor environments, with no history of water damage, exhibit the presence of species of Cladosporium and the Penicillium/Aspergillus group of molds, but that the presence of more than a very few spores of species of Stachybotrys, Chaetomium, and Ulocladium in an indoor sample indicates reservoirs of molds related to severe or prolonged water damage.

CONCLUSIONS

Results of the non-culturable (spore-trap) sampling indicated that total fungal taxa concentrations reported were lower in the interior of the building than the exterior of the building. However, the Penicillium/Aspergillus group concentrations were greater in the 4th, 3rd and 1st floor pipe chase areas and the 1st floor vending area, than the exterior sample, suggesting that fungal reservoirs may be present. Additionally, Chaetomium was identified in the 4th floor pipe chase sample and was not identified in any of the other samples, including the exterior sample. The presence of Chaetomium further suggest fungal reservoirs may be present, since this species is associated with prolonged and/or severe water damage, which would be consistent with the Client's indication that the water leak's origin was in the 4th floor pipe chase.

LIMITATIONS

This report has been prepared to assist State of Michigan in evaluating microbiological impact from the water leak in 4th floor pipe chase areas at the Flint Office Building located 125 Union Street in Flint, Michigan. Cardno ATC provided these services consistent with the level and skill ordinarily exercised by members of the profession currently practicing under similar conditions. This statement is in lieu of other statements either expressed or implied. This report is intended for the sole use of the State of Michigan. The intent of the report is to aid the building owner, architect, construction manager, general contractors, and potential demolition and abatement contractors in assessing microbiological impact. This report is not intended to serve as a bidding document nor as a project specification document and actual site should conditions and quantities be field-verified. The scope of services performed in execution of this evaluation may not be appropriate to satisfy the needs of other users, and use or re-use of this document, the findings, conclusions, or recommendations is at the risk of said user.

Other possible building material hazards such as asbestos and lead-based paint were not included as part of this evaluation and may require proper sampling for identification prior to disturbance. Other unidentified source of microbiological impact may be located within walls, ceiling cavities, below flooring or grade, and other non-accessible areas. Caution should be used during any remediation activities.

Additionally, the passage of time may result in a change in the environmental characteristics at this property. This report does not warrant against future operations or conditions that could affect the recommendations made. The results, findings, conclusions, and recommendations expressed in this report are based only on conditions that were observed during Cardno ATC's inspection of the site.

Thank you for this opportunity to be of service to State of Michigan. If you have any questions, please feel free to contact the undersigned at (248) 669-5140.

Sincerely,
Cardno ATC INC.

Ryan Rae
Industrial Hygienist

Martin Gamble
Senior Project Manager

1 - IMS Laboratory, LLC

IMS Laboratory, LLC operates a state-of-the-art environmental laboratory, specializing in full service microbial, asbestos and radon analyses. We maintain the highest levels of quality and personalized service in the industry. Our analytical staff includes only Certified Indoor Air Quality Professionals, Ph.D. Microbiologists, Mycologists, Microbiologists, and Biochemists. Our team's extensive experience in indoor air quality sampling techniques, microbial identification, and analytical interpretation allows us to offer our clients expert personalized service and has made IMS Laboratory an industry leader.

IMS Laboratory is accredited through the American Industrial Hygiene Association (AIHA) for both viable and nonviable fungal identification and through the National Voluntary Laboratory Accreditation Program (NVLAP) for bulk asbestos. To maintain quality control and quality assurance, we use standardized procedures approved under strict AIHA and NVLAP guidelines. Client data information is compiled and stored in a specially designed computer management system for secure, redundant data and the ability to comply with AIHA and NVLAP quality system requirements. A portion of this quality system includes inter-analyst comparisons and statistical quality control using blind duplicate analyses and process blanks. Laboratory data is provided in compliance with AIHA and NVLAP policy modules and ISO 17025 guidelines.

This data is intended for use by professionals having the necessary knowledge of the testing methods to interpret them accurately.

Analytic Methods and Formulas:

IMS Laboratory Analytical Method: 2.2 (method for analyzing spore trap)
Results are rounded to 3 significant figures per AIHA policy module 2A.5.10.5
Spores per cubic meter is determined by: Total Spore Count x 4 x (1000/(sampling rate)x(sampling time))

Note that this report may use mold-specific units, such as Spores/cu. m and CFU/cu. m for Sample Identifications such as pollen, fiberglass fibers, and bacteria, which are not molds.

4 - Understanding Laboratory Results

Laboratory findings must only be considered as part of an overall mold investigation. The interpretation of the findings must only be made by a qualified individual after reviewing all relevant data. Visual information and environmental conditions measured during the site assessment are crucial to any final interpretation of the results. A very good reference book which covers sampling and data interpretation has been published by The American Conference of Governmental and Industrial Hygienists and is entitled *Bioaerosols: Assessment and Control,* 1999.

Numerical guidelines cannot be used as the primary determinant as to whether a mold problem may exist. Concentrations of mold in the air will vary depending on weather conditions, building air flow, time of day and time of year. Comparisons between indoor and outdoor mold levels, types of mold found, visual information and environmental conditions are more important in interpreting results than reliance on specific numeric thresholds.

In *Indoor Air Quality in Office Buildings: A Technical Guide, Health Canada,* Revised 1995 (Pages 49-50), Health Canada set forth guidelines which can be used to better understand air testing results. The guidelines included these general principles. Significant numbers of certain pathogenic fungi should not be present in indoor air (e.g. Aspergillus fumigatus, Histoplasma, and Cryptcoccus). Bird or bat droppings in air intakes, ducts or rooms should be assumed to contain these pathogens. The persistent presence of significant numbers of toxigenic fungi (e.g. Stachybotrys atra, toxigenic Aspergillus, Penicillium and Fusarium species) indicate that further investigation and action should be taken. The confirmed presence of one or more fungal species occurring as a significant percentage of a sample in indoor air samples and not similarly present in concurrent outdoor samples is evidence of a fungal amplifier. The "normal" air mycoflora is qualitatively similar and quantitatively lower than that of outdoor air. The significant presence of fungi in humidifiers and diffuser ducts and on moldy ceiling tiles and other surfaces requires investigation and remedial action regardless of the airborne mold concentrations.

Generally, mold spores are present everywhere. As a general rule, "normal" air mycoflora is qualitatively similar and quantitatively lower than that of outdoor air. When the converse is true, it is likely that an indoor source of mold may exist. However, even this most basic rule may produce misleading results. Airborne mold spore levels vary widely due to factors such as weather conditions and activity levels. For example, in a "normal" home, indoor mold spore levels may be elevated above outdoor spore levels after vacuuming (when airborne indoor levels could be unusually high) or after a heavy snow (when outdoor levels could be unusually low).

This report has been prepared by IMS Laboratory, LLC at the request of and for the exclusive use of CARDNO ATC Inc. Read the important terms, conditions, and limitations that apply to this report carefully.

Surface Sampling primarily identifies the types and relative proportions of mold on a surface. Viable surface sampling will identify living mold, while nonviable surface sampling will identify all mold (but cannot distinguish between living or dead mold). Surface sampling may confirm that a substance is mold or identify the types of mold present on the surface. Because mold is everywhere, there is a high probability that a surface sample from a "clean" surface will still identify mold on that surface.

There are currently no state or federal standards or guidelines regarding results of fungal samples. There are no levels, which are typical or permissible. There are no recommended exposure limits, no permissible exposure limits, no threshold limit values and no short term exposure limits.

These guidelines are not intended, nor should they be used, for health evaluation purposes or to evaluate the safety of an occupied space. A physician should be consulted regarding health and/or safety questions.

This report has been prepared by IMS Laboratory, LLC at the request of and for the exclusive use of CARDNO ATC Inc. Read the important terms, conditions, and limitations that apply to this report carefully.

5 - Sample Identification Definitions

Alternaria

A genus of fungi that is extremely widespread and ubiquitous. It is commonly found in outdoor samples and may be isolated from samples of soil, seeds, and plants. Alternaria is also often found in carpets, textiles, window frames, and on horizontal surfaces in building interiors. It is both a plant pathogen and human pathogen. Alternaria produces large spores, suggesting that the spores from this fungus are deposited in the nose, mouth, and upper respiratory tract. It may be related to baker's asthma. Alternaria has been associated with hypersensitivity pneumonitis, sinusitis, deratomycosis, onychomycosis, subcutaneous phaeohyphomycosis, and invasive infection. It is a common cause of extrinsic asthma (immediate-type hypersensitivity: type I).

Found in these Sample Locations: (5) IWA - 1st Flr Chase (7) Exterior - Front Entrance

Ascospores

A large group of spores that are very ubiquitous in nature. They are frequently found in the air after a rain. Most ascospores are plant pathogens; a small portion have been known to cause infection in humans but are identified separately.

Found in these Sample Locations: (3) IWA - 3rd Flr Chase (4) IWA - 2nd Flr Chase (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Basidiospores

A large group of spores that are very ubiquitous in nature. They are released from mushrooms, shelf fungi, puffballs, and a variety of other macro fungi. Basidiospores may be allergenic to those with seasonal allergies.

Found in these Sample Locations: (2) IWA - 4th Flr Chase (3) IWA - 3rd Flr Chase (4) IWA - 2nd Flr Chase (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Cercospora group

A group of closely-related fungi that includes the genera Cercospora and Pseudocercospora. They are pathogenic to a variety of plants, particularly grapes and celery. Fungi in the Cercospora group are not known human pathogens.

Found in these Sample Locations: (7) Exterior - Front Entrance

This report has been prepared by IMS Laboratory, LLC at the request of and for the exclusive use of CARDNO ATC Inc. Read the important terms, conditions, and limitations that apply to this report carefully.

Chaetomium

A type of ascospore commonly isolated from soil. It is found on a variety of substrates including decomposing plant material and wood, dung, straw, and damp or water-damaged cellulose (e.g. paper on drywall). As a moisture-indicator fungi, Chaetomium only grows when the substrate has a current or previous severe moisture problem. There are over 100 documented species of Chaetomium, several of which are reported to be toxigenic; if not speciated, the genus Chaetomium should be assumed to be toxigenic. It has been known to cause systemic, cerebral, cutaneous, subcutaneous, and pulmonary infections, though usually only in the immunocompromised.

Found in these Sample Locations: (2) IWA - 4th Flr Chase

Cladosporium

One of the most commonly identified outdoor fungi. It is often found indoors in numbers less than outdoors. Cladosporium is also found on decaying plants and food, straw, paint, and textiles. It is generally regarded to be allergenic and can be a cause of extrinsic asthma (immediate type hypersensitivity: Type I). Cladosporium has been reported in cases of skin lesions, keratitis, onychomycosis, sinusitis, and pulmonary infections.

Found in these Sample Locations: (2) IWA - 4th Flr Chase (4) IWA - 2nd Flr Chase (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Epicoccum nigrum

Epicoccum nigrum (also known as Epicoccum purpurascens) is the only species in the genus Epicoccum. It is very commonly isolated from plants, air, animals, foodstuffs, and textiles. Epicoccum nigrum is a known plant pathogen, but is not pathogenic to humans.

Found in these Sample Locations: (5) IWA - 1st Flr Chase (7) Exterior - Front Entrance

Ganoderma

A type of basidiospore from a genus of mushrooms known as shelf mushrooms or bracket fungi, which grow on wood. These spores may be allergenic to those with seasonal allergies.

Found in these Sample Locations: (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Mitospores

A large group of morphologically-similar fungi which includes Alternaria, Stemphylium, Pithomyces, and Ulocladium. If hyphal fragments are not attached to the spores, the specific type of mitospore cannot be differentiated and is classified under this grouping. Because mitospores are large spores, they are more easily deposited in the nose, mouth, and upper respiratory tract,

This report has been prepared by IMS Laboratory, LLC at the request of and for the exclusive use of CARDNO ATC Inc. Read the important terms, conditions, and limitations that apply to this report carefully.

allowing them to be potentially very allergenic. Alternaria, Stemphylium, Pithomyces, and Ulocladium are all commonly found on plants, textiles, paper, and in soil. In building interiors, they are commonly isolated from horizontal surfaces (e.g. window sills, attic rafters). Alternaria is both a plant pathogen and human pathogen and is associated with asthma, hypersensitivity pneumonitis, sinusitis, deratomycosis, onychomycosis, subcutaneous phaeohyphomycosis, and invasive infection. Stemphylium is not a known human pathogen. Pithomyces is not a known human pathogen, but has been known to cause facial eczema on ruminants (e.g. cattle, goats, sheep). Ulocladium is generally not pathogenic, but has been known to cause cutaneous infections in the immunocompromised.

Found in these Sample Locations: (2) IWA - 4th Flr Chase (7) Exterior - Front Entrance

No Trace or Fungal Spores Observed

No visible trace or spores were observed in the sampling area.

Found in these Sample Locations: (1) Blank

Pen/Asp group

The spores of the genera Penicillium, Aspergillus, Gliocladium, and Trichoderma are quite similar when viewed under a microscope and are grouped together under the heading Pen/Asp. Penicillium species are among the most common fungi found in indoor environments, particularly basements. Certain species may cause infections of the eye, external ear, respiratory system, and urinary tract. Some species of Aspergillus are parasitic on insects, plants, and animals including humans. All Aspergillus species are allergenic. Various species can cause extrinsic asthma, pulmonary emphysema, opportunistic infections of the ears and eyes, and severe pulmonary infections. Many species of Penicillium and Aspergillus produce mycotoxins which may be associated with diseases in humans and animals. Several toxins are considered potential human carcinogens. The genus Gliocladium has not been reported to cause disease in man or animals. The genus Trichoderma has been reported to cause infections in immunocompromised individuals, patients undergoing dialysis, and individuals with chronic kidney failure or chronic lung disease.

Found in these Sample Locations: (2) IWA - 4th Flr Chase (3) IWA - 3rd Flr Chase (4) IWA - 2nd Flr Chase (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Pollen

Pollen are coarse to fine particles/grains produced by various trees, weeds, and grasses. For individuals with seasonal allergies, pollen is often the causative agent.

Found in these Sample Locations: (7) Exterior - Front Entrance

This report has been prepared by IMS Laboratory, LLC at the request of and for the exclusive use of CARDNO ATC Inc. Read the important terms, conditions, and limitations that apply to this report carefully.

Rust

A plant pathogen that is commonly found on leaves, stems, fruits, and seeds of various plants. Not a known human pathogen.

Found in these Sample Locations: (7) Exterior - Front Entrance

Smuts/Periconia/Myxomycetes

A group of plant pathogens with similar morphology. They are commonly found in the outdoor environment in soil and on wood, grasses, cereal crops, and flowering plants. Myxomycete spores are considered to cause Type 1 allergies (hay fever and asthma).

Found in these Sample Locations: (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Stachybotrys

A fungus naturally found on decaying plant and tree material. In the indoor environment, it grows on building material with a high cellulose and water content and a low nitrogen content (e.g. wet drywall). There are over 20 documented species of Stachybotrys, and at least two are reported to be toxigenic; if not speciated, the genus Stachybotrys should be assumed to be toxigenic. Specifically, it can produce the mycotoxin trichothecene (Satratoxin H), which is poisonous upon inhalation. Individuals with chronic exposure to the toxin produced by this fungus reported cold and flu symptoms, sore throats, diarrhea, headaches, fatigue, dermatitis, intermittent local hair loss, and general malaise. The toxin may suppress the immune system, affecting the lymphoid tissue and the bone marrow. It is also reported to be a liver and kidney carcinogen. Effects by absorption of the toxin in the human lung are known as pneumomycosis. Areas with relative humidity above 55% are subject to temperature fluctuations and are ideal for toxin production. Stachybotrys is rarely found in outdoor samples. It is usually difficult to find in indoor air samples unless it is physically disturbed.

Found in these Sample Locations: (7) Exterior - Front Entrance

Torula

No reports of human infection. Can cause Type I allergic reactions.

Found in these Sample Locations: (7) Exterior - Front Entrance

6 - Glossary of Terms

Agar ~
A gelatinous medium used for growing microorganisms (e.g. mold, yeast, and bacteria).

Colony ~
A group of hyphae (filaments) of the same type of microorganism growing together. A colony can be seen with the naked eye.

Colony Forming Unit (CFU) ~
A unit of measure describing the number of colonies present in or on a surface of a sample.

Exposure ~
The exposure refers to the quantity of a sample collected for laboratory analysis. With reference to air tests, the exposure is determined by multiplying the flow rate of the collection device by the length of time the device was operating.

Fungus (fungi, pl) ~
Fungi are a form of life (eukaryotic) which can range from unicellular to filamentous. Fungi lack chlorophyll and absorb nutrients. Fungi can reproduce by sexual, asexual, or both means. Mold is a type of fungi.

Hypha (hyphae, pl) / hyphal fragment ~
Hypha is the tubular filament which is the vegetative, nutrient absorbing portion of the fungus.

Mold ~
A very large group of microscopic fungi. Most are filamentous organisms and produce spores that can be air-, water-, or insect-borne. Mold can be a common trigger for allergies. For people who are sensitive to mold, exposure can cause symptoms such as nasal stuffiness, eye irritation, or wheezing. People with serious allergies to mold may have more severe reactions. Severe reactions may occur among workers exposed to large amounts of molds in occupational settings. People with chronic illnesses, such as obstructive lung disease, may develop mold infections in their lungs. Mold growth in the home can be slowed by keeping humidity levels below 50% and ventilating showers and cooking areas.

Mycotoxin ~
A substance produced by fungi which can be toxic to man and/or animals.

This report has been prepared by IMS Laboratory, LLC at the request of and for the exclusive use of CARDNO ATC Inc. Read the important terms, conditions, and limitations that apply to this report carefully.

Opaque particle ~
Opaque particles are dark, non-biological, debris through which light will not pass.

Petri Dish ~
A dish containing agar for the culturing of microorganisms (e.g. fungi or bacteria).

Raw Count ~
The number of particles counted by an analyst during the examination of specimen.

Reporting Limit (RL) ~
The reporting limit (RL) is the limit of detection for an analyte that can be reliably reported by using a given analytical method. The RL is dependent on the time and volume of sampling.

Sample Medium ~
The sample medium refers to the type of test conducted (e.g. swab, spore trap air test, tape lift, etc.).

Serial Number ~
A manufacturer's specific identification code on a test medium (e.g. spore trap or tape lift).

Spore ~
A propagule/structure produced by fungi as a means of reproduction, survival, and dissemination. Spores can be single cellular or multicellular.

Spore Trap ~
A Spore trap is a collection device (or media) used to capture airborne spores and other airborne particulates. Spore traps are analyzed by microscopic means and do not distinguish between viable and non-viable cells.

Too Numerous To Count (TNTC) ~
TNTC is used to denote specimens in which a type of organism is present at an extremely high level or has grown together so that individual colonies cannot be distinguished.

Toxigenic fungi ~
Toxigenic fungi are fungi capable of producing toxic substances.

8 - Warranties, Legal Disclaimers, and Limitations

IMS's scope of accreditation through the AIHA is for the following FoT(s)/Method(s): Fungal Air - Culturable (SOP 2.4 Cultured Air Sample Reporting); Fungal Bulk - Culturable (SOP 2.5); Fungal Surface - Culturable (SOP 2.5); Fungal Air - Direct Examination (SOP 2.2 and 2.3); Fungal Bulk - Direct Examination (SOP 2.6); and Fungal Surface - Direct Examination (SOP 2.1).

The study and understanding of molds is a progressing science. Because different methods of sampling, collection and analysis exist within the indoor air quality industry, different inspectors or analysts may not always agree on the mold concentrations present in a given environment. Additionally, the airborne levels of mold change frequently and by large amounts due to many factors including activity levels, weather, air exchange rates (indoors), and disturbance of growth sites. It is possible for report interpretations and ranges of accuracy to vary since comprehensive, generally accepted industry standards do not currently exist for indoor air quality inspections of mold in residential indoor environments. This report is intended to provide an analysis based upon samples taken at the site at the time of the inspection. Mold levels can and do change rapidly, especially if home building materials or contents remain wet for more than 24 hours, or if they are wet frequently. This report is not intended to provide medical or healthcare advice. All allergy or medical-related questions and concerns, including health concerns relating to possible mold exposure, should be directed to a qualified physician. If this report indicates indoor mold levels that are higher than in typical indoor living spaces relative to the outdoor environment, or indicates any findings that are of concern to you, further evaluation by a trained mold professional or a Certified Industrial Hygienist (CIH) may be advisable.

Results pertain only to the items tested. Unless otherwise noted in the body of this report, the condition of samples upon receipt was acceptable. Blank samples are reported in the same manner as all other samples. The results are not corrected for contamination.

This report is generated by IMS at the request of, and for the exclusive use of, the IMS client named on this report. The analysis of the test samples is performed by IMS. This report applies only to the samples taken at the time, place and location referenced in the report and received by IMS, and to the property and weather conditions existing at that time only. Please be aware, however, that property conditions, inspection findings and laboratory results can and do change over time relative to the original sampling due to changing conditions, the normal fluctuation of airborne mold, and many other factors. IMS does not furnish, and has no responsibility for, the inspector or inspection service that performs the inspection or collects the test samples. It is the responsibility of the end-user of this report to select a properly trained professional to conduct the inspection and collect appropriate samples for analysis and interpretation. Neither IMS, nor its

affiliates, subsidiaries, suppliers, employees, agents, contractors and attorneys ("IMS related party") are able to make and do not make any determinations as to the safety or health condition of a property in this report. The client and client's customer are solely responsible for the use of, and any determinations made from, this report, and no IMS related party shall have any liability with respect to decisions or recommendations made or actions taken by either the client or the client's customer based on the report.

Samples analyzed by IMS are disposed the day that they are analyzed. Storage may be available for a fee with written request at the time the samples are submitted for analysis.

IMS hereby expressly disclaims any and all representations and warranties of any kind or nature, whether express, implied or statutory, related to the testing services or this report including, but not limited to, damages for loss of profit or goodwill regardless of the negligence (either sole or concurrent) of IMS and whether IMS has been informed of the possibility of such damages, arising out of or in connection with IMS's services or the delivery, use, reliance upon or interpretation of test results by client or any third party. In no event will IMS be liable for any special, indirect, incidental, punitive, or consequential damages of any kind regardless of the form of action whether in contract, tort (including negligence), strict product liability or otherwise, arising from or related to the testing services or this report.

IMS accepts no legal responsibility for the purposes for which the client uses the test results. IMS will not be held responsible for the improper selection of sampling devices even if we supply the device to the user. The user of the sampling device has the sole responsibility to select the proper sampler and sampling conditions to insure that a valid sample is taken for analysis. Additionally, neither this report nor IMS makes any express or implied warranty or guarantee regarding the inspection or sampling done by the inspector, the qualifications, training or sampling methodology used by the inspector performing the sampling and inspection reported herein, or the accuracy of any information provided to IMS serving as a basis for this report. The total liability of IMS related to or arising from this report to a client or any third party, whether under contract law, tort law, warranty or otherwise, shall be limited to direct damages not to exceed the fees actually received by IMS from the client for the report. The invalidity or unenforceability, in whole or in part, of any provision, term or condition herein shall not invalidate or otherwise affect the enforceability of the remainder of these provisions, terms and conditions. Client shall indemnify IMS and its officers, directors and employees and hold each of them harmless for any liability, expense or cost, including reasonable attorney's fees, incurred by reason of any third party claim in connection with IMS's services, the test result data or its use by client.

August 29, 2013

The following clarifications, modifications and/or revisions to the above project shall be considered part of the original drawings and specifications.

It shall be the responsibility of the contractor to notify their subcontractors and/or suppliers of the clarifications, modifications and/or revisions included herein.

ARCHITECTURAL

Item No. A1: The following drawings are attached to correct a printing issue where Keynotes were appearing blacked out. The attached drawings are for printing purposes only.

Sheets attached are: A2.1, A2.2, A2.3, A2.4, A2.5, A2.6, A2.7, A2.10, A2.11 and A8.6.

Item No. A2: Reference Specifications and add the following attached Sections.

a. Revised Table of Contents
b. Drawing Index
c. 057300 Decorative Metal Railings
d. 074243 Composite Wall Panels
e. 101400 Signage
f. 124813 Entrance Floor Mats and Frames

Item No. A3: Omit Specification Section 017123.16 Construction Staking by Contractor

Item No. A4: Reference Specification Section 055000 Metal Fabrications. Delete Part 3.2.

Item No. A5: Reference Specification Section 079200 Joint Sealants. Part 3.4, Item D.2, delete Items c and d.

Item No. A6: Reference Specification Section 102800 Toilet, Bath and Laundry Accessories, Part 2.2, B, revise to read:

B. Diaper-Changing Station:
   1. Basis-of-Design Product: Koala Kare; Product KB200-SS.
   2. Description: Horizontal unit that opens by folding down from stored position and with child-protection strap.

a. Engineered to support a minimum of 250-lb (113-kg) static load when opened.
3. Mounting: Recessed mounted.
4. Operation: By pneumatic shock-absorbing mechanism.
5. Material and Finish: HDPE with Type 304 brushed stainless steel flange. Color to be selected from manufacturer's standard.
6. Liner Dispenser: Built-in.

Item No. A7: Reference Specification Section 102113 – Toilet Compartments.

A. Part 1.1.A.1, revise to read:
1. Steel toilet compartments configured as toilet enclosures and urinal screens.
2. FRP (Fiberglass Reinforced Polyester) toilet compartments configured as toilet enclosures.

B. Part 2.2, revise to read as "Steel Units"

C. Part 2.2, Item J, revise to read:
J. Steel-Sheet Finish: Manufacturer's standard baked-on finish with one color in each room. Color as selected by Architect from manufacturer's full range.

Item No. A8: Reference Specification Section 102238 Operable Panel Partitions. Revise to read as follows:

A. Part 2.2, Item E:
E. STC: Not less than 51.

B. Part 2.4, delete Item E.

C. Part 2.3, delete Item B.

Item No. A9: Reference Drawing A8.4 Interior Elevations 12/A8.4. Revise detail designation 1/A8.6 to read 11/A8.6.

Item No. A10: Reference Drawing A3.5 sill detail 12/A3.5, provide and install a 1/2" fire-treated plywood on top of the existing wall construction. Increase depth of apron face 1/2".

STRUCTURAL

Item No. S1: Reference Specification Section 033000.
A. Revise Section 2.9.D to read:
1. Minimum Compressive Strength: 3500psi or 4500psi as indicated on structural drawings.
2. Maximum Water-Cementitious Materials Ratio: as indicated on structural drawings.
B. Omit Section 2.9.D.7 Synthetic Micro-Fiber.
C. Add the following to Section 3.4 Steel Reinforcement:

1. B. Furnish epoxy coated or hot dipped galvanized reinforcing bars in exterior slabs.

Item No. S2: Reference Specification Section 051200

A. Omit Section 2.2.E Shear Connectors.
B. Omit Section 2.2.I Clevises and Turnbuckles.
C. Omit Section 2.5.B Shear Connectors.

Item No. S3: Reference Specification Section 055000.

A. Omit Section 1.1.A.2 Shelf Angles.
B. Omit Section 2.8 Shelf Angles.

Item No. S4: Reference Specification Section 053100.

A. Revise Section 2.3.B.2 to read:
   2. Profile Depth: 1-1/2 inches, 0060 inches as indicated on structural drawings.
B. Revise Section 2.3.B.3 to read:
   3. Design Uncoated Steel Thickness: 0.0358 inch for 1-1/2 inch deck, 0.0295 inch for 0.60 inch deck.

ARTICLE 1 INTERPRETATIONS ..... 00700 - 1

1.1 Section 00020 Glossary: ..... 00700 - 1

1.2 Intent of the Contract Documents: ..... 00700 - 1

1.3 Priority of the Contract Documents: ..... 00700 - 2

1.4 Interpretation of Indemnification Provisions: ..... 00700 - 2

1.5 Additional Interpretations: ..... 00700 - 2

1.6 Ownership and Use of the Contract Documents: ..... 00700 - 3

1.7 Copies of the Contract Documents: ..... 00700 - 3

ARTICLE 2 THE **OWNER**-GENERAL PROVISIONS ..... 00700 - 3

2.1 Availability of Lands, Areas, Properties and Facilities: ..... 00700 - 3

2.2 Reference Points; Base Lines and Benchmarks: ..... 00700 - 3

2.3 Stop Work Order: ..... 00700 - 3

2.4 Limitations on the **Owner's** Responsibilities: ..... 00700 - 4

2.5 Additional General Provisions: ..... 00700 - 4

2.6 Partnering Charter: ..... 00700 - 4

ARTICLE 3 THE **PROFESSIONAL** – GENERAL PROVISIONS ..... 00700 - 4

3.1 **Owner's** Representative: ..... 00700 - 4

3.2 Clarifications and Interpretations: ..... 00700 - 4

3.3 Minor Variations and No-Cost Changes; Minor Delays: ..... 00700 - 5

3.4 Determinations by the **Professional**: ..... 00700 - 5

3.5 Limitations on the Professional's Responsibilities: ..... 00700 - 5

ARTICLE 4 CONTROL OF WORK – GENERAL PROVISIONS ..... 00700 - 5

4.1 Review of the Contract Documents: ..... 00700 - 5

4.2 Management, Supervision, and Personnel: ..... 00700 - 5

4.3 Materials and Equipment: ..... 00700 - 6

4.4 Concerning Control of Work: ..... 00700 - 6

4.5 Patent Fees and Royalties: ..... 00700 - 7

4.6 Use of Premises: ..... 00700 - 7

4.7 Record Documents: ..... 00700 - 7

4.8 Emergencies: ..... 00700 - 8

4.9 Indemnification: ..... 00700 - 8

ARTICLE 5 SUBCONTRACTORS AND SUPPLIERS ..... 00700 - 8

5.1 Employment of Subcontractors: ..... 00700 - 8

5.2 "Or Equal" and Substitute Materials and Equipment: ..... 00700 - 9

5.3 The **Contractor's** Continuing Responsibilities: ..... 00700 - 9

SECTION/PAGE NO.

ARTICLE 6 SUBMITTALS ..... 00700 - 10
6.1 Shop Drawing, Sample and Other Technical Submittals: ..... 00700 - 10
6.2 Review and Return of Technical Submittals: ..... 00700 - 10
6.3 Progress Schedule Submittals: ..... 00700 - 10
6.4 Review and Return of Progress Schedule Submittals: ..... 00700 - 10
6.5 Additional Provisions Concerning Submittals: ..... 00700 - 11

ARTICLE 7 LEGAL REQUIREMENTS; INSURANCE ..... 00700 - 11
7.1 Laws; Permits (Which Include Approvals and Licenses): ..... 00700 - 11
7.2 Sales and Use Tax and Other Similar Taxes: ..... 00700 - 12
7.3 Safety and Protection: ..... 00700 - 12
7.4 Bonds and Insurance - General Requirements: ..... 00700 - 12
7.5 The **Contractor's** Liability Insurance: ..... 00700 - 12
7.6 The **Owner's** Liability Insurance: ..... 00700 - 13
7.7 Property Insurance (Builder's All Risk Insurance): ..... 00700 - 13
7.8 Waiver of Rights: ..... 00700 - 14
7.9 Receipt and Application of Proceeds: ..... 00700 - 14
7.10 Unfair Labor Practice: ..... 00700 - 14
7.11 Michigan Right-To-Know Law: ..... 00700 - 14
7.12 Nondiscrimination: ..... 00700 - 14
7.13 Michigan Residency for Employees: ..... 00700 - 15
7.14 Prevailing Wages: ..... 00700 – 15
7.15 Century Date Compliance Protection ..... 00700 - 15

ARTICLE 8 PROSECUTION; SUBSTANTIAL COMPLETION ..... 00700 - 16
8.1 Starting the Work: ..... 00700 - 16
8.2 Revision 0 (Rev. 0) Schedule and Cost Submittals: ..... 00700 - 16
8.3 Compliance with Contract Time Requirements: ..... 00700 - 16
8.4 Substantial Completion: ..... 00700 - 16
8.5 Partial Use: ..... 00700 – 17
8.6 Division of Responsibilities: ..... 00700 – 17
8.7 Suspension of Work: ..... 00700 - 17
8.8 Sharing of Total Float on Non-Critical Paths: ..... 00700 - 17

ARTICLE 9 WARRANTY; TESTS, INSPECTIONS, AND APPROVALS; CORRECTION OF WORK ..... 00700 - 18
9.1 Warranty: ..... 00700 - 18
9.2 Tests, Inspections and Approvals: ..... 00700 - 18
9.3 Uncovering Work: ..... 00700 - 18
9.4 Correction of Work: ..... 00700 - 18
9.5 Special Correction Period Requirements: ..... 00700 - 19
9.6 Special Maintenance Requirements: ..... 00700 - 19

ARTICLE 10 CHANGES ..... 00700 - 20
10.1 Changes in the Work: ..... 00700 - 20
10.2 Differing Subsurface or Physical Site Conditions: ..... 00700 - 20
10.3 Responsibilities for Underground Utilities: ..... 00700 - 21
10.4 Hazardous Material Conditions: ..... 00700 - 21
10.5 Incidents with Archaeological Features: ..... 00700 - 21
10.6 Unit Price Work: ..... 00700 - 21

10.7 Cash Allowances; Provisionary Allowances: ..... 00700 - 22
10.8 Change Orders; Change Authorizations: ..... 00700 - 22

ARTICLE 11 CHANGES IN CONTRACT PRICE; CHANGES IN CONTRACT TIME ..... 00700 - 23
11.1 General Provisions: ..... 00700 - 23
11.2 Changes in Contract Time: ..... 00700 - 23
11.3 Methods for Making Adjustments in Contract Price: ..... 00700 - 23
11.4 Labor, Subcontract and Material/Equipment Costs: ..... 00700 - 24
11.5 Construction Equipment Costs: ..... 00700 - 24
11.6 Rented or Leased Construction Equipment: ..... 00700 - 24
11.7 Owned Construction Equipment: ..... 00700 - 25
11.8 General Conditions Costs: ..... 00700 - 25
11.9 Limitations on Allowable Costs: ..... 00700 - 25

SECTION/PAGE NO.

11.10 Costs Covered by the Fee for the Work Involved (and not Allowable as Cost of the Work Involved): ..... 00700 - 25
11.11 Limits on the Fee for the Work Involved: ..... 00700 - 26
11.12 Fee for Unabsorbed Home Office Overhead: ..... 00700 - 26
11.13 Changes in Contract Time for Early Completion: ..... 00700 - 26
11.14 Access to Records: ..... 00700 - 27
11.15 Price Reduction for Defective Cost and Pricing Data: ..... 00700 - 27

ARTICLE 12 PROGRESS PAYMENTS; FINAL PAYMENT ..... 00700 - 28
12.1. Schedule of Values: ..... 00700 - 28
12.2 Requests for Payment: ..... 00700 - 28
12.3 Review of Request for Payment; Intent of Review: ..... 00700 - 28
12.4 Refusal to Make or to Recommend Payment: ..... 00700 - 28
12.5 Final Request for Payment: ..... 00700 - 29
12.6 Final Payment and Acceptance: ..... 00700 - 29
12.7 **Contractor's** Continuing Obligation: ..... 00700 - 29
12.8 Waiver of Claims: ..... 00700 - 29

ARTICLE 13 OTHER WORK ..... 00700 - 30
13.1 Related Work at Site: ..... 00700 - 30
13.2 Coordination Requirements: ..... 00700 - 30
13.3 Claims Between the **Contractor** and Other Parties: ..... 00700 - 30

ARTICLE 14 TERMINATION ..... 00700 - 31
14.1 Notice Requiring Assurance of Due Performance: ..... 00700 - 31
14.2 **Contractor** Default and Termination for Cause: ..... 00700 - 31
14.3 Surety Default: ..... 00700 - 32
14.4 Termination for Convenience of the **Owner**: ..... 00700 - 32
14.5 The **Contractor** May Suspend Work: ..... 00700 – 32

ARTICLE 15 DISPUTES ..... 00700 - 33
15.1 Claims Under This Article: ..... 00700 - 33
15.2 Requirement for Certification of **Contractor** Claims: ..... 00700 - 33
15.3 Recommendations or Decisions from the **Professional**: ..... 00700 - 33
15.4 Determinations by the **Director-FA**: ..... 00700 - 33
15.5 Supplements to AAA Arbitration: ..... 00700 - 34
15.6 Interest on a Judgment; Payment of Judgment: ..... 00700 - 34
15.7 Venue; Flow-Through Provision: ..... 00700 - 34

SECTION 00800 SUPPLEMENTARY CONDITIONS ..... 00800 - 1

SECTION 057300 - DECORATIVE METAL RAILINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Alternate stainless-steel post-supported railing with glass panel infill.
B. Related Sections:
   1. Section 088000 "Glazing" for glass panel infill.

1.2 PERFORMANCE REQUIREMENTS

A. Delegated Design: Design railings, including comprehensive engineering analysis by a qualified professional engineer, using performance requirements and design criteria indicated.
B. Structural Performance: Railings shall withstand the effects of gravity loads and the following loads and stresses within limits and under conditions indicated:
   1. Handrails and Top Rails of Guards:
      a. Uniform load of 50 lbf/ft. (0.73 kN/m) applied in any direction.
      b. Concentrated load of 200 lbf (0.89 kN) applied in any direction.
      c. Uniform and concentrated loads need not be assumed to act concurrently.
   2. Infill of Guards:
      a. Concentrated load of 50 lbf (0.22 kN) applied horizontally on an area of 1 sq. ft. (0.093 sq. m).
      b. Infill load and other loads need not be assumed to act concurrently.
C. Control of Corrosion: Prevent galvanic action and other forms of corrosion by insulating metals and other materials from direct contact with incompatible materials.

1.3 PRECONSTRUCTION TESTING

A. Preconstruction Testing Service: Engage a qualified testing agency to perform preconstruction testing on laboratory mockups.
   1. Build laboratory mockups at testing agency facility; use personnel, materials, and methods of construction that will be used at Project site.
   2. Test railings according to ASTM E 894 and ASTM E 935.

1.4 SUBMITTALS

A. Product Data: For the following:
   1. Manufacturer's product lines of railings assembled from standard components.
B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.
C. Samples: For each type of exposed finish required.
D. Delegated-Design Submittal: For installed products indicated to comply with performance requirements and design criteria, including analysis data and calculations signed and sealed by the qualified professional engineer responsible for their preparation.
E. Qualification Data: For qualified professional engineer.
F. Product Test Reports: Based on evaluation of comprehensive tests performed by a qualified testing agency, according to ASTM E 894 and ASTM E 935.
G. Preconstruction test reports.

1.5 QUALITY ASSURANCE

A. Product Options: Information on Drawings and in Specifications establishes requirements for system's aesthetic effects and performance characteristics. Do not modify intended aesthetic effects, as judged solely by Architect, except with Architect's approval.
B. Safety Glazing Labeling: Permanently mark glass with certification label of the SGCC. Label shall indicate manufacturer's name, type of glass, thickness, and safety glazing standard with which glass complies.

C. Mockups: Build mockups to verify selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for fabrication and installation.
   1. Build mockups for each form and finish of railing consisting of two posts, top rail, infill area, and anchorage system components.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
   1. Stainless Steel Decorative Railing:
      a. Architectural Metal Works.
      b. Architectural Railings & Grilles, Inc.
      c. Atlantis Rail Systems; Division of Suncor Stainless.
      d. Blum, Julius & Co., Inc.
      e. Blumcraft of Pittsburgh.
      f. CraneVeyor Corp.
      g. C.R. Laurence Co., Inc.
      h. Forms+Surfaces
      i. Livers Bronze Co.
      j. Newman Brothers, Inc.
      k. P & P Artec.
      l. Pisor Industries, Inc.
      m. Platers Polishing Company; a division of Rippel Architectural Metals.
      n. Taco
      o. Wagner, R & B, Inc.; a division of the Wagner Companies.
      p. Wylie Systems.

2.2 METALS, GENERAL

A. Brackets, Flanges, and Anchors: Same metal and finish as supported rails unless otherwise indicated.

2.3 STAINLESS STEEL

A. Tubing: ASTM A 554, Grade MT 304.
B. Pipe: ASTM A 312/A 312M, Grade TP 304.
C. Castings: ASTM A 743/A 743M, Type 304L
D. Sheet, Strip, Plate, and Flat Bar: ASTM A 666, Type 304.
E. Bars and Shapes: ASTM A 276, Type 304.

2.4 GLAZING MATERIALS

A. Glazing Gaskets for Glass Infill Panels: Glazing gaskets and related accessories recommended or supplied by railing manufacturer for installing glass infill panels in post-supported railings.

2.5 FASTENERS

A. Fastener Materials: Unless otherwise indicated, provide the following:
   1. Stainless-Steel Components: Type 304 stainless-steel fasteners.
   2. Uncoated Steel Components: Plated-steel fasteners complying with ASTM B 633, Class Fe/Zn 25 for electrodeposited zinc coating where concealed; Type 304 stainless-steel fasteners where exposed.
   3. Dissimilar Metals: Type 304 stainless-steel fasteners.
B. Anchors, General: Anchors capable of sustaining, without failure, a load equal to six times the load imposed when installed in unit masonry and four times the load imposed when installed in concrete, as determined by testing according to ASTM E 488, conducted by a qualified independent testing agency.
C. Post-Installed Anchors: Torque-controlled expansion anchors.

2.6 FABRICATION

A. General: Fabricate railings to comply with requirements indicated for design, dimensions, member sizes and spacing, details, finish, and anchorage, but not less than that required to support structural loads.
B. Connections: Fabricate railings with nonwelded connections unless otherwise indicated.
C. Welded Connections: Cope components at connections to provide close fit, or use fittings designed for this purpose. Weld all around at connections, including at fittings.
   1. At exposed connections, finish exposed welds to comply with NOMMA's "Voluntary Joint Finish Standards" for Type 1 welds: no evidence of a welded joint.
D. Mechanical Connections: Connect members with concealed mechanical fasteners and fittings.
E. Form changes in direction by inserting prefabricated elbow fittings.
F. Bend members in jigs to produce uniform curvature for each configuration required; maintain cross section of member throughout entire bend without buckling, twisting, cracking, or otherwise deforming exposed surfaces of components.
G. Close exposed ends of hollow railing members with prefabricated end fittings.
H. Provide wall returns at ends of wall-mounted handrails unless otherwise indicated.
I. Brackets, Flanges, Fittings, and Anchors: Provide wall brackets, flanges, miscellaneous fittings, and anchors to interconnect railing members to other work unless otherwise indicated.

2.7 GLAZING PANEL FABRICATION

A. Infill Panels: Provide 1/2 inch thick laminated, tempered glass panels.

2.8 STAINLESS-STEEL FINISHES

A. Directional Satin Finish: No. 4.
B. Dull Satin Finish: No. 6.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Perform cutting, drilling, and fitting required for installing railings. Set railings accurately in location, alignment, and elevation; measured from established lines and levels and free of rack.
   1. Set posts plumb within a tolerance of 1/16 inch in 3 feet (2 mm in 1 m).
   2. Align rails so variations from level for horizontal members and variations from parallel with rake of steps and ramps for sloping members do not exceed 1/4 inch in 12 feet (5 mm in 3 m).
B. Anchor posts to metal surfaces as indicated using fittings designed and engineered for this purpose.
C. Secure wall brackets to building construction as follows:
   1. For steel-framed partitions, use hanger or lag bolts set into fire-retardant-treated wood backing between studs.
   2. For steel-framed partitions, fasten brackets directly to steel framing or concealed steel reinforcements using self-tapping screws of size and type required to support structural loads.

END OF SECTION 057300

SECTION 074243 - COMPOSITE WALL PANELS

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes metal composite material (MCM) wall panels with rainscreen – principal installation.
   1. Zinc-faced.

1.2 PERFORMANCE REQUIREMENTS

A. Delegated Design: Design metal-faced composite wall panel assembly, including comprehensive engineering analysis by a qualified professional engineer, using performance requirements and design criteria indicated.
B. Structural Performance: Provide metal-faced composite wall panel assemblies capable of withstanding the effects of the following loads and stresses within limits and under conditions indicated, based on testing according to ASTM E 330:
   1. Wind Loads: Determine loads based on the following minimum design wind pressures:
      a. Uniform pressure of 24 lbf/sq. ft., acting inward or outward.
   2. Deflection Limits: Metal-faced composite wall panel assemblies shall withstand wind loads with horizontal deflections no greater than 1/175 of the span at the perimeter and 1/60 of the span anywhere in the panel of the span.

1.3 SUBMITTALS

A. Product Data: For each type of product indicated.
B. Shop Drawings: Show fabrication and installation layouts of metal-faced composite wall panels; details of edge conditions, joints, panel profiles, corners, anchorages, attachment system, trim, flashings, closures, and accessories; and special details. Distinguish among factory-, shop-, and field-assembled work.
C. Samples: For each type of exposed finish required.
D. Delegated-Design Submittal: For metal-faced composite wall panel assembly indicated to comply with performance requirements and design criteria, including analysis data and calculations signed and sealed by the qualified professional engineer responsible for their preparation.
E. Coordination Drawings: Exterior elevations, drawn to scale, on which the following items are shown and coordinated with each other.
F. Product test reports.
G. Maintenance data.
H. Samples of special warranties.

1.4 QUALITY ASSURANCE

A. Installer Qualifications: An entity that employs installers and supervisors who are trained and approved by manufacturer.
B. Exterior Wall Mockup: Provide MCM wall panel construction for exterior wall mockup specified in Section 014339.
C. Refer to Section 014000 Quality Requirements for Owner Quality Assurance Testing.
   1. Subject to compliance with requirements, approved field samples may become part of the completed Work if undisturbed at time of Substantial Completion.
D. Refer to Field Quality Control in Part 3.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Deliver components, metal composite material panels, and other manufactured items so as not to be damaged or deformed. Package metal composite material panels for protection during transportation and handling.

B. Unload, store, and erect metal composite material panels in a manner to prevent bending, warping, twisting, and surface damage.

C. Stack metal composite material panels horizontally on platforms or pallets, covered with suitable weathertight and ventilated covering. Store metal composite material panels to ensure dryness, with positive slope for drainage of water. Do not store metal composite material panels in contact with other materials that might cause staining, denting, or other surface damage.

D. Retain strippable protective covering on metal composite material panels during installation.

E. Zinc Panels: Wear gloves when handling to prevent fingerprints and soiling of surface.

1.6 WARRANTY

A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace components of metal-faced composite wall panel assemblies that fail in materials or workmanship within specified warranty period.
   1. Warranty Period: Two years from date of Substantial Completion.

B. Special Warranty on Panel Finishes: Manufacturer's standard form in which manufacturer agrees to repair finish or replace metal-faced composite wall panels that show evidence of deterioration of factory-applied finishes within specified warranty period.
   1. Finish Warranty Period: 20 years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 METAL COMPOSITE MATERIAL WALL PANELS

A. Metal Composite Material Wall Panel Systems: Provide factory-formed and -assembled, metal composite material wall panels fabricated from two metal facings that are bonded to a solid, extruded thermoplastic core; formed into profile for installation method indicated. Include attachment assembly components, panel stiffeners, and accessories required for weathertight system.
   1. Basis-of-Design Product: Subject to compliance with requirements, provide Centria Architectural Systems Formabond Wall System or comparable product by one of the following:
      a. 3A Composites USA, Inc.
      b. Alcoa Inc.
      c. Citadel Architectural Products, Inc.
      d. Firestone Metal Products, LLC.
      e. Riverside Group.

B. Zinc-Faced Composite Wall Panels: Formed with two sheets of 0.050 inch thick zinc sheet facings.
   1. Exterior Finish Material: Architectural rolled zinc alloy, ASTM B69.
      a. Manufacturer: ALPOLIC Natural Metals Series, Zinc Composite metal (ZCM).
      b. Face Sheet Finish: VM Zinc Quartz Zinc Finish.
      c. Face Sheet Surface: Smooth.
   2. Panel Thickness: 0.236 inch.
   3. Core: Fire retardant.

2.2 MISCELLANEOUS METAL FRAMING

A. Miscellaneous Metal Framing, General: ASTM C 645, cold-formed metallic-coated steel sheet, ASTM A 653/A 653M, G60 (Z180) hot-dip galvanized or coating with equivalent corrosion resistance unless otherwise indicated.

B. Subgirts: Manufacturer's standard C- or Z-shaped sections 0.064-inch (1.63-mm) nominal thickness.

C. Zee Clips: 0.079-inch (2.01-mm) nominal thickness.

D. Base or Sill Angles: 0.079-inch (2.01-mm) nominal thickness.

E. Hat-Shaped, Rigid Furring Channels:
   1. Nominal Thickness: As required to meet performance requirements.
   2. Depth: As indicated.

F. Cold-Rolled Furring Channels: Minimum 1/2-inch- (13-mm-) wide flange.
   1. Nominal Thickness: 0.064 inch (1.63 mm).
   2. Depth: 3/4 inch (19 mm).

3. Furring Brackets: Adjustable, corrugated-edge type of steel sheet with nominal thickness of 0.040 inch (1.02 mm).
4. Tie Wire: ASTM A 641/A 641M, Class 1 zinc coating, soft temper, 0.062-inch- (1.57-mm-) diameter wire, or double strand of 0.048-inch- (1.22-mm-) diameter wire.

2.3 MISCELLANEOUS MATERIALS

A. Aluminum Extrusions: ASTM B 221 (ASTM B 221M).
B. Fasteners: Self-tapping screws, bolts, nuts, self-locking rivets and bolts, end-welded studs, and other suitable fasteners designed to withstand design loads. Provide exposed fasteners with heads matching color of metal-faced composite wall panels by means of plastic caps or factory-applied coating. Provide EPDM, PVC, or neoprene sealing washers.
C. Attachment System Components: Formed from extruded aluminum.
   1. Rain Screen System (Dry Joint): Include manufacturer's standard perimeter extrusions with integral weather stripping panel stiffeners panel clips and anchor channels for manufacturer's standard Rains Screen System.

2.4 ACCESSORIES

A. Wall Panel Accessories: Provide components required for a complete metal-faced composite wall panel assembly including trim, copings, fasciae, mullions, sills, corner units, clips, flashings, sealants, gaskets, fillers, closure strips, and similar items. Match material and finish of metal-faced composite wall panels unless otherwise indicated.
B. Flashing and Trim: Formed from 0.018-inch- (0.46-mm-) minimum thickness, zinc-coated (galvanized) steel sheet or aluminum-zinc alloy-coated steel sheet prepainted with coil coating. Provide flashing and trim as required to seal against weather and to provide finished appearance. Locations include, but are not limited to, bases, drips, sills, jambs, corners, endwalls, framed openings, rakes, fasciae, parapet caps, soffits, reveals, and fillers. Finish flashing and trim with same finish system as adjacent metal-faced composite wall panels.

2.5 FABRICATION

A. General: Fabricate and finish metal-faced composite wall panels and accessories at the factory to greatest extent possible, by manufacturer's standard procedures and processes, as necessary to fulfill indicated performance requirements demonstrated by laboratory testing. Comply with indicated profiles and with dimensional and structural requirements.
B. Fabricate metal-faced composite wall panels in a manner that eliminates condensation on interior side of panel and with joints between panels designed to form weathertight seals.
C. Metal-Faced Composite Wall Panels: Factory form panels in a continuous process with no glues or adhesives between dissimilar materials. Trim and square edges of sheets with no displacement of face sheets or protrusion of core material.
   1. Form panel lines, breaks, and angles to be sharp and true, with surfaces free from warp and buckle.
   2. Fabricate panels with sharply cut edges, with no displacement of face sheets or protrusion of core material.
   3. Fabricate panels with panel stiffeners, as required to comply with deflection limits, attached to back of panels with structural silicone sealant or bond tape.
   4. Dimensional Tolerances:
      a. Panel Bow: 0.8 percent maximum of panel length or width.
      b. Squareness: 0.25 inch (5 mm) maximum.
D. Sheet Metal Accessories: Fabricate flashing and trim to comply with recommendations in SMACNA's "Architectural Sheet Metal Manual" that apply to design, dimensions, metal, and other characteristics of item indicated.

PART 3 - EXECUTION

3.1 PREPARATION

A. Miscellaneous Framing: Install subgirts, base angles, sills, furring, and other miscellaneous wall panel support members and anchorage according to ASTM C 754 and metal-faced composite wall panel manufacturer's written instructions.

3.2 METAL-FACED COMPOSITE WALL PANEL INSTALLATION

A. Attachment System Installation, General: Install attachment system required to support metal-faced composite wall panels and to provide a complete weathertight wall system, including subgirts, perimeter extrusions, tracks, drainage channels, panel clips, and anchor channels.
   1. Include attachment to supports, panel-to-panel joinery, panel-to-dissimilar-material joinery, and panel-system joint seals.
   2. Do not begin installation until weather barrier and flashings that will be concealed by composite panels are installed.

B. Fasteners:
   1. Zinc Panels: Use zinc, aluminum, stainless-steel or hardware-bronze fasteners.

C. Metal Protection: Where dissimilar metals contact each other or corrosive substrates, protect against galvanic action as recommended in writing by metal composite material panel manufacturer.

D. Attachment Assembly, General: Install attachment assembly required to support metal composite material wall panels and to provide a complete weathertight wall system, including subgirts, perimeter extrusions, tracks, drainage channels, panel clips, and anchor channels.
   1. Include attachment to supports, panel-to-panel joinery, panel-to-dissimilar-material joinery, and panel-system joint seals.

E. Rainscreen-Principle Installation: Provide manufacturer's standard pressure-equalized, rainscreen-principle system with vertical channel that provides support and complete secondary drainage system, draining at base of wall. Notch vertical channel to receive support pins. Install vertical channels supported by channel brackets or adjuster angles and at locations, spacings, and with fasteners recommended by manufacturer. Attach wall panels by engaging horizontal support pins into notches in vertical channels and into flanges of wall panels. Leave horizontal and vertical joints with open reveal.
   1. Install wall panels to allow individual panels to "free float" and be installed and removed without disturbing adjacent panels.
   2. Do not apply sealants to joints unless otherwise indicated on Drawings.

3.3 ACCESSORY INSTALLATION

A. General: Install accessories with positive anchorage to building and weathertight mounting and provide for thermal expansion. Coordinate installation with flashings and other components.
   1. Install components required for a complete metal-faced composite wall panel assembly including trim, copings, corners, seam covers, flashings, sealants, gaskets, fillers, closure strips, and similar items.

B. Flashing and Trim: Comply with performance requirements, manufacturer's written installation instructions, and SMACNA's "Architectural Sheet Metal Manual." Provide concealed fasteners where possible, and set units true to line and level as indicated. Install work with laps, joints, and seams that will be permanently watertight and weather resistant.

C. Louvers: Coordinate and install louvers to seamlessly integrate with metal panel system. Provide concealed fasteners where possible, set units true to line and level as indicated. Install work with laps, joints, and seams that will be permanently watertight and weather resistant.

3.4 ERECTION TOLERANCES

A. Installation Tolerances: Shim and align metal-faced composite wall panel units within installed tolerance of 1/4 inch in 20 feet (6 mm in 6 m), nonaccumulative, on level, plumb, and location lines as indicated and within 1/8-inch (3-mm) offset of adjoining faces and of alignment of matching profiles.

3.5 CLEANING

A. Remove temporary protective coverings and strippable films, if any, as metal-faced composite wall panels are installed unless otherwise indicated in manufacturer's written installation instructions. On completion of metal-faced composite wall panel installation, clean finished surfaces as recommended by panel manufacturer. Maintain in a clean condition during construction.

B. After metal-faced composite wall panel installation, clear weep holes and drainage channels of obstructions, dirt, and sealant.

END OF SECTION 074243

SECTION 101400 - SIGNAGE

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:
   1. Exterior illuminated building signs.

1.2 DEFINITIONS

A. ADA Accessibility Guidelines: U.S. Architectural & Transportation Barriers Compliance Board's "Americans with Disabilities Act (ADA) Accessibility Guidelines for Buildings and Facilities.

1.3 SUBMITTALS

A. Product Data: For each type of product indicated.
B. Shop Drawings: Show fabrication and installation details for signs.
   1. Show sign mounting heights, locations of supplementary supports to be provided by others, and accessories.
   2. Provide message list, typestyles, graphic elements, including tactile characters and Braille, and layout for each sign.
C. Samples: For each sign type and for each color and texture required.

1.4 QUALITY ASSURANCE

A. Regulatory Requirements: Comply with applicable provisions in ADA-ABA Accessibility Guidelines and ICC/ANSI A117.1.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Aluminum Castings: ASTM B 26/B 26M, of alloy and temper recommended by sign manufacturer for casting process used and for use and finish indicated.
B. Acrylic Sheet: ASTM D 4802, Category A-1 (cell-cast sheet), Type UVA (UV absorbing).

2.2 ILLUMINATED CHANNEL LETTER SIGNAGE

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
   1. ACE Sign Systems, Inc.
   2. Advance Corporation; Braille-Tac Division.
   3. Allen Industries Architectural Signage
   4. Allenite Signs; Allen Marking Products, Inc.
   5. APCO Graphics, Inc.
   6. ASI-Modulex, Inc.
   7. Best Sign Systems Inc.
   8. Bunting Graphics, Inc.
   9. Fossil Industries, Inc.
   10. Gemini Incorporated.
   11. Grimco, Inc.
   12. Innerface Sign Systems, Inc.
   13. InPro Corporation
   14. Matthews International Corporation; Bronze Division.
   15. Mills Manufacturing Company.
   16. Mohawk Sign Systems.
   17. Nelson-Harkins Industries.

18. Seton Identification Products.
19. Signature Signs, Incorporated.
20. Supersine Company (The)

B. Illuminated Channel Letter Signage: Provide 30" high channel letter signage as indicated on the drawings.
1. Profinished .040" x 5" aluminum returns, high reflective white interior.
2. Aluminum backs with high reflective white.
3. 3/16" acrylic face color to be selected from manufacturer's standard.
4. 1" trim cap.
5. UL certified LED module, super high brightness light uniformity 50,000 hours guarantee.
6. LED transformer 12V.
7. Energy-saving, environmental protection and colorful visible day and night.
8. Waterproof and rust resistant construction.
9. Font: To be selected, from manufacturer's standard.
10. Accessories, raceways and mounting device per manufacturer's recommendations.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Site Verification of Conditions: Verify installation conditions previously established under other sections are acceptable for product installation in accordance with manufacturer's instructions.

3.2 INSTALLATION

A. Install product in accordance with supplier's instructions.
B. Install product in locations indicated using mounting methods recommended by sign manufacturer and free from distortion, warp, or defect adversely affecting appearance.
C. Install product level, plumb, and at heights indicated.
D. Install signs within the following tolerances and in accordance with manufacturer's recommendations:

3.3 CLEANING, PROTECTION, AND REPAIR

A. Repair scratches and other damage which might have occurred during installation. Replace components where repairs were made but are still visible to the unaided eye from a distance of 5 feet.

3.4 FABRICATION

A. General: Provide manufacturer's standard signs of configurations indicated.
1. Welded Connections: Comply with AWS standards for recommended practices in shop welding. Provide welds behind finished surfaces without distortion or discoloration of exposed side. Clean exposed welded surfaces of welding flux and dress exposed and contact surfaces.
2. Mill joints to tight, hairline fit. Form joints exposed to weather to exclude water penetration.
3. Conceal fasteners if possible; otherwise, locate fasteners where they will be inconspicuous.

END OF SECTION 101400

SECTION 124813 - ENTRANCE FLOOR MATS AND FRAMES

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Recessed level base frame with removable mat.

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product.
B. Shop Drawings:
   1. Items penetrating floor mats and frames, including door control devices.
   2. Divisions between mat sections.
   3. Perimeter floor moldings.
   4. Custom Graphics: Scale drawing indicating colors.
C. Samples: For each floor mat, tread rail, and frame member.

1.3 CLOSEOUT SUBMITTALS

A. Maintenance data.

PART 2 - PRODUCTS

2.1 ENTRANCE FLOOR MATS AND FRAMES, GENERAL

A. Regulatory Requirements: Comply with applicable provisions in the U.S. Architectural & Transportation Barriers Compliance Board's ADA-ABA Accessibility Guidelines for Buildings and Facilities and ICC A117.1.

2.2 FLOOR MATS

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
B. Basis-of-Design Product: Subject to compliance with requirements, provide Pedimat M1 level base frame with Peditred G4 insert with heavy duty carpet tread or a comparable product by one of the following:
   1. Arden Architectural Specialties, Inc.
   2. Balco, Inc.
   3. Construction Specialties, Inc..
   4. Kadee Industries, Inc.

2.3 MATERIALS

A. General: Provide colors, patterns and profiles of materials, including metals and metal finishes indicated or specified. Where not indicated, provide color, patterns and profiles selected by Architect from manufacturer's standards.
B. Model and Description: M1 Pedimat exposed hinge rail connectors shall be extruded 6063-T6 complete with penetrations for drainage. Tread rails shall be manufactured from high impact regrind PET-G complete with co-extruded soft-durometer cushion finish shall be manufacturer's standard mill finish.
C. Recessed Mat Frame: LB – level base frame shall be a 3/4" (19 mm) deep recessed frame in 6063-T5 aluminum alloy with 1¼" wide exposed surface. Black EPPM trim fillers shall be furnished when 2" (50.8 mm) tread spacing cannot be maintained. Frame door shall be manufacturer's standard mill finish.
D. Tread Insert: Peditred G4 EC – Exterior carpet shall be solution dyed polypropylene fibers with 50/50 blend of 600/R-Denier multi filament and 595/D1 monofilament, to be selected from manufacturer's standard colors. The texturized fibers shall have ultraviolet blockers and color as an integral part of the filament. Fiber and

monofilament shall be fusion-bonded to a rigid two-ply backing to prevent fraying, supplied in continuous splice-free length. Carpet weight shall be 32-oz/yd^2.

2.4 FABRICATION

A. Floor Mats: Shop fabricate units to greatest extent possible in sizes indicated. Unless otherwise indicated, provide single unit for each mat installation; do not exceed manufacturer's recommended maximum sizes for units that are removed for maintenance and cleaning. Where joints in mats are necessary, space symmetrically and away from normal traffic lanes. Miter corner joints in framing elements with hairline joints or provide prefabricated corner units without joints.

B. Coat concealed surfaces of aluminum frames that contact cementitious material with manufacturer's standard protective coating.

PART 3 - EXECUTION

3.1 INSTALLATION

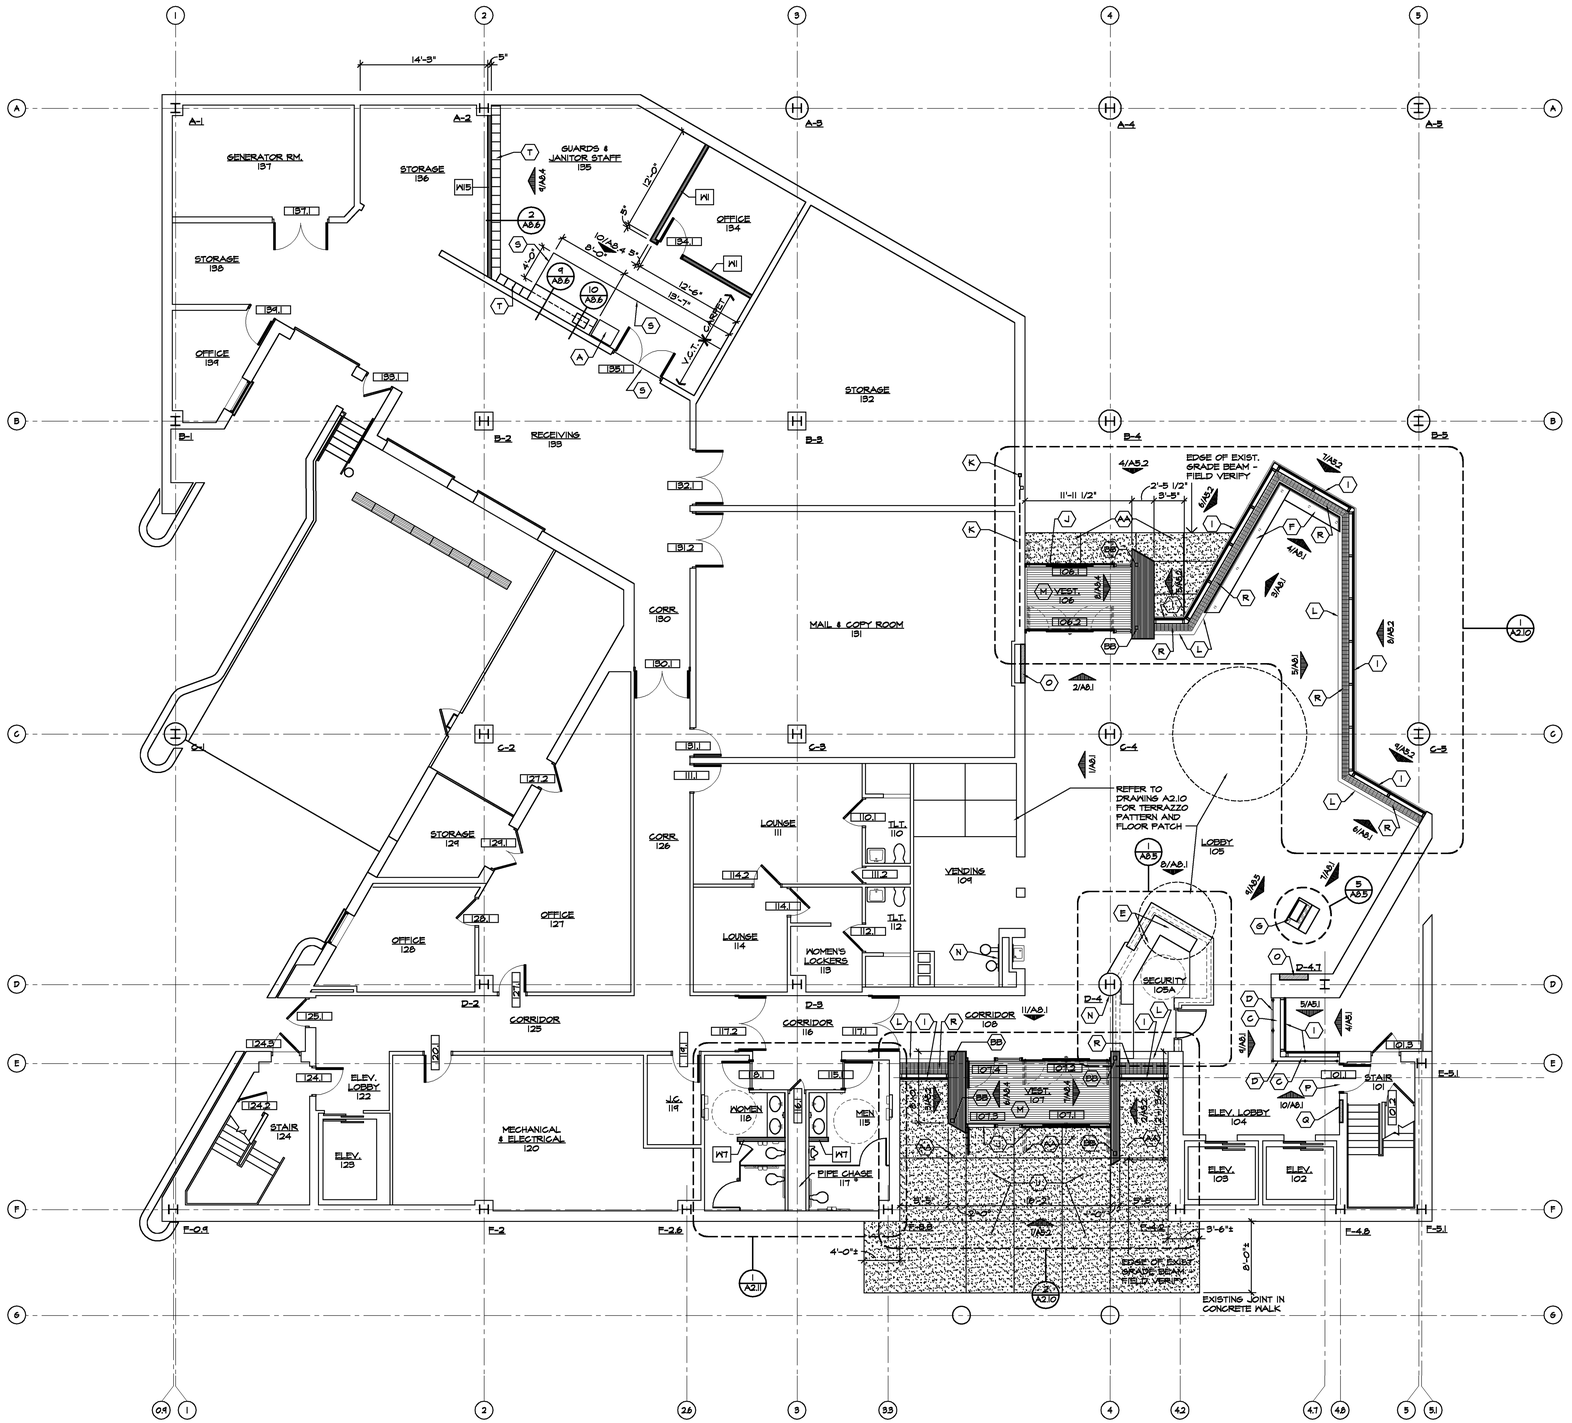
A. Install recessed mat frames to comply with manufacturer's written instructions. Set mat tops at height recommended by manufacturer for most effective cleaning action; coordinate tops of mat surfaces with bottoms of doors that swing across mats to provide clearance between door and mat.

B. Install surface-type units to comply with manufacturer's written instructions at locations indicated; coordinate with entrance locations and traffic patterns.

3.2 PROTECTION

A. After completing frame installation and concrete work, provide temporary filler of plywood or fiberboard in recesses and cover frames with plywood protective flooring. Maintain protection until construction traffic has ended and Project is near Substantial Completion.

END OF SECTION 124813



NORTH

FLOOR PLAN LEVEL 1

SCALE: 1/8" = 1'-0"

NEW WALL CONSTRUCTION TYPES:

- W1 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED CEILING SYSTEM. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE.
- W2 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W3 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH ONE SIDE. PAINTED 5/8" GYPSUM BOARD ONE SIDE. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W4 6" METAL FRAMING @ 16"O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W5 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD ONE SIDE. PAINTED 5/8" GYPSUM BOARD WITH 3/4" PLYWOOD BACKER BOARD AT CONFERENCE SIDE OF WALL. NOTE: BACKER BOARD SHALL BE INSTALLED FULL LENGTH OF WALL FROM FINISH FLOOR TO A HEIGHT OF 8'-0" A.F.F.
- W6 SAME AS "W5" - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED CEILING SYSTEM.
- W7 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED GYPSUM BOARD CEILING SYSTEM. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH BOTH SIDES.
- W8 6" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE, INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH ONE SIDE. PAINTED 5/8" GYPSUM BOARD ONE SIDE. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W9 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD ONE SIDE. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W10 SAME AS "W9" - DELETE SOUND INSULATION AND ACOUSTICAL SEAL.
- W11 SAME AS "W1" - DELETE SOUND INSULATION.
- W12 CLAD EXISTING WALL CONSTRUCTION WITH 3/4" PLYWOOD BACKER BOARD AND PAINTED 5/8" GYPSUM BOARD EXTEND GYPSUM BOARD FROM FINISH FLOOR TO A HEIGHT A MINIMUM OF 6" ABOVE SUSPENDED CEILING SYSTEM. EXTEND PLYWOOD FROM FINISH FLOOR TO 8'-0" ABOVE FINISH FLOOR.
- W13 9" WIDE WALL: 3 5/8" METAL FRAMING @ 16" O.C. STAGGERED - EXTEND FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W14 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR T DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD WITH 3/4" PLYWOOD BACKER BOARD SIDES. NOTE: BACKER BOARD SHALL BE INSTALLED FULL LENGTH OF WALL FROM FINISH FLOOR TO A HEIGHT OF 8'-0" A.F.F..
- W15 1 HR CONSTRUCTION: 3 5/8" METAL FRAMING @ 16" O.C. EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES.
- W16 SAME AS W15, SOUND INSULATE AND SEAL.
- W17 SAME AS W16 WITH MOISTURE RESISTANT GYPSUM BOARD AND CERAMIC TILE FINISH ON TOILET ROOM SIDE OF WALL.

FLOOR PLAN KEYNOTES:

- A APPLIANCE / VENDING - BY OWNERS.
- B OPERABLE PARTITION.
- C NEW SOLID SURFACE STOOL. REFER TO DETAIL 12/A3.5.
- D NEW GLASS GUARD RAIL - REFER TO SPECIFICATIONS.
- E SECURITY DESK - REFER TO DETAILS.
- F COUNTER - REFER TO DETAILS.
- G DIRECTORY KIOSK - REFER TO DETAILS.
- H FIELD VERIFY DEPTH AND WIDTH OF POCKET TO RECEIVE OPERABLE PARTITION WITH MANUFACTURER.
- I NEW ALUMINUM CURTAIN WALL SYSTEM WITH 1" INSULATED GLASS.
- J METAL THRESHOLD.
- K REFER TO STRUCTURAL DRAWINGS FOR NEW COLUMN AND BEAM INSTALLATION. PATCH AND REPAIR WALLS TO MATCH EXISTING AT DEMOLITION AND NEW CONSTRUCTION POINTS.
- L EXISTING TERRAZZO CURB TO REMAIN REFER TO A7.1 AND MECHANICAL DRAWINGS FOR PATCHING AND VENT TRIM INSTALLATION.
- M RECESSED ENTRANCE MAT OVER NEW 6" CONCRETE SLAB. REFER TO STRUCTURAL DRAWINGS.
- N PATCH AND REPAIR WALL AT DEMOLITION AND NEW CONSTRUCTION POINT.
- O INFILL EXISTING OPENING AT REMOVED CABINET HEATER WITH BRICK VENEER - TOOTH INTO EXISTING AND MATCH COURSING.
- P INFILL EXISTING OPENING AT REMOVED FRAME WITH BRICK VENEER, METAL FRAMING AND GYPSUM BOARD - REFER TO DETAIL 1/A3.5. TOOTH INTO EXISTING AND MATCH COURSING.
- Q INFILL EXISTING OPENING AT REMOVED DISPLAY CASE WITH BRICK VENEER - TOOTH INTO EXISTING MATCH COURSING.
- R NEW GRILLE - REFER TO MECHANICAL DRAWINGS.
- S VINYL TRANSITION STRIP.
- T NEW METAL LOCKERS TYPE A. REFER TO SPECIFICATIONS.
- U NEW 4" THICK CONCRETE SIDEWALK WITH 6x6 W1.4xW1.4 W.W.F.
- V EXPANSION JOINT COVER.
- W NEW CONCRETE SLAB OVER 1 1/2" METAL DECK (REFER TO STRUCTURAL DRAWINGS). MATCH EXISTING FINISH FLOOR ELEVATION.
- X CONCRETE FLOOR INFILL MATCH EXISTING FINISH FLOOR ELEVATION.
- Y INFILL EXISTING OPENING AT REMOVED DOOR AND FRAME WITH BRICK VENEER, METAL FRAMING AND GYPSUM BOARD. TOOTH BRICK INTO EXISTING MATCH COURSING.
- Z REPAIR / REPLACE DAMAGED BRICK AND MORTAR AT REMOVED CURTAIN WALL BRACKETS. TUCKPOINT MORTAR AT ALL REMOVED ANCHORS.
- AA NEW 6" THICK CONCRETE SLAB WITH #4 @ 8" O.C. E.W. ON 6" DEEP FORM DECK - REFER TO STRUCTURAL DRAWINGS
- BB NEW COLUMN - REFER TO STRUCTURAL DRAWINGS

NEW WALL CONSTRUCTION TYPES:

- W1 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED CEILING SYSTEM. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE.
- W1.1 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W1.2 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH ONE SIDE. PAINTED 5/8" GYPSUM BOARD ONE SIDE. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W1.3 6" METAL FRAMING @ 16"O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W1.4 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD ONE SIDE. PAINTED 5/8" GYPSUM BOARD WITH 5/4" PLYWOOD BACKER BOARD AT CONFERENCE SIDE OF WALL. NOTE: BACKER BOARD SHALL BE INSTALLED FULL LENGTH OF WALL FROM FINISH FLOOR TO A HEIGHT OF 8'-0" A.F.F.
- W1.5 SAME AS "W5" - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED CEILING SYSTEM.
- W1.7 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED GYPSUM BOARD CEILING SYSTEM. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH BOTH SIDES.
- W1.8 6" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH ONE SIDE. PAINTED 5/8" GYPSUM BOARD ONE SIDE. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W1.9 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD ONE SIDE. 5/8" GYPSUM BOARD WITH F.R.P. WALL FINISH ONE SIDE. EXTEND F.R.P. PANEL FROM FINISH FLOOR TO CEILING. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W1.10 SAME AS "W9" - DELETE SOUND INSULATION AND ACOUSTICAL SEAL.
- W1.11 SAME AS "W1" - DELETE SOUND INSULATION.
- W1.12 CLAD EXISTING WALL CONSTRUCTION WITH 5/4" PLYWOOD BACKER BOARD AND PAINTED 5/8" GYPSUM BOARD EXTEND GYPSUM BOARD FROM FINISH FLOOR TO A HEIGHT A MINIMUM OF 6" ABOVE SUSPENDED CEILING SYSTEM. EXTEND PLYWOOD FROM FINISH FLOOR TO 8'-0" ABOVE FINISH FLOOR.
- W1.13 9" WIDE WALL. 3 5/8" METAL FRAMING @ 16" O.C. STAGGERED - EXTEND FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W1.14 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR T DECK ABOVE. INSTALL DEFLECTION TRACK, PAINTED 5/8" GYPSUM BOARD WITH 3/4" PLYWOOD BACKER BOARD SIDES. NOTE: BACKER BOARD SHALL BE INSTALLED FULL LENGTH OF WALL FROM FINISH FLOOR TO A HEIGHT OF 8'-0" A.F.F..
- W1.15 1 HR CONSTRUCTION. 3 5/8" METAL FRAMING @ 16" O.C. EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE, INSTALL DEFLECTION TRACK, PAINTED 5/8" GYPSUM BOARD BOTH SIDES.
- W1.16 SAME AS W1.15, SOUND INSULATE AND SEAL.
- W1.17 SAME AS W1.6 WITH MOISTURE RESISTANT GYPSUM BOARD AND CERAMIC TILE FINISH ON TOILET ROOM SIDE OF WALL.

FLOOR PLAN KEYNOTES:

NORTH SCALE: 1/8" = 1'-0"

NEW WALL CONSTRUCTION TYPES:

- W1 — 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED CEILING SYSTEM. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE.
- W2 — 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W3 — 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH ONE SIDE. PAINTED 5/8" GYPSUM BOARD ONE SIDE. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W4 — 6" METAL FRAMING @ 16"O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W5 — 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD ONE SIDE. PAINTED 5/8" GYPSUM BOARD WITH 3/4" PLYWOOD BACKER BOARD AT CONFERENCE SIDE OF WALL. NOTE: BACKER BOARD SHALL BE INSTALLED FULL LENGTH OF WALL FROM FINISH FLOOR TO A HEIGHT OF 8'-0" A.F.F.
- W6 — SAME AS "W5" - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED CEILING SYSTEM.
- W7 — 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO SUSPENDED GYPSUM BOARD CEILING SYSTEM. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH BOTH SIDES.
- W8 — 6" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE, INSTALL DEFLECTION TRACK. 5/8" MOISTURE RESISTANT GYPSUM BOARD WITH CERAMIC TILE FINISH ONE SIDE. PAINTED 5/8" GYPSUM BOARD ONE SIDE. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W9 — 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE, INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD ONE SIDE. 5/8" GYPSUM BOARD WITH F.R.P. WALL FINISH ONE SIDE, EXTEND F.R.P. PANEL FROM FINISH FLOOR TO CEILING. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W10 — SAME AS "W8" - DELETE SOUND INSULATION AND ACOUSTICAL SEAL.
- W11 — SAME AS "W1" - DELETE SOUND INSULATION.
- W12 — CLAD EXISTING WALL CONSTRUCTION WITH 3/4" PLYWOOD BACKER BOARD AND PAINTED 5/8" GYPSUM BOARD EXTEND GYPSUM BOARD FROM FINISH FLOOR TO A HEIGHT A MINIMUM OF 6" ABOVE SUSPENDED CEILING SYSTEM. EXTEND PLYWOOD FROM FINISH FLOOR TO 8'-0" ABOVE FINISH FLOOR.
- W13 — 9" WIDE WALL. 3 5/8" METAL FRAMING @ 16" O.C. STAGGERED - EXTEND FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W14 — 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR T DECK ABOVE. INSTALL DEFLECTION TRACK, PAINTED 5/8" GYPSUM BOARD WITH 3/4" PLYWOOD BACKER BOARD SIDES. NOTE. BACKER BOARD SHALL BE INSTALLED FULL LENGTH OF WALL FROM FINISH FLOOR TO A HEIGHT OF 8'-0" A.F.F..
- W15 — 1 HR CONSTRUCTION: 3 5/8" METAL FRAMING @ 16" O.C. EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE, INSTALL DEFLECTION TRACK, PAINTED 5/8" GYPSUM BOARD BOTH SIDES.
- W16 — SAME AS W15, SOUND INSULATE AND SEAL.
- W17 — SAME AS W16 WITH MOISTURE RESISTANT GYPSUM BOARD AND CERAMIC TILE FINISH ON TOILET ROOM SIDE OF WALL.

FLOOR PLAN KEYNOTES:

- A — APPLIANCE / VENDING - BY OWNERS.
- B — OPERABLE PARTITION.
- C — NEW SOLID SURFACE STOOL. REFER TO DETAIL 12/A3.5.
- D — NEW GLASS GUARD RAIL - REFER TO SPECIFICATIONS.
- E — SECURITY DESK - REFER TO DETAILS.
- F — COUNTER - REFER TO DETAILS.
- G — DIRECTORY KIOSK - REFER TO DETAILS.
- H — FIELD VERIFY DEPTH AND WIDTH OF POCKET TO RECEIVE OPERABLE PARTITION WITH MANUFACTURER.
- I — NEW ALUMINUM CURTAIN WALL SYSTEM WITH 1" INSULATED GLASS.
- J — METAL THRESHOLD.
- K — REFER TO STRUCTURAL DRAWINGS FOR NEW COLUMN AND BEAM INSTALLATION. PATCH AND REPAIR WALLS TO MATCH EXISTING AT DEMOLITION AND NEW CONSTRUCTION POINTS.
- L — EXISTING TERRAZZO CURB TO REMAIN REFER TO A7.1 AND MECHANICAL DRAWINGS FOR PATCHING AND VENT TRIM INSTALLATION.
- M — RECESSED ENTRANCE MAT OVER NEW 6" CONCRETE SLAB. REFER TO STRUCTURAL DRAWINGS.
- N — PATCH AND REPAIR WALL AT DEMOLITION AND NEW CONSTRUCTION POINT.
- O — INFILL EXISTING OPENING AT REMOVED CABINET HEATER WITH BRICK VENEER - TOOTH INTO EXISTING AND MATCH COURSING.
- P — INFILL EXISTING OPENING AT REMOVED FRAME WITH BRICK VENEER, METAL FRAMING AND GYPSUM BOARD - REFER TO DETAIL 1/A3.5. TOOTH INTO EXISTING AND MATCH COURSING.
- Q — INFILL EXISTING OPENING AT REMOVED DISPLAY CASE WITH BRICK VENEER - TOOTH INTO EXISTING MATCH COURSING.
- R — NEW GRILLE - REFER TO MECHANICAL DRAWINGS.
- S — VINYL TRANSITION STRIP.
- T — NEW METAL LOCKERS TYPE A. REFER TO SPECIFICATIONS.
- U — NEW 4" THICK CONCRETE SIDEWALK WITH 6x6 W1.4xW1.4 WWF.
- V — EXPANSION JOINT COVER.
- W — NEW CONCRETE SLAB OVER 1 1/2" METAL DECK (REFER TO STRUCTURAL DRAWINGS). MATCH EXISTING FINISH FLOOR ELEVATION.
- X — CONCRETE FLOOR INFILL MATCH EXISTING FINISH FLOOR ELEVATION.
- Y — INFILL EXISTING OPENING AT REMOVED DOOR AND FRAME WITH BRICK VENEER, METAL FRAMING AND GYPSUM BOARD. TOOTH BRICK INTO EXISTING MATCH COURSING.
- Z — REPAIR / REPLACE DAMAGED BRICK AND MORTAR AT REMOVED CURTAIN WALL BRACKETS. TUCKPOINT MORTAR AT ALL REMOVED ANCHORS.
- AA — NEW 6" THICK CONCRETE SLAB WITH #4 @ 8" O.C. E.W. ON 6" DEEP FORM DECK - REFER TO STRUCTURAL DRAWINGS
- BB — NEW COLUMN - REFER TO STRUCTURAL DRAWINGS
- CC — SEMI-RECESSED FIRE EXTINGUISHER CABINET

WALL FINISH ONE SIDE, EXTEND F.R.P. PANEL FROM FINISH FLOOR TO CEILING. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W10 SAME AS "W8" - DELETE SOUND INSULATION AND ACOUSTICAL SEAL.
- W11 SAME AS "W1" - DELETE SOUND INSULATION.
- W12 CLAD EXISTING WALL CONSTRUCTION WITH 5/4" PLYWOOD BACKER BOARD AND PAINTED 5/8" GYPSUM BOARD EXTEND GYPSUM BOARD FROM FINISH FLOOR TO A HEIGHT A MINIMUM OF 6" ABOVE SUSPENDED CEILING SYSTEM. EXTEND PLYWOOD FROM FINISH FLOOR TO 8'-0" ABOVE FINISH FLOOR.
- W13 9" WIDE WALL. 3 5/8" METAL FRAMING @ 16" O.C. STAGGERED - EXTEND FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES. SOUND INSULATE AND ACOUSTICALLY SEAL.
- W14 3 5/8" METAL FRAMING @ 16" O.C. - EXTEND WALL CONSTRUCTION FROM FINISH FLOOR T DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD WITH 3/4" PLYWOOD BACKER BOARD SIDES. NOTE: BACKER BOARD SHALL BE INSTALLED FULL LENGTH OF WALL FROM FINISH FLOOR TO A HEIGHT OF 8'-0" A.F.F..
- W15 1 HR CONSTRUCTION: 3 5/8" METAL FRAMING @ 16" O.C. EXTEND WALL CONSTRUCTION FROM FINISH FLOOR TO DECK ABOVE. INSTALL DEFLECTION TRACK. PAINTED 5/8" GYPSUM BOARD BOTH SIDES.
- W16 SAME AS W15, SOUND INSULATE AND SEAL.
- W17 SAME AS W15 WITH MOISTURE RESISTANT GYPSUM BOARD AND CERAMIC TILE FINISH ON TOILET ROOM SIDE OF WALL.

FLOOR PLAN KEYNOTES:

- (A) APPLIANCE / VENDING - BY OWNERS.
- (B) OPERABLE PARTITION.
- (C) NEW SOLID SURFACE STOOL. REFER TO DETAIL 12/A9.5.
- (D) NEW GLASS GUARD RAIL - REFER TO SPECIFICATIONS.
- (E) SECURITY DESK - REFER TO DETAILS.
- (F) COUNTER - REFER TO DETAILS.
- (G) DIRECTORY KIOSK - REFER TO DETAILS.
- (H) FIELD VERIFY DEPTH AND WIDTH OF POCKET TO RECEIVE OPERABLE PARTITION WITH MANUFACTURER.
- (I) NEW ALUMINUM CURTAIN WALL SYSTEM WITH 1" INSULATED GLASS.
- (J) METAL THRESHOLD.
- (K) REFER TO STRUCTURAL DRAWINGS FOR NEW COLUMN AND BEAM INSTALLATION. PATCH AND REPAIR WALLS TO MATCH EXISTING AT DEMOLITION AND NEW CONSTRUCTION POINTS.
- (L) EXISTING TERRAZZO CURB TO REMAIN REFER TO A7.1 AND MECHANICAL DRAWINGS FOR PATCHING AND VENT TRIM INSTALLATION.
- (M) RECESSED ENTRANCE MAT OVER NEW 6" CONCRETE SLAB. REFER TO STRUCTURAL DRAWINGS.
- (N) PATCH AND REPAIR WALL AT DEMOLITION AND NEW CONSTRUCTION POINT.
- (O) INFILL EXISTING OPENING AT REMOVED CABINET HEATER WITH BRICK VENEER - TOOTH INTO EXISTING AND MATCH COURSING.
- (P) INFILL EXISTING OPENING AT REMOVED FRAME WITH BRICK VENEER, METAL FRAMING AND GYPSUM BOARD - REFER TO DETAIL 1/A9.5. TOOTH INTO EXISTING AND MATCH COURSING.
- (Q) INFILL EXISTING OPENING AT REMOVED DISPLAY CASE WITH BRICK VENEER - TOOTH INTO EXISTING MATCH COURSING.
- (R) NEW GRILLE - REFER TO MECHANICAL DRAWINGS.
- (S) VINYL TRANSITION STRIP.
- (T) NEW METAL LOCKERS TYPE A. REFER TO SPECIFICATIONS.
- (U) NEW 4" THICK CONCRETE SIDEWALK WITH 6x6 W1.4xW1.4 W.W.F.
- (V) EXPANSION JOINT COVER.
- (W) NEW CONCRETE SLAB OVER 1 1/2" METAL DECK (REFER TO STRUCTURAL DRAWINGS). MATCH EXISTING FINISH FLOOR ELEVATION.
- (X) CONCRETE FLOOR INFILL MATCH EXISTING FINISH FLOOR ELEVATION.
- (Y) INFILL EXISTING OPENING AT REMOVED DOOR AND FRAME WITH BRICK VENEER, METAL FRAMING AND GYPSUM BOARD. TOOTH BRICK INTO EXISTING MATCH COURSING.
- (Z) REPAIR / REPLACE DAMAGED BRICK AND MORTAR AT REMOVED CURTAIN WALL BRACKETS. TUCKPOINT MORTAR AT ALL REMOVED ANCHORS.
- (AA) NEW 6" THICK CONCRETE SLAB WITH #4 @ 8" O.C. E.W. ON 6" DEEP FORM DECK - REFER TO STRUCTURAL DRAWINGS
- (BB) NEW COLUMN - REFER TO STRUCTURAL DRAWINGS
- (CC) SEMI-RECESSED FIRE EXTINGUISHER CABINET

This is a Cover Sheet to the State's Owner and Contractor Standard Construction Contract, known as the *MICHSPEC™* Division 0 Specifications. The *MICHSPEC™* Division 0 Specifications have been developed from the FORMSPEC™ Michigan Model, 1997 Edition. Although the State's 2008 Version of the Division 0 Specifications are written as simply as practical, it is nonetheless advisable to consult with companion Guide to Specifiers when preparing specifications for a specific project. These Division 0 Specifications were developed by incorporating provisions and requirements furnished by the State into the FORMSPEC™ Michigan Model. These Division 0 Specifications have undergone detailed technical reviews by Department of Technology, Management and Budget, **Facilities and Business Services Administration** representatives and detailed legal reviews by the Department of the Attorney General for the State of Michigan. Specifiers are encouraged to consult with a Division 0 specifications specialist or an attorney knowledgeable in public contracts when preparing specifications for a specific project.

STATE OF MICHIGAN

FACILITIES AND BUSINESS SERVICES ADMINISTRATION

MICHSPEC™ 2008 VERSION, OWNER AND CONTRACTOR

STANDARD CONTRACT FORMS AND CONDITIONS OF THE CONTRACT

MICHSPEC™ No. 97.0820 – 00020 THROUGH 97.0820 – 00440

RELEASED ON NOVEMBER 1, 1997;

Developed from
Contract Forms and Conditions of the Contract
FORMSPEC™ Michigan Model

and suggested for use with
Bidding Requirements

1997 Edition/2011 Version

SECTION 00020 GLOSSARY

1.1 Defined Terms:

1.1.1. The following terms or relative pronouns used in Division 0 of the Specifications have these intent and meanings:

Activity–An element in the Progress Schedule establishing a requisite step, or the time and resources required, for completing the part of the Work associated with that Activity.

Addenda–Written instruments that are used by the **Owner** and/or **Professional** to incorporate interpretations or clarifications, modifications and other information into the Bidding Documents. An Addendum issued after Bid opening to those Bidders who actually submitted a Bid, for the purpose of rebidding the Work without readvertising, is referred to as a post-Bid Addendum.

Agreement–The written agreement between the **Owner** and **Contractor** covering the Work to be furnished and performed.

Alternate–Refers to Work specified in the Bidding Documents for which the Bidder shall bid a Bid Price in the space provided in the Schedule of Alternates in Section 00300 Bid Form.

Apparent Low Bidder–That Bidder whose Base Bid, when added to those specific Alternates the **Owner** intends to accept, yields the lowest sum of Base Bid and Alternates.

Archaeological Feature–Any prehistoric or historic deposit of archaeological value, as determined by a representative of a State agency that is duly authorized to evaluate such findings and render such judgments. An Archaeological Feature deposit may include, but is not limited to Indian habitations, ceremonial sites, abandoned settlements, treasure trove, artifacts or other objects with intrinsic archaeological value and that relate to the history and culture of the State of Michigan.

As-Planned Schedule–Is the **Contractor's** Revision 0 Progress Schedule returned to the **Contractor** as "Resubmittal Not Required," with or without comments or objections noted.

Authorized Technical Data–Information and data contained in a report of exploration and tests of subsurface conditions that are expressly designated in paragraph 2.0 of Section 00210 Information for Bidders. Also, any physical data (dimension, location, conditions, etc.) contained in those drawings of physical conditions of existing surface and subsurface facilities identified in paragraph 3.0 of Section 00210 Information for Bidders.

Bar Chart Schedule–Activity schedule, in a bar chart format, that accounts for the entire Work at a level of detail commensurate with the Progress Schedule requirements of the Contract Documents.

STATE OF MICHIGAN MODEL
Developed from FORMSPEC™ Michigan Model

Bid–Written offer by a Bidder for the Work, as specified, which designates the Bidder's Base Bid and Bid Prices for all Alternates. The term *Bid* includes a *Rebid*.

Bidder–The Person acting directly, or through an authorized representative, who submits a Bid directly to the **Owner**.

Bidding Documents–The proposed Contract Documents as advertised, and all Addenda issued before Bid opening, and after Bid opening, if the Work is rebid without readvertising.

Bid Price–The Bidder's price for a lump sum item of Work, or the product of the Bidder's unit price for an item of Unit Price Work times the quantity given on the Bid Form for that item.

Bid Security–Security serving as a guarantee that the Bidder will conform to all conditions requisite for its return or as liquidated damages in the event of failure or refusal to conform.

Bidding Requirements–The Advertisement, Instructions to Bidders (including Attachment A), Supplementary Instructions, Information for Bidders, Bid Form, Bid Form Attachments and Qualification Submittals, as advertised and as modified by Addenda, and any other Section included within Division 0 of the Bidding Documents for the purpose of governing bidding and award of the Contract.

Board–The Administrative Board of the State of Michigan.

Bonds–Section 00310 Bid Bond, Section 00610 Performance Bond and *Section 00620 Payment Bond* are security furnished by the **Contractor**, as required by the Contract Documents.

Business Day–Any Day except Saturdays, Sundays and holidays observed by the **Owner.**

Bulletin–A standard **DTMB** form used by the **Owner** to describe a change in the Work under consideration by the **Owner** and to request the **Contractor** to submit a proposal for the corresponding adjustment in Contract Price and/or Contract Time, if any.

Calendar Day–Every day shown on the calendar, Saturdays, Sundays and holidays included.

Cash Allowance–An **Owner**-specified sum included within the Contract Price to reimburse the **Contractor** for the actual purchase/furnished cost of materials and/or equipment or other designated items, as specifically provided in the Contract Documents. Although the scope (e.g., the required quantity) of any Work covered by a Cash Allowance is sufficiently detailed in the Contract Documents for the purposes of bidding the required labor costs, Subcontract costs, construction equipment costs and general conditions costs and Fee, it is understood that the required materials, equipment or other designated items are of uncertain purchase cost at the time of Bid or are yet to be specified in more detail by the **Professional** as to quality, appearance, durability, finish and such other necessary features affecting purchase price.

Change Authorization–A written order issued and signed by the **Professional,** which directs changes in the Work that require no adjustment in Contract Price or Contract Time, or which allows for variations in the quantities of Unit Price Work.

Change Order–A written order issued and signed by the **Owner**, which amends the Contract Documents for changes in the Work or an adjustment in Contract Price and/or Contract Time, or both.

Contact Person–Individual in the employ of the **Professional** or the **Owner** who is designated as the sole point of contact for prospective Bidders for requests or inquiries concerning the Work and/or the Bidding Documents.

Contract–Refer to the definition in paragraph 1.1 of Section 00500 Agreement. The term "Contract" encompasses the legal obligations of the **Owner** and **Contractor**, as defined by the Contract Documents.

Contract Award–The official action of the **Board** or the **Director-FA** awarding the Contract to the **Contractor**.

Contract Documents–Those documents itemized or designated in paragraphs 2.2 through 2.4 of Section 00500 Agreement.

Contract Float–Calendar Days between the **Contractor's** anticipated date for early completion of the Work, or of a specified portion of the Work, if any, and the corresponding Contract Time.

Contract Price–The Contract price for the Work, or a designated portion of the Work, as designated in Section 00500 Agreement or elsewhere in the Contract Documents, is the total compensation, including authorized adjustments, payable by the **Owner** to the **Contractor** (subject to provisions for Unit Price Work).

Contract Times–The Contract Times for the entire Work are the periods allowed, including authorized adjustments, for Substantial Completion and final completion of the Work. The Contract Times for a designated portion of the Work are the periods allowed for Substantial Completion and final completion of any such portion of the Work, as specified in the Contract Documents.

Contractor–Person named "the **Contractor**" in Section 00500 Agreement with whom the **Owner** has entered into the Contract.

Correction Period–Period during which the **Contractor** shall, in accordance with the Contract Documents, (a) correct or, if rejected, remove and replace Defective Work, and (b) maintain warranties for materials and equipment in full force and effect.

Cost of the Work Involved–The sum of all costs that would be, or actually were, necessarily incurred by the **Contractor** in providing any Work Involved with the related change, less the costs that would be, or would have been, incurred by the **Contractor** to provide such Work without the related **change**.

CPM Schedule–Computerized, Activity-based Progress Schedule, using Critical Path Method (CPM) techniques, and accounting for the entire Work at a level of detail commensurate with the Progress Schedule requirements of the Contract Documents.

Critical Path Method (CPM)–The Critical Path Method of planning and scheduling. The term "Critical Path" denotes a sequence of Activities controlling achievement of a specified Contract Time.

Date of Commencement of the Contract Time–The date when the Contract Time starts to run.

Defective–An adjective which when referring to or when applied to the term "Work" refers to (a) Work not conforming to the Contract Documents or not meeting the requirements of any inspection, test or approval, or (b) Work itemized in a Punch List which the **Contractor** fails to complete or correct within a reasonable time after issuance of the Punch List by the **Professional**.

Delay–Any act or omission or other event that in any manner adversely affects or alters the schedule, progress or completion of all or any part of the Work. Delay is a generic term intended to include deferral, stoppage, slow down, interruption and extended performance, and all related hindrance, rescheduling, disruption, interference, inefficiency and productivity and production losses.

Department (DTMB)–Department of Technology, Management and Budget of the State of Michigan. ***Director*** is the Director of the **Department.** ***Director-FA*** is the Director of **DTMB** Facilities and Business Services Administration.

Division–Each of the numbered, distinct parts (starting with Division 0) into which the Specifications are divided.

Drawings–Part of the Contract Documents showing the Work. Drawings shall neither serve nor be used as Shop Drawings.

Early (Late) Dates–Early (late) times of performance for the Activities.

Emergency–A condition affecting the safety or protection of persons, or the Work, or property at or adjacent to the site.

Fee for the Work Involved (Fee)–A negotiated, percentage mark-up on the Cost of the Work Involved which is allowed to the **Contractor** for (a) reasonable administrative costs, and (b) negotiated, reasonable profit on the Cost of the Work Involved.

General Requirements–Division 1 of the Specifications.

Hazardous Material–Asbestos, ACBMs, PCBs, petroleum products, such construction materials as paint thinners, solvents, gasoline, oil, etc., and any other like material the manufacture, use, treatment, storage, transportation or disposal of which is regulated by federal, State or local Laws governing the protection of public health, natural resources or the environment.

Facilities and Business Services Administration-Entity in the **Department** of Technology, Management and Budget responsible for design, construction, and operations and maintenance of facilities and capital renewal.

Facilities and Business Services Administration Representative-Designated State employee(s) (a) Responsible for directing and supervising the **Professional's** services during the period allowed for completion of the Work; and/or (b) Acting as representative for the **Owner** and for the enforcement of the Contract Documents, approving payment to the **Contractor** and coordinating the activities of the State, **Owner, Professional** and **Contractor.**

Law(s)–Means federal, State and local statutes, ordinances, orders, rules and/or regulations.

MCL–The Michigan Compiled Laws of the State of Michigan.

Means and Methods–Includes means, methods, techniques, sequences and/or procedures applicable to the Work.

Notice of Award–Written notice accepting the Bid to the lowest responsive, responsible Bidder and designating the Contract Price (and establishing the Alternates accepted by the **Owner**).

Notice to Proceed–Written notice authorizing the **Contractor** to proceed with the Work, or a designated portion of the Work, and establishing the Date of Commencement of the Contract Time.

On-Site Inspection–The **Professional's** on-site examination of the **Contractor's** completed or in progress Work to determine and verify to the **Facilities and Business Services Administration** Representative that the quantity and quality of all Work is in accordance with the requirements of the Contract Documents.

Owner–The State of Michigan, named "the **Owner**" in Section 00500 Agreement, with whom the **Contractor** has entered into the Contract and for whom the Work is to be provided. The State of Michigan includes its departments, agencies, boards, commissions, officers, employees and agents.

Partial Use–Use by the **Owner** of a designated portion of the Work before accomplishing Substantial Completion of the entire Work. Partial Use does not implicate or refer to Substantial Completion of the portion of the Work placed in use by the **Owner**.

Person–Individuals, partnerships, corporations, receivers, trustees, joint ventures and any combinations of any of them.

Political Subdivision–Any county, city, village or other local unit of the State, including any agency, department or instrumentality of any such county, city, village or other local unit.

Pre–Award Schedule–A Qualification Submittal required of the Apparent Low Bidder before Contract Award, and which is used by the **Owner** in the evaluation of the Apparent Low Bidder's Bid.

Professional Services Contractor (Professional)–The Person or its authorized representative licensed to practice architecture and/or engineering, named as "**Professional**" in Section 00500 Agreement, who has the right and authority assigned in the Contract Documents. The term **Professional** includes the **Professional's** consultants practicing the disciplines required by the Contract Documents. If the **Owner** will function as the **Professional**, such information will be noted in Section 00800 Supplementary Conditions or at the pre-construction conference.

Progress Schedule–Work Schedule that shows the **Contractor's** approach to planning, scheduling and execution of the Work and that accurately portrays completed Work as to sequencing and timing, as provided in the Contract Documents.

Project–The total construction, which includes the Work and possibly other work, as indicated in the Contract Documents.

Project Manual–The Book of Specifications, containing Division 0 of the Specifications and the technical Specifications.

Provisionary Allowance–An amount included within the Contract Price to reimburse the **Contractor** for the cost to furnish and perform Work that is uncertain, i.e., may not be required, or is of indeterminate scope, i.e., design information and quantities, complexity, etc. are neither shown nor detailed in the Contract Documents. Work authorized under any Provisionary Allowance may consist of (a) changes required by actual conditions, as determined by the **Professional**, that are incorporated into the Work in accordance with Section 00700 General Conditions, and (b) any other Work authorized and completed under the pertinent provisions of the Contract Documents. Unlike a Cash Allowance, payments under a Provisionary Allowance shall include not only the purchase/furnished cost of the materials and equipment involved, but also all related labor costs, Subcontract costs, construction equipment costs, general conditions costs and Fee, provided they are calculated in accordance with the requirements of Articles 10 and 11 of Section 00700 General Conditions.

Public Utility–Any utility company, utility department or agency of a Political Subdivision, natural gas pipeline company, cable TV company, or any other owner/operator of utilities that are operated or maintained in, on, under, over or across public right-of-way or public or private easements and which is defined as "Public Utility" under the provisions of 1974 PA 53, as amended, MCL 460.701.

Punch List–A list of minor items to be completed or corrected by the **Contractor,** any one of which do not materially impair the use of the Work, or the portion of the Work inspected, for its intended purpose. A Punch List shall be prepared by the **Professional** upon having made a determination that the Work, or portion of the Work inspected, is substantially complete and shall be attached to the respective certificate of Substantial Completion.

Qualification Submittals–Data concerning a Bidder's qualifications and eligibility, as specified in the Bidding Requirements.

Rebid–A revised or new Bid submitted by a Bidder on the Section 00300 Bid Summary and Bid Form and the Bid Form Attachments made available through post-Bid Addenda, in the event the Work is rebid without readvertising, as allowed by post-Bid Addenda.

Record Documents–Drawings, Specifications, Addenda, Change Orders, Change Authorizations, Bulletins, inspection, test and approval documentation, photographs, written clarifications and interpretations and all other documents recording, or annotated to show, all revisions and deviations between the as-built installation and the Contract Documents, all approved Submittals and all clarifications and interpretations.

Records–Books, reports, documents and other evidence relating to the bidding, award and furnishing and performance of the Work.

Record Schedule–A Progress Schedule Revision Submittal returned to the **Contractor** as "Resubmittal Not Required," with or without comments or objections noted.

**Recycled Material*–Recycled paper products, structural materials made from recycled plastics, rerefined lubricating oils, reclaimed solvents, recycled asphalt and concrete, recycled glass products, retreaded tires, ferrous metals containing recycled scrap metals and all other materials that contain (a) waste materials generated by a business or consumer, (b) materials that have served their intended purpose, and/or (c) materials that have been separated from solid waste for collection, recycling and disposition in the percentage determined by the State as provided by Law.

Request for Payment–The form provided by the **Owner** (Payment Request DMB-440) to be used by the **Contractor** in requesting payment for Work completed, which shall enclose all supporting information required by the Contract Documents.

** Field Representative*–A **DTMB** State employee or consultant, acting under the direction of the **Facilities and Business Services Administration** Representative, providing on-site, periodic observation and documentation of the Work for compliance with the Contract Documents.

Resident Project Representative–The authorized representative of the **Professional** who is assigned to the site.

Schedule of Values–A schedule of pay items, which subdivides the Work into its various parts and which details, for each itemized part, cost and pricing information required for making payments for Work performed. The sum of all pay item costs in the Schedule of Values shall equal the Contract Price for the Work.

Shop Drawings–Includes drawings, diagrams, illustrations, standard schedules, performance charts, instructions and other data prepared by or for the **Contractor** to illustrate some part of the Work, or by a Supplier and submitted by the **Contractor** to illustrate items of material or equipment.

Soil Erosion and Sedimentation Control–The planning, design and installation of appropriate Best Management Practices designed and engineered specifically to reduce or eliminate the off-site migration of soils via water runoff, wind, vehicle tracking, etc. Soil erosion and sedimentation control in the State of Michigan is regulated under The Natural Resources Environmental Protection Act; Soil Erosion and Sedimentation Control, 1994 PA 451, Part 91, as amended, MCL 324.9101 et seq. Soil erosion and sedimentation control associated with this Contract is monitored and enforced by the **Department** of Technology, Management and Budget, Facilities and Business Services Administration.

Specifications–Parts of the Contract Documents organized into Divisions. "Technical Specifications" means Divisions of the Specifications consisting of technical descriptions of materials, equipment, construction systems, standards and workmanship.

State–The State of Michigan in its governmental capacity, including its departments, agencies, boards, commissions, officers, employees and agents. Non-capitalized references to a state refer to a state other than the State of Michigan.

**State Construction Code*–The Michigan State Construction Code Act, 1972 PA 230, as amended, MCL 125.1501 et seq.

Subagreement–A subcontract or purchase order awarding a part of the Work to a Subcontractor or Supplier.

Subcontractor–A Person having a Subagreement for providing labor at the site, or for providing labor at the site and furnishing materials and/or equipment for incorporation into the Work.

Submittals–Includes technical Submittals, Progress Schedules and those other documents required for submission by the Contract Documents. The term "technical Submittal" includes Shop Drawings, brochures, samples, Operation and Maintenance (O&M) Manuals, test procedures and any other Submittal the Contract Documents require the **Contractor** to submit to demonstrate how the items covered, after installation or incorporation into the Work, will conform to the information given in the Contract Documents and be compatible with the design of the completed Work as a functioning whole as indicated in the Contract Documents.

Substantial Completion–The Work, or a portion of the Work designated in the Contract Documents as eligible for separate Substantial Completion, has been completed in accordance with the Contract Documents, to the extent that the **Owner** can use or occupy the entire Work, or the designated portion of the Work, for the use intended without any outstanding, concurrent Work at the site, except as may be required to complete or correct Punch List items. Prerequisites for Substantial Completion, over and above the extent of Work completion required, include (a) receipt by the **Owner** of operating and maintenance documentation, (b) all systems have been successfully tested and demonstrated by the **Contractor** for their intended use, and (c) the **Owner** having received all required certifications and/or occupancy approvals from the State and those Political Subdivisions having jurisdiction over the Work. Receipt of all certifications and/or occupancy approvals from those Political Subdivisions with jurisdiction in and of itself does not necessarily connote Substantial Completion.

Supplementary Conditions–Section 00800 within Division 0 of the Specifications that amends and/or supplements Section 00700 General Conditions and other designated Contract Documents.

Supplementary Instructions–Section 00120 within Division 0 of the Specifications that amends and/or supplements Section 00100 Instructions to Bidders and any other designated Bidding Requirement.

Supplier–A manufacturer or fabricator, or a distributor, material man or vendor representing a manufacturer or fabricator, who has a Subagreement for furnishing materials and/or equipment.

Target–A point of progress for a key part of the Work, which is identified for monitoring progress of the Work. Target Times are not Contract Times.

Total Float–Number of Calendar Days by which the Work or any part of the Work may be delayed from its Early Dates without necessarily causing an overrun in a pertinent Contract Time. Total Float is by definition at least equal to Contract Float.

Underground Utilities–Pipelines, piping, conduit, duct, cables, wells, tanks, tunnels and appurtenances, or other similar facilities, installed underground to convey or support conveyance of potable water, sprinkler or irrigation water, fire protection systems, electricity, gases, steam, petroleum products, sewerage and drainage removal, telephone, communications, cable TV, traffic or control systems.

Unit Price Work, Contingent–Work involving specified but undefined quantities (i.e., related Work quantities are not detailed in the Contract Documents) which when performed is measured by the **Professional** and paid using the measured quantities and unit prices contained in the Contract Documents. Performance of such Unit Price Work is contingent upon conditions encountered at the site, as determined and authorized by the **Professional**.

Unit Price Work, Specified–Work of specified and defined quantities (i.e., quantities are detailed in, and can be taken-off from, the Contract Documents) that when performed is measured by the

Professional and paid based on the measured quantities and unit prices contained in the Contract Documents.

Work (as in *"the Work,"* "*the entire Work*)–The entire *completed Construction* required by the Contract Documents. The Work results from furnishing and performing all services, obligations, responsibilities, management, supervision, labor, materials, equipment, construction equipment, general conditions, permits, taxes, patent fees and royalties, testing, inspection and approval responsibilities, warranties, temporary facilities, small tools, field supplies, Bonds, insurance, mobilization, close-out, overhead and all connections, devices and incidental items of any kind or nature required and/or made necessary by the Contract Documents.

Work Involved, any Work Involved–Existing or prospective Work (a) reflected in any notice, proposal or claim, or (b) reflected in changes ordered or in process, or (c) affected by Delay.

1.1.2. Other defined terms used in Division 0 but not assigned intent and meanings in this Section 00020 Glossary have the intent and meanings set forth in MCL or Section 00800 Supplementary Conditions.

1.1.3. Terms defined in this Section 00020 Glossary and used in other Specifications and/or in the Drawings in lower cases, or as capitalized terms, have the intent and meanings assigned to them in this Section 00020 Glossary, if the context will permit.

1.2 Division 0 Rules of Construction:

1.2.1. Each Article in a Section in Division 0 contains "sub-articles," numbered as this sub-article 1.2 is numbered; "parts," numbered as this part 1.2.1 is numbered, and "sub-parts," all of which are considered "paragraphs." A reference to a paragraph means a reference to the sub-article, part or sub-part, or any combination of any of them, if the context will permit.

1.2.2. Any reference to an Article or a paragraph in a Section within Division 0 means a reference to an Article or a paragraph in the very Section in which the reference is made, unless that reference specifically names another Section.

1.2.3. Whenever the context of any provision requires, the singular number includes the plural number and vice versa, and the use of any gender includes all genders.

END OF SECTION 00020

SECTION 00030 ADVERTISEMENT

1. Bids – The State of Michigan as the **Owner** will receive sealed Bids, delivered to the Department of Technology, Management and Budget, Facilities and Business Services Administration, First Floor, General Office Building, 7150 Harris Drive, Dimondale, Michigan 48821, for **Exterior Facade Repairs To: Stevens T. Mason Building** until 2:00 P.M., local time, on Wednesday, February 19, 2014, when all Bids duly received will be opened publicly and read aloud.

2. Work Description – The Work, **Exterior Facade Repairs**, Agency No. **071** Index No. **44103** File No. **071/11193.CAK** includes, but is not necessarily limited to the masonry facade throughout the entire building, concrete planter walls adjacent to the loading dock and masonry within the East Plaza Area. Repairs include window head flashings, damaged brick, stone, mortar and concrete, and sealant replacement.

The site is located on the north side of West Allegan Street, at the northeast corner of West Allegan and South Pine Streets, as shown on the Drawings.

3. Bidding Documents – Sets of Bidding Documents may be accessed on Bid4Michigan, or obtained from the **Professional Wigen Tincknell Meyer & Associates, Inc.** at (**989-752-8107**). A non-refundable payment in the form of a certified or cashier's check or money order, drawn upon a bank insured by an agency of the Federal Government, payable to the Professional, submitted to the **Professional** in the amount equal to all direct printing costs will be required for each full set of Bidding Documents requested by any Bidder or any other party.

Bidding Documents will be shipped only if the requesting party assumes responsibility for all related charges. Any deposit received by the **Professional** will be refunded to the extent the **Professional** receives back the corresponding set(s) of Bidding Documents, in good, reusable order, within fifteen (15) Calendar Days after the date of Bid opening.

4. Bid Security – Each Bid shall enclose Bid Security, as specified in Section 00100 Instructions to Bidders (and as specified in Section 00310 Bid Bond, if a Bid Bond is enclosed), in the amount of five percent (5%) of the Bidder's Base Bid.

5. Pre-Bid Conference – A mandatory pre-bid conference will be held at the Stevens T. Mason Building, 530 W. Allegan Street, Lansing, MI on Monday, February 10, 2014 at 10:00a.m. Local Time. A tour of the site will be held on the same day, starting at 10:45a.m. local time. All prospective Bidders and other parties interested in the Work are required to attend the tour, if held. Addenda may be issued, in response to issues raised at the pre-bid conference and tour, or as the **Owner** and/or **Professional** may otherwise consider necessary.

6. Equal Employment Opportunity – Covenants not to discriminate in employment by contractors, subcontractors and suppliers required by Law are contained in paragraph 14.12 of Section 00100 Instructions to Bidders and paragraph 7.12 of Section 00700 General Conditions and are applicable to the Work and any Subagreement under the Contract.

7. Contract Times – The Contract Times and the associated liquidated damages are specified in Article 4 of Section 00500 Agreement.

8. Contact Person – All requests or inquiries concerning the Bidding Documents or the Work shall be addressed to **Wigen Tincknell Meyer & Associates, Inc., 100 S. Jefferson Avenue, Suite 601, Saginaw, Michigan 48607 – (989)752-8107**.

9. Award – Subject to any agreed extension of the period for holding Bids, Bids shall remain valid for acceptance by the **Owner** for Ninety (90) Calendar Days after the date of Bid opening. In addition, the **Owner** expressly reserves the right, within the **Owner's** sole discretion, to reject any or all Bids, to waive any irregularities, to issue post-Bid Addenda and rebid the Work without readvertising, to readvertise for Bids, to withhold the award for any reason the **Owner** determines and/or to take any other appropriate action.

STATE OF MICHIGAN MODEL

Developed from FORMSPEC™ Michigan Model

The MICHSPEC™ 97.0820 Model Specifications, Sections 00020 through 00440, have been licensed to the State of Michigan, Department of Technology, Management and Budget (**DTMB**). Title to and use of these Specifications is strictly restricted. Except as authorized in writing by the Department of Technology, Management and Budget, **Facilities and Business Services Administration**, or as may be appropriate for their use in the bidding and execution of the Work, reproduction, translation or substantial use or quotation of any part of any of these Specifications beyond that permitted by the 1976 United States Copyright Act without prior written permission is unlawful. Provisions marked with an asterisk have been furnished by the **DTMB** or taken from **DTMB**– provided contracts, and are excluded from this copyright limitation. Please, direct requests for information about FORMSPEC™ to PMA Consultants LLC, Ann Arbor, MI (734-769-0530).

ARTICLE 1 BIDDING DOCUMENT INTERPRETATIONS

1.1. Section 00020 Glossary assigns specific intent and meanings to capitalized terms and to other defined terms used in Section 00030 Advertisement, this Section 00100 Instructions to Bidders and Section 00210 Information for Bidders. The Glossary also provides specific rules for construing any reference to any Article or paragraph that is made in this Section 00100.

1.2. The deadlines and submission requirements imposed on the Bidders by the provisions of Articles 3 and 4 also shall apply to any prospective subcontractor or supplier seeking access to the site or needing to submit written questions or inquiries.

1.3. Except as otherwise noted, the deadlines and other requirements imposed upon the "Apparent Low Bidder" by the provisions of Articles 2, 5, 8 and 13 also shall apply to any other Bidder remaining or wishing to remain in contention for the award.

1.4. Neither the **Owner** nor **Professional** assumes any responsibility for errors or misinterpretations resulting from the use of incomplete sets of Bidding Documents in preparing Bids. The **Owner** and **Professional** make Bidding Documents available only for obtaining Bids, and neither the **Owner** nor **Professional** grants a license for any other use of the Bidding Documents.

ARTICLE 2 QUALIFICATIONS OF BIDDERS

2.1. The Apparent Low Bidder shall submit to the **Professional**, within two (2) Business Days after receipt of the **Professional's** request, Section 00430 List of Subcontractors. The Apparent Low Bidder also shall submit to the **Professional,** within ten (10) Calendar Days after the **Professional's** request, a Pre–Award Schedule and those other Qualification Submittals noted in Sections 00410, 00420 and 00440. The Apparent Low Bidder may be required to attend a pre-award conference(s).

2.2. The Pre–Award Schedule shall consist of six (6) blue line drawings of a time-scaled CPM Schedule or a Bar Chart Schedule, as designated by the **Professional**. The Pre–Award Schedule shall (a) identify start and completion dates for the Work in summary form, (b) show the sequencing in which the Bidder plans to perform the Work to conform to the Contract Times and sequences of Work indicated in or required by the Bidding Documents, and (c) include a plot with percentages of completion for the Work correlating to the start and completion dates.

2.3. Unless otherwise determined by the **Owner**, in its sole discretion, failure, neglect or refusal by the Apparent Low Bidder to submit Qualification Submittals when and as requested justifies the **Owner's** refusal to consider the Apparent Low Bidder's Bid and the Apparent Low Bidder's Bid Security will be forfeited to the **Owner** as liquidated damages. However, in the case of any other Bidder remaining or wishing to remain in contention for the award, such failure, neglect or refusal will not constitute grounds for forfeiting that other Bidder's Bid Security.

ARTICLE 3 BIDDING DOCUMENTS; SITE CONDITIONS; SAFETY REQUIREMENTS; LAWS

3.1. It is the responsibility of each Bidder, before submitting a Bid, to: (a) examine the Bidding Documents thoroughly; (b) visit the site and, if necessary, record conditions at the site (through logs/notes, photographs, video or any other means); (c) study and correlate the Bidder's observations with the Bidding Documents; and (d) submit written questions or inquiries about the Bidding Documents or the Work, as provided in Article 4, immediately after discovering any conflicts, ambiguities, errors or omissions in the Bidding Documents.

3.2. It is also the responsibility of each Bidder, in the preparation of its Bid, to take those steps that are reasonably necessary to (a) ascertain and satisfy itself of the physical conditions under which the Work will be performed and the condition of existing facilities, including those which may not be a part of the Work, but could be affected by the performance of the Work, and (b) account for all general, local and prevailing conditions at or near the site that may in any manner affect the cost, schedule, progress, performance or furnishing of the Work. Examples of such conditions include, but are not limited to: (a) the nature and location of the Work; (b) conditions related to the transportation, disposal, handling and storage of materials; (c) the availability and suitability of labor, materials, water, electric power, telephone, sanitary services and roads; (d) daily and monthly weather variations, including any related subsurface conditions, river stages, or similar conditions; (e) the character, quality and quantity of surface and subsurface conditions at the site, including but not limited to ground water table variations, and the location, configuration and condition of existing facilities and Underground Utilities; (f) the character of equipment and facilities needed preliminary to and during Work performance; (g) conditions related to maintaining the uninterrupted operation/occupancy of existing services or facilities; and (h) the extent to which the nature, characteristics and use of any adjacent or nearby lands, rights-of-way and easements, and facilities (in all cases, inclusive of real and personal property) may affect the Bidder's activities.

3.3. It is the responsibility of each Bidder to inform itself of, and the Bidder awarded the Contract shall comply with, all applicable Laws, including, but not limited to Laws affecting cost, schedule, progress, performance or furnishing of the Work. Examples of those Laws include, but are not limited to, those relating to nondiscrimination in employment, prevailing wages, protection of public and employee health and safety, environmental protection, building codes, fire protection, grading and drainage, use of explosives, vehicular traffic, restoration of lands and property under the control of the State or a Political Subdivision, taxes, permits and licensing.

3.4. Section 00210 Information for Bidders, identifies (a) reports of explorations and tests of subsurface conditions, and (b) drawings of physical conditions of existing surface and subsurface facilities that have been used by the **Professional** in the preparation of the Bidding Documents. Bidders may rely upon such expressly stated technical information and data contained in those reports which are expressly designated as Authorized Technical Data in Section 00210 Information for Bidders, but those reports and drawings are not part of the Bidding Documents.

3.4.1. Any conclusions or interpretations made by any Bidder based on such Authorized Technical Data shall be at the Bidder's own risk. Reliance by any Bidder on any Non-technical Information or Data, interpretations or opinions contained in those reports or drawings also shall be at the Bidder's own risk. The **Owner**, **Professional** and their respective consultants assume no responsibility for any understanding reached or representation made about subsurface conditions and physical conditions of existing facilities, except as otherwise expressly shown in or represented by the Authorized Technical Data made available.

3.4.2. Section 00210 Information for Bidders also identifies additional reports of explorations and tests of subsurface conditions and reference documents reflecting physical conditions of existing surface and subsurface facilities that have not been used by the **Professional** in the preparation of the Bidding Documents. Any such reports and documents are not part of the Bidding Documents, and are made available solely to allow Bidders to have access to the same information available to the **Owner** and **Professional**. Neither the **Owner** nor **Professional** warrants the accuracy or completeness of any such information nor do they warrant that Section 00210 Information for Bidders identifies all such existing relevant reports and/or documents.

3.5. Section 00210 Information for Bidders also identifies information and data shown or indicated in the Bidding Documents or Underground Utility drawings about Underground Utilities. Such information and data about existing Underground Utilities is based on information and data obtained from record documents of previous construction or furnished to the **Owner** by the owners of those Underground Utilities or by others.

3.6. Section 00700 General Conditions contain provisions concerning (a) responsibilities for Underground Utilities, (b) changes that may be ordered because of incidents with differing site conditions, and (c) the adequacy and completeness of the Authorized Technical Data of subsurface conditions and existing subsurface and surface facilities made available to Bidders.

3.7. To the extent that any Bidder considers that additional Authorized Technical Data is necessary for determining its Bid, it is the responsibility of that Bidder to request from the **Owner** the necessary additional Authorized Technical Data. In the event the **Owner** does not have the requested additional Authorized Technical Data, it shall be the responsibility of the Bidder, at the Bidder's sole cost, to undertake reasonable examinations of the site and any other pertinent available information and data that the Bidder considers necessary for determining its Bid.

3.8. If requested by a Bidder at least seven (7) Calendar Days before the date of Bid opening (or as otherwise agreed to by the **Owner**), the **Owner** will provide access to the site, when and as designated by the **Owner**, to allow that Bidder to conduct those reasonable explorations and tests that Bidder considers necessary for preparation and submission of the Bidder's Bid. Any such explorations and/or tests conducted by that Bidder shall comply with the requirements of the **Owner**, any Public Utilities involved and any Political Subdivisions with jurisdiction. If access to the site is granted, that Bidder shall fill all holes and clean up and restore the site to its former condition, to the **Owner's** satisfaction, upon completion of those explorations and/or tests.

3.9. The Bidder awarded the Contract shall be responsible for obtaining any lands, areas, properties, facilities, rights-of-way and easements, in addition to those furnished by the **Owner**, that the Bidder considers necessary for temporary facilities, storage, disposal of spoil or waste material or any other similar purpose. Neither the **Owner** nor **Professional** assumes any responsibility

for site conditions at any lands, areas, properties, facilities, rights-of-way and easements obtained by any Bidder.

*3.10. With respect to any earth disturbance associated with this Contract, the Bidder awarded the Contract shall comply with The Natural Resources and Environmental Protection Act; Soil Erosion and Sedimentation Control, 1994 PA 451 Part 91, as amended, MCL 324.9101 et seq. **Facilities and Business Services Administration** is the designated "Authorized Public Agency" under the provisions of Section 9110 of 1994 PA 451, Part 91 as amended.

3.11. Each Bid shall include and be deemed to have included all (a) Michigan sales and use taxes and other similar taxes applicable to the Work that are required by Law as of the date of Bid opening, and (b) the cost of all permits, approvals, licenses and fees necessary for the commencement, prosecution and completion of the Work. Section 00700 General Conditions contain provisions concerning responsibilities of the Bidder for sales and use taxes and other similar taxes and for obtaining permits, approvals, licenses and fees applicable to the Work.

3.12. To the extent the **Owner** or **Professional** has knowledge of other work at the site, which may be ongoing during the period allowed for the Work, the Bidding Documents shall identify such other work. Before submitting a Bid, each Bidder shall evaluate: (a) the effect that any such other work operations (e.g., dewatering, blasting, etc.) may have on the Work, (b) related conditions and sequences of Work contained in the Bidding Documents, (c) the requirements for coordination and cooperation between the Work and other work, and (d) related Contract Times.

3.13. The submission of a Bid constitutes a binding representation by the Bidder that: (a) the Bidder has complied with every requirement of this Article and the Bidding Documents; (b) the Bidder has examined and agrees with the Progress Schedule requirements contained in the Specifications, including, but not limited to, requirements concerning the administration of early completion schedules; (c) without exception, the Bid is premised upon performing and furnishing the Work required by the Bidding Documents and in accordance with those Means and Methods indicated in or required by the Bidding Documents; and (d) the Bidder considers the Bidding Documents to be sufficient in scope and detail to indicate a clear understanding of all terms and reasonably foreseeable conditions applicable to the Work, and how such terms and conditions may affect the cost, schedule, progress, performance and furnishing of the Work.

3.14. Any failure of a Bidder to take the actions described and acknowledged in this Article will not relieve that Bidder of the responsibility for (a) properly estimating the difficulty, cost of and schedule for successfully performing and furnishing the Work, or (b) upon award, performing and furnishing the Work successfully at no increase in Contract Price or Contract Time.

3.15. Neither the **Owner** nor **Professional** assumes any responsibility for any conclusions or interpretations made by any Bidder based on the information made available by the Bidding Documents. Nor does the **Owner** or **Professional** assume any responsibility for any understanding reached or representation made about conditions that may in any way affect cost, schedule, progress, furnishing or performance of the Work, unless that understanding or representation is expressly stated or indicated in the Bidding Documents (including written Addenda).

ARTICLE 4 INTERPRETATIONS; ADDENDA

4.1. All requests for clarification or interpretation of the Bidding Documents, all proposals for any modifications to the Bidding Documents, all requests for information and all other questions or inquiries about the Bidding Documents and/or the Work shall be submitted in writing to the Contact Person identified in Section 00030 Advertisement, Article 8. Requests or inquiries received less than seven (7) Calendar Days before the date of Bid opening will be answered only if (a) the response can be given through Addenda made available at least seventy-two (72) hours before Bid opening (counting Business Days only), (b) the Bid opening is postponed by Addendum, or (c) the Work is rebid without readvertising following the issuance of post-Bid Addenda.

4.2. Any interpretation or clarification, modification to the Bidding Documents (whether by correction, addition, deletion or other revision) and/or information given will be binding only if given by Addenda. Interpretations, clarifications, corrections, additions, deletions or other revisions or information given orally or in any other manner are not binding on the **Owner** and if relied upon by any Bidder, shall be relied upon at the Bidder's own risk. Addenda will be sent by registered mail or private carrier or by FAX to all parties who, according to the **Professional's** records, have obtained a set of the Bidding Documents and has furnished to the **Professional** an address and FAX number for receiving Addenda.

4.3. In the **Owner's** sole discretion, subsequent to the opening of Bids, post-Bid Addenda may be issued setting a new date for the receipt and opening of sealed Rebids.

4.4. Any quantities of Unit Price Work given on the Bid Form, whether detailed in the Drawings or Specifications or contingent upon actual conditions, are approximate only, and are to be used solely for comparing Bids and establishing the Contract Price. Neither the **Owner** nor **Professional** represents that the actual quantity for any item of Unit Price Work performed will equal the quantity given. Payments will be made only for actual quantities of Unit Price Work completed in accordance with the Contract Documents. Actual quantities of Unit Price Work may overrun or underrun those in the Bid Form without necessarily invalidating the unit prices bid (except as provided in paragraph 10.6 of Section 00700 General Conditions).

ARTICLE 5 BID SECURITY

5.1. Bid Security shall be made payable to the "State of Michigan" in the form of a certified or cashier's check or money order drawn upon a bank insured by an agency of the Federal Government, or consist of a duly executed Bid Bond. A Bid Bond shall be duly executed by the Bidder and by a surety authorized to do business in the State by the Department of Energy, Labor and Economic Growth and listed on the current U.S. Department of the Treasury Circular 570. Bidders shall attach a certified copy of Power of Attorney to sign Bid Bonds as the Attorney-in-Fact. Copies of the current Circular listing of approved bonding/insurance companies and interim changes may be obtained through the Internet web site http://www.fms.treas.gov/c570/c570.html.

5.2. Failure by a Bidder to enclose with its Bid a certified or cashier's check or money order or a duly executed Bid Bond shall disqualify that Bidder from any consideration for the award.

5.3. The Bid Security of the Bidder recommended for award will be retained until that Bidder has fulfilled all the following: (a) submitted Qualification Submittals and required information, (b) executed and delivered Section 00500 Agreement in triplicate, (c) delivered evidence of insurance, and (d) furnished the required Section 00610 Performance Bond and Section 00620 Payment Bond (including separate certifications). If that Bidder fails to do so when and as specified, the **Director-FA** may annul the Notice of Award recommendation, and the Bid Security of that Bidder will be forfeited to the **Owner** as liquidated damages. If the **Owner** incurs any collection costs in the enforcement of the Bid Security requirement, that Bidder and its surety, if any, agree jointly and severally to reimburse the **Owner's** costs of collection, which shall include reasonable fees and charges of attorneys and others, court or hearing costs incurred with or without suit and interest.

5.4. If the Apparent Low Bidder gives a certified or cashier's check or money order as Bid Security, and the **Owner** requests a certification by an acceptable surety stating that the Bidder will furnish the Section 00610 Performance Bond and Section 00620 Payment Bond if awarded the Contract, that Bidder shall furnish such certification within seven (7) Calendar Days after the **Owner's** request.

5.5. The Bid Securities of the Apparent Low Bidder and of any other Bidder remaining in contention for the award will be retained by the **Owner** until the end of the period during which Bids shall remain open, or seven (7) Calendar Days after the **Owner** executes Section 00500 Agreement, whichever last occurs.

ARTICLE 6 CONTRACT TIME; LIQUIDATED DAMAGES

6.1. The Contract Times, i.e., the number of Calendar Days within, or dates by, which the Work or any part of the Work shall be completed, are specified in Section 00500 Agreement and may be supplemented, as provided in Section 00500 Agreement. As stated in Section 00500 Agreement, the Contract Times are of the essence of the Contract. If any Bidder believes that any of the Contract Times are insufficient or excessive, that Bidder shall advise the **Owner** in accordance with the requirements of Article 4.

6.2. Liquidated damages are specified in Section 00500 Agreement and may be supplemented, as provided in Section 00500 Agreement.

ARTICLE 7 MATERIALS AND EQUIPMENT

7.1. Named or Specified Materials and Equipment – Materials and equipment described in the Specifications by naming a brand, make, supplier or manufacturer or by using a specification shall establish a standard and shall be intended to convey function, necessary design features, general style, type, materials of construction, character and quality, serviceability and other essential characteristics. A number of Specifications using named or specified materials and equipment are *listed* in Schedule 1.6 of Section 00440 Schedule of Materials and Equipment.

7.2. Proposal for Adding Products by Addenda – For those Specifications *listed* in paragraph 1.6 in Section 00440 Schedule of Materials and Equipment, the **Professional** will, up to fourteen (14) Calendar Days before the date of Bid opening stated in Section 00030 Advertisement, accept written proposals from non-named manufacturers and suppliers seeking to have the **Professional** add their products to Schedule 1.6. The **Professional** will consent to any such proposal by Addendum if, in the **Professional's** judgment, the proposed material or equipment also may be used as a named or specified product. Lack of adequate time or information needed to evaluate a proposal, as determined in the sole discretion of the **Professional**, may justify its rejection.

7.2.1. Any such proposal shall clearly identify differences between the proposed and named or specified material or equipment and demonstrate objectively that the proposed material or equipment: (a) has the same essential characteristics of the item named or specified, (b) will equally perform the functions and achieve the results called for by the general design concept, (c) is suited to the same use as the item named or specified, (d) is at least of equal materials of construction, quality and necessary essential design features to the material or equipment named or specified, (e) conforms substantially to the desired detailed requirements, including, but not limited to durability, strength, appearance and aesthetics (if aesthetics are significant), safety, service, life, reliability, economy of operation and ease of maintenance, and (f) offers a proven record of performance and service for at least three (3) years before the date of Bid opening.

7.2.2. Any such proposal shall further include (a) a list of installations that have been in service for at least three (3) years before the date of Bid opening (including the name, address and telephone number of a person familiar with and at the installation), and (b) sufficient drawings, diagrams, brochures, schedules, performance charts, instructions, samples, and other data as may be necessary to allow the **Professional** to make a determination.

7.3. Each Bidder is responsible for notifying the **Professional** in writing if the Bidder knows or has reason to know that any material or equipment *listed* in Section 00440 Schedule of Materials and Equipment, which the Bidder intends to bid requires changes in the Work. Any such notice shall be provided no later than seven (7) Calendar Days before Bid opening. This requirement applies, but is not limited to changes in any testing requirements or Means and Methods indicated in or required by the Bidding Documents. However, this requirement is not intended to make the Bidder responsible for correcting design errors or omissions.

7.3.1. If any Bidder fails to provide such notice, and is awarded the Contract, that Bidder assumes responsibility for its proportionate share of any *excess* costs and Delay. *Excess* costs and Delay are those resulting from changes in the Work that would not have been incurred had that Bidder not failed to provide written notice to the **Professional.**

7.4. Bidding Requirement – For those Specifications *listed* in paragraph 1.6 of Section 00440 Schedule of Materials and Equipment, each Bidder shall bid one of the *listed* materials and equipment only. This requirement to not bid "or equal" or substitute materials and/or equipment for the *listed* Specifications applies even if the Bidding Documents state that an "or equal" or substitute may be furnished or used for any *listed* Specification.

7.5. Contract Condition – For those Specifications *listed* in paragraph 1.6 of Section 00440 Schedule of Materials and Equipment, the Contract will be awarded on the basis that only *listed* named or specified materials and equipment will be furnished. If an "or equal" or a substitute may be furnished for any *listed* Specification, if acceptable to the **Professional**, application for acceptance will not be considered until after Contract Award.

7.6. Section 00700 General Conditions contains provisions requiring each Supplier (a) to be bound to the requirements of the Contract Documents, (b) to assume toward the **Contractor** all obligations that the **Contractor** assumes toward the **Owner** and **Professional,** and (c) to furnish Work under a Subagreement containing waiver of rights of subrogation provisions.

ARTICLE 8 SUBCONTRACTORS

8.1. For each Division, Section of the Specifications and/or trade itemized in Section 00430 List of Subcontractors, the Apparent Low Bidder shall, when requested by the **Professional**, nominate the Subcontractor(s) to be awarded a Subagreement(s). When completing Section 00430, the Apparent Low Bidder shall provide licensing data for trades for which contractors' licensing is required and, if applicable, indicate minority, woman or handicapped status. One Subcontractor shall be nominated for each Specification or trade, unless the Apparent Low Bidder, directly or through a Subcontractor, intends to award more than one Subagreement for the listed Specification or trade.

8.2. If the **Owner** objects, for good cause, to any nominated Subcontractor, the **Owner**, before issuing the Notice of Award, may request replacement of that Subcontractor. In that event, the Apparent Low Bidder shall nominate a substitute Subcontractor or the Bidder itself, if qualified for the Work involved. In such case, there will be no extension in the Bid hold period nor any increase in the Bidder's Bid or Alternates. If the Bidder declines, that Bidder shall not be recommended for the award; however, such declining will not constitute grounds for forfeiting the Bidder's Bid Security.

8.3. Except as provided in paragraph 8.2, no removal or replacement of a nominated Subcontractor will be considered by the **Owner**, except for good cause. Before Contract Award, any removal, replacement or addition of a nominated Subcontractor shall be responsive to the requirements of the Bidding Documents only to the extent it permits the timely evaluation of the newly nominated Subcontractor. After Contract Award, if the Apparent Low Bidder, as the **Contractor**, nominates *for the first time* a Subcontractor for any Division, Specification and/or trade listed in Section 00430 List of Subcontractors, and the **Owner** objects for good cause to any such newly-nominated Subcontractor, the **Contractor** shall provide a replacement Subcontractor at no increase in Contract Price and/or Contract Time.

8.4. Section 00700 General Conditions contains provisions requiring each Subcontractor (a) to be bound to the requirements of the Contract Documents, (b) to assume toward the **Contractor** all obligations that the **Contractor** assumes toward the **Owner** and **Professional,** and (c) to provide Work under a Subagreement containing waiver of rights of subrogation provisions.

8.5. These provisions shall not be construed to create any third party beneficiary or joint employer status with respect to the **Owner** and/or **Professional** and any Subcontractor. Furthermore these provisions shall not be construed to create or impose any duty or liability on the **Owner** to exercise this authority for the benefit of any Bidder, nominated or newly nominated Subcontractor or any other third party.

ARTICLE 9 BID FORM AND BID FORM ATTACHMENTS

9.1. A second, unbound set of the Section 00300 Bid Summary, Section 00300 Bid Form and Bid Form Attachments (Section 00310 Bid Form and Section 00320 Noncollusion Affidavit) are inserted within the Bidding Documents. Bids shall be submitted on the unbound Section 00300 Bid Summary, Section 00300 Bid Form, Section 00310 Bid Bond (if a Bid Bond is given) and Section 00320 Noncollusion Affidavit, unless revised by Addendum. If revised by Addendum, the latest revision of the appropriate Bid Summary, Bid Form and/or Bid Form Attachment shall be used. All blank spaces shall be legibly and properly printed in ink or typed as required in these Instructions to Bidders and each form. All Bid prices shall be printed or typed in both words and figures.

9.2. Bids by individuals shall be signed by the person making that Bid, or the Bid shall enclose a Power of Attorney evidencing authority to sign the Bid in the individual's name.

9.3. Bids by partnerships shall be signed in the name of the partnership. The partner authorized to sign shall be named and sign where indicated. A certified copy of power of attorney authorizing that partner to bind all partners shall be attached to Section 00300 Bid Form. If a certified copy of the partnership's certificate attached to Section 00300 Bid Form indicates that all partners have signed, no separate authorization is required.

9.4. Bids by corporations shall be signed in the legal corporate name. The signature of the president or authorized officer shall be entered below the corporate name, followed by the attesting signature of the corporation secretary or of an authorized officer other than the officer signing the Bid. A certified copy of a pertinent Board Resolution authorizing that individual to bind the corporation shall be attached to Section 00300 Bid Form.

9.5. Bids by joint ventures shall be signed by all or one of the joint venturers. If not all joint venturers sign, a certified copy of Power of Attorney authorizing the individual(s) signing to bind all joint venturers shall be attached to Section 00300 Bid Form. If a certified copy of the joint venturer's certificate attached to Section 00300 Bid Form indicates that all joint venturers have signed, no separate authorization is required.

9.6. The Bidder shall acknowledge receipt of all Addenda by completing the blank spaces in the table provided for that purpose in paragraph 2.1 of Section 00300 Bid Form.

ARTICLE 10 PREPARATION AND SUBMISSION OF BIDS

* 10.1. **CERTIFICATE OF AWARDABILITY:** The Contractor must not discriminate on the basis of religion, race, color, national origin, age, sex, marital status, height, weight, arrest record or disability. Prior to the award of any Contract of $100,000.00 or more, the Michigan Department of Technology, Management and Budget (DTMB) Contract Compliance Representative will notify the Michigan Department of Civil Rights (DCR) Contract Compliance Representative, providing a bid tabulation and providing a description of the recommended awardee(s) including business(es)' name, business(es)' designated contact person, last four digits of company(ies)' tax identification number, business(es)' address, and business(es)' contact person telephone number. In the event a contractor doesn't possess a valid Certificate of Awardability and is the most qualified low bidder, the contractor must immediately submit, upon notification by DTMB, their application to DCR. **DO NOT SUBMIT APPLICATION TO DCR UNLESS YOU ARE THE LOW BIDDER.**

*10.2. The time required by the Michigan Department of Civil Rights to process applications for Certificate of Awardabiltiy varies as a function of the Department's total workload. Communications concerning Certificates of Awardability should be directed to:

Michigan Department of Civil Rights
Business and Community Affairs
Cadillac Place
3054 West Grand Boulevard, Suite 3-600
Detroit, Michigan 48202
Telephone: (313) 456-3822
Fax: (313) 456-3826

10.3. Bids shall be hand-delivered or sent by mail to the location and address specified in Article 1 of Section 00030 Advertisement. If the Bid is sent by mail, the envelope containing the Bid shall be enclosed in another envelope labeled "Sealed Bid Enclosed." Bids submitted orally or by telephone, telegraph, FAX, e-mail or other electronic media are invalid and will be rejected without consideration.

10.4. Each Bid shall be enclosed in an opaque sealed Bid envelope, marked with the Bidder's name, address and telephone number; the name of the Work; and the Agency No., Index No. and File No. The opaque sealed Bid envelope shall contain the completed Section 00300 Bid Summary, Section 00300 Bid Form, Section 00310 Bid Bond, Section 00320 Noncollusion Affidavit and all other Bidder-provided documents (Drawings and Project Manual are not required).

10.5. Each bid requesting the Qualified Disabled Veterans (QDV) preference, in accordance with Public Act 22 of 2010, MCL 18.1241(3), shall include a DD 214 Proof of Service and Discharge, a Veterans Administration rating decision letter, proof of disability (if the disability is not indicated on the DD 214), and appropriate legal documents setting forth the 51% natural persons QDV ownership.

10.6. If Unit Price Work is specified, the Bidder shall, for each Unit Price Work item listed separately on Article 6 of Section 00300 Bid Form, bid a unit price and enter, in the appropriate column, the computation of the respective quantity multiplied by the respective Bidder's bid unit price. Bid prices for each lump sum or "One Each" item listed on the Bid Form shall be printed or typed only in the appropriate "Bid Price" column. The Bidder shall show the sum representing the Bidder's Base Bid and, if Alternates are listed, the Bid prices for all Alternates, in the spaces provided for those purposes.

10.7. For each Cash Allowance, the Bidder shall include, within the Bid, all labor costs, construction equipment costs, insurance and Bond premiums and other general conditions costs and Fee (Bidder's and Subcontractors') to complete Work associated with the material, equipment or other designated item to be furnished under the Cash Allowance. For each Provisionary Allowance, the Bidder shall include, within the Bid, insurance premiums (not recoverable as labor burden) and Bond premiums required to complete Work that may be ordered under the Provisionary Allowance. Cash Allowances and Provisionary Allowances are defined in Section 00020 Glossary, and are further described in paragraph 10.7 of Section 00700 General Conditions.

10.8. The Bidder's Base Bid and Alternate Bid prices shall include, and payment for completed Work shall be compensation in full for, all services, obligations, responsibilities, management, supervision, labor, materials, devices, equipment, construction equipment, general conditions, permits, patent fees and royalties, testing, inspection and approval responsibilities, warranties, temporary facilities, small tools, supplies, Bonds, insurance, taxes, mobilization, close-out, overhead and profit and all connections, appurtenances and any other incidental items of any kind or nature, as are necessary to complete the Work, in a neat, first quality, workmanlike and satisfactory manner in accordance with the Drawings and Specifications and as otherwise required to fulfill the requirements of the Bidding Documents.

10.9. Neither the Section 00300 Bid Form nor any Bid Form Attachment made available to the Bidders and submitted with the Bid shall be altered in any way. Bids shall not contain any qualifications or conditions or any recapitulations of the Work whatsoever. No Alternate will be considered, unless any such Alternate is itemized in paragraph 6.2 Schedule of Alternates in Section 00300 Bid Form and specified in the Bidding Documents.

10.10. Before and after Bid submission, and before the time for receiving Bids has expired, any Bidder may alter or revise any price or information the Bidder has entered on its Bid Form or any Bid Form Attachments by: (a) crossing out the entry, (b) legibly printing in ink or typing the new price or information, and (c) placing the initials of the person who signs the Bid adjacent to each change. After Bid opening, the **Owner** may require a Bidder to verify any such alteration or revision. Ambiguities arising from any alterations or revisions made by any Bidder may be resolved against that Bidder, in the **Owner's** sole discretion.

10.11. Neither the **Owner** nor **Professional** assumes any responsibility for any costs any Bidder incurs, however caused, in preparing and submitting its Bid, in withdrawing its Bid, or in objecting to the award or to being disqualified for the award.

10.12. In the event of any conflict between Attachment A To Section 00100–Bidder's Checklist and any requirements specified in any other parts of the Bidding Documents, the requirements of the Bidding Documents taken as a whole shall be binding on the Bidders.

10.13. All bonds, insurance, Certificate of Awaradability, and other required documents shall be issued in the name of the bidder.

ARTICLE 11 BID WITHDRAWAL; BID MODIFICATION

11.1. Any Bidder may withdraw its Bid before Bid opening by submitting to the **Owner** a document requesting the withdrawal in the manner in which a Bid shall be signed and submitted to the **Owner**. Withdrawal of a Bid before Bid opening will not prejudice the right of that Bidder to submit a new, modified Bid. After the time for receiving Bids has expired, the following will apply: (a) no Bid may be modified, altered or reformed, except to allow submittal of a Certificate of Awardability, as provided in paragraph 10.2, or to resolve irregularities on the Bid Form or Bid Form Attachments, as provided in paragraph 14.6, and (b) no Bid withdrawal will be accepted by the **Owner**, except as provided in paragraphs 11.2 through 11.6.

11.2. After the time for receiving Bids has expired, no Bid may be withdrawn, unless that Bidder lodges a written claim of a mathematical or clerical error in the Bidder's Bid with the **Owner**

within two (2) Business Days after the date of Bid opening. The claim shall describe in detail the mathematical or clerical error, include a signed affidavit stating the facts of the alleged error and request that the Bidder be released from the Bidder's Bid.

11.3. If any Bidder's claim to withdraw its Bid due to an alleged mathematical or clerical error is timely filed, the **Director-FA**, or his/her designee, will determine the validity of the claim and, as he/she deems necessary within his/her sole discretion, will provide an opportunity to the Bidder making the withdrawal to present its verification claim at a hearing/review session within ten (10) Calendar Days after the **Owner** received the claim.

11.4. At the Bid withdrawal claim review, the **Director-FA**, or his/her designee shall, within his/her discretion, informally hear testimony and receive evidence as to whether (a) the Bid contains an obvious mathematical or clerical error not involving lack of good faith or fair dealing, (b) the error is subject to objective certification and is of such grave consequences that to enforce the Contract would be unconscionable, (c) the error relates to a material feature of the Contract, and (d) the error was not caused in any way by the Bidder's violation of positive legal duty or culpable negligence.

11.5. Upon completion of the claim review process and before any award recommendation, the **Director-FA**, or his/her designee, will enter findings and render a determination on the Bidder's withdrawal claim. The **Owner** will notify the Bidder within a reasonable time after such determination.

11.6. If the **Director-FA**, or his/her designee, concurs with the Bid withdrawal claim and the **Owner** suffers no serious prejudice, except loss of bargain, the **Owner** will allow the Bidder to withdraw its Bid will return the Bidder's Bid Security within a reasonable time. However, that Bidder will not be allowed to submit another Bid for the Work. The decision of the **Director-FA**, or his/her designee, shall be final and binding on any such Bidder.

ARTICLE 12 BID OPENING; OBJECTION TO THE AWARD

12.1. Each Bidder bears sole responsibility for delivering its Bid to the address, before the closing time for receipt of Bids designated in Section 00030 Advertisement. Any Bid received after the closing time will not be considered. Any uncertainties about whether a Bid was submitted in time may be resolved against that Bidder, in the **Owner's** sole discretion.

12.2. Within reasonable time after the date of Bid opening, the **Owner** will make available a "Bid tabulation" listing the Bids opened and the Apparent Low Bidder. If any Bidder listed in the Bid tabulation has any objection to the Apparent Low Bidder, the objecting Bidder shall file a written protest with the **Owner** within seven (7) Calendar Days after the date of Bid opening. The protest shall describe in detail the basis for the protest and request a determination under this Article.

12.3. If a written protest is timely filed, the **Director-FA**, or his/her designee, will review the protest and if he/she determines in his/her sole discretion that a claim review process is necessary, such proceeding shall be conducted within ten (10) Calendar Days after receipt of the written protest.

12.4. The **Owner** will notify the Bidders involved within a reasonable time of the **Director-FA's**, or his/her designee's, recommendation to dismiss or uphold the protest. If the protest has been denied, the **Owner** will notify those Bidders of the time and date on which the **Board's** Building Committee will meet to consider the **Director-FA's**, or his/her designee's recommendation of award. The objecting Bidder and the Apparent Low Bidder will be given an opportunity to be heard at the Building Committee meeting and, at the discretion of the **Board**, at any subsequent **Board** meetings. The Building Committee and **Board**, at its discretion, will review or hear the protest under such terms and conditions as either deems proper.

12.5. Upon reviewing the protest, the Building Committee and/or the **Board** will either (a) dismiss the protest, or (b) uphold the protest and send the Bid back to the **Director-FA**, or his/her designee, for a new Bid evaluation or rebid, consistent with the determination of the Building Committee or **Board's** findings. The decision of **Board** as to the protest shall be final and binding.

ARTICLE 13 BIDS TO REMAIN OPEN

13.1. Bids shall remain open for acceptance by the **Owner** for no less than the period during which Bids shall remain valid (i.e., the Bid hold period) stated in Section 00030 Advertisement.

13.2. The **Owner**, by written notice, may elect to request the Apparent Low Bidder and any other Bidder remaining or wishing to remain in contention for the award to hold their Bids beyond the Bid hold period. Any such Bidder who fails or refuses to agree to the **Owner**-requested extension may be disqualified for further consideration for the award. However, no such Bidder shall forfeit the Bidder's Bid Security due to its failure or refusal to hold its Bid.

13.3. Any such Bid hold extension request by the **Owner** and consent by any Bidder shall be based upon no increase in (a) the Bidder's Base Bid, (b) any of the Bidder's Alternate Bid Prices, and (c) any Contract Times stated in Calendar Days. However, in the event none of the Bidders involved consent to extending their Bids, as conditioned in this paragraph, the **Owner** will issue a post-Bid Addendum specifying an additional Alternate for the sought extension in the Bid hold period.

ARTICLE 14 AWARD OF THE CONTRACT

14.1. If the **Owner** elects to award the Contract, the **Owner** will make the award to the lowest responsive, responsible Bidder who submits a Bid that conforms in all material respects with the requirements of the Bidding Documents, as determined solely by the **Owner's** and **Professional's** evaluation of the Section 00300 Bid Form, Bid Form Attachments, Bidder-provided documents and Bidder Qualification Submittals received in a timely basis.

14.1.1. Determination of the lowest Bidder shall be on the basis of the sum of the Base Bid and any additive and deductive Alternates the **Owner** accepts. Alternates shall be accepted in the order listed in paragraph 6.2 Schedule of Alternates in Section 00300 Bid Form only. The **Owner** will accept an Alternate only if all other previously listed Alternates are also accepted, unless acceptance by the **Owner** of Alternates in a different order does not affect determination of the lowest Bidder in any way.

14.1.2. For the purpose of determining the lowest, responsive bid, when a Qualified Disabled Veterans (QDV) preference is requested, 10% of the lowest responsive bid (the bid that would otherwise receive the contract award if the preference were not being considered) will be deducted from all QDV bids. If

the low responsive QDV bid, less the 10% preference, is less than the lowest responsive bid, then the QDV bid will be declared the official lowest, responsive bid. The original QDV bid amount will be the basis of the contract award.

14.1.3. Bid irregularities with respect to the Bidding Documents, for which corrective action is not already provided in paragraph 14.6 or elsewhere in the Bidding Documents, may be waived at the sole discretion of the **Owner**, unless the irregularity was due to the Bidder's lack of good faith or fair dealing, or where the waiver would lead to a determination obviously in error or inconsistent with the Bidding Documents.

14.1.4. For Bids over $100,000.00, Bidders that self-certify to be a Michigan business shall be given a preference over an out-of state Bidder in the same manner in which an out-of-state Bidder would be preferred in its home state. Bidders that neither self-certify as a Michigan business in their Bid nor authorize the Michigan Department of Treasury to release information necessary to verify entitlement will be deemed to have waived their right to claim entitlement to any preference.

14.2. No Bidder shall be considered responsible under the requirements of the Bidding Documents, unless that Bidder delivers the information required in paragraph 2.1 that the **Owner** considers necessary to the evaluation of the Bid.

14.3. The following may be considered examples of sufficient grounds for determining that a Bidder is not responsible, or for objecting to any of the Bidder's Subcontractors (even if holding a valid license) or Suppliers: *(a) being listed on the Michigan Department of Labor's register of employers who have been found in contempt of court by a Federal Court of Appeals for failure to correct an unfair labor practice as prohibited by Section 8 of Chapter 372 of the National Labor Relations Act, 29 U.S.C. 158 (1980 PA No. 278, as amended, MCL 423.321 et seq.); *(b) being debarred from participation in the bid process pursuant to Section 264 of 1984 PA 431, as amended, MCL 18.1264, or debarred or suspended from consideration for award of contracts by any other State or any federal Agency; (c) a felony conviction in any state (including this State) within the last three (3) years before the date of Bid opening; (d) lack of adequate experience or demonstrated qualifications or capability to perform the trades or classifications of the Work specified in the Bidding Documents; (e) reasonable doubt concerning the ability to maintain adequate construction equipment, quality control, schedule control or financing to meet contractual obligations under the Bidding Documents; (f) a previous termination for cause by the **Owner** within the last three (3) years before Bid opening; *(g) failure to provide the Bidder's Certificate of Awardability as issued by the Michigan Department of Civil Rights (for contracts over $100,000.00); (h) failure to comply with all requirements for foreign corporations; (i) concealment, misrepresentation or misstatement of any material facts; or (j) failure to pay any federal, State or local taxes.

14.4. If the **Owner**, either through the **Director-FA**, or his/her designee, or the **Board,** intends to disqualify the Apparent Low Bidder, written notice of the impending disqualification will be provided by the **Owner** (including reasons for the disqualification) to that Bidder and those Bidders remaining under consideration for the award. If the disqualified Bidder has any objection to the disqualification, that Bidder shall, within two (2) Business Days, file a written protest, as provided in paragraph 12.2, and follow the protest procedures in paragraphs 12.3 through 12.5. The decision of the **Board** shall be final and binding on the disqualified Bidder.

14.5. Except in circumstances leading to a determination obviously in error or inconsistent with the Bidding Documents, irregularities on any Bid shall be resolved using the rules provided in paragraph 14.6. Except as stated in paragraph 14.6(e), any Bid Form and Bid Form Attachment having any such irregularity shall be modified, altered or revised to reflect the resolution of the irregularity, however, no Bidder-provided sum or extension shall be modified, altered or revised and the Bidder's Bid shall be binding on the Bidder and the Bidder's surety, subject to the provisions governing Bid withdrawals stipulated in Article 11.

14.6. The following irregularities on any Bid Form or Bid Form Attachment shall be resolved as follows: (a) between words and figures, the words shall be used; (b) between any sum, computed by the Bidder, and the correct sum, the sum computed by the Bidder shall be used; (c) between the product, computed by the Bidder, of any quantity and bid unit price and the correct product of the unit price and the quantity of Unit Price Work, the product extended by the Bidder shall be used; (d) between a stipulated Allowance and the amount entered, the Allowance shall be used; (e) any mobilization pay item exceeding the maximum specified shall be ignored and the Bid shall remain unchanged; (f) if any Bidder fails or neglects to bid a unit price for an item of Unit Price Work but shows a "Bid Price" for that item, the missing unit price shall be computed from the respective quantity and the Bid Price shown; (g) if any Bidder fails or neglects to show a "Bid Price" for an item of Unit Price Work but bids a unit price, the missing Bid Price shall remain as "zero"; and (h) if any Bidder fails or neglects to enter a Bid price in both words and figures, the Bid price printed or typed, whether in words or figures, shall be used.

14.7. If there are reasonable grounds for believing that collusion or unlawful agreements exist between any Bidders, that a Bidder is interested in more than one Bid, or that any Bids are not genuine, those Bidders will be disqualified and their Bids will be rejected without consideration.

14.8. All costs of the Bidder awarded the Contract and that are incurred in responding to requests from the **Owner** or **Professional**, whether or not sufficient, shall neither justify any increase in Contract Price or Contract Time nor provide any basis for subsequent consideration by the **Owner** of a proposal or claim for any increase in Contract Price or Contract Time.

*14.9. Michigan and Recycled Products – The Bidder awarded the Contract and all Subcontractors and Suppliers shall use (a) Michigan-made products whenever possible where price, quality and performance are equal to or better than non-Michigan products, and (b) supplies, materials and equipment made from Recycled Materials if there is a readily identifiable source or market as determined by the **Director-FA** and the cost does not exceed one hundred ten percent (110%) of supplies, materials or equipment not containing Recycled Materials (Sections 261 and 261a of the Management and Budget Act, 1984 PA 431, as amended, MCL 18.1261 and MCL 18.1261a).

*14.10. Subcontractor and Supplier Businesses Owned by Minorities, Women and Persons with Physical or Mental Disabilities – Bidders are urged to utilize as Subcontractors and Suppliers, businesses owned by minorities, women and persons with physical or mental disabilities. For assistance in locating and identifying certified businesses, contact the Michigan Department of Civil Rights, Business and Community Affairs, Cadillac Place, 3054 W. Grand Boulevard, Suite 3-600, Detroit, MI 48202, 1-800-482-3604.

*14.11. Unfair Labor Practice - Bidders who have been found in contempt of court by a Federal Court of Appeals on not less than three occasions involving different violations during the preceding seven (7) years for failure to correct an unfair labor practice prohibited by Section 8 of Chapter 372 of the National Labor Relations Act, 29 U.S.C. 158 are not eligible to be awarded the Contract. A register of employers in violation of this requirement is compiled by the Michigan Department of Energy, Labor and Economic Growth pursuant to 1980 PA 278, MCL 423.321 et seq. Further, the Bidder awarded the Contract shall not use any Subcontractors or Suppliers on the Work whose name appears on the register. According to Section 4 of 1980 PA 278, any contract entered into by the State may be declared void and rescinded to the extent the Bidder awarded the Contract or any Subcontractor, manufacturer, or Supplier awarded Work under the Contract subsequently appears in the register compiled by the Department of Consumer and Industry Services.

*14.12. Nondiscrimination – The Bidder awarded the Contract and each Subcontractor and Supplier awarded a Subagreement covenants that it will comply with the nondiscrimination requirements described in paragraphs 7.12.1 through 7.12.3 of Section 00700 General Conditions.

*14.12.1. A breach of the covenants set forth in paragraph 7.12 of Section 00700 General Conditions shall be regarded as a material breach of the Contract.

*14.12.2. The Bidder awarded the Contract shall include or incorporate by reference paragraph 14.12.1 (above) and the provisions of paragraphs 7.12.1 through 7.12.3 of Section 00700 General Conditions in every Subagreement, unless exempted by rules, regulations or orders of the Michigan Civil Rights Commission. Each Subagreement shall provide that those provisions shall be binding upon the Subcontractor or Supplier.

*14.13. Bidders are further directed to Article 7 of Section 00700 General Conditions for terms and conditions concerning the following Michigan legal requirements applicable to this Contract: (a) Laws and permits, paragraph 7.1, (b) taxes, paragraph 7.2, (c) safety and protection, paragraph 7.3, (d) unfair labor practice, paragraph 7.10, (e) Michigan Right-to-Know Law, paragraph 7.11, and (f) Michigan residency for employees, paragraph 7.13.

ARTICLE 15 EXECUTION OF THE AGREEMENT

15.1. Upon acceptance of a Bid for the Work by the **Board** or by the **Director** of the **Department** of Technology, Management and Budget, the **Director-FA** or his/her designate will send the Notice of Award to the Bidder awarded the Contract. The Notice of Award will (a) designate the Contract Price and itemize the Alternates that the **Owner**, in its sole discretion, has accepted, (b) enclose completed, unsigned Section 00500 Agreement forms in triplicate and blank Section 00610 Performance and Section 00620 Payment Bond forms, and (c) outline the procedures to be followed and information to be provided by the **Contractor** for execution of Section 00500 Agreement.

15.2. Unless otherwise designated in the Notice of Award, within fifteen (15) Calendar Days after receipt of the Notice of Award, the Bidder recommended for award shall (a) sign Section 00500 Agreement, in triplicate; (b) execute Section 00610 Performance Bond and Section 00620 Payment Bond (and attach to each Bond separate, certified copy of Power of Attorney); and (c) return to the Owner the executed Section 00500 Agreement, Section 00610 Performance Bond and Section 00620 Payment Bond forms, evidence of original certificates of insurance and any other documents required for submission by the Notice of Award.

15.3. Evidence of insurance shall consist of certificates of insurance confirming that the policies of insurance that the **Contractor** has obtained, including the limits of coverage and endorsements provided, are in compliance with the insurance requirements specified in paragraphs 7.4 through 7.7 of Section 00700 General Conditions. Certificates of insurance shall contain a statement confirming that coverage will not be canceled, adversely changed or renewal refused until at least thirty (30) Calendar Days' prior written notice has been delivered or mailed to the **Owner** and **Contractor**.

15.4. The **Owner** will execute the Section 00500 Agreement and compile three (3) full sets of the Contract Documents upon two conditions: (a) receipt of the executed Section 00500 Agreement, Section 00610 Performance Bond and Section 00620 Payment Bond (with each Bond enclosing a separate certified copy of Power of Attorney and a separate certificate of principal) and evidence of insurance; and (b) a determination by the **Owner** that the Section 00610 Performance Bond and Section 00620 Payment Bond, required certifications and evidence of insurance received conform to the requirements of the Contract Documents and are acceptable to the **Owner**.

15.5. Each full set of the executed Contract Documents shall consist of: (a) two (2) or more volumes containing the executed Agreement (conformed Section 00500); executed Performance and Payment Bond and certifications (conformed Section 00610 and Section 00620); the **Contractor's** Bid Form and Noncollusion Affidavit (conformed Sections 00300 and 00320) and Certificate of Awardability; and the remainder of the Bidding Documents, including Addenda; and (b) a separate volume with Qualification Submittals submitted by the **Contractor** that the **Owner**, in its sole discretion, chooses to include as part of the Contract Documents. The **Contractor** will receive one full set of the executed Contract Documents with the Notice to Proceed or at the pre-construction conference.

15.6. Bid prices in the "Schedule of Change Order Prices" on the **Contractor's** Bid Form accepted by the **Owner** upon evaluation of the **Contractor's** Bid will be incorporated into the Contract as provided in paragraph 3.2 of Section 00500 Agreement.

15.7. The Notice to Proceed shall be authorized by the **Director-FA** or his/her designee. Subject to the provisions of Article 13 and compliance with paragraphs 15.2 through 15.4, the Notice to Proceed shall designate a Date of Commencement of the Contract Time no later than sixty (60) Calendar Days after the date ending the Bid hold period, or thirty (30) Calendar Days after receipt by the **Owner** of the executed Section 00500 Agreement and acceptable, executed Section 00610 Performance Bond and Section 00620 Payment Bond, whichever last occurs, unless otherwise directed in writing by the **Owner**.

15.8. Within fifteen (15) Calendar Days after receiving the Notice to Proceed, the **Contractor** shall submit to the **Owner** any additional Change Order cost and pricing data requested with the Notice to Proceed. The **Contractor's** submittal shall be itemized in a breakdown acceptable to the **Owner**, and shall be certified as

accurate, current and complete by a duly authorized financial representative of the **Contractor**. The **Contractor** shall meet with the **Owner** to review the cost and pricing data submittal. The **Owner** shall incorporate into the Contract Documents any acceptable cost and pricing data by Change Authorization issued within a reasonable time after the Notice to Proceed.

ARTICLE 16 MOBILIZATION PAY ITEM

16.1. The mobilization pay item, if designated in the Specifications and/or the Bid Schedule in Section 00300 Bid Form, shall be intended to cover, at least in part, up-front costs incurred by the **Contractor** from Contract Award until sixty (60) Calendar Days after the **Contractor** starts the Work. Allowable mobilization items shall be as itemized in the Schedule of Values approved by the **Professional**, and may include costs incurred by the **Contractor** (a) in establishing temporary site offices and other facilities specified in the Specifications, (b) in obtaining permits required to commence the Work, (c) for premiums for the required Section 00610 Performance Bond and Section 00620 Payment Bond, (d) for insurance obtained by the **Contractor** to comply with the requirements of the Contract Documents, and (e) in complying with the Revision 0 Schedule and Cost Submittal requirements.

16.2. Total payments to the **Contractor** under the mobilization pay item shall not exceed four percent (4%) of the Base Bid, unless otherwise expressly provided in the Bidding Documents. If the **Contractor** incurs costs, which the **Contractor** considers within the scope of the mobilization pay item, in excess of the four percent (4%) limitation, those excess costs will not be reimbursed under the mobilization pay item and will be deemed to have been included in other parts of the **Contractor's** Bid.

16.3. To the extent practicable, the basis of measurement for payment shall be proof of actual payment by the **Contractor**. Where actual payment by the **Contractor** does not apply, as in the case of premiums for the Section 00610 Performance Bond, the Section 00620 Payment Bond and the insurance policies the **Contractor** is required to furnish under the provisions of Article 15, or in connection with the **Contractor** costs to comply with the Revision 0 Progress Schedule and Cost Submittal requirements of the Contract Documents, the basis of measurement for payment shall be as stipulated in the Schedule of Values approved by the **Professional**. Payments to the **Contractor** shall be based on the requirements of the Bidding Documents, subject to the following:

16.3.1. Approval by the **Professional** of the Schedule of Values (required by paragraph 12.1 of Section 00700 General Conditions) shall be a condition precedent to making any payment under the mobilization pay item. Partial payments shall be based on the breakdown itemized in the Schedule of Values and the extent of completion, as determined by the **Professional**.

16.3.2. Full payment of the amount corresponding to the Revision 0 Schedule and Cost Submittals shall be paid by with the Request for Payment following return to the **Contractor** of the Revision 0 Submittal, or Revision 0A Submittal (i.e., first resubmission), Revision 0B Submittal (i.e., second resubmission), etc. of the Progress Schedule marked "Resubmittal Not Required."

ARTICLE 17 SOIL EROSION AND SEDIMENTATION CONTROL —FINE FOR NON-COMPLIANCE

17.1. All Work within this Contract must comply with the applicable soil erosion and sedimentation control rules and regulations (Soil Erosion and Sedimentation Control – 1994 PA 451, Part 91, as amended, MCL 324.9101 et seq.) and specific provisions for same within the Contract Documents. Soil erosion and sedimentation control will be monitored and enforced by the Department of Technology, Management and Budget, **Facilities and Business Services Administration**.

17.2. Soil erosion and sedimentation control on **Department** Projects will be monitored and enforced by **Facilities and Business Services Administration** through the review of **Contractor** implementation plans and site inspections by Soil Erosion and Sedimentation Control Unit personnel and/or **Facilities and Business Services Administration** Resident Inspectors.

17.2.1. In the event, the **Owner** determines through site inspections by the **Facilities and Business Services Administration** Representative or by notification by regulatory authorities that the **Contractor** has not met the soil erosion requirements of the Project and/or is in violation of the applicable soil erosion and sedimentation control statutes, the **Contractor** shall be notified in writing and stop work orders may be issued by **Facilities and Business Services Administration** in conjunction with paragraph 2.3 of Section 00700 General Conditions.

17.3. In the event, the **Owner** determines through site inspections by the **Facilities and Business Services Administration** Representative or by notification by regulatory authorities that the **Contractor** has not met the soil erosion requirements of the Project and/or is in violation of the applicable soil erosion and sedimentation control statutes, the **Contractor** shall be notified in writing and corrective actions undertaken by **Facilities and Business Services Administration** in conjunction with paragraph 9.4 of Section 00700 General Conditions.

17.4. In the event, the **Contractor** fails to respond to written notice from **Facilities and Business Services Administration** regarding noncompliance with the provisions of the Contract Documents and/or soil erosion and sedimentation control regulations applicable to this Work, **Facilities and Business Services Administration** has the right to assess a fine to the **Contractor**. Fines shall be in addition to any other remediation costs or liquidated damages applicable to the Project and may exceed the value of the Contract.

END OF SECTION 00100

ATTACHMENT A TO SECTION 00100 – BIDDER'S CHECK LIST

PROFESSIONAL – **Wigen Tincknell Meyer & Associates, Inc.**

WORK – **Exterior Facade Repairs To: Stevens T. Mason Building**

AGENCY No. – **071** INDEX No. **44103** FILE No. **071/11193.CAK**

BEFORE BID OPENING:

Wednesday, February 12, 2014 – Due date for delivery to the **Professional** of written proposals seeking to have the **Professional** consent to naming additional materials or equipment by Addenda. (Reference: Section 00100, Paragraph 7.2).

Wednesday, February 12, 2014 – Bidder inquiries received after this date will not be answered, unless answered through Addenda issued at least seventy-two (72) hours before Bid opening (Business Days only), the Bid opening is postponed by Addendum, or the Work is rebid following post-Bid Addenda. (Reference: Section 00100, paragraph 4.1).

CONTENTS IN AND MARKING OF OPAQUE SEALED BID ENVELOPE (ITEMS 1 THROUGH 6 BELOW):

NOTE 1: THE BIDDER SHALL USE THE UNBOUND BLANK BID SUMMARY, BID FORM AND BID FORM ATTACHMENTS INCLUDED WITH THE BIDDING DOCUMENTS, UNLESS REVISED BY ADDENDUM, IN WHICH CASE THE LATEST REVISION OF THE BID SUMMARY, BID FORM AND/OR BID FORM ATTACHMENTS ISSUED BY ADDENDUM SHALL BE USED.

NOTE 2: THE BIDDER IS NOT REQUIRED TO REMOVE THE BID SUMMARY, BID FORM AND BID FORM ATTACHMENTS FROM THE PROJECT MANUAL. THE BIDDER IS NOT REQUIRED TO INSERT THE PROJECT MANUAL OR DRAWINGS IN THE SEALED BID ENVELOPE, ONLY THE COMPLETED BID SUMMARY, BID FORM AND BID FORM ATTACHMENTS!

_____ 1. Completed Bid Summary provided with Section 00300 Bid Form.

_____ 2. Completed Section 00300 Bid Form, which requires (a) completing the acknowledgment of Addenda in paragraph 2.1, (b) filling out Article 6 Bid Schedule and, if any prices are designated, completing Article 7 Change Order Prices, and (c) completing Article 8, that is, entering the date the Bid is submitted, completing paragraphs 8.1 through 8.4, and, if the Bidder is a joint venture, paragraph 8.5, and signing, as appropriate, in the spaces provided.

_____ 2.1 Completed Certificate of Principal or other equivalent acceptable certificate or authorization document, which certificate shall be attached to the completed Section 00300 Bid Form.

_____ 3. Bidder's Certificate of Awardability issued by the Michigan Department of Civil Rights, which certificate shall be attached to the last page of Section 00300 Bid Form.

_____ 4. If the Bid includes a Bid Bond, ensure that the surety is authorized to do business in the State by the Department of Labor and Economic Growth – Insurance Bureau and is listed on the current U.S. Department of the Treasury Circular 570. Also, ensure that the completed Section 00310 Bid Bond is dated, is signed by both the Bidder and surety and attaches Power of Attorney. If the Bid includes a certified or cashier's check or money order, that check or money order shall be attached to Section 00300 Bid Form, as provided in paragraph 8.1 of Section 00300 Bid Form.

_____ 5. Completed Section 00320 Noncollusion Affidavit.

_____ 6. Qualified Disabled Veterans Preference Documentation (if preference requested).

_____ 6.1 DD 214 – Proof of Service/Discharge.

_____ 6.2 Veterans Administration Rating Decision Letter – Proof of Disability, if not indicated in the DD 214.

_____ 6.3 Legal Proof of 51% QDV Ownership

_____ 7. Bidder's name, address and telephone; name of the Work; and Agency No. 071, Index No. 44103 File No. 071/111193.CAK shall be printed on the OPAQUE SEALED BID ENVELOPE (Reference: Section 00100, paragraph 10.4).

This Bidder's Check List is provided solely to aid the Bidder in submitting a Bid. It shall not be relied on to include all items necessary to insure a complete Bid. The Bidder is solely responsible for including all items as required by the Bidding Documents, including any items required by Addenda, which may not be listed in this Bidder's Check List.

SECTION 00210 INFORMATION FOR BIDDERS

PROFESSIONAL – **Wigen Tincknell Meyer & Associates, Inc.**

WORK – **Exterior Facade Repairs To: Stevens T. Mason Building**

AGENCY No. – **071** INDEX No. **44103** FILE No. **071/11193.CAK**

1.0 RELATED PROVISIONS

1.1. Paragraphs 3.4 through 3.7 of Section 00100 Instructions to Bidders, which contain terms and conditions governing the information made available to Bidders in this Section, are made part of this Section 00210 Information for Bidders by this reference.

2.0 SUBSURFACE CONDITIONS

2.1. The reports of explorations and tests of subsurface conditions itemized immediately below have been used by the **Professional** in the preparation of the Bidding Documents. If those reports are not attached to this Section 00210, they are available for purchase ($_____ per copy) from the **Professional**.

2.1.1. Information or data contained in those reports that may be properly considered Authorized Technical Data concerning subsurface conditions include (NOTE: All other information or data excluded from the list below represent Non-Technical Information or Data, interpretations or opinions):

2.2. The reports of explorations and tests of subsurface conditions itemized immediately below have not been used by the **Professional** in the preparation of the Bidding Documents. Those reports are available at the office of the **Professional** for review or purchase. Neither the **Owner** nor **Professional** warrants that this list identifies all existing relevant documents.

3.0 OTHER PHYSICAL CONDITIONS

3.1. The Drawings and technical Specifications and those drawings itemized immediately below contain information or data that have been used by the **Professional** in the preparation of the Bidding Documents, and that may be properly considered Authorized Technical Data concerning physical conditions of existing surface and subsurface facilities.

3.2. The reference documents itemized immediately below have not been used by the **Professional** in the preparation of the Bidding Documents, and are available at the office of the **Professional** for review or purchase. Information and data contained in those reference documents, including, but not limited to dimensions, locations and conditions of existing surface and subsurface structures, roadways, piping, raceways, equipment, etc. may not accurately or reliably reflect actual conditions. Neither the **Owner** nor **Professional** warrants that this list identifies all existing relevant documents.

4.0 UNDERGROUND UTILITIES

4.1. Information or data about physical conditions of existing Underground Utilities, that have been used by the **Professional** in the preparation of the Bidding Documents, is shown or indicated in the Drawings and technical Specifications and those Underground Utility drawings itemized immediately below.

5.0 PERMITS, APPROVALS, LICENSES AND FEES

5.1. To the extent that the **Owner** has secured or will secure any permits, approvals and licenses and has paid or will pay any associated charges and fees, any such permits, approvals and licenses are itemized in this paragraph:

5.2. In the event any permits, approvals and licenses itemized in paragraph 5.1 have been obtained by the **Owner** and the fees have been paid, copies of those permits, approvals, licenses and corresponding fee receipts, are either attached to this Section 00210 Information for Bidders or are available for purchase (cost of $ _____ per copy) from the **Professional**

5.3. Except for any permits, approvals, licenses and fees identified in paragraph 5.1, the **Contractor** shall be responsible for all permits, approvals, licenses and fees applicable to Work.

6.0 SEQUENCING REQUIREMENTS

6.1. Refer to the technical Specifications, including, but not limited to the General Requirements, for information, data and criteria on sequences of Work restraints, constructability and maintenance of service to existing facilities, which, if provided, shall govern the selection of Work sequences.

6.2. Each Bidder shall be responsible for any conclusions or interpretations the Bidder makes related to the selection of sequences and Means and Methods, based on the technical data made available, and/or those additional investigations or studies made or obtained by that Bidder.

7 SCHEDULE OF CHANGE ORDER PRICES	__
8 BID SUBMITTED	__

ARTICLE 1 THIS BID IS SUBMITTED TO THE STATE OF MICHIGAN ("the **Owner**").

1.1. The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an agreement with the **Owner** on the form in Section 00500 Agreement and to furnish and perform the Work as specified or indicated in the Bidding Documents for the Bid prices in the "Bid Schedule" on this Section 00300 Bid Form, within the Contract Times specified in Section 00500 Agreement, and in accordance with all other provisions and terms and conditions of the Bidding Documents, including, without limitation, those dealing with the disposition of the Bid Security.

1.2. The undersigned Bidder agrees to hold this Bid open for acceptance by the **Owner** for the period specified in Article 9 of Section 00030 Advertisement.

STATE OF MICHIGAN MODEL
Developed from FORMSPEC™ Michigan Model

1.3. The Bidder will deliver the signed triplicate originals of Section 00500 Agreement, the executed Section 00610 Performance Bond, the executed Section 00620 Payment Bond and appropriate evidence of insurance within the times and in the manner specified in the Bidding Documents.

ARTICLE 2 THE BIDDER'S REPRESENTATIONS

2.1. The Bidder has examined the Bidding Documents, including the Addenda acknowledged in the table below. The Bidder has verified that the Addenda acknowledged below include all issued Addenda. Except for Addenda, which solely revise the date of Bid, opening, failure by the Bidder to acknowledge receipt of all Addenda correctly, by either failing to complete or incorrectly completing the table below, shall justify the Owner's refusal to read the Bid and automatically disqualify the Bidder from any consideration for award of the Contract.

No. ___ Dated _____ No. ___ Dated _____

No. ___ Dated _____ No. ___ Dated _____

No. ___ Dated _____ No. ___ Dated _____

2.2. The Bidder has taken those steps that are reasonably necessary to (a) ascertain and become familiar with the Work, site and locality; (b) account for all applicable federal, State and other local Laws and all general, local and prevailing conditions that may in any manner affect cost, schedule, progress, performance or furnishing of the Work; and (c) study and account for the terms and conditions of the Bidding Documents. The Bidder has carefully correlated the Bidder's observations with the Bidding Documents.

2.3. The Bidder has studied carefully all reports concerning subsurface conditions and drawings of physical conditions of existing surface and subsurface facilities that have been used by the **Professional** and all documents of physical conditions of existing Underground Utilities facilities that have been used by the **Professional** – in both cases as identified in Section 00210 Information for bidders. The Bidder assumes responsibility for carefully and accurately locating existing Underground Utilities in a manner consistent with paragraph 10.3 of Section 00700 General Conditions and as required by 1974 PA 53, as amended, MCL 460.701 et seq. The Bidder accepts the determinations set forth in the Bidding Documents as to the extent of such Authorized Technical Data and Underground Utilities information and data contained in those reports, drawings, documents or the Bidding Documents, as applicable, upon which the Bidder may rely.

2.4. To the extent Additional Technical Data has been considered by the Bidder as necessary for determining the Bid in Article 6 Bid Schedule, and the **Owner**, upon request, did not have the necessary Additional Technical Data, the Bidder assumes responsibility for having undertaken or undertaking reasonable examinations of the site and any other pertinent available information and data. The Bidder agrees to perform and furnish the Work affected by the conditions involved, at no increase in

Contract Price and Contract Time, to the extent the information and data necessary for determining the Bid could have been discovered through reasonable examinations of the site and any other pertinent information and data available (including, but not limited to the information and data designated in Section 00210 Information for Bidders).

2.5. The Bidder has carefully correlated the results of its observations, examinations and studies of those reports of explorations and all that information and data in studies, drawings and specifications, referred to in paragraphs 2.3 and 2.4, with the terms and conditions of the Bidding Documents.

2.6. The Bidder has examined all information and data shown or indicated in the Bidding Documents concerning other work, including, but not limited to provisions in Section 00700 General Conditions. The Bidder assumes responsibility for all reasonably foreseeable terms, conditions and consequences resulting from other work that may in any manner affect cost, schedule, progress, performance or furnishing of the Work.

2.7. The Bidder has carefully examined the terms and conditions of the Bidding Documents concerning Delay, Activity Float times and early completion. The Bidder agrees that increases in Contract Price and/or Contract Time for Delay shall be as provided in Section 00700 General Conditions. The Bidder has correlated those terms and conditions with the Bidder's schedule for the Work and its Base Bid and Alternates.

2.8. The Bidder represents that each unit price covering Specified or Contingent Unit Price Work, whether bid on Article 6 – Bid Schedule or on Article 7 – Schedule of Change Order Prices, includes sufficient amounts to cover (a) all labor costs, Subcontractor costs, material and equipment costs, construction equipment costs and general conditions costs, and (b) all administrative costs and home office overhead), and (c) profit. The **Owner** reserves the right to reject any unit prices bid on paragraph 6.2 Schedule of Alternates or in Article 7 Schedule of Change Order Prices, which, in the **Owner's** sole discretion, are not in the **Owner's** best interest.

2.9. The Bidder has given the **Professional** written notice of all conflicts, ambiguities, errors or omissions the Bidder has discovered in the Bidding Documents, and the written resolution given by the **Professional** is acceptable to the Bidder.

2.10. This Bid is genuine, is not made in the interest of or on behalf of any undisclosed person and is not submitted in conformity with any agreement or rules of any group, association, organization or corporation. To induce the **Owner** into consideration of this Bid, the Bidder reiterates and makes each of the representations made by the Bidder in Section 00320 Noncollusion Affidavit attached to this Section 00300 Bid Form.

2.11. The Bidder is aware of the **Owner's** requirements for business owned by minorities, women and persons with physical or mental disabilities, and assumes responsibility for all conditions and consequences that may result from meeting those requirements and that may in any manner affect cost, schedule, progress, performance and furnishing of the Work.

2.12. The Bidder has read and studied each provision of the Bidding Documents. The Bidder has no expectations different from the terms and conditions of the Bidding Documents.

ARTICLE 3 TIME OF COMPLETION

3.1. The Contract Times are specified in paragraph 4.1 of Section 00500 Agreement. The Bidder has carefully correlated the provisions in paragraph 4.1 of Section 00500 Agreement with the other terms and conditions of the Bidding Documents and unequivocally accepts the Contract Times for the Work, and any other designated parts of the Work, as specified.

3.2. The Bidder unequivocally accepts the liquidated damage provisions specified in paragraph 4.2 of Section 00500 Agreement in the event of any failure, neglect or refusal to complete the Work, or designated part of the Work, within the corresponding Contract Times specified in paragraph 4.1 of Section 00500 Agreement.

ARTICLE 4 ATTACHMENTS INCLUDED WITH THIS BID

4.1. Attachments to this Section 00300 Bid Form and made a condition of this Bid are:

4.1.1. Evidence of Authority to Sign the Bid.

4.1.2. Section 00310 Bid Bond, with the attached certified copy of Power of Attorney, or

Alternate Bid Security.

4.1.3. Certificate of Awardability.

4.1.4. Section 00320 Noncollusion Affidavit.

4.2. Bidder-provided documents, made a condition of this Bid, are as required in the following Section(s) of the Bidding Documents: _____

ARTICLE 5 DEFINED TERMS

5.1. Section 00020 Glossary assigns specific intent and meanings to capitalized terms and to other defined terms used in (a) this Section 00300 Bid Form, (b) Section 00310 Bid Bond and Section 00320 Noncollusion Affidavit), and (c) Section 00410 Bid Breakdown, Section 00420 Questionnaire, Section 00430 List of Subcontractors and Section 00440 Schedule of Materials and Equipment.

ARTICLE 6 BID SCHEDULE

6.1 Base Bid Schedule - The Bidder will complete the Work and accept in full payment, for the Work items listed, the following unit prices and/or Bid Prices, as applicable:

Base Bid Item No.	Bid Quantity	Description (Bidder to write price in words)	Unit Price	Bid Price
		NONE		

Base Bid (Sum of Bid Prices for all Base Bid Items):

_____ Dollars and No/Cents $_____
(use words) (in figures)

Name of the Bidder _____ Agency No. _____ Index No. _____ File No. _____

Date _____

Federal Identification (I.D.) No. or Social Security No. _____

Telephone No. _____

6.2 Schedule of Alternates - The Bidder will complete (or deduct from the Contract) the parts of the Work designated by the Alternates that follow and accept in full payment (or allow in full credit) for those parts of the Work the following Bid Prices:

Alternate Item No.	Bid Quantity	Description (Bidder to write price in words)	Unit Price	Bid Price
Alternate No. 1	Lump Sum	Located at the lower plaza area on the east side of the building; All masonry repairs to wall caps and veneer as indicated on Sheet A2.0, A2.1, A5.4 and A7.4.	DEDUCT $ _____	
Alternate No. 2	Lump Sum	Located at the lower plaza area on the east side of the Building and in lieu of Alternate No. 1 Work; All masonry repairs to wall caps and veneer, install new waterproofing to south concrete wall substrate, install new sections of metal guard railing and paint existing metal louvers, as indicated on Sheet A2.0, A2.1, A5.4 and A7.4.	DEDUCT $ _____	
Alternate No. 3	Lump Sum	Located at the loading dock and planter walls on the west side of the building; All concrete repairs to planter walls and deck structure as indicated on Sheet A2.0, A2.1, A5.2, A5.5 and A7.5.	DEDUCT $ _____	
Alternate No. 4	Lump Sum	Located on the east and south elevations as indicated on Sheet A2.0, A2.1, A5.1 and A5.2; All masonry and flashing repairs to the entire exterior building elevation(s).	DEDUCT $ _____	
Alternate No. 5	Lump Sum	Located on the south building elevation as indicated on Sheet A2.0, A2.1 and A5.1; All masonry and flashing repairs to the entire building elevation.	DEDUCT $ _____	
Alternate No. 6	Lump Sum	Located on the west building elevation as indicated on Sheet A2.0, A2.1 and A5.2; All masonry and flashing repairs to the entire building elevation.	DEDUCT $ _____	

The Bidder further acknowledges and agrees that the separate prices bid on this "Schedule of Alternates," where they are applicable and deemed acceptable by the **Owner**, will be used if incorporated into the Contract when the **Owner** issues the Notice of Award.

Name of the Bidder _____ Agency No. _____ Index No. _____ File No. _____

Date _____

Federal Identification (I.D.) No. or Social Security No. _____

Telephone No. _____

ARTICLE 7 SCHEDULE OF CHANGE ORDER PRICES

7.1 The Bidder shall use this "Schedule of Change Order Prices" to propose contingent prices. The proposed contingent Change Order prices set forth in this schedule, at the sole discretion of the **Owner,** may, or may not be incorporated into the Contract Documents.

The **Owner** reserves the right to negotiate contingent Change Order prices set forth herein prior to their possible incorporation into the Contract Documents. Proposed Change Order prices will not affect determination of the lowest Bid.

7.2 Subject to their incorporation into the Contract Documents, as provided in the Agreement, the Bidder will add to, or deduct from, the Contract Work covered by the contingent prices that follow and accept in full payment, or allow in full credit, for that Work (a) those prices bid by the Bidder, or (b) if a particular price is not bid, the price proposed by the **Owner** (and shown in the appropriate column):

Item No.	Units or Quantity	Description (Bidder to write price in words)	Bidder's Bid Price	Price Proposed By the Owner
7.2.1	One (1) Lineal Foot	Remove existing stone mortar to a depth of one (1) inch minimum and repoint with new mortar.	ADD or DEDUCT $ _____

END OF SECTION 00300

SECTION 00310 BID BOND

AGENCY No. 071 INDEX No. 44103 FILE No. 071/111193.CAK SURETY COMPANY REFERENCE No. _____

KNOW ALL PERSONS BY THESE PRESENTS: That we, "the Bidder," _____, a corporation ____, individual ____, partnership ____, joint venture ____, of the State of _____, qualified to do business in the State of Michigan, as Principal, and "the Surety," _____, of the State of _____, as surety, are hereby held and firmly bound unto the State of Michigan, "the **Owner**," as Obligee, in the amount of _____ Dollars ($_____), and if no amount is entered, in the amount of five percent (5%) of the Bidder's Base Bid designated in paragraph 6.1 Base Bid Schedule in Section 00300 Bid Form, for the payment of which the Bidder and the Surety hereby bind ourselves, our respective heirs, successors, legal representatives and assigns, jointly and severally, firmly by these presents in accordance with Michigan Law.

WHEREAS, the Bidder has submitted to the **Owner** a Bid, to which this Bond is attached, to enter into the Contract with the **Owner** for **Exterior Facade Repairs**, including, but is not necessarily limited to the masonry facade throughout the entire building, concrete planter walls adjacent to the loading dock and masonry within the East Plaza Area. Repairs include window head flashings, damaged brick, stone, mortar and concrete, and sealant replacement. covered by Bidding Documents prepared by the **Professional**, which Bidding Documents are incorporated into this Bid Bond by this reference:

NOW, THEREFORE: THE CONDITION OF THIS OBLIGATION IS THAT, if the Bidder faithfully performs and fulfills all the understandings, covenants, terms and conditions of the Bidding Documents governing the bidding and award of the Contract (including Addenda issued before Bid opening and any post–Bid Addenda) within the time specified or any extension thereof, with or without notice to the Surety or fails to do so but pays to the **Owner** the full amount of the sum set forth in this Section 00310 Bid Bond as liquidated damages - then THIS OBLIGATION SHALL BE NULL AND VOID, OTHERWISE THIS OBLIGATION SHALL REMAIN IN FULL FORCE AND EFFECT.

A. If the **Owner** makes demand on the Surety to perform in accordance with the Surety's obligations under this Section 00310 Bid Bond, the full amount of the sum set forth in this Section 00310 Bid Bond shall be immediately due and payable to the **Owner**, and the Surety shall pay that sum without delay. Additionally, the Surety shall reimburse the **Owner** all costs of collection, which shall include, but not be limited to reasonable fees and charges of architects, engineers, attorneys and others, court or hearing costs incurred with or without suit, and interest.

B. The Surety, for value received, stipulates and agrees that the obligations of the Surety and this Section 00310 Bid Bond shall be in no way impaired or affected by any extension of the time within which the **Owner** may accept the Bid, and the Surety does, by this agreement, waive notice of any such extension.

C. It is the intention of the Bidder, Surety and **Owner** that the Surety shall be bound by all terms and conditions of the Bidding Documents and this Section 00310 Bid Bond. However, if any provision(s) of this Section 00310 Bid Bond is/are illegal, invalid or unenforceable, all other provisions of this Section 00310 Bid Bond shall nevertheless remain in full force and effect, and the **Owner** shall be protected to the full extent provided by Michigan Law.

IMPORTANT: The Surety shall be authorized to do business in the State by the Department of Consumer and Industry Services – Insurance Bureau and listed on the current U.S. Department of the Treasury Circular 570, and shall be otherwise acceptable to the **Owner**.

SECTION 00320 NONCOLLUSION AFFIDAVIT

PROFESSIONAL – **Wigen Tincknell Meyer & Associates, Inc.**

WORK – **Exterior Facade Repairs To: Stevens T. Mason Building**

AGENCY No. – **071** INDEX No. **44103** FILE No. **071/111193.CAK**

Affiant, _____, being first duly sworn, deposes and says that:

(1) Affiant is (enter title) _____ of _____ _____, "the Bidder." Affiant has personal knowledge of the matters set forth in this Affidavit and is competent to testify about them.

(2) The Bidder has submitted to the **Owner** a "Bid" to enter into the above referenced Contract, also referred to in this Affidavit as "the Work."

(3) This Section 00320 Noncollusion Affidavit is executed by Affiant for inclusion with the submission to the **Owner** of the Bid and may be relied upon by the **Owner** in considering the Bid.

(4) Affiant is fully informed about the preparation and contents of the Bid and of all pertinent circumstances surrounding the Bid, has not entered into any contract, combination, conspiracy or other act prohibited by federal, State or any other local Law. The Bid is genuine and is not a collusive or sham Bid.

(5) Neither the Bidder nor any of the Bidder's owners, officers, partners, directors, agents, representatives, employees or parties in interest, including this Affiant, have in any way entered or proposed to enter into any combination to prevent the making of any Bid, or to fix any prices (including overhead, profit or other costs) for the Bid; or have made any agreement, or given or promised any consideration to induce any other person not to Bid for the Work, or to Bid at a specified price; or have secured, proposed or intended to secure through any agreement an unlawful advantage against the **Owner** or any other person interested in the Work.

(6) No officer or employee of the State of Michigan is personally or financially interested, directly or indirectly, in the Bid, or any Contract which may be under it, or in the purchase or sale of any materials, equipment or supplies for the Work to which it relates, or any portion of any expected profits thereto.

(7) The Bid is not intended to secure an unfair advantage or benefit from the **Owner** or in favor of any person interested in the proposed Contract.

(8) The prices bid are fair and proper and are not tainted by any collusion, conspiracy, connivance, or unlawful agreement on the part of the Bidder or any other of the Bidder's owners, officers, partners, directors, agents, representatives, employees or parties in interest, including this Affiant; and neither the Bidder nor any of its owners, officers, partners, directors, agents, representatives, employees or parties in interest, including this Affiant, have divulged any information regarding the Bid or any data about the Bid to any other person.

Certification of a Michigan Based Business

(Information Required Prior to Contract Award for Application
of State Preference/Reciprocity Provisions)

To qualify as a Michigan business:

Vendor must have, during the 12 months immediately preceding this bid deadline:
or
If the business is newly established, for the period the business has been in existence, it has:

(check all that apply):

( ) Filed a Michigan single business tax return showing a portion or all of the income tax base allocated or apportioned to the State of Michigan pursuant to the Michigan Single Business Tax Act, 1975 PA 228, MCL ~208.1 – 208.145; or

( ) Filed a Michigan income tax return showing income generated in or attributed to the State of Michigan; or

( ) Withheld Michigan income tax from compensation paid to the bidder's owners and remitted the tax to the Department of Treasury; or

I certify that **I have personal knowledge** of such filing or withholding, that it was more than a nominal filing for the purpose of gaining the status of a Michigan business, and that it indicates a significant business presence in the state, considering the size of the business and the nature of its activities.

I authorize the Michigan Department of Treasury to verify that the business has or has not met the criteria for a Michigan business indicated above and to disclose the verifying information to the procuring agency.

Bidder shall also indicate one of the following:

☐ Bidder qualifies as a Michigan business (provide zip code: _____)

☐ Bidder does not qualify as a Michigan business (provide name of State: _____).

☐ Principal place of business is outside the State of Michigan, however service/commodity provided by a location within the State of Michigan (provide zip code: (_____).

Responsibility Certification

The bidder certifies to the best of its knowledge and belief that, within the past three (3) years, the bidder, an officer of the bidder, or an owner of a 25% or greater interest in the bidder:

(a) Has not been convicted of a criminal offense incident to the application for or performance of a contract or subcontract with the State of Michigan or any of its agencies, authorities, boards, commissions, or departments.

(b) Has not had a felony conviction in any state (including the State of Michigan).

(c) Has not been convicted of a criminal offense which negatively reflects on the bidder's business integrity, including but not limited to, embezzlement, theft, forgery, bribery, falsification or destruction of records, receiving stolen property, negligent misrepresentation, price-fixing, bid-rigging, or a violation of state or federal anti-trust statutes.

(d) Has not had a loss or suspension of a license or the right to do business or practice a profession, the loss or suspension of which indicates dishonesty, a lack of integrity, or a failure or refusal to perform in accordance with the ethical standards of the business or profession in question.

(e) Has not been terminated for cause by the Owner.

(f) Has not failed to pay any federal, state, or local taxes.

(g) Has not failed to comply with all requirements for foreign corporations.

(h) Has not been debarred from participation in the bid process pursuant to Section 264 of 1984 PA 431, as amended, MCL 18.1264, or debarred or suspended from consideration for award of contracts by any other State or any federal Agency.

(i) Has not been convicted of a criminal offense or other violation of other state or federal law, as determined by a court of competent jurisdiction or an administrative proceeding, which in the opinion of DTMB indicates that the bidder is unable to perform responsibly or which reflects a lack of integrity that could negatively impact or reflect upon the State of Michigan, including but not limited to, any of the following offenses under or violations of:

   i. The Natural Resources and Environmental Protection Act, 1994 PA 451, MCL 324.101 to 324.90106.
   ii. A persistent and knowing violation of the Michigan Consumer Protection Act, 1976 PA 331, MCL 445.901 to 445.922.
   iii. 1965 PA 166, MCL 408.551 to 408.558 (law relating to prevailing wages on state projects) and a finding that the bidder failed to pay the wages and/or fringe benefits due within the time period required.
   iv. Repeated or flagrant violations of 1978 PA 390 MCL 408.471 to 408.490 (law relating to payment of wages and fringe benefits).
   v. A willful or persistent violation of the Michigan Occupational Health and Safety Act, 1974, PA 154, MCL 408.10001 to 408.1094, including: a criminal conviction, repeated willful violations that are final orders, repeated violations that are final orders, and failure to abate notices that are final orders.
   vi. A violation of federal or state civil rights, equal rights, or non-discrimination laws, rules, or regulations.
   vii. Been found in contempt of court by a Federal Court of Appeals for failure to correct an unfair labor practice as prohibited by Section 8 of Chapter 372 of the National Labor Relations Act, 29 U. s. C. 158 (1980 PA 278, as amended, MCL 423.321 et seq).

I understand that a false statement, misrepresentation or concealment of material facts on this certification may be grounds for rejection of this proposal or termination of the award and may be grounds for debarment.

Bidder: _____ _____

☐ I am unable to certify to the above statements. My explanation is attached.

QUALIFICATION SUBMITTALS TO BE SUBMITTED ONLY
BY THE APPARENT LOW BIDDER
AFTER BID OPENING

AS PROVIDED IN SECTION 00100 INSTRUCTIONS TO BIDDERS

TABLE OF CONTENTS

PART A - BIDDER QUALIFICATION SUBMITTALS (FORMS ARE INCLUDED WITH THE BIDDING DOCUMENTS)
(Reference Paragraphs 2.1, 7.1 through 7.3 and 8.1, Section 00100)

SECTION 00410	BID BREAKDOWN
SECTION 00420	QUESTIONNAIRE
SECTION 00430	LIST OF SUBCONTRACTORS
SECTION 00440	SCHEDULE OF MATERIALS AND EQUIPMENT**

**Note: Information required by Article 2 is due after Contract Award.

PART B - BIDDER QUALIFICATION SUBMITTALS (A FORM IS NOT INCLUDED WITH THE BIDDING DOCUMENTS)
(Reference Paragraphs 2.1 and 2.2, Section 00100 Instructions to Bidders)

PRE–AWARD SCHEDULE

SECTION 00410 BID BREAKDOWN

PROFESSIONAL – **Wigen Tincknell Meyer & Associates, Inc.**

WORK – **Exterior Facade Repairs To: Stevens T. Mason Building**

AGENCY No. – **071** INDEX No. **44103** FILE No. **071/111193.CAK**

1.0 BID BREAKDOWN: The Apparent Low Bidder shall itemize below a cost breakdown of the Apparent Low Bidder's Bid. The Bid Breakdown shall be organized into separable parts of the Work so that one hundred percent (100%) of the Base Bid plus all Alternates is accounted for. Portions of the Work for which costs are itemized shall include Work to be furnished and performed directly by the Apparent Low Bidder and its Subcontractors and Suppliers, as applicable. Each separable part of the Work identified in this Bid Breakdown shall have a value not exceeding _____ percent (____%) of the Apparent Low Bidder's Base Bid, except parts of the Work designating furnished materials or equipment, which may be itemized as quoted.

2.0 DISCREPANCIES: Discrepancies in this Section 00410 Bid Breakdown shall be resolved in accordance with Article 14 of the Instructions to Bidders. Any discrepancies between the Apparent Low Bidder's Bid Breakdown and Article 6 "Bid Schedule" on the Apparent Low Bidder's Section 00300 Bid Form with respect to a given lump sum item, unit price item or "One Each" item, or any sum of any of them, will be resolved so that the corresponding amount(s) on the Apparent Low Bidder's Section 00300 Bid Form will be binding on the Apparent Low Bidder.

END OF SECTION 00410

SECTION 00420 QUESTIONNAIRE

PROFESSIONAL – **Wigen Tincknell Meyer & Associates, Inc.**

WORK – **Exterior Facade Repairs To: Stevens T. Mason Building**

AGENCY No. – **071** INDEX No. **44103** FILE No. **071/111193.CAK**

ARTICLE 1 ORGANIZATION

1.1. Date of organization (or incorporation) _____ State of incorporation _____ (IRS) EIN _____

1.2. Title and name of Principals (President, Vice-Presidents, Secretary and Treasurer, if a corporation; partners, if a partnership)

_____

_____

1.3. Is your organization's principal place of business maintained in the State of Michigan? ___ If your organization maintains its principal place of business outside the State, attach a copy of the Certificate of Authority which your organization procured in accordance with MCL 450.2011.

1.4. If your organization, any business entity related to or affiliated with your organization, or any present or former executive employee, officer, director, shareholder (owning twenty percent (20%) or more of the outstanding shares), partner, or owner of your organization or of any such related or affiliated entity has ever been convicted of a felony, or has felony charges pending, in any state within the last three (3) years from the date of Bid opening, furnish with this Bidder's Questionnaire all material facts relating to any such felony conviction or such pending felony charges.

ARTICLE 2 SPECIALTY CONTRACTOR LICENSES

2.1. Does your organization hold valid licenses covering specialty classifications of Work that your organization itself intends to perform and for which a specific specialty license is required by any Political Subdivision with jurisdiction over the Work _____? If so, attach a list with all licenses by number and classification; state the name of the organization holding the license, the renewal date of each license, whether each license is active, and attach a copy of each license.

ARTICLE 3 EXPERIENCE

3.1. What is the general character of the work performed by your organization? _____ How many years of experience in construction work similar in character and scope to the Work under the Bidding Documents has your organization had: (a) as a General Contractor? _____; (b) as a Subcontractor? _____.

3.2. Attach a list of all public contracts or subcontracts under public contracts that your organization has performed within the last five (5) years which are similar in character and scope to the Work under the Bidding Documents (using the forms in the "References Attachment" provided with this Questionnaire). If the contract or subcontract referenced is not substantially completed, furnish the percent complete for that contract or subcontract.

3.3. Within the last five (5) years, has your organization failed to complete a contract or subcontract awarded to it? _____ If so, attach a list for each contract or subcontract, state when, where and why.

3.4. Within the last five (5) years, has any officer or partner of your organization been an officer or partner of another organization that failed to complete a contract or subcontract? _____. If so, for each contract or subcontract, state the name of each officer or partner and the name of the organization and owner(s), and the reasons why the contract or subcontract was not completed.

ARTICLE 4 ADDITIONAL QUALIFICATIONS

4.1. (**Nominated Subcontractor only**) Will you subcontract any part of the Work covered by the intended Subagreement? ___. If so, which parts of the Work covered by the intended Subagreement do you intend to subcontract to a lower tier Subcontractor? _____

4.2. State the name, address and telephone number of a representative of your organization who personally visited and inspected the site: _____.

Also, describe, in an attachment to this Section 00420 Questionnaire, subsurface and physical conditions at or contiguous to the site that your representative investigated and how they were accounted for in the preparation of your organization's Bid.

4.3. Attach a list of construction equipment and machinery your organization intends to use in the execution of the Work, as estimated in the preparation of your organization's Bid.

4.4. Does your organization rent or lease equipment or facilities from other affiliate organizations? _____. If so, state the name of the affiliate organization(s) _____

4.5. (**Apparent Low Bidder only**) Bank line of credit available? $_____.

4.6. (**Apparent Low Bidder only**) Will your organization, i.e., the Bidder named in the Authorized Signature Article on Section 00300 Bid Form, be the only named Principal in Section 00610 Performance Bond and Section 00620 Payment Bond? _____ If not, please identify the organization who will be named as Principal or Co-Principal on Section 00610 Performance Bond and Section 00620 Payment Bond _____. Also, state how such organization relates to the Bidder _____ (NOTE: If another organization is identified, the Apparent Low Bidder shall submit to the **Owner** a separate Section 00420 Questionnaire filled out by that organization as part of the Qualification Submittals required under Article 2 of Section 00100 Instructions to Bidders).

ARTICLE 5 REFERENCES

5.1. Trade references (Minimum of three (3)):

5.2. Bank references:

5.3. Insurance:

The undersigned Apparent Low Bidder ____ or nominated Subcontractor _____ _____ certifies that all statements and answers made to the interrogatories in this Section 00420 Questionnaire are current, accurate and complete as of the date stated below. (Note: Attachments shall be fastened at the end of this Section).

SECTION 00430 LIST OF SUBCONTRACTORS

PROFESSIONAL – **Wigen Tincknell Meyer & Associates, Inc.**

WORK – **Exterior Facade Repairs To: Stevens T. Mason Building**

AGENCY No. **071** INDEX No. **44103** FILE No. **071/111193.CAK**

1. To enable the **Owner** and **Professional** to evaluate the Apparent Low Bidder's qualifications to perform the Work, for each Division of the Specifications, Section of the Specifications and/or trade itemized in this Section 00430 List of Subcontractors, the Apparent Low Bidder shall nominate the Subcontractor(s) to be awarded a Subagreement(s). To the extent a contractors' licensing is required for any such classification of Work, the Apparent Low Bidder shall provide the nominated Subcontractor's license number(s). If the Apparent Low Bidder intends to self-perform any of the listed classifications of Work, the Apparent Low Bidder shall nominate itself in the spaces provided for that purpose, and shall furnish the corresponding Apparent Low Bidder's license number(s). For each nominated Subcontractor, the Apparent Low Bidder shall enter, if applicable, whether the Subcontractor is a minority, woman or handicapped owned business in the spaces provided for that purpose. The Apparent Low Bidder also shall furnish the amount of the Subagreement that the Apparent Low Bidder, directly or through another higher tier Subcontractor, anticipates awarding to each nominated Subcontractor.

2. Should the Apparent Low Bidder fail to nominate Subcontractors, as required, or provide duplicate nominees for any Division, Specification or trade, or fail to enter the required licensing information, the Apparent Low Bidder shall clarify the omission or ambiguity within two (2) Business Days of the **Owner** or **Professional's** request. Failure by the Apparent Low Bidder to comply with this Subcontractor nominating requirement may render the Bid as not conforming in all material respects with the requirements of the Bidding Documents.

3. Pursuant to the Bidding Documents, the Apparent Low Bidder shall not remove, replace or add a nominated Subcontractor except as provided in paragraph 8.3 of Section 00100 Instructions to Bidders and/or in paragraph 5.1 of Section 00700 General Conditions. Since the requirement to nominate Subcontractors for the *listed* Divisions, Specification Sections and/or trades survives the award of the Contract, any Subcontractor nominated for any *listed* Division, Specification Section and/or trade *for the first time* after Contract Award and who is objected to by the **Owner**, for good cause, shall be replaced at no increase in Contract Price and/or Contract Time.

4. The requirement to make a definite nomination of Subcontractors or to state that the Apparent Low Bidder intends to self-perform that classification, and to clarify any omissions or ambiguities in this Section 00430 List of Subcontractors, applies to the Apparent Low Bidder and any other Bidder remaining or wishing to remain in contention for the award.

5. This listing requirement is not intended to create any express or implied duty or obligation to the Apparent Low Bidder or the nominated Subcontractors by the **Owner** or **Professional**.

SECTION 00440 SCHEDULE OF MATERIALS AND EQUIPMENT

PROFESSIONAL – **Wigen Tincknell Meyer & Associates, Inc.**

WORK – **Exterior Facade Repairs To: Stevens T. Mason Building**

AGENCY No. – **071** INDEX No. **44103** FILE No. **071/111193.CAK**

ARTICLE 1 BID MATERIALS AND EQUIPMENT – *LISTED (NAMED OR SPECIFIED) ITEMS*

1.1. The Apparent Low Bidder has examined the requirements of paragraphs 7.4 and 7.5 of Section 00100 Instructions to Bidders, and by submitting a Bid, commits to bid only a *listed* named or specified materials and equipment for those Specifications *listed* in Schedule 1.6. To the extent that any such *listed* Specification states that an "or equal" or a substitute may be furnished, if acceptable to the **Professional,** application for any such acceptance will not be considered by the **Professional** until after Contract Award. Any such application shall comply with the terms and conditions of Article 2 in this Section and paragraph 5.2 of Section 00700 General Conditions.

1.2. For those Sections of the Specifications *listed* in paragraph 1.6, the Contract will be awarded on the basis that only one of the *listed* materials or equipment will be furnished. Therefore, to be considered responsible, the Apparent Low Bidder shall nominate, by circling the letters "A," "B," "C," etc. corresponding to each *listed* manufacturer/Supplier, the Bidder's chosen manufacturers/Suppliers for the corresponding products named or specified in the Specifications and Drawings (including all Addenda).

1.3. If the Apparent Low Bidder fails to circle a manufacturer/Supplier for a *listed* material or equipment, or circles more than one letter for a *listed* material or equipment, the Apparent Low Bidder hereby agrees to correct the omission or ambiguity within two (2) Business Days after submittal of this Section 00440 Schedule of Materials and Equipment. The requirement to make a definite selection and to correct any omissions or ambiguities in Schedule 1.6 applies to the Apparent Low Bidder and any other Bidder remaining or wishing to remain under consideration for the award.

1.4. The Apparent Low Bidder's attention is directed to paragraph 7.3 of Section 00100 Instruction to Bidders, which holds the Apparent Low Bidder responsible, if awarded the Contract, for certain costs and time impacts, provided the Apparent Low Bidder, in the preparation of its Bid, knew or had reason to know, that any *listed* material or equipment bid by the Bidder requires changes in the Work and failed to provide advanced written notice to that effect to the **Professional**.

1.5. The Apparent Low Bidder shall insert the provisions of this Section in all Subagreements with Subcontractors and Suppliers furnishing the materials or equipment *listed* in Schedule 1.6, altering the respective paragraphs only as appropriate to properly identify the contracting parties. Each such Subagreement shall expressly bind the respective Subcontractor or Supplier to the conditions of paragraph 1.4, the other provisions of Section 00440 Schedule of Materials And Equipment and paragraph 5.2 of Section 00700 General Conditions.

1.7 Use of "Or Equal" or Substitute Materials or Equipment After Contract Award

1.7.1. Paragraph 5.2 of Section 00700 General Conditions provides for the consideration (after the date of Contract Award) and possible acceptance by the **Professional** of "or equal" or substitute materials or equipment (unless any material or equipment named is followed by words establishing that no "or equal" or substitution is permitted). If sufficient information is submitted to allow the **Professional** to determine in a timely manner that the material or equipment proposed is equivalent or equal to that named or described in the Drawings or specified in the Specifications, then the **Professional** will consider the proposed "or equal" or substitute material or equipment.

1.7.2. The Apparent Low Bidder assumes responsibility for the cost and time required to make any proposed "or equal" or substitute material or equipment approved by the **Professional** conform to the requirements of the Contract Documents. In addition, if any such "or equal" or substitute material or equipment requires any changes in the drawings, or in any testing requirements, or in any Means and Methods indicated in or required by the Contract Documents, or in work performed by the **Owner** or others, or requires any other changes in the Work whatsoever, the Apparent Low Bidder shall assume full responsibility for the cost and the time required to carry out such changes in the Work or the work of others. Pursuant to this provision, the Apparent Low Bidder shall bear an appropriate portion of the Delay and costs resulting from the events contemplated in this paragraph.

1.7.3. Paragraph 5.2 of Section 00700 General Conditions provides for reimbursement by the **Contractor** to the **Owner** for any additional expenses incurred by the **Professional** directly attributable to the evaluation of any proposed substitute material or equipment and any proposed “or equal” material or equipment for materials and equipment *listed* in Schedule 1.6.

1.7.4. The Apparent Low Bidder shall insert the provisions of this Article 1 of Section 00440 Schedule of Materials and Equipment in all Subagreements with Subcontractors and Suppliers furnishing any materials or equipment, altering the respective paragraphs only as appropriate to properly identify the contracting parties. Each such Subagreement shall expressly bind the respective Subcontractor or Supplier to the conditions of paragraph 1.7.2, the other provisions of this Section 00440 Schedule of Materials And Equipment and paragraph 5.2 of Section 00700 General Conditions.

ARTICLE 2 BID MATERIALS AND EQUIPMENT – *OPEN* SPECIFICATIONS

2.1. For those Specifications *not listed* in Schedule 1.6, the Apparent Low Bidder, if and when awarded the Contract, shall disclose to the **Owner** and **Professional** (when submitting the Schedule of Values required by paragraph 12.1.1 of Section 00700 General Conditions) the Bidder's chosen manufacturers/Suppliers for the corresponding materials and equipment specified in the Specifications and Drawings (including all Addenda).

2.2. The Apparent Low Bidder has examined the requirements of paragraphs 7.2 and 7.3 of the Instructions to Bidders and commits to furnish materials and equipment meeting the requirements of the Specifications. If any such Bidder-selected material or equipment represents an "or equal" or a substitute material or equipment, no such material or equipment shall be used or furnished in the execution of the Work unless previously approved by the **Professional** as an acceptable "or equal" or substitute material or equipment. Application for any such acceptance will not be considered until after Contract Award. Any such application shall comply with the terms and conditions of this Article 2 and paragraph 5.2 of Section 00700 General Conditions.

2.3. The Apparent Low Bidder shall insert the provisions of this Section in all Subagreements with Subcontractors and Suppliers furnishing the materials or equipment listed in Schedule 2.4, altering the respective paragraphs only as appropriate to properly identify the contracting parties. Each such Subagreement shall expressly bind the respective Subcontractor or Supplier to the conditions of paragraph 2.2, the other provisions of this Section 00440 Schedule of Materials and Equipment and paragraph 5.2 of Section 00700 General Conditions.

END OF SECTION 00440

This is a Cover Sheet to the State's Owner and Contractor Standard Construction Contract, known as the *MICHSPEC™* Division 0 Specifications. The *MICHSPEC™* Division 0 Specifications have been developed from the FORMSPEC™ Michigan Model, 1997 Edition. Although the State's 2008 Version of the Division 0 Specifications are written as simply as practical, it is nonetheless advisable to consult with companion Guide to Specifiers when preparing specifications for a specific project. These Division 0 Specifications were developed by incorporating provisions and requirements furnished by the State into the FORMSPEC™ Michigan Model. These Division 0 Specifications have undergone detailed technical reviews by Department of Technology, Management and Budget, Facilities and Business Services Administration representatives and detailed legal reviews by the Department of the Attorney General for the State of Michigan. Specifiers are encouraged to consult with a Division 0 specifications specialist or an attorney knowledgeable in public contracts when preparing specifications for a specific project.

* To be Completed With the Bidding Documents
** To Be Completed Upon Award of the Contract **

THIS AGREEMENT TO CONTRACT is made this _____ day of _____ in the year Two-Thousand And _____ (_____) by and between **THE STATE OF MICHIGAN, "Owner," represented by the **Director, Department** of Technology, Management and Budget, duly authorized, and _____, _____ the "**Contractor**," a corporation ____, partnership ____, individual ____, or joint venture ____ (between _____ and _____), of the State of _____, whose address is _____ _____, represented by _____, its _____, duly authorized.

The **Owner** and **Contractor**, in consideration of the mutual covenants and obligations stated in this Section 00500 Agreement and the other parts of the Contract Documents, agree as follows:

ARTICLE 1 THE CONTRACT; THE PROJECT; THE WORK

1.1. THE CONTRACT – The Contract entered between the **Owner** and **Contractor** for the furnishing and performance of the Work by the **Contractor**, which consists of the Contract Documents listed or designated in paragraphs 2.2 through 2.4.

1.2. PROJECT NAME – Exterior Facade Repairs to: Stevens T. Mason Building

1.3. THE WORK – Exterior building facade, planter walls and plaza masonry wall repairs.

ARTICLE 2 CONTRACT DOCUMENTS

2.1. The Contract Documents form the contract between the **Owner** and **Contractor**, and represent the entire and final integrated agreement between the **Owner** and **Contractor** with respect to the Work. The Contract Documents are incorporated into this Agreement by this reference, and supersede all prior oral or written agreements, if any, between the **Owner** and **Contractor**. Any statement, representation, promise or inducement not set forth in the Contract Documents is null and void, and not binding on either the **Owner** or **Contractor**. The Contract Documents shall not in any way create a relationship of any kind between the **Professional** and **Contractor**, or between the **Owner** and a Subcontractor, or Supplier or any other third party. The **Professional** shall, however, be entitled to performance and enforcement of obligations under the Contract that are consistent with the **Professional's** authority and responsibilities under the Contract Documents.

2.2. The Contract Documents on the date when the **Owner** executes this Section 00500 Agreement, which are attached to this Section 00500 Agreement, consist of the following:

2.2.1. This ***Section 00500 Agreement***, fully executed by the **Owner** and **Contractor**, including the following attachments: _____ and ***Addenda*** ____ through ____.

2.2.2. ***Section 00800 Supplementary Conditions***, including _____; and ***Section 00120 Supplementary Instructions***, including ____ _____

2.2.3. ***Section 00020 Glossary***, and ***Section 00700 General Conditions***.

2.2.4. ***General Requirements***, Division 1 of the Specifications.

2.2.5. ***Divisions 2 through _____ of the Specifications***, and ***Drawings***, bearing the title: _____ _____, dated _____.

2.2.6. ***Section 00030 Advertisement; Section 00100 Instructions to Bidders***, including ***Attachment A–Bidder's Check List***, and ***Section 00210 Information for Bidders***.

2.2.7. ***Section 00610 Performance Bond*** and ***Section 00620 Payment Bond***, fully executed by the **Contractor** and the sureties, each enclosing separate evidence of Power of Attorney.

2.2.8. The **Contractor's *Section 00300 Bid Summary and Bid Form*** (with attachments) and ***Section 00320 Noncollusion Affidavit*** (including any revisions delivered after Bid opening).

2.2.9. The following **Contractor's *Qualification Submittals*** (post-Bid opening:) _____

2.3. Contract Documents that will be issued after the date the **Owner** executes this Section 00500 Agreement consist of:

2.3.1. ***Change Orders*** and ***Change Authorizations*** signed as provided in the Contract Documents.

2.3.2. ***Notice of Award*** and ***Notice to Proceed.***

2.4. There are no Contract Documents other than those listed or designated in this Article or added through Section 00520 Attachment A to the Agreement. The Contract Documents may be modified, as provided in Section 00700 General Conditions.

ARTICLE 3 CONTRACT PRICE

3.1. The **Contractor** will furnish and perform the Work and accept in full payment the Contract Price of _____ _____ Dollars ($_____). The Contract Price includes only those Alternates accepted by the **Owner**, as itemized in the Notice of Award.

3.2. The Contract will include those Change Order prices (bid on Section 00300 Bid Form) accepted by the **Owner** when the **Owner** issues the Notice to Proceed or by Change Authorization.

3.3. Payments to the **Contractor** will be made based on the prices stated on the **Contractor's** Section 00300 Bid Form, subject to the terms and conditions of the Contract Documents.

ARTICLE 4 CONTRACT TIME; LIQUIDATED DAMAGES

4.1. The periods allowed for completion of the Work, or a designated part of the Work, will be as follows:

4.1.1. The entire Work will be substantially complete in accordance with the requirements of the Contract Documents: within 180 calendar days from date of the contract or the pre-construction meeting, whichever is later.

4.1.2. If separable parts of the Work shall be completed before the period allowed for Substantial Completion of the entire Work, the Contract Times for those parts of the Work will be as specified in Section 00520 Attachment A to Agreement, and as may be supplemented in the Specifications.

4.1.3. The entire Work will be complete and ready for final payment as specified in the Contract Documents: _____ _____ _____

4.2. The **Owner** and **Contractor** recognize that the Contract Times are of the essence of the Contract and that the **Owner** will suffer costs and damages if the Work is not completed within the Contract Times, including any extensions in Contract Time authorized by Change Orders. Therefore, liquidated damages (in the amounts specified in paragraphs 4.2.3 through 4.2.5) will apply, if the Work is not completed within the limits of the Contract Times. Liquidated damages are not a penalty, are cumulative and represent a reasonable estimate of the **Owner's** extra costs and damages, which are difficult to estimate with accuracy in advance.

4.2.1. Accordingly, if the **Contractor** fails, neglects or refuses to complete all or any designated part of the Work within the specified Contract Time, the **Contractor** agrees to pay to the **Owner** liquidated damages and to allow, at the appropriate time, a corresponding adjustment in Contract Price.

4.2.2. If under the procedures of paragraph 4.3, the **Owner** is justified in withholding liquidated damages due to or in anticipation of late completion, the **Contractor** agrees to allow the **Owner** to deduct liquidated damages from Requests for Payment.

4.2.3. Liquidated damages for each Calendar Day that expires after the Contract Time specified in paragraph 4.1.1 for Substantial Completion of the entire Work – until the Work is substantially complete – shall be in the amount of One Thousand Dollars and No/Cents ($1,000.00).

4.2.4. Liquidated damages for each Calendar Day that expires after each of the Contract Times designated in Section 00520 Attachment A to the Agreement – until each such part of the Work is sufficiently complete – shall be in the amounts stated in Section 00520 Attachment A to the Agreement.

4.2.5. Liquidated damages for each Calendar Day after Substantial Completion of the entire Work that expires after the Contract Time specified in paragraph 4.1.3 for completion and readiness for final payment – until the entire Work is complete and ready for final payment – shall be in the amount of One Thousand Dollars and No/Cents ($1,000.00).

Assessment and/or Withholding of Liquidated Damages

4.3. If the **Contractor** fails to complete the Work, or a specified part of the Work, within the corresponding Contract Time, or if at any time after the Work is eighty percent (80%) in place, the **Contractor** does not prosecute the balance of the Work with the diligence required to comply with the Contract Times, the **Contractor** shall be requested to submit a schedule recovery plan acceptable to the **Owner**. The **Contractor's** schedule recovery plan shall describe the cause of schedule slippage or delayed progress and the actions proposed and taken to recover schedule. In addition, to the extent that the **Contractor** believes that an extension in Contract Time is justified, the recovery plan shall include a request for an appropriate extension in Contract Time.

4.3.1. Within fifteen (15) Calendar Days after the **Contractor** receives any such request, the **Contractor** shall meet with the **Owner** and present the **Contractor's** written schedule recovery plan. If, upon evaluation of the **Contractors'** schedule recovery plan, and after consultation with the **Professional**, the **Owner**, in its sole discretion, determines that there is sufficient cause to withhold liquidated damages, the **Owner** may deduct from

Requests for Payment the liquidated damages then due or that would become due using the **Owner's** estimate of late completion of the Work.

4.3.2. For the purposes of returning liquidated damages, schedule recovery implementation shall not be complete until such slippage or delayed progress has been corrected and the Progress Schedule once again supports compliance with the Contract Times. Once late completion has been corrected, the **Contractor** shall be entitled to reimbursement of all liquidated damage sums previously withheld. Any such reimbursement of liquidated damages previously withheld shall not constitute a waiver of any claims that the **Owner** may otherwise have.

ARTICLE 5 PAYMENTS TO CONTRACTOR

*5.1. The **Owner** will pay one hundred percent (100%) of the amount due upon completion of any Schedule of Value *pay item*. The **Professional** may require, for each Request for Payment, consent of surety, waivers of lien (from the **Contractor**, Subcontractors and Suppliers), Record Documents, guarantees, operating and maintenance manuals and such other documents required by the Contract Documents. Payment to the **Contractor** will be made within thirty (30) Calendar Days from receipt by the **Owner** of the **Professional's** certification representing to the **Owner** the amount of payment to be due to the **Contractor**.

*5.2. Processing of Requests for Payment by the **Owner** may be deferred until Work having a prior sequence, as provided in the Contract Documents, is in place and is approved.

5.3. Payments shall be subject to the terms and conditions of Section 00700 General Conditions and the other parts of the Contract Documents, and shall be made less such deductions as the **Owner** and/or **Professional** determines are appropriate, as specified in paragraph 12.4 of Section 00700 General Conditions.

5.4. If any portion of the Work is funded by a federal or State agency, the **Owner** will have fifteen (15) Calendar Days after receiving those funds in which to make payment. This provision shall take effect only after the thirty (30) Calendar Day period following certification by the **Professional** has expired.

ARTICLE 6 THE PROFESSIONAL SERVICES CONTRACTOR

6.1. The **Owner** has retained _____

_____

to assume all duties and responsibilities of, and have the rights and authority assigned to, the **Professional Services Contractor** in the Contract Documents with respect to completion of the Work in accordance with the Contract Documents.

ARTICLE 7 CONTRACTOR'S REPRESENTATIONS

7.1. The **Contractor** reiterates and makes each of the representations itemized in Article 2 of the **Contractor's** Section 00300 Bid Form. Article 2 in the **Contractor's** Section 00300 Bid Form is by this reference repeated verbatim in this Section 00500 Agreement as paragraphs 7.2 through 7.13 just as though those paragraphs had been written in this Article 7, except that the term "**Contractor**" shall replace the term "Bidder" in every instance.

ARTICLE 8 MISCELLANEOUS

8.1. If any provision of the Contract Documents is invalid, illegal or unenforceable, all other provisions of the Contract Documents shall remain in full force and effect. If any provision of the Contract Documents is inapplicable to any Person or circumstance, that provision shall remain applicable to all other Persons and circumstances.

8.2. It is the intent of the **Owner** and **Contractor** that all provisions of Law required to be inserted or referenced in the Contract Documents are in fact so inserted or referenced. If any provision of Law is not so inserted or referenced, or is inserted or referenced improperly, then each such provision shall be considered inserted or referenced in the Contract Documents in proper form at no increase in Contract Price and/or Contract Time.

8.3. The duties, obligations, criteria or procedure imposed by, and the rights and remedies made available in, the Contract Documents are in addition to, and not in any way a limitation of, any rights and remedies that are otherwise allowed or imposed by Law, except that in the event a specific part or detailed requirement of a provision, criterion or procedure in the Contract Documents and a specific part or detailed requirement of a provision, criterion or procedure imposed by Law conflict, the specific part or detailed requirement of such provision, criterion or procedure imposed by Law shall govern. All other specific parts or detailed requirements in the provisions, criteria or procedures imposed by Law and the Contract Documents shall remain in full force and effect and be read with the controlling specific part or detailed requirement. These provisions will be as effective as if repeated specifically in the Contract Documents in connection with each duty, obligation, right and remedy to which they apply.

8.4. The **Contractor** shall not sell, assign, transfer or otherwise convey any of the **Contractor's** rights and shall not delegate any of the **Contractor's** duties under this Agreement without the prior written consent of the **Owner** and the sureties for the **Contractor**. In its sole discretion, the **Owner** may refuse to consent to any proposed assignment or delegation. Any attempted sale, assignment, transfer or other conveyance in violation of this paragraph shall be void and shall relieve the **Owner** of any further liability under the Contract Documents but shall not relieve the **Contractor's** sureties of any liability. If the **Owner** consents in writing to an assignment, unless specifically stated to the contrary in the consent, that assignment shall not release or discharge the **Contractor** from any duty or responsibility set forth in the Contract Documents, and shall not release or discharge the **Contractor's** sureties under the Bonds required by the Contract Documents.

8.5. The **Owner** reserves the right to correct any error in any Request for Payment that may have been paid. The **Owner** reserves the right, should proof of Defective Work be discovered after final payment, to claim and recover from the **Contractor** and/or the **Contractor's** surety(ies), sufficient sums to correct or remove and replace the Defective Work.

8.6. Any waiver by the **Owner** of any provision of the Contract Documents shall be specific and in writing and apply only to the specific matter and not to other similar or dissimilar matters. Any waiver of any breach of this Contract shall not be held to be a waiver of any other or subsequent breach.

8.7. Nothing contained in this Agreement shall in any manner authorize, empower or constitute the **Contractor**, Subcontractors or Suppliers (a) to act as agents of the **Owner,** (b) to assume or create any obligation or responsibility whatsoever, express or implied, on behalf of or in the name of the **Owner**; (c) to bind the **Owner** in any manner, or (d) to make any representation, warranty, covenant, agreement or commitment on behalf of the **Owner**. It is the intent and understanding of the parties that the **Contractor** shall perform the Work as an independent contractor. This Agreement does not create, and shall not be construed as creating, any rights enforceable by any third party.

8.8. If the **Owner** or **Contractor** suffers injury or damage to person or property because of error, omission or act of the other, any of the other's employees or agents or others for whose acts the other party is legally liable, claim will be made in writing to the other party within a reasonable time of the first observation of that injury or damage. This provision is not and shall not be construed as a substitute for or a waiver of the provisions of any applicable statute of limitations or time requirements set forth in Section 00700 General Conditions.

8.9. All computer programs which are not the subject of copyrights by third parties and which are delivered, developed, produced or paid for under a specific requirement of the Contract Documents and all plans, drawings, designs, specifications, technical reports, operating manuals and other data which are delivered, developed, produced or paid for under the Contract Documents shall be the property of the **Owner**. The **Owner** maintains all rights to such programs and deliverables, including the right to use, duplicate, and disclose the programs and deliverables, in whole or in part, in any manner and for any purpose. If any program or deliverable is copyrightable, the **Contractor** may copyright it subject to the **Owner's** rights. The **Owner** reserves a royalty-free, nonexclusive and irrevocable license to use, duplicate, publish and disclose such programs and deliverables, in whole or in part, and to authorize others to do so.

8.10. The **Contractor** warrants that all costs in proposals and claims for adjustments in Contract Price shall not exceed those allowed under the Contract Documents, and that proposals and claims for adjustments in Contract Price shall grant prices, terms and warranties comparable to or better than prices, terms and warranties offered to others for similar work.

8.11. This Agreement shall be binding on the **Contractor, Owner** and their respective successors and legal representatives and, if the **Owner** has consented to an assignment or other conveyance, on all their respective assigns and delegates.

*8.12. The Contract Documents shall be governed by and construed in accordance with the Laws of the State of Michigan in effect on the date of Bid opening. Any change in Michigan Law after that date shall be binding only to the extent the **Owner** and **Contractor** agree or to the extent such change is beyond the capacity of the parties to avoid.

ARTICLE 9 NOTICE AND SERVICE

9.1. Unless otherwise provided in the Contract Documents or consented to by the **Owner** in writing, any notice, demand or communication shall be in writing and shall be deemed to have been given when received by the individual required to be given notice at the address designated in this Agreement. A copy of any notice, demand or notification shall be sent to the address below.

9.2. Any written notice or other written communication to the sureties shall be sufficiently given if delivered to the individual required to be given notice at the address designated in the Bond.

IN WITNESS WHEREOF, the **Owner** and **Contractor** have signed this Section 00500 Agreement in triplicate and initialed three (3) full sets of the Contract Documents. One (1) full set of the executed Contract Documents will be delivered to the **Contractor**.

END OF SECTION 00500

SECTION 00610 PERFORMANCE BOND

AGENCY No. 071 INDEX No. 44103 FILE No. 071/111193.CAK SURETY COMPANY REFERENCE No. _____

KNOW ALL PERSONS BY THESE PRESENTS: That "the **Contractor**," _____, a corporation ___, individual ___, partnership ___, joint venture ___ of the State of _____, qualified to do business in the State of Michigan, as Principal, and "the Surety," _____, of the State of _____, as surety, are hereby held and firmly bound unto the State of Michigan, "the **Owner**," as Obligee, in the amount of _____ Dollars ($_____), for the payment of which the **Contractor** and Surety hereby bind themselves, their respective heirs, successors, legal representatives and assigns, jointly and severally, firmly by these presents in compliance with 1963 PA 213, as amended, MCL 129.201 et seq.

WHEREAS, the **Contractor** has entered into "the Contract" with the **Owner** for _____ _____, "the Work," covered by the Contract Documents, which are incorporated into this Performance Bond by this reference;

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS THAT, if the **Contractor** faithfully performs and fulfills all the undertakings, covenants, terms, conditions, warranties, indemnifications and agreements of the Contract Documents within the Contract Time (including any authorized changes, with or without notice to the Surety) and during the Correction Period, and if the **Contractor** also performs and fulfills all the undertakings, covenants, terms, conditions, warranties, indemnifications and agreements of any and all duly authorized modifications of the Contract Documents, then THIS OBLIGATION SHALL BE NULL AND VOID, OTHERWISE TO REMAIN IN FULL FORCE AND EFFECT.

A. No change in Contract Price or Contract Time, "or equal" or substitution or modification of the Contract Documents (including addition, deletion or other revision) shall release the Surety of its obligations under this Section 00610 Performance Bond. The Surety hereby expressly waives notice of any such change in Contract Price or Contract Time, "or equal" or substitution or modification of the Contract Documents (including addition, deletion or other revision).

B. This Section 00610 Performance Bond shall be solely for the protection of the **Owner** and its successors, legal representatives or assigns. The prevailing party in a suit on this Bond is entitled to recover as part of that party's judgment reasonable attorneys' fees.

C. It is the intention of the **Contractor** and Surety that they shall be bound by all terms and conditions of the Contract Documents (including, but not limited to Article 14 of Section 00700 General Conditions and this Section 00610 Performance Bond). However, this Section 00610 Performance Bond is executed pursuant to 1963 PA 213, as amended, MCL 129.201 et seq., and if any provision(s) of this Section 00610 Performance Bond is/are illegal, invalid or unenforceable, all other provisions of this Section 00610 Performance Bond shall nevertheless remain in full force and effect, and the **Owner** shall be protected to the full extent provided by 1963 PA 213, as amended, MCL 129.201 et seq.

IMPORTANT: The Surety shall be authorized to do business in the State of Michigan by the Department of Consumer and Industry Services – Insurance Bureau, shall be listed on the current U.S. Department of the Treasury Circular 570, and, unless otherwise authorized by the **Owner** in writing, shall have at least an A– Best's rating and a Class VII or better financial size category per current A. M. Best Company ratings.

END OF SECTION 00610

SECTION 00620 PAYMENT BOND

AGENCY No. 071 INDEX No. 44103 FILE No. 071/111193.CAK SURETY COMPANY REFERENCE No._____

KNOW ALL PERSONS BY THESE PRESENTS: That "the **Contractor**," _____, a corporation ___, individual ___, partnership ___, joint venture ___ of the State of _____, qualified to do business in the State of Michigan, as Principal, and "the Surety," _____, of the State of _____, as surety, are hereby held and firmly bound unto the State of Michigan, "the **Owner**," as Obligee, in the amount of _____ Dollars ($_____), for the payment of which the **Contractor** and Surety hereby bind themselves, their respective heirs, successors, legal representatives and assigns, jointly and severally, firmly by these presents in compliance with 1963 PA 213, as amended, MCL 129.201 et seq.

WHEREAS, the **Contractor** has entered into "the Contract" with the **Owner** for _____ _____, "the Work," covered by the Contract Documents, which are incorporated into this Payment Bond by this reference;

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION IS THAT, if the **Contractor** promptly pays all claimants supplying labor or materials to the **Contractor** or to the **Contractor's** Subcontractors in the prosecution of the Work, then THIS OBLIGATION SHALL BE NULL AND VOID, OTHERWISE TO REMAIN IN FULL FORCE AND EFFECT.

A. All rights and remedies on this Section 00620 Payment Bond shall be solely for the protection of all claimants supplying labor and materials to the **Contractor** or the **Contractor's** Subcontractors in the prosecution of the Work, and shall be determined in accordance with Michigan Law.

B. No change in Contract Price or Contract Time, "or equal" or substitution or modification of the Contract Documents (including addition, deletion or other revision) shall release the Surety of its obligations under this Section 00620 Payment Bond. The Surety hereby expressly waives notice of any such change in Contract Price or Contract Time, "or equal" or substitution or modification of the Contract Documents (including addition, deletion or other revision).

C. It is the intention of the **Contractor** and Surety that they shall be bound by all terms and conditions of the Contract Documents (including, but not limited to this Section 00620 Payment Bond). However, this Section 00620 Payment Bond is executed pursuant to 1963 PA 213, as amended, MCL 129.201 et seq., and if any provision(s) of this Section 00620 Payment Bond is/are illegal, invalid or unenforceable, all other provisions of this Section 00620 Payment Bond shall nevertheless remain in full force and effect, and the **Owner** shall be protected to the full extent provided by 1963 PA 213, as amended, MCL 129.201 et seq.

IMPORTANT: The Surety shall be authorized to do business in the State of Michigan by the Department of Consumer and Industry Services – Insurance Bureau, shall be listed on the current U.S. Department of the Treasury Circular 570, and, unless otherwise authorized by the **Owner** in writing, shall have at least an A– Best's rating and a Class VII or better financial size category per current A. ARTICLE 1 INTERPRETATIONS

1.1 Section 00020 Glossary:

1.1.1. Section 00020 Glossary assigns specific intent and meanings to capitalized terms and to other defined terms used in this Section 00700 General Conditions, Section 00500 Agreement, Section 00520 Attachment A to the Agreement, Section 00610 Performance Bond, Section 00620 Payment Bond and Section 00800 Supplementary Conditions.

1.1.2. Section 00020 Glossary also provides specific rules for construing any reference to any Article or paragraph that is made in this Section 00700 General Conditions.

1.2 Intent of the Contract Documents:

1.2.1. The intent of the Contract Documents is to describe the *entire* Work, including its various parts, to the extent necessary for the **Contractor** to discharge its obligation to execute and complete the Work in accordance with the Contract Documents. The Contract Documents are complementary; what is required by one shall be as binding as if required by all Contract Documents.

1.2.2. The *entire* Work required by the Contract Documents includes Work, which is reasonably inferable from the Contract Documents or from prevailing custom and trade usage. The **Contractor** shall provide any Work reasonably inferable to the extent such Work is required to properly complete the installation of other Work expressly shown or specified in the Contract Documents. If the **Contractor** disagrees that Work that is not expressly shown or detailed in the Contract Documents is Work reasonably inferable, the **Contractor** shall proceed in accordance with the provisions of paragraph 10.1.3.

1.2.3. The breakdown of the Work by Divisions and Sections, or the identification of any Drawing, shall not delineate or be construed to delineate Work to be performed by any trade. The breakdown shall not control the manner in which the Work may be divided by the **Contractor** among Subcontractors and Suppliers.

*1.2.4. Reference to the State Construction Code Act of 1972, 1972 PA 230, as amended, MCL 125.1501 et seq., or to standard specifications, manuals or codes of any technical society, organization or association, whether specifically or by implication, means the issue in effect on the date of Bid opening, unless otherwise expressly stated. Work indicated in or required by the Contract Documents that is above standards set in the State Construction Code shall be provided to the higher standard.

1.2.5. The provisions of the Contract Documents shall govern over any standard specification, manual or code of any technical society, organization or association. Unless otherwise provided in the Contract Documents, words with an accepted technical or trade meaning used to describe any Work shall be interpreted in accordance with that meaning.

1.2.6. If any Work indicated in, or required by, the Contract Documents is above the standards set by any Law applicable to the Work and the Project, the higher standard shall govern.

1.2.7. The terms "the Contract Documents," "as specified in the Contract Documents," "in accordance with the Contract Documents" or such other similar terms shall be construed as including all valid Change Orders and Change Authorizations.

1.2.8. "Execution of the Work" and "shall provide" includes the furnishing and/or performance of the Work. "*Work*" as in "Unit Price Work," or "any Work" or "acceptable Work," etc. refers to a specific part(s) of the Work.

1.2.9. Subject to the **Contractor's** continuing responsibilities for the acts of Subcontractors and Suppliers, whenever in the Contract Documents the term "the **Contractor**" is used concerning any action, obligation, cost or event, it shall cover, even if not expressly stated, actions or obligations or costs of, or events involving, any Subcontractor, Supplier or anyone for whom any of them may be liable, unless the context requires otherwise.

1.2.10. Use of the terms "as ordered," "as directed," "as required," "as allowed," "as approved" or similar terms, or the adjectives "reasonable," "suitable," "acceptable," "proper" or "satisfactory" or similar adjectives, to describe a requirement, direction, review or judgment of the **Professional** or **Owner** as to the Work will be solely to evaluate the Work for compliance with the Contract Documents. No use of any such term or adjective, or provision of any standard specification, manual or code (whether expressly incorporated by reference in the Contract Documents or not), or Suppliers' instructions, shall be effective to (a) change the duties and responsibilities of the **Owner** or **Professional** from those assigned in the Contract Documents, (b) assign to the **Owner** or **Professional** any duty or authority to supervise or direct the furnishing or performance of the Work or assume responsibility contrary to the provisions of the Contract Documents.

1.2.11. A provision stating "the **Contractor** shall bear its proportionate share of the Delay and costs" shall be construed as entitling the **Owner** to an appropriate decrease in Contract Price and Contract Time for all the **Owner's** direct, indirect and consequential costs and damages that are attributable to the **Contractor**.

1.2.12. Contract Time computations shall be made in Calendar Days. If the Progress Schedule is in the form of a Critical Path Method schedule, Total Float and Contract Float values stated in Business Days shall be converted to Calendar Days when used for the purpose of calculating changes in Contract Time.

1.2.13. Any computation of a Contract Time which adds Calendar Days to a date shall include both the first and last Day. Any computation of a notice period shall exclude the first Day and include the last Day. In any case, if the computed Day falls on a non-Business Day, it shall be omitted from the computation.

1.2.14. In the Contract Documents, the terms "substantially completed" and "substantially complete" have in context the same meaning as Substantial Completion.

1.3 Priority of the Contract Documents:

1.3.1. Whenever an issue of priority involves two Sections within the Contract Documents, the following will apply: Unless the **Owner** and **Contractor** mutually agree otherwise, a Section of the Contract Documents will *supersede* another *conflicting* Section, if the *superseding* Section is listed in paragraph 2.2 of Section 00500 Agreement ahead of the *conflicting* Section.

1.3.2. Whenever an issue of priority involves Work called for in the technical Specifications or Drawings – figured dimensions shall govern scaled dimensions, detail Drawings shall govern general Drawings and Drawings shall govern Submittals. Whenever specifications, dimensions, notes, schedules or details conflict (whether within the Specifications or Drawings, or between the Specifications and Drawings, or between Change Order Drawings and the Drawings), the **Contractor** shall be required to provide the higher performance requirement only to the extent such outcome results in Work reasonably inferable.

1.4 Interpretation of Indemnification Provisions:

1.4.1. Paragraphs 1.4.2 and 1.4.3 will be as effective as if repeated in paragraphs 4.5.2, 4.6.1, 4.9.1, 10.4.4, 13.3.1 and in any other paragraph requiring the **Contractor** to defend, indemnify and hold harmless the **Owner** and **Professional**.

1.4.2. Any indemnification provision requiring the **Contractor** to defend, indemnify and hold harmless the **Owner** and **Professional** against all claims, or covering liability of the **Owner** or **Professional**, shall include claims caused in part by the negligence or other liability-creating conduct or omission of the **Contractor**.

1.4.3. The terms "against all claims" in any such obligation shall be construed as covering all claims, of whatever type and nature, and all judgments, costs, losses and damages, whether direct, indirect or consequential (including, but not limited to, charges of architects, engineers, attorneys and others and all court, hearing and any other dispute resolution costs).

1.5 Additional Interpretations:

1.5.1. The term "the **Professional**" shall be construed as covering, even if not expressly stated, the **Professional's** consultants, agents and employees. This interpretation shall not be construed as relieving the **Professional** of its sole responsibility for the performance of the **Professional's** obligations and responsibilities, whether performed by the **Professional** directly or through any consultant, agent, or employee.

1.5.2. The expression "any act or omission within the control of" shall include, but is not limited to, the fault or negligence of the party involved and any other act, cause and event for which that party is responsible. The expression "any cause beyond the control of" shall include any act or omission not within the reasonable control of the party involved and any other act, cause and event for which that party is not responsible.

1.5.3. Whenever in the Contract Documents, the term "first tier" is used concerning a Subcontractor or Supplier, it means a Subcontractor or Supplier having a direct Subagreement with the **Contractor**. Relatedly, the term "lower tier" refers to a Subcontractor or Supplier having a direct Subagreement with another Subcontractor.

1.5.4. The expression "materials and/or equipment" shall not be construed to equate materials with equipment, but rather shall be interpreted as a general reference to materials or equipment,

whichever actually applies. The term "stored materials" shall include materials and equipment. Where a differentiation between materials or equipment is necessary, such as for payments for approved equipment Shop Drawings, use of the term "equipment" shall exclude materials. In any such case, examples of equipment shall be conveying equipment, tanks, pumps, vessels, fans, boilers, air handling units, heat exchangers, compressors, incineration equipment, motor control centers, switchgears, transformers, control panels and so forth; and such components as pipe fittings and specialties, valves, ductwork, plumbing fixtures, cable tray, conduit and cable, electrical fixtures, panel boards and so forth shall be materials and not equipment.

1.5.5. The term "registered mail" includes registered U.S. mail and certified U.S. mail with return receipt requested. The term "hand delivered" includes delivery by private carriers.

1.5.6. The term "self-performed Work" means Work performed by the **Contractor**, as opposed to Work performed by a Subcontractor, which is referred to as "Subcontractor Work."

1.5.7. An "early completion" Progress Schedule is a **Contractor**-prepared Revision Progress Schedule Submittal that anticipates completion of the entire Work, or of any portion of the Work having a separate, specified Contract Time, ahead of the correspondingly specified Contract Time.

1.6 Ownership and Use of the Contract Documents:

1.6.1. Neither the **Contractor** nor any Subcontractor or Supplier shall have or acquire title to or ownership rights in any of the Drawings, Specifications or documents identified in Section 00210 Information for Bidders, and they shall not reuse any of them on extensions of the Project or any other project without prior written consent of the **Owner** and **Professional**.

1.6.2. The **Contractor**, Subcontractors and Suppliers are granted a limited license to use and reproduce parts of the Contract Documents and those documents identified in Section 00210 Information for Bidders as appropriate for their use in the furnishing and performance of their Work. All copies of the Drawings and Project Manual and other documents made under this license shall retain all copyright and trademark notices, if any.

1.7 Copies of the Contract Documents:

1.7.1. The **Owner** will furnish, at no cost to the **Contractor**, ten (10) copies of the Drawings and Project Manual. Additional copies will be furnished, upon request, at the cost of reproduction.

ARTICLE 2 THE OWNER – GENERAL PROVISIONS

2.1 Availability of Lands, Areas, Properties and Facilities:

2.1.1. The Contract Documents indicate the lands, areas, properties and facilities upon which the Work is to be performed and those rights-of-way and easements for access to the site furnished by the **Owner**. Easements for permanent structures or for permanent changes in any existing lands, areas, properties and facilities will be obtained by the **Owner**, unless otherwise expressly stated elsewhere in the Contract Documents.

2.1.2. The **Contractor** shall obtain, at no increase in Contract Price or Contract Time, any other lands, areas, properties, facilities, rights-of-way and easements the **Contractor** requires for temporary facilities, storage, disposal of spoil or waste material or any other such purpose. If public property, the **Contractor** shall obtain all required permits from the federal agency, State agency, Political Subdivision or Public Utility with jurisdiction. If private property, the **Contractor** shall obtain prior permission by written agreement. The **Contractor** shall submit copies of the permits and written agreements to the **Owner**.

2.2 Reference Points; Base Lines and Benchmarks:

2.2.1. The **Owner** will provide engineering surveys to establish reference points for construction that the **Professional** considers necessary for the **Contractor** to proceed with the Work. The **Contractor** shall be responsible for surveying and laying out the Work from those reference points. The **Contractor** shall be responsible for protecting and preserving those reference points as well as any base lines and benchmarks provided for the Work.

2.2.2. The **Contractor** shall make no changes on any reference points, base lines and benchmarks without the **Professional's** prior written approval. The **Contractor** shall report to the **Professional** whenever any reference point, base line or benchmark is lost, destroyed or requires relocation. The **Contractor** shall replace and relocate any lost or destroyed reference points accurately, with professionally, licensed personnel, if so directed by the **Professional**.

2.2.3. The **Contractor** shall bear its proportionate share of the Delay and costs resulting from any loss, destruction, replacement and/or relocation of reference points, base lines and/or benchmarks, to the extent any such loss, destruction, replacement and/or relocation results in whole or in part from any act or omission within the control of the **Contractor**.

2.3 Stop Work Order:

2.3.1. The **Owner** may order the **Contractor** in writing to stop the Work, in the whole or in part, in the event any of these situations occur: (a) any Work is Defective, (b) any Work, when completed, will not conform to the Contract Documents, (c) any materials or equipment are unsuitable, or (d) any workers are insufficiently skilled. The **Contractor** shall bear its proportionate share of the Delay and costs resulting from any such stop Work order, unless the **Contractor** is/was not at fault.

2.3.2. If the **Contractor** is/was not at fault, the **Owner** will amend the Contract Documents to provide for any adjustments in Contract Price and/or Contract Time made necessary by any resulting Delay which is unreasonable under the circumstances. This authority to stop the Work or any Work shall not create or impose any duty or responsibility on the **Owner** to exercise such authority for the benefit of the **Contractor** or of any Subcontractor, Supplier, surety to any of them or any other third party.

2.4 Limitations on the Owner's Responsibilities:

2.4.1. The **Owner** is not responsible for the **Contractor's** Means and Methods, safety precautions and programs related to

safety, or the **Contractor's** failure to execute the Work in accordance with the Contract Documents. Nor is the **Owner** responsible for any act or omission of the **Contractor** or of any Subcontractor, any Supplier or anyone for whose acts the **Contractor** or any Subcontractor or Supplier may be liable.

2.4.2. The **Owner** is not responsible for verifying whether the **Contractor's** Progress Schedule Submittals, any certificates and/or policies of insurance or any technical Submittals are in accordance with the Contract Documents, or for verifying their accuracy or completeness in any way.

2.4.3. Neither the **Owner's** authority to review any of those Submittals, nor the **Owner's** decision to raise or not raise any objections about any such Submittals, shall create or impose any duty or responsibility on the **Owner** to exercise any such authority or decision for the benefit of the **Contractor**, any Subcontractor or Supplier, any surety to any of them or any other third party.

2.5 Additional General Provisions:

2.5.1. Written communications from the **Owner** to the **Contractor** will generally be issued through the **Professional**. If there is need to issue communications directly, a copy will be sent concurrently to the **Professional**. Written communications from the **Contractor** to the **Owner** may be issued directly to the **Owner** or through the **Professional**, if such is more appropriate. Any such communication shall attach two (2) copies for the other party.

2.5.2. The **Facilities and Business Services Administration** Representative shall be the representative for the **Owner.** The **Facilities and Business Services Administration** Representative may be represented on-site by a Field Represenative(s). Neither the **Facilities and Business Services Administration** Representative nor the Field Representative shall have authority to interpret the requirements of the Contract Documents. Unless delegated by specific written notice from the **Owner**, the Field Representative does not have any authority to order any changes in the Work or authorize any adjustments in Contract Price or Contract Time.

2.6 Partnering Charter:

2.6.1. If the Contract Documents indicate the **Owner's** intent to implement a bilateral partnering charter, unless the **Contractor** declines in writing, the **Contractor** shall cooperate with the **Owner** in implementing such a partnering charter for the Contract. Unless the possibility is expressly allowed for in the Contract Documents, no provision, requirement or other aspect of the Contract Documents shall be open for change, revision or modification in any such partnering charter.

ARTICLE 3 THE PROFESSIONAL – GENERAL PROVISIONS

3.1 Owner's Representative:

3.1.1. The **Professional** shall be the **Owner's** representative during the Contract Time period. The **Professional's** duties, responsibilities and limits of authority set forth in the Contract Documents shall not be changed without the prior written consent of both the **Owner** and **Professional.**

3.1.2. The **Professional** will make On-Site Inspections at intervals appropriate to the stages of the Work to observe the quality and quantity of progress and completed Work; to determine actual quantities of Unit Price Work completed by the **Contractor** and to determine whether the Work is being executed so that the Work, when completed, will be in accordance with the Contract Documents. Based on the On-site Inspections, the **Professional** will endeavor to guard the **Owner** from Defective Work and to keep the **Owner** informed of the progress of the Work.

3.1.3. If the **Professional** assigns Resident Project Representatives, their duties, responsibilities and limits of authority will be given in the Contract Documents or at the pre-construction conference. Unless delegated by specific written notice from the **Owner**, the Resident Project Representative does not have any authority to order any changes in the Work or authorize any adjustments in Contract Price or Contract Time.

3.1.4. The **Professional** will have authority to disapprove or reject Work that the **Professional** believes to be Defective, and to require inspection or testing of any Work, whether or not such Work is fabricated, installed or completed. The **Contractor** shall take prompt corrective action upon receiving any Defective Work notice from the **Professional**.

3.1.5. On-Site Inspections by the **Professional** and/or Resident Project Representatives shall not create or impose any duty on the **Professional** or Resident Project Representatives to make the On-Site Inspections for the benefit of the **Contractor** or any other third party. On-Site Inspections will not relieve the **Contractor** from its obligation to provide the Work in accordance with the Contract Documents or represent acceptance of Defective Work.

3.1.6. Inspections by the Field Representative(s) shall not create or impose any duty on such Field Representative to make the observations for the benefit of the **Contractor** or any other third party. Any such inspection will not relieve the **Contractor** from its obligation to provide the Work in accordance with the Contract Documents or represent acceptance of Defective Work.

3.2 Clarifications and Interpretations:

3.2.1. The **Professional** will issue with reasonable promptness written clarifications or interpretations as the **Professional** may determine necessary or in response to a **Contractor** written request for interpretation. If the **Contractor** believes that a written clarification or interpretation issued by the **Professional** justifies an adjustment in Contract Price or Contract Time, the **Contractor** shall promptly notify the **Professional** in writing before proceeding with the Work Involved.

3.2.2. In any such case, if the **Contractor** is properly authorized in writing to proceed with the Work Involved before full agreement is reached on the extent of any such adjustments (if any are determined to be due at all), the **Contractor** shall furnish to the **Professional**, upon request from the **Professional**, those actual cost Records specified in paragraphs 11.4 and 11.5.

3.3 Minor Variations and No-Cost Changes; Minor Delays:

3.3.1. The **Professional** may authorize minor variations in the Work, order no-cost changes consistent with the Contract

Documents or cause minor Delay if, in the **Professional's** judgment, such variation, no-cost change or Delay does not justify any adjustment in Contract Price or Contract Time. Minor variations will be ordered in writing; no-cost changes will be authorized by Change Authorization. If the **Contractor** believes any minor variation or no-cost change justifies an increase in Contract Price or Contract Time, the **Contractor** shall promptly notify the **Professional** in writing before proceeding with the Work Involved and follow the procedures in paragraph 3.2. Notice requirements for minor Delays are provided in paragraph 8.7.4.

3.4 Determinations by the Professional:

3.4.1. The **Professional** will be the interpreter of the requirements of the Contract Documents and, in such capacity, will render determinations on the acceptability of the Work. Notices, proposals, claims or other matters relating to the acceptability of the Work, the interpretation of the requirements of the Contract Documents or any adjustment in Contract Price or Contract Time shall be referred to the **Professional** in writing requesting a formal, written determination, which the **Professional** will render within a reasonable time. If the **Contractor** disagrees with any such **Professional** determination, the **Contractor** may deliver notice of a claim and a claim submittal within thirty (30) Calendar Days in accordance with the procedures and within the deadlines set forth in Article 15 Disputes.

3.4.2. The rendering of any interpretation or of any determination on any notice, proposal, claim or other matter relating to the acceptability of the Work or to any adjustment in Contract Price or Contract Time will be a prerequisite to the exercise by the **Contractor** of any rights or remedies the **Contractor** may otherwise have under the Contract Documents or by Law concerning any such issue.

3.5 Limitations on the Professional's Responsibilities:

3.5.1. The **Professional's** authority to act under this Article 3 or elsewhere in the Contract Documents, or any decision made by the **Professional** in good faith to exercise or not to exercise such authority, shall not give rise to any duty or responsibility of the **Professional** to the **Contractor**, to any Subcontractor or any Supplier, to any surety or to any third party.

3.5.2. The **Professional** is not responsible for the **Contractor's** Means and Methods, safety precautions and programs related to safety, or for the **Contractor's** failure to execute the Work in accordance with the Contract Documents. Furthermore, the **Professional** is not responsible for any act or omission of the **Contractor** or of any Subcontractor, Supplier or anyone for whose acts the **Contractor** or any Subcontractor or Supplier may be liable.

ARTICLE 4 CONTROL OF WORK – GENERAL PROVISIONS

4.1 Review of the Contract Documents:

4.1.1. Before undertaking each part of the Work, the **Contractor** shall study and compare the Contract Documents with each other and against manufacturers' recommendations for installation and handling. Before undertaking each part of the Work, the **Contractor** shall verify dimensions and take field measurements, and the **Contractor** shall coordinate the location, dimensions, access, fit, completeness, etc. of dependent Work. The **Contractor** shall promptly notify the **Professional** in writing of any conflict, error or omission in the Contract Documents and deviation from manufacturers' recommendations for installation and handling discovered.

4.1.2. The **Contractor** shall bear its proportionate share of the Delay and costs resulting from any Work undertaken before apprising the **Professional** and/or obtaining a written clarification or interpretation from the **Professional,** if the **Contractor** knows or has reason to know that any such Work (a) involves a conflict, error or omission, or (b) is subject to a specified Means and Method which is inappropriate, unworkable or unsafe, or (c) is subject to a specified method of installation, performance or test procedure and/or result which is contrary to the recommendations provided by or for the respective manufacturer.

4.2 Management, Supervision and Personnel:

4.2.1. The **Contractor** shall manage, supervise and direct the Work competently, applying the management, supervision, skills, expertise, scheduling, coordination and attention necessary to provide the Work in accordance with the Contract Documents, while insuring timely and unhindered access to the site. The **Contractor** shall be responsible for any Means and Methods, unless a specific Means and Method is indicated in or required by the Contract Documents. The **Contractor** shall verify that completed Work complies with the Contract Documents, all approved Submittals and all clarifications and interpretations.

4.2.2. The **Contractor** shall maintain a competent, full-time superintendent on the Work at all times during its progress. The superintendent shall be the **Contractor's** representative at the site and shall have authority to act on behalf of the **Contractor**. The Superintendent shall not be assigned or replaced without the **Owner's** consent. If the **Owner**, in the reasonable exercise of its discretion, objects to the superintendent, the **Contractor** shall use a replacement superintendent at no increase in Contract Price or Contract Time. All communications given to the superintendent shall be as binding as if given to the **Contractor**.

4.2.3. The **Contractor** shall provide competent, suitably qualified personnel to survey and lay out the Work. As part of this responsibility, the **Contractor** shall engage a registered land surveyor to accurately locate base lines and Project elevations. The **Contractor** shall be required to furnish certifications that lines and grades for all concrete slabs were checked before and after placing of concrete, and that final grades are as required by the Contract Documents.

4.2.4. The **Contractor** shall provide competent and suitably qualified trade foremen and craft workers to construct the Work, in all cases as required by the Contract Documents. At all times, the **Contractor** shall maintain good discipline and order at the site.

4.2.5. Whenever activities of the **Contractor** are carried out beyond the limits of the site or the indications of temporary fences or barricades, the **Contractor** shall schedule trenching, utility Work, site development, landscaping and all other activities in the way that will cause minimum disturbance to or interference with

adjoining property, service to the public or the normal operation of the **Owner** or others affected by such activities.

4.2.6. If a Means and Method is indicated in, or required by, the Contract Documents, a substitute Means and Method may be used by the **Contractor** only after obtaining the **Professional's** approval that it meets the applicable criteria in paragraph 5.2 without increasing Contract Price or Contract Time. If any such substitution causes earlier completion of the Work, the **Owner** and **Contractor** may negotiate an appropriate shortening in Contract Time, a level of liquidated damages appropriate to the shortened Contract Time, and a decrease in the Contract Price. If the **Owner** and **Contractor** are unable to agree on the extent of any such adjustments, the **Owner** may deliver a claim in accordance with the procedures and within the deadlines set forth in Article 15.

4.2.7. The **Contractor** shall post appropriate construction signs to advice the occupants and visitors of occupied facilities of the limits of construction work areas, hardhat areas, excavations, construction parking and staging areas, etc.

4.3 Materials and Equipment:

4.3.1. Unless otherwise specified in the Contract Documents, the **Contractor** shall furnish and be responsible for all materials, equipment, transportation, construction equipment, tools, supplies, fuel, utilities, water for flushing and testing, temporary facilities and all other facilities and incidentals necessary for the furnishing and performance, which includes, without limitation, the testing and completion of the Work.

4.3.2. All materials and equipment shall be of good quality, free of defect and new, unless otherwise allowed in the Contract Documents. For each material and equipment, the **Contractor** shall provide complete information on preventive maintenance, operating requirements, parts lists, ordering of parts and other applicable conditions. Materials and equipment shall be protected against any damage at all times so that they remain new.

4.3.3. If required for the **Professional's** acceptance of any materials or equipment, the **Contractor** shall furnish satisfactory evidence (which shall include test procedures and reports of required tests) as to the kind and quality of the materials and equipment. Materials and equipment shall be applied, installed, connected, erected, used, cleaned and conditioned following the manufacturer's and Suppliers' instructions, except as otherwise provided in the Contract Documents.

4.3.4. Paragraph 7.3, Section 00100 Instructions to Bidders, dealing with materials and equipment *listed* in Schedule 1.6 of Section 00440 Schedule of Materials and Equipment is made part of this Section 00700 General Conditions by this reference.

4.4 Concerning Control of Work:

4.4.1. The **Contractor** shall prosecute the Work in the way that will cause the least practicable interference with and avoid prolonged interruption of, or damage to, existing facilities. The **Contractor** shall obtain written approval from the **Owner** ten (10) Calendar Days before connecting to existing facilities or interrupting service. If the **Contractor's** Means and Methods require tapping into an existing system(s), the **Contractor** shall be responsible for the restoration of such system and of any extensions of such systems.

4.4.2. To the extent specified Work on an existing system may cause damage to, or imbalances in extensions of such systems, and restoration of the entirety of such systems is not designated in the Drawings and/or Specifications as required Work, the **Contractor** shall be responsible for seeking an appropriate clarification or interpretation from the **Professional** before proceeding with the Work Involved.

4.4.3. The **Contractor** shall perform Work and operate vehicles and construction equipment in a safe manner and without becoming a hazard to the public, while at the same time ensuring the least practicable interference with pedestrians and traffic. In addition, such operations shall be carried out without interfering with overhead utilities. When transporting materials or equipment, vehicles shall not be loaded beyond the capacity set by their manufacturers or applicable Laws. When crossing sidewalks, curbs or landscaped areas, the **Contractor** shall protect them from damage. Safe and adequate pedestrian and vehicular access shall be maintained to fire hydrants, commercial and industrial establishments, churches, schools, parking lots, hospitals, fire and police stations and like establishments.

4.4.4. The **Contractor** shall be responsible for performing the pumping, draining and controlling of surface water and groundwater in the way that will not endanger the Work or any adjacent facility or property, or interrupt, restrict or interfere with the use of any adjacent facility or property.

4.4.5. Paragraph 3.10, Section 00100 Instructions to Bidders, invoking the "Soil Erosion and Sedimentation Control," 1994 PA 451, Part 91, as amended, MCL 324.9101 et seq., is made part of Section 00700 General Conditions by this reference.

4.4.6. To the extent the **Contractor** knows, or has reason to know, the **Contractor** shall be responsible for performing the Work taking fully into account any dewatering, blasting, etc. operations from other work bearing a potential impact on the Work.

4.4.7. Any damaged Work corrected by the **Contractor** shall be corrected and made equal in all respects (quality, finish, appearance, function, etc.) to similar non-damaged Work otherwise required by the Contract Documents.

4.4.8. The **Contractor** shall verify that Work already *in-place* is in proper condition to receive *dependent* Work, and that dependent Work connecting to the *in-place* Work is properly coordinated. Whether or not expressly specified in the Contract Documents, the **Contractor** shall be responsible for all cutting, fitting, drilling, fixing-up and patching of concrete, masonry, gypsum board, piping and other materials that may be necessary to make *in-place* Work and *dependent* Work fit together properly.

4.4.9. The **Contractor** shall not obstruct access to municipal structures, hydrants, valves, manholes, fire alarms, etc., nor operate valves or otherwise interfere with the operation of any Public utilities without first securing the necessary approvals and permits. Except as may be otherwise provided in the technical Specifications, the **Owner** will charge the **Contractor** for all utilities used based on the charges the **Owner** actually incurs.

4.4.10. In the event of any unauthorized interruption of service to any operating facility, the **Contractor** shall take immediate action to restore that service as soon as practicable. The **Contractor** shall be directly responsible for the charges of any manufacturer's representative called to the site to repair or adjust any systems damaged by the **Contractor**.

4.4.11. Whenever the **Contractor** has caused an operating security system to go out of service, or left unsecured openings in existing facilities or security fences, the **Contractor** shall furnish a security guard acceptable to the **Owner** to maintain security of the facility outside of normal working hours. The **Contractor** will be held responsible for any losses on account of the **Contractor's** interruption of security systems or barriers at existing facilities.

4.4.12. The **Contractor** shall take steps, procedures or means as may be required to prevent dust nuisance resulting from the **Contractor's** operations. The dust control measures shall be maintained at all times to the satisfaction of the **Owner** and any Political Subdivision with jurisdiction.

4.4.13. The **Contractor** shall, before final inspection, mark in a permanent and readily identifiable manner, all reference points provided by the **Owner**.

4.5 Patent Fees and Royalties:

4.5.1. The **Contractor** shall be responsible for paying all royalties and license fees and assuming all costs resulting from the use in the furnishing and performance of the Work and/or the incorporation into the Work of any invention, design, process, product or device covered by patent rights or copyrights, whether specified in the Contract Documents or chosen by the **Contractor**. The **Contractor** shall sign suitable agreement(s) with the patentee or copyright owner and, if requested, provide copies to the **Owner.**

4.5.2. The **Contractor** shall defend, indemnify and hold harmless the **Owner** and **Professional** from and against all claims, as construed in paragraph 1.4, arising from any patent or copyright infringement by the Contractor including, but not limited to, patent or copyright infringements resulting from "or equal" substitution of any invention, design, process, product or device that is specified in the Contract Documents.

4.5.3. If the **Contractor** knows, or should know, that the specified invention, design, process, product or device infringes on a patent or copyright, the **Contractor's** obligation to defend, indemnify and hold harmless **Owner** and **Professional** from and against all claims arising from any patent or copyright infringement shall apply, unless the **Contractor** promptly furnishes that information to the **Professional** in writing.

4.6 Use of Premises:

4.6.1. The **Contractor** shall confine its operations (including, but not limited to construction equipment and laydown and storage) to the site and lands, areas, properties, facilities, rights-of-way and easements ("the premises") identified and permitted by the Contract Documents, and shall not unreasonably encumber the premises. The **Contractor** shall be responsible for any damage to the premises (including, but not limited to, damage to any real and personal property) and for any damage to any adjacent lands, areas, properties, facilities, rights-of-way and easements (including, but not limited to, damage to any real and personal property) resulting from the **Contractor's** operations. The **Contractor** shall defend, indemnify and hold harmless the **Owner** and **Professional** against all claims, as construed in paragraph 1.4, arising from any damage to such premises or adjacent lands, areas, properties, facilities, rights-of-way and easements (inclusive of real and personal property), including loss of use, to the extent resulting from the **Contractor's** operations.

4.6.2. The **Contractor** shall keep the premises free from accumulations of waste materials, rubbish and other debris, and shall not remove, injure, cut, alter or destroy trees, shrubs, plants or grass, unless otherwise provided elsewhere in the Contract Documents. At the completion of the Work, the **Contractor** shall remove all obstructions, waste and surplus materials, rubbish, debris, tools and construction equipment and shall leave the site clean and ready for occupancy by the **Owner**.

4.6.3. The **Contractor** shall restore to pre-existing conditions all walks, roadways, paved or landscaped areas and other real and personal property not designated for alteration by the Contract Documents. To the extent the **Contractor** refuses, fails or neglects to replace all such altered premises and/or restore to its pre-existing condition any walk, roadway, paved or landscaped area and other property not designated for alteration by the Contract Documents, the **Contractor** shall bear its proportionate share of the Delay and costs resulting from the **Contractor's** refusal, failure or neglect to do so.

4.6.4. The **Contractor** shall not load or permit any part of any structure to be loaded in any way that will endanger the structure. The **Contractor** shall not subject any part of the Work or adjacent property to stresses or pressures that will damage or endanger the Work or adjacent property, or both.

4.7 Record Documents:

4.7.1. The **Contractor** shall maintain at the site one copy of all Record Documents in good order and annotated in a neat and legible manner using a contrasting, reproducible color to show (a) all revisions made, (b) dimensions noted during the furnishing and performance of the Work, and (c) all deviations between the as-built installation and the Contract Documents, all approved Submittals and all clarifications and interpretations.

4.7.2. Record Documents, along with a properly annotated copy of all approved Submittals, shall be available to the **Professional** and **Owner** at all times during the progress of the Work. The finalized Record Documents and approved Submittals shall be required for processing final payment to the **Contractor.**

4.7.3. The **Contractor** shall maintain and make available to the **Owner** and **Professional** daily field reports recording the on-site labor force and equipment (**Contractor** and Subcontractors); materials/equipment received (at the site or at another location); visits by Suppliers; significant in-progress and completed trade Work within major areas; and other pertinent information.

4.7.4. Such daily field reports shall be furnished by the **Contractor** promptly to the **Professional** and **Owner** upon their request, and shall be accepted by the **Owner** for information only.

Neither the **Owner** nor **Professional's** review of any daily field report shall be construed as agreement with the information contained in any such daily field report.

4.8 Emergencies:

4.8.1. In Emergencies affecting the safety or protection of Persons, the Work or property at or adjacent to the site, the **Contractor**, without any special instruction or authorization from the **Professional** and/or the **Owner**, is obligated to act to prevent threatened damage, death, injury or loss.

4.8.2. The **Contractor** shall give the **Owner** prompt written notice of any changes in the Work resulting from the action taken. If the **Owner** concurs, the **Owner** will amend the Contract Documents to provide for those changes and, unless the Emergency results in whole or in part from any act or omission within the control of the **Contractor**, to provide for any corresponding adjustment in Contract Price and/or Contract Time.

4.9 Indemnification:

4.9.1. The **Contractor** shall defend, indemnify and hold harmless the **Owner** and **Professional** from and against all claims, as construed in paragraph 1.4, for bodily injury, sickness, disease or death, or injury to the destruction of property, including loss of use, arising out of, relating to, or being in any way connected with the Work, that are in any way (a) caused by any negligent act or omission of the **Contractor**, any Subcontractor or Supplier or anyone for whose acts any of them may be liable, or (b) related to the **Contractor's** failure to maintain the required insurance and coverages. As a point of emphasis, and as set forth in paragraph 1.4, such claims shall include, but are not limited to charges of architects, engineers, attorneys and others and all court, hearing and other dispute resolution costs.

4.9.2. As a point of emphasis, as set forth in paragraph 1.4, this indemnification obligation shall include claims caused in part by the negligence or other liability-creating conduct or omissions of the **Owner** (including State departments, agencies, boards, commissions, officers and employees) or **Professional**; however, the **Contractor** shall not be required to indemnify the **Owner** or **Professional** against liability for loss or damage resulting from the sole negligence of the **Owner** and/or **Professional**.

4.9.3. With respect to claims against the **Owner** or **Professional** by any employee of the **Contractor**, the indemnification obligation under this paragraph 4.9 shall not be limited in any way by any limitation on the amount or type of damages, compensation or benefits payable by or for the **Contractor**, any Subcontractor or Supplier under workers' compensation, disability benefit or other benefit acts.

ARTICLE 5 SUBCONTRACTORS AND SUPPLIERS

5.1 Employment of Subcontractors:

5.1.1. Upon due investigation, the **Owner** may revoke, because of subsequent violation of a material requirement of the Contract Documents, the **Owner's** consent to any Subcontractor previously given pursuant to the provisions of Article 8 of Section 00100 Instructions to Bidders and Section 00430 List of Subcontractors. Any such revocation of the **Owner's** consent shall not justify any increase in Contract Price or Contract Time.

5.1.2. After Contract Award, if the **Contractor** intends to add or substitute a Subcontractor for Work in a Division, Specification and/or trade for which Subcontractor nomination was required in Section 00430 List of Subcontractors, the **Contractor** shall nominate that Subcontractor for review by the **Owner** and/or **Professional**. The **Contractor** shall not award such Work to any Subcontractor to whom the **Owner** objects for good cause. No adjustment in Contract Price or Contract Time shall be allowed for any such newly-nominated Subcontractor.

5.1.3. Whenever the **Owner** objects, for its convenience, to any Subcontractor nominated, but not objected to, before Contract Award or to any Subcontractor nominated after Contract Award, the **Contractor** shall nominate a substitute Subcontractor or shall proceed to self-perform the Work involved, if the **Contractor** is so qualified. If any such **Owner** objection requires a Subcontractor substitution or the **Contractor** to self-perform the Work Involved, in either case at an increase of the **Contractor's** cost for the part of the Work Involved, the **Owner** will amend the Contract Documents to provide for a corresponding adjustment in Contract Price and/or Contract Time made necessary by the Subcontractor substitution or self-performance and by any resulting Delay which is not reasonably anticipatable under the circumstances and which is attributable to the **Owner** and/or **Professional.**

5.1.4. Failure of the **Owner** to object to any nominated Subcontractor shall not constitute a waiver of any right of the **Owner** or **Professional** to reject Defective Work; nor shall the authority given to the **Owner** under this paragraph create or impose any duty on the **Owner** or **Professional** to exercise such authority for the benefit of the **Contractor** or any other third party.

5.1.5. Installation of any self-performed or Subcontractor Work shall constitute acceptance by the **Contractor** of all previously placed dependent Work. Consistent with this responsibility, the **Contractor**, directly or through the **Contractor's** choice of Subcontractors, shall supply, install and/or cause items to be built into previously placed Work, shall verify dimensions of previously placed Work and shall notify the **Professional** of previously placed Work that is unsatisfactory for, or prevents satisfactory installation of, other dependent Work.

5.1.6. Work performed by any Subcontractor or Supplier shall be through an appropriate written Subagreement that (a) expressly binds the Subcontractor or Supplier to the requirements of the Contract Documents, (b) requires such Subcontractor or Supplier to assume toward the **Contractor** all the obligations that the **Contractor** assumes toward the **Owner** and **Professional**, and (c) contains the waiver of rights of subrogation provisions of Article 7 and the dispute resolution provisions of Article 15.

5.2 "Or Equal" and Substitute Materials and Equipment:

5.2.1. Materials or equipment described in the Contract Documents by using a brand name, make, manufacturer, supplier or specification shall be intended to denote the essential characteristics desired and establish a standard.

5.2.2. For materials and equipment which are actually *listed* in Schedule 1.6 of Section 00440 Schedule of Materials and

Equipment, no "or equal" or substitute material or equipment will be acceptable or permitted unless the **Contractor** complies with the terms and conditions of paragraphs 5.2.2.1 through 5.2.2.5.

5.2.2.1. Unless words are used in a technical Specification indicating that no "or equal" or substitution is permitted, a proposal for an "or equal" or substitution may be accepted by the **Professional** if, in the **Professional's** judgment, the proposal (a) meets the criteria set forth in paragraphs 5.2.2.2 through 5.2.2.5, (b) demonstrates a net positive deduction, i.e., the deductive value of the proposal exceeds all direct, indirect and consequential costs and damages attributable to the "or equal" or substitution, and (c) offers a Contract Price decrease of one hundred percent (100%) of the net deduction, or another percentage reflecting a sharing of the savings which is agreed between the **Owner** and **Contractor.**

5.2.2.2. The **Contractor's** written application for the "or equal" or substitute material or equipment shall provide sufficient information to allow the **Professional** to determine whether the material or equipment proposed (a) will equally perform the functions and achieve the results called for by the Contract Documents, (b) is at least of equal materials of construction, quality and necessary essential design features, (c) is suited to the same use as that named or specified, (d) conforms substantially to the desired detailed requirements, e.g., durability, strength, appearance, aesthetics (if aesthetics are significant), safety, useful life, reliability, economy of operation and ease of maintenance, (e) evidences a proven record of performance and the availability of responsive service, and (f) will not extend any Contract Times.

5.2.2.3. Each such application shall certify whether or not acceptance of the proposed "or equal" or substitute material or equipment will require a change in any of the Work or any of the Means and Methods indicated in or required by the Contract Documents, or in work performed by the **Owner** or others, and whether or not incorporation or use of the proposed material or equipment is subject to payment of any license fee or royalty. All variations of the proposed material or equipment from the material or equipment named or specified shall be identified (operation, materials or construction finish, thickness or gauge of material, dimensions, loads, tolerances, deleted and added features, etc.), and information regarding available maintenance, repair and replacement service shall be indicated.

5.2.2.4. The application shall contain an itemized estimate of all direct, indirect and consequential costs and damages that will result from evaluation and acceptance of the proposed "or equal" or substitute material and equipment, including but not limited to costs and delays of redesign, or claims of other contractors affected by the proposed item, and changes in operating, maintenance, repair, replacement or spare part costs. The **Professional** may require the **Contractor** to furnish a manufacturer's performance Bond, an analysis of the effects of the evaluation/acceptance of the "or equal" or substitution on the Progress Schedule, a list of locations of similar installations that have been in service for at least three (3) years before the date of the application, and any other relevant data.

5.2.2.5. The **Contractor** shall be responsible for verifying that "or equal" or substitute materials and equipment conform to the Contract Documents, and that all dimensions, arrangement, design and construction details and other features are suited to the specified purpose. If any "or equal" or substitute material or equipment differs materially from the material or equipment named or specified, and that difference was not expressly identified in the **Contractor's** application, or results in changes in the Work, the **Professional** has authority to require removal and replacement of that "or equal" or substitute material or equipment. The **Contractor** shall bear its proportionate share of the Delay and costs resulting from (a) any such removal and replacement of "or equal" or substitute materials or equipment, (b) making "or equal" or substitute materials or equipment conform to the requirements of the Contract Documents, and (c) any changes in the Work and/or in other work required to accommodate the "or equal" or substitute material or equipment, or both.

5.2.2.6. The **Contractor** shall reimburse the **Owner** for any costs incurred by the **Owner** in the evaluation of any "or equal" or substitution proposal. Such costs shall include, but are not limited to, related charges of the **Professional** made necessary by the evaluation and acceptance or rejection, as the case may be, of the proposed "or equal" or substitute material or equipment.

5.2.3. For materials and equipment *not listed* in Schedule 1.6 of Section 00440 Schedule of Materials and Equipment, no substitute material or equipment will be acceptable or permitted unless the **Contractor** meets with the requirements of paragraphs 5.2.2.1 through 5.2.2.5. Further, the reimbursement provisions of paragraph 5.2.2.6 shall apply equally to such substitutions.

5.2.4. Unless approved by the **Professional**, for materials and equipment *not listed* in Schedule 1.6 of Section 00440 Schedule of Materials and Equipment, no "or equal" material or equipment will be acceptable or permitted unless the **Contractor** complies with the requirements of paragraphs 5.2.2.2 – 5.2.2.5.

5.2.5. No "or equal" or substitute item shall be ordered, installed or utilized without the **Owner's** prior acceptance. The **Owner's** acceptance shall be evidenced by a signed Change Order or Change Authorization, or if so specifically designated by the **Professional**, by an approved Shop Drawing or sample.

5.3 The Contractor's Continuing Responsibilities:

5.3.1. The **Contractor** shall be fully responsible to the **Owner** and **Professional** for all acts and omissions of Subcontractors and Suppliers, at any tier, to the same extent as the **Contractor** is responsible for the **Contractor's** own acts and omissions. Nothing in the Contract Documents shall create any contractual relationship between the **Owner** or **Professional** and any Subcontractor or Supplier. No provision in Article 12 or in the other Contract Documents shall create or impose any express or implied duty or obligation on the **Owner** or **Professional** to any Subcontractor or Supplier or the **Contractor's** sureties to pay or to see to the payment of any monies owed to any of them.

ARTICLE 6 SUBMITTALS

6.1 Shop Drawing, Sample and Other Technical Submittals:

6.1.1. After complying with those requirements in paragraphs 6.1.2 through 6.1.5 and the technical Specifications, the **Contractor** shall submit to the **Professional** (a) a mylar or sepia together with blue line drawings and electronic file(s) of the drawing(s) compatable with the latest version of Autocad of all Shop Drawings required by the Contract Documents; (b) all required samples (whether color or otherwise); and (c) all other

technical Submittals (test results, test procedures, safety procedures, O&M manuals, etc.) that are required by the Contract Documents.

6.1.2. Submissions shall be delivered to the **Professional** with due diligence, as delineated in or required by the Progress Schedule, and shall allow reasonable times for the **Professional's** review and turnaround. Each Submittal shall be uniquely identified as the **Professional** and **Contractor** may agree.

6.1.3. Each Submittal shall bear a stamp or specific written indication certifying that the **Contractor** has satisfied the requirements of this Article and the technical Specifications and the **Contractor's** responsibilities for prior review of the submission. In addition, each sample shall have been checked and be accompanied by a certificate guaranteeing that the material sampled complies with the Contract Documents. Unless otherwise allowed by the **Professional**, Submittals without the **Contractor's** indication of approval will be returned without review.

6.1.4. Before each submission, the **Contractor** shall (a) determine and verify all field measurements, quantities, dimensions, instructions for installation and handling of equipment and systems, installation requirements (including location, dimensions, access, fit, completeness, etc.), materials, color, catalog numbers and other similar data as to correctness and completeness, and (b) have reviewed and coordinated that technical Submittal with other technical Submittals and the requirements of the Contract Documents. Technical Submittals of a Subcontractor or Supplier shall be coordinated with those of other Subcontractors or Suppliers (location, dimensions, fit, completeness, consistency, integration, etc.), and so represented in the **Contractor's** stamp or specific written approval before submission to the **Professional**.

6.1.5. With each submission, the **Contractor** shall give the **Professional** specific written notice of each variation from the requirements of the Contract Documents, and the **Contractor** shall cause a specific notation of each variation to be made on that Shop Drawing, sample or other technical Submittal.

6.1.6. Where a Shop Drawing, sample or other technical Submittal is required by the technical Specifications, any related Work performed by the **Contractor** before the **Professional's** approval of the pertinent technical Submittal will be at the sole expense and responsibility of the **Contractor**.

6.1.7. The **Professional** shall be entitled to rely upon the accuracy or completeness of any designs, calculations or certifications made by licensed or certified professionals attached to a specific technical Submittal, whether or not that stamp or written certification is required by the Contract Documents.

6.2 Review and Return of Technical Submittals:

6.2.1. The **Professional's** review of a technical Submittal will be to evaluate whether the items covered by the Submittal, after installation or incorporation into the Work, will conform to the information given in the Contract Documents and be compatible with the design of the completed Work as a functioning whole as indicated in the Contract Documents.

6.2.2. The review of Submittals by the **Professional** shall not be conducted for the purpose of determining the accuracy and completeness of such details as dimensions or quantities shown or indicated on the Submittals, or for substantiating instructions for installation or performance of equipment and systems developed by or for the **Contractor**, the correctness of which shall remain the sole responsibility of the **Contractor.** Further, any such **Professional's** review and approval will not extend to any Means and Methods (except where a specific Mean and Method is indicated in or required by the Contract Documents) or to safety precautions or programs related to safety.

6.2.3. Approval by the **Professional** of a separate item or partial Submittal shall not translate to approval of the assembly in which the item functions or to the approval of related Submittals not yet reviewed and approved by the **Professional**.

6.3 Progress Schedule Submittals:

6.3.1. After complying with the appropriate Progress Schedule requirements in the technical Specifications, the **Contractor** shall submit to the **Professional** four (4) copies of the Progress Schedule Submittal then due, which shall include an electronic computer disk with the **Contractor's** data files. Each Progress Schedule Submittal shall bear the **Contractor's** stamp or written indication of approval as representation to the **Owner** that the **Contractor** has determined or verified all data on that Progress Schedule, and that the **Contractor** and Subcontractors and Suppliers have reviewed and coordinated the sequences in that Progress Schedule with the requirements of the Work. Progress Schedule Submittals are not Contract Documents.

6.3.2. Progress Schedule Submittals are intended to show: (a) the priority and sequencing by which the **Contractor** intends to execute the Work (or Work remaining) to comply with the Contract Times, those sequences of Work indicated in or required by the Contract Documents and any other requirements of the Contract Documents; (b) how the **Contractor** anticipates foreseeable events, site conditions and all other general, local and prevailing conditions that may in any manner affect cost, progress, schedule, performance and furnishing of the Work; (c) how the Means and Methods chosen by the **Contractor** translate into Activities and sequencing; (d) the actual timing and sequencing of completed Work; and (e) if required by the Contract Documents, the allocation of the Contract Price to the Activities.

6.4 Review and Return of Progress Schedule Submittals:

6.4.1. The **Owner's** and **Professional's** review of Progress Schedule Revision 0 Submittals may result in comments relating to conformance with (a) the Contract Times, (b) those sequences of Work indicated in or required by the Contract Documents, and (c) any other Contract Document requirements that may have a significant bearing on the use of Revision 0 Progress Schedule Submittals to resolve issues affecting Contract Price and/or Contract Time. Progress Schedule review comments may also result in the selection of Targets and recording of Target Times.

6.4.2. The review of Progress Schedule Revision Submittals may, in addition to the types of comments outlined in paragraph 6.4.1, result in comments as to whether the **Contractor's** scheduling of Work remaining continues to conform with the Contract Times and those sequences of Work indicated in or

required by the Contract Documents. Progress Schedule Revision Submittal review comments may also respond to suggested **Contractor** schedule recovery plans, when and as appropriate, and to **Contractor** requests for extensions in Contract Time.

6.4.3. Progress Schedule reviews shall not impose on the **Owner** or **Professional** any responsibility for verifying whether Work is omitted; Activity durations are reasonable; the adequacy of the level of labor, materials and construction equipment; the reasonableness of the **Contractor's** chosen Means and Methods; or whether Work sequences and Activity timing are practicable. Even if any comments or objections are noted from the reviews of Progress Schedule Submittals, no such reviews or objections noted shall be effective or construed to create or impose on the **Owner** or **Professional** any responsibility for the timing, planning, scheduling or execution of the Work or for the correctness of any such Progress Schedule details. The correctness of the Progress Schedule shall remain the sole responsibility of the **Contractor**.

6.5 Additional Provisions Concerning Submittals:

6.5.1. Unless otherwise designated in a more specific technical Specification, a Submittal will be returned to the **Contractor** within fifteen (15) to twenty (20) Calendar Days, as designated by the **Professional** in writing. If a Submittal cannot be returned when it comes due, the **Professional** shall give appropriate notice to the **Contractor** of its return date. The **Contractor** shall revise and correct Submittals returned for revision and resubmittal, and resubmit them to the **Professional** directing specific attention in writing to revisions other than the corrections called for by the **Professional** on previous submissions of the same Submittals.

6.5.2. No review or approval of Submittals shall relieve the **Contractor** of responsibility for the following: (a) variation from the requirements of the Contract Documents, unless the **Contractor** has called attention to each variation, as provided in paragraph 6.1.5, and the **Professional** has given written approval of that variation by a specific notation within or attached to the returned Submittal, (b) compliance with the "or equal" and substitution requirements of paragraph 5.2, (c) errors or omissions in the Submittal, or (d) compliance with the requirements of this Article.

6.5.3. Unless the **Professional** determines that additional resubmissions are reasonable under the circumstances, all costs incurred by the **Owner** made necessary by the **Professional's** review of a Submittal after the first resubmission of that Submittal shall be reimbursed by the **Contractor** to the **Owner**.

6.5.4. All time consumed by the resubmissions and rereviews of a particular Submittal shall constitute time required to furnish that Submittal, or shall represent Delays not justifying any increase in Contract Time or Contract Price, or both.

ARTICLE 7 LEGAL REQUIREMENTS; INSURANCE

7.1 Laws; Permits (Which Include Approvals and Licenses):

7.1.1. The **Contractor** shall comply with, and shall require all Subcontractors and Suppliers to comply with, all applicable Laws. The **Contractor** shall insure that everyone employed on the Work discharge their responsibilities consistent with all Laws.

*7.1.2. The **Contractor** shall secure from the State Department of Labor and Economic Growth and from all Political Subdivisions with jurisdiction, all construction permits necessary for the commencement, prosecution and completion of the Work before starting any Work at the site. All fees for securing the permits shall be paid by the **Contractor**, including all inspection costs which may be legally assessed by the Bureau of Construction Codes according to authority granted under 1972 PA 230, as amended, MCL 125.1501 et seq. The time incurred by the **Contractor** in obtaining construction permits shall constitute time required to complete the Work and shall not justify any increases in Contract Time or Contract Price, except to the extent any related Delay is attributable to the fault of the Drawings or Specifications or to revisions to the Drawings and/or Specifications required by the Political Subdivision with jurisdiction.

7.1.3. Unless expressly required by any Laws or permits, neither the **Owner** nor **Professional** shall be responsible for monitoring the **Contractor's** compliance with any Law, the State Construction Code or any permits. The **Contractor** is not responsible to make certain that the Contract Documents comply with applicable Laws and the State Construction Code; however, if the **Contractor** believes the Contract Documents deviate from the requirements of any Law, the State Construction Code or any permit, the **Contractor** shall give the **Professional** prompt written notice. If the **Contractor** provides any Work knowing or having reason to know such Work conflicts with any Laws, or the State Construction Code or any permits, the **Contractor** shall be responsible for that performance. The **Contractor** shall be proportionately responsible for the time required and the costs involved in complying with the obligations stated in this paragraph.

*7.1.4. All Work shall be provided in accordance with the State Construction Code and the requirements of paragraph 1.2.4. If the **Contractor** observes that any Contract Document is at variance with any Laws or the State Construction Code in any respect, the **Contractor** shall promptly notify the **Professional** in writing, and any necessary changes shall be accomplished by an appropriate Change Order. The **Contractor** shall pay all charges of Public Utilities for connections to the Work, unless otherwise provided by Cash Allowances specific to those connections.

*7.1.5. In accordance with the Michigan State Construction Code Act, 1972 PA 230, as amended, MCL 125.1501 et seq., the State Department of Labor and Economic Growth, Construction Code Commission has adopted and filed with the Secretary of State the following Construction Code Reference Standards: (a) Michigan Building Code; (b) Michigan Plumbing Code; (c) National Electric Code; (d) Michigan Mechanical Code; (e) State Elevator Code; (f) State Boiler Code; and (g) State Barrier Free Design Rules.

7.2 Sales and Use Tax and Other Similar Taxes:

7.2.1. The **Contractor** shall be responsible for and pay all Michigan sales and use taxes and any other similar taxes covering the Work that are currently imposed by legislative enactment and as administered by the Michigan Department of Treasury, Revenue Division. The **Owner** shall make a corresponding adjustment in Contract Price for any increase or decrease in sales, use and other similar taxes (excluding payroll taxes) covering the Work that are enacted after the date of Bid opening.

7.3 Safety and Protection:

7.3.1. The **Contractor** shall comply with, and shall require all Subcontractors and Suppliers to comply with, all Laws governing the safety and protection of persons or property, including, but not limited to the Michigan Occupational Safety and Health Act (1974 PA 154, as amended, MCL 408.1001 et seq.) and all rules promulgated under the Act. The **Contractor** shall be responsible for all fines and penalties imposed for any related violation(s) of federal and State health and safety requirements. The **Contractor's** safety representative at the site shall be the superintendent required by the provisions of paragraph 4.2.2, unless otherwise designated in writing by the **Contractor**.

7.3.2. The **Contractor** shall be solely responsible for initiating, maintaining and supervising all safety precautions and programs. The **Contractor** shall take all necessary precautions for the safety of, and shall erect and maintain all necessary safeguards and provide the necessary protection to prevent damage, injury or loss to: (a) all employees on the Work and other persons who may be affected by the Work, (b) all the Work and materials and equipment to be incorporated into the Work, whether stored on or off the site, and (c) other property at or adjacent to the site, including trees, shrubs, lawns, walks, pavements, roadways, structures, utilities and Underground Utilities not designated for removal, relocation or replacement. In the event of severe weather, the **Contractor** shall immediately inspect the Work and the site and take all reasonably necessary actions and precautions to protect the Work and ensure that public access and safety are maintained.

7.3.2.1. All damage, injury or loss to the Work, materials and equipment and such other property caused, directly or indirectly, in whole or in part, by the **Contractor** shall be remedied by the **Contractor**, except to the extent due to fault of the Drawings or Specifications or to act or omission of the **Owner** or **Professional**, and not due to, directly or indirectly, in whole or in part, to the fault or negligence of the **Contractor** or any Subcontractor or Supplier.

7.3.2.2. The **Contractor** shall notify owners of adjacent property and Underground Utilities when prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation and replacement of their property.

7.3.2.3. Except as the division of responsibilities for safety may be otherwise delineated in writing between the **Owner** and **Contractor** in a Substantial Completion certificate, the **Contractor** duties and responsibilities for safety and protection shall continue until such time as the **Professional** is satisfied that the Work, or Work inspected, is completed and ready for final payment.

7.3.3. Use of Explosives – The **Contractor** shall comply with all federal, State and local Laws governing the use of explosives, obtain and pay for any required permits before their use and furnish a copy of the permits to the **Professional** before using explosives. The **Contractor** shall, under the supervision of competent and suitably trained and qualified personnel, exercise the utmost care not to endanger life or damage property in the transportation, storage, handling, use and disposal of explosives, and in the use of Means and Methods. The **Contractor** shall be responsible for all injury, damage and adverse impacts outside the permit area resulting from the use of explosives (including an appropriate portion of the Delay and costs resulting from such injury, damage and impacts).

7.4 Bonds and Insurance – General Requirements:

7.4.1. Both the Section 00610 Performance Bond and Section 00620 Payment Bond shall remain in full force and effect from the date of Contract Award until final completion of the Work or the end of the Correction Period, whichever comes later. The **Contractor** shall furnish any other bonds (e.g., manufacturer performance Bond or maintenance Bond) required by Section 00800 Supplementary Conditions or the technical Specifications.

7.4.2. The **Contractor** shall purchase and maintain insurance providing the coverages and limits designated in this Article. Insurance shall be provided by insurers authorized to do business as insurer in the State, as evidenced by a Certificate of Authority issued by the Department of Consumer and Industry Services – Insurance Bureau. Also, and unless otherwise authorized in writing by the **Owner**, insurers shall have an "A-" A.M. Best Company Rating and a Class VII or better financial size category as shown in the most current A.M. Best Company ratings. The **Contractor** shall not start to perform and furnish the Work, or continue with any part of the Work, unless the **Contractor** has in full force and effect all the required insurance.

7.4.3. Insurance policies shall contain a provision or endorsement stating that coverage will not be canceled or materially changed or renewal refused unless at least thirty (30) Calendar Days prior written notice has been personally delivered or sent by registered mailed to the **Owner** and **Contractor**. Any coverage nearing expiration during the period in which it is to remain in full force and effect shall be renewed before its expiration, and an acceptable certificate of insurance shall be filed with the **Owner** at least thirty (30) Calendar Days before it expires.

7.4.4. If any of the **Contractor's** sureties or insurers is declared bankrupt or placed into receivership, ceases to meet the requirements of the Contract Documents or its authority to do business in the State is revoked or expires, the **Contractor** shall immediately substitute other Bonds/sureties or insurers/policies, which shall meet the requirements of the Contract Documents.

7.5 The Contractor's Liability Insurance:

7.5.1. The **Contractor** shall maintain Workers' Compensation and Employer's Liability, Commercial General Liability, Commercial Automobile Liability, Excess Liability and such other insurance as may be designated in Section 00800 Supplementary Conditions or as is appropriate for the Work. The **Contractor's** liability insurance shall provide protection from claims which may arise out of or result from the **Contractor's** performance and furnishing of the Work and the **Contractor's** other obligations under the Contract Documents, whether performed or furnished by the **Contractor**, any Subcontractor, any Supplier or anyone for whose acts any of them may be liable.

7.5.2. Liability Insurance shall be endorsed to list as additional insureds the **Professional**, the **Owner's** consultants and agents and the **Professional's** consultants and agents, including their respective subsidiaries and affiliates and their respective directors, officers, shareholders, agents or employees. The

Contractor shall use the current Insurance Services Office (ISO) Form CG 20 09 for general liability insurance or equivalent, ISO Form CA 20 01 for automobile liability insurance or equivalent, and manuscripted form for excess liability insurance. The insurance afforded to the additional insureds shall be primary, and neither the coverages nor limits under the **Contractor's** policies shall be reduced or prorated by the existence of any other insurance applicable to any loss that the additional insureds may have sustained. Workers' Compensation, Employer's Liability Insurance and all other liability insurance policies shall be endorsed to include a waiver of rights to recover from the **Owner, Professional** and the other additional insureds.

7.5.3. The **Contractor's** liability insurance shall remain in effect through the Correction Period and through any special correction periods that are implemented pursuant to the requirements of paragraph 9.5.3. Liability insurance issued on a claims-made basis and completed operations insurance shall be maintained for two (2) years after final payment, and evidence of coverage shall be furnished to the **Owner** yearly.

7.5.4. For any employee, resident of and hired in Michigan, the **Contractor** shall have insurance for benefits payable under Michigan's Workers' Compensation Law. For any other employee protected by Worker's Compensation Laws of any other state, the **Contractor** shall have insurance or participate in a mandatory state fund, where applicable, to cover the benefits payable to any such employee.

7.5.5. Commercial General Liability Insurance shall be equivalent to that provided by the current edition of standard ISO Form CG 00 01, and shall include contractual liability and underground, explosion and collapse hazard exposure operations and pile driving operations (if risk is present).

7.5.6. Commercial Automobile Liability Insurance coverage shall be equivalent to that provided by the current edition of the ISO Form CA 00 01, and include Michigan statutory requirements.

7.5.7. Excess Liability Insurance shall provide the following protections: employer's liability, general liability and automobile liability. Excess Liability Insurance shall be at least as broad as the underlying policies of liability insurance.

7.5.8. Coverage Limits - Workers' Compensation and Employer's Liability Insurance shall conform to statutory limits under Michigan Law. Commercial General Liability limits shall be $2,000,000.00 each occurrence, $2,000,000.00 general aggregate, $2,000,000.00 products and completed operations aggregate, and $2,000,000.00 personal and advertising injury. Commercial Automobile Liability limits shall be $2,000,000.00 combined single limit. Excess Liability limits shall be $2,000,000.00 each occurrence and aggregate, if the Contract Price is less than $10,000,000.00, and $5,000,000.00 each occurrence and aggregate, otherwise. Deductible amounts shall not exceed $25,000.00.

7.5.9. The **Contractor** shall promptly notify the **Owner** in writing of (a) any reduction in coverage limits over $100,000.00 resulting from Work under the Contract Documents or otherwise, and (b) any claim notice involving the Work. Notification of a claim shall provide full details and an estimate of the amount of loss or liability. If it turns out that the aggregate limits have been impaired to the extent that they are no longer adequate for the Work, the **Contractor** shall promptly reinstate the coverage limits and submit to the **Owner** certificates of insurance confirming that coverage has been reinstated to the specified limits.

7.5.10. These requirements shall not be construed to limit the liability of the **Contractor** or its insurers. The **Owner** does not represent that the specified coverages or limits of insurance are sufficient to protect the **Contractor's** interests or liabilities.

7.6 The Owner's Liability Insurance:

7.6.1. The **Contractor** shall purchase, maintain and submit to the **Owner** an **Owners** and **Contractors** Protective (OCP) Liability Insurance policy, issued on an occurrence basis, naming the **Owner** as named insured. The OCP insurance shall be primary insurance for the **Owner** and serve in place of adding the **Owner** as an insured in the **Contractor's** policy. The OCP insurance shall be obtained from the insurer providing the **Contractor's** liability insurance to avoid duplication of coverage.

7.6.2. The OCP policy limit shall be $1,000,000.00 combined single limits, bodily injury and property damage, and shall not contain any exclusion relative to any supervisory functions by the **Owner** which may arise out of or result from operations under the Contract.

7.7 Property Insurance (Builder's All Risk Insurance):

*7.7.1. The **Owner** or its designee shall purchase and maintain property insurance for one hundred percent (100%) of the actual cash replacement value of the insurable Work while in the course of construction, including foundations, unless foundations are specifically excluded, additions, attachments, and all fixtures, machinery and equipment belonging to and constituting a permanent part of the building structure. The property insurance also shall cover temporary structures, materials and supplies of all kinds, to be used in completing the Work, only while on the building site premises or within five hundred (500) feet of the site. The property insurance shall insure the interests of the **Owner**, **Contractor** and all Subcontractors and Suppliers at any tier as their interests may appear. The property insurance shall insure against "all risk" of physical loss or damage to the extent usually provided in policy forms of insurers authorized to transact this insurance in Michigan, and shall be subject to a deductible of $10,000.00 dollars for each loss occurrence.

*7.7.2. A copy of the master insurance policy will be kept at **Facilities and Business Services Administration,** for review by the **Contractor** and Subcontractors.

7.7.3. The **Contractor** shall cooperate with the **Owner** in determining the actual cash replacement value of any insured loss. Any deductible amount shall be assumed or shared by the **Contractor** and Subcontractors, at any tier, in accordance with any agreement the parties in interest may reach.

7.7.4. The **Owner** shall purchase and maintain for its benefit boiler and machinery insurance for boiler and machinery required to be registered and inspected by Law.

7.8 Waiver of Rights:

7.8.1. To the extent any losses and damages caused by any of the perils covered by property insurance covering the Work (whether under paragraph 7.7 or otherwise) are covered and payments are made, the **Owner** and **Contractor** waive all rights against each other for any such losses and damages and also waive all such rights against the **Professional** and all other Persons named as insureds or additional insureds in such policies. Each Subagreement shall contain similar waiver provisions by the Subcontractor or Supplier in favor of the **Owner**, **Professional**, and all other Persons named as insureds or additional insureds. None of these waivers shall extend to the rights that any of the insureds may have to the proceeds of insurance held by the **Owner** as trustee or otherwise payable under a policy so issued.

7.8.2. The **Owner** and **Contractor** intend that the required policies of property insurance shall protect all the parties insured and provide primary coverage for all losses and damages caused by the perils covered. Accordingly, all such policies shall be endorsed to provide that in the event of payment of any loss or damage the insurer will have no rights of subrogation or other recovery against any of the parties named as insureds or additional insureds, and if the insurers require separate waiver forms to be signed by the **Professional** or the **Owner's** and **Professional's** consultants, the **Owner** will obtain such waiver forms, and if required of any Subcontractor or Supplier, the **Contractor** will obtain such waiver forms as well.

7.9 Receipt and Application of Proceeds:

7.9.1. Any insured loss under the policies of property insurance will be adjusted with the **Owner** and will be made payable to the **Owner** as trustee for the insureds, as their interests may appear, subject to the conditions of paragraph 7.9.2. The **Owner** shall deposit, in a separate account, and shall distribute monies received based on any agreement the parties in interest may reach. If no other distribution agreement is reached, the damaged Work shall be replaced or repaired, the monies received shall be used for that purpose and the Work Involved and resulting costs shall be covered by Change Order.

7.9.2. The **Owner**, as trustee, shall have power to adjust and settle any loss with the insurers unless a party in interest objects in writing within fifteen (15) Calendar Days after the occurrence of loss to the **Owner's** exercise of this power. If an objection is made, the **Owner** as trustee shall settle with the insurers pursuant to any agreement the parties in interest may reach.

***7.10 Unfair Labor Practice:**

*7.10.1. The **Owner**, pursuant to 1980 PA 278, as amended by MCL 423.321(b), may void and rescind the Contract if, at any time, the **Contractor** or any Subcontractor or Supplier appears on the register maintained by the Michigan Department of Consumer and Industry Services of employers who have been found in contempt of court by a Federal Court of Appeals on not less than three occasions involving different violations during the preceding seven (7) years for failure to correct unfair labor practices as prohibited by Section 8 of Chapter 372 of the National Labor Relations Act, 29 U.S.C. 158.

***7.11 Michigan Right-To-Know Law:**

*7.11.1. The **Contractor** shall comply with Section 14a-14n of the Michigan Occupational Safety and Health Act (MIOSHA), 1974 PA 154, as amended, MCL 408.1014a – MCL 408.1014n, commonly referred to as the "Michigan Right-to-Know Law" and the rules promulgated under the Act. The Act places certain requirements on employers to develop a communication program designed to safeguard the handling of hazardous chemicals through labeling of chemical containers and development and availability of Material Safety Data Sheets (MSDS), and to provide training for employees who work with these chemicals and develop a written hazard communications program.

*7.11.2. Provisions of the Michigan Right-to-Know Law may be found in those sections of the Michigan Occupational Safety and Health Act (MIOSHA), which contain Right-to-Know provisions, and the Federal Hazard Community Standard, which is part of the MIOSHA Right-to-Know Law through adoption. The Act, rules and standards should be reviewed for additional requirements.

*7.11.3. The Michigan Right-to-Know Law also provides for specific employee rights, including the right to be notified of the location of MSDS and to be notified at the site of new or revised MSDS within five (5) Business Days after receipt and to request MSDS copies from their employers. The **Contractor**, employer or Subcontractor shall post and update these notices at the site.

***7.12 Nondiscrimination:**

*7.12.1. The **Contractor** and each Subcontractor and Supplier covenants to comply with the following requirements:

*7.12.1.1. Not to discriminate against any employee or employment applicant because of race, religion, color, national origin, age, sex, height, weight, marital status, or a physical or mental disability that is unrelated to the individual's ability to perform the duties of the particular job or position.

*7.12.1.2. To take action to ensure that applicants are employed and that employees are treated during employment without regard to their race, religion, color, national origin, age, sex, height, weight, marital status, or a physical or mental disability that is unrelated to the individual's ability to perform the duties of the particular job or position. Such action shall include, but is not limited to employment upgrading, demotion or transfer; recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship;

*7.12.1.3. To state, in all solicitations or advertisements for employees, that all qualified applicants will receive consideration for employment without regard to race, religion, color, national origin, age, sex, height, weight, marital status, or a physical or mental disability that is unrelated to the individual's ability to perform the duties of the particular job or position;

*7.12.1.4. To send, or have its collective bargaining representative send, each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice advising that labor union or worker's representative of commitments under this provision;

*7.12.1.5. To comply with the Elliot-Larsen Civil Rights Act, 1976 PA 453, as amended, MCL 37.2201 et seq.; the Michigan Persons With Disabilities Civil Rights Act, 1976 PA 220, as amended, MCL 37.1101 et seq.; and all published rules, regulations, directives and orders of the Michigan Civil Rights Commission which may be in effect on or before the date of Bid opening.

*7.12.1.6. A breach of the covenants set forth in paragraphs 7.12.1.1 through 7.12.1.5 shall be regarded as a material breach of the Contract.

*7.12.2. The **Contractor** shall furnish and file compliance reports within the times, and using the forms, prescribed by the Michigan Civil Rights Commission. Compliance report forms may also elicit information as to the practices, policies, programs, and employment statistics of the **Contractor** and Subcontractors. The **Contractor** shall permit access to Records by the Michigan Civil Rights Commission and its agent for the purposes of ascertaining compliance with the Contract Documents and with rules, regulations and orders of the Michigan Civil Rights Commission.

*7.12.3. If, after a hearing held pursuant to its rules, the Michigan Civil Rights Commission finds that the **Contractor** has not complied with the nondiscrimination requirements of the Contract Documents, the Michigan Civil Rights Commission may, as part of its order, certify said findings to the **Board**. Upon receipt of certification, the **Board** may order the cancellation of the Contract and/or declare the **Contractor** ineligible for future contracts with the State, until the **Contractor** complies with said order of the Michigan Civil Rights Commission.

***7.13 Michigan Residency for Employees:**

*7.13.1. Fifty percent (50%) of the persons employed on the Work by the **Contractor** shall have been residents of the State of Michigan for not less than one year before beginning employment on the Work. This residency requirement may be reduced or omitted in writing, at the sole discretion of the **Owner**, to the extent that Michigan residents are not available or to the extent necessary to comply with federal Law concerning federal funds used for the Project. A breach of this requirement shall be considered a material breach of the Contract.

*7.13.2. This residency requirement shall not apply to the **Contractor** or to any Subcontractor if the **Contractor** or any such Subcontractor is signatory to collective bargaining agreements which allow for the portability of employees on an interstate basis (The Management and Budget Act, 1984 PA 431, as amended, MCL 18.1241a).

***7.14 Prevailing Wages:**

*7.14.1. The term "the **Contractor**", as used in this paragraph, shall include the **Contractor** and all the **Contractor's** Subcontractors and their respective lower tier Subcontractors and all construction persons (whether general contractors, prime contractors, project managers or trade contractors) in privity of contract with any of them.

*7.14.2. The rates of wages and fringe benefits to be paid to each class of construction mechanics by the **Contractor** shall not be less than the wage and fringe benefit rates issued by the Michigan Department of Labor and Economic Growth, Wage/Hour Division in its schedule of occupational classification and wage and fringe benefit rates for the locality in which the Work is to be performed. The schedule of wage and fringe benefit rates applicable to Work on this Contract is attached to Section 00800 Supplementary Conditions.

*7.14.3. The **Contractor** shall keep posted on the construction site, in a conspicuous place, a copy of all prevailing wage and fringe benefit rates as prescribed in Section 00800 Supplementary Conditions and the address and telephone number of the Michigan Department of Labor and Economic Growths' office responsible for enforcement of these provisions. The **Contractor** also shall keep an accurate Record showing the name and classification of each person performing Work on the site, the dates on which Work was performed, the hours each person worked on the site, and the actual hourly wages and benefits paid to each person. This Record shall be made available for inspection to the **Department** of Technology, Management and Budget, **Facilities and Business Services Administration,** and the Michigan Department of Labor and Economic Growth, at any time, upon their request. In addition, the Contractor must have available to DTMB and DELEG, certified payroll of those working on the project.

*7.14.4. In case there is an omission of any trade from the schedule of wages and fringe benefits attached to Section 00800 Supplementary Conditions, it shall be understood that the trades omitted also shall be paid not less than the wage and fringe benefit rates prevailing in the locality in which the Work is to be performed.

*7.14.5. A finding by the Michigan Department of Labor and Economic Growth that the **Contractor** or any Subcontractor is in violation of the requirements of these provisions shall be final.

*7.14.6. The **Contractor** shall keep posted on the construction site, in a conspicuous place, notice that as the intended beneficiaries of 1965 PA 166, as amended, MCL 408.551 et seq. construction mechanics who have not been paid in accordance with the Act may file a claim with the Department of Labor and Economic Growth.

*7.14.7. The **Contractor** shall comply with the requirements of the Electrical Administrative Act, 1956 PA 215, as amended, MCL 338.881 et seq., as amended; and all Laws pertaining to occupational classifications.

7.14.8. The Schedule of Prevailing Wage and Fringe Benefit Rates applicable to the Work is attached to this Section 00800 Supplementary Conditions.

7.15 Century Date Compliance Protection:

7.15.1 All fixtures, equipment or operating systems which require firmware or software systems and that are provided with and/or incorporated into the Work shall include, at no increase in Contract Price or Contract Time, design and performance such that they will not experience firmware or software abnormality and/or generate incorrect results or performance deficiencies due to date oriented processing.

7.15.2. The firmware and software design to ensure century date compliance capability, shall include, but not be

limited to data structures (databases, data files, etc.) that provide four (4) digit date century; stored data that contain date century recognition, including, but not limited to, data stored in databases and hardware device internal system date; calculations and program logic (e.g. sort algorithms, calendar generation, event recognition, and all processing actions that use or produce date values) that accommodates same century and multi-century formulas and date values; and user interfaces (i.e. screen reports, etc.) that accurately treats four (4) digit year 2000 as a leap year within all calculations and calendar logic.

7.15.3 When requested by the **Owner**, the **Contractor** shall promptly provide written assurances to the **Owner** from any manufacturer of any fixtures, equipment or operating systems provided with and/or incorporated into the Work that its fixtures, equipment, or operating systems have been reasonably tested and will not experience any firmware or software abnormality and/or generate incorrect results or performance deficiencies due to date oriented processing. Whether the **Owner** chooses to request such assurances, and whether such assurances are provided, will not relieve the **Contractor** from the **Contractor's** obligation to provide fixtures, equipment and operating systems in accordance with the Contract Documents or will represent acceptance of Defective Work.

7.15.4. If the **Contractor** knows or has reason to know of any incorrect results and/or performance deficiencies due to date oriented processing, the **Contractor** shall promptly notify the **Professional** and **Owner** in writing of any such Defective Work.

7.15.5 The **Contractor** specifically warrants and represents that all fixtures, equipment or operating systems provided with and/or incorporated into the Work will not experience firmware or software abnormality and/or generate incorrect results or performance deficiencies due to date oriented processing. This **Contractor** warranty shall extend until the applicable warranty otherwise covering the fixture, equipment or operating system at issue expires.

7.15.6. The **Contractor** shall take prompt corrective action upon receiving any written notice of any Defective Work because any fixtures, equipment or operating systems experience firmware or software abnormality and/or generate incorrect results or performance deficiencies.

ARTICLE 8 PROSECUTION; SUBSTANTIAL COMPLETION

8.1 Starting the Work:

8.1.1. Within fifteen (15) Calendar Days after the **Owner** executes the Section 00500 Agreement, a pre-construction conference will be held. The conference will be intended, without limitation, to (a) review the **Contractor's** Schedule of Shop Drawing submissions; (b) review the qualifications of key **Contractor** personnel; (c) review the **Contractor's** proposed normal working hours and plans for laydown, staging, construction traffic, access to the site, parking and other similar matters; (d) review procedures for Submittals, clarifications and interpretations (including reasonable times for response turnaround), Change Orders, Change Authorizations and Record Documents; and (e) exchange twenty-four (24) hour emergency telephone numbers for key personnel.

8.1.2. The **Contractor** shall start the Work on the Date of Commencement of the Contract Time. No Work shall be started at the site before such is allowed by the Contract Documents.

8.2 Revision 0 (Rev. 0) Schedule and Cost Submittals:

8.2.1. The **Contractor** shall deliver the interim Rev. 0 Progress Schedule, Schedule of Shop Drawing submissions and Rev. 0 Progress Schedule as required in the Contract Documents. The **Contractor** shall correct and adjust any Rev. 0 Submittal returned for revision. The finalized Revision 0 *As-Planned* Schedule shall be the Progress Schedule from which Revision Schedules shall be developed and used by the **Contractor** when making proposals or claims for adjustments in Contract Time and/or Contract Price.

8.3 Compliance with Contract Time Requirements:

8.3.1. The **Contractor** shall prosecute the Work with the diligence necessary to ensure its completion within the Contract Times. The **Contractor** shall provide sufficient management, supervision, labor, materials and equipment, and the **Contractor** shall undertake appropriate action promptly to recover schedule when necessary to comply with the Contract Times.

8.3.2. Unless disallowed by any Law or modified in another Section of the Specifications, a daily schedule from 06:00 AM to 06:00 PM, during Business Days, shall be normal working hours. Except in an Emergency, or as may be required by the **Contractor's** safety and protection obligations, or as the **Owner** and **Contractor** may otherwise agree, all Work at the site shall take place during normal working hours. The **Contractor** shall provide written notice to the **Owner** twenty-four (24) hours before performing Work outside of normal working hours.

8.3.3. Unless otherwise agreed in writing by the **Owner**, for any Work actually performed outside of normal working hours, the **Contractor** shall reimburse the **Owner** any related increases in costs the **Owner** incurs, provided those costs are costs which the **Contractor** could reasonably have foreseen and which are not offset through the earlier completion of the Work resulting from working outside of normal working hours. Examples of **Owner** costs include, but are not limited to, overtime charges of the **Professional** and payments for custodial and security personnel.

8.3.4. Early Dates in the Progress Schedule shall be based on proceeding with all or part of the Work exactly on the date when the corresponding Contract Time commences to run. Late Dates shall be based on completing all or part of the Work exactly on the corresponding Contract Time, regardless of whether the **Contractor** anticipates early completion or not. If sequences of Work are indicated in or required by the Contract Documents, the Progress Schedule shall show in sufficient detail the **Contractor's** approach to conforming with those sequences.

8.3.5. The Progress Schedule shall reflect the **Contractor's** approach to Work remaining, be employed when reporting on progress or schedule recovery and facilitate the evaluation of Requests for Payment, as provided in the Contract Documents.

8.3.6. The **Contractor** shall carry on the Work with due diligence during all disputes or disagreements with the **Owner.** No Work shall be delayed or postponed pending resolution of any disputes or disagreements. The **Contractor** shall exercise reasonable precautions, efforts and measures to avoid or mitigate situations that would cause Delays.

8.4 Substantial Completion:

8.4.1. The **Contractor** shall conduct inspections of the Work to verify the extent of completion. The **Contractor** shall provide to the **Owner** a list of items to be completed or corrected resulting from the inspections whenever the **Contractor,** upon completing all pre-requisite testing of the Work, considers that the Work, or any portion of the Work designated in the Contract Documents as having a separate, specified Substantial Completion, has progressed to the point that it is substantially complete.

8.4.2. Within a reasonable time after receiving the **Contractor's** list of items to be completed or corrected, the **Owner**, **Professional** and **Contractor** shall jointly conduct a Substantial Completion inspection. If, after consulting with the **Owner**, the **Professional** does not consider the Work, or portion of the Work inspected, substantially complete, the **Professional**, within twenty (20) Calendar Days after the inspection, will deliver to the **Owner** and **Contractor** a list of incomplete or Defective Work sufficient to demonstrate the basis for that determination.

8.4.3. If the **Professional** and **Owner** agree that the entire Work, or that the portion of the Work inspected, is substantially complete, the **Professional** will deliver to the **Owner** and **Contractor** a certificate of Substantial Completion with a Punch List. The certificate shall (a) fix a reasonable date of Substantial Completion, (b) fix a date for completion of the Punch List to the satisfaction of the **Professional**, and (c) recommend the division of responsibilities between the **Owner** and **Contractor**. Neither the Work, nor any portion of the Work inspected, shall be substantially complete, unless the **Owner** can use the Work, or designated portion of the Work inspected, for the use intended.

8.4.4. Upon Substantial Completion of the Work, or designated part of the Work on which separate Substantial Completion and Contract Price are specified, payment may be made in full subject to (a) a withholding of two hundred percent (200%) of the value of any uncompleted Work, as determined by the **Professional**, and (b) any other deductions as the **Professional** may recommend or the **Owner** may withhold to cover Defective Work, liquidated damages and the fair value of any other items entitling the **Owner** to a withholding.

8.4.5. To the extent **Owner** training is required before Substantial Completion, the **Contractor** will provide the **Owner** copies of all related operating and maintenance (O&M) documentation before the start of training. Where **Owner** training for a portion of the Work is not required before Substantial Completion, the related O&M documentation will be provided no later than Substantial Completion. Final O&M documentation (with revisions made after Substantial Completion), will be furnished by the **Contractor** to the **Owner** before the request for final payment.

8.5 Partial Use:

8.5.1. Before Substantial Completion of the entire Work, the **Owner** may, at its sole option, use any portion of the Work for which a separate Substantial Completion has been specified in the Contract Documents. Before Substantial Completion of the entire Work, the **Owner** may, at its sole option, use any portion of the Work considered by the **Owner**, **Professional** and **Contractor** to be separately functioning Work that can be used without significant interference with the **Contractor's** completion of the balance of the Work, even though a Substantial Completion for such Work is not specified in the Contract Documents.

8.5.2. If the **Owner** decides to use any portion of the Work, it shall inform the **Contractor** in writing. Unless such portion of the Work has undergone a Substantial Completion inspection under paragraph 8.4.2, within a reasonable time after receipt of the notice, the **Owner**, **Contractor** and **Professional** shall jointly make an inspection to determine the extent of completion. If the portion of the Work inspected is substantially complete, the provisions of paragraph 8.4.3 shall be followed by the **Owner**, **Professional** and **Contractor**. If the portion of the Work inspected is not substantially complete, the **Professional** will prepare a list of items remaining to be completed or corrected before that portion of the Work is considered substantially complete. Upon completing the list, the **Professional** will deliver the prepared list of items to the **Owner** and **Contractor**.

8.5.3. There shall be attached to the list a written recommendation about the division of responsibilities between the **Owner** and **Contractor** for those matters enumerated in paragraph 8.6.1 with respect to that portion of the Work, pending Substantial Completion of that portion of the Work and the entire Work. During Partial Use, and before Substantial Completion of the portion of the Work under Partial Use, the **Owner** shall allow the **Contractor** reasonable access to complete or correct listed items and to complete other Work. The **Owner** will not start any Partial Use unless the property insurer, by endorsement or like acceptable procedure, has acknowledged receipt of notice of and consent to Partial Use.

8.6 Division of Responsibilities:

8.6.1. A certificate of Substantial Completion will include the **Professional's** recommendation about the division of responsibilities between the **Owner** and **Contractor** for utilities, security, safety, insurance, maintenance, etc. The **Owner** and **Contractor** will accept the division of responsibilities recommended by the **Professional** or shall negotiate a mutually agreeable split of responsibilities, which shall bind the **Owner** and **Contractor** when the **Owner** starts Partial Use.

8.7 Suspension of Work:

8.7.1. Suspension of Work Order – The **Owner** may, at any time, order the **Contractor** in writing to defer, stop, slow down, suspend or interrupt all or any part of the Work for such period as the **Owner** may determine appropriate for its convenience. If any such written order Delays performance for an unreasonable period, the **Owner** will amend the Contract Documents to provide for a corresponding adjustment in Contract Time and/or Contract Price (excluding Fee under paragraph 11.11).

8.7.2. Constructive Suspension of Work – If performance of all or any part of the Work is, for an unreasonable period, deferred, stopped, slowed down, suspended or interrupted by any other act or failure to act of the **Owner** or **Professional**, or act or event attributable to the **Owner** under the Contract Documents, the **Owner** will negotiate with the **Contractor** or authorize an adjustment in Contract Time and/or Contract Price (excluding Fee under paragraph 11.11.1) for any increase in the time required to complete the Work and/or the **Contractor's** cost of performance.

8.7.3. Suspension of Work Limitation – No adjustment in Contract Price under paragraphs 8.7.1 or 8.7.2 shall be made to the extent performance is delayed by any other cause, including any act or omission within the control of the **Contractor**. Further, no suspension of Work shall justify an increase in Contract Price or Contract Time unless the resulting Delay exceeds the time allowed in the Contract Documents for the act or failure to act.

8.7.4. If the **Contractor** believes a suspension of Work justifies an increase in Contract Price or Contract Time, the **Contractor** shall give prompt written notice to the **Owner** and submit a written proposal promptly after the extent of the Delay becomes known. However, no proposal or claim by the **Contractor** on account of a suspension of Work shall be allowed (a) for any Delay or costs incurred more than thirty (30) Calendar Days before the **Contractor** gives written notice (except for written orders under paragraph 8.7.1), or (b) if made after final payment.

8.8 Sharing of Total Float On Non–Critical Paths:

8.8.1. If the Progress Schedule is in the form of a Critical Path Schedule, Total Float on non-Critical Paths shall be available to the **Owner**, to the extent the **Owner's** use is reasonable given the Total Float remaining for the Work affected. If any such **Owner's** use of Total Float causes Delay which materially increases the **Contractor's** cost to complete the Work affected, and the **Contractor** notifies the **Owner** in writing and proceeds to support the assertion to the **Owner's** satisfaction, the **Owner** will correspondingly adjust Contract Price for any such material changes in the **Contractor's** cost to complete the Work.

8.8.2. The amount of Total Float available in the Progress Schedule shall not be artificially reduced by suppressing Total Float merely for the sake of voiding Total Float. Total Float hidden through the use of such techniques as preferential sequencing; slow or late starts of follow-on trades; restraining a Contract Time by Work actually required for a later Contract Time; the use of small crews, extended durations, imposed dates; and so forth, shall be Total Float otherwise available for sharing with the **Owner** under the provisions of paragraph 8.8.1.

ARTICLE 9 WARRANTY; TESTS, INSPECTIONS AND APPROVALS; CORRECTION OF WORK

9.1 Warranty:

9.1.1. The **Contractor** warrants to the **Owner** that all Work will conform to the Contract Documents and will not be Defective. Reasonably prompt notice of Defective Work of which the **Owner** or **Professional** has actual knowledge shall be given to the **Contractor**, but failure to do so will not void the **Contractor's** warranty unless actual prejudice results from such untimely notice. The **Contractor's** warranty excludes defect or damage caused by (a) abuse, modification by others, insufficient or improper operation or maintenance, or (b) normal wear and tear under normal usage.

9.1.2. Manufacturer warranties for materials and equipment received by the **Contractor** shall be assigned and promptly delivered to the **Owner**. Manufacturer warranties shall be in full force and effect for the entire duration of the Correction Period.

9.2 Tests, Inspections and Approvals:

9.2.1. The **Owner**, **Professional**, their representatives and consultants, testing agencies and those State agencies and Political Subdivisions with jurisdiction shall be permitted access to the Work at reasonable times while the Work is in progress for On-Site Inspection and/or inspection, testing or approval. The **Contractor** shall provide proper and safe conditions for such access. The **Contractor** shall give the **Professional** timely notice whenever any Work is ready for inspections, tests or approvals, so that the **Professional** may observe such inspections, tests or approvals. Tests, inspections or approvals shall not in any way relieve the **Contractor** from the **Contractor's** obligations to perform the Work in accordance with the Contract Documents or warrant the Work as provided in the Contract Documents.

9.2.2. Unless otherwise provided in Section 00800 Supplementary Conditions, the **Owner** will retain a testing agency, directly or through the **Professional**, to perform inspections, tests or approvals required by the Contract Documents. The **Owner** will pay the charges of the testing agency, except if related to tests, inspections or approvals required by Law or otherwise charged to the **Contractor** under the provisions of paragraph 9.2.4 or 9.3.

9.2.3. The **Contractor** shall assume full responsibility for any testing, inspection or approval (a) required by Law, (b) indicated in or required by the Contract Documents, or (c) required for the **Professional's** acceptance of a Supplier, materials or equipment or mix designs submitted for prior approval by the **Contractor**. The **Contractor** shall (a) pay all related costs, except costs assumed by the **Owner** under paragraph 9.2.2, (b) schedule related activities, and (c) secure and furnish to the **Professional** the required certificates of inspection, testing or approval.

9.2.4. The **Contractor** shall be responsible for any testing, inspection or approval that reveals Defective Work, including an appropriate portion of the Delay and costs occasioned by such discovery of Defective Work. Examples of such costs assumed by the **Contractor** include, but are not limited to, charges of the **Professional** for repeated On-Site Inspections and, to the extent designated in the pertinent Specification, repeat testing, inspection or approval charges by testing agencies.

9.3 Uncovering Work:

9.3.1. Any Work covered without the **Professional's** prior written concurrence shall, when requested by the **Professional**, be uncovered, exposed or otherwise made available for On-Site Inspection, testing, inspection or approval as the **Professional** may require, and replaced, if necessary. This requirement applies to Work, which requires On-Site Inspection by the **Professional**, based on the Contract Documents or on specific On-Site Inspection procedures of which the **Professional** notifies the **Contractor** in advance. This requirement also applies to Work, which is to be inspected, tested or approved by others. The **Contractor** shall be responsible for any such uncovering, exposure, On-Site Inspection, testing, inspection and satisfactory reconstruction, including an appropriate portion of the Delay and costs, unless the **Contractor** gave the **Professional** timely written notice of the **Contractor's** intentions to cover such Work and the **Professional** failed to act with reasonable promptness in response to such written notice.

9.3.2. The **Contractor**, at the **Professional's** request, shall uncover, expose or otherwise make available for On-Site Inspection, inspection, testing or approval any covered Work otherwise not required to be observed or inspected, tested or approved before covering, if the **Professional** determines that such covered Work shall be on-site inspected by the **Professional** or inspected, tested or approved by others. The **Contractor** shall be responsible for any such uncovering, exposure, On-Site Inspection, inspection, testing and satisfactory reconstruction, including an appropriate portion of the Delay costs, whenever any such uncovered Work is found to be Defective. If, however, any such Work uncovered at the **Professional's** request is not found Defective, the **Owner** will amend the Contract Documents to provide for a corresponding adjustment in Contract Price and/or Contract Time.

9.4 Correction of Work:

9.4.1. Before the Correction Period – If required by the **Professional**, the **Contractor** shall correct all Defective Work, whether fabricated, installed or completed or not. If any Work is rejected by the **Professional** or if any testing, inspection or approval reveals Defective Work, the **Contractor** shall promptly, as directed, remove the Defective Work from the site and replace it with non-Defective Work. The **Contractor** shall bear responsibility for its proportionate share of the Delay and costs resulting from the correction and/or the removal and replacement of Defective Work.

9.4.1.1. If the **Contractor**, within reasonable time after receipt of written notice, (a) fails to correct Defective Work or remove and replace rejected Work, or (b) fails to correct or complete items on any Punch List, or (c) fails to perform Work in accordance with the Contract Documents, or (d) fails to comply with any other provision of the Contract Documents, the **Owner**, after seven (7) Calendar Days' written notice to the **Contractor**, may correct and remedy the deficiency. To the extent necessary to correct and remedy such deficiency, the **Owner** shall be allowed to exclude the **Contractor** from all or part of the site; take possession of all or part of the Work and stop related operations of the **Contractor**; take possession of the **Contractor's** tools, plant and office and construction equipment at the site; and incorporate into the Work materials and equipment for which the **Owner** has paid the **Contractor**. The **Contractor** shall allow the **Owner** and

Professional access to the site as the **Owner** may require to complete corrective and remedial action. The **Owner** shall be entitled to an appropriate decrease in Contract Price for all claims, costs, losses, damages and Delay incurred or sustained by the **Owner** which are attributable to the **Contractor**. Costs assumed by the **Contractor** under this provision include, without limitation, costs of correction or removal and replacement of Defective Work, costs of repair and replacement of other work destroyed or damaged by the action and related charges of the **Professional**.

9.4.1.2. Instead of requiring correction or removal and replacement of any Defective Work, the **Owner**, with the advice of the **Professional**, may prefer to accept any Defective Work. In any such case, the **Contractor** shall bear its proportionate share of the Delay and costs associated with the **Owner's** determination to accept the Defective Work. If the **Owner's** acceptance of the Defective Work takes place before the **Professional's** recommendation of final payment, a Change Order will be issued incorporating the necessary revisions in the Contract Documents, and the Contract Price shall be adjusted accordingly.

9.4.2. Correction Period – The Contract Documents provide for one Correction Period for the entire Work, whether Partial Use of any portion of the Work is designated as eligible by the Contract Documents or not. The Correction Period shall start on the date of Substantial Completion of the Work, or on a later date, if so provided in the Contract Documents. The Correction Period shall last one year, or longer, if so specified in the Contract Documents.

9.4.3. Correction of Work During the Correction Period – The **Contractor** shall correct Defective Work or, if rejected by the **Owner**, remove from the site and replace any Defective Work with non-Defective Work. The **Contractor's** corrective action shall be in accordance with the **Owner's** written instructions, and shall be accomplished at the **Contractor's** sole expense. If the Defective Work causes an Emergency or unacceptable risk of loss or damage, the **Contractor** shall take immediate action to correct or remove and replace the Defective Work.

9.4.3.1. If the **Contractor** fails to take corrective action in accordance with the terms of any such **Owner** written instruction, the **Owner**, directly or through others under contract with the **Owner**, may correct or remove and replace the Defective Work. In any such case, the **Contractor** shall bear its proportionate share of all resulting claims, costs, losses and damages. If the **Owner** and the **Contractor** are unable to agree as to the amounts due by the **Contractor** to the **Owner** under the provisions of this paragraph, the **Owner** may deliver a claim, in accordance with the procedures and within the deadlines set forth in Article 15. If the discovery of the Defective Work takes place after final payment and the **Contractor** fails to pay the **Owner** any of the amounts due under the provisions of this paragraph, the **Owner** shall demand due performance under Section 00610 Performance Bond and Article 14 or deliver a claim, in accordance with the procedures and within the deadlines set forth in Article 15, or both.

9.4.4 After the Correction Period – Until the period of limitation provided by Michigan Law, the **Contractor** shall promptly correct Defective Work upon receipt of written notice from the **Owner**. If appropriate under the circumstances or, in the event of an Emergency or unacceptable risk of loss or damage, the **Owner**, directly or through others under contract with the **Owner**, may correct or remove and replace the Defective Work.

9.4.5. It is not the intent of paragraph 9.4 or paragraph 9.5 to establish a period of limitations for the **Contractor's** warranty or to limit the obligations of the **Contractor** to warrant that the Work will not be Defective. The specified correction of Work requirements relate only to the specific obligation of the **Contractor** to correct or remove and replace Defective Work. The specified correction of Work requirements have no limitation on the rights of the **Owner** to have Defective Work corrected or removed and replaced, if rejected, except as otherwise provided by Michigan Law.

9.5 Special Correction Period Requirements:

9.5.1. Whenever the **Owner** undertakes Partial Use of any portion of the Work specifically designated as eligible for Partial Use in the Contract Documents, the warranties for all materials and equipment incorporated into that portion of the Work shall remain in full force and effect between the start of such Partial Use and the date when the Correction Period starts. If no separate price for such special correction period was requested in Section 00300 Bid Form and made part of the Contract Documents, the **Owner** will appropriately adjust the Contract Price.

9.5.2. Whenever the **Owner** undertakes Partial Use of any portion of the Work because any act or omission within the control of the **Contractor** Delays completion of the Work, or any portion of the Work, within a designated Contract Time, the warranties for all materials and equipment incorporated into that portion of the Work shall, at no adjustment in Contract Price, be maintained in full force and effect between the beginning date of such Partial Use and the date when the Correction Period stars.

9.5.3. The correction period for any Defective Work that is corrected or rejected and replaced within the last three (3) months of the Correction Period shall be extended by an additional six (6) months, starting on the date such Work was made non-Defective.

9.5.4. The Contract Documents may require the Correction Period to start on a date later than the date of Substantial Completion of the entire Work. If such is the case, and the **Owner** advances or defers the start of the Correction Period, the **Contractor** shall maintain the warranties for materials and equipment until the revised starting date of the Correction Period. If no separate price for such advance or deferment was requested in Section 00300 Bid Form and made part of the Contract Documents, the **Owner** will amend the Contract Documents to appropriately adjust the Contract Price.

9.6 Special Maintenance Requirements:

9.6.1. If the Contract Documents specify that the entire Work, or a portion of the Work, upon reaching Substantial Completion, shall not be placed in use by the **Owner**, the **Contractor** shall maintain the Work, or specified part of the Work, in good order and proper working condition and shall take all other actions necessary for its protection between the certified date of Substantial Completion and the date when the Work, or designated part of the Work, is placed in use.

9.6.2. If no separate price for such special maintenance period was requested in Section 00300 Bid Form and made part of the Contract Documents, the **Owner** will amend the Contract Documents to appropriately increase the Contract Price.

ARTICLE 10 CHANGES

10.1 Changes in the Work:

10.1.1. Changes in the Work – The **Owner** is entitled to make changes within the general scope of the Work consisting of (a) additions, deletions or other revisions in the Specifications and Drawings, any Means and Methods or the **Owner**-furnished lands, equipment, materials or services, or (b) directing acceleration of the Work. Changes in the Work may be accomplished through negotiated, *bilateral* Change Orders or *unilateral* Change Orders or result from any other properly authorized written order from the **Owner** or **Professional** which represents a constructive change.

10.1.2. Negotiated Changes – The **Owner** may negotiate changes in the Work by directing the **Professional** to prepare a Bulletin in numerical sequence describing the change being considered. Upon receiving a Bulletin, the **Contractor** (with the appropriate Subcontractors) shall evaluate the described change and quote the Bulletin. In estimating adjustments in Contract Price and/or Contract Time, the **Contractor** shall follow the provisions, including the breakdown requirements, specified in Article 11.

10.1.3. Constructive Changes – Any written order (including instruction, interpretation, determination, authorization or approval) from the **Owner** or **Professional** that causes a change in the Contract Documents shall constitute a change in the Work, provided the **Contractor** or the **Owner** gives prompt, written notice of a change to the other (with copy to the **Professional**) stating the date, circumstances and source of the change.

10.1.3.1. Upon receipt and evaluation of the written notice, if the **Owner** agrees, with the **Professional's** advice, that a change within the general scope of the Work has been ordered, the **Owner** shall, by Change Order or Change Authorization, correspondingly amend the Contract Documents. If the **Owner** finds that a change within the general scope of the Work has not been ordered, and the **Contractor** disagrees, the **Contractor** may deliver notice of a claim and a claim Submittal in accordance with the procedures and within the deadlines set forth in Article 15.

10.1.3.2. No proposal or claim by the **Contractor** on account of changes under paragraphs 3.2.1 or 10.1.3 shall be allowed for any costs or Delay incurred more than thirty (30) Calendar Days before the **Contractor** gives written notice as required.

10.1.4. Unilateral Changes – If, in negotiations, the **Owner** and **Contractor** are unable to agree on the adjustment in Contract Price or Contract Time corresponding to any change in the Work, the **Owner** may issue a *unilateral* Change Order. Upon receiving any such Change Order, the **Contractor** shall promptly proceed or continue with the Work Involved as required by the Change Order.

10.1.4.1. *Unilateral* Change Orders may adjust Contract Price and/or Contract Time, as the **Owner**, with the advice of the **Professional**, may determine appropriate. Contract Price may be adjusted on a *lump sum* basis or an *actual cost, not to exceed* basis. If the **Contractor** disagrees with the extent of the adjustments in Contract Price and/or Contract Time made by any such *unilateral* Change Order, the **Contractor** may deliver notice of a claim and a claim Submittal in accordance with the procedures and within the deadlines set forth in Article 15.

10.2 Differing Subsurface or Physical Site Conditions:

10.2.1. The Contract Documents make available Authorized Technical Data concerning subsurface site conditions and physical conditions of existing surface and subsurface facilities at the site. Consistent with Section 00100 Instructions to Bidders, except for reasonable reliance on the accuracy of Authorized Technical Data, the **Owner** does not warrant that Authorized Technical Data is necessarily sufficient and complete for the purposes of selecting Means and Methods, initiating, maintaining and supervising safety precautions and programs or discharging any other obligation assumed by the **Contractor** under the Contract Documents.

10.2.2. The **Contractor** or **Owner** shall notify the other in writing if the **Contractor** or **Owner**, respectively, discovers that (I) actual subsurface conditions or latent physical conditions of existing surface and subsurface facilities encountered at the site differ materially from those shown or indicated in the Contract Documents, or (II) unknown subsurface conditions or unknown physical conditions of existing surface and subsurface facilities encountered at the site, of an unusual nature, differ materially from those ordinarily encountered and recognized as inherent in work similar in character to the Work. A written notice from the **Contractor** shall be delivered promptly before the conditions are disturbed and before proceeding with the affected Work. A written notice from the **Owner** shall be delivered promptly after the **Owner** has knowledge of the differing subsurface or physical conditions.

10.2.2.1. Upon receipt or delivery of any such notice, the **Owner** shall investigate the differing conditions asserted. If, with the **Professional's** advice, the **Owner** determines that conditions on which the **Contractor** is entitled to rely do differ materially, the **Owner** will amend the Contract Documents to provide for any changes in the Work and adjustments in Contract Price and Contract Time made necessary by the differing conditions and any resulting Delay which is not reasonably anticipatable under the circumstances and which is attributable to the **Owner** and/or **Professional.** Unless the **Owner** and **Contractor** otherwise agree, no increase in Contract Time shall be made for any suspension of Work made necessary by any differing subsurface conditions, if the suspension of Work lasts less than ten (10) Calendar Days.

10.2.2.2. If the **Owner** determines that the actual conditions encountered and those conditions on which the **Contractor** is entitled to rely do not differ materially, and the **Contractor** disagrees with the **Owner's** determination, the **Contractor** may deliver notice of a claim and a claim Submittal in accordance with the procedures and within the deadlines set forth in Article 15.

10.2.2.3. No proposal or claim by the **Contractor** due to differing site conditions shall be allowed (a) if the **Contractor** knew of their existence before submitting its Bid or if those conditions could have been discovered by any reasonable examinations for which the **Contractor**, as Bidder, was made responsible under the Bidding Requirements, and/or (b) unless the **Contractor's** notice is provided on a timely basis and gives the **Owner** adequate opportunity to investigate the asserted differing site conditions.

10.2.3. The provisions of paragraph 10.2.2 through 10.2.2.3 also shall apply to situations where the **Contractor** or **Owner** discovers that any reference points provided by the **Owner** need correction to enable the **Contractor** to proceed with the Work.

10.3 Responsibilities for Underground Utilities:

10.3.1. The **Contractor** shall comply with 1974 PA 53, as amended, MCL 460.701 et seq., and all other Laws concerning Underground Utilities. In addition, the **Contractor** shall be responsible for immediately notifying the **Owner** of any contact with or damage to Underground Utilities, and for the safety, protection of and repairing of any damage done to any Work and any surface and subsurface facilities. Except as provided under 1974 PA 53, as amended, MCL 460.701 et seq., paragraph 10.3.2 or by any Allowance specific to Underground Utilities, the **Contractor** shall bear an appropriate portion of the Delay and costs relating to the obligations set forth in this paragraph.

10.3.2. Shown or Indicated – If the **Contractor** encounters Underground Utilities shown or indicated (whether in the Contract Documents or those documents itemized in Section 00210 Information for Bidders) that are inaccurately shown or are inaccurately located, responsibility for any damage shall be as provided in MCL 460.701 et seq. To the extent the Drawings and/or Specifications inaccurately show or locate, through error or omission, the actual physical conditions and/or location of existing Underground Utilities (when compared with the information and data provided by the owners of such Underground Utilities), the **Owner** will amend the Contract Documents to provide for a corresponding adjustment in Contract Price and/or Contract Time.

10.3.3. Not Previously Located – If the **Contractor** encounters not previously located Underground Utilities, which could not reasonably have been foreseen, the **Owner** will amend the Contract Documents to provide for any changes in the Work and corresponding adjustments in Contract Price and/or Contract Time made necessary by such changes in the Work and by any resulting Delay which is not reasonably anticipatable under the circumstances and which is attributable to the **Owner** and/or **Professional.**

10.4 Hazardous Material Conditions:

10.4.1. The **Contractor** shall use, handle, store, dispose of, process, transport and transfer any material considered a Hazardous Material in accordance with all federal, State and local Laws. If the **Contractor** encounters material reasonably believed to be a Hazardous Material and which may present a substantial danger, the **Contractor** shall immediately stop all affected Work, give written notice to the **Owner** of the conditions encountered, and take appropriate health and safety precautions.

10.4.2. Upon receipt of the written notice, the **Owner** will investigate the conditions. If (a) the material is a Hazardous Material that may present a substantial danger and which was not described in the Drawings and/or Specifications, or identified in the Contract Documents as Work under the Contract Documents, and (b) the Hazardous Material was not brought to the site by the **Contractor**, or does not result in whole or in part from any violation by the **Contractor** of any Laws covering the use, handling, storage, disposal of, processing, transport and transfer of Hazardous Materials, the **Owner** shall order a suspension of Work in writing. The **Owner** shall proceed to have the Hazardous Material removed or rendered harmless by negotiating a change in the Work with the **Contractor**, by means of separate contract or as the **Owner** may deem otherwise expedient. In the alternative, the **Owner** shall terminate the affected Work or the Contract for the **Owner's** convenience.

10.4.3. Once the Hazardous Material has been removed or rendered harmless by any of the means outlined in paragraph 10.4.2, the affected Work shall be resumed as directed in writing by the **Owner**. Any determination by the Michigan Department of Community Health and/or the Michigan Department of Environmental Quality (whichever is applicable) that the Hazardous Material has either been removed or rendered harmless shall be binding upon the **Owner** and **Contractor** for the purposes of resuming the Work. If any such incident with Hazardous Material results in Delay not reasonable anticipatable under the circumstances and which is attributable to the **Owner** or **Professional**, the **Owner** will amend the Contract Documents to provide for a corresponding adjustment in Contract Price or Contract Time, or both, made necessary by such Delay.

10.4.4. If the Hazardous Material was brought to the site by the **Contractor**, or results in whole or in part from any violation by the **Contractor** of any Law covering the use, handling, storage, disposal of, processing, transport and transfer of Hazardous Materials or from any other act or omission within its control, the **Contractor** shall bear its proportionate share of the Delay and costs involved in cleaning up the site and removing and rendering harmless the Hazardous Material to the satisfaction of the **Owner**, State and all Political Subdivisions with jurisdiction. If the **Contractor** fails to proceed with due diligence to take appropriate action pursuant to applicable Law and consistent with the **Owner** requirements, the **Owner** may act accordingly, in which case the **Contractor** shall defend, indemnify and hold harmless the **Owner** from and against all claims, as construed in paragraph 1.4, arising from the **Owner's** exercise of such appropriate action.

10.5 Incidents with Archaeological Features:

10.5.1. The **Contractor** shall at once notify in writing the **Owner** of any Archaeological Feature deposits that are encountered or unearthed during the execution of the Work. The **Contractor** shall protect the deposits in a satisfactory manner and no further disturbance of the Archaeological Features shall take place until Work is allowed to be resumed in the affected areas.

10.5.2. If the **Owner**, with the advice of the **Professional**, concludes that the Contract Documents require changes because of Archaeological Features encountered, the **Owner** will amend the Contract Documents to provide for any changes in the Work and corresponding adjustment in Contract Price and/or Contract Time made necessary by the changes due to the Archaeological Features encountered and by any resulting Delay which is not reasonably anticipatable under the circumstances, and which is attributable to the **Owner** and/or **Professional.**

10.6 Unit Price Work:

10.6.1. If the Contract Documents specify Unit Price Work, the Contract Price shall contain the sum of each unit price times its estimated quantity. The **Contractor** shall be responsible for completing, within the Contract Times, one hundred twenty (120%) of the estimated quantities of Specified Unit Price Work and reasonable quantities of Contingent Unit Price Work.

10.6.2. The **Contractor** shall promptly, before proceeding with any affected Unit Price Work, deliver a written notice to the **Professional** (a) whenever actual quantities for an item of Specified Unit Price Work differs materially from those estimated and request an adjustment in the estimated quantity, or (b) requesting authorization to provide any or differing quantities of any item of Contingent Unit Price Work. The **Contractor** or the **Owner** shall submit to the other and the **Professional**, a proposal for adjusting that item's unit price and/or the Contract Time. The proposal shall be properly substantiated.

10.6.2.1. Promptly after being notified by the **Contractor**, the **Professional** will evaluate the affected Unit Price Work and provide its determination to the **Owner** and **Contractor**. If the **Owner** adjusts the estimated quantity of Specified Unit Price Work or authorizes any, or any additional, quantities of Contingent Unit Price Work, the **Contractor** shall proceed with that Unit Price Work as directed by the **Professional.** The **Contractor** shall proceed with the Unit Price Work regardless of whether the **Owner**, after conferring with the **Professional** determines that a variation in quantity justifies an adjustment in the unit price, or that the existing unit price is valid for the additional or reduced quantities, or that no adjustment in the Contract Time is warranted. In the event the **Contractor** disagrees with any such determination, the **Contractor** shall deliver a notice of claim and a claim submittal in accordance with the procedures and within the deadlines set forth in Article 15.

10.6.2.2. Any adjusted Unit Price agreed upon by the **Owner** will only apply to the actual quantities above one hundred twenty percent (120%) or to the actual quantities less than eighty percent (80%) of the estimated quantity. For additional quantities over one hundred twenty percent (120%) or reduced quantities below eighty percent (80%) of the estimated quantity, the **Owner** may negotiate a Unit Price with the **Contractor**, or direct a unilateral change as provided by Article 10, or rebid that Work. In no case however, will a Unit Price change resulting from a reduction in quantity be renegotiated such that the changed Unit Price produces a modified Bid Price for any line item that exceeds the initial Bid Price for that line item.

10.6.3. No adjustment due to quantity variations shall be allowed (a) unless the **Contractor** met the notice requirements of paragraph 10.6.2, (b) to the extent that the Bid Price for a line item will increase due to reduced quantities at a higher unit, (c) for under runs in any quantities of Contingent Unit Price Work, unless the unit price times the estimated quantity exceeds the lesser of $50,000.00 or two percent (2%) of the Contract Price, or (d) if any unit price increase results in whole or in part from any act or omission within the control of the Contractor (errors in the Contractor's Bid, unbalanced unit prices, etc.).

10.7 Cash Allowances; Provisionary Allowances:

10.7.1. The **Contractor** shall obtain the **Professional's** written acceptance before providing materials, equipment or other items covered by a Cash Allowance. Payments under a Cash Allowance shall be on actual costs, and exclude costs for supervision, handling, unloading, storage, installation, testing, etc., which shall be considered to be included within other elements of the Contract Price. Payments within the limits of an Allowance shall exclude Fee and Bond and insurance premiums, since these are already included within other elements of the Contract Price.

10.7.2. The **Contractor** shall complete Work covered by Provisionary Allowances as approved in writing by the **Owner** and directed by the **Professional**. The Cost of the Work Involved for Work authorized under any Provisionary Allowance shall be determined pursuant to Article 11, except that payments within the limits of any Allowance shall exclude Bond and insurance premiums under paragraph 11.8.1.5, since these costs are already included within other elements of the Contract Price.

10.8 Change Orders; Change Authorizations:

10.8.1. The terms "Change Order" and "Change Authorization" are defined in Section 00020 Glossary. Further, Division 1 includes prototype Change Order and Change Authorization forms which shall be used by the **Owner** and **Contractor** in connection with modifications to the Contract.

*10.8.2. A *bilateral* Change Order which does not incorporate a **Contractor** reservation of rights to claim additional adjustments, shall memorialize the **Owner's** and **Contractor's** agreement as to the adjustments in Contract Price and/or Contract Time made by the Change Order. Any such *bilateral* Change Order shall constitute an all inclusive settlement for all changes, Delay and costs, whatsoever, and the **Contractor's** signature on the Bulletin and proposal incorporated into that Change Order represents a waiver of all rights to file a subsequent proposal or a claim under Article 15 on account of that Change Order or the Work.

10.8.3. A presumed *bilateral* Change which includes a proposal signed by the **Contractor** with a reservation to claim additional adjustments shall be regarded as a notice of claim as to those adjustments and shall be pursued as provided in Article 15, except as the **Owner** and **Contractor** may otherwise agree.

10.8.4. A Change Order issued by the **Owner** after unsuccessful Contract Price and/or Contract Time negotiations with the **Contractor** and stating the **Owner's** proposed basis for the necessary adjustments in Contract Price and/or Contract Time shall be a *unilateral* Change Order.

10.8.5. The **Owner** will issue Change Orders to amend the Contract Documents for changes in the Work and for any adjustments in Contract Price or Contract Time agreed to in total or in part by both the **Owner** and **Contractor**; or to correspondingly adjust the Contract Price for Work furnished under Cash Allowances, Work completed that was authorized under Provisionary Allowances and actual quantities of Unit Price Work. Amounts for Work Involved in a Change Order signed by the **Owner** may be included in subsequent Requests for Payment.

10.8.6. The **Owner** may use Change Authorizations (a) to document agreed-upon minor variations in the Work, and/or (b) to document or order changes in the Work not warranting any adjustment in Contract Price or Contract Time. Examples of the second category include, but are not limited to the **Owner's** authorization for drawing payments against a Provisionary Allowance or the **Owner's** consent to quantity variations not increasing the Contract Price.

10.8.7. Before, or in conjunction with, the **Professional's** certification of final payment, an appropriate Change Order will be issued, with the **Professional's** advice, to correspondingly adjust the Contract Price for the value of Work furnished under Cash

Allowances, Work completed that was authorized under Provisionary Allowances and actual quantities of Unit Price Work.

10.8.8. Subject to the provisions of paragraphs 10.8.2 through 10.8.4, it is a requirement of the Contract Documents that all Change Orders duly signed and issued by the **Owner** shall incorporate Bulletins, which are duly signed by the **Contractor**, regardless of whether the **Contractor** uses a reservation of rights.

ARTICLE 11 CHANGES IN CONTRACT PRICE; CHANGES IN CONTRACT TIME

11.1 General Provisions:

11.1.1. Contract Price or Contract Time may be changed only by Change Order duly signed by the **Owner**. Neither Contract Price nor Contract Time may be changed by Change Authorization (subject to the provisions for constructive changes).

11.1.2. **Contractor** proposals for adjusting Contract Price and/or Contract Time shall be due within fifteen (15) Calendar Days after the **Contractor** receives a Bulletin or delivers to the **Owner** a notice of a change or a Delay. Proposals not complying with the requirements of paragraphs 11.1.4 and 11.1.5 shall be returned for resubmission. This turnaround period is of the essence and any Delay in delivering a bulletin or resulting from resubmission of an incomplete Bulletin shall not justify any increase in Contract Price or Contract Time. The **Owner,** in its sole discretion, may extend or shorten the 15–Day period for Bulletin quotations estimated at more than $250,000 or less than $25,000.

11.1.3. The **Professional** will review each **Contractor** proposal, and the **Professiona**l will recommend to the **Owner**, within a reasonable time, whether or not the Bulletin quotation is acceptable. Due to the time required to obtain **Board** and **Director** approvals, a **Contractor** proposal shall be irrevocable for sixty (60) Calendar Days after it is submitted to the **Professional**.

11.1.4. **Contractor** proposals or claims for Work Involved shall detail all affected items of Work, whether increased, revised, added or deleted, and shall be fully documented and itemized as to (a) individual adds and deducts in Work quantities and labor manhours; (b) corresponding itemized Cost of Work Involved (paragraphs 11.4 through 11.9; and (c) Fee. Proposals or claims including Fee of five percent (5%) for Work Involved of a Subcontractor shall nominate the performing Subcontractor and enclose the Subcontractor's pricing data, if available.

11.1.5. For **Contractor** proposals or claims for adjustments in Contract Price arising from Delays (whether or not such Delays extend any Contract Time or any early completion date), the **Contractor's** estimates shall be as comprehensive and detailed as may be appropriate to support the proposal or claim. Examples of germane information include labor productivity, labor manpower levels, production data and Progress Schedule revisions.

11.1.6. If the **Contractor's** surety(ies) requires notice of any adjustment in Contract Price and/or Contract Time, whether made pursuant to Article 11 or otherwise; any "or equal" material or equipment or substitution approved by the **Professional**; any change within the scope of Article 10; or any other addition, deletion or revision in the requirements of the Contract Documents, whether made by Change Order or Change Authorization, it shall be the **Contractor's** responsibility, and not the **Owner's**, to give notice to the **Contractor's** surety(ies). It is agreed that none of these modifications to the Contract Documents and/or the Work shall invalidate the Agreement.

11.2 Changes in Contract Time:

11.2.1. An extension in Contract Time will be justified only to the extent that the **Contractor** demonstrates, with comprehensive and detailed documentation, that the Delay is not reasonably anticipatable under the circumstances, is not caused by act or omission within the control of the **Contractor**, and, furthermore, that the Delay necessarily extends the Work, or portion of the Work in question, beyond the pertinent Contract Time. If the **Owner** determines that the **Contractor's** documentation is insufficient to allow a thorough evaluation of the time extension request, the **Contractor** shall further support the request through a detailed analysis of the Progress Schedule Revision Submittal.

11.2.2. Examples of events that may justify an extension in Contract Time include acts of God or the public enemy; acts of the U.S. Government, the State or a Political Subdivision, each acting in its public capacity (including acts as permitting agency); acts of a Public Utility acting in its public capacity; fires, floods, epidemics, quarantine restrictions; strikes, freight embargoes; unusual weather (unusual in the sense of frequency or severity vis-à-vis the prior five (5) year average); unusually severe shortages of construction materials (considering all feasible sources of supply); Underground Utilities which the Contract Documents, through error or omission, inaccurately show or indicate; Underground Utilities not previously located; objection, for the **Owner's** convenience, to a nominated Subcontractor; Archaeological Features; suspension of Work; changes in the Work, differing site conditions; variation in quantities; and Delay, as provided in this paragraph, of Subcontractors or Suppliers, at any tier, not caused in whole or in part by any act or omission within the control of both the **Contractor** and any such Subcontractors and Suppliers.

11.2.3. If upon evaluation of the **Contractor's** analysis, the **Owner** approves an extension in Contract Time for Delay not caused in whole or in part by any act or omission within the control of the **Owner** and/or **Professional**, the **Owner** shall authorize the necessary adjustment in Contract Time *only*. If the **Owner** approves an extension in Contract Time for Delay caused in whole or in part by any act or omission within the control of the **Owner** and/or **Professional**, the **Owner** shall authorize the necessary adjustments in Contract Time and Contract Price.

11.3 Methods for Making Adjustments in Contract Price:

11.3.1. The method to be used to determine any adjustment in Contract Price shall be selected by the **Owner** from one of the methods in paragraph 11.3.1.1 through 11.3.1.3, or otherwise shall be limited to the methods in paragraph 11.3.1.4 or 11.3.1.5.

11.3.1.1. If any Work Involved is covered by lump sum prices or unit prices contained in the Contract Documents, those prices shall be used (subject to the terms and conditions of paragraph 10.6 Unit Price Work). In the latter case, the unit prices shall be applied to the quantity of Unit Price Work Involved.

11.3.1.2. If any Work Involved is not covered by lump sum or unit prices contained in the Contract Documents, then application of a lump sum price may be negotiated using the **Contractor's** itemized estimate of the *anticipated* Cost of the Work Involved, as specified in this Article, and a Fee for the Work Involved, as specified in paragraph 11.11.1.

11.3.1.3. If the Work Involved is not covered by the first two methods, the **Owner** may direct the **Contractor** to proceed with the Work Involved on an *actual cost* basis, with or without a guaranteed maximum, based on an itemized breakdown of the *actual* Cost of the Work Involved, as specified in this Article, and a Fee for the Work Involved, as specified in paragraph 11.11.2.

11.3.1.4. If the Work Involved is not covered by the first two methods, the **Owner** may direct the **Contractor** to proceed through a *unilateral* Change Order on a lump sum basis or a not-to-exceed basis, based on the **Professional's** estimate of the anticipated Cost of Work Involved and a Fee for the Work Involved, as specified in paragraph 11.11.1 or 11.11.2.

11.3.1.5. If payment for the Work Involved is to be determined by the Michigan Court of Claims or a AAA arbitration panel, it is agreed by the **Contractor** that the *actual cost* and Fee method in paragraph 11.3.1.3 shall represent the appropriate method for determining such payment.

11.3.2. Items making-up the Cost of the Work Involved shall be allowable to the extent (a) consistent with those prevailing in the Project locality, (b) necessary, reasonable and clearly allocable to the Work Involved, and (c) limited to labor costs, Subcontract costs, material and equipment costs, construction equipment costs and general conditions costs, as specified in this Article.

11.4 Labor, Subcontract and Material/Equipment Costs:

11.4.1. The Cost of any Work Involved includes the **Contractor's** payroll costs for craft workers resident at the site (through crew foremen) assigned to furnishing and incorporating materials and equipment into the Work Involved. If craft labor manhours exceed those that can be gleaned from the Means Cost Data, or other cost guide acceptable to the **Owner**, the **Contractor** shall provide proper justification, which shall be acceptable to the **Professional**.

11.4.1.1. Payroll costs shall include wages, labor burdens and a factor for field supplies and purchase costs (less market value if not consumed) of tools not owned by the workers. Labor burdens shall be certified by an authorized financial representative of the **Contractor** and may include social security, unemployment taxes, workers' compensation, health and retirement benefits, vacation and holiday pay. The factor for field supplies and tools (individually valued at less than $1,000.00) shall not exceed four percent (4%) of the wages without burdens, unless the **Contractor** furnishes detailed data which supports a higher factor. For actual payroll costs, **Contractor** time sheets verified by the **Professional** and/or certified payrolls shall be the only valid Records. For actual payroll costs under paragraph 11.3.1.5, time sheets shall be valid only if they expressly correlate to the Work Involved and were recorded at that time and/or used for certified payrolls.

11.4.2. The Cost of the Work Involved includes the **Contractor's** costs for the labor costs, (lower tier) Subcontract costs, material and equipment costs and general conditions costs of Subcontractors nominated for the Work Involved. Except for a higher six percent (6%) limit on the factor for field supplies and small tools, the methods for calculating Subcontractors' costs shall be the same as those for **Contractor** costs, except that the term "Subcontractor" shall replace the term "**Contractor**," context permitting. If the **Owner** and **Contractor** agree in advance, the **Contractor** shall obtain detailed quotations and shall nominate at least two (2) Subcontractors, acceptable to both the **Contractor** and **Professional**, for selection by the **Owner**.

11.4.3. The Cost of any Work Involved includes the **Contractor's** costs for materials and equipment, including transportation, storage and necessary Suppliers' field services. All trade discounts, rebates and refunds and returns from surplus sales that can be realized at the time of pricing shall accrue to the **Owner**, and the **Contractor** shall make arrangements so that they may be obtained. If the Bulletin for the Work Involved *lists* specific Suppliers, the **Contractor** shall obtain written quotations from them and shall nominate one of the *listed* Suppliers to allow a comprehensive review of the proposal by the **Professional**. Invoices segregating items relating to the Work Involved shall be valid Records in support of actual Supplier costs.

11.5 Construction Equipment Costs:

11.5.1. The cost of any Work Involved includes costs for individual construction equipment with replacement value in excess of $1,000.00. Transportation, loading and unloading, installation, dismantling and removal and shipping costs shall be allowed to the extent required by the Work Involved and reasonable under the circumstances. Equipment costs shall cease when the equipment is no longer needed for the Work Involved. Payroll costs for labor operating the equipment are as specified in paragraph 11.4.1. Equipment costs shall be computed using the same accounting and estimating rules and prices, whether related to added or deleted Work.

11.5.2. When determining actual construction equipment costs (a) under paragraph 11.3.1.3, daily logs of the equipment, operators and actual usage, verified by the **Professional**, shall be the valid Records; (b) under paragraph 11.3.1.5, such daily Records shall be valid only if developed when any such Work Involved was performed and used for accounting purposes.

11.5.3. Rented (or owned) equipment, idled solely by actions of the **Owner** or **Professional**, shall be paid at the rate for rented equipment (or at fifty percent (50%) of the rate for owned equipment) provided the idle period exceeds what is normal for the equipment and occurs during normal working hours.

11.6 Rented or Leased Construction Equipment:

11.6.1. Construction equipment rented or leased from third parties shall be priced using the rates negotiated between the **Owner** and **Contractor**. If no agreement is reached, those rates listed in the Rental Rate "Blue Book" published by Primedia Information Inc. of San Jose, Ca, for the region where the Project is located applicable to the equipment (model number and year) shall be used. For equipment leased or rented on an hourly basis, the rate for second or third shifts shall not exceed fifty percent (50%) of the base rate. Operating costs shall not exceed the hourly operation rate in the Blue Book. Hourly rates for equipment previously in use at the site for a month or longer shall use the

monthly rate divided by 176 hours. Equipment previously in use for only one week or not previously in use at the site shall be invoiced to the **Owner** using the following schedule of equipment use:

Less than 8 hours	Hourly Rate
1 Day but less than 7 Calendar Days	Daily Rate
1 week but less than 30 Calendar Days	Weekly Rate
30 Calendar Days or more (when in use)	Monthly Rate

11.7 Owned Construction Equipment:

11.7.1. Construction equipment owned by the **Contractor**, or rented or leased from lessors associated with or owned by the **Contractor**, shall be priced using the rates negotiated between the **Owner** and **Contractor** based on the **Contractor's** normal accounting practices. If no agreement is reached, the hourly rates in the "Contractor's Equipment Cost Guide," published by Primedia Information Inc. for the region where the Project is located shall be used. Operating costs shall not exceed the hourly operation rate in the Blue Book. For multiple shifts, rates shall not exceed the shift Work adjustments recommended in the Cost Guide.

11.8 General Conditions Costs:

11.8.1. The Cost of any Work Involved may include necessary general conditions costs to the extent those costs increase or decrease on account of, or are directly attributable to, the performance of Work Involved, or are required due to an extension in Contract Time or Delay under paragraph 11.13.5. Categories of general conditions which are allowable under this paragraph (subject to the provisions of paragraph 11.9) include:

11.8.1.1. To the extent agreed to in advance by the **Owner**, payroll costs for the **Contractor's** project manager or construction manager, but not both, for Work activities conducted at the site;

11.8.1.2. Payroll costs for the **Contractor's** superintendent and full-time general foremen, if any are assigned to the Work, for Work Involved performed beyond normal working hours and/or to the extent those costs and subsistence expenses arise solely from an extension in Contract Time or Delay under paragraph 11.13.5;

11.8.1.3. If agreed to in advance by the **Owner**, payroll costs for management personnel resident and working at the site and for workers not covered under paragraph 11.4.1, resident at the site and engaged as support workers (i.e., loading/unloading, clean-up, etc.) to workers covered under paragraph 11.4.1;

11.8.1.4. Costs of office and temporary facilities at the site, including office materials, office supplies, office equipment, minor expenses, utilities, fuel, sanitary facilities, and telephone service at the site, provided those cost arise solely from an extension in Contract Time or Delay under paragraph 11.13.5;

11.8.1.5. Costs of liability insurance premiums for insurance not included within the labor burdens charged under paragraph 11.4.1, and costs of Bond premiums;

11.8.1.6. Costs of consultants not in the direct employ of the **Contractor**, or Subcontractors not covered under paragraph 11.4.2; to the extent authorized by the **Owner** before proceeding with the Work Involved, and provided that those costs are neither covered by paragraph 11.4 nor excluded by paragraph 11.10; and

11.8.1.7. Taxes on the Work Involved, and for which the **Contractor** is liable; and royalty payments and fees for permits and licenses, provided they relate solely to the Work Involved.

11.9 Limitations on Allowable Costs:

11.9.1. The **Contractor** shall not include as part of the Cost of any Work Involved any construction equipment costs, small tool costs, or general conditions costs that do not increase on account of, or are not directly attributable to, the furnishing and/or performance of any Work Involved. Examples of such unallowable costs include:

11.9.1.1. Charges for **Contractor's** superintendent, general foremen and management personnel assigned full-time to the Work, if the charges relate to Work Involved which does not extend the Contract Time or cause Delay under paragraph 11.13.5, or to Work Involved not performed beyond normal working hours;

11.9.1.2. Fixed percent mark-ups for construction equipment (as opposed to specific construction equipment costs); or

11.9.1.3. Cost of field supplies and/or small tools solely for extensions in Contract Time or Delay under paragraph 11.13.5.

11.9.2. Changes in Contract Price for extensions in Contract Time or Delay under paragraph 11.13.5 shall exclude any costs that are unaffected or do not relate to the extension in Contract Time or the Delay in early completion. Examples include:

11.9.2.1. Operating costs of construction equipment assigned to the Work for the duration, to the extent used in the incorporation of materials and equipment into the Work, provided the equipment is not subject to increased usage because of the extension in Contract Time or the Delay in early completion;

11.9.2.2. Operating costs plus owned/rental costs of construction equipment brought to the site for a specific activity (crane used for specific lifts, concrete pump used for pours, etc.), provided the equipment is not subject to increased usage because of the extension in Contract Time or the Delay in early completion;

11.9.2.3. Construction equipment and site facilities which are fully paid under the Contract Price for the Work, as awarded.

11.9.3. The **Contractor** shall not include as part of the Cost of any Work Involved acceleration costs incurred, for the **Contractor's** benefit, to make-up Delay which warrant extensions in Contract Time but do not justify increases in Contract Price.

11.10 Costs Covered by the Fee for the Work Involved (and not Allowable as Cost of the Work Involved):

11.10.1. **Contractor** administrative costs and home office overhead, whether at the **Contractor's** principal or branch offices, shall not be allowable as elements of the Cost of Work Involved. Rather, those administrative costs and home office overhead shall

be non-reimbursable expenses covered by the Fee for the Work Involved. Examples of administrative costs or home office overhead covered by this provision include, without limitation:

11.10.1.1. Payroll costs and other compensation of executives, general and administrative managers, estimators (except to the extent agreed to in advance by the **Owner**), claim consultants, attorneys, accountants, labor relation coordinators, purchasers, expeditors and other administrative staff, whether resident at the **Contractor's** principal or branch offices;

11.10.1.2. Payroll costs and other compensation of project managers, construction managers, architects, engineers, schedulers, detailers, safety personnel, clerks and other administrative staff not resident at the site and who are not part of the **Contractor's** general conditions personnel contingent;

11.10.1.3. Costs of engineers, architects, accountants, consultants, attorneys and others, in the direct employ of the **Contractor** or otherwise, utilized for services related to a controversy or claim about the acceptability of the Work;

11.10.1.4. Costs incurred in the preparation of Contract Change Orders (whether or not ultimately authorized by the **Owner**), except as otherwise authorized by the **Owner**; and costs incurred in the preparation or filing of claims; and

11.10.1.5. Any interest on the Work Involved, unless otherwise allowed by the Michigan Court of Claims or an arbitration panel; charges for delinquent payments; lost interest on unpaid withholdings; lost profits and lost opportunities; and home office storage and yard facilities.

11.11 Limits on the Fee for the Work Involved:

11.11.1. Any adjustment in Contract Price made by *bilateral* Change Order which stipulates a lump sum price (developed from the **Contractor's** itemized estimate of the *anticipated* Cost of the Work Involved) without incorporating a **Contractor** reservation of rights to claim additional adjustments, shall include a Fee for costs under paragraph 11.10 and for profit, not to exceed the following:

11.11.1.1. For Work Involved to be self-performed by the **Contractor**, the **Contractor's** Fee shall not exceed fifteen percent (15%) of the Cost of the Work Involved. For Work Involved to be performed by any nominated Subcontractor, regardless of tier, the nominated, performing Subcontractor's Fee also shall not exceed fifteen percent (15%) of the Cost of the Work Involved.

11.11.1.2. For Work Involved to be performed by any nominated Subcontractor, the **Contractor's** Fee shall be five percent (5%) of the performing Subcontractor's Cost of the Work Involved, excluding that Subcontractor's Fee. For Work Involved of any nominated lower tier Subcontractor, any corresponding higher tier Subcontractors shall share equally a Fee of five percent (5%) of the performing lower tier Subcontractor's Cost of the Work Involved, excluding the lower tier Subcontractor's Fee.

11.11.2. Any adjustment in Contract Price made by a *bilateral* Change Order (whether based on a *lump sum* or on the *actual cost* of the Work Involved) which incorporates a **Contractor** reservation of rights to claim additional adjustments, shall include a Fee of only two-thirds (2/3) of the Fee otherwise resulting from the application of paragraphs 11.11.1 or 11.11.2.

11.11.3. The credit to be allowed to the **Owner** for any individual change consisting of deletions, or additions and deletions, that yields a negative net Cost of the Work Involved, shall be the amount of the net decrease and, if the negative net Cost of the Work Involved exceeds $10,000.00, a Fee credit of one-fifth of the Fee resulting from the application of paragraphs 11.11.1.1 through 11.11.1.3 shall be added to that amount.

11.11.4. For any change in the Work combining additions, revisions and deletions, one single Fee for the Work Involved shall be added to the net Cost of the Work Involved, unless the change in the Work combines self-performed **Contractor** Work and Subcontractor Work, or Work of more than one Subcontractor, or both, in which case separate Fees for the **Contractor** Work and for the Subcontractor Work shall be calculated, as appropriate.

11.11.6. In the event unrelated changes in the Work are grouped in a Bulletin, or included in a claim, and each of the changes yields a net increase or decrease in the Cost of the Work Involved, the combined Fee for the changes in the Work so grouped shall be computed as the sum of the individual Fees otherwise calculated under paragraphs 11.11.1 through 11.11.5.

11.12 Fee for Unabsorbed Home Office Overhead:

11.12.1. It is intended that the Fee for the Work Involved allowed under paragraph 11.11 shall be included with any adjustment in Contract Price for any Cost of Work Involved. However, the Fee under paragraph 11.11.1 shall not be intended to cover unabsorbed home office overhead resulting from an extension of the Contract Time stated in paragraph 4.1.1 of Section 00500 Agreement. When justified under the Contract Documents, Fee for unabsorbed home office overhead shall be calculated as detailed in paragraph 11.12.2.

11.12.2. If an extension of the Contract Time stated in paragraph 4.1.1 of Section 00500 Agreement and an increase in Contract Price for such an extension in Contract Time is justified under the Contract Documents, the **Owner** shall negotiate with the **Contractor** the reimbursement of an amount for the **Contractor's** home office overhead (under paragraph 11.10) that will be or were unabsorbed before the expiration of that Contract Time. Any such reimbursement shall be based on the lesser of: (a) the product of the ratio of the **Contractor's** home office overhead to its contract billings times the Contract Price in paragraph 3.1 of Section 00500 Agreement that remains unbilled on the expiration of that Contract Time, or (b) that amount derived from the Eichleay formula.

11.13 Changes in Contract Time for Early Completion:

11.13.1. The Contract Times specified in paragraph 4.1 of Section 00500 Agreement represent the **Professional's** best estimate of the time required to complete the Work, and take into account comparisons with completed work similar in scope and character to the Work and constructed under similar conditions.

11.13.2. Since "time is of the essence" in performing this Contract, any early completion Rev. 0 Progress Schedule considered acceptable by the **Owne**r shall be construed as setting forth a corresponding amount of Contract Float, unless the **Contractor** delivers notice of a request for a shortening of the Contract Time within thirty (30) Calendar Days after receiving the **Owner's** written notice of "no objection" to such Rev. 0 Progress Schedule.

11.13.3. If the **Contractor** requests that the Contract Times be shortened to eliminate the Contract Float on any such early completion Progress Schedule, and the **Owner** agrees to the **Contractor's** request, the **Owner** and **Contractor** may negotiate a reduction in the affected Contract Time. Concurrently, the **Owner** will develop a level of liquidated damages appropriate to the revised Contract Time(s) or, if more appropriate under the circumstances, the **Owner** will specify actual damages, applicable from the negotiated, earlier Contract Time to the Contract Time under revision. In such case, the aggregate actual damages shall not exceed the sum liquidated damages that may have resulted from the originally-specified liquidated damages. Such agreement shall be memorialized through an appropriate Change Order.

11.13.4. If the **Owner** and **Contractor** are unable to agree to such reduction in the Contract Times, or the **Contractor** rejects the **Owner's** assessment of liquidated or the stipulation of actual damages, or both, the Contract Times in question shall remain unaltered and the early completion Progress Schedule shall be employed as provided in the Contract Documents.

11.13.5. To the extent that the Progress Schedule supports an early completion date, and a Delay extends performance of the Work beyond the **Contractor's** early completion date but not beyond the corresponding Contract Time, if the **Contractor** pursues an increase in Contract Price for such Delay in early completion, the **Owner** shall consider such request, subject to the following: (a) the early completion is reasonably achievable, i.e., includes proper allowances for weather, **Owner** and **Professional** activities, rework and other foreseeable events within the control of the **Contractor**, (b) the Progress Schedule used to support the request is loaded with Activity manpower data, and (c) the adjustment in Contract Price shall equal fifty percent (50%) of the **Contractor's** Delay costs otherwise allowable under this Article.

11.13.6. As a point of emphasis, under these provisions, an increase in Contract Time and an increase in Contract Price equaling the **Contractor's** costs occasioned by the Delay (as opposed to only fifty percent (50%) of the **Contractor's** Delay costs), shall be justified only if the Delay attributable to the **Owner** and/or **Professional** necessarily extends Substantial Completion of the Work, or the portion of the Work having a specified Contract Time, beyond the correspondingly specified Contract Time.

11.14 Access to Records:

11.14.1. The **Contractor** shall maintain and keep, and shall require all Subcontractors and Suppliers to maintain and keep, in accordance with generally accepted accounting principles, Records pertaining to the bidding, award and performance of the Work, including, but not limited to payroll and employment Records and all data used in estimating the **Contractor's** Bid and in pricing and negotiating Work covered by any Change Order, Change Authorization, proposal or claim.

11.14.2. For changes payable on an *actual cost* basis, or in the event of any claim, dispute, litigation, audit exception or appeal or termination, the **Owner** and any of the **Owner's** duly authorized representatives shall have access to those Records for the purpose of inspection, audit/review and copying. The **Contractor** shall provide appropriate facilities for access promptly after receiving a request. The **Owner** and any of its duly authorized representatives shall have the right to interview **Contractor** employees. The **Contractor** shall make employees available on Business Days between 8:00 AM and 4:00 PM, as requested.

11.14.3. Payroll and other employment Records of workers assigned to the site, including apprentices and trainees, maintained to comply with the requirements of this provision, shall contain the name and address of each worker, correct wage classification, rate of pay (including contributions, or costs assumed to provide, for fringe benefits), daily and weekly number of hours worked, deductions made and actual wages paid. The **Contractor** shall maintain Records that show: (a) the anticipated costs or actual costs incurred in providing such benefits, (b) that the commitment to provide such benefits is enforceable, and (c) that the plan or program is financially responsible and has been communicated in writing to the workers affected.

11.14.4. Access to Records, as prescribed in this paragraph, shall be allowed at any time during the execution of the Work and shall remain in full force and effect for five (5) years after final payment, or termination (in the event of termination), or date of final resolution of any dispute, litigation, audit exception or appeal – whichever event actually applies to this Contract.

11.15 Price Reduction for Defective Cost and Pricing Data:

11.15.1. If at any time during the prosecution of the Work, there is good cause to doubt the **Contractor's** compliance with the Defective Cost and Pricing Data requirements of this paragraph 11.15, the **Owner** shall be entitled to make an appropriate withholding from any payment otherwise owed to the **Contractor**.

11.15.2. Whenever the **Contractor** signs a proposal for a Contract Price or Contract Time adjustment, a Change Order or a claim settlement, the **Contractor** will be deemed to have certified, to the **Contractor's** best knowledge and belief, that the representations made and data submitted in pricing and negotiating the Cost of the Work Involved in that price proposal, Change Order, or claim settlement: (a) were made in good faith and are consistent with the facts, (b) are consistent with the provisions of Articles 10 and 11, and (c) are complete, accurate and current as of the date agreement was reached on the corresponding adjustments in Contract Price and/or Contract Time. This certification shall apply in each and every respect to any Subcontractor and Supplier who signs any cost and pricing data attached to any such a proposal for a Contract Price or Contract Time adjustment, Change Order or claim settlement.

11.15.3. If any adjustment in Contract Price or Contract Time made by any Change Order, claim or dispute settlement was increased by a material and significant amount because the **Contractor**, or any Subcontractor or Supplier, at any tier, made representations or furnished cost or pricing data of any kind that were false, contained math errors or were incomplete, the Contract Price shall be correspondingly reduced by Change Order.

ARTICLE 12 PROGRESS PAYMENTS; FINAL PAYMENT

12.1 Schedule of Values:

12.1.1. The Schedule of Values shall be approved by the **Professional** and divide the Work into pay items for significant Sections and areas, facilities or structures, with subtotals for first tier Subcontractors. If required in Division 1, the Schedule of Values shall be supported by a more detailed breakdown allocating the pay items to the Progress Schedule Activities.

12.1.2. The Schedule of Values shall tabulate labor costs, Subcontract costs and material and equipment costs. Labor costs shall include appropriate sums for construction equipment costs, general conditions costs, administrative costs (paragraph 11.10) and profit, unless separate pay items are itemized for those costs.

*12.1.3. The Schedule of Values shall include the following close-out pay items: (a) two percent (2%) of the Contract Price for Fire Marshall approval, certificate of occupancy and other code approvals, as specified in the Contract Documents, (b) two percent (2%) of the Contract Price for manufacturer warranties, finalized operating and maintenance documentation, **Owner** training documentation, and test and balance reports, and (c) two percent (2%) of the Contract Price to cover finalized Record Documents.

12.2 Requests for Payment:

12.2.1. Once each month, the **Contractor** shall submit to the **Professional** a Request for Payment on the **Owner's** form signed by the **Contractor** certifying Work completed and enclosing all supporting documentation. Each Request for Payment shall certify that all monies owed by the **Contractor** to Subcontractors and Suppliers for which payment previously has been sought has been paid from payments received. No Request for Payment shall include amounts for a Subcontractor or Supplier if the **Contractor** does not intend to use the payments requested, when received, to reduce the **Contractor's** outstanding obligations on the Work.

12.2.2. Payment to the **Contractor**, if approved by the **Owner**, will be made within thirty (30) Calendar Days after the **Owner** receives and approves a certified Request for Payment from the **Professional**. Payment for authorized reimbursable expenses shall be made monthly in the amount incurred before the cut-off date, provided each payment request expense is properly documented in spreadsheet form detailing the information about the request. The **Contractor** will provide a certification in writing that the payment request submittal is true and accurate.

12.2.3. If payment is requested based on materials and equipment stored at the site or at another location agreed to in writing, the Request for Payment also shall be accompanied by (a) consent of surety, (b) a bill of sale, invoice or other documentation warranting that the **Owner** has received the materials and equipment free and clear of all liens, and (c) evidence that the materials and equipment are covered by appropriate property insurance and other arrangements to protect them and the **Owner's** interests. If the documentation provided by the **Contractor** to comply with the intent of this paragraph is unsatisfactory, the **Owner** shall be entitled to withhold an appropriate amount from that Request for Payment until the **Contractor** provides documentation acceptable to the **Owner.**

12.2.4. The **Contractor** warrants and guarantees that title to all Work, materials and equipment covered by any Request for Payment, whether incorporated in the Work or not, will pass to the **Owner** free and clear of all liens no later than at the time of payment by the **Owner** to the **Contractor**.

12.3 Review of Request for Payment; Intent of Review:

12.3.1. Within ten (10) Calendar Days after receipt of a Request for Payment, the **Professional** shall certify to the **Owner** the amount the **Professional** determines to be due, or shall return the Request for Payment to the **Contractor** indicating the reasons for withholding certification. Certification shall be based on the **Professional's** review of the Request for Payment and enclosed documentation, On-Site Inspections and on-site Project representation, if any has been provided. If a Request for Payment is returned to the **Contractor**, the **Contractor** shall make the necessary corrections and resubmit that Request for Payment.

12.3.2. The **Professional's** certification of any Request for Payment constitutes a representation to the **Owner** that the Work has progressed to the point indicated; that to the best of the **Professional's** knowledge, information and belief, the quality of the Work is in accordance with the Contract Documents; and that the **Contractor** is entitled to payment in the amount certified. Any such representation by the **Professional**, however, shall be subject to an evaluation of the Work as a functioning whole before and upon Substantial Completion; to the results of any subsequent tests called for in the Contract Documents; to a final determination of quantities and classifications of Unit Price Work (if any is specified) and to any other qualifications stated in the certification.

12.3.3. In the case of final payment, the **Professional's** certification of final payment and recommendation that the Work is acceptable shall be a further representation that conditions governing final payment to the **Contractor** have been met.

12.4 Refusal to Make or to Recommend Payment:

12.4.1. The **Owner** may withhold from any payment an amount based on the **Professional's** refusal to recommend payment or the **Owner's** estimate of the fair value of items entitling the **Owner** to a withholding. Such may include, but not be limited to liquidated damages, claims made against the **Owner** arising out of or related to the Work, payment claims, or failure by the **Contractor** to reimburse the **Owner** any costs the **Owner** is entitled to recover. The **Owner** will give the **Contractor** reasonably prompt written notice supporting such action.

12.4.2. The **Professional** may refuse to recommend all or any part of any payment, or because of subsequently discovered evidence, inspections or tests or the value of the Punch List, nullify all or any portion of any payment previously recommended, as the **Professional** may consider necessary to protect the **Owner** from loss because (a) the Work is Defective or completed Work has been damaged requiring correction or replacement, (b) the Contract Price has been reduced by Change Order, (c) it has been necessary that the **Owner** correct Defective Work or complete Work, (d) reasonable evidence exists that all or a part of the Work will not be completed within the corresponding Contract Time, (e) of the **Contractor's** failure to comply with all material requirements of the Contract, including, but not limited to the failure to submit Progress Schedule Submittals or Record Documents when due, (f)

stored materials for which payment has been made or is sought has been determined by the **Professional** to be damaged or missing, (g) amounts are requested for a Supplier which is not the Supplier named in the **Contractor's** completed Section 00440 Schedule of Materials and Equipment or a Supplier approved by the **Professional** through an "or equal" or substitution procedure, or (h) the **Professional** reasonably believes or knows of the occurrence of an event justifying termination for cause.

12.5 Request for Final Payment:

12.5.1. The **Contractor** shall complete the Substantial Completion Punch List within the Contract Time and date fixed by the **Professional**. The **Contractor** shall assemble all requisite documentation before requesting final inspection.

12.5.2. Upon written notice from the **Contractor** that the **Contractor** considers the entire Work, or a part of the Work for which final payment is specified in the Contract Documents, to be complete and ready for final payment, the **Professional** will make a final completion inspection with the **Owner** and **Contractor** and notify the **Contractor** in writing of all instances of incomplete or Defective Work revealed by the final inspection. The **Contractor** shall immediately undertake all necessary measure to complete Work in the final completion inspection.

12.5.3. The **Contractor** may request final payment after completing the incomplete or Defective Work to the satisfaction of the **Professional** and delivering final operating and maintenance documentation (with revisions made after Substantial Completion), warranties, inspection certificates, Record Documents (with revisions made after Substantial Completion), release of payment claim forms and all other required documents.

12.5.4. The **Contractor's** request for final payment shall enclose evidence of completed operations insurance and affidavit certifying that the insurance coverage will not be canceled, materially changed or renewal refused except as provided in paragraph 7.4.3, and an affidavit certifying that the surety agrees that final payment shall not relieve the surety of any of its obligations under the Performance Bond and Payment Bond. The **Contractor's** request for final payment shall further include (a) a **Contractor's** "Guarantee and Statement" (available from the **Owner**, form DMB-437) containing a statement of guaranteed indebtedness acceptable to the **Owner** in the full amount of the Contract Price, or a release of payment claims in the form of a release of liens, or a Bond or other security acceptable to the **Owner** to indemnify the **Owner** against any payment claim, and (b) a list of all pending insurance claims rising out of or resulting from the Work being handled by the **Contractor** and/or its insurer.

12.6 Final Payment and Acceptance:

12.6.1. If the **Professional** is satisfied that the Work, or a part of the Work for which separate final payment is specified in the Contract Documents, has been completed and the **Contractor's** other obligations under the Contract Documents have been fulfilled, the **Professional** will, within thirty (30) Calendar Days after receipt of the final payment request, furnish to the **Owner** and **Contractor** the **Professional's** certification of final payment and acceptance. If the **Professional** is not satisfied, the **Professional** will return that request to the **Contractor**, indicating in writing the reasons for not certifying final payment, in which case the **Contractor** shall make the necessary corrections and request that final payment again be considered.

12.6.2. If the **Owner** concurs with the **Professional's** certification of final payment, the **Owner** will, within thirty (30) Calendar Days after receipt by the **Owner** of the **Professional's** certified recommendation of final acceptance, pay the balance of the Contract Price, subject to those provisions governing final payment specified in the Contract Documents. If the **Owner** does not concur with the **Professional's** determination, the **Owner** will return the request for final payment to the **Contractor** indicating in writing the reasons for refusing final payment and acceptance. In that case, the **Contractor** shall make the necessary corrections and shall request that final payment be again considered by the **Owner**. The **Owner's** written determination will be binding upon the **Contractor**, unless the **Contractor** delivers a notice of a claim and a claim Submittal within the deadlines set forth in Article 15.

12.6.3. If final completion of the Work is significantly delayed through no fault of the **Contractor**, the **Owner** may, upon receipt of the **Contractor's** final Request for Payment, and without terminating the Agreement, make payment of the balance due for that portion of the Work fully completed and accepted. Payment of the balance due shall be made under the provisions for final payment, but shall not constitute a waiver of claims.

12.6.4. The **Owner** shall pay with reasonable promptness any amounts deducted from the final payment, upon resolution of the claims justifying withholding of such monies.

12.7 Contractor's Continuing Obligation:

12.7.1. The following does not constitute acceptance of the Work in the event the Work or any Work is not in accordance with the Contract Documents, and therefore does not release the **Contractor** from its obligation to perform and furnish the Work in accordance with the Contract Documents: (a) a certification by the **Professional** of any Request for Payment or final payment; (b) the issuance of a Substantial Completion certificate; (c) any payment by the **Owner** to the **Contractor**; (d) any Partial Use; (e) any act of acceptance by the **Owner** or any failure to do so; (f) any review and approval of a Shop Drawing, sample, test procedure or other Submittal; (g) any review of a Progress Schedule; (h) any On-Site Inspection; (i) any inspection, test or approval; (j) any issuance of a notice of acceptability by the **Professional**; or (k) any correction of Defective Work or any completion of Work by the **Owner**.

12.8 Waiver of Claims:

12.8.1. The making and acceptance of final payment do not constitute a waiver by the **Owner** of any rights as to the **Contractor's** continuing obligations under the Contract Documents, nor will it constitute a waiver of any claims by the **Owner** against the **Contractor** still unsettled, or arising from unsettled payment claims, Defective Work appearing after final inspection or failure by the **Contractor** to comply with the Contract Documents or the terms of any special warranties provided by the Contract Documents or by Law.

12.8.2. The making and acceptance of final payment will constitute a waiver of all claims by the **Contractor** against the **Owner**, other than those claims previously made in writing, on a timely basis in accordance with Article 15, and still unsettled.

ARTICLE 13 OTHER WORK

13.1 Related Work at Site:

13.1.1. During the period allowed for the furnishing and performance and completion of the Work, the **Owner** may undertake other work at the site with its own forces, or have other work performed at the site by other parties (including, but not limited to contractors or Public Utilities). If the Contract Documents do not note the performance of any such other work, written notice will be given to the **Contractor** before starting that work.

13.1.2. Whenever Work to be performed by the **Contractor** interfaces with other work, the **Contractor** shall coordinate that Work with the interfacing work. Paragraphs 13.2 and 13.3 outline representative duties and responsibilities assumed by the **Contractor** under this requirement. Such duties and responsibilities are for the benefit of the parties on the other work to the extent there are comparable provisions for the benefit of the **Contractor** in the contracts between those parties and the **Owner.**

13.2 Coordination Requirements:

13.2.1. If other work is ongoing concurrently with the Work, the **Contractor** shall afford the responsible party proper and safe access to the site. The **Contractor** shall afford the other party a reasonable opportunity for the handling, unloading and storage of their materials and equipment and for the execution of their work.

13.2.2. If any part of the Work, for proper execution or results, interfaces on the work of the **Owner** or another party, the **Contractor** shall inspect and promptly report to the **Professional** in writing conditions in that work that render it unavailable or unsuitable for proper execution and results. The **Contractor's** failure to do so will constitute an acceptance of such other work as fit and proper for integration with the Work except for latent or non-apparent defects and deficiencies in the other work.

13.2.3. The **Contractor** shall do all cutting, fitting, patching and interfacing of the Work that may be required to make any part of the Work come together properly and integrate with other work. The **Contractor** shall not cut, excavate or otherwise alter any other work without prior written consent of the party responsible for such other work. The **Contractor** shall supply, install and/or cause items to be built into interfacing Work, verify dimensions of interfacing Work, and notify the **Professional** of interfacing work that is unsatisfactory for, or prevents satisfactory installation of, any Work. Installation of any Work shall constitute acceptance by the **Contractor** of all previously placed interfacing work.

13.2.4. The **Contractor** shall be responsible for cooperating with the **Professional** fully in the coordination of the **Contractor** Submittals with interfacing submittals of other parties whose work in any way integrates with the Work or vice versa. Any such coordinated Submittal of the **Contractor** shall identify, by specific written notation, Work which integrates with the other work and of which the **Contractor** knows or has reason to know.

13.2.5. If the **Owner** contracts for other work, the **Owner** will have authority and responsibility for coordinating the operations of the **Contractor** and the other work. The **Owner** may delegate the specific authority and responsibility for coordinating the operations of the **Contractor** and of those parties performing the other work to another organization either by provision in Section 00800 Supplementary Conditions or at the pre-construction conference.

13.3 Claims Between the Contractor and Other Parties:

13.3.1. If the **Contractor** causes damage to the work or property of others, or if a claim arising out of the **Contractor's** execution of Work is made by another party against the **Contractor**, **Owner** or **Professional**, the **Contractor** shall promptly attempt to settle with that party by agreement or otherwise resolve the claim. The **Contractor** shall in any event, defend, indemnify and hold harmless the **Owner** and **Professional** from and against all claims, as provided in paragraph 1.4, and/or judgments arising out of or resulting from damage by the **Contractor** to the work or property of others.

13.3.2. If another party causes damage to the Work or property of the **Contractor**, or if the performance of other work results in any claim by the **Contractor**, the **Contractor** shall promptly resolve the issue by agreement or otherwise resolve the claim. The **Contractor** shall not begin any action against the **Owner** (or its departments, agencies, boards, commissions, officers and employees) or **Professional** (or their consultants, agents or any of their directors, officers, shareholders, agents or employees), or permit any action against them to be maintained in the **Contractor's** name or for the **Contractor's** benefit before any court or tribunal, which action seeks to impose liability or recover damages from the **Owner** or **Professional** for such claim.

13.3.3. If the **Contractor** becomes involved in settling or otherwise resolving claims and disputes with other parties performing other work from events covered under paragraphs 13.3.1 or 13.3.2, or because of any other similar controversy, including damage to the Work or other work, or a dispute about responsibility for clean-up or any other issue, neither the **Owner** or **Professional** nor any of their respective consultants, agents, directors, shareholders, officers or employees will be involved in any way in such action (unless subpoenaed or ordered by a court). If the **Owner** incurs costs or damages of the types barred by the provisions paragraphs 13.2.1 and 13.2.2, the **Contractor** shall reimburse those costs and damages to the **Owner**.

13.3.4. Except as excluded in paragraph 13.3.5, if any party performing other work causes Delay upon the Work and if, upon a request from the **Contractor**, the **Owner** determines that any such Delay justifies an increase in Contract Price and/or Contract Time, the **Owner** shall amend the Contract Documents to provide the necessary adjustment in Contract Price or Contract Time, or both.

13.3.5. If a party performing other work is granted an extension in a contract time only (on account of Delay not reasonably anticipatable under the circumstances nor caused, in whole or in part, by any act or omission of the other party, the **Owner**, **Professional** or the **Owner's** representative on that other work), and if, upon a request from the **Contractor**, the **Owner** determines that the time extension granted to the other work requires a change in a coterminous Contract Time in the Contract Documents, the **Owner** shall amend the Contract Documents to provide for the necessary change in Contract Time only.

ARTICLE 14 TERMINATION

14.1 Notice Requiring Assurance of Due Performance:

14.1.1. The **Owner** may request the **Contractor** (with copy to the surety) to provide written assurance of due performance if, at any time, any of the following non-conformances occur, any of which, if not corrected, may justify defaulting the **Contractor**:

14.1.1.1. The **Contractor** fails to complete the Work, or a specified part of the Work, within the corresponding Contract Time; fails or refuses to supply sufficient management, supervision, workers, materials or equipment; or otherwise fails to prosecute the Work, or any specified part of the Work, with the diligence required to comply with the Contract Time(s);

*14.1.1.2. The **Contractor** persistently disregards the authority of the **Professional** or violates or disregards a provision of the Contract Documents or the Laws of any Political Subdivision with jurisdiction; or

14.1.1.3. The **Contractor** admits in writing, or the **Owner** otherwise establishes, the **Contractor's** inability or refusal to pay the **Contractor's** debts generally as they become due; or in response to the **Owner's** demand, fails to provide adequate, written assurance that the **Contractor** has the financial resources necessary to complete the Work within the Contract Time.

14.1.2. Within seven (7) Calendar Days after the **Contractor** receives a notice requiring assurance of due performance, the **Contractor** shall meet with the **Owner** and present the **Contractor's** plan to correct the non-performance with supporting documentation. If the **Owner** determines that the **Contractor's** plan provides adequate assurance of due performance, that determination shall not waive the **Owner's** right to subsequently default the **Contractor** or affect any rights or remedies of the **Owner** against the **Contractor** and/or surety then existing or that may accrue in the future.

14.2 Contractor Default and Termination for Cause:

14.2.1. The **Owner**, after giving the **Contractor** and surety seven (7) Calendar Days' written notice of intent to default, may declare the **Contractor** in default and terminate the services of the **Contractor** for cause upon the occurrence of one or more of the following events:

14.2.1.1. At or after the meeting referred to in paragraph 14.1.2, the **Owner** determines that there is sufficient cause, giving the issues raised, to default the **Contractor;**

*14.2.1.2. The **Contractor** fails to comply with the Michigan Residency requirements (1984 PA 431, as amended, MCL 18.1241a); or is found to be in violation of Section 4 of 1980 PA 278 concerning unfair labor practices, or any nondiscrimination requirements imposed by Law;

14.2.1.3. The **Contractor** violates or breaches any material provision of the Contract Documents which provides contractually for the for cause termination or rescission of the Contract or of the **Contractor's** right to complete the Work;

14.2.1.4. A trustee, receiver, custodian or agent of the **Contractor** is appointed under contract, as opposed to under bankruptcy Law, whose appointment or authority to take over the **Contractor's** property is for the purpose of enforcing a lien against such property or for the general administration of such property for the benefit of the **Contractor's** creditors; or

14.2.1.5. It is determined that gratuities, including, but not limited to entertainment, gifts or donations were given by or on behalf of the **Contractor** to an official, agent, servant or employee of the **Owner** or **Professional** to secure the Contract or favorable treatment with respect to the awarding or amending or the making of any determination relative to the execution of the Work.

14.2.2. Unless otherwise agreed between the **Owner** and **Contractor,** at the expiration of the seven (7) Day (intent to default) period, the **Contractor** shall immediately stop all Work and proceed in accordance with the **Owner**'s instructions. Following receipt, and expiration, of a second seven (7) Day written notice period intended to allow the surety to complete an investigation of the default, the surety shall immediately:

14.2.2.1. If approved by the **Owner, a**rrange for the **Contractor** to continue with performance and prosecution of the Work to completion; or

14.2.2.2. Undertake to perform and complete the Work, in accordance with the Contract Documents, in place of the **Contractor**, either through the surety's agents or by executing Subagreements with qualified contractors (excluding the **Contractor** and any of the **Contractor's** affiliates), or both; or

14.2.2.3. If agreed to by the **Owner**, waive the surety's rights set forth elsewhere in this Article, and with reasonable promptness under the circumstances, after investigating in good faith and with due care and diligence, determine the amount for which it may be liable to the **Owner**, and present that determination to the **Owner**. If the **Owner** rejects that amount, the surety shall negotiate a sum acceptable to the **Owner** and promptly pay that amount to the **Owner** in full and with interest from the date the termination of the **Contractor's** services became effective. If the **Owner** rejects the sum determined by the surety, or if the surety fails to negotiate an agreement with the **Owner** on the amount of the surety's liability, the **Owner** shall have full power and authority to default the surety.

14.2.3. If the **Owner** has terminated the **Contractor**, and the surety elects to act under paragraph 14.2.2.2, the **Owner** will determine in good faith the amount necessary to cover the total direct, indirect and consequential costs (including, but not limited to liquidated damages, costs of correcting Work, fees and charges of engineers, architects, attorneys and others and any other costs and damages for which the surety is liable under Section 00610 Performance Bond) that the **Owner** believes it will sustain from that default. The **Owner** will communicate its determination to the surety, and the **Owner** will deduct that amount in its entirety from Requests for Payment under the Contract Documents. Upon completion of the Work, if the unpaid balance of the Contract Price is not sufficient to reimburse the **Owner** for all actual direct, indirect and consequential costs resulting from the default of the **Contractor**, the surety and **Contractor**, jointly and severally, are liable to the **Owner** for the difference, which they shall pay to the **Owner** promptly.

14.2.4. If the **Owner** has terminated the **Contractor**, and the surety elects to act under paragraph 14.2.2.2, the surety's contract with another contractor makes that contractor a Subcontractor under the Contract, in which case: (a) the provisions of Article 11 shall remain in full force and effect, (b) the methods and criteria to be used to compute the surety's (in lieu of the **Contractor's**) and that contractor's Cost of and Fee for any Work involved shall be limited to those provided in Article 11, and (c) all Work performed by any such contractor pursuant to a Subagreement with the surety shall be governed by the flow-through requirement in paragraph 5.1.6, the waiver of rights of subrogation provision in paragraph 7.8 and any other requirements of the Contract Documents governing Subagreements.

14.2.5. If the **Owner** has terminated the **Contractor**, any such termination will not affect any rights or remedies of the **Owner** against the **Contractor** or surety, or both, then existing or that may accrue after termination. All provisions of the Contract Documents that, by their nature, survive final acceptance of the Work shall remain in full force and effect after a termination for cause of the **Contractor** or default of the surety, or both.

14.2.6. The **Owner** may, in its sole discretion, permit the **Contractor** to continue to perform Work when the **Contractor** is in default or has been defaulted. Such decision by the **Owner** shall in no way operate as a waiver of any of the **Owner's** rights under the Contract Documents or Section 00610 Performance Bond, nor in the event of a subsequent default, entitle the **Contractor** or surety to continue to perform or prosecute the Work to completion.

14.3 Surety Default:

14.3.1. If upon receipt of a notice of termination for cause, the surety fails to proceed immediately and as provided in paragraph 14.2.2, the **Owner** shall declare the surety in default under Section 00610 Performance Bond in accordance with the terms and conditions of this paragraph.

14.3.1.1. No default of the surety under the Section 00610 Performance Bond shall be declared, however, until the expiration of fifteen (15) Calendar Days after receipt by the surety of an additional written notice from the **Owner** demanding that the surety perform its obligations under Section 00610 Performance Bond.

14.3.2. If the **Owner** declares the surety in default, the **Owner** shall have full power and authority to exclude the surety and **Contractor** from the site, assume any Subagreements that the **Owner** so selects and take possession of the Work and of all the surety's and **Contractor's** tools, plant and office, and construction equipment at the site (without liability to the surety or **Contractor** for trespass, rent or conversion). The **Owner** will (a) proceed to the full extent that the surety and **Contractor** could have proceeded, (b) incorporate into the Work all materials and equipment stored at the site or elsewhere, and (c) prosecute the Work to completion as the **Owner** may deem expedient. When the **Owner** exercises any of the rights or remedies provided in this paragraph, the **Owner** shall not be required to obtain the lowest price for Work performed.

14.3.3. If the **Owner** has defaulted the surety, any such termination or default will not affect any rights or remedies of the **Owner** against the **Contractor** or surety, or both, then existing or that may accrue after termination. Any retention or payment of monies due the **Contractor** or surety by the **Owner** will not release the **Contractor** or surety from liability. All provisions of the Contract Documents that, by their nature, survive final acceptance of the Work shall remain in full force and effect after a termination for cause of the **Contractor** or default of the surety, or both.

14.4 Termination for Convenience of the Owner:

14.4.1. Upon fifteen (15) Calendar Days' written notice to the **Contractor** and surety, or sooner if reasonable under the circumstances, the **Owner** may, without cause and without prejudice to any other right or remedy it may have, elect to terminate any part of the Work, or the Agreement in whole or in part, as the **Owner** may deem appropriate for its convenience. Upon receipt of any such termination notice, the **Contractor** shall immediately proceed in accordance with any specific instructions, protect and maintain the Work, and make reasonable and diligent efforts to mitigate costs associated with the termination.

14.4.2. In any termination for convenience, the **Contractor** shall be paid for (a) Work completed, in accordance with the Contract Documents, before receipt of the notice of termination, and (b) reasonable termination settlement costs for commitments that had become firm before the termination. The **Contractor** shall not be paid any anticipated and unrealized general conditions costs, administrative expenses and profit for uncompleted Work. If no agreement can be reached as to reasonable termination costs, the **Owner** will make a determination in writing which shall be final and binding on the **Contractor** unless the **Contractor** delivers notice of a claim and a claim Submittal in accordance with the procedures and within the deadlines set forth in Article 15.

14.4.3. Upon termination for convenience, the **Owner** shall have full power and authority to take possession of the Work, assume any Subagreements with Subcontractors and Suppliers that the **Owner** selects, and prosecute the Work to completion by contract or as the **Owner** may deem expedient.

14.4.4. If after notice of termination of the services of the **Contractor**, it is determined the **Contractor** was not in default, the termination shall be deemed to have been for the convenience of the **Owner**. In such event the **Contractor** may recover from the **Owner** payment in accordance with paragraph 14.4.2.

14.5 The Contractor May Suspend Work:

14.5.1. In addition to being entitled to earning interest on unpaid Requests for Payment, the **Contractor** may, upon fifteen (15) Calendar Days written notice to the **Owner**, suspend the Work for the **Owner's** convenience if, through no act or fault of the **Contractor**, the **Professional** fails, for thirty (30) Calendar Days, to initiate processing of any Request for Payment or the **Owner** fails, for ninety (90) Calendar Days, to pay the **Contractor** any Request for Payment finally certified by the **Professional** to be due.

14.5.2. Except as specifically provided in paragraph 14.5.1, this provision shall not relieve the **Contractor** of the **Contractor's** obligations to prosecute the Work in accordance with the Progress Schedule and without Delay during any disputes and disagreements with the **Owner**.

ARTICLE 15 DISPUTES

15.1 Claims Under This Article:

15.1.1. All claims, counterclaims, disputes and other matters in question between the **Owner** and **Contractor** arising out of or relating to the Contract Documents or the breach thereof, shall be submitted in writing to the **Professional** and otherwise processed and resolved as provided in this Article.

15.1.2. A claim means a written demand or assertion by the **Owner** or **Contractor**, which is properly certified, seeking an adjustment in Contract Price and/or payment of moneys due, an extension or shortening in Contract Time, the adjustment or interpretation of Contract terms, or other relief arising under or relating to the Contract, which becomes a claim or dispute after a written determination by the **Professional** or **Owner** under the appropriate provision of the Contract Documents.

15.1.3. Unless otherwise agreed between the parties, any claim that can be resolved under a provision of the Contract Documents providing for or excluding the relief sought by the claimant shall be resolved in accordance with that provision.

15.1.4. Notice of Claim - Except for **Owner** claims for liquidated damages, no claim shall be valid unless it is based upon written notice delivered by the claimant to the other party promptly, but in no event later than thirty (30) Calendar Days after the **Professional's** or **Owner's** determination giving rise to the claim. The notice shall include a supporting statement stating the nature of the dispute, the amount involved, if any, and the remedy sought. The claim submittal with all supporting data shall be delivered within sixty (60) Calendar Days after the determination giving rise to the claim (unless the **Professional** allows an extension). The responsibility to substantiate claims shall rest with the claimant.

*15.1.5. A claim by the **Contractor** shall be submitted to the **Professional** and **Owner** for a recommendation or decision from the **Professional** and, if necessary, an **Owner** determination. A claim by the **Owner** shall be submitted to the **Contractor** and the **Professional** for a written recommendation or decision by the **Professional**. The **Owner** reserves the right to audit, using the provisions in paragraph 11.14, any **Contractor** claim (or claim package) that the **Contractor** values at more than $50,000.00.

15.1.6. Pending final resolution of any claim under this Article, the **Contractor** shall proceed diligently with the Work and comply with any decision of the **Owner** and/or **Professional**.

15.2 Requirement for Certification of Contractor Claims:

15.2.1. For all **Contractor** claims seeking an increase in Contract Price or Contract Time, the **Contractor** shall submit an affidavit, certifying that the amount claimed accurately reflects any Delay and all costs that the **Contractor** is entitled from the occurrence of the claimed event and that supporting cost and pricing data are current, accurate, complete and represent the **Contractor's** best knowledge and belief. The affidavit shall be executed by an officer or partner of the **Contractor** with proper authority or his/her designee.

15.3 Recommendations or Decisions from the Professional:

*15.3.1. For **Contractor** claims under $100,000.00, if requested in writing by the **Contractor**, the **Professional** will render a recommendation or decision within thirty (30) Calendar Days after the request and the **Owner** will issue, if necessary, a determination within thirty (30) Calendar Days after the **Professional's** recommendation or decision. For **Contractor** claims exceeding $100,000.00, the **Professional** will issue its recommendation or decision and the **Owner**, if necessary, will issue its determination, within sixty (60) Calendar Days after completing an audit of the claim, or after deciding not to conduct such an audit or, in the alternative, will notify the **Contractor** of the date when the determination will be made. In the latter case, a final determination will be concluded within sixty (60) Calendar Days from the date of such notification.

*15.3.2. For **Owner** claims under $100,000.00, the **Professional** will render a recommendation or decision within thirty (30) Calendar Days of the request. For **Owner** claims over $100,000.00, the **Professional**, within sixty (60) Calendar Days, will render a recommendation or decision or notify the **Owner** and **Contractor** when such will be rendered.

*15.3.3. To the extent any **Professional's** decision is to deny a **Contractor** claim or to agree with an **Owner** claim, that decision shall be final and binding on the **Contractor**, without any determination by the **Owner**, unless the **Contractor** files a request for a presentation with the **Director-OOF** within thirty (30) Calendar Days as required by paragraph 15.4.1. Unless a claim is made in accordance with these requirements, it shall be waived.

*15.3.4. To the extent that any recommendation from the **Professional** is partly or wholly adverse to a claim from the **Owner**, that determination shall be final and binding on both the **Owner** and **Contractor** unless either party files a request for a presentation with the **Director-OOF** as required in paragraph 15.4.1.

*15.3.5. To the extent the **Professional** recommends payment of any **Contractor** claim which increases the Contract Price, that recommendation shall be subject to a determination from the **Owner** in a written opinion. In the event any such determination from the **Owner** is partly or wholly adverse to the preceding recommendation from the **Professional**, that determination shall be final and binding on the **Contractor** unless the **Contractor** files suit in the Michigan Court of Claims within thirty (30) Calendar Days after receipt of such determination. Unless a claim is made in accordance with these requirements, it shall be waived.

15.4 Determinations by the Director-IS:

*15.4.1. If either the **Contractor** or **Owner** is not satisfied with any decision of the **Professional** rendered pursuant to paragraph 15.3.3 or 15.3.4, that party shall, within thirty (30) Calendar Days of receiving that decision, file a written appeal with the **Director-OOF**. If a **Contractor** or **Owner** appeal is timely filed, the claimant shall be entitled to present its claim, unless waived, to the **Director-OOF**, or his/her designee, provided that a claim narrative with complete supporting documentation is delivered to the **Director-OOF**, or his/her designee, within thirty (30) Calendar Days of that party's written notice of appeal.

*15.4.2. Within thirty (30) Calendar Days after receipt of any such claim narrative, the **Director-OOF**, or his/her designee, shall schedule the time to start the presentations taking into account the dispute's complexity and the urgency of its resolution. Subject to any recognized privilege, discovery shall be available to either party as provided by the **Director-OOF**, and his/her designee, and shall be concluded thirty (30) Calendar Days before the start of the presentations.

*15.4.3. During the presentations, the **Director-OOF**, or his/her designee, shall hear presentations and receive evidence on the matters in dispute, as supported by the statement of the dispute. The **Director-OOF**, or his/her designee, shall have discretion concerning the allowability of evidence submitted, and shall not be bound to any rules of evidence other than those he/she promulgates.

*15.4.4. If the right to a presentation is waived or if a presentation is conducted and the dispute remains unresolved, the **Director-OOF**, or his/her designee, at his/her sole option, shall specify in which forum the dispute shall thereafter be conducted by issuing a written determination to the **Contractor** that the dispute if the **Contractor** so elects, be submitted in writing to:

*15.4.4.1. The Court of Claims maintained by the State of Michigan for the purpose of adjudicating claims against the State or other appropriate court, or

*15.4.4.2. Arbitration in accordance with the construction industry rules of arbitration of the American Arbitration Association, subject to the provisions of paragraphs 15.5.1 and 15.5.2, unless the parties mutually agree otherwise.

*15.4.5. The **Director-OOF's**, or his/her designee's, determination on the forum in which the dispute shall be conducted is final and binding upon the **Owner** and **Contractor**. The **Director-OOF's**, or his/her designee's determination on the dispute shall be final and binding on the **Contractor** unless the **Contractor** files a lawful action in the forum so chosen (Michigan Court of Claims or arbitration) within thirty (30) Calendar Days after receiving the **Director-OOF's**, or his/her designee's, determination.

*15.4.6. If, after such determination from the **Director-OOF**, or his/her designee, the **Contractor** properly submits the dispute to the Michigan Court of Claims or requests arbitration, and the final determination of either forum does not increase the **Contractor's** recovery by thirty (30%) percent or more above that awarded by the **Director-OOF**, or his/her designee, or voluntarily withdraws the action, the **Contractor** shall pay all resulting expenses of the **Owner** (including, but not limited to reasonable charges of attorneys, engineers, others and court or arbitration costs).

15.5 Supplements to AAA Arbitration:

*15.5.1. No arbitration, arising out of, or relating to the Contract Documents shall include, by consolidation, joinder or in any other manner, any additional party not a party to this Contract, except by written consent containing a specific reference to the Agreement and signed by all the parties involved. Consent shall be deemed given by any party who has executed an agreement directly with the **Owner** affected by the Project and containing provisions comparable to those in this Article 15. Any consent to arbitration involving any additional party or parties shall not constitute consent to arbitration of any dispute not permitted in this Article. The agreement to arbitrate with any additional party or parties duly consented to by the parties to this Contract shall be specifically enforceable under the prevailing arbitration Law.

15.5.2. Subject to any recognized privilege, discovery shall be available to each party to the arbitration as it would be available under the general court rules of the Michigan Court of Claims which shall be enforced by the American Arbitration Association. All discovery and amendments to the prehearing summary shall conclude thirty (30) Calendar Days before the arbitration date. Failure to provide the foregoing discovery shall render any claim supported by witnesses or documents not so disclosed excludable by the arbitration panel in its discretion.

15.6 Interest on a Judgment; Payment of Judgment:

*15.6.1. If, subsequent to a determination by the **Director-OOF**, or his/her designee, the **Owner** or **Contractor** files a Michigan Claims Court or AAA arbitration action, and the party filing for such action increases its recovery by thirty (30%) percent or more above that awarded by the **Director-OOF**, or his/her designee, that party shall be entitled to interest calculated in accordance with MCL 600.6013, as amended, whether the action is filed with the Michigan Court of Claims or the American Arbitration Association.

*15.6.2. After settlement or final adjudication of any claim under this Article if, upon demand, payment by the **Contractor** is not made to the **Owner**, the **Owner** may offset the appropriate amounts against (a) payments due to the **Contractor** under any other contract between the **Owner** and the **Contractor**, or (b) any amounts for which the **Owner** may be obligated to the **Contractor** in any capacity.

15.7 Venue; Flow-Through Provision:

15.7.1. The **Contractor** agrees to waive jurisdiction and venue, to consent and submit to the jurisdiction of, and not commence any action in other than, a competent State court in Ingham County, Michigan, unless original jurisdiction is vested in the Michigan Court of Appeals, the Michigan Court of Claims or the Michigan Supreme Court, regardless of residence or domicile, for any action or suit at law or in equity arising out of or under the Contract Documents. The **Contractor** further agrees that it will have each of its Suppliers and Subcontractors provide similar waivers as those required in this paragraph.

15.7.2. The **Contractor** shall insert the provisions of this Article in all Subagreements, altering those paragraphs only to identify properly the contracting parties.

END OF SECTION 00700

SECTION 00800 SUPPLEMENTARY CONDITIONS

PROFESSIONAL – **Wigen Tincknell Meyer & Associates, Inc.**

WORK – **Window Replacement and Exterior Facade Renovations to the Flint State Office Building**

AGENCY No. **071** INDEX No. **11730** FILE No. **071/12253.JAN**

The provisions of this Section 00800 Supplementary Conditions amend or supplement Section 00700 General Conditions and those other provisions of the Contract Documents, as indicated below. All other provisions of the Contract Documents that are not so amended or supplemented remain in full force and effect.

Delete the definition of Apparent Low Bidder, Section 00020 GLOSSARY, Article 1.1 Defined Terms in its entirety and replace with the following:

Apparent Low Bidders: Those Bidders whose Base Bid, when added to those specific Alternates the Owner intends to accept, yields the three lowest sums of Base Bid and Alternates. Additional Bidders may be considered Apparent Low Bidders if their Base Bid, when added to those specific Alternates the Owner intends to accept, yields a sum within 10% of the lowest of the Apparent Low Bidder's sum. If a qualified disabled veteran meets the requirements of the contract solicitation and with the veteran's preference is the lowest Bidder is considered the Apparent Low Bidder.

Delete Section 00100 INSTRUCTIONS TO BIDDERS, Article 14, AWARD OF THE CONTRACT, Items 14.1, 14.1.1, and 14.4 in their entirety and replace with the following:

ARTICLE 14 AWARD OF THE CONTRACT

14.1 If the Owner elects to award the Contract, the Owner will make the award to the responsive and responsible best value bidder except as provided below relative to veteran's preference.

14.1.1 The Apparent Low Bidders will be evaluated for responsiveness and responsibility based on the following:

- Compliance with the bid specifications and requirements.
- The Bidder's financial resources.
- The Bidder's technical capabilities.
- The Bidder's technical experience.
- The Bidder's past performance.
- The Bidder's insurance and bonding capacity.
- The Bidder's business integrity.

If a qualified disabled veteran meets the requirements of the contract solicitation and with the veteran's preference is the lowest Bidder the Owner will award the contract to the qualified disabled veteran bidder.

A determination as to whether the requirements of the bid solicitation have been met will be based solely on the Owner's and Professional's evaluation of the Section 00300 Bid Form, Bid Form Attachments, Bidder-provided documents, interview, and Bidder Qualification Submittals received in a timely basis. Each bid requesting the Qualified Disabled Veterans (QDV) preference, in accordance with Public Act 22 of 2010, MCL 18.1241.3 shall include a DD 214 Proof of Service and Discharge, a Veterans Administration rating decision letter, proof of disability (if the disability is not indicated on the DD 214), and appropriate legal documents setting forth the 51% natural persons QDV ownership.

The bids will be evaluated for best value based on price and qualitative components by comparing the qualitative components of the three lowest responsive and responsible Bidders. The comparison may also include other Bidders whose bids are within 10% of the lowest responsive and responsible Bidder. Determination of the lowest three Bidders shall be on the basis of the sum of the Base Bid and any additive and deductive Alternates the Owner accepts. Alternates shall be accepted in the order listed in paragraph 6.2 Schedule of Alternates in Section 00300 Bid Form only. The Owner will accept an Alternate only if all other previously listed Alternates are also accepted, unless acceptance by the Owner of Alternates in a different order does not affect determination of the lowest three bidders in any way.

Some qualitative components that may be evaluated are:

- Technical approach.
- Quality of proposed personnel.
- Management plans.
- ADD ANY OTHER PROJECT SPECIFIC

For contracts under $250,000, best value will primarily be based on the lowest responsive and responsible bid.

14.4 If the Owner, either through the Director-DCD or his/her designee, or the Board, intends to disqualify any Bidder under consideration for award, written notice of the impending disqualification will be provided by the Owner (including reasons for the disqualification) to that Bidder and those Bidders remaining under consideration to the award. If the disqualified Bidder has any objection to the disqualification that Bidder shall, within two (2) Business Days, file a written protest, as provided in paragraph 12.2 and follow the protest procedures in paragraphs 12.3 through 12.5. The decision of the Board shall be final and binding on the disqualified Bidder.

Section 00300 BID FORM, Article 4 ATTACHMENTS INCLUDED WITH THIS BID

Add:

4.1.5 Current Experience Modification Rating (EMR)

4.1.6 Identification of the proposed project superintendent with a resume or list of similar projects handled by that individual.

4.1.7 A list of at least three (3) projects completed within the last three (3) years of similar size and complexity, with contact information for references for each.

Delete Section 00700 GENERAL CONDITIONS, Article 5 SUBCONTRACTORS AND SUPPLIERS, Item 5.1.6 in its entirety and replace with the following:

5.1.6 Work performed by any Subcontractor or Supplier shall be through an appropriate written Subagreement that expressly binds the Subcontractor or Supplier to the requirements of the Contract Documents and contains the waiver of rights of subrogation provisions of Article 7.

SC-7: SUPPLEMENTARY CONDITIONS TO ARTICLE 7 LEGAL REQUIREMENTS; INSURANCE

SC-7.1.14.8. Add the following paragraph 7.14.8 to Section 00700 General Conditions:

7.14.8 The schedule of Prevailing Wage and Fringe Benefit Rates applicable to the Work is attached to this Section 00800 Supplementary Conditions.

Work associated with a separate contract will take place during the course of this entire project. The Construction Manager in charge of the separate contract is CSM Group (CSM) and the following are requirements by CSM that will need to be included within this contract. Note that the All Trades Contractor for this contract is referenced as the "Building Envelope Trade Contractor" within the following requirements.

A. CSM's main goal is to provide a safe and productive work environment.

B. CSM will require that the Building Envelope Trade Contractor attend 30 minute long CSM safety and logistics orientation. Once through orientation they will receive a badge that allows them to access the site. CSM is requesting that we have all emergency contact information associated with the awarded contractor. Especially the competent person designated to this project.

C. CSM will require that the Building Envelope Trade Contractor attend our one hour weekly trade progress meetings to discuss schedule and deliveries as well as a 15-30 minute safety huddle with the foreman weekly. Time and day has not been determined.

D. CSM will have dumpsters and port-a-johns onsite. Building Envelope Trade Contractor will be required to provide their own port-a-john. Also, there will not be any extra space at the truck dock for added dumpsters. Building Envelope Trade Contractor should remove stone debris on a daily basis and the smaller misc. debris can go in our dumpsters.

E. CSM requires all trades contractors to follow MIOSHA safety requirements. Including but not limited to – high visibility shirts, vests, or coats, steel toed boots, hardhats, and safety glasses all of these items worn 100% of the time onsite. Since the Building Envelope Trade Contractor will be onsite we ask they follow the same PPE requirements. The Building Envelope Trade Contractor is required to work in a safe manner and follow MIOSHA rules. It is not CSM's responsibility to monitor these workers. But if unsafe practices are evident we will let the SOM know what we are witnessing. CSM would recommend they provide a jobsite dedicated safety inspector that will coordinate with CSM's onsite inspector during the duration of the project.

F. To maintain a safe working site, daily cleanup is a must, but this is not CSM's responsibility to monitor.

G. If Building Envelope Trade Contractor is going to access the roof for any reason fall protection is required at all times. Once new roofing is installed Building Envelope Trade Contractor will be responsible for full protection of the new roof system and any damages that may occur. They will need to submit for review by the SOM and the Architect their means of protection. Reference Overall Roof Plan (Appendix B) included in specifications for new roof system schedule.

H. The Building Envelope Trade Contractor is responsible for providing OSHA approved covered walkways to protect all pedestrian traffic areas while working above (i.e. emergency egress doors, and loading dock area). Reference Site Plan (Appendix A) included in specifications.

I. Use of the truck lane is for unloading materials. Usage of this truck lane needs to be coordinated with CSM. This is the only location materials can be loaded and unloaded by the tower crane which will have priority.

J. The tower crane is not available for the Building Envelope Trade Contractor. CSM/HBC's schedule revolves around the use of the tower crane and requires 100% dedication to the separate core/shell project.

K. Storage of material for the Building Envelope Trade Contractor's project needs to be coordinated with CSM/SOM. There is no area on the south side of the building for material storage.

The Trade Contractor that will be performing the masonry and flashing repairs must be able to demonstrate that they have a minimum of (10) ten years direct experience in performing work indicated within these documents. Documentation of this experience shall be provided with the Bid Proposal per Section 00400 – Qualification Submittal.

Informational Sheet: Prevailing Wages on State Projects

REQUIREMENTS OF
THE PREVAILING WAGES ON STATE PROJECTS ACT, PUBLIC ACT 166 OF 1965

The State of Michigan determines prevailing rates pursuant to the Prevailing Wages on State Projects Act, Public Act 166 of 1965, as amended. The purpose of establishing prevailing rates is to provide minimum rates of pay that must be paid to workers on construction projects for which the state or a school district is the contracting agent and which is financed or financially supported by the state. By law, prevailing rates are compiled from the rates contained in collectively bargained agreements which cover the locations of the state projects. The official prevailing rate schedule provides an hourly rate which includes *wage and fringe benefit totals* for designated construction mechanic classifications. The overtime rates also include *wage and fringe benefit totals*. Please pay special attention to the overtime and premium pay requirements. Prevailing wage is satisfied when wages plus fringe benefits paid to a worker are equal to or greater than the required rate.

State of Michigan responsibilities under the law:

- The department establishes the prevailing rate for each classification of construction mechanic ***requested by a contracting agent*** prior to contracts being let out for bid on a state project.

Contracting agent responsibilities under the law:

- If a contract is not awarded or construction does not start within 90 days of the date of the issuance of rates, a re-determination of rates must be requested by the contracting agent.
- Rates for classifications needed but not provided on the Prevailing Rate Schedule, ***must*** be obtained ***prior*** to contracts being let out for bid on a state project.
- The contracting agent, by written notice to the contractor and the sureties of the contractor known to the contracting agent, may terminate the contractor's right to proceed with that part of the contract, for which less than the prevailing rates have been or will be paid, and may proceed to complete the contract by separate agreement with another contractor or otherwise, and the original contractor and his sureties shall be liable to the contracting agent for any excess costs occasioned thereby.

Contractor responsibilities under the law:

- Every contractor and subcontractor shall keep posted on the construction site, in a conspicuous place, a copy of all prevailing rates prescribed in a contract.
- Every contractor and subcontractor shall keep an accurate record showing the name and occupation of and the actual wages and benefits paid to each construction mechanic employed by him in connection including certified payroll, as used in the industry, with said contract. This record shall be available for reasonable inspection by the contracting agent or the department.
- Each contractor or subcontractor is separately liable for the payment of the prevailing rate to its employees.
- The prime contractor is responsible for advising all subcontractors of the requirement to pay the prevailing rate prior to commencement of work.
- The prime contractor is secondarily liable for payment of prevailing rates that are not paid by a subcontractor.
- A construction mechanic *shall only* be paid the apprentice rate if registered with the United States Department of Labor, Bureau of Apprenticeship and Training and the rate is included in the contract.

Enforcement:

A person who has information of an alleged prevailing wage violation on a state project may file a complaint with the State of Michigan. The department will investigate and attempt to resolve the complaint informally. During the course of an investigation, if the requested records and posting certification are not made available in compliance with Section 5 of Act 166, the investigation will be concluded and a referral to the Office of Attorney General for civil action will be made. The Office of Attorney General will pursue costs and fees associated with a lawsuit if filing is necessary to obtain records.

MIOSHA

STATE OF MICHIGAN

Prevailing Wages
PO Box 30476
Lansing, MI 48909
517-322-1825

Informational Sheet: Prevailing Wages on State Projects

General Information Regarding Fringe Benefits

Certain fringe benefits **may** be credited toward the payment of the Prevailing Wage Rate:

- If a fringe benefit is paid directly to a construction mechanic
- If a fringe benefit contribution or payment is made on behalf of a construction mechanic
- If a fringe benefit, which may be provided to a construction mechanic**,** is pursuant to a written contract or policy
- If a fringe benefit is paid into a fund, for a construction mechanic

When a fringe benefit is not paid by an hourly rate, the hourly credit will be calculated based on the annual value of the fringe benefit divided by 2080 hours per year (52 weeks @ 40 hours per week).

The following is an example of the types of fringe benefits allowed and how an hourly credit is calculated:

Vacation	40 hours X $14.00 per hour = $560/2080 =	$.27
Dental insurance	$31.07 monthly premium X 12 mos. = $372.84 /2080 =	$.18
Vision insurance	$5.38 monthly premium X 12 mos. = $64.56/2080 =	$.03
Health insurance	$230.00 monthly premium X 12 mos. = $2,760.00/2080 =	$1.33
Life insurance	$27.04 monthly premium X 12 mos. = $324.48/2080 =	$.16
Tuition	$500.00 annual cost/2080 =	$.24
Bonus	4 quarterly bonus/year x $250 = $1000.00/2080 =	$.48
401k Employer Contribution	$2000.00 total annual contribution/2080 =	$.96
Total Hourly Credit		$3.65

Other examples of the types of fringe benefits allowed:

- Sick pay
- Holiday pay
- Accidental Death & Dismemberment insurance premiums

The following are examples of items that **will not** be credited toward the payment of the Prevailing Wage Rate

- Legally required payments, such as:
  - Unemployment Insurance payments
  - Workers' Compensation Insurance payments
  - FICA (Social Security contributions, Medicare contributions)
- Reimbursable expenses, such as:
  - Clothing allowance or reimbursement
  - Uniform allowance or reimbursement
  - Gas allowance or reimbursement
  - Travel time or payment
  - Meals or lodging allowance or reimbursement
  - Per diem allowance or payment
- Other payments to or on behalf of a construction mechanic that are not wages or fringe benefits, such as:
  - Industry advancement funds
  - Financial or material loans

MICHIGAN OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION
MARTHA B. YODER
DIRECTOR

OVERTIME PROVISIONS for MICHIGAN PREVAILING WAGE RATE COMMERCIAL SCHEDULE

1. Overtime is represented as a nine character code. Each character represents a certain period of time after the first 8 hours Monday thru Friday.

	Monday thru Friday	Saturday	Sunday & Holidays	Four 10s
First 8 Hours		**4**	**8**	**9**
9th Hour	**1**	**5**		
10th Hour	**2**	**6**		
Over 10 hours	**3**	**7**		

Overtime for Monday thru Friday after 8 hours:
the 1st character is for time worked in the 9th hour *(8.1 - 9 hours)*
the 2nd character is for time worked in the 10th hour *(9.1 - 10 hours)*
the 3rd character is for time worked beyond the 10th hour *(10.1 and beyond)*

Overtime on Saturday:
the 4th character is for time worked in the first 8 hours on Saturday *(0 - 8 hours)*
the 5th character is for time worked in the 9th hour on Saturday *(8.1 - 9 hours)*
the 6th character is for time worked in the 10th hour *(9.1 - 10 hours)*
the 7th character is for time worked beyond the 10th hour *(10.01 and beyond)*

Overtime on Sundays & Holidays
The 8th character is for time worked on Sunday or on a holiday

Four Ten Hour Days
The 9th character indicates if an optional 4-day 10-hour per day workweek can be worked ***between Monday and Friday* without paying overtime after 8 hours worked, unless otherwise noted in the rate schedule. To *utilize a 4 ten workweek, notice is required from the employer to employee prior to the start of work on the project.***

2. Overtime Indicators Used in the Overtime Provision:
   H - means TIME AND ONE-HALF due
   X - means TIME AND ONE-HALF due after 40 HOURS worked
   D - means DOUBLE PAY due
   Y - means YES an optional 4-day 10-hour per day workweek can be worked without paying overtime after 8 hours worked
   N - means NO an optional 4-day 10-hour per day workweek *can not* be worked without paying overtime after 8 hours worked

3. EXAMPLES:
   HHHHHHHDN - This example shows that the 1½ rate must be used for time worked after 8 hours Monday thru Friday *(characters 1 - 3);* for all hours worked on Saturday, 1½ rate is due *(characters 4 - 7).* Work done on Sundays or holidays must be paid double time *(character 8).* The N *(character 9)* indicates that 4 ten-hour days is not an acceptable workweek at regular pay.

   XXXHHHHDY - This example shows that the 1½ rate must be used for time worked after 40 hours are worked Monday thru Friday *(characters 1-3);* for hours worked on Saturday, 1½ rate is due *(characters 4 – 7).* Work done on Sundays or holidays must be paid double time *(character 8).* The Y *(character 9)* indicates that 4 ten-hour days is an acceptable alternative workweek.

ENGINEERS - CLASSES OF EQUIPMENT LIST

UNDERGROUND ENGINEERS

CLASS I

Backfiller Tamper, Backhoe, Batch Plant Operator, Clam-Shell, Concrete Paver (2 drums or larger), Conveyor Loader (Euclid type), Crane (crawler, truck type or pile driving), Dozer, Dragline, Elevating Grader, End Loader, Gradall (and similar type machine), Grader, Power Shovel, Roller (asphalt), Scraper (self propelled or tractor drawn), Side Broom Tractor (type D-4 or larger), Slope Paver, Trencher (over 8' digging capacity), Well Drilling Rig, Mechanic, Slip Form Paver, Hydro Excavator.

CLASS II

Boom Truck (power swing type boom), Crusher, Hoist, Pump (1 or more 6" discharge or larger gas or diesel powered by generator of 300 amps or more, inclusive of generator), Side Boom Tractor (smaller than type D-4 or equivalent), Tractor (pneu-tired, other than backhoe or front end loader), Trencher (8' digging capacity and smaller), Vac Truck.

CLASS III

Air Compressors (600 cfm or larger), Air Compressors (2 or more less than 600 cfm), Boom Truck (non-swinging, non-powered type boom), Concrete Breaker (self-propelled or truck mounted, includes compressor), Concrete Paver (1 drum, ½ yard or larger), Elevator (other than passenger), Maintenance Man, Mechanic Helper, Pump (2 or more 4" up to 6" discharge, gas or diesel powered, excluding submersible pump), Pumpcrete Machine (and similar equipment), Wagon Drill Machine, Welding Machine or Generator (2 or more 300 amp or larger, gas or diesel powered).

CLASS IV

Boiler, Concrete Saw (40HP or over), Curing Machine (self-propelled), Farm Tractor (w/attachment), Finishing Machine (concrete), Firemen, Hydraulic Pipe Pushing Machine, Mulching Equipment, Oiler (2 or more up to 4", exclude submersible), Pumps (2 or more up to 4" discharge if used 3 hrs or more a day-gas or diesel powered, excluding submersible pumps), Roller (other than asphalt), Stump Remover, Vibrating Compaction Equipment (6' wide or over), Trencher (service) Sweeper (Wayne type and similar equipment), Water Wagon, Extend-a-Boom Forklift.

HAZARDOUS WASTE ABATEMENT ENGINEERS

CLASS I

Backhoe, Batch Plant Operator, Clamshell, Concrete Breaker when attached to hoe, Concrete Cleaning Decontamination Machine Operator, Concrete Pump, Concrete Paver, Crusher, Dozer, Elevating Grader, Endloader, Farm Tractor (90 h.p. and higher), Gradall, Grader, Heavy Equipment Robotics Operator, Hydro Excavator, Loader, Pug Mill, Pumpcrete Machines, Pump Trucks, Roller, Scraper (self-propelled or tractor drawn), Side Boom Tractor, Slip Form Paver, Slope Paver, Trencher, Ultra High Pressure Waterjet Cutting Tool System Operator, Vactors, Vacuum Blasting Machine Operator, Vertical Lifting Hoist, Vibrating Compaction Equipment (self-propelled), and Well Drilling Rig.

CLASS II

Air Compressor, Concrete Breaker when not attached to hoe, Elevator, End Dumps, Equipment Decontamination Operator, Farm Tractor (less than 90 h.p.), Forklift, Generator, Heater, Mulcher, Pigs (Portable Reagent Storage Tanks), Power Screens, Pumps (water), Stationary Compressed Air Plant, Sweeper, Water Wagon and Welding Machine.

Official Rate Schedule

Every contractor and subcontractor shall keep posted on the construction site, in a conspicuous place, a copy of all prevailing wage and fringe benefit rates prescribed in a contract.

This is a Cover Sheet to State's Section 01310 Progress Schedule Specification (Cost-Loaded CPM Model), a Division 1 Specification modeled from FORMSPEC™ U.S. Domestic Model, Y2000 Edition. The Progress Schedule Specification reflects the scheduling expertise of professionals in the employ of PMA Consultants LLC. This Model Specification has been written as simply as practical, however, its use does presume a working knowledge of Critical Path Methods and construction scheduling fundamentals. Specifiers are encouraged to consult with a CPM scheduling practitioner when preparing specifications for a specific project.

STATE OF MICHIGAN

DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET

FACILITIES AND BUSINESS SERVICES ADMINISTRATION

MODEL COST-LOADED PROGRESS SCHEDULE SPECIFICATION

FORMSPEC™ No. Y2000.0821 – 01310

RELEASED ON NOVEMBER 15, 2001

Developed from

FORMSPEC™ Model Progress Schedule Specification

Cost-Loaded CPM Model, Public Building Projects

and suggested for use with

MICHSPEC™ Contract Forms and

Conditions of the Contract

1997 Edition/2011 Version

SECTION 01310 PROGRESS SCHEDULE

PART 1 - GENERAL

1.01 SUMMARY

A. The **Contractor** will submit cost-loaded CPM Progress Schedules to the **Owner** depicting its approach to prosecution and completion of the Work. This requirement includes, but is not limited to the **Contractor's** approach to Activity cost-loading, recovering schedule and managing the effect of changes, "or equal" and substitution proposals and their implementation, and Delays on Work sequencing.

B. The Progress Schedule will consist of the Revision 0 Submittal (paragraph 3.02), Payment Submittals (paragraph 3.03) and Revision Submittals (paragraph 3.04). The **Contractor,** with the **Professionals** input, will uniquely number each Progress Schedule Submittal. For a Progress Schedule resubmission, the initial Submittal number will be modified by the letter A, B, or C, etc., as appropriate.

C. Each Progress Schedule Submittal will consist of an electronic disk with the **Contractor's** files, a narrative and three (3) copies of the required reports and plots.

D. Through the review of Progress Schedule Submittals, the **Owner** will endeavor to stay current on Work progress against Milestones, updated Activity Early and Late Dates and the **Contractor's** approach to Work remaining.

E. References to the Critical Path Method (CPM) are to CPM construction industry standards consistent with the requirements of this Section 01310 Progress Schedule.

1.02 RELATED SECTIONS

A. Mainly, Section 00100 Instructions to Bidders; Section 00440 Schedule of Materials and Equipment; Section 00500 Agreement; Section 00700 General Conditions; and Section 00800 Supplementary Conditions.

B. Notice of Award; Notice to Proceed; the Drawings; and all Change Orders and Change Authorizations.

1.03 GLOSSARY OF TERMS

A. Capitalized terms not already defined in any Division 0 Specification have the following intent and meanings:

1. *Activity Value (Value)*–That portion of the Contract Price representing an appropriate level of payment for the part of the Work designated by the Activity.

2. *Line Of Balance*–A multiunit scheduling technique graphing, in an X–Y plot, the timing of the trade Work elements within each repetitive unit. Generally, each trade Work element is represented by an inclined production line. Also, in a Line of Balance plot, the X-axis plots the calendar and the Y-axis represents the units (unit count).

3. *Milestones*–Key, pre-determined points of progress in the completion of a facility, designating interim target dates in support of the Contract Times. Milestones may pinpoint the start of critical path foundations, significant deliveries (e.g. structural steel), start of building framing, start of MEP rough-in, building enclosure, start or completion of interior partitions, start of interior finishes, availability of conditioned space, critical path commissioning stages, Substantial Completion and other events of like import

4. *Official Schedule*–The most recent Revision Submittal returned to the **Contractor** as "Resubmittal Not Required." The Rev. 0 Official Schedule is the As-Planned Schedule.

5. *Payment Submittal*–A monthly Progress Schedule update reflecting progress and minor adjustments on the Activities, sequencing and restraints for Work remaining.

6. *Revision 0 Submittal*–The first, complete Progress Schedule submitted by the **Contractor** with the intent to depict the entire Work as awarded.

7. *Rough–In MEP*–A common term in architectural construction, often grouping the installation of ductwork, piping, plumbing, fire protection and conduit and wiring.

8. *Short Term Schedules*–Rolling bar chart diagrams, each detailing progress and upcoming Activities that were and/or are scheduled over a four-week window.

1.04 QUALITY ASSURANCE

A. The **Contractor** will obtain a written interpretation from the **Professional,** if the **Contractor** believes the selection of Activities, logic ties or restraints requires an interpretation of the Contract Documents. With each submission, the **Contractor** will point out by specific, written notation, any Progress Schedule feature that may reflect variations from a requirement of the Contract Documents.

B. The **Contractor** is responsible to obtain information from each Subcontractor and Supplier when scoping their respective Activities, Values, logic ties and restraints.

C. No review of a Progress Schedule will relieve the **Contractor** from its obligation to comply with the Contract Times and any sequence of Work indicated in or required by the Contract Documents and for the timely completion of any Work omitted from that Progress Schedule.

D. No review of a Progress Schedule will imply approval of any interpretation of or variation from the Contract Documents, unless expressly approved by the **Professional** through a written interpretation or by a separate, written notation on the returned Progress Schedule Submittal.

1.05 ALLOWANCES

A. Work covered by Cash Allowances will be completed within the Contract Times. To the extent reasonable and consistent with the **Contractor's** plan, Work authorized by Provisionary Allowances will be completed within the Contract Times. The Progress Schedule will incorporate the **Contractor's** best estimate of the Activities, logic and restraints required, using the information in the Contract Documents or as indicated by the **Professional** in writing.

1.06 "OR EQUALS" AND SUBSTITUTIONS

A. Activities in the Rev. 0 Progress Schedule will be based only on the products nominated in Section 00440 Schedule of Materials and Equipment, and will not reflect any "or equal" or substitute materials or equipment, even if the **Contractor** intends to pursue "or equal" and substitution proposals. This limitation applies to Means and Methods indicated in or required by the Contract Documents.

1.07 MILESTONES; SCHEDULE RECOVERY

A. The **Owner** will select Milestones and Milestone Dates on the basis of the Rev. 0 Submittal. As the Official Schedule is revised, Milestone Dates will be revised accordingly. Milestone Dates will serve as target dates.

B. Whenever any Activity slips by twenty (20) or more Days from a pertinent Contract Time, the **Contractor** will deliver a Revision Submittal documenting its schedule recovery plan and/or its request for an extension in Contract Time. Upon evaluation of that Revision Submittal, if the **Owner,** with the **Professional's** advise, determines there is sufficient cause, the **Owner** will withhold liquidated damages or provide a notice of intent to do so, if schedule is indeed not recovered, and/or may give a notice of default.

1. The narrative will identify the Delay and actions taken by the **Contractor** to recover schedule, whether by adding labor or construction equipment, Activity re-sequencing, expediting of deliveries, overtime or shift Work, and so on.

1.08 SCHEDULE OF VALUES (SOV)

A. If the Schedule of Values includes pay items for mobilization, general conditions, Record Documents, operating and maintenance documentation, etc., the values of those pay items do not have to be cost-loaded into the Activities. This rule equally applies to other pay items for Work not necessarily controlling the rate of progress.

B. The Schedule of Values and Cost Report may assign pay items and Activity Values, respectively, to Submittals for equipment requiring Shop Drawings of significant engineering scope and fabrication and delivery lead times longer than sixty (60) Days. However, progress payments on any such pay item or Activity Value will not exceed fifteen percent (15%) of the equipment cost, meaning furnished, installed and checked out. The term "equipment," as used in this paragraph, is interpreted in paragraph 1.5.4 of Section 00700 General Conditions.

1.09 PROGRESS SCHEDULE SOFTWARE

A. The scheduling software employed by the **Contractor** to process the Progress Schedule will be the current version of Primavera Project Planner®, SureTrak®, Microsoft Project® or equivalent CPM scheduling software.

B. If the **Contractor** intends to use companion schedule graphics and/or Line of Balance software tools, the **Contractor** will furnish to the **Owner** descriptive materials and samples describing such software tools.

1.10 MEASUREMENT AND PAYMENT

A. The Schedule of Values will include a pay item capturing the cost for the Work required by this Section.

B. Fifteen percent (15%) of the Progress Schedule pay item will be eligible for payment upon delivery of the complete Revision 0 Submittal. The balance of this pay item will be eligible for payment, on a prorated basis, with each Progress Payment attaching the required Payment Submittal.

1.11 NON-PERFORMANCE

A. In the event the **Contractor** fails, refuses or neglects to comply to a significant extent with the progress schedule submittal requirements of this Section 01310, the **Owner** may stop payments under the Progress Schedule pay item.

B. If justified under the circumstances, the **Owner** also may prepare alternate progress schedules and deduct from the Contract Price all related costs by Change Order and/or take other action commensurate with the breach.

PART 2 - WORK PRODUCTS

2.01 PRINTOUTS

A. Schedule Reports will include Activity (ID) code and description, duration, calendar, Early Dates, Late Dates and Total Float, all of which will comport with the requirements of paragraph 8.3.4 of Section 00700 General Conditions.

1. For Precedence Diagram Method, separate Schedule Reports will tabulate, for each Activity, all preceding and succeeding logic types and lead times, whether CPM Plots displaying vertical logic ties are appended or not.

B. CPM Schedule Plots will be plotted on a suitable time scale and identify the Contract Times, Critical Paths and sub-Critical Paths. Activities will be shown on the Early Dates with Total Floats noted by Late Date flags.

C. Cost Reports will tabulate Activity code and description and Activity Value, percent complete and earned payment, as certified in the **Professional's** certified Application for Payment. Separate Activity Cost Reports are preferred, particularly if the Schedule Reports append CPM diagrams.

D. Resource Plots will graph weekly and cumulative craft head-counts and Activity Values, by Early Dates and, for Revision Submittals, compare As-Planned and Early Dates.

E. Short Term Schedules will break Activities into detailed tasks and cover the previous week and next three (3) weeks. Each installation task will be cross-referenced to an Activity and tabulate that Activity Early Date and Total Float.

F. Line of Balance Plots will reflect industry practice for repetitive construction, and will segregate the production lines for all trades within the hammock Activities.

2.02 NARRATIVE REQUIREMENTS

A. In general, a narrative will describe the **Contractor's** approach to prosecution of the Work, subject to the requirements of the Contract Documents. Further, each narrative will list the Critical Path Activities and compare Early and Late Dates against Contract Times and Milestone Dates. The basis for restraint dates will be explained.

B. For each Payment Submittal, the narrative will compare current Dates to the respective Milestone Dates, describe changes in crewing and construction equipment and identify all Delays. For each Revision Submittal, the narrative also will itemize changes in Activities, logic ties and restraint dates made necessary by each change, Delay, schedule recovery, substitution and **Contractor**-initiated revision occurring since the previous Submittal.

2.0 3 ACTIVITY REQUIREMENTS

A. Separate Activities will designate permitting, construction, Submittal preparation and review (and resubmission and re-review for same); MEP coordination drawings; deliveries (to the site or storage); commissioning; and Punch List. Separate Activities will designate **Owner**-furnished items, interfaces with other work and the **Owner** and **Professional's** responsibilities.

B. Activities will be detailed only to the extent required to show the transition of trade Work. Activities will detail the progression through site/excavation, foundations, building framing, start/completion of interior partitions, MEP rough-in, building enclosure, interior finishes, conditioned space and commissioning.

1. Submittal Activities will segregate long-lead items, any item requiring structural access and other procurements that, in the **Contractor's** judgment, may bear on the rate of progress. Separate MEP coordination drawing Activities will be used for each floor. Beyond these requirements, it is not necessary to burden the Progress Schedule with Activities for less significant Submittals and deliveries.

2. For multiunit Work (e.g., rough-in overhead MEP for each floor, etc.), detailed Activities will be shown for a typical (often, the first) unit. Other or follow-on units may be replicated, as appropriate, or modeled with a hammock Activity that combines the sum total of the typical detailed Activities. If a hammock Activity is used, Line of Balance Plots will be provided showing that proper logic ties between like Work are preserved from unit to unit.

3. Separate Activities, as suitable to the Divisions of Work involved, will be identified for single-unit Work. This requirement applies to Work in mechanical rooms, building framing, commissioning, etc.

4. Activities will not combine separate or non-concurrent items of Unit Price or lump sum Work, Work in separate structures and Work in distinct areas, locations or floors within an area or structure; or rough-in and finish Work.

C. Activity durations will equal the Business Days required to sufficiently complete the Work designated by the Activity (i.e., when finish-to-start successors may start, even if the Activity is not quite 100% complete). Installation Activities will last from twenty (20) to forty (40) Days.

D. Activities will be assigned consistent descriptions and identification codes. Sort codes will group Activities by building or structure, floor or area, Change Order and Change Authorization and other meaningful schemes.

PART 3 – EXECUTION

3.01 FLOAT TOLERANCES

A. Any Progress Schedule with Early Dates after a Contract Time will yield negative Total and Contract Floats, whether shown/calculated or not. Any Revision Submittal with less than negative twenty (20) Days of Float will be returned as "Revise and Resubmit," unless a time extension is requested, or the **Owner** withholds liquidated damages for any progress payment or gives notice of the intent to do so, in the event schedule is not recovered.

B. Floats calculated from the definitions given in Section 00020 Glossary supersede any conflicting Float values calculated within any early completion Progress Schedule.

3.02 REVISION 0 (Rev. 0) SUBMITTAL

A. The initial Revision 0 Submittal, consisting of the Rev. 0 CPM Progress Schedule, will be due with the first Request for Payment. The Rev. 0 CPM Progress Schedule will show the Work as awarded, without Delays, "or equal" or substitutions, Change Orders or Change Authorizations.

1. The Rev. 0 Schedule of Values and Schedule of Shop Drawing submissions, itemizing the required Submittals, will be due with the second Request for Payment. Activity Values will prorate Schedule of Value pay item costs through simple allocations of Activities and pay items scope. The Schedule of Shop Drawing submissions may employ the log, custom data or other like feature of the progress scheduling software or a table prepared by software designed to process Submittals and deliveries.

2. The Rev. 0 narrative will detail the **Contractor's** management of the site, e.g., lay down, staging, parking, etc. and use of construction equipment. The narrative also will identify non-Business Days, shifts, weekend Work and multiple calendars applied to the Activities, all Delays occurring since Contract Award and all pending and anticipated "or equal" and substitution proposals.

3. If required in Section 00800 Supplementary Conditions, the **Contractor** will furnish to the **Owner** a licensed copy of the scheduling software and all upgrades and updates acquired from the vendor and used on the Work.

B. Once endorsed by the **Owner** and returned to the **Contractor** as "Resubmittal Not Required," the Rev. 0 Progress Schedule (or Rev. 0A, etc.) will be the As-Planned Schedule and the basis for Payment Submittals until the Rev. 1 Official Schedule is established.

C. After the As-Planned Schedule is established, the **Owner** will select Milestones and record the Milestone Early and Late Dates. As the Official Schedule evolves, Milestone Dates will be revised accordingly.

D. If the **Owner** refuses to endorse the Rev. 0 Submittal (or Rev. 0A, for a resubmission) as "Resubmittal Not Required," the As-Planned Schedule will not be established. In that event, the **Contractor** will continue to submit Payment and Revision Submittals reflecting progress and the **Contractor's** approach to remaining Work. The **Professional** will rely on the available Payment and Revision Submittals, subject to whatever adjustments it determines appropriate.

3.03 PAYMENT SUBMITTALS

A. Payment Submittals with progress up to the closing date and updated Early Dates and Late Dates for progress and remaining Activities will be due with each Progress Payment. As-built data will consist of actual dates, percent complete, earned payment, changes, Delays and other significant events occurring before the closing date.

B. Activity percent complete and earned payment will be as in the Request for Payment certified by the **Professional.** As a point of emphasis, earned payment will be intended to equal Value times percent complete, as certified by the **Professional** and, for unit price Work, unit price times quantities completed, as certified by the **Professional.** For Submittals and deliveries, earned payment will equal one hundred percent upon approval or delivery, respectively.

C. At the **Contractor's** option, a Payment Submittal may overlay minor adjustments on Activities and sequencing for Work remaining. This excludes Activity re-scoping to reflect Delays, changes, schedule recovery or substitutions.

3.04 REVISION SUBMITTALS

A. Progress Schedule Revisions will be submitted with the third Request for Payment and every three (3) months after that, or more frequently, if necessary because of major revisions on the Activities, sequencing and restraints for Work remaining or to put forth a schedule recovery plan.

B. Revisions will detail all impacts on pre-existing Activities, logic ties and restraints and reflect the **Contractor's** current approach to Work remaining. Revisions may be required because of **Contractor**-initiated re-planning, changes in the Work, substitutions, schedule recovery and/or Delays.

C. Once endorsed by the **Owner** and returned to the **Contractor** as "Resubmittal Not Required," a Revision Submittal becomes the Rev. 1, Rev. 2, etc. Official Schedule and the basis for subsequent Payment Submittals until a more current Official Schedule is established. If the **Owner** refuses to endorse any Revision Submittal as "Resubmittal Not Required," the **Contractor** will continue to submit Payment and Revision Submittals when and as required in this Section.

3.05 RETROSPECTIVE DELAY ANALYSIS

A. If the **Owner** refuses to endorse any Revision Submittal as "Resubmittal Not Required," the **Contractor** and **Owner** will use the latest Official Schedule when evaluating the effect of Delays on Contract Time and/or Contract Price. The procedure to be used will consist of progressively revising the latest Official Schedule at key, subsequent Revision Submittal closing dates. For each Progress Schedule iteration, slippage between actual Milestone Dates and Rev. 0 Milestone Dates will be correlated to Delays occurring solely in that iteration.

B. For each iteration, revisions in Activities, logic ties and restraints affecting Work after the closing date will be included in that Progress Schedule only if they meet any of the following conditions. First, they are Progress Schedule revisions that the **Owner** consented to contemporaneously (i.e., before the closing date) in writing. Second, they reflect comments or objections raised by or on behalf of the **Owner** and that were actually confirmed by the as-built progress. Lastly, they represent **Contractor** schedule recovery plans or other Progress Schedule revisions that were actually confirmed by the as-built progress.

END OF SECTION 01310

This 01310 Specification uses the FORMSPEC™ Section 01310 Model Progress Schedule Specification (CPM Cost-Loaded). Title to and use of this Specification is strictly restricted. Except as may be appropriate for use in the bidding and execution of the Work, reproduction, translation or substantial use or quotation of any part of this Specification beyond that permitted by the 1976 United States Copyright Act without prior written permission of the copyright holder is unlawful.

SECTION 011000 - SUMMARY

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
1. Project information.
2. Work covered by Contract Documents.
3. Phased construction.
4. Work under separate contracts.
5. Access to site.
6. Coordination with occupants.
7. Work restrictions.
8. Specification and drawing conventions.
9. Miscellaneous provisions.

B. Related Requirements:
1. Section 015000 "Temporary Facilities and Controls" for limitations and procedures governing temporary use of Owner's facilities.

1.2 PROJECT INFORMATION

A. Project Identification: Exterior Facade Repairs To: Stevens T. Mason Building.
1. Project Location: 530 W. Allegan Street, Lansing, Michigan 48933.

B. Owner: State of Michigan.
1. Owner's Representative: Chris Kulhanek, Department of Technology, Management & Budget.

C. Architect: Wigen Tincknell Meyer & Associates, Inc.
100 S. Jefferson Avenue, Suite 601
Saginaw, Michigan 48607

1.3 WORK COVERED BY CONTRACT DOCUMENTS

A. The Work of Project is defined by the Contract Documents and consists of the following:
1. Exterior Facade Repairs including, but is not necessarily limited to the masonry facade throughout the entire building, concrete planter walls adjacent to the loading dock and masonry within the East Plaza Area. Repairs include window head flashings, damaged brick, stone, mortar and concrete, and sealant replacement.

B. Type of Contract.
1. Project will be constructed under a single prime contract.

1.4 ACCESS TO SITE

A. General: Contractor shall have full use of Project site for construction operations during construction period. Contractor's use of Project site is limited only by Owner's right to perform work or to retain other contractors on portions of Project.

B. General: Contractor shall have limited use of Project site for construction operations as indicated on Drawings by the Contract limits and as indicated by requirements of this Section.

C. Use of Site: Limit use of Project site to work in areas indicated. Do not disturb portions of Project site beyond areas in which the Work is indicated.

1. Limits: Confine construction operations to exterior of building façade, and interiors where windows are to be replaced.
2. Driveways, Walkways and Entrances: Keep driveways, loading areas, and entrances serving premises clear and available to Owner, Owner's employees, and emergency vehicles at all times. Do not use these areas for parking or storage of materials.
   a. Schedule deliveries to minimize use of driveways and entrances by construction operations.
   b. Schedule deliveries to minimize space and time requirements for storage of materials and equipment on-site.

D. Condition of Existing Building: Maintain portions of existing building affected by construction operations in a weathertight condition throughout construction period. Repair damage caused by construction operations.

1.5 COORDINATION WITH OCCUPANTS

A. Full Owner Occupancy: Owner will occupy site and existing building(s) during entire construction period. Cooperate with Owner during construction operations to minimize conflicts and facilitate Owner usage. Perform the Work so as not to interfere with Owner's day-to-day operations. Maintain existing exits unless otherwise indicated.
1. Maintain access to existing walkways, corridors, and other adjacent occupied or used facilities. Do not close or obstruct walkways, corridors, or other occupied or used facilities without written permission from Owner and approval of authorities having jurisdiction.
2. Notify Owner not less than 72 hours in advance of activities that will affect Owner's operations.

B. Partial Owner Occupancy: Owner will occupy the premises during entire construction period, with the exception of areas under construction. Cooperate with Owner during construction operations to minimize conflicts and facilitate Owner usage. Perform the Work so as not to interfere with Owner's operations. Maintain existing exits unless otherwise indicated.
1. Maintain access to existing walkways, corridors, and other adjacent occupied or used facilities. Do not close or obstruct walkways, corridors, or other occupied or used facilities without written permission from Owner and authorities having jurisdiction.
2. Provide not less than 72 hours' notice to Owner of activities that will affect Owner's operations.

C. Owner Limited Occupancy of Completed Areas of Construction: Owner reserves the right to occupy and to place and install equipment in completed portions of the Work, prior to Substantial Completion of the Work, provided such occupancy does not interfere with completion of the Work. Such placement of equipment and limited occupancy shall not constitute acceptance of the total Work.
1. Architect will prepare a Certificate of Substantial Completion for each specific portion of the Work to be occupied prior to Owner acceptance of the completed Work.
2. Obtain a Certificate of Occupancy from authorities having jurisdiction before limited Owner occupancy.
3. Before limited Owner occupancy, mechanical and electrical systems shall be fully operational, and required tests and inspections shall be successfully completed. On occupancy, Owner will operate and maintain mechanical and electrical systems serving occupied portions of Work.
4. On occupancy, Owner will assume responsibility for maintenance and custodial service for occupied portions of Work.

1.6 WORK RESTRICTIONS

A. Work Restrictions, General: Comply with restrictions on construction operations.
1. Comply with limitations on use of public streets and with other requirements of authorities having jurisdiction.

B. On-Site Work Hours: Limit work in the existing building to normal business working hours, Monday through Friday, unless otherwise indicated.

C. Existing Utility Interruptions: Do not interrupt utilities serving facilities occupied by Owner or others unless permitted under the following conditions and then only after providing temporary utility services according to requirements indicated:
   1. Notify Architect/Owner's not less than two days in advance of proposed utility interruptions.
   2. Obtain Architect/Owner's written permission before proceeding with utility interruptions.

D. Noise, Vibration, and Odors: Coordinate operations that may result in high levels of noise and vibration, odors, or other disruption to Owner occupancy with Owner.
   1. Notify Architect/Owner's not less than two days in advance of proposed disruptive operations.
   2. Obtain Architect/Owner's written permission before proceeding with disruptive operations.

E. Nonsmoking Building: Smoking is not permitted within the building or within 25 feet (8 m) of entrances, operable windows, or outdoor-air intakes.

F. Controlled Substances: Use of tobacco products and other controlled substances within the existing building on Project site is not permitted.

1.7 SPECIFICATION AND DRAWING CONVENTIONS

A. Specification Content: The Specifications use certain conventions for the style of language and the intended meaning of certain terms, words, and phrases when used in particular situations. These conventions are as follows:
   1. Imperative mood and streamlined language are generally used in the Specifications. The words "shall," "shall be," or "shall comply with," depending on the context, are implied where a colon (:) is used within a sentence or phrase.
   2. Specification requirements are to be performed by Contractor unless specifically stated otherwise.

B. **Should a conflict exist between a section of the MICHSPEC™ DTMB Construction Documents and a section other than MICHSPEC™ DTMB, then the MICHSPEC™ section shall supersede the other.**

C. Division 01 General Requirements: Requirements of Sections in Division 01 apply to the Work of all Sections in the Specifications.

D. Drawing Coordination: Requirements for materials and products identified on Drawings are described in detail in the Specifications. One or more of the following are used on Drawings to identify materials and products:
   1. Terminology: Materials and products are identified by the typical generic terms used in the individual Specifications Sections.
   2. Abbreviations: Materials and products are identified by abbreviations published as part of the U.S. National CAD Standard and scheduled on Drawings.
   3. Keynoting: Materials and products are identified by reference keynotes referencing Specification Section numbers found in this Project Manual.

1.8 MISCELLANEOUS PROVISIONS

(Not Used)

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 011000

SECTION 012100 - ALLOWANCES

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes administrative and procedural requirements governing allowances.
B. Types of allowances include the following:
   1. Owner's Contingency allowance.
C. Related Requirements:
   1. Section 012200 "Unit Prices" for procedures for using unit prices.
   2. Section 014000 "Quality Requirements" for procedures governing the use of allowances for testing and inspecting.

1.2 SELECTION AND PURCHASE

A. At the earliest practical date after award of the Contract, advise Architect of the date when final selection and purchase of each product or system described by an allowance must be completed to avoid delaying the Work.
B. At Architect's request, obtain proposals for each allowance for use in making final selections. Include recommendations that are relevant to performing the Work.
C. Purchase products and systems selected by Architect from the designated supplier.

1.3 ACTION SUBMITTALS

A. Submit proposals for purchase of products or systems included in allowances, in the form specified for Change Orders.

1.4 INFORMATIONAL SUBMITTALS

A. Submit invoices or delivery slips to show actual quantities of materials delivered to the site for use in fulfillment of each allowance.
B. Submit time sheets and other documentation to show labor time and cost for installation of allowance items that include installation as part of the allowance.
C. Coordinate and process submittals for allowance items in same manner as for other portions of the Work.

1.5 COORDINATION

A. Coordinate allowance items with other portions of the Work. Furnish templates as required to coordinate installation.

1.6 ALLOWANCE

A. Allowance shall include cost to Contractor of specific products and materials ordered by Owner or selected by Architect under allowance and shall include taxes, freight, and delivery to Project site.
B. Unless otherwise indicated, Contractor's costs for receiving and handling at Project site, labor, installation, overhead and profit, and similar costs related to products and materials under allowance shall be included as part of the Contract Sum and not part of the allowance.
C. Unused Materials: Return unused materials purchased under an allowance to manufacturer or supplier for credit to Owner, after installation has been completed and accepted.
   1. If requested by Architect, retain and prepare unused material for storage by Owner. Deliver unused material to Owner's storage space as directed.

1.7 OWNER'S CONTINGENCY ALLOWANCE

A. Use the contingency allowance only as directed by Architect for Owner's purposes and only by Change Orders that indicate amounts to be charged to the allowance.

B. Contractor's related costs for products and equipment ordered by Owner under the contingency allowance are included in the allowance and are not part of the Contract Sum. These costs include delivery, installation, taxes, insurance, equipment rental, and similar costs.

C. Change Orders authorizing use of funds from the contingency allowance will include Contractor's related costs and reasonable overhead and profit margins.

D. At Project closeout, credit unused amounts remaining in the contingency allowance to Owner by Change Order.

1.8 ADJUSTMENT OF ALLOWANCES

A. Allowance Adjustment: To adjust allowance amounts, prepare a Change Order proposal based on the difference between purchase amount and the allowance, multiplied by final measurement of work-in-place where applicable. If applicable, include reasonable allowances for cutting losses, tolerances, mixing wastes, normal product imperfections, and similar margins.
   1. Include installation costs in purchase amount only where indicated as part of the allowance.
   2. If requested, prepare explanation and documentation to substantiate distribution of overhead costs and other margins claimed.
   3. Submit substantiation of a change in scope of work, if any, claimed in Change Orders related to unit-cost allowances.
   4. Owner reserves the right to establish the quantity of work-in-place by independent quantity survey, measure, or count.

B. Submit claims for increased costs because of a change in scope or nature of the allowance described in the Contract Documents, whether for the purchase order amount or Contractor's handling, labor, installation, overhead, and profit.
   1. Do not include Contractor's or subcontractor's indirect expense in the Change Order cost amount unless it is clearly shown that the nature or extent of work has changed from what could have been foreseen from information in the Contract Documents.
   2. No change to Contractor's indirect expense is permitted for selection of higher- or lower-priced materials or systems of the same scope and nature as originally indicated.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine products covered by an allowance promptly on delivery for damage or defects. Return damaged or defective products to manufacturer for replacement.

3.2 PREPARATION

A. Coordinate materials and their installation for each allowance with related materials and installations to ensure that each allowance item is completely integrated and interfaced with related work.

3.3 SCHEDULE OF ALLOWANCES

A. Allowance No. 1: Owner's Contingency Allowance: Include the sum of $150,000.00.
   1. Coordinate quantity allowance adjustment with corresponding unit-price requirements in Section 012200 "Unit Prices."

END OF SECTION 012100

SECTION 012200 - UNIT PRICES

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes administrative and procedural requirements for unit prices.
B. Related Requirements:
   1. Section 012600 "Contract Modification Procedures" for procedures for submitting and handling Change Orders.

1.2 DEFINITIONS

A. Unit price is an amount incorporated in the Agreement, applicable during the duration of the Work as a price per unit of measurement for materials, equipment, or services, or a portion of the Work, added to or deducted from the Contract Sum by appropriate modification, if the scope of Work or estimated quantities of Work required by the Contract Documents are increased or decreased.

1.3 PROCEDURES

A. Unit prices include all necessary material, plus cost for delivery, installation, insurance, applicable taxes, overhead, and profit.
B. Measurement and Payment: See individual Specification Sections for work that requires establishment of unit prices. Methods of measurement and payment for unit prices are specified in those Sections.
C. Owner reserves the right to reject Contractor's measurement of work-in-place that involves use of established unit prices and to have this work measured, at Owner's expense, by an independent surveyor acceptable to Contractor.
D. List of Unit Prices: A schedule of unit prices is included in Part 3. Specification Sections referenced in the schedule contain requirements for materials described under each unit price.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 SCHEDULE OF UNIT PRICES

A. Unit Price No. 1: (MICHSPEC 7.2.1) ADD or DEDUCT $_____
   1. Description: Remove existing stone mortar to a depth of one (1) inch minimum and repoint with new mortar.
   2. Unit of Measurement: One (1) Lineal Foot.
B. Unit Price No. 2: (MICHSPEC 7.2.2) ADD or DEDUCT $_____
   1. Description: Remove existing brick mortar to a depth of one (1) inch minimum and repoint with new mortar.
   2. Unit of Measurement: One (1) Lineal Foot.
C. Unit Price No. 3: (MICHSPEC 7.2.3) ADD or DEDUCT $_____
   1. Description: Remove one (1) isolated brick unit and replace with new brick. This unit price shall not be considered for removal/replacement of four (4) or more adjacent brick units.
   2. Unit of Measurement: One (1) Brick Unit.
D. Unit Price No. 4: (MICHSPEC 7.2.4) ADD or DEDUCT $_____
   1. Description: Remove seven (7) full brick units and replace with new brick. Based on seven(7) brick units per square foot. This unit price shall be used where seven (7) or more brick units are removed and replaced at a repair location.
   2. Unit of Measurement: One (1) Square Foot.
E. Unit Price No. 5: (MICHSPEC 7.2.5) ADD or DEDUCT $_____
   1. Description: Remove one (1) lineal foot (single course) of brick and replace with new brick.

2. Unit of Measurement: One (1) Lineal Foot.

F. Unit Price No. 6: (MICHSPEC 7.2.6) ADD or DEDUCT $_____
1. Description: Remove existing sealant and backer rod from existing masonry joint. Install new backer rod and sealant.
2. Unit of Measurement: One (1) Lineal Foot.

G. Unit Price No. 7: (MICHSPEC 7.2.7) ADD $_____
1. Description: Saw cut into brick and mortar a new expansion joint with a minimum width of 1/2 inch. Install new backer rod and sealant.
2. Unit of Measurement: One (1) Lineal Foot.

H. Unit Price No. 8: (MICHSPEC 7.2.8) ADD or DEDUCT $_____
1. Description: Install new cementitious crystalline waterproofing per Specification Section 07160.1 to surface of existing concrete wall.
2. Unit of Measurement: One (1) Square Foot.

I. Unit Price No. 9: (MICHSPEC 7.2.9) ADD or DEDUCT $_____
1. Description: Install new cementitious crystalline waterproofing per Specification Section 07160.2 to surface of existing concrete wall.
2. Unit of Measurement: One (1) Square Foot.

J. Unit Price No. 10: (MICHSPEC 7.2.10) DEDUCT $_____
1. Description: Perform all work associated with installing new flashings and sealant at (1) one complete window head location per Enlarged Elevation 1/A5.3 and Details 2/A7.1, 4/A7.1, 5/A7.1, 1/A7.2, 2/A7.2, 3/A7.2, 4/A7.2, 5/A7.2, 6/A7.2, 7/A7.2, 8/A7.2, 11/A7.2, 12/A7.2, 13/A7.2, 14/A7.2, 15/A7.2 and 16/A7.2.
2. Unit of Measurement: One (1) Location.

K. Unit Price No. 11: (MICHSPEC 7.2.11) ADD or DEDUCT $_____
1. Description: Typical to Change Order Price 7.2.10 except to also add the complete removal of six (6) full existing Mankato stone panels between the window units and installation of new stainless steel through-wall flashing along with installation of six (6) new full panels of Mankato stone matching existing.
2. Unit of Measurement: One (1) Location.

L. Unit Price No. 12: (MICHSPEC 7.2.12) ADD $_____
1. Description: At an area where the contractor had already installed and removed their means of accessing the building's facade, provide an additional total cost for contractor to remobilize, reinstall means to access facade and then remove accessible means of access completely. This shall take place at one (1) complete window bay and the bay's adjacent piers for the entire height of the building.
2. Unit of Measurement: One (1) Window Bay Drop, Full Height of Building.

M. Unit Price No. 13: (MICHSPEC 7.2.13) ADD $_____
1. Description: Remove one (1) typical isolated limestone panel and replace with new limestone matching existing. Base size of panel on existing panels at the inside surface of the end piers, adjacent to the window heads.
2. Unit of Measurement: One (1) Limestone Panel.

N. Unit Price No. 14: (MICHSPEC 7.2.14) ADD $_____
1. Description: Remove one (1) typical Mankato stone panel between window units and replace with new Mankato stone matching existing.
2. Unit of Measurement: One (1) Mankato Panel.

END OF SECTION 012200

SECTION 012600 - CONTRACT MODIFICATION PROCEDURES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section includes administrative and procedural requirements for handling and processing Contract modifications.

B. Related Requirements:
   1. Section 012500 "Substitution Procedures" for administrative procedures for handling requests for substitutions made after the Contract award.

1.3 MINOR CHANGES IN THE WORK

A. Architect will issue supplemental instructions authorizing minor changes in the Work, not involving adjustment to the Contract Sum or the Contract Time, on AIA Document G710, "Architect's Supplemental Instructions."

1.4 PROPOSAL REQUESTS

A. Owner-Initiated Proposal Requests: Architect will issue a detailed description of proposed changes in the Work that may require adjustment to the Contract Sum or the Contract Time. If necessary, the description will include supplemental or revised Drawings and Specifications.
   1. Work Change Proposal Requests issued by Architect are not instructions either to stop work in progress or to execute the proposed change.
   2. Within 14 days after receipt of Proposal Request, submit a quotation estimating cost adjustments to the Contract Sum and the Contract Time necessary to execute the change.
      a. Include a list of quantities of products required or eliminated and unit costs, with total amount of purchases and credits to be made. If requested, furnish survey data to substantiate quantities.
      b. Indicate applicable taxes, delivery charges, equipment rental, and amounts of trade discounts.
      c. Include costs of labor and supervision directly attributable to the change.
      d. Include an updated Contractor's construction schedule that indicates the effect of the change, including, but not limited to, changes in activity duration, start and finish times, and activity relationship. Use available total float before requesting an extension of the Contract Time.

B. Contractor-Initiated Proposals: If latent or changed conditions require modifications to the Contract, Contractor may initiate a claim by submitting a request for a change to Architect.
   1. Include a statement outlining reasons for the change and the effect of the change on the Work. Provide a complete description of the proposed change. Indicate the effect of the proposed change on the Contract Sum and the Contract Time.
   2. Include a list of quantities of products required or eliminated and unit costs, with total amount of purchases and credits to be made. If requested, furnish survey data to substantiate quantities.
   3. Indicate applicable taxes, delivery charges, equipment rental, and amounts of trade discounts.
   4. Include costs of labor and supervision directly attributable to the change.

5. Include an updated Contractor's construction schedule that indicates the effect of the change, including, but not limited to, changes in activity duration, start and finish times, and activity relationship. Use available total float before requesting an extension of the Contract Time.
6. Comply with requirements in Section 012500 "Substitution Procedures" if the proposed change requires substitution of one product or system for product or system specified.

1.5 ADMINISTRATIVE CHANGE ORDERS

A. Allowance Adjustment: See Section 012100 "Allowances" for administrative procedures for preparation of Change Order Proposal for adjusting the Contract Sum to reflect actual costs of allowances.
B. Unit Price Adjustment: See Section 012200 "Unit Prices" for administrative procedures for preparation of Change Order Proposal for adjusting the Contract Sum to reflect measured scope of unit-price work.

1.6 CHANGE ORDER PROCEDURES

A. On Owner's approval of a Work Changes Proposal Request, Architect will issue a Change Order for signatures of Owner and Contractor on AIA Document G701.

1.7 CONSTRUCTION CHANGE DIRECTIVE

A. Construction Change Directive: Architect may issue a Construction Change Directive on AIA Document G714. Construction Change Directive instructs Contractor to proceed with a change in the Work, for subsequent inclusion in a Change Order.
   1. Construction Change Directive contains a complete description of change in the Work. It also designates method to be followed to determine change in the Contract Sum or the Contract Time.

B. Documentation: Maintain detailed records on a time and material basis of work required by the Construction Change Directive.
   1. After completion of change, submit an itemized account and supporting data necessary to substantiate cost and time adjustments to the Contract.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 012600

SECTION 012900 - PAYMENT PROCEDURES

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes administrative and procedural requirements necessary to prepare and process Applications for Payment.

B. Related Requirements:
   1. Section 012100 "Allowances" for procedural requirements governing the handling and processing of allowances.
   2. Section 012200 "Unit Prices" for administrative requirements governing the use of unit prices.
   3. Section 012600 "Contract Modification Procedures" for administrative procedures for handling changes to the Contract.
   4. Section 013200 "Construction Progress Documentation" for administrative requirements governing the preparation and submittal of the Contractor's construction schedule.

1.2 SCHEDULE OF VALUES

A. Coordination: Coordinate preparation of the schedule of values with preparation of Contractor's construction schedule.
   1. Coordinate line items in the schedule of values with other required administrative forms and schedules, including the following:
      a. Application for Payment forms with continuation sheets.
      b. Submittal schedule.
      c. Items required to be indicated as separate activities in Contractor's construction schedule.
   2. Submit the schedule of values to Architect at earliest possible date but no later than seven days before the date scheduled for submittal of initial Applications for Payment.
   3. Subschedules for Phased Work: Where the Work is separated into phases requiring separately phased payments, provide subschedules showing values coordinated with each phase of payment.

B. Format and Content: Use Project Manual table of contents as a guide to establish line items for the schedule of values. Provide at least one line item for each Specification Section.
   1. Identification: Include the following Project identification on the schedule of values:
      a. Project name and location.
      b. Name of Architect.
      c. Architect's project number.
      d. Contractor's name and address.
      e. Date of submittal.
   2. Arrange schedule of values consistent with format of AIA Document.
   3. Arrange the schedule of values in tabular form with separate columns to indicate the following for each item listed:
      a. Related Specification Section or Division.
      b. Description of the Work.
      c. Name of subcontractor.
      d. Name of manufacturer or fabricator.
      e. Name of supplier.
      f. Change Orders (numbers) that affect value.
      g. Dollar value of the following, as a percentage of the Contract Sum to nearest one-hundredth percent, adjusted to total 100 percent.
         1) Labor.
         2) Materials.
         3) Equipment.

4. Provide a breakdown of the Contract Sum in enough detail to facilitate continued evaluation of Applications for Payment and progress reports. Coordinate with Project Manual table of contents. Provide multiple line items for principal subcontract amounts in excess of five percent of the Contract Sum.
5. Round amounts to nearest whole dollar; total shall equal the Contract Sum.
6. Provide a separate line item in the schedule of values for each part of the Work where Applications for Payment may include materials or equipment purchased or fabricated and stored, but not yet installed.
7. Provide separate line items in the schedule of values for initial cost of materials, for each subsequent stage of completion, and for total installed value of that part of the Work.
8. Allowances: Provide a separate line item in the schedule of values for each allowance. Show line-item value of unit-cost allowances, as a product of the unit cost, multiplied by measured quantity. Use information indicated in the Contract Documents to determine quantities.
9. Each item in the schedule of values and Applications for Payment shall be complete. Include total cost and proportionate share of general overhead and profit for each item.
    a. Temporary facilities and other major cost items that are not direct cost of actual work-in-place may be shown either as separate line items in the schedule of values or distributed as general overhead expense, at Contractor's option.
10. Schedule Updating: Update and resubmit the schedule of values before the next Applications for Payment when Change Orders or Construction Change Directives result in a change in the Contract Sum.

1.3 APPLICATIONS FOR PAYMENT

A. Each Application for Payment shall be consistent with previous applications and payments as certified by Architect and paid for by Owner.
    1. Initial Application for Payment, Application for Payment at time of Substantial Completion, and final Application for Payment involve additional requirements.

B. Payment Application Times: The date for each progress payment is indicated in the Agreement between Owner and Contractor. The period of construction work covered by each Application for Payment is the period indicated in the Agreement.

C. Payment Application Times: Submit Application for Payment to Architect by the tenth of the month. The period covered by each Application for Payment is one month, ending on the last day of the month.
    1. Submit draft copy of Application for Payment seven days prior to due date for review by Architect.

D. Application for Payment Forms: Use AIA Document G702 and AIA Document G703 as form for Applications for Payment.

E. Application for Payment Forms: Use forms provided by Owner for Applications for Payment. Sample copies are included in Project Manual.

F. Application Preparation: Complete every entry on form. Notarize and execute by a person authorized to sign legal documents on behalf of Contractor. Architect will return incomplete applications without action.
    1. Entries shall match data on the schedule of values and Contractor's construction schedule. Use updated schedules if revisions were made.
    2. Include amounts of Change Orders and Construction Change Directives issued before last day of construction period covered by application.
    3. Include amounts of Change Orders and Construction Change Directives issued before last day of construction period covered by application.
    4. Indicate separate amounts for work being carried out under Owner-requested project acceleration.

G. Stored Materials: Include in Application for Payment amounts applied for materials or equipment purchased or fabricated and stored, but not yet installed. Differentiate between items stored on-site and items stored off-site.
    1. Provide certificate of insurance, evidence of transfer of title to Owner, and consent of surety to payment, for stored materials.
    2. Provide supporting documentation that verifies amount requested, such as paid invoices. Match amount requested with amounts indicated on documentation; do not include overhead and profit on stored materials.

3. Provide summary documentation for stored materials indicating the following:

    a. Value of materials previously stored and remaining stored as of date of previous Applications for Payment.
    b. Value of previously stored materials put in place after date of previous Application for Payment and on or before date of current Application for Payment.
    c. Value of materials stored since date of previous Application for Payment and remaining stored as of date of current Application for Payment.

H. Transmittal: Submit three signed and notarized original copies of each Application for Payment to Architect by a method ensuring receipt within 24 hours. One copy shall include waivers of lien and similar attachments if required.
1. Transmit each copy with a transmittal form listing attachments and recording appropriate information about application.

I. Waivers of Mechanic's Lien: With each Application for Payment, submit waivers of mechanic's lien from entities lawfully entitled to file a mechanic's lien arising out of the Contract and related to the Work covered by the payment.
1. Submit partial waivers on each item for amount requested in previous application, after deduction for retainage, on each item.
2. When an application shows completion of an item, submit conditional final or full waivers.
3. Owner reserves the right to designate which entities involved in the Work must submit waivers.
4. Waiver Forms: Submit executed waivers of lien on forms acceptable to Owner.

J. Initial Application for Payment: Administrative actions and submittals that must precede or coincide with submittal of first Application for Payment include the following:
1. List of subcontractors.
2. Schedule of values.
3. LEED submittal for project materials cost data.
4. Contractor's construction schedule (preliminary if not final).
5. LEED action plans.
6. Schedule of unit prices.
7. Submittal schedule (preliminary if not final).
8. List of Contractor's staff assignments.
9. List of Contractor's principal consultants.
10. Copies of building permits.
11. Copies of authorizations and licenses from authorities having jurisdiction for performance of the Work.
12. Initial progress report.
13. Report of preconstruction conference.
14. Certificates of insurance and insurance policies.

K. Application for Payment at Substantial Completion: After Architect issues the Certificate of Substantial Completion, submit an Application for Payment showing 100 percent completion for portion of the Work claimed as substantially complete.
1. Include documentation supporting claim that the Work is substantially complete and a statement showing an accounting of changes to the Contract Sum.
2. This application shall reflect Certificates of Partial Substantial Completion issued previously for Owner occupancy of designated portions of the Work.

L. Final Payment Application: After completing Project closeout requirements, submit final Application for Payment with releases and supporting documentation not previously submitted and accepted, including, but not limited, to the following:
1. Evidence of completion of Project closeout requirements.
2. Insurance certificates for products and completed operations where required and proof that taxes, fees, and similar obligations were paid.

3. Updated final statement, accounting for final changes to the Contract Sum.
4. AIA Document G706-1994, "Contractor's Affidavit of Payment of Debts and Claims."
5. AIA Document G706A-1994, "Contractor's Affidavit of Release of Liens."
6. AIA Document G707-1994, "Consent of Surety to Final Payment."
7. Evidence that claims have been settled.
8. Final meter readings for utilities, a measured record of stored fuel, and similar data as of date of Substantial Completion or when Owner took possession of and assumed responsibility for corresponding elements of the Work.
9. Final liquidated damages settlement statement.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 012900

SECTION 013100 - PROJECT MANAGEMENT AND COORDINATION

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes administrative provisions for coordinating construction operations on Project including, but not limited to, the following:
   1. Coordination drawings.
   2. Requests for Information (RFIs).
   3. Project Web site.
   4. Project meetings.

B. Related Requirements:
   1. Section 011200 "Multiple Contract Summary" for a description of the division of work among separate contracts and responsibility for coordination activities not in this Section.
   2. Section 017300 "Execution" for procedures for coordinating general installation and field-engineering services, including establishment of benchmarks and control points.

1.2 DEFINITIONS

A. RFI: Request from Owner, Architect, or Contractor seeking information required by or clarifications of the Contract Documents.

1.3 INFORMATIONAL SUBMITTALS

A. Subcontract List: Prepare a written summary identifying individuals or firms proposed for each portion of the Work, including those who are to furnish products or equipment fabricated to a special design. Include the following information in tabular form:
   1. Name, address, and telephone number of entity performing subcontract or supplying products.
   2. Number and title of related Specification Section(s) covered by subcontract.
   3. Drawing number and detail references, as appropriate, covered by subcontract.

1.4 GENERAL COORDINATION PROCEDURES

A. Coordination: Coordinate construction operations included in different Sections of the Specifications to ensure efficient and orderly installation of each part of the Work. Coordinate construction operations, included in different Sections, that depend on each other for proper installation, connection, and operation.
   1. Schedule construction operations in sequence required to obtain the best results where installation of one part of the Work depends on installation of other components, before or after its own installation.
   2. Coordinate installation of different components to ensure maximum performance and accessibility for required maintenance, service, and repair.
   3. Make adequate provisions to accommodate items scheduled for later installation.

B. Prepare memoranda for distribution to each party involved, outlining special procedures required for coordination. Include such items as required notices, reports, and list of attendees at meetings.
   1. Prepare similar memoranda for Owner and separate contractors if coordination of their Work is required.

C. Administrative Procedures: Coordinate scheduling and timing of required administrative procedures with other construction activities and activities of other contractors to avoid conflicts and to ensure orderly progress of the Work. Such administrative activities include, but are not limited to, the following:
   1. Preparation of Contractor's construction schedule.
   2. Preparation of the schedule of values.
   3. Installation and removal of temporary facilities and controls.

4. Delivery and processing of submittals.
5. Progress meetings.
6. Preinstallation conferences.
7. Project closeout activities.
8. Startup and adjustment of systems.

1.5 COORDINATION DRAWINGS

A. Coordination Drawings, General: Prepare coordination drawings according to requirements in individual Sections, where installation is not completely shown on Shop Drawings, where limited space availability necessitates coordination, or if coordination is required to facilitate integration of products and materials fabricated or installed by more than one entity.
   1. Content: Project-specific information, drawn accurately to a scale large enough to indicate and resolve conflicts. Do not base coordination drawings on standard printed data. Include the following information, as applicable:
      a. Indicate functional and spatial relationships of components of architectural, structural, civil, mechanical, and electrical systems.
      b. Indicate dimensions shown on the Drawings. Specifically note dimensions that appear to be in conflict with submitted equipment and minimum clearance requirements. Provide alternate sketches to Architect indicating proposed resolution of such conflicts. Minor dimension changes and difficult installations will not be considered changes to the Contract.

B. Coordination Drawing Organization: Organize coordination drawings as follows:
   1. Floor Plans and Reflected Ceiling Plans: Show architectural and structural elements, and mechanical, plumbing, fire-protection, fire-alarm, and electrical Work. Show locations of visible ceiling-mounted devices relative to acoustical ceiling grid.
   2. Plenum Space: Indicate subframing for support of ceiling and wall systems, mechanical and electrical equipment, and related Work. Locate components within ceiling plenum to accommodate layout of light fixtures indicated on Drawings.
   3. Mechanical Rooms: Provide coordination drawings for mechanical rooms showing plans and elevations of mechanical, plumbing, fire-protection, fire-alarm, and electrical equipment.
   4. Structural Penetrations: Indicate penetrations and openings required for all disciplines.
   5. Slab Edge and Embedded Items: Indicate slab edge locations and sizes and locations of embedded items for metal fabrications, sleeves, anchor bolts, bearing plates, angles, door floor closers, slab depressions for floor finishes, curbs and housekeeping pads, and similar items.
   6. Review: Architect will review coordination drawings to confirm that the Work is being coordinated, but not for the details of the coordination, which are Contractor's responsibility.

1.6 REQUESTS FOR INFORMATION (RFIs)

A. General: Immediately on discovery of the need for additional information or interpretation of the Contract Documents, Contractor shall prepare and submit an RFI in the form specified.
   1. Architect will return RFIs submitted to Architect by other entities controlled by Contractor with no response.
   2. Coordinate and submit RFIs in a prompt manner so as to avoid delays in Contractor's work or work of subcontractors.

B. Content of the RFI: Include a detailed, legible description of item needing information or interpretation and the following:
   1. Project name.
   2. Project number.
   3. Date.
   4. Name of Contractor.
   5. Name of Architect.
   6. RFI number, numbered sequentially.

7. RFI subject.
8. Specification Section number and title and related paragraphs, as appropriate.
9. Drawing number and detail references, as appropriate.
10. Field dimensions and conditions, as appropriate.
11. Contractor's suggested resolution. If Contractor's solution(s) impacts the Contract Time or the Contract Sum, Contractor shall state impact in the RFI.
12. Contractor's signature.
13. Attachments: Include sketches, descriptions, measurements, photos, Product Data, Shop Drawings, coordination drawings, and other information necessary to fully describe items needing interpretation.

C. RFI Forms: Software-generated form with substantially the same content as indicated above, acceptable to Architect.
1. Attachments shall be electronic files in Adobe Acrobat PDF format.

D. Architect's Action: Architect will review each RFI, determine action required, and respond. Allow seven working days for Architect's response for each RFI. RFIs received by Architect after 1:00 p.m. will be considered as received the following working day.
1. The following RFIs will be returned without action:
   a. Requests for approval of submittals.
   b. Requests for approval of substitutions.
   c. Requests for coordination information already indicated in the Contract Documents.
   d. Requests for adjustments in the Contract Time or the Contract Sum.
   e. Requests for interpretation of Architect's actions on submittals.
   f. Incomplete RFIs or inaccurately prepared RFIs.
2. Architect's action may include a request for additional information, in which case Architect's time for response will date from time of receipt of additional information.
3. Architect's action on RFIs that may result in a change to the Contract Time or the Contract Sum may be eligible for Contractor to submit Change Proposal according to Section 012600 "Contract Modification Procedures."
   a. If Contractor believes the RFI response warrants change in the Contract Time or the Contract Sum, notify Architect in writing within 10 days of receipt of the RFI response.

E. RFI Log: Prepare, maintain, and submit a tabular log of RFIs organized by the RFI number. Submit log weekly. Include the following:
1. Project name.
2. Name and address of Contractor.
3. Name and address of Architect.
4. RFI number including RFIs that were dropped and not submitted.
5. RFI description.
6. Date the RFI was submitted.
7. Date Architect's response was received.

F. On receipt of Architect's action, update the RFI log and immediately distribute the RFI response to affected parties. Review response and notify Architect within seven days if Contractor disagrees with response.
1. Identification of related Minor Change in the Work, Construction Change Directive, and Proposal Request, as appropriate.
2. Identification of related Field Order, Work Change Directive, and Proposal Request, as appropriate.

1.7 PROJECT MEETINGS

A. General: Schedule and conduct meetings and conferences at Project site unless otherwise indicated.
1. Attendees: Inform participants and others involved, and individuals whose presence is required, of date and time of each meeting. Notify Owner and Architect of scheduled meeting dates and times.
2. Agenda: Prepare the meeting agenda. Distribute the agenda to all invited attendees.

3. Minutes: Entity responsible for conducting meeting will record significant discussions and agreements achieved. Distribute the meeting minutes to everyone concerned, including Owner and Architect, within three days of the meeting.

B. Preconstruction Conference: Architect will schedule and conduct a preconstruction conference before starting construction, at a time convenient to Owner and Architect, but no later than 15 days after execution of the Agreement.
1. Attendees: Authorized representatives of Owner, Architect, and their consultants; Contractor and its superintendent; major subcontractors; suppliers; and other concerned parties shall attend the conference. Participants at the conference shall be familiar with Project and authorized to conclude matters relating to the Work.
2. Agenda: Discuss items of significance that could affect progress, including the following:
   a. Tentative construction schedule.
   b. Phasing.
   c. Critical work sequencing and long-lead items.
   d. Designation of key personnel and their duties.
   e. Procedures for processing field decisions and Change Orders.
   f. Procedures for RFIs.
   g. Procedures for testing and inspecting.
   h. Procedures for processing Applications for Payment.
   i. Distribution of the Contract Documents.
   j. Submittal procedures.
   k. Preparation of record documents.
   l. Use of the premises and existing building.
   m. Work restrictions.
   n. Working hours.
   o. Owner's occupancy requirements.
   p. Responsibility for temporary facilities and controls.
   q. Procedures for moisture and mold control.
   r. Procedures for disruptions and shutdowns.
   s. Construction waste management and recycling.
   t. Parking availability.
   u. Office, work, and storage areas.
   v. Equipment deliveries and priorities.
   w. First aid.
   x. Security.
   y. Progress cleaning.
3. Minutes: Entity responsible for conducting meeting will record and distribute meeting minutes.

C. Preinstallation Conferences: Conduct a preinstallation conference at Project site before each construction activity that requires coordination with other construction.
1. Attendees: Installer and representatives of manufacturers and fabricators involved in or affected by the installation and its coordination or integration with other materials and installations that have preceded or will follow, shall attend the meeting. Advise Architect of scheduled meeting dates.
2. Agenda: Review progress of other construction activities and preparations for the particular activity under consideration, including requirements for the following:
   a. Contract Documents.
   b. Options.
   c. Related RFIs.
   d. Related Change Orders.
   e. Purchases.
   f. Deliveries.
   g. Submittals.
   h. Review of mockups.
   i. Possible conflicts.

j. Compatibility problems.
k. Time schedules.
l. Weather limitations.
m. Manufacturer's written instructions.
n. Warranty requirements.
o. Compatibility of materials.
p. Acceptability of substrates.
q. Temporary facilities and controls.
r. Space and access limitations.
s. Regulations of authorities having jurisdiction.
t. Testing and inspecting requirements.
u. Installation procedures.
v. Coordination with other work.
w. Required performance results.
x. Protection of adjacent work.
y. Protection of construction and personnel.

3. Record significant conference discussions, agreements, and disagreements, including required corrective measures and actions.
4. Reporting: Distribute minutes of the meeting to each party present and to other parties requiring information.
5. Do not proceed with installation if the conference cannot be successfully concluded. Initiate whatever actions are necessary to resolve impediments to performance of the Work and reconvene the conference at earliest feasible date.

D. Progress Meetings: Conduct progress meetings at biweekly intervals.
1. Attendees: In addition to representatives of Owner, and Architect, each contractor, subcontractor, supplier, and other entity concerned with current progress or involved in planning, coordination, or performance of future activities shall be represented at these meetings. All participants at the meeting shall be familiar with Project and authorized to conclude matters relating to the Work.
2. Agenda: Review and correct or approve minutes of previous progress meeting. Review other items of significance that could affect progress. Include topics for discussion as appropriate to status of Project.
   a. Contractor's Construction Schedule: Review progress since the last meeting. Determine whether each activity is on time, ahead of schedule, or behind schedule, in relation to Contractor's construction schedule. Determine how construction behind schedule will be expedited; secure commitments from parties involved to do so. Discuss whether schedule revisions are required to ensure that current and subsequent activities will be completed within the Contract Time.
      1) Review schedule for next period.
   b. Review present and future needs of each entity present, including the following:
      1) Interface requirements.
      2) Sequence of operations.
      3) Status of submittals.
      4) Deliveries.
      5) Off-site fabrication.
      6) Access.
      7) Site utilization.
      8) Temporary facilities and controls.
      9) Progress cleaning.
      10) Quality and work standards.
      11) Status of correction of deficient items.
      12) Field observations.
      13) Status of RFIs.
      14) Status of proposal requests.
      15) Pending changes.
      16) Status of Change Orders.
      17) Pending claims and disputes.

18) Documentation of information for payment requests.

3. Minutes: Entity responsible for conducting the meeting will record and distribute the meeting minutes to each party present and to parties requiring information.
   a. Schedule Updating: Revise Contractor's construction schedule after each progress meeting where revisions to the schedule have been made or recognized. Issue revised schedule concurrently with the report of each meeting.

E. Coordination Meetings: Conduct Project coordination meetings at regular intervals. Project coordination meetings are in addition to specific meetings held for other purposes, such as progress meetings and preinstallation conferences.
   1. Attendees: In addition to representatives of Owner and Architect, each contractor, subcontractor, supplier, and other entity concerned with current progress or involved in planning, coordination, or performance of future activities shall be represented at these meetings. All participants at the meetings shall be familiar with Project and authorized to conclude matters relating to the Work.
   2. Agenda: Review and correct or approve minutes of the previous coordination meeting. Review other items of significance that could affect progress. Include topics for discussion as appropriate to status of Project.
      a. Combined Contractor's Construction Schedule: Review progress since the last coordination meeting. Determine whether each contract is on time, ahead of schedule, or behind schedule, in relation to combined Contractor's construction schedule. Determine how construction behind schedule will be expedited; secure commitments from parties involved to do so. Discuss whether schedule revisions are required to ensure that current and subsequent activities will be completed within the Contract Time.
      b. Schedule Updating: Revise combined Contractor's construction schedule after each coordination meeting where revisions to the schedule have been made or recognized. Issue revised schedule concurrently with report of each meeting.
      c. Review present and future needs of each contractor present, including the following:
         1) Interface requirements.
         2) Sequence of operations.
         3) Resolution of BIM component conflicts.
         4) Status of submittals.
         5) Deliveries.
         6) Off-site fabrication.
         7) Access.
         8) Site utilization.
         9) Temporary facilities and controls.
         10) Work hours.
         11) Hazards and risks.
         12) Progress cleaning.
         13) Quality and work standards.
         14) Change Orders.

   3. Reporting: Record meeting results and distribute copies to everyone in attendance and to others affected by decisions or actions resulting from each meeting.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION (Not Used)

END OF SECTION 013100

SECTION 013200 - CONSTRUCTION PROGRESS DOCUMENTATION

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes administrative and procedural requirements for documenting the progress of construction during performance of the Work, including the following:
   1. Contractor's construction schedule.
   2. Construction schedule updating reports.
   3. Daily construction reports.
   4. Site condition reports.

B. Related Requirements:
   1. Section 011200 "Multiple Contract Summary" for preparing a combined Contractor's construction schedule.

1.2 DEFINITIONS

A. Activity: A discrete part of a project that can be identified for planning, scheduling, monitoring, and controlling the construction project. Activities included in a construction schedule consume time and resources.
   1. Critical Activity: An activity on the critical path that must start and finish on the planned early start and finish times.
   2. Predecessor Activity: An activity that precedes another activity in the network.
   3. Successor Activity: An activity that follows another activity in the network.

B. CPM: Critical path method, which is a method of planning and scheduling a construction project where activities are arranged based on activity relationships. Network calculations determine when activities can be performed and the critical path of Project.

C. Critical Path: The longest connected chain of interdependent activities through the network schedule that establishes the minimum overall Project duration and contains no float.

D. Float: The measure of leeway in starting and completing an activity.
   1. Float time is not for the exclusive use or benefit of either Owner or Contractor, but is a jointly owned, expiring Project resource available to both parties as needed to meet schedule milestones and Contract completion date.
   2. Free float is the amount of time an activity can be delayed without adversely affecting the early start of the successor activity.
   3. Total float is the measure of leeway in starting or completing an activity without adversely affecting the planned Project completion date.

1.3 INFORMATIONAL SUBMITTALS

A. Format for Submittals: Submit required submittals in the following format:
   1. Working electronic copy of schedule file, where indicated.
   2. PDF electronic file.
   3. Two paper copies.

B. Startup Network Diagram: Of size required to display entire network for entire construction period. Show logic ties for activities.

C. Contractor's Construction Schedule: Initial schedule, of size required to display entire schedule for entire construction period.
   1. Submit a working electronic copy of schedule, using software indicated, and labeled to comply with requirements for submittals. Include type of schedule (initial or updated) and date on label.

D. CPM Reports: Concurrent with CPM schedule, submit each of the following reports. Format for each activity in reports shall contain activity number, activity description, original duration, remaining duration, early start date, early finish date, late start date, late finish date, and total float in calendar days.
   1. Activity Report: List of all activities sorted by activity number and then early start date, or actual start date if known.
   2. Logic Report: List of preceding and succeeding activities for all activities, sorted in ascending order by activity number and then early start date, or actual start date if known.
   3. Total Float Report: List of all activities sorted in ascending order of total float.
   4. Earnings Report: Compilation of Contractor's total earnings from commencement of the Work until most recent Application for Payment.

E. Construction Schedule Updating Reports: Submit with Applications for Payment.
F. Daily Construction Reports: Submit at weekly intervals.
G. Material Location Reports: Submit at weekly intervals.
H. Site Condition Reports: Submit at time of discovery of differing conditions.
I. Special Reports: Submit at time of unusual event.
J. Qualification Data: For scheduling consultant.

1.4 COORDINATION

A. Coordinate Contractor's construction schedule with the schedule of values, submittal schedule, progress reports, payment requests, and other required schedules and reports.
   1. Secure time commitments for performing critical elements of the Work from entities involved.
   2. Coordinate each construction activity in the network with other activities and schedule them in proper sequence.

PART 2 - PRODUCTS

2.1 CONTRACTOR'S CONSTRUCTION SCHEDULE, GENERAL

A. Time Frame: Extend schedule from date established for commencement of the Work to date of Substantial Completion.
   1. Contract completion date shall not be changed by submission of a schedule that shows an early completion date, unless specifically authorized by Change Order.

B. Activities: Treat each story or separate area as a separate numbered activity for each main element of the Work. Comply with the following:
   1. Activity Duration: Define activities so no activity is longer than 20 days, unless specifically allowed by Architect.
   2. Procurement Activities: Include procurement process activities for the following long lead items and major items, requiring a cycle of more than 60 days, as separate activities in schedule. Procurement cycle activities include, but are not limited to, submittals, approvals, purchasing, fabrication, and delivery.
   3. Submittal Review Time: Include review and resubmittal times indicated in Section 013300 "Submittal Procedures" in schedule. Coordinate submittal review times in Contractor's construction schedule with submittal schedule.
   4. Startup and Testing Time: Include no fewer than 7 days for startup and testing.
   5. Substantial Completion: Indicate completion in advance of date established for Substantial Completion, and allow time for Architect's administrative procedures necessary for certification of Substantial Completion.
   6. Punch List and Final Completion: Include not more than 30 days for completion of punch list items and final completion.

C. Constraints: Include constraints and work restrictions indicated in the Contract Documents and as follows in schedule, and show how the sequence of the Work is affected.
   1. Phasing: Arrange list of activities on schedule by phase.

2. Work under More Than One Contract: Include a separate activity for each contract.
3. Work by Owner: Include a separate activity for each portion of the Work performed by Owner.
4. Products Ordered in Advance: Include a separate activity for each product. Include delivery date indicated in Section 011000 "Summary." Delivery dates indicated stipulate the earliest possible delivery date.
5. Owner-Furnished Products: Include a separate activity for each product. Include delivery date indicated in Section 011000 "Summary." Delivery dates indicated stipulate the earliest possible delivery date.
6. Work Restrictions: Show the effect of the following items on the schedule:
   a. Coordination with existing construction.
   b. Limitations of continued occupancies.
   c. Uninterruptible services.
   d. Partial occupancy before Substantial Completion.
   e. Use of premises restrictions.
   f. Provisions for future construction.
   g. Seasonal variations.
   h. Environmental control.
7. Work Stages: Indicate important stages of construction for each major portion of the Work.
   a. Subcontract awards.
   b. Submittals.
   c. Purchases.
   d. Mockups.
   e. Fabrication.
   f. Sample testing.
   g. Deliveries.
   h. Installation.
   i. Tests and inspections.
   j. Adjusting.
   k. Curing.
   l. Building flush-out.
   m. Startup and placement into final use and operation.
8. Construction Areas: Identify each major area of construction for each major portion of the Work. Indicate where each construction activity within a major area must be sequenced or integrated with other construction activities to provide for the following:
   a. Structural completion.
   b. Temporary enclosure and space conditioning.
   c. Permanent space enclosure.
   d. Completion of mechanical installation.
   e. Completion of electrical installation.
   f. Substantial Completion.

D. Milestones: Include milestones indicated in the Contract Documents in schedule, including, but not limited to, the Notice to Proceed, Substantial Completion, and final completion.
   1. Temporary enclosure and space conditioning.

E. Cost Correlation: Superimpose a cost correlation timeline, indicating planned and actual costs. On the line, show planned and actual dollar volume of the Work performed as of planned and actual dates used for preparation of payment requests.
   1. See Section 012900 "Payment Procedures" for cost reporting and payment procedures.

F. Upcoming Work Summary: Prepare summary report indicating activities scheduled to occur or commence prior to submittal of next schedule update. Summarize the following issues:
   1. Unresolved issues.
   2. Unanswered Requests for Information.
   3. Rejected or unreturned submittals.
   4. Notations on returned submittals.
   5. Pending modifications affecting the Work and Contract Time.

G. Recovery Schedule: When periodic update indicates the Work is 14 or more calendar days behind the current approved schedule, submit a separate recovery schedule indicating means by which Contractor intends to regain compliance with the schedule. Indicate changes to working hours, working days, crew sizes, and equipment required to achieve compliance, and date by which recovery will be accomplished.

2.2 STARTUP CONSTRUCTION SCHEDULE

A. Bar-Chart Schedule: Submit startup, horizontal, bar-chart-type construction schedule within seven days of date established for commencement of the Work.

B. Preparation: Indicate each significant construction activity separately. Identify first workday of each week with a continuous vertical line. Outline significant construction activities for first 90 days of construction. Include skeleton diagram for the remainder of the Work and a cash requirement prediction based on indicated activities.

2.3 CONTRACTOR'S CONSTRUCTION SCHEDULE (GANTT CHART)

A. Gantt-Chart Schedule: Submit a comprehensive, fully developed, horizontal, Gantt-chart-type, Contractor's construction schedule within 14 days of date established for commencement of the Work. Base schedule on the startup construction schedule and additional information received since the start of Project.

B. Preparation: Indicate each significant construction activity separately. Identify first workday of each week with a continuous vertical line.
   1. For construction activities that require three months or longer to complete, indicate an estimated completion percentage in 10 percent increments within time bar.

2.4 CONTRACTOR'S CONSTRUCTION SCHEDULE (CPM SCHEDULE)

A. General: Prepare network diagrams using AON (activity-on-node) format.

B. Startup Network Diagram: Submit diagram within 14 days of date established for commencement of the Work. Outline significant construction activities for the first 90 days of construction. Include skeleton diagram for the remainder of the Work and a cash requirement prediction based on indicated activities.

C. CPM Schedule: Prepare Contractor's construction schedule using a time-scaled CPM network analysis diagram for the Work.
   1. Develop network diagram in sufficient time to submit CPM schedule so it can be accepted for use no later than 60 days after date established for commencement of the Work.
      a. Failure to include any work item required for performance of this Contract shall not excuse Contractor from completing all work within applicable completion dates, regardless of Architect's approval of the schedule.
   2. Conduct educational workshops to train and inform key Project personnel, including subcontractors' personnel, in proper methods of providing data and using CPM schedule information.
   3. Establish procedures for monitoring and updating CPM schedule and for reporting progress. Coordinate procedures with progress meeting and payment request dates.
   4. Use "one workday" as the unit of time for individual activities. Indicate nonworking days and holidays incorporated into the schedule in order to coordinate with the Contract Time.

D. CPM Schedule Preparation: Prepare a list of all activities required to complete the Work. Using the startup network diagram, prepare a skeleton network to identify probable critical paths.
   1. Activities: Indicate the estimated time duration, sequence requirements, and relationship of each activity in relation to other activities. Include estimated time frames for the following activities:
      a. Preparation and processing of submittals.
      b. Mobilization and demobilization.
      c. Purchase of materials.
      d. Delivery.
      e. Fabrication.
      f. Utility interruptions.
      g. Installation.
      h. Work by Owner that may affect or be affected by Contractor's activities.

i. Testing.
j. Punch list and final completion.
k. Activities occurring following final completion.

2. Critical Path Activities: Identify critical path activities, including those for interim completion dates. Scheduled start and completion dates shall be consistent with Contract milestone dates.
3. Processing: Process data to produce output data on a computer-drawn, time-scaled network. Revise data, reorganize activity sequences, and reproduce as often as necessary to produce the CPM schedule within the limitations of the Contract Time.
4. Format: Mark the critical path. Locate the critical path near center of network; locate paths with most float near the edges.
   a. Subnetworks on separate sheets are permissible for activities clearly off the critical path.

E. Contract Modifications: For each proposed contract modification and concurrent with its submission, prepare a time-impact analysis using a network fragment to demonstrate the effect of the proposed change on the overall project schedule.

F. Initial Issue of Schedule: Prepare initial network diagram from a sorted activity list indicating straight "early start-total float." Identify critical activities. Prepare tabulated reports showing the following:
1. Contractor or subcontractor and the Work or activity.
2. Description of activity.
3. Main events of activity.
4. Immediate preceding and succeeding activities.
5. Early and late start dates.
6. Early and late finish dates.
7. Activity duration in workdays.
8. Total float or slack time.
9. Average size of workforce.
10. Dollar value of activity (coordinated with the schedule of values).

G. Schedule Updating: Concurrent with making revisions to schedule, prepare tabulated reports showing the following:
1. Identification of activities that have changed.
2. Changes in early and late start dates.
3. Changes in early and late finish dates.
4. Changes in activity durations in workdays.
5. Changes in the critical path.
6. Changes in total float or slack time.
7. Changes in the Contract Time.

2.5 REPORTS

A. Daily Construction Reports: Prepare a daily construction report recording the following information concerning events at Project site:
1. List of subcontractors at Project site.
2. List of separate contractors at Project site.
3. Approximate count of personnel at Project site.
4. Equipment at Project site.
5. Material deliveries.
6. High and low temperatures and general weather conditions, including presence of rain or snow.
7. Accidents.
8. Meetings and significant decisions.
9. Unusual events.
10. Stoppages, delays, shortages, and losses.
11. Meter readings and similar recordings.
12. Emergency procedures.
13. Orders and requests of authorities having jurisdiction.

14. Change Orders received and implemented.
15. Construction Change Directives received and implemented.
16. Services connected and disconnected.
17. Equipment or system tests and startups.
18. Partial completions and occupancies.
19. Substantial Completions authorized.

B. Site Condition Reports: Immediately on discovery of a difference between site conditions and the Contract Documents, prepare and submit a detailed report. Submit with a Request for Information. Include a detailed description of the differing conditions, together with recommendations for changing the Contract Documents.

PART 3 - EXECUTION

3.1 CONTRACTOR'S CONSTRUCTION SCHEDULE

A. Contractor's Construction Schedule Updating: At monthly intervals, update schedule to reflect actual construction progress and activities. Issue schedule one week before each regularly scheduled progress meeting.
1. Revise schedule immediately after each meeting or other activity where revisions have been recognized or made. Issue updated schedule concurrently with the report of each such meeting.
2. Include a report with updated schedule that indicates every change, including, but not limited to, changes in logic, durations, actual starts and finishes, and activity durations.
3. As the Work progresses, indicate final completion percentage for each activity.

B. Distribution: Distribute copies of approved schedule to Architect, Owner, separate contractors, testing and inspecting agencies, and other parties identified by Contractor with a need-to-know schedule responsibility.
1. Post copies in Project meeting rooms and temporary field offices.
2. When revisions are made, distribute updated schedules to the same parties and post in the same locations. Delete parties from distribution when they have completed their assigned portion of the Work and are no longer involved in performance of construction activities.

END OF SECTION 013200

SECTION 013300 - SUBMITTAL PROCEDURES

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes requirements for the submittal schedule and administrative and procedural requirements for submitting Shop Drawings, Product Data, Samples, and other submittals.

B. Related Requirements:
   1. Section 013200 "Construction Progress Documentation" for submitting schedules and reports, including Contractor's construction schedule.
   2. Section 017823 "Operation and Maintenance Data" for submitting operation and maintenance manuals.
   3. Section 017839 "Project Record Documents" for submitting record Drawings, record Specifications, and record Product Data.
   4. Section 017900 "Demonstration and Training" for submitting video recordings of demonstration of equipment and training of Owner's personnel.

1.2 DEFINITIONS

A. Action Submittals: Written and graphic information and physical samples that require Architect's responsive action. Action submittals are those submittals indicated in individual Specification Sections as "action submittals."

B. Informational Submittals: Written and graphic information and physical samples that do not require Architect's responsive action. Submittals may be rejected for not complying with requirements. Informational submittals are those submittals indicated in individual Specification Sections as "informational submittals."

C. File Transfer Protocol (FTP): Communications protocol that enables transfer of files to and from another computer over a network and that serves as the basis for standard Internet protocols. An FTP site is a portion of a network located outside of network firewalls within which internal and external users are able to access files.

D. Portable Document Format (PDF): An open standard file format licensed by Adobe Systems used for representing documents in a device-independent and display resolution-independent fixed-layout document format.

1.3 ACTION SUBMITTALS

A. Submittal Schedule: Submit a schedule of submittals, arranged in chronological order by dates required by construction schedule. Include time required for review, ordering, manufacturing, fabrication, and delivery when establishing dates. Include additional time required for making corrections or revisions to submittals noted by Architect and additional time for handling and reviewing submittals required by those corrections.
   1. Coordinate submittal schedule with list of subcontracts, the schedule of values, and Contractor's construction schedule.
   2. Initial Submittal: Submit concurrently with startup construction schedule. Include submittals required during the first 60 days of construction. List those submittals required to maintain orderly progress of the Work and those required early because of long lead time for manufacture or fabrication.
   3. Final Submittal: Submit concurrently with the first complete submittal of Contractor's construction schedule.
      a. Submit revised submittal schedule to reflect changes in current status and timing for submittals.
   4. Format: Arrange the following information in a tabular format:
      a. Scheduled date for first submittal.
      b. Specification Section number and title.
      c. Submittal category: Action; informational.
      d. Name of subcontractor.
      e. Description of the Work covered.
      f. Scheduled date for Architect's final release or approval.
      g. Scheduled date of fabrication.
      h. Scheduled dates for purchasing.
      i. Scheduled dates for installation.

j. Activity or event number.

1.4 SUBMITTAL ADMINISTRATIVE REQUIREMENTS

A. Architect's Digital Data Files: Electronic digital data files of the Contract Drawings will not be provided by Architect for Contractor's use in preparing submittals.

B. Coordination: Coordinate preparation and processing of submittals with performance of construction activities.
1. Coordinate each submittal with fabrication, purchasing, testing, delivery, other submittals, and related activities that require sequential activity.
2. Submit all submittal items required for each Specification Section concurrently unless partial submittals for portions of the Work are indicated on approved submittal schedule.
3. Submit action submittals and informational submittals required by the same Specification Section as separate packages under separate transmittals.
4. Coordinate transmittal of different types of submittals for related parts of the Work so processing will not be delayed because of need to review submittals concurrently for coordination.
   a. Architect reserves the right to withhold action on a submittal requiring coordination with other submittals until related submittals are received.

C. Processing Time: Allow time for submittal review, including time for resubmittals, as follows. Time for review shall commence on Architect's receipt of submittal. No extension of the Contract Time will be authorized because of failure to transmit submittals enough in advance of the Work to permit processing, including resubmittals.
1. Initial Review: Allow 15 days for initial review of each submittal. Allow additional time if coordination with subsequent submittals is required. Architect will advise Contractor when a submittal being processed must be delayed for coordination.
2. Intermediate Review: If intermediate submittal is necessary, process it in same manner as initial submittal.
3. Resubmittal Review: Allow 15 days for review of each resubmittal.
4. Sequential Review: Where sequential review of submittals by Architect's consultants, Owner, or other parties is indicated, allow 21 days for initial review of each submittal.
5. Concurrent Consultant Review: Where the Contract Documents indicate that submittals may be transmitted simultaneously to Architect and to Architect's consultants, allow 15 days for review of each submittal. Submittal will be returned to Architect before being returned to Contractor.

D. Paper Submittals: Place a permanent label or title block on each submittal item for identification.
1. Indicate name of firm or entity that prepared each submittal on label or title block.
2. Provide a space approximately 6 by 8 inches (150 by 200 mm) on label or beside title block to record Contractor's review and approval markings and action taken by Architect.
3. Include the following information for processing and recording action taken:
   a. Project name.
   b. Date.
   c. Name of Architect.
   d. Name of Construction Manager.
   e. Name of Contractor.
   f. Name of subcontractor.
   g. Name of supplier.
   h. Name of manufacturer.
   i. Submittal number or other unique identifier, including revision identifier.
      1) Submittal number shall use Specification Section number followed by a decimal point and then a sequential number (e.g., 061000.01). Resubmittals shall include an alphabetic suffix after another decimal point (e.g., 061000.01.A).
   j. Number and title of appropriate Specification Section.
   k. Drawing number and detail references, as appropriate.
   l. Location(s) where product is to be installed, as appropriate.
   m. Other necessary identification.

4. Additional Paper Copies: Unless additional copies are required for final submittal, and unless Architect observes noncompliance with provisions in the Contract Documents, initial submittal may serve as final submittal.
   a. Submit one copy of submittal to concurrent reviewer in addition to specified number of copies to Architect.
5. Transmittal for Paper Submittals: Assemble each submittal individually and appropriately for transmittal and handling. Transmit each submittal using a transmittal form. Architect will return without review submittals received from sources other than Contractor.
   a. Transmittal Form for Paper Submittals: Use AIA Document G810.
   b. Transmittal Form for Paper Submittals: Provide locations on form for the following information:
      1) Project name.
      2) Date.
      3) Destination (To:).
      4) Source (From:).
      5) Name and address of Architect.
      6) Name of Construction Manager.
      7) Name of Contractor.
      8) Name of firm or entity that prepared submittal.
      9) Names of subcontractor, manufacturer, and supplier.
      10) Category and type of submittal.
      11) Submittal purpose and description.
      12) Specification Section number and title.
      13) Specification paragraph number or drawing designation and generic name for each of multiple items.
      14) Drawing number and detail references, as appropriate.
      15) Indication of full or partial submittal.
      16) Transmittal number.
      17) Submittal and transmittal distribution record.
      18) Remarks.
      19) Signature of transmitter.

E. Electronic Submittals: Identify and incorporate information in each electronic submittal file as follows:
1. Assemble complete submittal package into a single indexed file incorporating submittal requirements of a single Specification Section and transmittal form with links enabling navigation to each item.
2. Name file with submittal number or other unique identifier, including revision identifier.
   a. File name shall use project identifier and Specification Section number followed by a decimal point and then a sequential number (e.g., LNHS-061000.01). Resubmittals shall include an alphabetic suffix after another decimal point (e.g., LNHS-061000.01.A).
3. Provide means for insertion to permanently record Contractor's review and approval markings and action taken by Architect.
4. Transmittal Form for Electronic Submittals: Use electronic form acceptable to Owner, containing the following information:
   a. Project name.
   b. Date.
   c. Name and address of Architect.
   d. Name of Construction Manager.
   e. Name of Contractor.
   f. Name of firm or entity that prepared submittal.
   g. Names of subcontractor, manufacturer, and supplier.
   h. Category and type of submittal.
   i. Submittal purpose and description.
   j. Specification Section number and title.
   k. Specification paragraph number or drawing designation and generic name for each of multiple items.
   l. Drawing number and detail references, as appropriate.

m. Location(s) where product is to be installed, as appropriate.
n. Related physical samples submitted directly.
o. Indication of full or partial submittal.
p. Transmittal number.
q. Submittal and transmittal distribution record.
r. Other necessary identification.
s. Remarks.

5. Metadata: Include the following information as keywords in the electronic submittal file metadata:
   a. Project name.
   b. Number and title of appropriate Specification Section.
   c. Manufacturer name.
   d. Product name.

F. Options: Identify options requiring selection by Architect.

G. Deviations and Additional Information: On an attached separate sheet, prepared on Contractor's letterhead, record relevant information, requests for data, revisions other than those requested by Architect on previous submittals, and deviations from requirements in the Contract Documents, including minor variations and limitations. Include same identification information as related submittal.

H. Resubmittals: Make resubmittals in same form and number of copies as initial submittal.
   1. Note date and content of previous submittal.
   2. Note date and content of revision in label or title block and clearly indicate extent of revision.
   3. Resubmit submittals until they are marked with approval notation from Architect's action stamp.

I. Distribution: Furnish copies of final submittals to manufacturers, subcontractors, suppliers, fabricators, installers, authorities having jurisdiction, and others as necessary for performance of construction activities. Show distribution on transmittal forms.

J. Use for Construction: Retain complete copies of submittals on Project site. Use only final action submittals that are marked with approval notation from Architect's action stamp.

PART 2 - PRODUCTS

2.1 SUBMITTAL PROCEDURES

A. General Submittal Procedure Requirements: Prepare and submit submittals required by individual Specification Sections. Types of submittals are indicated in individual Specification Sections.
   1. Post electronic submittals as PDF electronic files directly to Architect's FTP site specifically established for Project.
      a. Architect will return annotated file. Annotate and retain one copy of file as an electronic Project record document file.
   2. Submit electronic submittals via email as PDF electronic files.
      a. Architect will return annotated file. Annotate and retain one copy of file as an electronic Project record document file.
   3. Action Submittals: Submit three paper copies of each submittal unless otherwise indicated. Architect will return two copies.
   4. Informational Submittals: Submit two paper copies of each submittal unless otherwise indicated. Architect will not return copies.
   5. Certificates and Certifications Submittals: Provide a statement that includes signature of entity responsible for preparing certification. Certificates and certifications shall be signed by an officer or other individual authorized to sign documents on behalf of that entity.
      a. Provide a digital signature with digital certificate on electronically submitted certificates and certifications where indicated.
      b. Provide a notarized statement on original paper copy certificates and certifications where indicated.

B. Product Data: Collect information into a single submittal for each element of construction and type of product or equipment.

1. If information must be specially prepared for submittal because standard published data are not suitable for use, submit as Shop Drawings, not as Product Data.
2. Mark each copy of each submittal to show which products and options are applicable.
3. Include the following information, as applicable:
   a. Manufacturer's catalog cuts.
   b. Manufacturer's product specifications.
   c. Standard color charts.
   d. Statement of compliance with specified referenced standards.
   e. Testing by recognized testing agency.
   f. Application of testing agency labels and seals.
   g. Notation of coordination requirements.
   h. Availability and delivery time information.
4. For equipment, include the following in addition to the above, as applicable:
   a. Wiring diagrams showing factory-installed wiring.
   b. Printed performance curves.
   c. Operational range diagrams.
   d. Clearances required to other construction, if not indicated on accompanying Shop Drawings.
5. Submit Product Data before or concurrent with Samples.
6. Submit Product Data in the following format:
   a. PDF electronic file.
   b. Three paper copies of Product Data unless otherwise indicated. Architect will return two copies.

C. Shop Drawings: Prepare Project-specific information, drawn accurately to scale. Do not base Shop Drawings on reproductions of the Contract Documents or standard printed data.
1. Preparation: Fully illustrate requirements in the Contract Documents. Include the following information, as applicable:
   a. Identification of products.
   b. Schedules.
   c. Compliance with specified standards.
   d. Notation of coordination requirements.
   e. Notation of dimensions established by field measurement.
   f. Relationship and attachment to adjoining construction clearly indicated.
   g. Seal and signature of professional engineer if specified.
2. Sheet Size: Except for templates, patterns, and similar full-size drawings, submit Shop Drawings on sheets at least 8-1/2 by 11 inches (215 by 280 mm), but no larger than 30 by 42 inches (750 by 1067 mm).
3. Submit Shop Drawings in the following format:
   a. PDF electronic file.
   b. Two opaque (bond) copies of each submittal. Architect will return one copy.
   c. Three opaque copies of each submittal. Architect will retain two copies; remainder will be returned.
4. BIM File Incorporation: Develop and incorporate Shop Drawing files into Building Information Model established for Project.
   a. Prepare Shop Drawings in the following format: Same digital data software program, version, and operating system as the original Drawings.
   b. Refer to Section 013100 "Project Management and Coordination" for requirements for coordination drawings.

D. Samples: Submit Samples for review of kind, color, pattern, and texture for a check of these characteristics with other elements and for a comparison of these characteristics between submittal and actual component as delivered and installed.
1. Transmit Samples that contain multiple, related components such as accessories together in one submittal package.
2. Identification: Attach label on unexposed side of Samples that includes the following:
   a. Generic description of Sample.
   b. Product name and name of manufacturer.
   c. Sample source.

d. Number and title of applicable Specification Section.
e. Specification paragraph number and generic name of each item.

3. For projects where electronic submittals are required, provide corresponding electronic submittal of Sample transmittal, digital image file illustrating Sample characteristics, and identification information for record.
4. Disposition: Maintain sets of approved Samples at Project site, available for quality-control comparisons throughout the course of construction activity. Sample sets may be used to determine final acceptance of construction associated with each set.
   a. Samples that may be incorporated into the Work are indicated in individual Specification Sections. Such Samples must be in an undamaged condition at time of use.
   b. Samples not incorporated into the Work, or otherwise designated as Owner's property, are the property of Contractor.
5. Samples for Initial Selection: Submit manufacturer's color charts consisting of units or sections of units showing the full range of colors, textures, and patterns available.
   a. Number of Samples: Submit one full set(s) of available choices where color, pattern, texture, or similar characteristics are required to be selected from manufacturer's product line. Architect will return submittal with options selected.
6. Samples for Verification: Submit full-size units or Samples of size indicated, prepared from same material to be used for the Work, cured and finished in manner specified, and physically identical with material or product proposed for use, and that show full range of color and texture variations expected. Samples include, but are not limited to, the following: partial sections of manufactured or fabricated components; small cuts or containers of materials; complete units of repetitively used materials; swatches showing color, texture, and pattern; color range sets; and components used for independent testing and inspection.
   a. Number of Samples: Submit three sets of Samples. Architect will retain two Sample sets; remainder will be returned. Mark up and retain one returned Sample set as a project record sample.
      1) Submit a single Sample where assembly details, workmanship, fabrication techniques, connections, operation, and other similar characteristics are to be demonstrated.
      2) If variation in color, pattern, texture, or other characteristic is inherent in material or product represented by a Sample, submit at least three sets of paired units that show approximate limits of variations.

E. Product Schedule: As required in individual Specification Sections, prepare a written summary indicating types of products required for the Work and their intended location. Include the following information in tabular form:
   1. Type of product. Include unique identifier for each product indicated in the Contract Documents or assigned by Contractor if none is indicated.
   2. Manufacturer and product name, and model number if applicable.
   3. Number and name of room or space.
   4. Location within room or space.
   5. Submit product schedule in the following format:
      a. PDF electronic file.
      b. Three paper copies of product schedule or list unless otherwise indicated. Architect will return two copies.

F. Coordination Drawing Submittals: Comply with requirements specified in Section 013100 "Project Management and Coordination."
G. Contractor's Construction Schedule: Comply with requirements specified in Section 013200 "Construction Progress Documentation."
H. Application for Payment and Schedule of Values: Comply with requirements specified in Section 012900 "Payment Procedures."
I. Test and Inspection Reports and Schedule of Tests and Inspections Submittals: Comply with requirements specified in Section 014000 "Quality Requirements."
J. Closeout Submittals and Maintenance Material Submittals: Comply with requirements specified in Section 017700 "Closeout Procedures."
K. Maintenance Data: Comply with requirements specified in Section 017823 "Operation and Maintenance Data."

L. Qualification Data: Prepare written information that demonstrates capabilities and experience of firm or person. Include lists of completed projects with project names and addresses, contact information of architects and owners, and other information specified.

M. Welding Certificates: Prepare written certification that welding procedures and personnel comply with requirements in the Contract Documents. Submit record of Welding Procedure Specification and Procedure Qualification Record on AWS forms. Include names of firms and personnel certified.

N. Installer Certificates: Submit written statements on manufacturer's letterhead certifying that Installer complies with requirements in the Contract Documents and, where required, is authorized by manufacturer for this specific Project.

O. Manufacturer Certificates: Submit written statements on manufacturer's letterhead certifying that manufacturer complies with requirements in the Contract Documents. Include evidence of manufacturing experience where required.

P. Product Certificates: Submit written statements on manufacturer's letterhead certifying that product complies with requirements in the Contract Documents.

Q. Material Certificates: Submit written statements on manufacturer's letterhead certifying that material complies with requirements in the Contract Documents.

R. Material Test Reports: Submit reports written by a qualified testing agency, on testing agency's standard form, indicating and interpreting test results of material for compliance with requirements in the Contract Documents.

S. Product Test Reports: Submit written reports indicating that current product produced by manufacturer complies with requirements in the Contract Documents. Base reports on evaluation of tests performed by manufacturer and witnessed by a qualified testing agency, or on comprehensive tests performed by a qualified testing agency.

T. Research Reports: Submit written evidence, from a model code organization acceptable to authorities having jurisdiction, that product complies with building code in effect for Project. Include the following information:
   1. Name of evaluation organization.
   2. Date of evaluation.
   3. Time period when report is in effect.
   4. Product and manufacturers' names.
   5. Description of product.
   6. Test procedures and results.
   7. Limitations of use.

U. Preconstruction Test Reports: Submit reports written by a qualified testing agency, on testing agency's standard form, indicating and interpreting results of tests performed before installation of product, for compliance with performance requirements in the Contract Documents.

V. Compatibility Test Reports: Submit reports written by a qualified testing agency, on testing agency's standard form, indicating and interpreting results of compatibility tests performed before installation of product. Include written recommendations for primers and substrate preparation needed for adhesion.

W. Field Test Reports: Submit written reports indicating and interpreting results of field tests performed either during installation of product or after product is installed in its final location, for compliance with requirements in the Contract Documents.

X. Design Data: Prepare and submit written and graphic information, including, but not limited to, performance and design criteria, list of applicable codes and regulations, and calculations. Include list of assumptions and other performance and design criteria and a summary of loads. Include load diagrams if applicable. Provide name and version of software, if any, used for calculations. Include page numbers.

2.2 DELEGATED-DESIGN SERVICES

A. Performance and Design Criteria: Where professional design services or certifications by a design professional are specifically required of Contractor by the Contract Documents, provide products and systems complying with specific performance and design criteria indicated.
   1. If criteria indicated are not sufficient to perform services or certification required, submit a written request for additional information to Architect.

B. Delegated-Design Services Certification: In addition to Shop Drawings, Product Data, and other required submittals, submit three paper copies of certificate, signed and sealed by the responsible design professional, for each product and system specifically assigned to Contractor to be designed or certified by a design professional.
   1. Indicate that products and systems comply with performance and design criteria in the Contract Documents. Include list of codes, loads, and other factors used in performing these services.

C. BIM File Incorporation: Incorporate delegated-design drawing and data files into Building Information Model established for Project.
   1. Prepare delegated-design drawings in the following format: Same digital data software program, version, and operating system as the original Drawings.

PART 3 - EXECUTION

3.1 CONTRACTOR'S REVIEW

A. Action and Informational Submittals: Review each submittal and check for coordination with other Work of the Contract and for compliance with the Contract Documents. Note corrections and field dimensions. Mark with approval stamp before submitting to Architect.
B. Project Closeout and Maintenance Material Submittals: See requirements in Section 017700 "Closeout Procedures."
C. Approval Stamp: Stamp each submittal with a uniform, approval stamp. Include Project name and location, submittal number, Specification Section title and number, name of reviewer, date of Contractor's approval, and statement certifying that submittal has been reviewed, checked, and approved for compliance with the Contract Documents.

3.2 ARCHITECT'S ACTION

A. General: Architect will not review submittals that do not bear Contractor's approval stamp and will return them without action.
B. Action Submittals: Architect will review each submittal, make marks to indicate corrections or revisions required, and return it. Architect will stamp each submittal with an action stamp and will mark stamp appropriately to indicate action.
C. Informational Submittals: Architect will review each submittal and will not return it, or will return it if it does not comply with requirements. Architect will forward each submittal to appropriate party.
D. Incomplete submittals are unacceptable, will be considered nonresponsive, and will be returned for resubmittal without review.
E. Submittals not required by the Contract Documents may not be reviewed and may be discarded.

END OF SECTION 013300

SECTION 014000 - QUALITY REQUIREMENTS

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes administrative and procedural requirements for quality assurance and quality control.

B. Testing and inspecting services are required to verify compliance with requirements specified or indicated. These services do not relieve Contractor of responsibility for compliance with the Contract Document requirements.

1. Specific quality-assurance and -control requirements for individual construction activities are specified in the Sections that specify those activities. Requirements in those Sections may also cover production of standard products.
2. Specified tests, inspections, and related actions do not limit Contractor's other quality-assurance and -control procedures that facilitate compliance with the Contract Document requirements.
3. Requirements for Contractor to provide quality-assurance and -control services required by Architect, Owner or authorities having jurisdiction are not limited by provisions of this Section.
4. Specific test and inspection requirements are not specified in this Section.

1.2 DEFINITIONS

A. Quality-Assurance Services: Activities, actions, and procedures performed before and during execution of the Work to guard against defects and deficiencies and substantiate that proposed construction will comply with requirements.

B. Quality-Control Services: Tests, inspections, procedures, and related actions during and after execution of the Work to evaluate that actual products incorporated into the Work and completed construction comply with requirements. Services do not include contract enforcement activities performed by Architect.

C. Mockups: Full-size physical assemblies that are constructed on-site. Mockups are constructed to verify selections made under Sample submittals; to demonstrate aesthetic effects and, where indicated, qualities of materials and execution; to review coordination, testing, or operation; to show interface between dissimilar materials; and to demonstrate compliance with specified installation tolerances. Mockups are not Samples. Unless otherwise indicated, approved mockups establish the standard by which the Work will be judged.

1. Laboratory Mockups: Full-size physical assemblies constructed at testing facility to verify performance characteristics.

D. Preconstruction Testing: Tests and inspections performed specifically for Project before products and materials are incorporated into the Work, to verify performance or compliance with specified criteria.

E. Product Testing: Tests and inspections that are performed by an NRTL, an NVLAP, or a testing agency qualified to conduct product testing and acceptable to authorities having jurisdiction, to establish product performance and compliance with specified requirements.

F. Source Quality-Control Testing: Tests and inspections that are performed at the source, e.g., plant, mill, factory, or shop.

G. Field Quality-Control Testing: Tests and inspections that are performed on-site for installation of the Work and for completed Work.

H. Testing Agency: An entity engaged to perform specific tests, inspections, or both. Testing laboratory shall mean the same as testing agency.

I. Installer/Applicator/Erector: Contractor or another entity engaged by Contractor as an employee, Subcontractor, or Sub-subcontractor, to perform a particular construction operation, including installation, erection, application, and similar operations.

1. Use of trade-specific terminology in referring to a trade or entity does not require that certain construction activities be performed by accredited or unionized individuals, or that requirements specified apply exclusively to specific trade(s).

J. Experienced: When used with an entity or individual, "experienced" means having successfully completed a minimum of five previous projects similar in nature, size, and extent to this Project; being familiar with special requirements indicated; and having complied with requirements of authorities having jurisdiction.

1.3 CONFLICTING REQUIREMENTS

A. Referenced Standards: If compliance with two or more standards is specified and the standards establish different or conflicting requirements for minimum quantities or quality levels, comply with the most stringent requirement. Refer conflicting requirements that are different, but apparently equal, to Architect for a decision before proceeding.

B. Minimum Quantity or Quality Levels: The quantity or quality level shown or specified shall be the minimum provided or performed. The actual installation may comply exactly with the minimum quantity or quality specified, or it may exceed the minimum within reasonable limits. To comply with these requirements, indicated numeric values are minimum or maximum, as appropriate, for the context of requirements. Refer uncertainties to Architect for a decision before proceeding.

1.4 INFORMATIONAL SUBMITTALS

A. Contractor's Statement of Responsibility: When required by authorities having jurisdiction, submit copy of written statement of responsibility sent to authorities having jurisdiction before starting work on the following systems:
1. Seismic-force-resisting system, designated seismic system, or component listed in the designated seismic system quality-assurance plan prepared by Architect.
2. Main wind-force-resisting system or a wind-resisting component listed in the wind-force-resisting system quality-assurance plan prepared by Architect.

B. Testing Agency Qualifications: For testing agencies specified in "Quality Assurance" Article to demonstrate their capabilities and experience. Include proof of qualifications in the form of a recent report on the inspection of the testing agency by a recognized authority.

1.5 REPORTS AND DOCUMENTS

A. Test and Inspection Reports: Prepare and submit certified written reports specified in other Sections. Include the following:
1. Date of issue.
2. Project title and number.
3. Name, address, and telephone number of testing agency.
4. Dates and locations of samples and tests or inspections.
5. Names of individuals making tests and inspections.
6. Description of the Work and test and inspection method.
7. Identification of product and Specification Section.
8. Complete test or inspection data.
9. Test and inspection results and an interpretation of test results.
10. Record of temperature and weather conditions at time of sample taking and testing and inspecting.
11. Comments or professional opinion on whether tested or inspected Work complies with the Contract Document requirements.
12. Name and signature of laboratory inspector.
13. Recommendations on retesting and reinspecting.

B. Manufacturer's Field Reports: Prepare written information documenting tests and inspections specified in other Sections. Include the following:
1. Name, address, and telephone number of representative making report.
2. Statement on condition of substrates and their acceptability for installation of product.
3. Summary of installation procedures being followed, whether they comply with requirements and, if not, what corrective action was taken.
4. Results of operational and other tests and a statement of whether observed performance complies with requirements.
5. Other required items indicated in individual Specification Sections.

C. Permits, Licenses, and Certificates: For Owner's records, submit copies of permits, licenses, certifications, inspection reports, releases, jurisdictional settlements, notices, receipts for fee payments, judgments, correspondence, records, and similar documents, established for compliance with standards and regulations bearing on performance of the Work.

1.6 QUALITY ASSURANCE

A. General: Qualifications paragraphs in this article establish the minimum qualification levels required; individual Specification Sections specify additional requirements.

B. Manufacturer Qualifications: A firm experienced in manufacturing products or systems similar to those indicated for this Project and with a record of successful in-service performance, as well as sufficient production capacity to produce required units.

C. Fabricator Qualifications: A firm experienced in producing products similar to those indicated for this Project and with a record of successful in-service performance, as well as sufficient production capacity to produce required units.

D. Installer Qualifications: A firm or individual experienced in installing, erecting, or assembling work similar in material, design, and extent to that indicated for this Project, whose work has resulted in construction with a record of successful in-service performance.

E. Professional Engineer Qualifications: A professional engineer who is legally qualified to practice in jurisdiction where Project is located and who is experienced in providing engineering services of the kind indicated. Engineering services are defined as those performed for installations of the system, assembly, or product that are similar in material, design, and extent to those indicated for this Project.

F. Specialists: Certain Specification Sections require that specific construction activities shall be performed by entities who are recognized experts in those operations. Specialists shall satisfy qualification requirements indicated and shall be engaged for the activities indicated.
   1. Requirements of authorities having jurisdiction shall supersede requirements for specialists.

G. Testing Agency Qualifications: An NRTL, an NVLAP, or an independent agency with the experience and capability to conduct testing and inspecting indicated, as documented according to ASTM E 329; and with additional qualifications specified in individual Sections; and, where required by authorities having jurisdiction, that is acceptable to authorities.
   1. NRTL: A nationally recognized testing laboratory according to 29 CFR 1910.7.
   2. NVLAP: A testing agency accredited according to NIST's National Voluntary Laboratory Accreditation Program.

H. Manufacturer's Representative Qualifications: An authorized representative of manufacturer who is trained and approved by manufacturer to observe and inspect installation of manufacturer's products that are similar in material, design, and extent to those indicated for this Project.

A. Preconstruction Testing: Where testing agency is indicated to perform preconstruction testing for compliance with specified requirements for performance and test methods, comply with the following:
   1. Contractor responsibilities include the following:
      a. Provide test specimens representative of proposed products and construction.
      b. Submit specimens in a timely manner with sufficient time for testing and analyzing results to prevent delaying the Work.
      c. Provide sizes and configurations of test assemblies, mockups, and laboratory mockups to adequately demonstrate capability of products to comply with performance requirements.
      d. Build site-assembled test assemblies and mockups using installers who will perform same tasks for Project.
      e. Build laboratory mockups at testing facility using personnel, products, and methods of construction indicated for the completed Work.
      f. When testing is complete, remove test specimens, assemblies, and mockups; do not reuse products on Project.
   2. Testing Agency Responsibilities: Submit a certified written report of each test, inspection, and similar quality-assurance service to Architect, with copy to Contractor. Interpret tests and inspections and state in each report whether tested and inspected work complies with or deviates from the Contract Documents.

B. Mockups: Before installing portions of the Work requiring mockups, build mockups for each form of construction and finish required to comply with the following requirements, using materials indicated for the completed Work:
   1. Build mockups in location and of size indicated or, if not indicated, as directed by Architect.
   2. Notify Architect seven days in advance of dates and times when mockups will be constructed.
   3. Employ supervisory personnel who will oversee mockup construction. Employ workers that will be employed during the construction at Project.
   4. Demonstrate the proposed range of aesthetic effects and workmanship.
   5. Obtain Architect's approval of mockups before starting work, fabrication, or construction.
      a. Allow seven days for initial review and each re-review of each mockup.
   6. Maintain mockups during construction in an undisturbed condition as a standard for judging the completed Work.
   7. Demolish and remove mockups when directed unless otherwise indicated.

C. Laboratory Mockups: Comply with requirements of preconstruction testing and those specified in individual Specification Sections.

1.7 QUALITY CONTROL

A. Owner Responsibilities: Where quality-control services are indicated as Owner's responsibility, Owner will engage a qualified testing agency to perform these services.
   1. Owner will furnish Contractor with names, addresses, and telephone numbers of testing agencies engaged and a description of types of testing and inspecting they are engaged to perform.
   2. Payment for these services will be made from testing and inspecting allowances, as authorized by Change Orders.
   3. Costs for retesting and reinspecting construction that replaces or is necessitated by work that failed to comply with the Contract Documents will be charged to Contractor, and the Contract Sum will be adjusted by Change Order.

B. Contractor Responsibilities: Tests and inspections not explicitly assigned to Owner are Contractor's responsibility. Perform additional quality-control activities required to verify that the Work complies with requirements, whether specified or not.
   1. Where services are indicated as Contractor's responsibility, engage a qualified testing agency to perform these quality-control services.
      a. Contractor shall not employ same entity engaged by Owner, unless agreed to in writing by Owner.
   2. Notify testing agencies at least 24 hours in advance of time when Work that requires testing or inspecting will be performed.
   3. Where quality-control services are indicated as Contractor's responsibility, submit a certified written report, in duplicate, of each quality-control service.
   4. Testing and inspecting requested by Contractor and not required by the Contract Documents are Contractor's responsibility.
   5. Submit additional copies of each written report directly to authorities having jurisdiction, when they so direct.

C. Manufacturer's Field Services: Where indicated, engage a manufacturer's representative to observe and inspect the Work. Manufacturer's representative's services include examination of substrates and conditions, verification of materials, inspection of completed portions of the Work, and submittal of written reports.

D. Retesting/Reinspecting: Regardless of whether original tests or inspections were Contractor's responsibility, provide quality-control services, including retesting and reinspecting, for construction that replaced Work that failed to comply with the Contract Documents.

E. Testing Agency Responsibilities: Cooperate with Architect, and Contractor in performance of duties. Provide qualified personnel to perform required tests and inspections.
   1. Notify Architect, and Contractor promptly of irregularities or deficiencies observed in the Work during performance of its services.
   2. Determine the location from which test samples will be taken and in which in-situ tests are conducted.

3. Conduct and interpret tests and inspections and state in each report whether tested and inspected work complies with or deviates from requirements.
4. Submit a certified written report, in duplicate, of each test, inspection, and similar quality-control service through Contractor.
5. Do not release, revoke, alter, or increase the Contract Document requirements or approve or accept any portion of the Work.
6. Do not perform any duties of Contractor.

F. Associated Services: Cooperate with agencies performing required tests, inspections, and similar quality-control services, and provide reasonable auxiliary services as requested. Notify agency sufficiently in advance of operations to permit assignment of personnel. Provide the following:
1. Access to the Work.
2. Incidental labor and facilities necessary to facilitate tests and inspections.
3. Adequate quantities of representative samples of materials that require testing and inspecting. Assist agency in obtaining samples.
4. Facilities for storage and field curing of test samples.
5. Delivery of samples to testing agencies.
6. Preliminary design mix proposed for use for material mixes that require control by testing agency.
7. Security and protection for samples and for testing and inspecting equipment at Project site.

G. Coordination: Coordinate sequence of activities to accommodate required quality-assurance and -control services with a minimum of delay and to avoid necessity of removing and replacing construction to accommodate testing and inspecting.
1. Schedule times for tests, inspections, obtaining samples, and similar activities.

1.8 SPECIAL TESTS AND INSPECTIONS

A. Special Tests and Inspections: Owner will engage a qualified testing agency or special inspector to conduct special tests and inspections required by authorities having jurisdiction as the responsibility of Owner, and as follows:

B. Special Tests and Inspections: Conducted by a qualified testing agency or special inspector as required by authorities having jurisdiction, as indicated in individual Specification Sections and as follows:
1. Verifying that manufacturer maintains detailed fabrication and quality-control procedures and reviews the completeness and adequacy of those procedures to perform the Work.
2. Notifying Architect and Contractor promptly of irregularities and deficiencies observed in the Work during performance of its services.
3. Submitting a certified written report of each test, inspection, and similar quality-control service to Architect with copy to Contractor and to authorities having jurisdiction.
4. Submitting a final report of special tests and inspections at Substantial Completion, which includes a list of unresolved deficiencies.
5. Interpreting tests and inspections and stating in each report whether tested and inspected work complies with or deviates from the Contract Documents.
6. Retesting and reinspecting corrected work.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 TEST AND INSPECTION LOG

A. Test and Inspection Log: Prepare a record of tests and inspections. Include the following:
1. Date test or inspection was conducted.
2. Description of the Work tested or inspected.
3. Date test or inspection results were transmitted to Architect.
4. Identification of testing agency or special inspector conducting test or inspection.

B. Maintain log at Project site. Post changes and revisions as they occur. Provide access to test and inspection log for Architect's reference during normal working hours.

3.2 REPAIR AND PROTECTION

A. General: On completion of testing, inspecting, sample taking, and similar services, repair damaged construction and restore substrates and finishes.
   1. Provide materials and comply with installation requirements specified in other Specification Sections or matching existing substrates and finishes. Restore patched areas and extend restoration into adjoining areas with durable seams that are as invisible as possible. Comply with the Contract Document requirements for cutting and patching in Section 017300 "Execution."

B. Protect construction exposed by or for quality-control service activities.
C. Repair and protection are Contractor's responsibility, regardless of the assignment of responsibility for quality-control services.

END OF SECTION 014000

SECTION 015000 - TEMPORARY FACILITIES AND CONTROLS

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes requirements for temporary utilities, support facilities, and security and protection facilities.
B. Related Requirements:
   1. Section 011000 "Summary" for work restrictions and limitations on utility interruptions.

1.2 USE CHARGES

A. General: Installation and removal of and use charges for temporary facilities shall be included in the Contract Sum unless otherwise indicated. Allow other entities to use temporary services and facilities without cost, including, but not limited to, Owner's construction forces, Architect, occupants of Project, testing agencies, and authorities having jurisdiction.
B. Water and Sewer Service from Existing System: Water from Owner's existing water system is available for use without metering and without payment of use charges. Provide connections and extensions of services as required for construction operations.
C. Electric Power Service from Existing System: Electric power from Owner's existing system is available for use without metering and without payment of use charges. Provide connections and extensions of services as required for construction operations.

1.3 INFORMATIONAL SUBMITTALS

A. Site Plan: Show temporary facilities, utility hookups, staging areas, and parking areas for construction personnel.
B. Erosion- and Sedimentation-Control Plan: Show compliance with requirements of EPA Construction General Permit or authorities having jurisdiction, whichever is more stringent.
C. Fire-Safety Program: Show compliance with requirements of NFPA 241 and authorities having jurisdiction. Indicate Contractor personnel responsible for management of fire prevention program.
D. Moisture-Protection Plan: Describe procedures and controls for protecting materials and construction from water absorption and damage.
   1. Describe delivery, handling, and storage provisions for materials subject to water absorption or water damage.
   2. Indicate procedures for discarding water-damaged materials, protocols for mitigating water intrusion into completed Work, and replacing water-damaged Work.
   3. Indicate sequencing of work that requires water, such as sprayed fire-resistive materials, plastering, and terrazzo grinding, and describe plans for dealing with water from these operations. Show procedures for verifying that wet construction has dried sufficiently to permit installation of finish materials.

A. Dust- and HVAC-Control Plan: Submit coordination drawing and narrative that indicates the dust- and HVAC-control measures proposed for use, proposed locations, and proposed time frame for their operation. Identify further options if proposed measures are later determined to be inadequate. Include the following:
   1. Locations of dust-control partitions at each phase of work.
   2. HVAC system isolation schematic drawing.
   3. Location of proposed air-filtration system discharge.
   4. Waste handling procedures.
   5. Other dust-control measures.

1.4 QUALITY ASSURANCE

A. Electric Service: Comply with NECA, NEMA, and UL standards and regulations for temporary electric service. Install service to comply with NFPA 70.

B. Tests and Inspections: Arrange for authorities having jurisdiction to test and inspect each temporary utility before use. Obtain required certifications and permits.

1.5 PROJECT CONDITIONS

A. Temporary Use of Permanent Facilities: Engage Installer of each permanent service to assume responsibility for operation, maintenance, and protection of each permanent service during its use as a construction facility before Owner's acceptance, regardless of previously assigned responsibilities.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Chain-Link Fencing: Minimum 2-inch (50-mm), 0.148-inch- (3.8-mm-) thick, galvanized-steel, chain-link fabric fencing; minimum 6 feet (1.8 m) high with galvanized-steel pipe posts; minimum 2-3/8-inch- (60-mm-) OD line posts and 2-7/8-inch- (73-mm-) OD corner and pull posts, with 1-5/8-inch- (42-mm-) OD top rails..

B. Portable Chain-Link Fencing: Minimum 2-inch (50-mm), 0.148-inch- (3.8-mm-) thick, galvanized-steel, chain-link fabric fencing; minimum 6 feet (1.8 m) high with galvanized-steel pipe posts; minimum 2-3/8-inch- (60-mm-) OD line posts and 2-7/8-inch- (73-mm-) OD corner and pull posts, with 1-5/8-inch- (42-mm-) OD top and bottom rails. Provide wood bases for supporting posts.

C. Wood Enclosure Fence: Plywood, 6 feet (1.8 m) 8 feet (2.4 m) high, framed with four 2-by-4-inch (50-by-100-mm) rails, with preservative-treated wood posts spaced not more than 8 feet (2.4 m) apart.

2.2 TEMPORARY FACILITIES

A. Field Offices, General: Prefabricated or mobile units with serviceable finishes, temperature controls, and foundations adequate for normal loading.

B. Common-Use Field Office: Of sufficient size to accommodate needs of Owner, Architect, and construction personnel office activities and to accommodate Project meetings specified in other Division 01 Sections. Keep office clean and orderly. Furnish and equip offices as follows:
   1. Office space for Owner, minimum 10-foot by 10-foot area at opposite end of Contractor's Field Office.
   2. Furniture required for Project-site documents including file cabinets, plan tables, plan racks, and bookcases.
   3. Conference room of sufficient size to accommodate meetings of 12 individuals. Provide electrical power service and 120-V ac duplex receptacles, with no fewer than one receptacle on each wall. Furnish room with conference table, chairs, and 4-foot- (1.2-m-) square tack and marker boards.
   4. Heating and cooling equipment necessary to maintain a uniform indoor temperature of 68 to 72 deg F (20 to 22 deg C).
   5. Lighting fixtures capable of maintaining average illumination of 20 fc (215 lx) at desk height.

C. Storage and Fabrication Sheds: Provide sheds sized, furnished, and equipped to accommodate materials and equipment for construction operations.
   1. Store combustible materials apart from building.

2.3 EQUIPMENT

A. Fire Extinguishers: Portable, UL rated; with class and extinguishing agent as required by locations and classes of fire exposures.

B. HVAC Equipment: Unless Owner authorizes use of permanent HVAC system, provide vented, self-contained, liquid-propane-gas or fuel-oil heaters with individual space thermostatic control.
   1. Use of gasoline-burning space heaters, open-flame heaters, or salamander-type heating units is prohibited.
   2. Heating Units: Listed and labeled for type of fuel being consumed, by a qualified testing agency acceptable to authorities having jurisdiction, and marked for intended location and application.
   3. Permanent HVAC System: If Owner authorizes use of permanent HVAC system for temporary use during construction, provide filter with MERV of 8 at each return-air grille in system and remove at end of construction and clean HVAC system as required in Section 017700 "Closeout Procedures".

PART 3 - EXECUTION

3.1 INSTALLATION, GENERAL

A. Locate facilities where they will serve Project adequately and result in minimum interference with performance of the Work. Relocate and modify facilities as required by progress of the Work.
   1. Locate facilities to limit site disturbance as specified in Section 011000 "Summary."

B. Provide each facility ready for use when needed to avoid delay. Do not remove until facilities are no longer needed or are replaced by authorized use of completed permanent facilities.

3.2 TEMPORARY UTILITY INSTALLATION

A. General: Install temporary service or connect to existing service.
   1. Arrange with utility company, Owner, and existing users for time when service can be interrupted, if necessary, to make connections for temporary services.

B. Sewers and Drainage: Provide temporary utilities to remove effluent lawfully.
   1. Connect temporary sewers to municipal system as directed by authorities having jurisdiction.

C. Water Service: Install water service and distribution piping in sizes and pressures adequate for construction.

D. Water Service: Connect to Owner's existing water service facilities. Clean and maintain water service facilities in a condition acceptable to Owner. At Substantial Completion, restore these facilities to condition existing before initial use.

E. Sanitary Facilities: Provide temporary toilets, wash facilities, and drinking water for use of construction personnel. Comply with requirements of authorities having jurisdiction for type, number, location, operation, and maintenance of fixtures and facilities.
   1. Toilets: Use of Owner's existing toilet facilities will be permitted, as long as facilities are cleaned and maintained in a condition acceptable to Owner. At Substantial Completion, restore these facilities to condition existing before initial use.

F. Heating and Cooling: Provide temporary heating and cooling required by construction activities for curing or drying of completed installations or for protecting installed construction from adverse effects of low temperatures or high humidity. Select equipment that will not have a harmful effect on completed installations or elements being installed.

G. Ventilation and Humidity Control: Provide temporary ventilation required by construction activities for curing or drying of completed installations or for protecting installed construction from adverse effects of high humidity. Select equipment that will not have a harmful effect on completed installations or elements being installed. Coordinate ventilation requirements to produce ambient condition required and minimize energy consumption.

H. Electric Power Service: Connect to Owner's existing electric power service. Maintain equipment in a condition acceptable to Owner.

I. Electric Power Service: Provide electric power service and distribution system of sufficient size, capacity, and power characteristics required for construction operations.
   1. Install electric power service overhead unless otherwise indicated.
   2. Connect temporary service to Owner's existing power source, as directed by Owner.

J. Lighting: Provide temporary lighting with local switching that provides adequate illumination for construction operations, observations, inspections, and traffic conditions.
   1. Install and operate temporary lighting that fulfills security and protection requirements without operating entire system.

K. Telephone Service: Provide temporary telephone service in common-use facilities for use by all construction personnel. Install one telephone line(s) for each field office.
   1. Provide additional telephone lines for the following:
      a. Provide a dedicated telephone line for each facsimile machine in each field office.

2. At each telephone, post a list of important telephone numbers.
   a. Police and fire departments.
   b. Ambulance service.
   c. Contractor's home office.
   d. Contractor's emergency after-hours telephone number.
   e. Architect's office.
   f. Engineers' offices.
   g. Owner's office.
   h. Principal subcontractors' field and home offices.
3. Provide superintendent with cellular telephone or portable two-way radio for use when away from field office.

L. Electronic Communication Service: Provide a desktop computer in the primary field office adequate for use by Architect and Owner to access project electronic documents and maintain electronic communications. Equip computer with not less than the following:
1. Processor: Intel Pentium D or Intel CoreDuo, 3.0 GHz processing speed.
2. Memory: 4 gigabyte.
3. Disk Storage: 300 gigabyte hard-disk drive and combination DVD-RW/CD-RW drive.
4. Display: 22-inch (300-mm) LCD monitor with 128 Mb dedicated video RAM.
5. Network Connectivity: 10/100BaseT Ethernet.
6. Productivity Software:
   a. Microsoft Office Professional, XP or higher, including Word, Excel, and Outlook.
   b. Adobe Reader 7.0 or higher.
   c. WinZip 7.0 or higher.
7. Printer: "All-in-one" unit equipped with printer server, combining color printing, photocopying, scanning, and faxing, or separate units for each of these three functions.
8. Internet Service: Broadband modem, router and ISP, equipped with hardware firewall, providing minimum 384 Kbps upload and 1 Mbps download speeds at each computer.
9. Internet Security: Integrated software, providing software firewall, virus, spyware, phishing, and spam protection in a combined application.

3.3 SUPPORT FACILITIES INSTALLATION

A. General: Comply with the following:
1. Provide construction for temporary offices, shops, and sheds located within construction area or within 30 feet (9 m) of building lines that is noncombustible according to ASTM E 136. Comply with NFPA 241.
2. Maintain support facilities until Architect schedules Substantial Completion inspection. Remove before Substantial Completion. Personnel remaining after Substantial Completion will be permitted to use permanent facilities, under conditions acceptable to Owner.

B. Temporary Roads and Paved Areas: Construct and maintain temporary roads and paved areas adequate for construction operations. Locate temporary roads and paved areas [as indicated] [within construction limits indicated] on Drawings.
1. Provide dust-control treatment that is nonpolluting and nontracking. Reapply treatment as required to minimize dust.

C. Temporary Use of Permanent Roads and Paved Areas: Locate temporary roads and paved areas in same location as permanent roads and paved areas. Construct and maintain temporary roads and paved areas adequate for construction operations. Extend temporary roads and paved areas, within construction limits indicated, as necessary for construction operations.
1. Coordinate elevations of temporary roads and paved areas with permanent roads and paved areas.
2. Prepare subgrade and install subbase and base for temporary roads and paved areas according to Section 312000 "Earth Moving."

3. Recondition base after temporary use, including removing contaminated material, regrading, proofrolling, compacting, and testing.
4. Delay installation of final course of permanent hot-mix asphalt pavement until immediately before Substantial Completion. Repair hot-mix asphalt base-course pavement before installation of final course according to Section 321216 "Asphalt Paving."

D. Traffic Controls: Comply with requirements of authorities having jurisdiction.
1. Protect existing site improvements to remain including curbs, pavement, and utilities.
2. Maintain access for fire-fighting equipment and access to fire hydrants.

E. Parking: Parking: Provide temporary parking areas for construction personnel.

F. Revise "Dewatering Facilities and Drains" Paragraph below to suit soil-conservation district requirements. See Evaluations. Consult soil engineer about expected ground water.

G. Dewatering Facilities and Drains: Comply with requirements of authorities having jurisdiction. Maintain Project site, excavations, and construction free of water.
1. Dispose of rainwater in a lawful manner that will not result in flooding Project or adjoining properties or endanger permanent Work or temporary facilities.
2. Remove snow and ice as required to minimize accumulations.

H. Project Signs: Provide Project signs as indicated. Unauthorized signs are not permitted.
1. Identification Signs: Provide Project identification signs as indicated on Drawings.
2. Temporary Signs: Provide other signs as indicated and as required to inform public and individuals seeking entrance to Project.
   a. Provide temporary, directional signs for construction personnel and visitors.
3. Maintain and touchup signs so they are legible at all times.

I. Waste Disposal Facilities: Comply with requirements specified in Section 017419 "Construction Waste Management and Disposal."

J. Waste Disposal Facilities: Provide waste-collection containers in sizes adequate to handle waste from construction operations. Comply with requirements of authorities having jurisdiction. Comply with progress cleaning requirements in Section 017300 "Execution."

K. Lifts and Hoists: Provide facilities necessary for hoisting materials and personnel.
1. Truck cranes and similar devices used for hoisting materials are considered "tools and equipment" and not temporary facilities.

L. Temporary Elevator Use: Use of elevators is not permitted See Section 142100 "Electric Traction Elevators," Section 142113 "Electric Traction Freight Elevators," Section 142400 "Hydraulic Elevators," Section 142413 "Hydraulic Freight Elevators," and Section 142600 "Limited-Use/Limited-Application Elevators" for temporary use of new elevators.

M. Existing Elevator Use: Use of Owner's existing elevators will be permitted, provided elevators are cleaned and maintained in a condition acceptable to Owner. At Substantial Completion, restore elevators to condition existing before initial use, including replacing worn cables, guide shoes, and similar items of limited life.
1. Do not load elevators beyond their rated weight capacity.
2. Provide protective coverings, barriers, devices, signs, or other procedures to protect elevator car and entrance doors and frame. If, despite such protection, elevators become damaged, engage elevator Installer to restore damaged work so no evidence remains of correction work. Return items that cannot be refinished in field to the shop, make required repairs and refinish entire unit, or provide new units as required.

N. Temporary Stairs: Until permanent stairs are available, provide temporary stairs where ladders are not adequate.

O. Existing Stair Usage: Use of Owner's existing stairs will be permitted, provided stairs are cleaned and maintained in a condition acceptable to Owner. At Substantial Completion, restore stairs to condition existing before initial use.

1. Provide protective coverings, barriers, devices, signs, or other procedures to protect stairs and to maintain means of egress. If stairs become damaged, restore damaged areas so no evidence remains of correction work.

P. Temporary Use of Permanent Stairs: Use of new stairs for construction traffic will be permitted, provided stairs are protected and finishes restored to new condition at time of Substantial Completion.

3.4 SECURITY AND PROTECTION FACILITIES INSTALLATION

A. Protection of Existing Facilities: Protect existing vegetation, equipment, structures, utilities, and other improvements at Project site and on adjacent properties, except those indicated to be removed or altered. Repair damage to existing facilities.

B. Environmental Protection: Provide protection, operate temporary facilities, and conduct construction as required to comply with environmental regulations and that minimize possible air, waterway, and subsoil contamination or pollution or other undesirable effects.

C. Temporary Erosion and Sedimentation Control: Comply with requirements of 2003 EPA Construction General Permit or authorities having jurisdiction, whichever is more stringent and requirements specified in Section 311000 "Site Clearing."

A. Temporary Erosion and Sedimentation Control: Provide measures to prevent soil erosion and discharge of soil-bearing water runoff and airborne dust to undisturbed areas and to adjacent properties and walkways, according to erosion- and sedimentation-control Drawings requirements of 2003 EPA Construction General Permit or authorities having jurisdiction, whichever is more stringent.

1. Verify that flows of water redirected from construction areas or generated by construction activity do not enter or cross tree- or plant- protection zones.
2. Inspect, repair, and maintain erosion- and sedimentation-control measures during construction until permanent vegetation has been established.
3. Clean, repair, and restore adjoining properties and roads affected by erosion and sedimentation from Project site during the course of Project.
4. Remove erosion and sedimentation controls and restore and stabilize areas disturbed during removal.

B. Stormwater Control: Comply with requirements of authorities having jurisdiction. Provide barriers in and around excavations and subgrade construction to prevent flooding by runoff of stormwater from heavy rains.

C. Tree and Plant Protection: Comply with requirements specified in Section 015639 "Temporary Tree and Plant Protection."

D. Tree and Plant Protection: Install temporary fencing located as indicated or outside the drip line of trees to protect vegetation from damage from construction operations. Protect tree root systems from damage, flooding, and erosion.

E. Pest Control: Engage pest-control service to recommend practices to minimize attraction and harboring of rodents, roaches, and other pests and to perform extermination and control procedures at regular intervals so Project will be free of pests and their residues at Substantial Completion. Perform control operations lawfully, using environmentally safe materials.

F. Security Enclosure and Lockup: Install temporary enclosure around partially completed areas of construction. Provide lockable entrances to prevent unauthorized entrance, vandalism, theft, and similar violations of security. Lock entrances at end of each work day.

G. Barricades, Warning Signs, and Lights: Comply with requirements of authorities having jurisdiction for erecting structurally adequate barricades, including warning signs and lighting. General Contrator shall be responsible for any costs associated with any permits and deposits as may be required by any authorities having jurisdication.

H. Temporary Egress: Maintain temporary egress from existing occupied facilities as indicated and as required by authorities having jurisdiction.

I. Temporary Enclosures: Provide temporary enclosures for protection of construction, in progress and completed, from exposure, foul weather, other construction operations, and similar activities. Provide temporary weathertight enclosure for building exterior.

1. Where heating or cooling is needed and permanent enclosure is not complete, insulate temporary enclosures.

J. Temporary Partitions: Provide floor-to-ceiling dustproof partitions to limit dust and dirt migration and to separate areas occupied by Owner from fumes and noise.
   1. Construct dustproof partitions with gypsum wallboard with joints taped on occupied side, and fire-retardant-treated plywood on construction operations side.
   2. Construct dustproof partitions with two layers of 6-mil (0.14-mm) polyethylene sheet on each side. Cover floor with two layers of 6-mil (0.14-mm) polyethylene sheet, extending sheets 18 inches (460 mm) up the sidewalls. Overlap and tape full length of joints. Cover floor with fire-retardant-treated plywood.
      a. Construct vestibule and airlock at each entrance through temporary partition with not less than 48 inches (1219 mm) between doors. Maintain water-dampened foot mats in vestibule.
   3. Where fire-resistance-rated temporary partitions are indicated or are required by authorities having jurisdiction, construct partitions according to the rated assemblies.
   4. Insulate partitions to control noise transmission to occupied areas.
   5. Seal joints and perimeter. Equip partitions with gasketed dustproof doors and security locks where openings are required.
   6. Protect air-handling equipment.
   7. Provide walk-off mats at each entrance through temporary partition.

K. Temporary Fire Protection: Install and maintain temporary fire-protection facilities of types needed to protect against reasonably predictable and controllable fire losses. Comply with NFPA 241; manage fire prevention program.
   1. Prohibit smoking in construction areas.
   2. Supervise welding operations, combustion-type temporary heating units, and similar sources of fire ignition according to requirements of authorities having jurisdiction.
   3. Develop and supervise an overall fire-prevention and -protection program for personnel at Project site. Review needs with local fire department and establish procedures to be followed. Instruct personnel in methods and procedures. Post warnings and information.
   4. Provide temporary standpipes and hoses for fire protection. Hang hoses with a warning sign stating that hoses are for fire-protection purposes only and are not to be removed. Match hose size with outlet size and equip with suitable nozzles.

3.5 MOISTURE AND MOLD CONTROL

A. Contractor's Moisture Protection Plan: Avoid trapping water in finished work. Document visible signs of mold that may appear during construction.

B. Exposed Construction Phase: Before installation of weather barriers, when materials are subject to wetting and exposure and to airborne mold spores, protect materials from water damage and keep porous and organic materials from coming into prolonged contact with concrete.

C. Partially Enclosed Construction Phase: After installation of weather barriers but before full enclosure and conditioning of building, when installed materials are still subject to infiltration of moisture and ambient mold spores, protect as follows:
   1. Do not load or install drywall or other porous materials or components, or items with high organic content, into partially enclosed building.
   2. Keep interior spaces reasonably clean and protected from water damage.
   3. Discard or replace water-damaged and wet material.
   4. Discard, replace, or clean stored or installed material that begins to grow mold.
   5. Perform work in a sequence that allows any wet materials adequate time to dry before enclosing the material in drywall or other interior finishes.

D. Controlled Construction Phase of Construction: After completing and sealing of the building enclosure but prior to the full operation of permanent HVAC systems, maintain as follows:
   1. Control moisture and humidity inside building by maintaining effective dry-in conditions.
   2. Remove materials that can not be completely restored to their manufactured moisture level within 48 hours.

3.6 OPERATION, TERMINATION, AND REMOVAL

A. Supervision: Enforce strict discipline in use of temporary facilities. To minimize waste and abuse, limit availability of temporary facilities to essential and intended uses.

B. Maintenance: Maintain facilities in good operating condition until removal.
   1. Maintain operation of temporary enclosures, heating, cooling, humidity control, ventilation, and similar facilities on a 24-hour basis where required to achieve indicated results and to avoid possibility of damage.

C. Temporary Facility Changeover: Do not change over from using temporary security and protection facilities to permanent facilities until Substantial Completion.

D. Termination and Removal: Remove each temporary facility when need for its service has ended, when it has been replaced by authorized use of a permanent facility, or no later than Substantial Completion. Complete or, if necessary, restore permanent construction that may have been delayed because of interference with temporary facility. Repair damaged Work, clean exposed surfaces, and replace construction that cannot be satisfactorily repaired.
   1. Materials and facilities that constitute temporary facilities are property of Contractor. Owner reserves right to take possession of Project identification signs.
   2. At Substantial Completion, repair, renovate, and clean permanent facilities used during construction period. Comply with final cleaning requirements specified in Section 017700 "Closeout Procedures."

END OF SECTION 015000

SECTION 016000 - PRODUCT REQUIREMENTS

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes administrative and procedural requirements for selection of products for use in Project; product delivery, storage, and handling; manufacturers' standard warranties on products; special warranties; and comparable products.

B. Related Requirements:
   1. Section 012500 "Substitution Procedures" for requests for substitutions.

1.2 DEFINITIONS

A. Products: Items obtained for incorporating into the Work, whether purchased for Project or taken from previously purchased stock. The term "product" includes the terms "material," "equipment," "system," and terms of similar intent.
   1. Named Products: Items identified by manufacturer's product name, including make or model number or other designation shown or listed in manufacturer's published product literature, that is current as of date of the Contract Documents.
   2. New Products: Items that have not previously been incorporated into another project or facility. Products salvaged or recycled from other projects are not considered new products.
   3. Comparable Product: Product that is demonstrated and approved through submittal process to have the indicated qualities related to type, function, dimension, in-service performance, physical properties, appearance, and other characteristics that equal or exceed those of specified product.

B. Basis-of-Design Product Specification: A specification in which a specific manufacturer's product is named and accompanied by the words "basis-of-design product," including make or model number or other designation, to establish the significant qualities related to type, function, dimension, in-service performance, physical properties, appearance, and other characteristics for purposes of evaluating comparable products of additional manufacturers named in the specification.

1.3 ACTION SUBMITTALS

A. Comparable Product Requests: Submit request for consideration of each comparable product. Identify product or fabrication or installation method to be replaced. Include Specification Section number and title and Drawing numbers and titles.
   1. Architect's Action: If necessary, Architect will request additional information or documentation for evaluation within one week of receipt of a comparable product request. Architect will notify Contractor of approval or rejection of proposed comparable product request within 15 days of receipt of request, or seven days of receipt of additional information or documentation, whichever is later.
      a. Form of Approval: As specified in Section 013300 "Submittal Procedures."
      b. Use product specified if Architect does not issue a decision on use of a comparable product request within time allocated.

B. Basis-of-Design Product Specification Submittal: Comply with requirements in Section 013300 "Submittal Procedures." Show compliance with requirements.

1.4 QUALITY ASSURANCE

A. Compatibility of Options: If Contractor is given option of selecting between two or more products for use on Project, select product compatible with products previously selected, even if previously selected products were also options.

1.5 PRODUCT DELIVERY, STORAGE, AND HANDLING

A. Deliver, store, and handle products using means and methods that will prevent damage, deterioration, and loss, including theft and vandalism. Comply with manufacturer's written instructions.

B. Delivery and Handling:
   1. Schedule delivery to minimize long-term storage at Project site and to prevent overcrowding of construction spaces.
   2. Coordinate delivery with installation time to ensure minimum holding time for items that are flammable, hazardous, easily damaged, or sensitive to deterioration, theft, and other losses.
   3. Deliver products to Project site in an undamaged condition in manufacturer's original sealed container or other packaging system, complete with labels and instructions for handling, storing, unpacking, protecting, and installing.
   4. Inspect products on delivery to determine compliance with the Contract Documents and to determine that products are undamaged and properly protected.

C. Storage:
   1. Store products to allow for inspection and measurement of quantity or counting of units.
   2. Store materials in a manner that will not endanger Project structure.
   3. Store products that are subject to damage by the elements, under cover in a weathertight enclosure above ground, with ventilation adequate to prevent condensation.
   4. Protect foam plastic from exposure to sunlight, except to extent necessary for period of installation and concealment.
   5. Comply with product manufacturer's written instructions for temperature, humidity, ventilation, and weather-protection requirements for storage.
   6. Protect stored products from damage and liquids from freezing.

1.6 PRODUCT WARRANTIES

A. Warranties specified in other Sections shall be in addition to, and run concurrent with, other warranties required by the Contract Documents. Manufacturer's disclaimers and limitations on product warranties do not relieve Contractor of obligations under requirements of the Contract Documents.
   1. Manufacturer's Warranty: Written warranty furnished by individual manufacturer for a particular product and specifically endorsed by manufacturer to Owner.
   2. Special Warranty: Written warranty required by the Contract Documents to provide specific rights for Owner.

B. Special Warranties: Prepare a written document that contains appropriate terms and identification, ready for execution.
   1. Manufacturer's Standard Form: Modified to include Project-specific information and properly executed.
   2. Specified Form: When specified forms are included with the Specifications, prepare a written document using indicated form properly executed.
   3. Refer to other Sections for specific content requirements and particular requirements for submitting special warranties.

C. Submittal Time: Comply with requirements in Section 017700 "Closeout Procedures."

PART 2 - PRODUCTS

2.1 PRODUCT SELECTION PROCEDURES

A. General Product Requirements: Provide products that comply with the Contract Documents, are undamaged and, unless otherwise indicated, are new at time of installation.
   1. Provide products complete with accessories, trim, finish, fasteners, and other items needed for a complete installation and indicated use and effect.

2. Standard Products: If available, and unless custom products or nonstandard options are specified, provide standard products of types that have been produced and used successfully in similar situations on other projects.
3. Owner reserves the right to limit selection to products with warranties not in conflict with requirements of the Contract Documents.
4. Where products are accompanied by the term "as selected," Architect will make selection.
5. Descriptive, performance, and reference standard requirements in the Specifications establish salient characteristics of products.

B. Product Selection Procedures:
1. Product: Where Specifications name a single manufacturer and product, provide the named product that complies with requirements. Comparable products or substitutions for Contractor's convenience will not be considered.
2. Manufacturer/Source: Where Specifications name a single manufacturer or source, provide a product by the named manufacturer or source that complies with requirements. Comparable products or substitutions for Contractor's convenience will not be considered.
3. Products:
   a. Nonrestricted List: Where Specifications include a list of names of both available manufacturers and products, provide one of the products listed, or an unnamed product, that complies with requirements. Comply with requirements in "Comparable Products" Article for consideration of an unnamed product.
4. Manufacturers:
   a. Nonrestricted List: Where Specifications include a list of available manufacturers, provide a product by one of the manufacturers listed, or a product by an unnamed manufacturer, that complies with requirements. Comply with requirements in "Comparable Products" Article for consideration of an unnamed manufacturer's product.
5. Basis-of-Design Product: Where Specifications name a product, or refer to a product indicated on Drawings, and include a list of manufacturers, provide the specified or indicated product or a comparable product by one of the other named manufacturers. Drawings and Specifications indicate sizes, profiles, dimensions, and other characteristics that are based on the product named. Comply with requirements in "Comparable Products" Article for consideration of an unnamed product by one of the other named manufacturers.

C. Visual Matching Specification: Where Specifications require "match Architect's sample", provide a product that complies with requirements and matches Architect's sample. Architect's decision will be final on whether a proposed product matches.
1. If no product available within specified category matches and complies with other specified requirements, comply with requirements in Section 012500 "Substitution Procedures" for proposal of product.

D. Visual Selection Specification: Where Specifications include the phrase "as selected by Architect from manufacturer's full range" or similar phrase, select a product that complies with requirements. Architect will select color, gloss, pattern, density, or texture from manufacturer's product line that includes both standard and premium items.

2.2 COMPARABLE PRODUCTS

A. Conditions for Consideration: Architect will consider Contractor's request for comparable product when the following conditions are satisfied. If the following conditions are not satisfied, Architect may return requests without action, except to record noncompliance with these requirements:
1. Evidence that the proposed product does not require revisions to the Contract Documents, that it is consistent with the Contract Documents and will produce the indicated results, and that it is compatible with other portions of the Work.
2. Detailed comparison of significant qualities of proposed product with those named in the Specifications. Significant qualities include attributes such as performance, weight, size, durability, visual effect, and specific features and requirements indicated.

3. Evidence that proposed product provides specified warranty.
4. List of similar installations for completed projects with project names and addresses and names and addresses of architects and owners, if requested.
5. Samples, if requested.

PART 3 - EXECUTION (Not Used)

END OF SECTION 016000

SECTION 017300 - EXECUTION

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes general administrative and procedural requirements governing execution of the Work including, but not limited to, the following:
   1. Construction layout.
   2. Field engineering and surveying.
   3. Installation of the Work.
   4. Cutting and patching.
   5. Coordination of Owner-installed products.
   6. Progress cleaning.
   7. Starting and adjusting.
   8. Protection of installed construction.
   9. Correction of the Work.

B. Related Requirements:
   1. Section 011000 "Summary" for limits on use of Project site.
   2. Section 013300 "Submittal Procedures" for submitting surveys.
   3. Section 017700 "Closeout Procedures" for submitting final property survey with Project Record Documents, recording of Owner-accepted deviations from indicated lines and levels, and final cleaning.

1.2 INFORMATIONAL SUBMITTALS

A. Qualification Data: For land surveyor or professional engineer.
B. Certificates: Submit certificate signed by land surveyor or professional certifying that location and elevation of improvements comply with requirements.
C. Landfill Receipts: Submit copy of receipts issued by a landfill facility, licensed to accept hazardous materials, for hazardous waste disposal.

1.3 QUALITY ASSURANCE

A. Land Surveyor Qualifications: A professional land surveyor who is legally qualified to practice in jurisdiction where Project is located and who is experienced in providing land-surveying services of the kind indicated.
B. Manufacturer's Installation Instructions: Obtain and maintain on-site manufacturer's written recommendations and instructions for installation of products and equipment.

PART 2 - PRODUCTS

2.1 MATERIALS

A. General: Comply with requirements specified in other Sections.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examination and Acceptance of Conditions: Before proceeding with each component of the Work, examine substrates, areas, and conditions, with Installer or Applicator present where indicated, for

compliance with requirements for installation tolerances and other conditions affecting performance. Record observations.

1. Examine roughing-in for mechanical and electrical systems to verify actual locations of connections before equipment and fixture installation.
2. Examine walls, floors, and roofs for suitable conditions where products and systems are to be installed.
3. Verify compatibility with and suitability of substrates, including compatibility with existing finishes or primers.

B. Written Report: Where a written report listing conditions detrimental to performance of the Work is required by other Sections, include the following:
   1. Description of the Work.
   2. List of detrimental conditions, including substrates.
   3. List of unacceptable installation tolerances.
   4. Recommended corrections.

C. Proceed with installation only after unsatisfactory conditions have been corrected. Proceeding with the Work indicates acceptance of surfaces and conditions.

3.2 PREPARATION

A. Field Measurements: Take field measurements as required to fit the Work properly. Recheck measurements before installing each product. Where portions of the Work are indicated to fit to other construction, verify dimensions of other construction by field measurements before fabrication. Coordinate fabrication schedule with construction progress to avoid delaying the Work.

B. Space Requirements: Verify space requirements and dimensions of items shown diagrammatically on Drawings.

C. Review of Contract Documents and Field Conditions: Immediately on discovery of the need for clarification of the Contract Documents caused by differing field conditions outside the control of Contractor, submit a request for information to Architect according to requirements in Section 013100 "Project Management and Coordination."

3.3 CONSTRUCTION LAYOUT

A. Verification: Before proceeding to lay out the Work, verify layout information shown on Drawings, in relation to the property survey and existing benchmarks. If discrepancies are discovered, notify Architect promptly.

B. Building Lines and Levels: Locate and lay out control lines and levels for structures, building foundations, column grids, and floor levels, including those required for mechanical and electrical work. Transfer survey markings and elevations for use with control lines and levels. Level foundations and piers from two or more locations.

C. Record Log: Maintain a log of layout control work. Record deviations from required lines and levels. Include beginning and ending dates and times of surveys, weather conditions, name and duty of each survey party member, and types of instruments and tapes used. Make the log available for reference by Architect.

3.4 FIELD ENGINEERING

A. Identification: Owner will identify existing benchmarks, control points, and property corners.

B. Reference Points: Locate existing permanent benchmarks, control points, and similar reference points before beginning the Work. Preserve and protect permanent benchmarks and control points during construction operations.
   1. Do not change or relocate existing benchmarks or control points without prior written approval of Architect. Report lost or destroyed permanent benchmarks or control points promptly. Report the need to relocate permanent benchmarks or control points to Architect before proceeding.

2. Replace lost or destroyed permanent benchmarks and control points promptly. Base replacements on the original survey control points.

C. Benchmarks: Establish and maintain a minimum of two permanent benchmarks on Project site, referenced to data established by survey control points. Comply with authorities having jurisdiction for type and size of benchmark.
   1. Record benchmark locations, with horizontal and vertical data, on Project Record Documents.
   2. Where the actual location or elevation of layout points cannot be marked, provide temporary reference points sufficient to locate the Work.
   3. Remove temporary reference points when no longer needed. Restore marked construction to its original condition.

D. Certified Survey: On completion of foundation walls, major site improvements, and other work requiring field-engineering services, prepare a certified survey showing dimensions, locations, angles, and elevations of construction and sitework.

3.5 INSTALLATION

A. General: Locate the Work and components of the Work accurately, in correct alignment and elevation, as indicated.
   1. Make vertical work plumb and make horizontal work level.
   2. Where space is limited, install components to maximize space available for maintenance and ease of removal for replacement.
   3. Conceal pipes, ducts, and wiring in finished areas unless otherwise indicated.

B. Comply with manufacturer's written instructions and recommendations for installing products in applications indicated.

C. Install products at the time and under conditions that will ensure the best possible results. Maintain conditions required for product performance until Substantial Completion.

D. Conduct construction operations so no part of the Work is subjected to damaging operations or loading in excess of that expected during normal conditions of occupancy.

E. Sequence the Work and allow adequate clearances to accommodate movement of construction items on site and placement in permanent locations.

F. Tools and Equipment: Do not use tools or equipment that produce harmful noise levels.

G. Templates: Obtain and distribute to the parties involved templates for work specified to be factory prepared and field installed. Check Shop Drawings of other work to confirm that adequate provisions are made for locating and installing products to comply with indicated requirements.

H. Attachment: Provide blocking and attachment plates and anchors and fasteners of adequate size and number to securely anchor each component in place, accurately located and aligned with other portions of the Work. Where size and type of attachments are not indicated, verify size and type required for load conditions.
   1. Mounting Heights: Where mounting heights are not indicated, mount components at heights directed by Architect.
   2. Allow for building movement, including thermal expansion and contraction.
   3. Coordinate installation of anchorages. Furnish setting drawings, templates, and directions for installing anchorages, including sleeves, concrete inserts, anchor bolts, and items with integral anchors, that are to be embedded in concrete or masonry. Deliver such items to Project site in time for installation.

I. Joints: Make joints of uniform width. Where joint locations in exposed work are not indicated, arrange joints for the best visual effect. Fit exposed connections together to form hairline joints.

J. Hazardous Materials: Use products, cleaners, and installation materials that are not considered hazardous.

3.6 CUTTING AND PATCHING

A. Cutting and Patching, General: Employ skilled workers to perform cutting and patching. Proceed with cutting and patching at the earliest feasible time, and complete without delay.
   1. Cut in-place construction to provide for installation of other components or performance of other construction, and subsequently patch as required to restore surfaces to their original condition.

B. Existing Warranties: Remove, replace, patch, and repair materials and surfaces cut or damaged during installation or cutting and patching operations, by methods and with materials so as not to void existing warranties.

C. Temporary Support: Provide temporary support of work to be cut.

D. Protection: Protect in-place construction during cutting and patching to prevent damage. Provide protection from adverse weather conditions for portions of Project that might be exposed during cutting and patching operations.

E. Existing Utility Services and Mechanical/Electrical Systems: Where existing services/systems are required to be removed, relocated, or abandoned, bypass such services/systems before cutting to prevent interruption to occupied areas.

F. Cutting: Cut in-place construction by sawing, drilling, breaking, chipping, grinding, and similar operations, including excavation, using methods least likely to damage elements retained or adjoining construction. If possible, review proposed procedures with original Installer; comply with original Installer's written recommendations.
   1. In general, use hand or small power tools designed for sawing and grinding, not hammering and chopping. Cut holes and slots neatly to minimum size required, and with minimum disturbance of adjacent surfaces. Temporarily cover openings when not in use.
   2. Finished Surfaces: Cut or drill from the exposed or finished side into concealed surfaces.
   3. Concrete and Masonry: Cut using a cutting machine, such as an abrasive saw or a diamond-core drill.
   4. Excavating and Backfilling: Comply with requirements in applicable Sections where required by cutting and patching operations.
   5. Mechanical and Electrical Services: Cut off pipe or conduit in walls or partitions to be removed. Cap, valve, or plug and seal remaining portion of pipe or conduit to prevent entrance of moisture or other foreign matter after cutting.
   6. Proceed with patching after construction operations requiring cutting are complete.

G. Patching: Patch construction by filling, repairing, refinishing, closing up, and similar operations following performance of other work. Patch with durable seams that are as invisible as practicable. Provide materials and comply with installation requirements specified in other Sections, where applicable.

H. Cleaning: Clean areas and spaces where cutting and patching are performed. Remove paint, mortar, oils, putty, and similar materials from adjacent finished surfaces.

3.7 OWNER-INSTALLED PRODUCTS

A. Site Access: Provide access to Project site for Owner's construction personnel.

B. Coordination: Coordinate construction and operations of the Work with work performed by Owner's construction personnel.
   1. Construction Schedule: Inform Owner of Contractor's preferred construction schedule for Owner's portion of the Work. Adjust construction schedule based on a mutually agreeable timetable. Notify Owner if changes to schedule are required due to differences in actual construction progress.
   2. Preinstallation Conferences: Include Owner's construction personnel at preinstallation conferences covering portions of the Work that are to receive Owner's work. Attend preinstallation conferences conducted by Owner's construction personnel if portions of the Work depend on Owner's construction.

3.8 PROGRESS CLEANING

A. General: Clean Project site and work areas daily, including common areas. Enforce requirements strictly. Dispose of materials lawfully.
   1. Comply with requirements in NFPA 241 for removal of combustible waste materials and debris.
   2. Do not hold waste materials more than seven days during normal weather or three days if the temperature is expected to rise above 80 deg F (27 deg C).
   3. Containerize hazardous and unsanitary waste materials separately from other waste. Mark containers appropriately and dispose of legally, according to regulations.
      a. Use containers intended for holding waste materials of type to be stored.
   4. Coordinate progress cleaning for joint-use areas where Contractor and other contractors are working concurrently.

B. Site: Maintain Project site free of waste materials and debris.

C. Work Areas: Clean areas where work is in progress to the level of cleanliness necessary for proper execution of the Work.
   1. Remove liquid spills promptly.
   2. Where dust would impair proper execution of the Work, broom-clean or vacuum the entire work area, as appropriate.

D. Installed Work: Keep installed work clean. Clean installed surfaces according to written instructions of manufacturer or fabricator of product installed, using only cleaning materials specifically recommended. If specific cleaning materials are not recommended, use cleaning materials that are not hazardous to health or property and that will not damage exposed surfaces.

E. Concealed Spaces: Remove debris from concealed spaces before enclosing the space.

F. Exposed Surfaces in Finished Areas: Clean exposed surfaces and protect as necessary to ensure freedom from damage and deterioration at time of Substantial Completion.

G. Waste Disposal: Do not bury or burn waste materials on-site. Do not wash waste materials down sewers or into waterways. Comply with waste disposal requirements in Section 015000 "Temporary Facilities and Controls."

H. During handling and installation, clean and protect construction in progress and adjoining materials already in place. Apply protective covering where required to ensure protection from damage or deterioration at Substantial Completion.

I. Clean and provide maintenance on completed construction as frequently as necessary through the remainder of the construction period. Adjust and lubricate operable components to ensure operability without damaging effects.

J. Limiting Exposures: Supervise construction operations to assure that no part of the construction, completed or in progress, is subject to harmful, dangerous, damaging, or otherwise deleterious exposure during the construction period.

3.9 STARTING AND ADJUSTING

A. Coordinate startup and adjusting of equipment and operating components with requirements in Section 019113 "General Commissioning Requirements."

B. Start equipment and operating components to confirm proper operation. Remove malfunctioning units, replace with new units, and retest.

C. Adjust equipment for proper operation. Adjust operating components for proper operation without binding.

D. Test each piece of equipment to verify proper operation. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.

E. Manufacturer's Field Service: Comply with qualification requirements in Section 014000 "Quality Requirements."

3.10 PROTECTION OF INSTALLED CONSTRUCTION

A. Provide final protection and maintain conditions that ensure installed Work is without damage or deterioration at time of Substantial Completion.
B. Comply with manufacturer's written instructions for temperature and relative humidity.

END OF SECTION 017300

SECTION 017419 - CONSTRUCTION WASTE MANAGEMENT AND DISPOSAL

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section includes administrative and procedural requirements for the following:
   1. Salvaging nonhazardous demolition waste.
   2. Recycling nonhazardous demolition waste.
   3. Disposing of nonhazardous demolition waste.

B. Related Requirements:
   1. Section 011200 "Multiple Contract Summary" for coordination of responsibilities for waste management.
   2. Section 024119 "Selective Demolition" for disposition of waste resulting from partial demolition of buildings, structures, and site improvements, and for disposition of hazardous waste.

1.3 DEFINITIONS

A. Construction Waste: Building and site improvement materials and other solid waste resulting from construction, remodeling, renovation, or repair operations. Construction waste includes packaging.

B. Demolition Waste: Building and site improvement materials resulting from demolition or selective demolition operations.

C. Disposal: Removal off-site of demolition and construction waste and subsequent sale, recycling, reuse, or deposit in landfill or incinerator acceptable to authorities having jurisdiction.

D. Recycle: Recovery of demolition or construction waste for subsequent processing in preparation for reuse.

E. Salvage: Recovery of demolition or construction waste and subsequent sale or reuse in another facility.

F. Salvage and Reuse: Recovery of demolition or construction waste and subsequent incorporation into the Work.

1.4 PERFORMANCE REQUIREMENTS

A. General: Achieve end-of-Project rates for salvage/recycling of 50 percent by weight of total non-hazardous solid waste generated by the Work. Practice efficient waste management in the use of materials in the course of the Work. Use all reasonable means to divert construction and demolition waste from landfills and incinerators. Facilitate recycling and salvage of materials.
   1. Demolition Waste:
      a. Brick.
      b. Concrete masonry units.
      c. Plywood and oriented strand board.
      d. Structural and miscellaneous steel.
      e. Rough hardware.
      f. Windows.
      g. Glazing.
      h. Metal studs.
      i. Gypsum board.
      j. Supports and hangers.
   2. Construction Waste:

a. Masonry and CMU.
b. Lumber.
c. Wood sheet materials.
d. Wood trim.
e. Metals.
f. Gypsum board.
g. Packaging: Regardless of salvage/recycle goal indicated in "General" Paragraph above, salvage or recycle 100 percent of the following uncontaminated packaging materials:
   1) Paper.
   2) Cardboard.
   3) Boxes.
   4) Plastic sheet and film.
   5) Polystyrene packaging.
   6) Wood crates.
   7) Plastic pails.

1.5 ACTION SUBMITTALS

A. Waste Management Plan: Submit plan within 7 days of date established for the Notice of Award.

1.6 INFORMATIONAL SUBMITTALS

A. Waste Reduction Progress Reports: Concurrent with each Application for Payment, submit report. Use Form CWM-7 for construction waste and Form CWM-8 for demolition waste. Include the following information:
   1. Material category.
   2. Generation point of waste.
   3. Total quantity of waste in tons (tonnes).
   4. Quantity of waste salvaged, both estimated and actual in tons (tonnes).
   5. Quantity of waste recycled, both estimated and actual in tons (tonnes).
   6. Total quantity of waste recovered (salvaged plus recycled) in tons (tonnes).
   7. Total quantity of waste recovered (salvaged plus recycled) as a percentage of total waste.
B. Waste Reduction Calculations: Before request for Substantial Completion, submit calculated end-of-Project rates for salvage, recycling, and disposal as a percentage of total waste generated by the Work.
C. Records of Donations: Indicate receipt and acceptance of salvageable waste donated to individuals and organizations. Indicate whether organization is tax exempt.
D. Records of Sales: Indicate receipt and acceptance of salvageable waste sold to individuals and organizations. Indicate whether organization is tax exempt.
E. Recycling and Processing Facility Records: Indicate receipt and acceptance of recyclable waste by recycling and processing facilities licensed to accept them. Include manifests, weight tickets, receipts, and invoices.
F. Landfill and Incinerator Disposal Records: Indicate receipt and acceptance of waste by landfills and incinerator facilities licensed to accept them. Include manifests, weight tickets, receipts, and invoices.
G. Qualification Data: For waste management coordinator.
H. Statement of Refrigerant Recovery: Signed by refrigerant recovery technician responsible for recovering refrigerant, stating that all refrigerant that was present was recovered and that recovery was performed according to EPA regulations. Include name and address of technician and date refrigerant was recovered.

1.7 QUALITY ASSURANCE

A. Waste Management Coordinator Qualifications: Experienced firm, with a record of successful waste management coordination of projects with similar requirements, that employs a LEED-Accredited Professional, certified by the USGBC, as waste management coordinator.
B. Refrigerant Recovery Technician Qualifications: Certified by EPA-approved certification program.

C. Regulatory Requirements: Comply with hauling and disposal regulations of authorities having jurisdiction.

D. Waste Management Conference: Conduct conference at Project site to comply with requirements in Section 013100 "Project Management and Coordination." Review methods and procedures related to waste management including, but not limited to, the following:

1. Review and discuss waste management plan including responsibilities of waste management coordinator.
2. Review requirements for documenting quantities of each type of waste and its disposition.
3. Review and finalize procedures for materials separation and verify availability of containers and bins needed to avoid delays.
4. Review procedures for periodic waste collection and transportation to recycling and disposal facilities.
5. Review waste management requirements for each trade.

1.8 WASTE MANAGEMENT PLAN

A. General: Develop a waste management plan according to ASTM E 1609 and requirements in this Section. Plan shall consist of waste identification, waste reduction work plan, and cost/revenue analysis. Distinguish between demolition and construction waste. Indicate quantities by weight or volume, but use same units of measure throughout waste management plan.

B. Waste Identification: Indicate anticipated types and quantities of demolition, site-clearing and construction waste generated by the Work. Use Form CWM-1 for construction waste and Form CWM-2 for demolition waste. Include estimated quantities and assumptions for estimates.

C. Waste Reduction Work Plan: List each type of waste and whether it will be salvaged, recycled, or disposed of in landfill or incinerator. Use Form CWM-3 for construction waste and Form CWM-4 for demolition waste. Include points of waste generation, total quantity of each type of waste, quantity for each means of recovery, and handling and transportation procedures.

1. Salvaged Materials for Reuse: For materials that will be salvaged and reused in this Project, describe methods for preparing salvaged materials before incorporation into the Work.
2. Salvaged Materials for Sale: For materials that will be sold to individuals and organizations, include list of their names, addresses, and telephone numbers.
3. Salvaged Materials for Donation: For materials that will be donated to individuals and organizations, include list of their names, addresses, and telephone numbers.
4. Recycled Materials: Include list of local receivers and processors and type of recycled materials each will accept. Include names, addresses, and telephone numbers.
5. Disposed Materials: Indicate how and where materials will be disposed of. Include name, address, and telephone number of each landfill and incinerator facility.
6. Handling and Transportation Procedures: Include method that will be used for separating recyclable waste including sizes of containers, container labeling, and designated location where materials separation will be performed.

D. Cost/Revenue Analysis: Indicate total cost of waste disposal as if there was no waste management plan and net additional cost or net savings resulting from implementing waste management plan. Use Form CWM-5 for construction waste and Form CWM-6 for demolition waste. Include the following:

1. Total quantity of waste.
2. Estimated cost of disposal (cost per unit). Include hauling and tipping fees and cost of collection containers for each type of waste.
3. Total cost of disposal (with no waste management).
4. Revenue from salvaged materials.
5. Revenue from recycled materials.
6. Savings in hauling and tipping fees by donating materials.
7. Savings in hauling and tipping fees that are avoided.
8. Handling and transportation costs. Include cost of collection containers for each type of waste.
9. Net additional cost or net savings from waste management plan.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 PLAN IMPLEMENTATION

A. General: Implement approved waste management plan. Provide handling, containers, storage, signage, transportation, and other items as required to implement waste management plan during the entire duration of the Contract.
   1. Comply with operation, termination, and removal requirements in Section 015000 "Temporary Facilities and Controls."
B. Waste Management Coordinator: Engage a waste management coordinator to be responsible for implementing, monitoring, and reporting status of waste management work plan. Coordinator shall be present at Project site full time for duration of Project.
C. Training: Train workers, subcontractors, and suppliers on proper waste management procedures, as appropriate for the Work.
   1. Distribute waste management plan to everyone concerned within 3 days of submittal return.
   2. Distribute waste management plan to entities when they first begin work on-site. Review plan procedures and locations established for salvage, recycling, and disposal.
D. Site Access and Temporary Controls: Conduct waste management operations to ensure minimum interference with roads, streets, walks, walkways, and other adjacent occupied and used facilities.
   1. Designate and label specific areas on Project site necessary for separating materials that are to be salvaged, recycled, reused, donated, and sold.
   2. Comply with Section 015000 "Temporary Facilities and Controls" for controlling dust and dirt, environmental protection, and noise control.
E. Waste Management in Historic Zones or Areas: Hauling equipment and other materials shall be of sizes that clear surfaces within historic spaces, areas, rooms, and openings, by 12 inches (300 mm) or more.

3.2 SALVAGING DEMOLITION WASTE

A. Salvaged Items for Reuse in the Work: Salvage items for reuse and handle as follows:
   1. Clean salvaged items.
   2. Pack or crate items after cleaning. Identify contents of containers with label indicating elements, date of removal, quantity, and location where removed.
   3. Store items in a secure area until installation.
   4. Protect items from damage during transport and storage.
   5. Install salvaged items to comply with installation requirements for new materials and equipment. Provide connections, supports, and miscellaneous materials necessary to make items functional for use indicated.
B. Salvaged Items for Sale or Donation: Not Permitted on Project site.
C. Salvaged Items for Owner's Use: Salvage items for Owner's use and handle as follows:
   1. Clean salvaged items.
   2. Pack or crate items after cleaning. Identify contents of containers with label indicating elements, date of removal, quantity, and location where removed.
   3. Store items in a secure area until delivery to Owner.
   4. Transport items to Owner's storage area designated by Owner.
   5. Protect items from damage during transport and storage.
D. Doors and Hardware: Brace open end of door frames. Except for removing door closers, leave door hardware attached to doors.
E. Equipment: Drain tanks, piping, and fixtures. Seal openings with caps or plugs. Protect equipment from exposure to weather.
F. Plumbing Fixtures: Separate by type and size.
G. Lighting Fixtures: Separate lamps by type and protect from breakage.
H. Electrical Devices: Separate switches, receptacles, switchgear, transformers, meters, panelboards, circuit breakers, and other devices by type.

3.3 RECYCLING DEMOLITION AND CONSTRUCTION WASTE, GENERAL

A. General: Recycle paper and beverage containers used by on-site workers.
B. Recycling Incentives: Revenues, savings, rebates, tax credits, and other incentives received for recycling waste materials shall accrue to Contractor.
C. Preparation of Waste: Prepare and maintain recyclable waste materials according to recycling or reuse facility requirements. Maintain materials free of dirt, adhesives, solvents, petroleum contamination, and other substances deleterious to the recycling process.
D. Procedures: Separate recyclable waste from other waste materials, trash, and debris. Separate recyclable waste by type at Project site to the maximum extent practical according to approved construction waste management plan.
    1. Provide appropriately marked containers or bins for controlling recyclable waste until removed from Project site. Include list of acceptable and unacceptable materials at each container and bin.
        a. Inspect containers and bins for contamination and remove contaminated materials if found.
    2. Stockpile processed materials on-site without intermixing with other materials. Place, grade, and shape stockpiles to drain surface water. Cover to prevent windblown dust.
    3. Stockpile materials away from construction area. Do not store within drip line of remaining trees.
    4. Store components off the ground and protect from the weather.
    5. Remove recyclable waste from Owner's property and transport to recycling receiver or processor.

3.4 RECYCLING DEMOLITION WASTE

A. Concrete: Remove reinforcement and other metals from concrete and sort with other metals.
    1. Pulverize concrete to maximum 4-inch (100-mm) size.
    2. Crush concrete and screen to comply with requirements in Section 312000 "Earth Moving" for use as satisfactory soil for fill or subbase.
B. Masonry: Remove metal reinforcement, anchors, and ties from masonry and sort with other metals.
    1. Pulverize masonry to maximum 4-inch (100-mm) size.
        a. Crush masonry and screen to comply with requirements in Section 312000 "Earth Moving" for use as general fill satisfactory soil for fill or subbase.
        b. Crush masonry and screen to comply with requirements in Section 329300 "Plants" for use as mineral mulch.
    2. Clean and stack undamaged, whole masonry units on wood pallets.
C. Wood Materials: Sort and stack members according to size, type, and length. Separate lumber, engineered wood products, panel products, and treated wood materials.
D. Metals: Separate metals by type.
    1. Structural Steel: Stack members according to size, type of member, and length.
    2. Remove and dispose of bolts, nuts, washers, and other rough hardware.
E. Gypsum Board: Stack large clean pieces on wood pallets or in container and store in a dry location. Remove edge trim and sort with other metals. Remove and dispose of fasteners.
F. Metal Suspension System: Separate metal members including trim, and other metals from acoustical panels and tile and sort with other metals.

3.5 RECYCLING CONSTRUCTION WASTE

A. Packaging:
    1. Cardboard and Boxes: Break down packaging into flat sheets. Bundle and store in a dry location.
    2. Polystyrene Packaging: Separate and bag materials.
    3. Pallets: As much as possible, require deliveries using pallets to remove pallets from Project site. For pallets that remain on-site, break down pallets into component wood pieces and comply with requirements for recycling wood.
    4. Crates: Break down crates into component wood pieces and comply with requirements for recycling wood.
B. Wood Materials:
    1. Clean Cut-Offs of Lumber: Grind or chip into small pieces.

2. Clean Sawdust: Bag sawdust that does not contain painted or treated wood.
   a. Comply with requirements in Section 329300 "Plants" for use of clean sawdust as organic mulch.

C. Gypsum Board: Stack large clean pieces on wood pallets or in container and store in a dry location.
   1. Clean Gypsum Board: Grind scraps of clean gypsum board using small mobile chipper or hammer mill. Screen out paper after grinding.
      a. Comply with requirements in Section 329300 "Plants" for use of clean ground gypsum board as inorganic soil amendment.

3.6 DISPOSAL OF WASTE

A. General: Except for items or materials to be salvaged, recycled, or otherwise reused, remove waste materials from Project site and legally dispose of them in a landfill or incinerator acceptable to authorities having jurisdiction.
   1. Except as otherwise specified, do not allow waste materials that are to be disposed of accumulate on-site.
   2. Remove and transport debris in a manner that will prevent spillage on adjacent surfaces and areas.

B. Burning: Do not burn waste materials.

C. Burning: Burning of waste materials is permitted only at designated areas on Owner's property, provided required permits are obtained. Provide full-time monitoring for burning materials until fires are extinguished.

D. Disposal: Remove waste materials and dispose of at designated spoil areas on Owner's property.

E. Disposal: Remove waste materials from Owner's property and legally dispose of them.

END OF SECTION 017419

SECTION 017700 - CLOSEOUT PROCEDURES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section includes administrative and procedural requirements for contract closeout, including, but not limited to, the following:
   1. Substantial Completion procedures.
   2. Final completion procedures.
   3. Warranties.
   4. Final cleaning.
   5. Repair of the Work.

B. Related Requirements:
   1. Section 017300 "Execution" for progress cleaning of Project site.
   2. Section 017823 "Operation and Maintenance Data" for operation and maintenance manual requirements.
   3. Section 017839 "Project Record Documents" for submitting record Drawings, record Specifications, and record Product Data.

1.3 ACTION SUBMITTALS

A. Product Data: For cleaning agents.
B. Contractor's List of Incomplete Items: Initial submittal at Substantial Completion.
C. Certified List of Incomplete Items: Final submittal at Final Completion.

1.4 CLOSEOUT SUBMITTALS

A. Certificates of Release: From authorities having jurisdiction.
B. Certificate of Insurance: For continuing coverage.
C. Field Report: For pest control inspection.

1.5 MAINTENANCE MATERIAL SUBMITTALS

A. Schedule of Maintenance Material Items: For maintenance material submittal items specified in other Sections.

1.6 SUBSTANTIAL COMPLETION PROCEDURES

A. Contractor's List of Incomplete Items: Prepare and submit a list of items to be completed and corrected (Contractor's punch list), indicating the value of each item on the list and reasons why the Work is incomplete.
B. Submittals Prior to Substantial Completion: Complete the following a minimum of 10 days prior to requesting inspection for determining date of Substantial Completion. List items below that are incomplete at time of request.
   1. Certificates of Release: Obtain and submit releases from authorities having jurisdiction permitting Owner unrestricted use of the Work and access to services and utilities. Include occupancy permits, operating certificates, and similar releases.

2. Submit closeout submittals specified in other Division 01 Sections, including project record documents, operation and maintenance manuals, final completion construction photographic documentation, damage or settlement surveys, property surveys, and similar final record information.
3. Submit closeout submittals specified in individual Sections, including specific warranties, workmanship bonds, maintenance service agreements, final certifications, and similar documents.
4. Submit maintenance material submittals specified in individual Sections, including tools, spare parts, extra materials, and similar items, and deliver to location designated by Architect. Label with manufacturer's name and model number where applicable.
   a. Schedule of Maintenance Material Items: Prepare and submit schedule of maintenance material submittal items, including name and quantity of each item and name and number of related Specification Section. Obtain Architect's signature for receipt of submittals.
5. Submit test/adjust/balance records.
6. Submit sustainable design submittals required in Section 018113.13 "Sustainable Design Requirements - LEED for New Construction and Major Renovations," Section 018113.16 "Sustainable Design Requirements - LEED for Commercial Interiors," Section 018113.19 "Sustainable Design Requirements - LEED for Core and Shell Development," and Section 018113.23 "Sustainable Design Requirements - LEED for Schools" and in individual Sections.
7. Submit changeover information related to Owner's occupancy, use, operation, and maintenance.

C. Procedures Prior to Substantial Completion: Complete the following a minimum of 10 days prior to requesting inspection for determining date of Substantial Completion. List items below that are incomplete at time of request.
1. Advise Owner of pending insurance changeover requirements.
2. Make final changeover of permanent locks and deliver keys to Owner. Advise Owner's personnel of changeover in security provisions.
3. Complete startup and testing of systems and equipment.
4. Perform preventive maintenance on equipment used prior to Substantial Completion.
5. Instruct Owner's personnel in operation, adjustment, and maintenance of products, equipment, and systems. Submit demonstration and training video recordings specified in Section 017900 "Demonstration and Training."
6. Advise Owner of changeover in heat and other utilities.
7. Participate with Owner in conducting inspection and walkthrough with local emergency responders.
8. Terminate and remove temporary facilities from Project site, along with mockups, construction tools, and similar elements.
9. Complete final cleaning requirements, including touchup painting.
10. Touch up and otherwise repair and restore marred exposed finishes to eliminate visual defects.

D. Inspection: Submit a written request for inspection to determine Substantial Completion a minimum of 10 days prior to date the work will be completed and ready for final inspection and tests. On receipt of request, Architect will either proceed with inspection or notify Contractor of unfulfilled requirements. Architect will prepare the Certificate of Substantial Completion after inspection or will notify Contractor of items, either on Contractor's list or additional items identified by Architect, that must be completed or corrected before certificate will be issued.
1. Reinspection: Request reinspection when the Work identified in previous inspections as incomplete is completed or corrected.
2. Results of completed inspection will form the basis of requirements for final completion.

1.7 FINAL COMPLETION PROCEDURES

A. Submittals Prior to Final Completion: Before requesting final inspection for determining final completion, complete the following:
1. Submit a final Application for Payment according to Section 012900 "Payment Procedures."

2. Certified List of Incomplete Items: Submit certified copy of Architect's Substantial Completion inspection list of items to be completed or corrected (punch list), endorsed and dated by Architect. Certified copy of the list shall state that each item has been completed or otherwise resolved for acceptance.
3. Certificate of Insurance: Submit evidence of final, continuing insurance coverage complying with insurance requirements.
4. Submit pest-control final inspection report.

B. Inspection: Submit a written request for final inspection to determine acceptance a minimum of 10 days prior to date the work will be completed and ready for final inspection and tests. On receipt of request, Architect will either proceed with inspection or notify Contractor of unfulfilled requirements. Architect will prepare a final Certificate for Payment after inspection or will notify Contractor of construction that must be completed or corrected before certificate will be issued.
1. Reinspection: Request reinspection when the Work identified in previous inspections as incomplete is completed or corrected.

1.8 LIST OF INCOMPLETE ITEMS (PUNCH LIST)

A. Organization of List: Include name and identification of each space and area affected by construction operations for incomplete items and items needing correction including, if necessary, areas disturbed by Contractor that are outside the limits of construction. Use CSI Form 14.1A.
1. Organize list of spaces in sequential order, starting with exterior areas first and proceeding from lowest floor to highest floor.
2. Organize items applying to each space by major element, including categories for ceiling, individual walls, floors, equipment, and building systems.
3. Include the following information at the top of each page:
   a. Project name.
   b. Date.
   c. Name of Architect.
   d. Name of Contractor.
   e. Page number.
4. Submit list of incomplete items in the following format:
   a. MS Excel electronic file. Architect will return annotated file.
   b. PDF electronic file. Architect will return annotated file.
   c. Three paper copies. Architect will return two copies.

1.9 SUBMITTAL OF PROJECT WARRANTIES

A. Time of Submittal: Submit written warranties on request of Architect for designated portions of the Work where commencement of warranties other than date of Substantial Completion is indicated, or when delay in submittal of warranties might limit Owner's rights under warranty.
B. Partial Occupancy: Submit properly executed warranties within 15 days of completion of designated portions of the Work that are completed and occupied or used by Owner during construction period by separate agreement with Contractor.
C. Organize warranty documents into an orderly sequence based on the table of contents of Project Manual.
1. Bind warranties and bonds in heavy-duty, three-ring, vinyl-covered, loose-leaf binders, thickness as necessary to accommodate contents, and sized to receive 8-1/2-by-11-inch (215-by-280-mm) paper.
2. Provide heavy paper dividers with plastic-covered tabs for each separate warranty. Mark tab to identify the product or installation. Provide a typed description of the product or installation, including the name of the product and the name, address, and telephone number of Installer.
3. Identify each binder on the front and spine with the typed or printed title "WARRANTIES," Project name, and name of Contractor.

4. Warranty Electronic File: Scan warranties and bonds and assemble complete warranty and bond submittal package into a single indexed electronic PDF file with links enabling navigation to each item. Provide bookmarked table of contents at beginning of document.

D. Provide additional copies of each warranty to include in operation and maintenance manuals.

PART 2 - PRODUCTS

2.1 MATERIALS

A. Cleaning Agents: Use cleaning materials and agents recommended by manufacturer or fabricator of the surface to be cleaned. Do not use cleaning agents that are potentially hazardous to health or property or that might damage finished surfaces.

1. Use cleaning products that comply with Green Seal's GS-37, or if GS-37 is not applicable, use products that comply with the California Code of Regulations maximum allowable VOC levels.

PART 3 - EXECUTION

3.1 FINAL CLEANING

A. General: Perform final cleaning. Conduct cleaning and waste-removal operations to comply with local laws and ordinances and Federal and local environmental and antipollution regulations.

B. Cleaning: Employ experienced workers or professional cleaners for final cleaning. Clean each surface or unit to condition expected in an average commercial building cleaning and maintenance program. Comply with manufacturer's written instructions.

1. Complete the following cleaning operations before requesting inspection for certification of Substantial Completion for entire Project or for a designated portion of Project:
   a. Clean Project site, yard, and grounds, in areas disturbed by construction activities, including landscape development areas, of rubbish, waste material, litter, and other foreign substances.
   b. Sweep paved areas broom clean. Remove petrochemical spills, stains, and other foreign deposits.
   c. Rake grounds that are neither planted nor paved to a smooth, even-textured surface.
   d. Remove tools, construction equipment, machinery, and surplus material from Project site.
   e. Remove snow and ice to provide safe access to building.
   f. Clean exposed exterior and interior hard-surfaced finishes to a dirt-free condition, free of stains, films, and similar foreign substances. Avoid disturbing natural weathering of exterior surfaces. Restore reflective surfaces to their original condition.
   g. Remove debris and surface dust from limited access spaces, including roofs, plenums, shafts, trenches, equipment vaults, manholes, attics, and similar spaces.
   h. Sweep concrete floors broom clean in unoccupied spaces.
   i. Vacuum carpet and similar soft surfaces, removing debris and excess nap; clean according to manufacturer's recommendations if visible soil or stains remain.
   j. Clean transparent materials, including mirrors and glass in doors and windows. Remove glazing compounds and other noticeable, vision-obscuring materials. Polish mirrors and glass, taking care not to scratch surfaces.
   k. Remove labels that are not permanent.
   l. Wipe surfaces of mechanical and electrical equipment, and similar equipment. Remove excess lubrication, paint and mortar droppings, and other foreign substances.
   m. Clean plumbing fixtures to a sanitary condition, free of stains, including stains resulting from water exposure.
   n. Replace disposable air filters and clean permanent air filters. Clean exposed surfaces of diffusers, registers, and grills.

o. Clean ducts, blowers, and coils if units were operated without filters during construction or that display contamination with particulate matter on inspection.
   1) Clean HVAC system in compliance with NADCA Standard 1992-01. Provide written report on completion of cleaning.
p. Clean light fixtures, lamps, globes, and reflectors to function with full efficiency.
q. Leave Project clean and ready for occupancy.

C. Pest Control: Comply with pest control requirements in Section 015000 "Temporary Facilities and Controls." Prepare written report.
D. Construction Waste Disposal: Comply with waste disposal requirements in Section 015000 "Temporary Facilities and Controls." Section 017419 "Construction Waste Management and Disposal."

3.2 REPAIR OF THE WORK

A. Complete repair and restoration operations before requesting inspection for determination of Substantial Completion.
B. Repair or remove and replace defective construction. Repairing includes replacing defective parts, refinishing damaged surfaces, touching up with matching materials, and properly adjusting operating equipment. Where damaged or worn items cannot be repaired or restored, provide replacements. Remove and replace operating components that cannot be repaired. Restore damaged construction and permanent facilities used during construction to specified condition.
   1. Remove and replace chipped, scratched, and broken glass, reflective surfaces, and other damaged transparent materials.
   2. Touch up and otherwise repair and restore marred or exposed finishes and surfaces. Replace finishes and surfaces that that already show evidence of repair or restoration.
      a. Do not paint over "UL" and other required labels and identification, including mechanical and electrical nameplates. Remove paint applied to required labels and identification.
   3. Replace parts subject to operating conditions during construction that may impede operation or reduce longevity.
   4. Replace burned-out bulbs, bulbs noticeably dimmed by hours of use, and defective and noisy starters in fluorescent and mercury vapor fixtures to comply with requirements for new fixtures.

END OF SECTION 017700

SECTION 017823 - OPERATION AND MAINTENANCE DATA

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section includes administrative and procedural requirements for preparing operation and maintenance manuals, including the following:

1. Operation and maintenance documentation directory.
2. Emergency manuals.
3. Operation manuals for systems, subsystems, and equipment.
4. Product maintenance manuals.
5. Systems and equipment maintenance manuals.

1.3 DEFINITIONS

A. System: An organized collection of parts, equipment, or subsystems united by regular interaction.

B. Subsystem: A portion of a system with characteristics similar to a system.

1.4 CLOSEOUT SUBMITTALS

A. Manual Content: Operations and maintenance manual content is specified in individual Specification Sections to be reviewed at the time of Section submittals. Submit reviewed manual content formatted and organized as required by this Section.

1. Architect and Commissioning Authority will comment on whether content of operations and maintenance submittals are acceptable.
2. Where applicable, clarify and update reviewed manual content to correspond to revisions and field conditions.

B. Format: Submit operations and maintenance manuals in the following format:

1. PDF electronic file. Assemble each manual into a composite electronically indexed file. Submit on digital media acceptable to Architect.

   a. Name each indexed document file in composite electronic index with applicable item name. Include a complete electronically linked operation and maintenance directory.
   b. Enable inserted reviewer comments on draft submittals.

2. Three paper copies. Include a complete operation and maintenance directory. Enclose title pages and directories in clear plastic sleeves. Architect, will return two copies.

C. Initial Manual Submittal: Submit draft copy of each manual at least 30 days before commencing demonstration and training. Architect and Commissioning Authority will comment on whether general scope and content of manual are acceptable.

D. Final Manual Submittal: Submit each manual in final form prior to requesting inspection for Substantial Completion and at least 15 days before commencing demonstration and training. Architect and Commissioning Authority will return copy with comments.

1. Correct or revise each manual to comply with Architect's and Commissioning Authority's comments. Submit copies of each corrected manual within 15 days of receipt of Architect's and Commissioning Authority's comments and prior to commencing demonstration and training.

PART 2 - PRODUCTS

2.1 OPERATION AND MAINTENANCE DOCUMENTATION DIRECTORY

A. Directory: Prepare a single, comprehensive directory of emergency, operation, and maintenance data and materials, listing items and their location to facilitate ready access to desired information. Include a section in the directory for each of the following:

1. List of documents.
2. List of systems.
3. List of equipment.
4. Table of contents.

B. List of Systems and Subsystems: List systems alphabetically. Include references to operation and maintenance manuals that contain information about each system.

C. List of Equipment: List equipment for each system, organized alphabetically by system. For pieces of equipment not part of system, list alphabetically in separate list.

D. Tables of Contents: Include a table of contents for each emergency, operation, and maintenance manual.

E. Identification: In the documentation directory and in each operation and maintenance manual, identify each system, subsystem, and piece of equipment with same designation used in the Contract Documents. If no designation exists, assign a designation according to ASHRAE Guideline 4, "Preparation of Operating and Maintenance Documentation for Building Systems."

2.2 REQUIREMENTS FOR EMERGENCY, OPERATION, AND MAINTENANCE MANUALS

A. Organization: Unless otherwise indicated, organize each manual into a separate section for each system and subsystem, and a separate section for each piece of equipment not part of a system. Each manual shall contain the following materials, in the order listed:

1. Title page.
2. Table of contents.
3. Manual contents.

B. Title Page: Include the following information:

1. Subject matter included in manual.

2. Name and address of Project.
3. Name and address of Owner.
4. Date of submittal.
5. Name and contact information for Contractor.
6. Name and contact information for Construction Manager.
7. Name and contact information for Architect.
8. Name and contact information for Commissioning Authority.
9. Names and contact information for major consultants to the Architect that designed the systems contained in the manuals.
10. Cross-reference to related systems in other operation and maintenance manuals.

C. Table of Contents: List each product included in manual, identified by product name, indexed to the content of the volume, and cross-referenced to Specification Section number in Project Manual.

1. If operation or maintenance documentation requires more than one volume to accommodate data, include comprehensive table of contents for all volumes in each volume of the set.

D. Manual Contents: Organize into sets of manageable size. Arrange contents alphabetically by system, subsystem, and equipment. If possible, assemble instructions for subsystems, equipment, and components of one system into a single binder.

E. Manuals, Electronic Files: Submit manuals in the form of a multiple file composite electronic PDF file for each manual type required.

1. Electronic Files: Use electronic files prepared by manufacturer where available. Where scanning of paper documents is required, configure scanned file for minimum readable file size.
2. File Names and Bookmarks: Enable bookmarking of individual documents based on file names. Name document files to correspond to system, subsystem, and equipment names used in manual directory and table of contents. Group documents for each system and subsystem into individual composite bookmarked files, then create composite manual, so that resulting bookmarks reflect the system, subsystem, and equipment names in a readily navigated file tree. Configure electronic manual to display bookmark panel on opening file.

F. Manuals, Paper Copy: Submit manuals in the form of hard copy, bound and labeled volumes.

1. Binders: Heavy-duty, three-ring, vinyl-covered, post-type binders, in thickness necessary to accommodate contents, sized to hold 8-1/2-by-11-inch (215-by-280-mm) paper; with clear plastic sleeve on spine to hold label describing contents and with pockets inside covers to hold folded oversize sheets.

   a. If two or more binders are necessary to accommodate data of a system, organize data in each binder into groupings by subsystem and related components. Cross-reference other binders if necessary to provide essential information for proper operation or maintenance of equipment or system.
   b. Identify each binder on front and spine, with printed title "OPERATION AND MAINTENANCE MANUAL," Project title or name, and subject matter of contents, and indicate Specification Section number on bottom of spine. Indicate volume number for multiple-volume sets.

2. Dividers: Heavy-paper dividers with plastic-covered tabs for each section of the manual. Mark each tab to indicate contents. Include typed list of products and major components of equipment included in the section on each divider, cross-referenced to Specification Section number and title of Project Manual.

3. Protective Plastic Sleeves: Transparent plastic sleeves designed to enclose diagnostic software storage media for computerized electronic equipment.
4. Supplementary Text: Prepared on 8-1/2-by-11-inch (215-by-280-mm) white bond paper.
5. Drawings: Attach reinforced, punched binder tabs on drawings and bind with text.

    a. If oversize drawings are necessary, fold drawings to same size as text pages and use as foldouts.
    b. If drawings are too large to be used as foldouts, fold and place drawings in labeled envelopes and bind envelopes in rear of manual. At appropriate locations in manual, insert typewritten pages indicating drawing titles, descriptions of contents, and drawing locations.

2.3 EMERGENCY MANUALS

A. Content: Organize manual into a separate section for each of the following:

1. Type of emergency.
2. Emergency instructions.
3. Emergency procedures.

B. Type of Emergency: Where applicable for each type of emergency indicated below, include instructions and procedures for each system, subsystem, piece of equipment, and component:

1. Fire.
2. Flood.
3. Gas leak.
4. Water leak.
5. Power failure.
6. Water outage.
7. System, subsystem, or equipment failure.
8. Chemical release or spill.

C. Emergency Instructions: Describe and explain warnings, trouble indications, error messages, and similar codes and signals. Include responsibilities of Owner's operating personnel for notification of Installer, supplier, and manufacturer to maintain warranties.

D. Emergency Procedures: Include the following, as applicable:

1. Instructions on stopping.
2. Shutdown instructions for each type of emergency.
3. Operating instructions for conditions outside normal operating limits.
4. Required sequences for electric or electronic systems.
5. Special operating instructions and procedures.

2.4 OPERATION MANUALS

A. Content: In addition to requirements in this Section, include operation data required in individual Specification Sections and the following information:

1. System, subsystem, and equipment descriptions. Use designations for systems and equipment indicated on Contract Documents.
2. Performance and design criteria if Contractor has delegated design responsibility.
3. Operating standards.

4. Operating procedures.
5. Operating logs.
6. Wiring diagrams.
7. Control diagrams.
8. Piped system diagrams.
9. Precautions against improper use.
10. License requirements including inspection and renewal dates.

B. Descriptions: Include the following:

1. Product name and model number. Use designations for products indicated on Contract Documents.
2. Manufacturer's name.
3. Equipment identification with serial number of each component.
4. Equipment function.
5. Operating characteristics.
6. Limiting conditions.
7. Performance curves.
8. Engineering data and tests.
9. Complete nomenclature and number of replacement parts.

C. Operating Procedures: Include the following, as applicable:

1. Startup procedures.
2. Equipment or system break-in procedures.
3. Routine and normal operating instructions.
4. Regulation and control procedures.
5. Instructions on stopping.
6. Normal shutdown instructions.
7. Seasonal and weekend operating instructions.
8. Required sequences for electric or electronic systems.
9. Special operating instructions and procedures.

D. Systems and Equipment Controls: Describe the sequence of operation, and diagram controls as installed.

E. Piped Systems: Diagram piping as installed, and identify color-coding where required for identification.

2.5 PRODUCT MAINTENANCE MANUALS

A. Content: Organize manual into a separate section for each product, material, and finish. Include source information, product information, maintenance procedures, repair materials and sources, and warranties and bonds, as described below.

B. Source Information: List each product included in manual, identified by product name and arranged to match manual's table of contents. For each product, list name, address, and telephone number of Installer or supplier and maintenance service agent, and cross-reference Specification Section number and title in Project Manual and drawing or schedule designation or identifier where applicable.

C. Product Information: Include the following, as applicable:

1. Product name and model number.
2. Manufacturer's name.
3. Color, pattern, and texture.

4. Material and chemical composition.
5. Reordering information for specially manufactured products.

D. Maintenance Procedures: Include manufacturer's written recommendations and the following:

1. Inspection procedures.
2. Types of cleaning agents to be used and methods of cleaning.
3. List of cleaning agents and methods of cleaning detrimental to product.
4. Schedule for routine cleaning and maintenance.
5. Repair instructions.

E. Repair Materials and Sources: Include lists of materials and local sources of materials and related services.

F. Warranties and Bonds: Include copies of warranties and bonds and lists of circumstances and conditions that would affect validity of warranties or bonds.

1. Include procedures to follow and required notifications for warranty claims.

2.6 SYSTEMS AND EQUIPMENT MAINTENANCE MANUALS

A. Content: For each system, subsystem, and piece of equipment not part of a system, include source information, manufacturers' maintenance documentation, maintenance procedures, maintenance and service schedules, spare parts list and source information, maintenance service contracts, and warranty and bond information, as described below.

B. Source Information: List each system, subsystem, and piece of equipment included in manual, identified by product name and arranged to match manual's table of contents. For each product, list name, address, and telephone number of Installer or supplier and maintenance service agent, and cross-reference Specification Section number and title in Project Manual and drawing or schedule designation or identifier where applicable.

C. Manufacturers' Maintenance Documentation: Manufacturers' maintenance documentation including the following information for each component part or piece of equipment:

1. Standard maintenance instructions and bulletins.
2. Drawings, diagrams, and instructions required for maintenance, including disassembly and component removal, replacement, and assembly.
3. Identification and nomenclature of parts and components.
4. List of items recommended to be stocked as spare parts.

D. Maintenance Procedures: Include the following information and items that detail essential maintenance procedures:

1. Test and inspection instructions.
2. Troubleshooting guide.
3. Precautions against improper maintenance.
4. Disassembly; component removal, repair, and replacement; and reassembly instructions.
5. Aligning, adjusting, and checking instructions.
6. Demonstration and training video recording, if available.

E. Maintenance and Service Schedules: Include service and lubrication requirements, list of required lubricants for equipment, and separate schedules for preventive and routine maintenance and service with standard time allotment.

1. Scheduled Maintenance and Service: Tabulate actions for daily, weekly, monthly, quarterly, semiannual, and annual frequencies.
2. Maintenance and Service Record: Include manufacturers' forms for recording maintenance.

F. Spare Parts List and Source Information: Include lists of replacement and repair parts, with parts identified and cross-referenced to manufacturers' maintenance documentation and local sources of maintenance materials and related services.

G. Maintenance Service Contracts: Include copies of maintenance agreements with name and telephone number of service agent.

H. Warranties and Bonds: Include copies of warranties and bonds and lists of circumstances and conditions that would affect validity of warranties or bonds.

1. Include procedures to follow and required notifications for warranty claims.

PART 3 - EXECUTION

3.1 MANUAL PREPARATION

A. Operation and Maintenance Documentation Directory: Prepare a separate manual that provides an organized reference to emergency, operation, and maintenance manuals.

B. Emergency Manual: Assemble a complete set of emergency information indicating procedures for use by emergency personnel and by Owner's operating personnel for types of emergencies indicated.

C. Product Maintenance Manual: Assemble a complete set of maintenance data indicating care and maintenance of each product, material, and finish incorporated into the Work.

D. Operation and Maintenance Manuals: Assemble a complete set of operation and maintenance data indicating operation and maintenance of each system, subsystem, and piece of equipment not part of a system.

1. Engage a factory-authorized service representative to assemble and prepare information for each system, subsystem, and piece of equipment not part of a system.
2. Prepare a separate manual for each system and subsystem, in the form of an instructional manual for use by Owner's operating personnel.

E. Manufacturers' Data: Where manuals contain manufacturers' standard printed data, include only sheets pertinent to product or component installed. Mark each sheet to identify each product or component incorporated into the Work. If data include more than one item in a tabular format, identify each item using appropriate references from the Contract Documents. Identify data applicable to the Work and delete references to information not applicable.

1. Prepare supplementary text if manufacturers' standard printed data are not available and where the information is necessary for proper operation and maintenance of equipment or systems.

F. Drawings: Prepare drawings supplementing manufacturers' printed data to illustrate the relationship of component parts of equipment and systems and to illustrate control sequence and flow diagrams. Coordinate these drawings with information contained in record Drawings to ensure correct illustration of completed installation.

1. Do not use original project record documents as part of operation and maintenance manuals.
2. Comply with requirements of newly prepared record Drawings in Section 017839 "Project Record Documents."

G. Comply with Section 017700 "Closeout Procedures" for schedule for submitting operation and maintenance documentation.

END OF SECTION 017823

SECTION 017839 - PROJECT RECORD DOCUMENTS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section includes administrative and procedural requirements for project record documents, including the following:
   1. Record Drawings.
   2. Record Specifications.
   3. Record Product Data.
   4. Miscellaneous record submittals.

B. Related Requirements:
   1. Section 017300 "Execution" for final property survey.
   2. Section 017700 "Closeout Procedures" for general closeout procedures.
   3. Section 017823 "Operation and Maintenance Data" for operation and maintenance manual requirements.

1.3 CLOSEOUT SUBMITTALS

A. Record Drawings: Comply with the following:
   1. Number of Copies: Submit one set(s) of marked-up record prints.
   2. Number of Copies: Submit copies of record Drawings as follows:
      a. Initial Submittal:
         1) Submit one paper-copy set(s) of marked-up record prints.
         2) Submit PDF electronic files of scanned record prints and one of file prints.
         3) Submit record digital data files and one set(s) of plots.
         4) Architect will indicate whether general scope of changes, additional information recorded, and quality of drafting are acceptable.
      b. Final Submittal:
         1) Submit three paper-copy set(s) of marked-up record prints.
         2) Submit PDF electronic files of scanned record prints and three set(s) of prints.
         3) Print each drawing, whether or not changes and additional information were recorded.
      c. Final Submittal:
         1) Submit one paper-copy set(s) of marked-up record prints.
         2) Submit record digital data files and three set(s) of record digital data file plots.
         3) Plot each drawing file, whether or not changes and additional information were recorded.

B. Record Specifications: Submit one paper copy of Project's Specifications, including addenda and contract modifications.

C. Record Product Data: Submit one paper copy of each submittal.
   1. Where record Product Data are required as part of operation and maintenance manuals, submit duplicate marked-up Product Data as a component of manual.

D. Miscellaneous Record Submittals: See other Specification Sections for miscellaneous record-keeping requirements and submittals in connection with various construction activities. Submit one paper copy of each submittal.

E. Reports: Submit written report weekly indicating items incorporated into project record documents concurrent with progress of the Work, including revisions, concealed conditions, field changes, product selections, and other notations incorporated.

PART 2 - PRODUCTS

2.1 RECORD DRAWINGS

A. Record Prints: Maintain one set of marked-up paper copies of the Contract Drawings and Shop Drawings, incorporating new and revised drawings as modifications are issued.
   1. Preparation: Mark record prints to show the actual installation where installation varies from that shown originally. Require individual or entity who obtained record data, whether individual or entity is Installer, subcontractor, or similar entity, to provide information for preparation of corresponding marked-up record prints.
      a. Give particular attention to information on concealed elements that would be difficult to identify or measure and record later.
      b. Accurately record information in an acceptable drawing technique.
      c. Record data as soon as possible after obtaining it.
      d. Record and check the markup before enclosing concealed installations.
      e. Cross-reference record prints to corresponding archive photographic documentation.
   2. Content: Types of items requiring marking include, but are not limited to, the following:
      a. Dimensional changes to Drawings.
      b. Revisions to details shown on Drawings.
      c. Depths of foundations below first floor.
      d. Locations and depths of underground utilities.
      e. Revisions to routing of piping and conduits.
      f. Revisions to electrical circuitry.
      g. Actual equipment locations.
      h. Duct size and routing.
      i. Locations of concealed internal utilities.
      j. Changes made by Change Order or Construction Change Directive.
      k. Changes made following Architect's written orders.
      l. Details not on the original Contract Drawings.
      m. Field records for variable and concealed conditions.
      n. Record information on the Work that is shown only schematically.
   3. Mark the Contract Drawings and Shop Drawings completely and accurately. Use personnel proficient at recording graphic information in production of marked-up record prints.
   4. Mark record sets with erasable, red-colored pencil. Use other colors to distinguish between changes for different categories of the Work at same location.
   5. Mark important additional information that was either shown schematically or omitted from original Drawings.
   6. Note Construction Change Directive numbers, alternate numbers, Change Order numbers, and similar identification, where applicable.

B. Record Digital Data Files: Immediately before inspection for Certificate of Substantial Completion, review marked-up record prints with Architect and Construction Manager. When authorized, prepare a full set of corrected digital data files of the Contract Drawings, as follows:
   1. Format: Same digital data software program, version, and operating system as the original Contract Drawings.
   2. Format: DWG, Version Microsoft Windows operating system.
   3. Format: Annotated PDF electronic file with comment function enabled.
   4. Incorporate changes and additional information previously marked on record prints. Delete, redraw, and add details and notations where applicable.
   5. Refer instances of uncertainty to Architect through Construction Manager for resolution.
   6. Architect will furnish Contractor one set of digital data files of the Contract Drawings for use in recording information.
      a. See Section 013300 "Submittal Procedures" for requirements related to use of Architect's digital data files.
      b. Architect will provide data file layer information. Record markups in separate layers.

C. Newly Prepared Record Drawings: Prepare new Drawings instead of preparing record Drawings where Architect determines that neither the original Contract Drawings nor Shop Drawings are suitable to show actual installation.
   1. New Drawings may be required when a Change Order is issued as a result of accepting an alternate, substitution, or other modification.
   2. Consult Architect and Construction Manager for proper scale and scope of detailing and notations required to record the actual physical installation and its relation to other construction. Integrate newly prepared record Drawings into record Drawing sets; comply with procedures for formatting, organizing, copying, binding, and submitting.

D. Format: Identify and date each record Drawing; include the designation "PROJECT RECORD DRAWING" in a prominent location.
   1. Record Prints: Organize record prints and newly prepared record Drawings into manageable sets. Bind each set with durable paper cover sheets. Include identification on cover sheets.
   2. Format: Annotated PDF electronic file with comment function enabled.
   3. Record Digital Data Files: Organize digital data information into separate electronic files that correspond to each sheet of the Contract Drawings. Name each file with the sheet identification. Include identification in each digital data file.
   4. Identification: As follows:
      a. Project name.
      b. Date.
      c. Designation "PROJECT RECORD DRAWINGS."
      d. Name of Architect and Construction Manager.
      e. Name of Contractor.

2.2 RECORD SPECIFICATIONS

A. Preparation: Mark Specifications to indicate the actual product installation where installation varies from that indicated in Specifications, addenda, and contract modifications.
   1. Give particular attention to information on concealed products and installations that cannot be readily identified and recorded later.
   2. Mark copy with the proprietary name and model number of products, materials, and equipment furnished, including substitutions and product options selected.
   3. Record the name of manufacturer, supplier, Installer, and other information necessary to provide a record of selections made.
   4. For each principal product, indicate whether record Product Data has been submitted in operation and maintenance manuals instead of submitted as record Product Data.
   5. Note related Change Orders, record Product Data, and record Drawings where applicable.

B. Format: Submit record Specifications as scanned PDF electronic file(s) of marked-up paper copy of Specifications.

2.3 RECORD PRODUCT DATA

A. Preparation: Mark Product Data to indicate the actual product installation where installation varies substantially from that indicated in Product Data submittal.
   1. Give particular attention to information on concealed products and installations that cannot be readily identified and recorded later.
   2. Include significant changes in the product delivered to Project site and changes in manufacturer's written instructions for installation.
   3. Note related Change Orders, record Specifications, and record Drawings where applicable.

B. Format: Submit record Product Data as scanned PDF electronic file(s) of marked-up paper copy of Product Data.
   1. Include record Product Data directory organized by Specification Section number and title, electronically linked to each item of record Product Data.

2.4 MISCELLANEOUS RECORD SUBMITTALS

A. Assemble miscellaneous records required by other Specification Sections for miscellaneous record keeping and submittal in connection with actual performance of the Work. Bind or file miscellaneous records and identify each, ready for continued use and reference.
B. Format: Submit miscellaneous record submittals as scanned PDF electronic file(s) of marked-up miscellaneous record submittals.
   1. Include miscellaneous record submittals directory organized by Specification Section number and title, electronically linked to each item of miscellaneous record submittals.

PART 3 - EXECUTION

3.1 RECORDING AND MAINTENANCE

A. Recording: Maintain one copy of each submittal during the construction period for project record document purposes. Post changes and revisions to project record documents as they occur; do not wait until end of Project.
B. Maintenance of Record Documents and Samples: Store record documents and Samples in the field office apart from the Contract Documents used for construction. Do not use project record documents for construction purposes. Maintain record documents in good order and in a clean, dry, legible condition, protected from deterioration and loss. Provide access to project record documents for Architect's and Construction Manager's reference during normal working hours.

END OF SECTION 017839

SECTION 024119 - SELECTIVE DEMOLITION

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:
   1. Demolition and removal of selected portions of building or structure.
   2. Demolition and removal of selected site elements.
   3. Salvage of existing items to be reused or recycled.

B. Related Requirements:
   1. Section 011000 "Summary" for restrictions on the use of the premises, Owner-occupancy requirements, and phasing requirements.
   2. Section 017300 "Execution" for cutting and patching procedures.

1.3 DEFINITIONS

A. Remove: Detach items from existing construction and legally dispose of them off-site unless indicated to be removed and salvaged or removed and reinstalled.

B. Remove and Salvage: Carefully detach from existing construction, in a manner to prevent damage, and deliver to Owner ready for reuse.

C. Remove and Reinstall: Detach items from existing construction, prepare for reuse, and reinstall where indicated.

D. Existing to Remain: Existing items of construction that are not to be permanently removed and that are not otherwise indicated to be removed, removed and salvaged, or removed and reinstalled.

1.4 MATERIALS OWNERSHIP

A. Unless otherwise indicated, demolition waste becomes property of Contractor.

B. Historic items, relics, antiques, and similar objects including, but not limited to, cornerstones and their contents, commemorative plaques and tablets, and other items of interest or value to Owner that may be uncovered during demolition remain the property of Owner.
   1. Carefully salvage in a manner to prevent damage and promptly return to Owner.

1.5 PREINSTALLATION MEETINGS

A. Predemolition Conference: Conduct conference at Project site.
   1. Inspect and discuss condition of construction to be selectively demolished.
   2. Review structural load limitations of existing structure.
   3. Review and finalize selective demolition schedule and verify availability of materials, demolition personnel, equipment, and facilities needed to make progress and avoid delays.
   4. Review requirements of work performed by other trades that rely on substrates exposed by selective demolition operations.
   5. Review areas where existing construction is to remain and requires protection.

1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For refrigerant recovery technician.

B. Proposed Protection Measures: Submit report, including drawings, that indicates the measures proposed for protecting individuals and property , for environmental protection, for dust control and for noise control. Indicate proposed locations and construction of barriers.
C. Schedule of Selective Demolition Activities: Indicate the following:
   1. Detailed sequence of selective demolition and removal work, with starting and ending dates for each activity. Ensure Owner's building manager's and other tenants' on-site operations are uninterrupted.
   2. Interruption of utility services. Indicate how long utility services will be interrupted.
   3. Coordination for shutoff, capping, and continuation of utility services.
   4. Use of elevator and stairs.
   5. Coordination of Owner's continuing occupancy of portions of existing building and of Owner's partial occupancy of completed Work.
D. Inventory: Submit a list of items to be removed and salvaged and deliver to Owner prior to start of demolition.
E. Predemolition Photographs or Video: Submit before Work begins.
F. Statement of Refrigerant Recovery: Signed by refrigerant recovery technician responsible for recovering refrigerant, stating that all refrigerant that was present was recovered and that recovery was performed according to EPA regulations. Include name and address of technician and date refrigerant was recovered.
G. Warranties: Documentation indicated that existing warranties are still in effect after completion of selective demolition.

1.7 CLOSEOUT SUBMITTALS

A. Inventory: Submit a list of items that have been removed and salvaged.
B. Landfill Records: Indicate receipt and acceptance of hazardous wastes by a landfill facility licensed to accept hazardous wastes.

1.8 QUALITY ASSURANCE

A. Refrigerant Recovery Technician Qualifications: Certified by an EPA-approved certification program.

1.9 FIELD CONDITIONS

A. Owner will occupy portions of building immediately adjacent to selective demolition area. Conduct selective demolition so Owner's operations will not be disrupted.
B. Conditions existing at time of inspection for bidding purpose will be maintained by Owner as far as practical.
   1. Before selective demolition, the Owner will move furniture as necessary to clear the way for the perimeter work zone areas as indicated on drawings.
C. Notify Architect of discrepancies between existing conditions and Drawings before proceeding with selective demolition.
D. Hazardous Materials: It is not expected that hazardous materials will be encountered in the Work.
   1. Hazardous materials will be removed by Owner before start of the Work.
   2. If suspected hazardous materials are encountered, do not disturb; immediately notify Architect and Owner. Hazardous materials will be removed by Owner under a separate contract.
E. Hazardous Materials: Hazardous materials are present in buildings and structures to be selectively demolished. A report on the presence of hazardous materials is on file for review and use. Examine report to become aware of locations where hazardous materials are present.
   1. Hazardous material remediation is specified elsewhere in the Contract Documents.
   2. Do not disturb hazardous materials or items suspected of containing hazardous materials except under procedures specified elsewhere in the Contract Documents.
   3. Owner will provide material safety data sheets for suspected hazardous materials that are known to be present in buildings and structures to be selectively demolished because of building operations or processes performed there.

F. Historic Areas: Demolition and hauling equipment and other materials shall be of sizes that clear surfaces within historic spaces, areas, rooms, and openings, including temporary protection, by 12 inches (300 mm) or more.
G. Storage or sale of removed items or materials on-site is not permitted.
H. Utility Service: Maintain existing utilities indicated to remain in service and protect them against damage during selective demolition operations.
   1. Maintain fire-protection facilities in service during selective demolition operations.

1.10 WARRANTY

A. Existing Warranties: Remove, replace, patch, and repair materials and surfaces cut or damaged during selective demolition, by methods and with materials so as not to void existing warranties. Notify warrantor before proceeding. Existing warranties include the following:
B. Notify warrantor on completion of selective demolition, and obtain documentation verifying that existing system has been inspected and warranty remains in effect. Submit documentation at Project closeout.

PART 2 - PRODUCTS

2.1 PEFORMANCE REQUIREMENTS

A. Regulatory Requirements: Comply with governing EPA notification regulations before beginning selective demolition. Comply with hauling and disposal regulations of authorities having jurisdiction.
B. Standards: Comply with ANSI/ASSE A10.6 and NFPA 241.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verify that utilities have been disconnected and capped before starting selective demolition operations.
B. Review record documents of existing construction provided by Owner. Owner does not guarantee that existing conditions are same as those indicated in record documents.
C. Survey existing conditions and correlate with requirements indicated to determine extent of selective demolition required.
D. When unanticipated mechanical, electrical, or structural elements that conflict with intended function or design are encountered, investigate and measure the nature and extent of conflict. Promptly submit a written report to Architect.
E. Engage a professional engineer to perform an engineering survey of condition of building to determine whether removing any element might result in structural deficiency or unplanned collapse of any portion of structure or adjacent structures during selective building demolition operations.
   1. Perform surveys as the Work progresses to detect hazards resulting from selective demolition activities.
   2. Steel Tendons: Locate tensioned steel tendons and include recommendations for de-tensioning.
F. Survey of Existing Conditions: Record existing conditions by use of measured drawings preconstruction photographs preconstruction videotapes and templates.
   1. Comply with requirements specified in Section 013233 "Photographic Documentation."
   2. Inventory and record the condition of items to be removed and salvaged. Provide photographs or video of conditions that might be misconstrued as damage caused by salvage operations.
   3. Before selective demolition or removal of existing building elements that will be reproduced or duplicated in final Work, make permanent record of measurements, materials, and construction details required to make exact reproduction.

3.2 UTILITY SERVICES AND MECHANICAL/ELECTRICAL SYSTEMS

A. Existing Services/Systems to Remain: Maintain services/systems indicated to remain and protect them against damage.
   1. Comply with requirements for existing services/systems interruptions specified in Section 011000 "Summary."

B. Existing Services/Systems to Be Removed, Relocated, or Abandoned: Locate, identify, disconnect, and seal or cap off indicated utility services and mechanical/electrical systems serving areas to be selectively demolished.
   1. Owner/Building manager will arrange to shut off indicated services/systems when requested by Contractor.
   2. Arrange to shut off indicated utilities with utility companies.
   3. If services/systems are required to be removed, relocated, or abandoned, provide temporary services/systems that bypass area of selective demolition and that maintain continuity of services/systems to other parts of building.
   4. Disconnect, demolish, and remove fire-suppression systems, plumbing, and HVAC systems, equipment, and components indicated to be removed.
      a. Piping to Be Removed: Remove portion of piping indicated to be removed and cap or plug remaining piping with same or compatible piping material.
      b. Piping to Be Abandoned in Place: Drain piping and cap or plug piping with same or compatible piping material.
      c. Equipment to Be Removed: Disconnect and cap services and remove equipment.
      d. Equipment to Be Removed and Reinstalled: Disconnect and cap services and remove, clean, and store equipment; when appropriate, reinstall, reconnect, and make equipment operational.
      e. Equipment to Be Removed and Salvaged: Disconnect and cap services and remove equipment and deliver to Owner.
      f. Ducts to Be Removed: Remove portion of ducts indicated to be removed and plug remaining ducts with same or compatible ductwork material.
      g. Ducts to Be Abandoned in Place: Cap or plug ducts with same or compatible ductwork material.

C. Refrigerant: Remove refrigerant from mechanical equipment to be selectively demolished according to 40 CFR 82 and regulations of authorities having jurisdiction.

3.3 PREPARATION

A. Site Access and Temporary Controls: Conduct selective demolition and debris-removal operations to ensure minimum interference with roads, streets, walks, walkways, and other adjacent occupied and used facilities.
   1. Comply with requirements for access and protection specified in Section 015000 "Temporary Facilities and Controls."

B. Temporary Facilities: Provide temporary barricades and other protection required to prevent injury to people and damage to adjacent buildings and facilities to remain.
   1. Provide protection to ensure safe passage of people around selective demolition area and to and from occupied portions of building.
   2. Provide temporary weather protection, during interval between selective demolition of existing construction on exterior surfaces and new construction, to prevent water leakage and damage to structure and interior areas.
   3. Protect walls, ceilings, floors, and other existing finish work that are to remain or that are exposed during selective demolition operations.
   4. Cover and protect furniture, furnishings, and equipment that have not been removed.
   5. Comply with requirements for temporary enclosures, dust control, heating, and cooling specified in Section 015000 "Temporary Facilities and Controls."

C. Temporary Shoring: Provide and maintain shoring, bracing, and structural supports as required to preserve stability and prevent movement, settlement, or collapse of construction and finishes to remain, and to prevent unexpected or uncontrolled movement or collapse of construction being demolished.
   1. Strengthen or add new supports when required during progress of selective demolition.

3.4 SELECTIVE DEMOLITION, GENERAL

A. General: Demolish and remove existing construction only to the extent required by new construction and as indicated. Use methods required to complete the Work within limitations of governing regulations and as follows:
   1. Neatly cut openings and holes plumb, square, and true to dimensions required. Use cutting methods least likely to damage construction to remain or adjoining construction. Use hand tools or small power tools designed for sawing or grinding, not hammering and chopping, to minimize disturbance of adjacent surfaces. Temporarily cover openings to remain.
   2. Cut or drill from the exposed or finished side into concealed surfaces to avoid marring existing finished surfaces.
   3. Do not use cutting torches until work area is cleared of flammable materials. At concealed spaces, such as duct and pipe interiors, verify condition and contents of hidden space before starting flame-cutting operations. Maintain fire watch and portable fire-suppression devices during flame-cutting operations.
   4. Maintain adequate ventilation when using cutting torches.
   5. Remove decayed, vermin-infested, or otherwise dangerous or unsuitable materials and promptly dispose of off-site.
   6. Remove structural framing members and lower to ground by method suitable to avoid free fall and to prevent ground impact or dust generation.
   7. Locate selective demolition equipment and remove debris and materials so as not to impose excessive loads on supporting walls, floors, or framing.
   8. Dispose of demolished items and materials promptly. Comply with requirements in Section 017419 "Construction Waste Management and Disposal."

B. Work in Historic Areas: Selective demolition may be performed only in areas of the Project that are not designated as historic. In historic spaces, areas, and rooms or on historic surfaces, the terms "demolish" or "remove" shall mean historic "removal" or "dismantling" as specified in Section 013591 "Historic Treatment Procedures."

C. Existing Items to Remain: Protect construction indicated to remain against damage and soiling during selective demolition. When permitted by Architect, items may be removed to a suitable, protected storage location during selective demolition and cleaned and reinstalled in their original locations after selective demolition operations are complete.

3.5 SELECTIVE DEMOLITION PROCEDURES FOR SPECIFIC MATERIALS

A. Concrete: Demolish in small sections. Using power-driven saw, cut concrete to a depth of at least 3/4 inch (19 mm) at junctures with construction to remain. Dislodge concrete from reinforcement at perimeter of areas being demolished, cut reinforcement, and then remove remainder of concrete. Neatly trim openings to dimensions indicated.

B. Concrete: Demolish in sections. Cut concrete full depth at junctures with construction to remain and at regular intervals using power-driven saw, then remove concrete between saw cuts.

C. Masonry: Demolish in small sections. Cut masonry at junctures with construction to remain, using power-driven saw, then remove masonry between saw cuts.

3.6 DISPOSAL OF DEMOLISHED MATERIALS

A. General: Except for items or materials indicated to be recycled, reused, salvaged, reinstalled, or otherwise indicated to remain Owner's property, remove demolished materials from Project site and legally dispose of them in an EPA-approved landfill.
   1. Do not allow demolished materials to accumulate on-site.

2. Remove and transport debris in a manner that will prevent spillage on adjacent surfaces and areas.
3. Remove debris from elevated portions of building by chute, hoist, or other device that will convey debris to grade level in a controlled descent.
4. Comply with requirements specified in Section 017419 "Construction Waste Management and Disposal."

B. Burning: Do not burn demolished materials.

C. Burning: Burning of demolished materials will be permitted only at designated areas on Owner's property, provided required permits are obtained. Provide full-time monitoring for burning materials until fires are extinguished.

D. Disposal: Transport demolished materials and dispose of at designated spoil areas on Owner's property.

E. Disposal: Transport demolished materials off Owner's property and legally dispose of them.

3.7 CLEANING

A. Clean adjacent structures and improvements of dust, dirt, and debris caused by selective demolition operations. Return adjacent areas to condition existing before selective demolition operations began.

END OF SECTION 024119

SECTION 040120 - MAINTENANCE OF UNIT MASONRY

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section includes maintenance of unit masonry consisting of brick clay masonry restoration and cleaning as follows:
   1. Repairing unit masonry, including replacing units.
   2. Painting steel uncovered during the work.
   3. Reanchoring veneers.
   4. Repointing joints.
   5. Cleaning exposed unit masonry surfaces.

B. Related Sections:
   1. Section 076200 "Sheet Metal Flashing and Trim" for metal flashing installed in or on restored clay masonry.
   2. Section 099600 "High-Performance Coatings" for coating the existing steel window lintels and shelf angles.

1.3 ALLOWANCES

A. Allowances for clay masonry restoration and cleaning are specified in Section 012100 "Allowances."
   1. Perform clay masonry restoration and cleaning work under quantity allowances indicated by "General Notes" on the drawings and only as authorized. Authorized work includes work required by Drawings and the Specifications and only work authorized in writing by Architect.
   2. Notify Architect weekly of extent of work performed that is attributable to quantity allowances.
   3. Perform work that exceeds quantity allowances only as authorized by provided Unit Prices and Change Orders.

1.4 UNIT PRICES

A. Work of this Section is affected by unit prices specified in Section 012200 "Unit Prices."
   1. Unit prices apply to authorized work covered by quantity allowances.
   2. Unit prices apply to additions to and deletions from Work as authorized by Change Orders.

1.5 DEFINITIONS

A. Very Low-Pressure Spray: Under 100 psi (690 kPa).
B. Low-Pressure Spray: 100 to 400 psi (690 to 2750 kPa); 4 to 6 gpm (0.25 to 0.4 L/s).
C. Medium-Pressure Spray: 400 to 800 psi (2750 to 5510 kPa); 4 to 6 gpm (0.25 to 0.4 L/s).
D. High-Pressure Spray: 800 to 1200 psi (5510 to 8250 kPa); 4 to 6 gpm (0.25 to 0.4 L/s).
E. Saturation Coefficient: Ratio of the weight of water absorbed during immersion in cold water to weight absorbed during immersion in boiling water; used as an indication of resistance of masonry units to freezing and thawing.

1.6 PRECONSTRUCTION TESTING

A. Preconstruction Testing Service: Owner will engage a qualified testing agency to perform preconstruction testing on masonry units as follows.

1. Provide test specimens as indicated and representative of proposed materials and construction.
2. Existing Brick: Test each type of existing masonry unit indicated for replacement, according to testing methods in ASTM C 67 for compressive strength, 24-hour cold-water absorption, 5-hour boil absorption, saturation coefficient, and initial rate of absorption (suction). Carefully remove five existing units from locations designated by Architect. Take testing samples from these units.
3. Existing Mortar: Test according to ASTM C 295, modified as agreed by testing service and Architect for Project requirements, to determine proportional composition of original ingredients, sizes and colors of aggregates, and approximate strength. Use X-ray diffraction, infrared spectroscopy, and differential thermal analysis as necessary to supplement microscopical methods. Carefully remove existing mortar from within joints at five locations designated by Architect or testing service.
4. Temporary Patch: As directed by Architect, provide temporary materials at locations from which existing samples were taken.
5. Replacement Brick Test each proposed type of replacement masonry unit, according to sampling and testing methods in ASTM C 67 for compressive strength, 24-hour cold-water absorption, 5-hour boil absorption, saturation coefficient, and initial rate of absorption (suction).

1.7 ACTION SUBMITTALS

A. Product Data: For each type of product indicated. Include recommendations for application and use. Include test data substantiating that products comply with requirements.

B. Shop Drawings: For the following:
   1. Full-size patterns with complete dimensions for new specially molded brick shapes and their jointing, showing relation of existing to new units.
   2. Provisions for expansion joints or other sealant joints.
   3. Provisions for flashing, lighting fixtures, conduits, and weep holes as required.
   4. Replacement and repair anchors. Include details of anchors within individual masonry units, with locations of anchors and dimensions of holes and recesses in units required for anchors.

C. Samples for Initial Selection: For the following:
   1. Pointing Mortar: Install sets of mortar for pointing in the form of in wall mockups.
      a. Have each set contain a close color range of at least three Samples of different mixes of colored sands and cements that produce a mortar matching the cleaned masonry when cured and dry.
      b. Install with precise measurements on ingredients, proportions, gradations, and sources of colored sands from which each Sample was made.
   2. Sealant Materials: See Section 079200 "Joint Sealants."
   3. Include similar Samples of accessories involving color selection.

D. Samples for Verification: For the following:
   1. Each type of masonry unit to be used for replacing existing units. Install in wall mockups as necessary to show the full range of shape, color, and texture to be expected.
      a. For each brick type, provide mockup containing at least fourteen bricks.
   2. Each type of sand used for pointing mortar; minimum 1 lb (0.5 kg) of each in plastic screw-top jars.
      a. For blended sands, provide Samples of each component and blend.
      b. Identify sources, both supplier and quarry, of each type of sand.
   3. Each type, color, and texture of pointing mortar in the form of in wall mockups.
      a. Include with each Sample a list of ingredients with proportions of each. Identify sources, both supplier and quarry, of each type of sand and brand names of cementitious materials and pigments if any.
   4. Sealant Materials: See Section 079200 "Joint Sealants."
   5. Accessories: Each type of anchor, accessory, and miscellaneous support.

1.8 INFORMATIONAL SUBMITTALS

A. Qualification Data: For restoration specialists including field supervisors and restoration workers and chemical-cleaner manufacturer.

B. Preconstruction Test Reports: For existing and replacement masonry units.

C. Quality-Control Program.

D. Restoration Program.
E. Cleaning Program.

1.9 QUALITY ASSURANCE

A. Restoration Specialist Qualifications: Engage an experienced masonry restoration and cleaning firm to perform work of this Section. Firm shall have completed work similar in material, design, and extent to that indicated for this Project with a record of successful in-service performance. Experience installing standard unit masonry is not sufficient experience for masonry restoration work.
   1. At Contractor's option, work may be divided between two specialist firms: one for cleaning work and one for repair work.
   2. Field Supervision: Restoration specialist firms shall maintain experienced full-time supervisors on Project site during times that clay masonry restoration and cleaning work is in progress. Supervisors shall not be changed during Project except for causes beyond the control of restoration specialist firm.
   3. Restoration Worker Qualifications: Persons who are experienced and specialize in restoration work of types they will be performing.
B. Chemical-Cleaner Manufacturer Qualifications: A firm regularly engaged in producing masonry cleaners that have been used for similar applications with successful results, and with factory-trained representatives who are available for consultation and Project-site inspection and assistance at no additional cost.
C. Source Limitations: Obtain each type of material for masonry restoration (face brick, cement, sand, etc.) from one source with resources to provide materials of consistent quality in appearance and physical properties.
D. Quality-Control Program: Prepare a written quality-control program for this Project to systematically demonstrate the ability of personnel to properly follow methods and use materials and tools without damaging masonry. Include provisions for supervising performance and preventing damage due to worker fatigue.
E. Restoration Program: Prepare a written, detailed description of materials, methods, equipment, and sequence of operations to be used for each phase of restoration work including protection of surrounding materials and Project site.
   1. Include methods for keeping pointing mortar damp during curing period.
   2. If materials and methods other than those indicated are proposed for any phase of restoration work, add to the Quality-Control Program a written description of such materials and methods, including evidence of successful use on comparable projects, and demonstrations to show their effectiveness for this Project and worker's ability to use such materials and methods properly.
F. Cleaning Program: Prepare a written cleaning program that describes cleaning process in detail, including materials, methods, and equipment to be used, protection of surrounding materials, and control of runoff during operations.
   1. If materials and methods other than those indicated are proposed for any phase of restoration work, add to the Quality-Control Program a written description of such materials and methods, including evidence of successful use on comparable projects, and demonstrations to show their effectiveness for this Project and worker's ability to use such materials and methods properly.
G. Cleaning and Repair Appearance Standard: Cleaned and repaired surfaces are to have a uniform appearance as viewed from 20 feet (6 m) away by Architect. Perform additional paint and stain removal, general cleaning, and spot cleaning of small areas that are noticeably different, so that surface blends smoothly into surrounding areas.
H. Mockups: Prepare mockups of restoration and cleaning to demonstrate aesthetic effects and set quality standards for materials and execution and for fabrication and installation.
   1. Masonry Repair: Prepare sample areas for each type of masonry material indicated to have repair work performed. If not otherwise indicated, size each mockup not smaller than 2 adjacent whole units or approximately 48 inches (1200 mm) in least dimension. Erect sample areas in existing walls unless otherwise indicated, to demonstrate quality of materials, workmanship, and blending with existing work. Include the following as a minimum:
      a. Replacement:
         1) Fourteen brick units replaced.
      b. Reanchoring Veneers: Install three masonry repair anchors in mockup wall assembly of each anchor type required.

2. Repointing: Rake out joints in 2 separate areas, each approximately 36 inches (900 mm) high by 48 inches (1200 mm) wide for each type of repointing required and repoint one of the areas.
3. Cleaning: Clean an area approximately 25 sq. ft. (2.3 sq. m) for each type of masonry and surface condition.
   a. Test cleaners and methods on samples of adjacent materials for possible adverse reactions. Do not use cleaners and methods known to have deleterious effect.
   b. Allow a waiting period of not less than seven days after completion of sample cleaning to permit a study of sample panels for negative reactions.
4. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
5. Approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

I. Preinstallation Conference: Conduct conference at Project site.
1. Review methods and procedures related to masonry restoration and cleaning including, but not limited to, the following:
   a. Construction schedule. Verify availability of materials, Restoration Specialist's personnel, equipment, and facilities needed to make progress and avoid delays.
   b. Materials, material application, sequencing, tolerances, and required clearances.

1.10 DELIVERY, STORAGE, AND HANDLING

A. Deliver masonry units to Project site strapped together in suitable packs or pallets or in heavy-duty cartons.
B. Deliver other materials to Project site in manufacturer's original and unopened containers, labeled with manufacturer's name and type of products.
C. Store cementitious materials on elevated platforms, under cover, and in a dry location. Do not use cementitious materials that have become damp.
D. Store hydrated lime in manufacturer's original and unopened containers. Discard lime if containers have been damaged or have been opened for more than two days.
E. Store lime putty covered with water in sealed containers.
F. Store sand where grading and other required characteristics can be maintained and contamination avoided.

1.11 PROJECT CONDITIONS

A. Weather Limitations: Proceed with installation only when existing and forecasted weather conditions permit masonry restoration and cleaning work to be performed according to manufacturers' written instructions and specified requirements.
B. Repair masonry units and repoint mortar joints only when air temperature is between 40 and 90 deg F (4 and 32 deg C) and is predicted to remain so for at least 7 days after completion of the Work unless otherwise indicated.
C. Cold-Weather Requirements: Comply with the following procedures for masonry repair and mortar-joint pointing unless otherwise indicated:
1. When air temperature is below 40 deg F (4 deg C), heat mortar ingredients, masonry repair materials, and existing masonry walls to produce temperatures between 40 and 120 deg F (4 and 49 deg C).
2. When mean daily air temperature is below 40 deg F (4 deg C), provide enclosure and heat to maintain temperatures above 32 deg F (0 deg C) within the enclosure for 7 days after repair and pointing.
D. Hot-Weather Requirements: Protect masonry repair and mortar-joint pointing when temperature and humidity conditions produce excessive evaporation of water from mortar and repair materials. Provide artificial shade and wind breaks and use cooled materials as required to minimize evaporation. Do not apply mortar to substrates with temperatures of 90 deg F (32 deg C) and above unless otherwise indicated.
E. For manufactured repair materials, perform work within the environmental limits set by each manufacturer.
F. Clean masonry surfaces only when air temperature is 40 deg F (4 deg C) and above and is predicted to remain so for at least 7 days after completion of cleaning.

1.12 COORDINATION

A. Coordinate masonry restoration and cleaning with public circulation patterns at Project site. Some work is near public circulation patterns. Public circulation patterns cannot be closed off entirely, and in places can be only temporarily redirected around small areas of work. Plan and execute the Work accordingly.

1.13 SEQUENCING AND SCHEDULING

A. Order replacement materials at earliest possible date to avoid delaying completion of the Work.
B. Order sand and gray portland cement for pointing mortar immediately after approval of Samples and mockups. Take delivery of and store at Project site a sufficient quantity to complete Project.
C. Perform masonry restoration work in the following sequence:
   1. Inspect for open mortar joints and repair before cleaning to prevent the intrusion of water and other cleaning materials into the wall.
   2. Where water repellents, specified in Section 071900 "Water Repellents," are to be used on or near masonry work, delay application of these chemicals until after pointing.
   3. Rake out mortar from joints surrounding masonry to be replaced and from joints adjacent to masonry repairs along joints.
   4. Repair masonry, including replacing existing masonry with new masonry materials.
   5. Rake out mortar from joints to be repointed.
   6. Point mortar and sealant joints.
   7. After repairs and repointing have been completed and cured, perform a final cleaning to remove residues from this work.
   8. Inspect for open mortar joints and repair before cleaning to prevent the intrusion of water and other cleaning materials into the wall.
D. As scaffolding is removed, patch anchor holes used to attach scaffolding. Patch holes in mortar joints to comply with "Repointing Masonry" Article.

PART 2 - PRODUCTS

2.1 MASONRY MATERIALS

A. Face Brick: Provide face brick, including specially molded, ground, cut, or sawed shapes where required to complete masonry restoration work.
   1. Provide units with colors, color variation within units, surface texture, and physical properties to match Architect's sample. Match existing units in size and shape.
      a. Basis of selected brick:
         1) Manufacturer – Belden.
         2) Color – Graystone or Sea Gray, mockup of each will be required for review.
         3) Size – Norman.
         4) Texture – Smooth.
         5) ASTM-C216 Grade SW Type FBX.
      b. Physical Properties per ASTM C 67:
         1) Compressive Strength: 15,358 PSI.
         2) 24-Hour Cold-Water Submersion Absorption: 2.97%.
         3) 5-Hour Boil Absorption: 3.92%.
         4) Saturation Coefficient: 0.76.
         5) Initial Rate of Absorption: 3.5.
      c. For Architect's sample that exhibits a range of colors or color variation within units, provide brick that proportionally matches that range rather than brick that matches an individual color within that range.
   2. Special Shapes:
      a. Provide specially molded, 100 percent solid shapes for applications where core holes or "frogs" could be exposed to view or weather when in final position and where shapes produced by sawing would result in sawed surfaces being exposed to view.

b. Provide specially ground units, shaped to match patterns, for arches and where indicated.
c. Mechanical chopping or breaking brick, or bonding pieces of brick together by adhesive, are not acceptable procedures for fabricating special shapes.

3. Tolerances as Fabricated: Comply with tolerance requirements in ASTM C 216, Type FBX.
4. Date Identification: Emboss in the clay body on an interior surface of each unit in easily read 1/2-inch-(13-mm-) high characters, "MADE **<Insert year>**." Manufacturer's name may also be embossed.

2.2 MORTAR MATERIALS

A. Portland Cement: ASTM C 150, Type I or Type II, white or gray or both where required for color matching of exposed mortar.
1. Provide cement containing not more than 0.60 percent total alkali when tested according to ASTM C 114.

B. Hydrated Lime: ASTM C 207, Type S.
C. Factory-Prepared Lime Putty: ASTM C 1489.
D. Quicklime: ASTM C 5, pulverized lime.
E. Mortar Sand: ASTM C 144 unless otherwise indicated.
1. Color: Provide natural sand or ground marble, granite, or other sound stone of color necessary to produce required mortar color.
2. For pointing mortar, provide sand with rounded edges.
3. Match size, texture, and gradation of existing mortar sand as closely as possible. Blend several sands if necessary to achieve suitable match.

F. Mortar Pigments: Natural and synthetic iron oxides, compounded for mortar mixes. Use only pigments with a record of satisfactory performance in masonry mortars.
G. Water: Potable.

2.3 CLEANING MATERIALS

A. Water: Potable.
B. Hot Water: Water heated to a temperature of 140 to 160 deg F (60 to 71 deg C).
C. Job-Mixed Detergent Solution: Solution prepared by mixing 2 cups (0.5 L) of tetrasodium polyphosphate, 1/2 cup (125 mL) of laundry detergent, and 20 quarts (20 L) of hot water for every 5 gal. (20 L) of solution required.
D. Job-Mixed Mold, Mildew, and Algae Remover: Solution prepared by mixing 2 cups (0.5 L) of tetrasodium polyphosphate, 5 quarts (5 L) of 5 percent sodium hypochlorite (bleach), and 15 quarts (15 L) of hot water for every 5 gal. (20 L) of solution required.
E. Nonacidic Liquid Cleaner: Manufacturer's standard mildly alkaline liquid cleaner formulated for removing mold, mildew, and other organic soiling from ordinary building materials, including polished stone, brick, aluminum, plastics, and wood.
1. Products: Subject to compliance with requirements, provide the following:
a. Diedrich Technologies Inc.; Diedrich 910PM Polished Marble Cleaner.
b. Dominion Restoration Products, Inc.; Bio-Cleanse.
c. Dumond Chemicals, Inc.; Safe n' Easy Architectural Cleaner/Restorer.
d. Price Research, Ltd.; Price Non-Acid Masonry Cleaner.
e. PROSOCO; Enviro Klean 2010 All Surface Cleaner.

F. Mild Acidic Cleaner: Manufacturer's standard mildly acidic cleaner containing no muriatic (hydrochloric), hydrofluoric, or sulfuric acid; or ammonium bifluoride or chlorine bleaches.
1. Products: Subject to compliance with requirements, provide the following:
a. ABR Products, Inc.; X-190 Limestone & Concrete Cleaner.
b. Diedrich Technologies Inc.; Envirorestore 100.
c. Dominion Restoration Products, Inc.; DR-60 Stone and Masonry Cleaner.
d. PROSOCO; Enviro Klean BioWash.

2.4 ACCESSORY MATERIALS

A. Masonry restoration wall tie, Expansion Type: Mechanical fasteners designed for masonry veneer stabilization consisting of 1/4-inch- (6-mm-) diameter, Type 304 stainless-steel rod with brass expanding shells at each end and water-shedding washer in the middle. Expanding shells shall be designed to provide positive mechanical anchorage to veneer on one end and backup metal stud framing on the other.
   1. Products: Subject to compliance with requirements, provide the following:
      a. BLOK-LOK Limited; Torq-Lok.
      b. Dur-O-Wal, a division of Dayton Superior; Dur-O-Wal Repair Anchor.
      c. Hohmann & Barnard, Inc.; #521RA-B Restoration Anchor.

B. Masonry Wall Tie:
   1. Products: Subject to compliance with requirements, provide the following:
      a. Hohmann & Barnard, Inc.; #BL-407 Anchor, Stainless Steel.

C. Weep Hole Vents:
   1. Products: Subject to compliance with requirements, provide the following:
      a. Hohmann & Barnard, Inc.; QV Quadro-Vent™, color selection by Architect from standard color selections.

D. Sealant Materials:
   1. Provide manufacturer's standard chemically curing, elastomeric sealant(s) of base polymer and characteristics indicated below that comply with applicable requirements in Section 079200 "Joint Sealants."
   2. Colors: Colors of exposed sealants to be selected by Owner and Architect from in wall mockup samples.

E. Joint-Sealant Backing:
   1. Cylindrical Sealant Backings: ASTM C 1330, Type C (closed-cell material with a surface skin), and of size and density to control sealant depth and otherwise contribute to producing optimum sealant performance.
   2. Bond-Breaker Tape: Polyethylene tape or other plastic tape recommended by sealant manufacturer for preventing sealant from adhering to rigid, inflexible joint-filler materials or joint surfaces at back of joint where such adhesion would result in sealant failure. Provide self-adhesive tape where acceptable.

F. Setting Buttons: Resilient plastic buttons, nonstaining to masonry, sized to suit joint thicknesses and bed depths of masonry units without intruding into required depths of pointing materials.

G. Masking Tape: Nonstaining, nonabsorbent material, compatible with pointing mortar, joint primers, sealants, and surfaces adjacent to joints; that will easily come off entirely, including adhesive.

H. Miscellaneous Products: Select materials and methods of use based on the following, subject to approval of a mockup:
   1. Previous effectiveness in performing the work involved.
   2. Little possibility of damaging exposed surfaces.
   3. Consistency of each application.
   4. Uniformity of the resulting overall appearance.
   5. Do not use products or tools that could do the following:
      a. Remove, alter, or in any way harm the present condition or future preservation of existing surfaces, including surrounding surfaces not in contract.
      b. Leave a residue on surfaces.

2.5 MORTAR MIXES

A. Preparing Lime Putty: Slake quicklime and prepare lime putty according to appendix to ASTM C 5 and manufacturer's written instructions.

B. Measurement and Mixing: Measure cementitious materials and sand in a dry condition by volume or equivalent weight. Do not measure by shovel; use known measure. Mix materials in a clean, mechanical batch mixer.
   1. Mixing Pointing Mortar: Thoroughly mix cementitious materials and sand together before adding any water. Then mix again adding only enough water to produce a damp, unworkable mix that will retain its form when pressed into a ball. Maintain mortar in this dampened condition for 15 to 30 minutes.

Add remaining water in small portions until mortar reaches desired consistency. Use mortar within one hour of final mixing; do not retemper or use partially hardened material.

C. Do not use admixtures in mortar unless otherwise indicated.

D. Mortar Proportions: Mix mortar materials in the following proportions:
   1. Pointing Mortar for Brick: 1 part portland cement, 2 parts lime, and 6 parts sand.
   2. Rebuilding (Setting) Mortar: Same as pointing mortar.
   3. Rebuilding (Setting) Mortar: Comply with ASTM C 270, Proportion Specification, Type N unless otherwise indicated; with cementitious material limited to portland cement and lime.

2.6 CHEMICAL CLEANING SOLUTIONS

A. Dilute chemical cleaners with water to produce solutions not exceeding concentration recommended by chemical-cleaner manufacturer.

B. Acidic Cleaner Solution for Brick: Dilute with water to produce hydrofluoric acid content of 3 percent or less, but not greater than that recommended by chemical-cleaner manufacturer.

PART 3 - EXECUTION

3.1 PROTECTION

A. Protect persons, motor vehicles, surrounding surfaces of building being restored, building site, plants, and surrounding buildings from harm resulting from masonry restoration work.
   1. Erect temporary protective covers over walkways and at points of pedestrian and vehicular entrance and exit that must remain in service during course of restoration and cleaning work.

B. Comply with chemical-cleaner manufacturer's written instructions for protecting building and other surfaces against damage from exposure to its products. Prevent chemical-cleaning solutions from coming into contact with people, motor vehicles, landscaping, buildings, and other surfaces that could be harmed by such contact.
   1. Cover adjacent surfaces with materials that are proven to resist chemical cleaners used unless chemical cleaners being used will not damage adjacent surfaces. Use materials that contain only waterproof, UV-resistant adhesives. Apply masking agents to comply with manufacturer's written instructions. Do not apply liquid masking agent to painted or porous surfaces. When no longer needed, promptly remove masking to prevent adhesive staining.
   2. Keep wall wet below area being cleaned to prevent streaking from runoff.
   3. Do not clean masonry during winds of sufficient force to spread cleaning solutions to unprotected surfaces.
   4. Neutralize and collect alkaline and acid wastes for disposal off Owner's property.
   5. Dispose of runoff from cleaning operations by legal means and in a manner that prevents soil erosion, undermining of paving and foundations, damage to landscaping, and water penetration into building interiors.

C. Prevent mortar from staining face of surrounding masonry and other surfaces.
   1. Cover sills, ledges, and projections to protect from mortar droppings.
   2. Keep wall area wet below rebuilding and pointing work to discourage mortar from adhering.
   3. Immediately remove mortar in contact with exposed masonry and other surfaces.
   4. Clean mortar splatters from scaffolding at end of each day.

3.2 BRICK REMOVAL AND REPLACEMENT

A. At locations indicated, remove bricks that are damaged, spalled, or deteriorated or are to be reused. Carefully demolish or remove entire units from joint to joint, without damaging surrounding masonry, in a manner that permits replacement with full-size units.
   1. When removing single bricks, remove material from center of brick and work toward outside edges.

B. Support and protect remaining masonry that surrounds removal area. Maintain flashing, reinforcement, lintels, and adjoining construction in an undamaged condition.

C. Notify Architect of unforeseen detrimental conditions including voids, cracks, bulges, and loose units in existing masonry backup, rotted wood, rusted metal, and other deteriorated items.

D. Clean bricks surrounding removal areas by removing mortar, dust, and loose particles in preparation for replacement.

E. Replace removed damaged brick with other removed brick and salvaged brick in good quality, where possible, or with new brick matching existing brick, including size. Do not use broken units unless they can be cut to usable size.

F. Install replacement brick into bonding and coursing pattern of existing brick. If cutting is required, use a motor-driven saw designed to cut masonry with clean, sharp, unchipped edges.
   1. Maintain joint width for replacement units to match existing joints.
   2. Use setting buttons or shims to set units accurately spaced with uniform joints.

G. Lay replacement brick with completely filled bed, head, and collar joints. Butter ends with sufficient mortar to fill head joints and shove into place. Wet both replacement and surrounding bricks that have ASTM C 67 initial rates of absorption (suction) of more than 30 g/30 sq. in. per min. (30 g/194 sq. cm per min.). Use wetting methods that ensure that units are nearly saturated but surface is dry when laid.
   1. Tool exposed mortar joints in repaired areas to match joints of surrounding existing brickwork.
   2. Rake out mortar used for laying brick before mortar sets and point new mortar joints in repaired area to comply with requirements for repointing existing masonry, and at same time as repointing of surrounding area.
   3. When mortar is sufficiently hard to support units, remove shims and other devices interfering with pointing of joints.

3.3 REANCHORING VENEERS

A. Install masonry repair anchors in horizontal mortar joints and according to manufacturer's written instructions. Install at not more than 16 inches (400 mm) o.c. vertically and 32 inches (800 mm) o.c. horizontally unless otherwise indicated. Install at locations to avoid penetrating flashing.

B. Recess anchors at least 5/8 inch (16 mm) from surface of mortar joint and fill recess with pointing mortar.

3.4 PAINTING STEEL UNCOVERED DURING THE WORK

A. Inspect steel exposed during masonry removal. Where Architect determines that it is structural, or for other reasons cannot be totally removed, prepare and paint it as follows:
   1. Remove paint, rust, and other contaminants according to SSPC-SP 2, "Hand Tool Cleaning", as applicable to meet paint manufacturer's recommended preparation.
   2. Immediately paint exposed steel with two coats of antirust coating, following coating manufacturer's written instructions and without exceeding manufacturer's recommended rate of application (dry film thickness per coat).

B. If on inspection and rust removal, the cross section of a steel member is found to be reduced from rust by more than 1/16 inch (1.6 mm), notify Architect before proceeding.

3.5 CLEANING MASONRY, GENERAL

A. Proceed with cleaning in an orderly manner; work from top to bottom of each scaffold width and from one end of each elevation to the other. Ensure that dirty residues and rinse water will not wash over cleaned, dry surfaces.

B. Use only those cleaning methods indicated for each masonry material and location.
   1. Do not use wire brushes or brushes that are not resistant to chemical cleaner being used. Do not use plastic-bristle brushes if natural-fiber brushes will resist chemical cleaner being used.
   2. Use spray equipment that provides controlled application at volume and pressure indicated, measured at spray tip. Adjust pressure and volume to ensure that cleaning methods do not damage masonry.
      a. Equip units with pressure gages.
   3. For chemical-cleaner spray application, use low-pressure tank or chemical pump suitable for chemical cleaner indicated, equipped with cone-shaped spray tip.
   4. For water-spray application, use fan-shaped spray tip that disperses water at an angle of 25 to 50 degrees.

5. For high-pressure water-spray application, use fan-shaped spray tip that disperses water at an angle of at least 40 degrees.
6. For heated water-spray application, use equipment capable of maintaining temperature between 140 and 160 deg F (60 and 71 deg C) at flow rates indicated.
7. For steam application, use steam generator capable of delivering live steam at nozzle.

C. Perform each cleaning method indicated in a manner that results in uniform coverage of all surfaces, including corners, moldings, and interstices, and that produces an even effect without streaking or damaging masonry surfaces.

D. Chemical-Cleaner Application Methods: Apply chemical cleaners to masonry surfaces to comply with chemical-cleaner manufacturer's written instructions; use brush or spray application. Do not spray apply at pressures exceeding 50 psi (345 kPa). Do not allow chemicals to remain on surface for periods longer than those indicated or recommended by manufacturer.

E. Rinse off chemical residue and soil by working upward from bottom to top of each treated area at each stage or scaffold setting. Periodically during each rinse, test pH of rinse water running off of cleaned area to determine that chemical cleaner is completely removed.
1. Apply neutralizing agent and repeat rinse if necessary to produce tested pH of between 6.7 and 7.5.

F. After cleaning is complete, remove protection no longer required. Remove tape and adhesive marks.

3.6 CLEANING BRICKWORK

A. Detergent Cleaning:
1. Wet masonry with cold water applied by low-pressure spray.
2. Scrub masonry with detergent solution using medium-soft brushes until soil is thoroughly dislodged and can be removed by rinsing. Use small brushes to remove soil from mortar joints and crevices. Dip brush in solution often to ensure that adequate fresh detergent is used and that masonry surface remains wet.
3. Rinse with cold water applied by low-pressure spray to remove detergent solution and soil.
4. Repeat cleaning procedure above where required to produce cleaning effect established by mockup.

B. Nonacidic Liquid Chemical Cleaning:
1. Wet masonry with cold water applied by low-pressure spray.
2. Apply cleaner to masonry by brush. Let cleaner remain on surface for period indicated below:
   a. As recommended by chemical-cleaner manufacturer.
   b. As established by mockup.
   c. Two to three minutes.
3. Rinse with cold water applied by low-pressure spray to remove chemicals and soil.
4. Repeat cleaning procedure above where required to produce cleaning effect established by mockup. Do not repeat more than once. If additional cleaning is required, use steam cleaning.

C. Mild Acidic Chemical Cleaning:
1. Wet masonry with cold water applied by low-pressure spray.
2. Apply cleaner to masonry by brush. Let cleaner remain on surface for period indicated below:
   a. As recommended by chemical-cleaner manufacturer.
   b. As established by mockup.
   c. Two to three minutes.
3. Rinse with cold water applied by low-pressure spray to remove chemicals and soil.
4. Repeat cleaning procedure above where required to produce cleaning effect established by mockup. Do not repeat more than once. If additional cleaning is required, use a steam cleaning.

3.7 REPOINTING MASONRY

A. Rake out and repoint joints to the following extent:
1. All joints in areas indicated.

B. Do not rake out and repoint joints where not required.

C. Rake out joints as follows, according to procedures demonstrated in approved mockup:
1. Remove mortar from joints to depth of 1-inch or not less than that required to expose sound, unweathered mortar.

2. Remove mortar from masonry surfaces within raked-out joints to provide reveals with square backs and to expose masonry for contact with pointing mortar. Brush, vacuum, or flush joints to remove dirt and loose debris.
3. Do not spall edges of masonry units or widen joints. Replace or patch damaged masonry units as directed by Architect.
    a. Cut out mortar by hand with chisel and resilient mallet. Do not use power-operated grinders without Architect's written approval based on approved quality-control program.
    b. Cut out center of mortar bed joints using angle grinders with diamond-impregnated metal blades. Remove remaining mortar by hand with chisel and resilient mallet. Strictly adhere to approved quality-control program.

D. Notify Architect of unforeseen detrimental conditions including voids in mortar joints, cracks, loose masonry units, rotted wood, rusted metal, and other deteriorated items.

E. Pointing with Mortar:
1. Rinse joint surfaces with water to remove dust and mortar particles. Time rinsing application so, at time of pointing, joint surfaces are damp but free of standing water. If rinse water dries, dampen joint surfaces before pointing.
2. Apply pointing mortar first to areas where existing mortar was removed to depths greater than surrounding areas. Apply in layers not greater than 3/8 inch (9 mm) until a uniform depth is formed. Fully compact each layer thoroughly and allow it to become thumbprint hard before applying next layer.
3. After low areas have been filled to same depth as remaining joints, point all joints by placing mortar in layers not greater than 3/8 inch (9 mm). Fully compact each layer and allow to become thumbprint hard before applying next layer. Where existing masonry units have worn or rounded edges, slightly recess finished mortar surface below face of masonry to avoid widened joint faces. Take care not to spread mortar beyond joint edges onto exposed masonry surfaces or to featheredge the mortar.
4. When mortar is thumbprint hard, tool joints to match original appearance of joints as demonstrated in approved mockup. Remove excess mortar from edge of joint by brushing.
5. Cure mortar by maintaining in thoroughly damp condition for at least 72 consecutive hours including weekends and holidays.
    a. Acceptable curing methods include covering with wet burlap and plastic sheeting, periodic hand misting, and periodic mist spraying using system of pipes, mist heads, and timers.
    b. Adjust curing methods to ensure that pointing mortar is damp throughout its depth without eroding surface mortar.
6. Hairline cracking within the mortar or mortar separation at edge of a joint is unacceptable. Completely remove such mortar and repoint.

F. Pointing with Sealant:
1. After raking out, keep joints dry and free of mortar and debris.
2. Clean and prepare joint surfaces according to Section 079200 "Joint Sealants." Prime joint surfaces unless sealant manufacturer recommends against priming. Do not allow primer to spill or migrate onto adjoining surfaces.
3. Fill sealant joints with specified joint sealant according to Section 079200 "Joint Sealants" and the following:
    a. Install cylindrical sealant backing beneath the sealant, except where space is insufficient. There, install bond-breaker tape.
    b. Install sealant using only proven installation techniques that will ensure that sealant will be deposited in a uniform, continuous ribbon, without gaps or air pockets, and with complete wetting of the joint bond surfaces equally on both sides. Fill joint flush with surrounding masonry and matching the contour of adjoining mortar joints.
    c. Install sealant as recommended by sealant manufacturer but within the following general limitations, measured at the center (thin) section of the bead:
        1) Fill joints to a depth equal to joint width, but not more than 1/2 inch (13 mm) deep or less than 1/4 inch (6 mm) deep.
    d. Immediately after first tooling, apply ground-mortar aggregate to sealant, gently pushing aggregate into the surface of sealant. Retool sealant to form smooth, uniform beads, slightly concave. Remove excess sealant and aggregate from surfaces adjacent to joint.

e. Do not allow sealant to overflow or spill onto adjoining surfaces, or to migrate into the voids of adjoining surfaces, particularly rough textures. Remove excess and spillage of sealant promptly as the work progresses. Clean adjoining surfaces by the means necessary to eliminate evidence of spillage, without damage to adjoining surfaces or finishes, as demonstrated in an approved mockup.

4. Cure sealant according to Section 079200 "Joint Sealants."

G. Where repointing work precedes cleaning of existing masonry, allow mortar to harden at least 30 days before beginning cleaning work.

3.8 FINAL CLEANING

A. After mortar has fully hardened, thoroughly clean exposed masonry surfaces of excess mortar and foreign matter; use wood scrapers, stiff-nylon or -fiber brushes, and clean water, spray applied at low pressure.
   1. Do not use metal scrapers or brushes.
   2. Do not use acidic or alkaline cleaners.

B. Wash adjacent woodwork and other nonmasonry surfaces. Use detergent and soft brushes or cloths.

C. Clean mortar and debris from roof; remove debris from gutters and downspouts. Rinse off roof and flush gutters and downspouts.

D. Sweep and rake adjacent pavement and grounds to remove mortar and debris. Where necessary, pressure wash pavement surfaces to remove mortar, dust, dirt, and stains.

3.9 FIELD QUALITY CONTROL

A. Inspectors: Owner will engage qualified independent inspectors to perform inspections and prepare test reports. Allow inspectors use of lift devices and scaffolding, as needed, to perform inspections.

B. Architect's Project Representatives: Architect will assign Project representatives to help carry out Architect's responsibilities at the site, including observing progress and quality of portion of the Work completed. Allow Architect's Project representatives use of lift devices and scaffolding, as needed, to observe progress and quality of portion of the Work completed.

C. Notify inspectors and Architect's Project representatives in advance of times when lift devices and scaffolding will be relocated. Do not relocate lift devices and scaffolding until inspectors and Architect's Project representatives have had reasonable opportunity to make inspections and observations of work areas at lift device or scaffold location.

END OF SECTION 040120

SECTION 040140.61 - STONE REPAIR

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:
   1. Repairing stone masonry, including replacing whole and partial units.
   2. Removing abandoned anchors.
   3. Painting steel uncovered during the work.

1.3 DEFINITIONS

A. Low-Pressure Spray: 100 to 400 psi (690 to 2750 kPa); 4 to 6 gpm (0.25 to 0.4 L/s).
B. Rebuilding (Setting) Mortar: Mortar used to set and anchor masonry in a structure, distinct from pointing mortar installed after masonry is set in place.
C. Rift: The most pronounced direction of splitting or cleavage of a stone.
D. Stone Terminology: ASTM C 119.

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.
   1. Review methods and procedures related to stone repair including, but not limited to, the following:
      a. Verify stone repair specialist's personnel, equipment, and facilities needed to make progress and avoid delays.
      b. Materials, material application, sequencing, tolerances, and required clearances.
      c. Quality-control program.
      d. Coordination with building occupants.

1.5 SEQUENCING AND SCHEDULING

A. Work Sequence: Perform stone repair work in the following sequence, which includes work specified in this and other Sections:
   1. Remove plant growth.
   2. Inspect masonry for open mortar joints and permanently or temporarily point them before cleaning to prevent the intrusion of water and other cleaning materials into the wall.
   3. Remove paint.
   4. Clean stone.
   5. Rake out mortar from joints surrounding stone to be replaced and from joints adjacent to stone repairs along joints.
   6. Repair stonework, including replacing existing stone with new stone.
   7. Rake out mortar from joints to be repointed.
   8. Point mortar and sealant joints.
   9. After repairs and repointing have been completed and cured, perform a final cleaning to remove residues from this work.

1.6 ACTION SUBMITTALS

A. Product Data: For each type of product.

1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes.
2. Include recommendations for product application and use. Include test data substantiating that products comply with requirements.

B. Shop Drawings:
1. Include plans, elevations, sections, and locations of replacement stone units on the structure and their jointing, showing relation of existing and new or relocated units.
2. Show partial replacement stone units (dutchmen).
3. Indicate setting number of each new stone unit and its location on the structure in annotated plans and elevations.
4. Show provisions for expansion joints or other sealant joints.
5. Show provisions for flashing, lighting fixtures, conduits, and weep holes as required.
6. Show replacement and repair anchors, including drilled-in pins. Include details of anchors within individual stone units, with locations of anchors and dimensions of holes and recesses in stone required for anchors, including direction and angle of holes for pins.
7. Show locations of scaffolding and points of scaffolding in contact with masonry. Include details of each point of contact or anchorage.

C. Samples for Initial Selection: For the following:
1. Colored Mortar: Submit sets of mortar that will be left exposed in the form of sample mortar strips, 6 inches (150 mm) long by 1/2 inch (13 mm) wide, set in aluminum or plastic channels.
   a. Have each set contain a close color range of at least three Samples of different mixes of colored sands and cements that produce a mortar matching the existing, cleaned mortar when cured and dry.
   b. Submit with precise measurements on ingredients, proportions, gradations, and source of colored sands from which each Sample was made.
2. Sand Types Used for Mortar: Minimum 8 oz. ((240 mL))of each in plastic screw-top jars.
3. Patching Compound: Submit sets of patching compound Samples in the form of plugs (patches in drilled holes) in sample units of stone representative of the range of stone colors on the building.
   a. Have each set contain a close color range of at least three Samples of different mixes of patching compound that matches the variations in existing stone when cured and dry.
4. Include similar Samples of accessories involving color selection.

D. Samples for Verification: For the following:
1. Each type of replacement stone. Include sets of Samples to show full range of color, texture, grain, veining, and finish to be expected. Provide sets of at least two 12-by-12-inch (300-by-300-mm) Samples for each type, but no fewer than necessary to indicate full range and proportion of variations within range.
2. Each type of patching compound in form of briquettes, at least 3 inches (75 mm) long by 1-1/2 inches (38 mm) wide. Document each Sample with manufacturer and stock number or other information necessary to order additional material.
3. Each type of adhesive.
4. Accessories: Each type of anchor, accessory, and miscellaneous support.

1.7 INFORMATIONAL SUBMITTALS

A. Qualification Data: For stone repair specialist including field supervisors and workers.
B. Quality-control program.

1.8 QUALITY ASSURANCE

A. Stone Repair Specialist Qualifications: Engage an experienced stone repair firm to perform work of this Section. Firm shall have completed work similar in material, design, and extent to that indicated for this Project with a record of successful in-service performance. Experience in only installing standard unit masonry or new stone masonry is insufficient experience for stone repair work.
1. Field Supervision: Stone repair specialist firms shall maintain experienced full-time supervisors on Project site during times that stone repair work is in progress.
2. Stone Repair Worker Qualifications: When stone units are being patched, assign at least one worker per crew who is trained and certified by manufacturer of patching compound to apply its products.

B. Quality-Control Program: Prepare a written quality-control program for this Project to systematically demonstrate the ability of personnel to properly follow methods and use materials and tools without damaging stonework. Include provisions for supervising performance and preventing damage.

C. Mockups: Prepare mockups of stone repair to demonstrate aesthetic effects and to set quality standards for materials and execution and for fabrication and installation.

1. Stone Repair: Prepare sample areas for each type of stone indicated to have repair work performed. If not otherwise indicated, size each mockup not smaller than two adjacent whole units or approximately 48 inches (1200 mm) in least dimension. Construct sample areas in locations in existing walls where directed by Architect unless otherwise indicated. Demonstrate quality of materials, workmanship, and blending with existing work. Include the following as a minimum:
   a. Replacement: One stone unit replaced.
   b. Partial Stone Replacement: One partial stone replacement (dutchman repair).
   c. Crack Injection: Apply crack injection in two separate areas, each approximately 36 inches (900 mm) long.
   d. Patching: Three small holes at least 1 inch (25 mm) in diameter.
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 PRECONSTRUCTION TESTING

A. Preconstruction Testing Service: Owner will engage a qualified testing agency to perform preconstruction testing on stone units as follows:

1. Provide test specimens as indicated and representative of proposed materials and existing construction.
2. Replacement Stone: Test each proposed type of replacement stone according to ASTM C 170/C 170M for compressive strength, ASTM C 99/C 99M for modulus of rupture, and ASTM C 97/C 97M for absorption and bulk specific gravity.
3. Existing Stone: Test each type of existing stone indicated for replacement according to ASTM C 170/C 170M for compressive strength, wet and dry, perpendicular and parallel to rift; ASTM C 99/C 99M for modulus of rupture, wet and dry, perpendicular and parallel to rift; and ASTM C 97/C 97M for absorption and bulk specific gravity.
4. Existing Mortar: Test according to ASTM C 295/C 295M, modified as agreed by testing service and Architect for Project requirements, to determine proportional composition of original ingredients, sizes and colors of aggregates, and approximate strength.
5. Temporary Patch: As directed by Architect, provide temporary materials followed by permanent repairs at locations from which existing samples were taken.

1.10 DELIVERY, STORAGE, AND HANDLING

A. Deliver stone units to Project site strapped together in suitable packs or pallets or in heavy-duty crates and protected against impact and chipping.

B. Deliver each piece of stone with code mark or setting number on unexposed face, corresponding to Shop Drawings, using nonstaining paint.

C. Deliver packaged materials to Project site in manufacturer's original and unopened containers, labeled with manufacturer's name and type of products.

D. Store cementitious materials on elevated platforms, under cover, and in a dry location. Do not use cementitious materials that have become damp.

E. Store hydrated lime in manufacturer's original and unopened containers. Discard lime if containers have been damaged or have been opened for more than two days.

F. Store sand where grading and other required characteristics can be maintained and contamination avoided.

G. Handle stone to prevent overstressing, chipping, defacement, and other damage.

1.11 FIELD CONDITIONS

A. Weather Limitations: Proceed with installation only when existing and forecasted weather conditions permit stone repair work to be performed according to product manufacturers' written instructions and specified requirements.
B. Temperature Limits, General: Repair stone units only when air temperature is between 40 and 90 deg F (4 and 32 deg C) and is predicted to remain so for at least seven days after completion of the Work unless otherwise indicated.
C. Cold-Weather Requirements: Comply with the following procedures for stone repair unless otherwise indicated:
   1. When air temperature is below 40 deg F (4 deg C), heat mortar ingredients, repair materials, and existing stone to produce temperatures between 40 and 120 deg F (4 and 49 deg C).
   2. When mean daily air temperature is below 40 deg F (4 deg C), provide enclosure and heat to maintain temperatures above 32 deg F (0 deg C) within the enclosure for seven days after repair.
D. Hot-Weather Requirements: Protect stone repairs when temperature and humidity conditions produce excessive evaporation of water from mortar and patching materials. Provide artificial shade and wind breaks, and use cooled materials as required to minimize evaporation. Do not apply mortar to substrates with temperatures of 90 deg F (32 deg C) and above unless otherwise indicated.
E. For manufactured repair materials, perform work within the environmental limits set by each manufacturer.

PART 2 - PRODUCTS

2.1 MATERIALS, GENERAL

A. Source Limitations: Obtain each type of material for repairing stone (stone, cement, sand, etc.) from single source with resources to provide materials of consistent quality in appearance and physical properties.

2.2 STONE MATERIALS

A. Stone Matching Existing: Natural building stone of variety, color, texture, grain, veining, finish, size, and shape that match existing stone and with physical properties within 10 percent of those determined from preconstruction testing of selected existing stone.
   1. Physical Properties for Limestone and Mankato stone:
      a. Compressive Strength: according to ASTM C 170/C 170M.
      b. Modulus of Rupture: according to ASTM C 99/C 99.
      c. Absorption: according to ASTM C 97/C 97.
      d. Bulk Specific Gravity: according to ASTM C 97/C 97.
   2. For existing stone that exhibits a range of colors, texture, grain, veining, finishes, sizes, or shapes, provide stone that proportionally matches that range rather than stone that matches an individual color, texture, grain, veining, finish, size, or shape within that range.
B. Cutting New Stone: Cut each new stone so that, when it is set in final position, the rift or natural bedding planes will match the rift orientation of existing stones.

2.3 MORTAR MATERIALS

A. Portland Cement: ASTM C 150/C 150M, Type I or Type II, except Type III may be used for cold-weather construction; white or gray, or both where required for color matching of mortar.
   1. Provide cement containing not more than 0.60 percent total alkali when tested according to ASTM C 114.
B. Hydrated Lime: ASTM C 207, Type S.
C. Mortar Sand: ASTM C 144.
   1. Exposed Mortar: Match size, texture, and gradation of existing mortar sand as closely as possible. Blend several sands if necessary to achieve suitable match.
   2. Colored Mortar: Natural sand or ground marble, granite, or other sound stone of color necessary to produce required mortar color.
D. Water: Potable.

2.4 CLEANING MATERIALS

A. Water for Cleaning: Potable.
B. Non-Acidic Gel Cleaner: Manufacturer's standard gel formulation, with pH between 6 and 9, that contains detergents and chelating agents and is specifically formulated for cleaning masonry surfaces.
   1. Products:
      a. Price Research, Ltd.; Price Marble Cleaner-Gel.
      b. ProSoCo; Sure Klean 942 Masonry Cleaner.
C. Non-Acidic Liquid Cleaner: Manufacturer's standard mildly alkaline liquid cleaner formulated for removing organic soiling from polished stone, brick, aluminum, plastics, and wood.
   1. Products:
      a. Dominion Restoration, Inc.; Bio-Cleanse.
      b. Dumond Chemicals, Inc.; Safe n' Easy Architectural Cleaner/Restorer.
      c. Price Research, Ltd.; Price Marble Cleaner-Gel.
      d. ProSoCo; Sure Klean 942 Masonry Cleaner.

2.5 MANUFACTURED REPAIR MATERIALS

A. Stone Patching Compound: Factory-mixed cementitious product that is custom manufactured for patching stone.
   1. Available Products:
      a. Cathedral Stone Products, Inc.: Jahn M70 stone repair mortar.
   2. Use formulation that is vapor and water permeable (equal to or more than the stone), exhibits low shrinkage, has lower modulus of elasticity than stone units being repaired, and develops high bond strength to all types of stone.
   3. Use formulation having working qualities and retardation control to permit forming and sculpturing where necessary.
   4. Formulate patching compound in colors, textures, and grain to match stone being patched. Provide sufficient number of no fewer than three colors to enable matching of each piece of stone.
B. Stone-to-Stone Adhesive and Crack Filler: Two-part polyester or epoxy-resin stone adhesive with a 15- to 45-minute cure at 70 deg F (21 deg C), recommended in writing by adhesive manufacturer for type of stone repair indicated, and matching stone color.
   1. Product:
      a. Sika Corporation; Sikadur 33 (injection ports).
      b. Sika Corporation; Sikadur 35, Hi-Mod LV (injection epoxy).

2.6 ACCESSORY MATERIALS

A. Stone Repair Anchors and Pins: Mechanical fasteners and pins of Type 304 stainless steel; designed for stone stabilization and pinning stone pieces; matching shape and size of existing anchors unless otherwise indicated.
B. Setting Buttons and Shims: Resilient plastic, nonstaining to stone, sized to suit joint thicknesses and bed depths of stone units, less the required depth of pointing materials unless removed before pointing.
C. Masking Tape: Nonstaining, nonabsorbent material; compatible with mortar, joint primers, sealants, and surfaces adjacent to joints; and that easily comes off entirely, including adhesive.
D. Other Products: Select materials and methods of use based on the following, subject to approval of a mockup:
   1. Previous effectiveness in performing the work involved.
   2. Minimal possibility of damaging exposed surfaces.
   3. Consistency of each application.
   4. Uniformity of the resulting overall appearance.
   5. Do not use products or tools that could leave residue on surfaces.

2.7 MORTAR MIXES

A. Measurement and Mixing: Measure cementitious materials and sand in a dry condition by volume or equivalent weight. Do not measure by shovel; use known measure. Mix materials in a clean, mechanical batch mixer.
B. Do not use admixtures in mortar unless otherwise indicated.

C. Mixes: Mix mortar materials in the following proportions:
   1. Rebuilding (Setting) Mortar by Volume: 1 part portland cement, 1 part lime, and 6 parts sand.
   2. Rebuilding (Setting) Mortar by Type: ASTM C 270, Proportion Specification, Type N unless otherwise indicated, with cementitious material limited to portland cement and lime.
   3. Rebuilding (Setting) Mortar by Property: ASTM C 270, Property Specification, Type N unless otherwise indicated; with cementitious material limited to portland cement and lime.

PART 3 - EXECUTION

3.1 PROTECTION

A. Prevent mortar from staining face of surrounding stone and other surfaces.
   1. Cover sills, ledges, and other projecting items to protect them from mortar droppings.
   2. Keep wall area wet below rebuilding and repair work to discourage mortar from adhering.
   3. Immediately remove mortar splatters in contact with exposed stone and other surfaces.

3.2 STONE REPAIR, GENERAL

A. Appearance Standard: Repaired surfaces are to have a uniform appearance as viewed from 20 feet (6 m) away by Architect.

3.3 ABANDONED ANCHOR REMOVAL

A. Remove abandoned anchors, brackets, wood nailers, and other extraneous items no longer in use unless indicated to remain.
   1. Remove items carefully to avoid spalling or cracking stone.
   2. Notify Architect before proceeding if an item cannot be removed without damaging surrounding stone. Do the following where directed:
      a. Cut or grind off item approximately 3/4 inch (20 mm) beneath surface and core drill a recess of same depth in surrounding stone as close around item as practical.
      b. Immediately paint exposed end of item with two coats of antirust coating, following coating manufacturer's written instructions and without exceeding manufacturer's recommended dry film thickness per coat. Keep paint off sides of recess.
   3. Patch hole where each item was removed unless directed to remove and replace stone unit.

3.4 STONE REMOVAL AND REPLACEMENT

A. At locations indicated, remove stone that has deteriorated or is damaged beyond repair. Carefully remove entire units from joint to joint, without damaging surrounding stone, in a manner that permits replacement with full-size units.
B. Support and protect remaining stonework that surrounds removal area.
C. Maintain flashing, reinforcement, lintels, and adjoining construction in an undamaged condition. Coordinate with new flashing which are specified in other Sections.
D. Notify Architect of unforeseen detrimental conditions including voids, cracks, bulges, and loose units in existing stone or unit masonry backup, rotted wood, rusted metal, and other deteriorated items.
E. Remove in an undamaged condition as many whole stone units as possible.
   1. Remove mortar, loose particles, and soil from stone by cleaning with hand chisels, brushes, and water.
   2. Remove sealants by cutting close to stone with utility knife and cleaning with solvents.
   3. Store stone for reuse. Store off ground, on skids, and protected from weather.
   4. Deliver cleaned stone not required for reuse to Owner unless otherwise indicated.
F. Clean stone surrounding removal areas by removing mortar, dust, and loose particles in preparation for stone replacement.

G. Replace removed damaged stone with, as indicated, other removed stone in good condition or with new stone matching existing stone, including direction of rift or natural bedding planes. Do not use broken units unless they can be cut to usable size.

H. Install replacement stone into bonding and coursing pattern of existing stone. If cutting is required, use a motor-driven saw designed to cut stone with clean, sharp, unchipped edges. Finish edges to blend with appearance of edges of existing stone.
   1. Maintain joint width for replacement stone to match existing joints.
   2. Use setting buttons or shims to set stone accurately spaced with uniform joints.

I. Set replacement stone with rebuilding (setting) mortar and with completely filled bed, head, and collar joints. Butter vertical joints for full width before setting, and set units in full bed of mortar unless otherwise indicated. Replace existing anchors with new anchors of size and type indicated.
   1. Tool exposed mortar joints in repaired areas to match joints of surrounding existing stonework.
   2. Rake out mortar used for laying stone before mortar sets according to Section 040140.62 "Stone Repointing." Point at same time as repointing of surrounding area.
   3. When mortar is hard enough to support units, remove shims and other devices interfering with pointing of joints.

J. Curing: Cure mortar by maintaining in thoroughly damp condition for at least 72 consecutive hours, including weekends and holidays.
   1. Hairline cracking within the mortar or mortar separation at edge of a joint is unacceptable. Completely remove such mortar and repoint.

3.5 PARTIAL STONE REPLACEMENT

A. Remove defective portion of existing stone unit (backing stone). Carefully remove defective portion of stone by making vertical and horizontal saw cuts at face of backing stone and removing defective material to depth required for fitting partial replacement (dutchman).
   1. Make edges of backing stone at cuts smooth and square to each other and to finished surface; essentially rectangular. Make back of removal area flat and parallel to stone face.
   2. Do not overcut at corners and intersections. Hand trim to produce clean sharp corners with no rounding and no damage to existing work to remain.
   3. If backing stone becomes further damaged, remove damaged area and enlarge partial replacement as required.

B. Remove mortar from joints that abut area of stone removal to same depth as stone was removed. Remove loose mortar particles and other debris from surfaces to be bonded and surfaces of adjacent stone units that will receive mortar by cleaning with stiff-fiber brush.

C. Cut and trim partial replacement to accurately fit area where material was removed from backing stone. Fabricate to size required to produce joints between partial replacement and backing stone of no more than 1/16 inch (1.6 mm) in width, and to produce joints between partial replacement and other stones that match existing joints between stones. Cut partial replacement so that, when it is set in final position, natural bedding planes will match the orientation of bedding planes of the backing stone unless otherwise indicated.

D. Pinning: Before applying adhesive, prepare for mechanical anchorage consisting of 1/4-inch- (6-mm-) diameter, plain stainless-steel pins set into 1/4-inch- (6-mm-) diameter holes drilled at a 45-degree downward angle through face of partial replacement and into backing stone. Center and space pins 3 to 5 inches (75 to 125 mm) apart and at least 2 inches (50 mm) from any edge. Insert pins at least 2 inches (50 mm) into backing stone and 2 inches (50 mm) into partial replacement with end countersunk at least 3/4 inch (19 mm) from exposed face of partial replacement.

E. Concealed Pinning: Before applying adhesive, prepare for concealed mechanical anchorage consisting of 1/4-inch- (6-mm-) diameter, plain stainless-steel pins set into 1/4-inch- (6-mm-) diameter holes drilled into backing stone and into, but not through, the partial replacement. Center and space pins 3 to 5 inches (75 to 125 mm) apart and at least 2 inches (50 mm) from any edge. Insert pins at least 2 inches (50 mm) into backing stone and 2 inches (50 mm) into partial replacement, but no closer than 3/4 inch (19 mm) from exposed face of partial replacement.

F. Apply stone-to-stone adhesive according to adhesive manufacturer's written instructions. Coat bonding surfaces of backing stone and partial replacement, completely filling all crevices and voids.

G. Apply partial replacement while adhesive is still tacky and hold securely in place until adhesive has cured. Use shims, clamps, wedges, or other devices as necessary to align face of partial replacement with face of backing stone.

H. Clean adhesive residue from exposed surfaces and patch chipped areas and exposed drill holes as specified in "Stone Patching" Article.

3.6 CRACK INJECTION

A. General: Comply with cementitious crack-filler manufacturer's written instructions.
B. Drill 1/4-inch- (6-mm-) diameter injection holes as follows:
   1. Transverse Cracks Less Than 3/8 inch (9 mm) Wide: Drill holes through center of crack at 12 to 18 inches (300 to 500 mm) o.c.
   2. Transverse Cracks More Than 3/8 inch (9 mm) Wide: Drill holes through center of crack at 18 to 36 inches (500 to 900 mm) o.c.
   3. Delaminations: Drill holes at approximately 18 inches (500 mm) o.c. both vertically and horizontally.
   4. Drill holes 2 inches (50 mm) deep.
C. Clean out drill holes and cracks with compressed air and water. Remove dirt and organic matter, loose material, sealants, and failed crack repair materials.
D. Place plastic injection ports in drilled holes and seal face of cracks between injection ports with clay or other nonstaining, removable plugging material. Leave openings at upper ends of cracks for air release.
E. Inject cementitious crack filler through ports sequentially, beginning at one end of area and working to opposite end; where possible, begin at lower end of injection area and work upward. Inject filler until it extrudes from adjacent ports. After port has been injected, plug with clay or other suitable material and begin injecting filler at adjacent port, repeating process until all ports have been injected.
F. Clean cementitious crack filler from face of stone before it sets by scrubbing with water.
G. After cementitious crack filler has set, remove injection ports, plugging material, and excess filler. Patch injection holes and surface of cracks as specified in "Stone Patching" Article.

3.7 STONE PATCHING

A. Patch the following stone units unless another type of repair or replacement is indicated:
   1. Units indicated to be patched.
   2. Units with holes.
   3. Units with chipped edges or corners. Patch chipped edges or corners measuring more than 3/4 inch (19 mm) in least dimension.
   4. Units with small areas of deep deterioration. Patch deep deteriorations measuring more than 3/4 inch (19 mm) in least dimension and more than 1/4 inch (6 mm) deep.
B. Remove and replace existing patches where indicated.
C. Remove deteriorated material and remove adjacent material that has begun to deteriorate. Carefully remove additional material so patch does not have feathered edges but has square or slightly undercut edges on area to be patched and is at least 1/4 inch (6 mm) thick, but not less than recommended in writing by patching compound manufacturer.
D. Mask adjacent mortar joint or rake out for repointing if patch extends to edge of stone unit.
E. Mix patching compound in individual batches to match each stone unit being patched. Combine one or more colors of patching compound, as needed, to produce exact match.
F. Brush-coat stone surfaces with slurry coat of patching compound according to manufacturer's written instructions.
G. Place patching compound in layers as recommended in writing by patching compound manufacturer, but not less than 1/4 inch (6 mm) or more than 2 inches (50 mm) thick. Roughen surface of each layer to provide a key for next layer.
   1. Simple Details: Trowel, scrape, or carve surface of patch to match texture and surrounding surface plane or contour of the stone. Shape and finish surface before or after curing, as determined by testing, to best match existing stone.
   2. Carved Details: Build patch up 1/4 inch (6 mm) above surrounding stone, and carve surface to match adjoining stone after patching compound has hardened.
H. Keep each layer damp for 72 hours or until patching compound has set.
I. Remove and replace patches with hairline cracks or that show separation from stone at edges, and those that do not match adjoining stone in color or texture.

3.8 FINAL CLEANING

A. After mortar has fully hardened, thoroughly clean exposed stone surfaces of excess mortar and foreign matter; use wood scrapers, stiff-nylon or -fiber brushes, and clean water, applied by low-pressure spray.
   1. Do not use metal scrapers or brushes.
   2. Do not use acidic or alkaline cleaners.
B. Clean adjacent nonstone surfaces. Use detergent and soft brushes or cloths.
C. Clean mortar and debris from roof; remove debris from gutters and downspouts. Rinse off roof and flush gutters and downspouts.
D. Remove masking materials, leaving no residues that could trap dirt.

3.9 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage a qualified testing agency to perform tests and inspections. Allow inspectors use of lift devices and scaffolding, as needed, to perform inspections.
B. Architect's Project Representatives: Architect will assign Project representatives to help carry out Architect's responsibilities at the site, including observing progress and quality of portion of the Work completed. Allow Architect's Project representatives use of lift devices and scaffolding, as needed, to observe progress and quality of portion of the Work completed.
C. Notify Architect's Project representatives in advance of times when lift devices and scaffolding will be relocated. Do not relocate lift devices and scaffolding until Architect's Project representatives have had reasonable opportunity to make inspections and observations of work areas at lift device or scaffold location.

3.10 STONE WASTE DISPOSAL

A. Salvageable Materials: Unless otherwise indicated, excess stone materials are Contractor's property.
B. Stone Waste: Remove stone waste and legally dispose of off Owner's property.

END OF SECTION 040140.61

SECTION 040140.62 - STONE REPOINTING

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:
   1. Repointing joints with mortar.
   2. Repointing joints with sealant.

1.3 DEFINITIONS

A. Low-Pressure Spray: 100 to 400 psi (690 to 2750 kPa); 4 to 6 gpm (0.25 to 0.4 L/s).
B. Rift: The most pronounced direction of splitting or cleavage of a stone.

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.
   1. Review methods and procedures related to repointing stonework including, but not limited to, the following:
      a. Verify stone repointing specialist's personnel, equipment, and facilities needed to make progress and avoid delays.
      b. Materials, material application, sequencing, tolerances, and required clearances.
      c. Quality-control program.
      d. Coordination with building occupants.

1.5 SEQUENCING AND SCHEDULING

A. Work Sequence: Perform stone repointing work in the following sequence, which includes work specified in this and other Sections:
   1. Remove plant growth.
   2. Inspect masonry for open mortar joints and permanently or temporarily point them before cleaning to prevent the intrusion of water and other cleaning materials into the wall.
   3. Remove paint.
   4. Clean stone.
   5. Rake out mortar from joints surrounding stone to be replaced and from joints adjacent to stone repairs along joints.
   6. Repair stonework, including replacing existing stone with new stone.
   7. Rake out mortar from joints to be repointed.
   8. Point mortar and sealant joints.
   9. After repairs and repointing have been completed and cured, perform a final cleaning to remove residues from this work.
   10. Where water repellents are to be used on or near stonework, delay application of these chemicals until after pointing and cleaning.
B. As scaffolding is removed, patch anchor holes used to attach scaffolding. Patch holes in stone according to Section 040140.61 "Stone Repair." Patch holes in mortar joints according to "Repointing Stonework" Article.

1.6 ACTION SUBMITTALS

A. Product Data: For each type of product.
   1. Include recommendations for product application and use. Include test data substantiating that products comply with requirements.
B. Samples for Initial Selection: For the following:
   1. Pointing Mortar: Submit sets of mortar for pointing in the form of sample mortar strips, 6 inches (150 mm) long by 1/4 inch (6 mm)] [1/2 inch (13 mm)] wide, set in aluminum or plastic channels.
      a. Have each set contain a close color range of at least three Samples of different mixes of colored sands and cements that produce a mortar matching the existing, cleaned mortar when cured and dry.
      b. Submit with precise measurements on ingredients, proportions, gradations, and source of colored sands from which each Sample was made.
   2. Sand Type Used for Pointing Mortar: Minimum 8 oz. (240 mL) of each in plastic screw-top jars.
   3. Sealant materials.
   4. Include similar Samples of accessories involving color selection.
C. Samples for Verification: For the following:
   1. Each type, color, and texture of pointing mortar in the form of sample mortar strips, 6 inches (150 mm) long by 1/4 inch (6 mm) wide, set in aluminum or plastic channels.
      a. Include with each Sample a list of ingredients with proportions of each. Identify sources, both supplier and quarry, of each type of sand and brand names of cementitious materials and pigments if any.
   2. Sealant materials.
   3. Accessories: Each type of anchor, accessory, and miscellaneous support.

1.7 INFORMATIONAL SUBMITTALS

A. Qualification Data: For stone repointing specialist including field supervisors and workers.
B. Preconstruction Test Reports: For existing stone and mortar.
C. Quality-control program.

1.8 QUALITY ASSURANCE

A. Stone Repointing Specialist Qualifications: Engage an experienced stone repointing firm to perform work of this Section. Firm shall have completed work similar in material, design, and extent to that indicated for this Project with a record of successful in-service performance. Experience in only installing standard unit masonry or new stone masonry is insufficient experience for stone repointing work.
   1. Field Supervision: Stone repointing specialist firms shall maintain experienced full-time supervisors on Project site during times that stone repointing work is in progress.
B. Quality-Control Program: Prepare a written quality-control program for this Project to systematically demonstrate the ability of personnel to properly follow methods and use materials and tools without damaging stonework. Include provisions for supervising performance and preventing damage.
C. Mockups: Prepare mockups of stone repointing to demonstrate aesthetic effects and to set quality standards for materials and execution.
   1. Repointing: Rake out joints in two separate areas, each approximately 36 inches (900 mm) high by 48 inches (1200 mm) wide for each type of repointing required, and repoint one of the areas.
   2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
   3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 PRECONSTRUCTION TESTING

A. Preconstruction Testing Service: Owner will engage a qualified testing agency to perform preconstruction testing on stone units as follows:
   1. Provide test specimens as indicated and representative of proposed materials and existing construction.

2. Existing Stone: Test each type of existing stone indicated for repointing according to ASTM C 170/C 170M for compressive strength, wet and dry, perpendicular and parallel to rift; ASTM C 99/C 99M for modulus of rupture, wet and dry, perpendicular and parallel to rift; and ASTM C 97/C 97M for absorption and bulk specific gravity. Carefully remove five existing stones from locations designated by Architect. Take testing samples from these stones.
3. Existing Mortar: Test according to ASTM C 295/C 295M, modified as agreed by testing service and Architect for Project requirements, to determine proportional composition of original ingredients, sizes and colors of aggregates, and approximate strength.
4. Temporary Patch: As directed by Architect, provide temporary materials followed by permanent repairs at locations from which existing samples were taken.

1.10 DELIVERY, STORAGE, AND HANDLING

A. Deliver packaged materials to Project site in manufacturer's original and unopened containers, labeled with manufacturer's name and type of products.
B. Store cementitious materials on elevated platforms, under cover, and in a dry location. Do not use cementitious materials that have become damp.
C. Store hydrated lime in manufacturer's original and unopened containers. Discard lime if containers have been damaged or have been opened for more than two days.
D. Store sand where grading and other required characteristics can be maintained and contamination avoided.

1.11 FIELD CONDITIONS

A. Weather Limitations: Proceed with installation only when existing and forecasted weather conditions permit repointing work to be performed according to product manufacturers' written instructions and specified requirements.
B. Temperature Limits, General: Repoint mortar joints only when air temperature is between 40 and 90 deg F (4 and 32 deg C) and is predicted to remain so for at least seven days after completion of the Work unless otherwise indicated.
C. Cold-Weather Requirements: Comply with the following procedures for mortar-joint pointing unless otherwise indicated:
   1. When air temperature is below 40 deg F (4 deg C), heat mortar ingredients and existing stone to produce temperatures between 40 and 120 deg F (4 and 49 deg C).
   2. When mean daily air temperature is below 40 deg F (4 deg C), provide enclosure and heat to maintain temperatures above 32 deg F (0 deg C) within the enclosure for seven days after pointing.
D. Hot-Weather Requirements: Protect mortar-joint pointing when temperature and humidity conditions produce excessive evaporation of water from mortar materials. Provide artificial shade and wind breaks, and use cooled materials as required to minimize evaporation. Do not apply mortar to substrates with temperatures of 90 deg F (32 deg C) and above unless otherwise indicated.

PART 2 - PRODUCTS

2.1 MATERIALS, GENERAL

A. Source Limitations: Obtain each type of material for stone repointing (cement, sand, etc.) from single source with resources to provide materials of consistent quality in appearance and physical properties.

2.2 MORTAR MATERIALS

A. Portland Cement: ASTM C 150/C 150M, Type I or Type II, except Type III may be used for cold-weather construction; white or gray, or both where required for color matching of mortar.
   1. Provide cement containing not more than 0.60 percent total alkali when tested according to ASTM C 114.
B. Hydrated Lime: ASTM C 207, Type S.
C. Mortar Sand: ASTM C 144.

1. Match size, texture, and gradation of existing mortar sand as closely as possible. Blend several sands if necessary to achieve suitable match.
2. Color: Natural sand or ground marble, granite, or other sound stone of color necessary to produce required mortar color.

D. Water: Potable.

2.3 MORTAR MIXES

A. Measurement and Mixing: Measure cementitious materials and sand in a dry condition by volume or equivalent weight. Do not measure by shovel; use known measure. Mix materials in a clean, mechanical batch mixer.
1. Mixing Pointing Mortar: Thoroughly mix cementitious materials and sand together before adding any water. Then mix again, adding only enough water to produce a damp, unworkable mix that retains its form when pressed into a ball. Maintain mortar in this dampened condition for 15 to 30 minutes. Add remaining water in small portions until mortar reaches desired consistency. Use mortar within one hour of final mixing; do not retemper or use partially hardened material.

B. Colored Mortar: Produce mortar of color required by using specified ingredients. Do not alter specified proportions without Architect's approval.
1. Mortar Pigments: Where mortar pigments are indicated, do not add pigment exceeding 10 percent by weight of the cementitious or binder materials, except for carbon black which is limited to 2 percent, unless otherwise demonstrated by a satisfactory history of performance.

C. Do not use admixtures in mortar unless otherwise indicated.

D. Mixes: Mix mortar materials in the following proportions:
1. Pointing Mortar by Volume: ASTM C 270, Proportion Specification, 1 part portland cement, 1 part lime, and 6 parts sand.
2. Pointing Mortar by Type: ASTM C 270, Proportion Specification, Type N unless otherwise indicated; with cementitious material limited to portland cement and lime.
3. Pointing Mortar by Property: ASTM C 270, Property Specification, Type N unless otherwise indicated; with cementitious material limited to portland cement and lime.

PART 3 - EXECUTION

3.1 PROTECTION

A. Prevent mortar from staining face of surrounding stone and other surfaces.
1. Cover sills, ledges, and other projecting items to protect them from mortar droppings.
2. Keep wall area wet below pointing work to discourage mortar from adhering.
3. Immediately remove mortar splatters in contact with exposed stone and other surfaces.

3.2 STONE REPOINTING, GENERAL

A. Appearance Standard: Repointed surfaces are to have a uniform appearance as viewed from 20 feet (6 m) away by Architect.

3.3 REPOINTING STONEWORK

A. Rake out and repoint joints to the following extent:
1. All joints in areas indicated.
2. Joints indicated as sealant-filled joints.
3. Joints at locations of the following defects:
a. Holes and missing mortar.
b. Cracks that can be penetrated 1/4 inch (6 mm) or more by a knife blade 0.027 inch (0.7 mm) thick.

B. Do not rake out and repoint joints where not required.

C. Rake out joints as follows, according to procedures demonstrated in approved mockup:

1. Remove mortar from joints to depth of 2-1/2 times joint width, but not less than 3/4 inch (20 mm) or not less than that required to expose sound, unweathered mortar. Do not remove unsound mortar more than 2 inches (50 mm) deep; consult Architect for direction.
2. Remove mortar from stone surfaces within raked-out joints to provide reveals with square backs and to expose stone for contact with pointing mortar. Brush, vacuum, or flush joints to remove dirt and loose debris.
3. Do not spall edges of stone units or widen joints. Replace or patch damaged stone units as directed by Architect.

D. Notify Architect of unforeseen detrimental conditions including voids in mortar joints, cracks, loose stone, rotted wood, rusted metal, and other deteriorated items.

E. Pointing with Mortar:
1. Rinse joint surfaces with water to remove dust and mortar particles. Time rinsing application so, at time of pointing, joint surfaces are damp but free of standing water. If rinse water dries, dampen joint surfaces before pointing.
2. Apply pointing mortar first to areas where existing mortar was removed to depths greater than surrounding areas. Apply in layers not greater than 3/8 inch (9 mm) until a uniform depth is formed. Fully compact each layer, and allow it to become thumbprint hard before applying next layer.
3. After deep areas have been filled to same depth as remaining joints, point joints by placing mortar in layers not greater than 3/8 inch (9 mm). Fully compact each layer and allow to become thumbprint hard before applying next layer. Where existing stone has worn or rounded edges, slightly recess finished mortar surface below face of stone to avoid widened joint faces. Take care not to spread mortar beyond joint edges onto exposed stone surfaces or to featheredge the mortar.
4. When mortar is thumbprint hard, tool joints to match original appearance of joints as demonstrated in approved mockup. Remove excess mortar from edge of joint by brushing.
5. Cure mortar by maintaining in thoroughly damp condition for at least 72 consecutive hours, including weekends and holidays.
6. Hairline cracking within mortar or mortar separation at edge of a joint is unacceptable. Completely remove such mortar and repoint.

F. Where repointing work precedes cleaning of existing stone, allow mortar to harden at least 30 days before beginning cleaning work.

3.4 FINAL CLEANING

A. After mortar has fully hardened, thoroughly clean exposed stone surfaces of excess mortar and foreign matter; use wood scrapers, stiff-nylon or -fiber brushes, and clean water, applied by low-pressure spray.
1. Do not use metal scrapers or brushes.
2. Do not use acidic or alkaline cleaners.

B. Clean adjacent nonstone surfaces. Use detergent and soft brushes or cloths.

C. Clean mortar and debris from roof; remove debris from gutters and downspouts. Rinse off roof and flush gutters and downspouts.

D. Remove masking materials, leaving no residues that could trap dirt.

3.5 FIELD QUALITY CONTROL

A. Testing Agency: Owner will engage qualified testing agencies to perform tests and inspections. Allow inspectors use of lift devices and scaffolding, as needed, to perform inspections.

B. Architect's Project Representatives: Architect will assign Project representatives to help carry out Architect's responsibilities at the site, including observing progress and quality of portion of the Work completed. Allow Architect's Project representatives use of lift devices and scaffolding, as needed, to observe progress and quality of portion of the Work completed.

C. Notify Architect's Project representatives in advance of times when lift devices and scaffolding will be relocated. Do not relocate lift devices and scaffolding until Architect's Project representatives have had reasonable opportunity to make inspections and observations of work areas at lift device or scaffold location.

END OF SECTION 040140.62

SECTION 057300 - DECORATIVE METAL RAILINGS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
   1. Aluminum decorative railings.

1.2 PERFORMANCE REQUIREMENTS

A. Delegated Design: Design railings, including comprehensive engineering analysis by a qualified professional engineer, using performance requirements and design criteria indicated.

B. Structural Performance: Railings shall withstand the effects of gravity loads and the following loads and stresses within limits and under conditions indicated:
   1. Handrails and Top Rails of Guards:
      a. Uniform load of 50 lbf/ft. (0.73 kN/m) applied in any direction.
      b. Concentrated load of 200 lbf (0.89 kN) applied in any direction.
      c. Uniform and concentrated loads need not be assumed to act concurrently.
   2. Infill of Guards:
      a. Concentrated load of 50 lbf (0.22 kN) applied horizontally on an area of 1 sq. ft. (0.093 sq. m).
      b. Infill load and other loads need not be assumed to act concurrently.

C. Control of Corrosion: Prevent galvanic action and other forms of corrosion by insulating metals and other materials from direct contact with incompatible materials.

1.3 PRECONSTRUCTION TESTING

A. Preconstruction Testing Service: Owner will engage a qualified testing agency to perform preconstruction testing on laboratory mockups.
   1. Build laboratory mockups at testing agency facility; use personnel, materials, and methods of construction that will be used at Project site.
   2. Test railings according to ASTM E 894 and ASTM E 935.

1.4 ACTION SUBMITTALS

A. Product Data: For the following:
   1. Manufacturer's product lines of railings assembled from standard components.
   2. Grout, anchoring cement, and paint products.

B. Shop Drawings: Include plans, elevations, sections, details, and attachments to other work.

C. Samples: For each type of exposed finish required.

D. Delegated-Design Submittal: For installed products indicated to comply with performance requirements and design criteria, including analysis data and calculations signed and sealed by the qualified professional engineer responsible for their preparation.

1.5 INFORMATIONAL SUBMITTALS

A. Qualification Data: For qualified professional engineer.

B. Product Test Reports: Based on evaluation of comprehensive tests performed by a qualified testing agency, according to ASTM E 894 and ASTM E 935.

C. Preconstruction test reports.

1.6 QUALITY ASSURANCE

A. Product Options: Information on Drawings and in Specifications establishes requirements for system's aesthetic effects and performance characteristics. Do not modify intended aesthetic effects, as judged solely by Architect, except with Architect's approval.

B. Mockups: Build mockups to verify selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for fabrication and installation.
   1. Build mockups for each form and finish of railing consisting of two posts, top rail, infill area, and anchorage system components.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:
   a. Aluminum Decorative Railings:
   b. Architectural Metal Works.
   c. Architectural Railings & Grilles, Inc.
   d. ART Technologies, Inc.
   e. Blum, Julius & Co., Inc.
   f. Bluecoat of Pittsburgh.
   g. Braun, J. G., Company; a division of the Wagner Companies.
   h. CraneVeyor Corp.
   i. Laurence, C. R. Co., Inc.
   j. Livers Bronze Co.
   k. Newman Brothers, Inc.
   l. Pisor Industries, Inc.
   m. Platers Polishing Company; a division of Rippel Architectural Metals.
   n. Poma Corporation.
   o. Sterling Dula Architectural Products, Inc.; Div. of Kane Manufacturing.
   p. Superior Aluminum Products, Inc.
   q. Wagner, R & B, Inc.; a division of the Wagner Companies.
   r. Wylie Systems.

2.2 METALS, GENERAL

A. Brackets, Flanges, and Anchors: Same metal and finish as supported rails unless otherwise indicated.

2.3 ALUMINUM

A. Aluminum, General: Provide alloy and temper recommended by aluminum producer and finisher for type of use and finish indicated, and with strength and durability properties for each aluminum form required not less than that of alloy and temper designated below.
B. Extruded Bars and Shapes, Including Extruded Tubing: ASTM B 221 (ASTM B 221M), Alloy 6063-T5/T52.
C. Extruded Structural Pipe and Round Tubing: ASTM B 429/B 429M, Alloy 6063-T6.
D. Drawn Seamless Tubing: ASTM B 210 (ASTM B 210M), Alloy 6063-T832.

2.4 FASTENERS

A. Fastener Materials: Unless otherwise indicated, provide the following:
   1. Aluminum Components: Type 304 stainless-steel fasteners.
   2. Dissimilar Metals: Type 304 stainless-steel fasteners.

B. Anchors, General: Anchors capable of sustaining, without failure, a load equal to six times the load imposed when installed in unit masonry and four times the load imposed when installed in concrete, as determined by testing according to ASTM E 488, conducted by a qualified independent testing agency.

2.5 MISCELLANEOUS MATERIALS

A. Bituminous Paint: Cold-applied asphalt emulsion complying with ASTM D 1187.
B. Nonshrink, Nonmetallic Grout: Factory-packaged, nonstaining, noncorrosive, nongaseous grout complying with ASTM C 1107. Provide grout specifically recommended by manufacturer for interior and exterior applications.

2.6 FABRICATION

A. General: Fabricate railings to comply with requirements indicated for design, dimensions, member sizes and spacing, details, finish, and anchorage, but not less than that required to support structural loads.
B. Connections: Fabricate railings with welded or nonwelded connections unless otherwise indicated.
C. Welded Connections: Cope components at connections to provide close fit, or use fittings designed for this purpose. Weld all around at connections, including at fittings.
   1. At exposed connections, finish exposed welds to comply with NOMMA's "Voluntary Joint Finish Standards" for Type 1 welds: no evidence of a welded joint.
D. Mechanical Connections: Connect members with concealed mechanical fasteners and fittings.
E. Form changes in direction by bending or by inserting prefabricated elbow fittings.
F. Bend members in jigs to produce uniform curvature for each configuration required; maintain cross section of member throughout entire bend without buckling, twisting, cracking, or otherwise deforming exposed surfaces of components.
G. Close exposed ends of hollow railing members with prefabricated end fittings.
H. Provide wall returns at ends of wall-mounted handrails unless otherwise indicated.
I. Brackets, Flanges, Fittings, and Anchors: Provide wall brackets, flanges, miscellaneous fittings, and anchors to interconnect railing members to other work unless otherwise indicated.

2.7 ALUMINUM FINISHES

A. Color Anodic Finish: AAMA 611, AA-M12C22A32/A34, Class II, 0.010 mm or thicker.
   1. Color: Black.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Perform cutting, drilling, and fitting required for installing railings. Set railings accurately in location, alignment, and elevation; measured from established lines and levels and free of rack.
   1. Set posts plumb within a tolerance of 1/16 inch in 3 feet (2 mm in 1 m).
   2. Align rails so variations from level for horizontal members and variations from parallel with rake of steps and ramps for sloping members do not exceed 1/4 inch in 12 feet (5 mm in 3 m).

B. Corrosion Protection: Coat concealed surfaces of aluminum that will be in contact with grout, concrete, masonry, wood, or dissimilar metals, with a heavy coat of bituminous paint.
C. Form or core-drill holes not less than 5 inches (125 mm) deep and 3/4 inch (20 mm) larger than OD of post for installing posts in concrete. Clean holes of loose material, insert posts, and fill annular space between post and concrete with grout.
D. Anchor posts to metal surfaces as indicated using fittings designed and engineered for this purpose.
E. Anchor railing ends to concrete and masonry with flanges connected to railing ends and anchored to wall construction with anchors and bolts.
F. Secure wall brackets and railing end flanges to building construction as follows:
   1. For concrete and solid masonry anchorage, use drilled-in expansion shields and hanger or lag bolts.
   2. For hollow masonry anchorage, use toggle bolts.
G. Touchup Painting: Immediately after erection, clean field welds, bolted connections, and abraded areas of shop paint, and paint exposed areas with the same material as used for shop painting to comply with SSPC-PA 1 for touching up shop-painted surfaces.

END OF SECTION 057300

SECTION 071616.1 – CRYSTALLINE WATERPROOFING

PART 1 – GENERAL

1.1 SUMMARY

A. Section Includes: Furnishing of all labor, materials, services and equipment necessary for the supply and installation of cementitious crystalline waterproofing to concrete substrates, above-grade or below-grade, on either dry or wet side of substrates, as indicated on drawings and as specified herein.

B. Location of Work:
   1. Work to be performed at the south courtyard retaining wall as indicated by elevation 1/A5.4 and Exterior Restoration Keynote No. 26.

1.2 REFERENCES

A. Applicable Standards: The following standards are referenced herein.
   1. American Society for Testing and Materials (ASTM)
   2. Army Corps of Engineers (CRD)
   3. NSF International (NSF)

1.3 SYSTEM DESCRIPTION

A. Cementitious Crystalline Waterproofing: Blend of portland cement, fine treated silica sand and active proprietary chemicals. When mixed with water and applied as a cementitious coating, the active chemicals cause a catalytic reaction which generates a non-soluble crystalline formation of dendritic fibers within the pores and capillary tracts of concrete. This process causes concrete to become permanently sealed against the penetration of liquids from any direction.

1.4 SUBMITTALS

A. General: Submit listed submittals in accordance with conditions of the Contract and with Division 1 Submittal Procedures Section.

B. Product Data: Submit product data, including manufacturer's specifications, installation instructions, and general recommendations for waterproofing applications. Also include manufacturer's certification or other data substantiating that products comply with requirements of Contract Documents.

C. Test Reports: Submit for acceptance, complete test reports from approved independent testing laboratories certifying that waterproofing system conforms to performance characteristics and testing requirements specified herein.

D. Manufacturer's Certification: Provide certificates signed by manufacturer or manufacturer's representative certifying that the materials to be installed comply in all respects with the requirements of this specification, and that the applicator is qualified and approved to install the materials in accordance with manufacturer's product data.

E. Manufacturer's Field Report: Provide copy of report from manufacturer's representative confirming that the surfaces to which waterproofing material is to be applied are in a condition suitable to receive same.

1.5 QUALITY ASSURANCE

A. Manufacturer Qualifications: Manufacturer shall be ISO 9001 registered, and shall have no less than 10 years' experience in manufacturing the cementitious crystalline waterproofing materials for the required

work. Manufacturers that cannot provide the performance test data specified herein will not be considered for the project.

B. Applicator: Waterproofing applicator shall be experienced in the installation of cementitious crystalline waterproofing materials as demonstrated by previous successful installations, and shall be approved by the manufacturer in writing.

C. Pre-Installation Conference: Prior to installation of waterproofing, conduct meeting with waterproofing applicator, installers of work adjacent to or which penetrates waterproofing, Architect/Engineer, owner's representative, and waterproofing manufacturer's representative to verify and review the following:
   1. Project requirements for waterproofing as set out in Contract Document.
   2. Manufacturer's product data including application instructions.
   3. Substrate conditions, and procedures for substrate preparation and waterproofing installation.

D. Technical Consultation: The waterproofing manufacturer's representative shall provide technical consultation on waterproofing application.

E. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.
   1. Build mockup of typical vertical and horizontal surfaces 10 sq. ft. (0.9 sq. m) in size.
   2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
   3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.6 DELIVERY, STORAGE AND HANDLING

A. Delivery: Deliver packaged waterproofing materials to project site in original undamaged containers, with manufacturer's labels and seals intact.

1.7 PROJECT CONDITIONS

A. Compliance: Comply with manufacturer's product data regarding condition of substrate to receive waterproofing, weather conditions before and during installation, and protection of the installed waterproofing system.

PART 2 – PRODUCTS

2.1 MATERIALS

A. Acceptable Manufacturer:
Xypex Chemical Corporation
13731 Mayfield Place, Richmond, B.C., Canada V6V 2G9
Tel: 800 961.4477 or 604 273.5265 Fax: 604 270.0451

B. Proprietary Products: Xypex crystalline waterproofing materials as follows:
   1. Xypex Concentrate
   2. Xypex Modified
   3. Xypex Patch'n Plug

C. Source Quality: Obtain proprietary crystalline waterproofing products from a single manufacturer.

2.2 MIXES

A. General: Mix waterproofing material by volume with clean water which is free from salt and deleterious materials. Mix waterproofing material in quantities that can be applied within 20 to 30 minutes from time

of mixing. As mixture thickens, stir frequently, but do not add additional water. Do not mix bonding agents or admixtures with crystalline waterproofing materials.

B. Brush Application Mix: Measure dry powder and place in mixing container. Measure water and mix into the dry powder with a paddle on a slow speed electric drill (250 RPM) or other type mixer which is acceptable to manufacturer. Mixing proportions shall be as follows:

Coverage	Proportions (by Volume)
1.5 lb./sq. yd. (0.8 kg/m2)	5 powder to 2 water
2.0 lb./sq. yd. (1.0 kg/m2)	3 powder to 1 water

C. Spray Application Mix: Mixing shall be same as specified for brush application except that mixture shall be thinner. Use following proportions as a guide only. Adjust proportions to match type of spray equipment and pressures used. Mixing proportions shall be as follows:

Coverage	Proportions (by Volume)
1.5 lb./sq. yd. (0.8 kg/m2)	5 powder to 3 water

D. Dry-Pac Mix: Using a trowel, mix 1 part clean water with 6 parts Xypex Concentrate powder for 10 to 15 seconds. It is acceptable that lumps may be present in mixture. Mix only as much as can be applied in 15 minutes.

PART 3 – EXECUTION

3.1 EXAMINATION

A. Site Visit: Prior to waterproofing installation, arrange visit to project site with water-proofing manufacturer's representative. Representative shall inspect and certify that concrete surfaces are in acceptable condition to receive waterproofing treatment.

B. Verification of Substrates: Verify that concrete surfaces are sound and clean, and that form release agents and materials used to cure the concrete are compatible with waterproofing treatment.

C. Examination for Defects: Examine surfaces to be waterproofed for form tie holes and structural defects such as honeycombing, rock pockets, faulty construction joints and cracks. Such defects to be repaired in accordance to manufacturer's product data and 3.02 below.

3.2 PREPARATION

A. Concrete Finish: Concrete surfaces to receive waterproofing treatment shall have an open capillary system to provide tooth and suction, and shall be free from scale, excess form oil, laitance, curing compounds and foreign matter. Horizontal surfaces shall have a rough wood float or broom finish. Where a smooth trowel finish is required on horizontal surface, crystalline waterproofing material shall be applied by dry shake method at time of concrete finishing in accordance with manufacturer's product data.

B. Surface Preparation: Smooth surfaces (e.g. where steel forms are used) or surfaces covered with excess form oil or other contaminants shall be washed, lightly sand-blasted, water-blasted, or acid etched with muriatic acid as necessary to provide a clean absorbent surface. Surfaces to be acid-etched shall be saturated with water prior to application of acid.

C. Repair of Defects: Surface defects shall be repaired in accordance with manufacturer's instructions as follows:

1. Form Tie Holes, Construction Joints, Cracks: Chip out defective areas in a "U" shaped slot one inch (25 mm) wide and a minimum of one inch (25 mm) deep. Clean slot of debris and dust. Soak area with water and remove excess surface water. Apply a slurry coat of Xypex Concentrate at the

rate of 1.5 lb./sq. yd. (0.8 kg/m2) to the slot. Allow slurry to reach an initial set, then fill cavity with Dry-Pac. Compress tightly into cavity using pneumatic packer or block and hammer.

2. Rock Pockets, Honeycombing or Other Defective Concrete: Rout out defective areas to sound concrete. Remove loose materials and saturate with water. Remove excess surface water and apply a slurry coat of Xypex Concentrate to area. After slurry has set, but while still "green", fill cavity to surface level with non-shrink grout.

D. Wetting Concrete: Prior to application of waterproofing treatment, thoroughly saturate concrete surfaces with clean water as required to ensure migration of crystalline chemicals into voids and capillary tracts of the concrete. Remove free surface water before application.

3.3 APPLICATION

A. Construction Joints: Apply Xypex Concentrate in slurry form at a rate of 2.0 lb./sq. yd. (1.08 kg/m2) to joint surfaces between concrete pours. Moisten surfaces prior to slurry application. Where joint surfaces are not accessible prior to pouring new concrete, consult manufacturer for application procedure.

B. Sealing Strips and Coves: Prepare concrete surfaces that will come into contact with sealing strips and coves by applying one coat of Xypex Concentrate in slurry form at a rate of 1.5 lb./sq. yd. (0.8 kg/m2). Then apply Xypex Concentrate in Dry-Pac form (sealing strip) or Xypex Modified in mortar consistency (cove) after slurry coat has reached an initial set but is still "green".

1. Sealing Strips: Where indicated on drawings, fill preformed grooves, one inch (25 mm) wide and minimum of 1.5 inch (37 mm) deep, located at construction joints with Xypex Concentrate in Dry-Pac form. Compact Dry-Pac tightly into groove using a pneumatic packer or hammer and block.
2. Coves: Where indicated on drawings, trowel apply and pack Xypex Modified mortar into a cove shape.

C. Surface Application: After repairs, surface preparation, treatment of construction joints and sealing strip placement have been completed in accordance with manufacturer's product data and as specified herein, apply Xypex treatment uniformly to concrete surfaces with semi-stiff bristle brush or broom, or suitable spray equipment. Application rates and locations shall be as indicated in the drawings and in accordance with manufacturer's product data. When brushing, work slurry well into surface of the concrete, filling surface pores and hairline cracks. When spraying, hold nozzle close enough to ensure that slurry is forced into pores and hairline cracks.

1. First Coat (of one or two coat application): Apply Xypex Concentrate slurry coat to locations indicated on drawings in accordance with manufacturer's product data.
2. Second Coat (of two coat application): Where indicated on drawings or as required by manufacturer's product data, apply Xypex Modified slurry coat while first coat of Xypex Concentrate is still "green" but after it has reached an initial set. Use light prewatering between coats when rapid drying conditions exist.

D. Sandwich (Topping) Application: When treated structural slabs are to receive a concrete or other topping, place the topping while waterproofing material is still "green" but has reached an initial set. Lightly prewater when rapid drying conditions exist.

3.4 CURING

A. General: Begin curing as soon as Xypex coating has hardened sufficiently so as not to be damaged by a fine spray. Cure Xypex treatment with a mist fog spray of clean water three times a day for 2 to 3 days, or cover treated surfaces with damp burlap for the prescribed period. In warm climates, more than three sprayings per day may be necessary to prevent excessive drying of coating.

B. Air Circulation: Do not lay plastic sheeting directly on the waterproofing coating as air contact is required for proper curing. If poor circulation exists in treated areas, it may be necessary to provide fans or blown air to aid in curing of waterproofing treatment.

C. Holding Structures: For concrete holding structures such as swimming pools, reservoirs, water treatment tanks and wet wells, cure Xypex treatment for three days and then allow treatment to set for 12 days before filling structure with liquid. For structures holding hot or corrosive liquids, cure waterproofing treatment for three days and allow to set for 18 days before filling.

D. Protection: During the curing period, protect treated surfaces from damage by wind, sun, rain and temperatures below 36oF (2oC). If plastic sheeting is used for protection, it must be raised off of waterproofing coating to allow sufficient air circulation.

E. Curing Agent: If moist curing is not possible, use a chemical curing agent that is specifically designed for or compatible with the approved crystalline waterproofing treatment. Curing agent shall have at least two years of successful field use and shall be approved by waterproofing manufacturer in writing.

3.5 INTERFACE WITH OTHER MATERIALS

A. Backfilling: Do not backfill for 36 hours after application. If backfill takes place within seven days after application, then backfill material shall be moist so as not to draw moisture from waterproof coating.

B. Paint, Epoxy or Similar Coatings: Do not apply paint or other coatings until waterproofing treatment has cured and set for a minimum of 21 days. Before applying paint or coating, neutralize treated surface by dampening with water and then washing waterproofed surface with 15% muriatic acid, diluted in a ratio of one part acid to four parts water by volume. Flush acid off treated concrete surfaces.

C. Grout, Cement Parge Coat, Plaster or Stucco: Because the waterproof coating forms a relatively smooth surface and the resulting crystalline formation fills the concrete pores thereby reducing suction characteristics of the concrete, it may be necessary to use a suitable bonding agent for proper bonding of cementitious systems.

3.6 FIELD QUALITY CONTROL

A. Observation: Do not conceal installed waterproofing system before it has been observed by Architect/Engineer, waterproofing manufacturer's representative and other designated entities.

B. Flood Testing:
   1. Perform flood test on completed waterproofing installation before placement of other construction.
   2. Plug or dam drains and fill area with water to a depth of two inches (50 mm) or to within 0.5 inch (12.5 mm) of top of waterproofing treatment.
   3. Let water stand for 24 hours.
   4. If leaks are discovered, make repairs and repeat test until no leaks are observed.

3.7 CLEANING AND PROTECTION

A. Cleaning: Clean spillage and soiling from adjacent surfaces using appropriate cleaning agents and procedures.

B. Protection: Take measures to protect completed Xypex coating from damage after application. Do not permit traffic on unprotected coating.

END OF SECTION 071616.1

SECTION 071616.2 – CRYSTALLINE WATERPROOFING

PART 1 – GENERAL

1.1 SUMMARY

A. Section Includes: Furnishing of all labor, materials, services and equipment necessary for the supply and installation of cementitious crystalline waterproofing to concrete block substrates, above-grade or below-grade, on either dry or wet side of substrates as indicated on drawings and as specified herein.

B. Location of Work:

1. For change order price 7.2.9, locations would take place at loading dock areas in lieu of work indicated on drawings.

1.2 REFERENCES

A. Applicable Standards: The following standards are referenced herein.

1. American Society for Testing and Materials (ASTM)
2. Army Corps of Engineers (CRD)
3. NSF International (NSF)

1.3 SYSTEM DESCRIPTION

A. Cementitious Crystalline Waterproofing: Blend of Portland cement, fine treated silica sand and active proprietary chemicals. When mixed with water and applied as a cementitious coating, the active chemicals cause a catalytic reaction which generates a non-soluble crystalline formation of dendritic fibers within the pores and capillary tracts of concrete. This process causes suitably dense concrete to become permanently sealed against the penetration of liquids from any direction.

1.4 SUBMITTALS

A. General: Submit listed submittals in accordance with conditions of the Contract and with Division 1 Submittal Procedures Section.

B. Product Data: Submit product data, including manufacturer's specifications, installation instructions, and general recommendations for waterproofing applications. Also include manufacturer's certification or other data substantiating that products comply with requirements of Contract Documents.

C. Test Reports: Submit for acceptance, complete test reports from approved independent testing laboratories certifying that waterproofing system conforms to performance characteristics and testing requirements specified herein.

D. Manufacturer's Certification: Provide certificates signed by manufacturer or manufacturer's representative certifying that the materials to be installed comply in all respects with the requirements of this specification, and that the applicator is qualified and approved to install the materials in accordance with manufacturer's product data.

E. Manufacturer's Field Report: Provide copy of report from manufacturer's representative confirming that the surfaces to which waterproofing material is to be applied are in a condition suitable to receive same.

1.5 QUALITY ASSURANCE

A. Manufacturer Qualifications: Manufacturer shall be ISO 9001 registered, and shall have no less than 10 years experience in manufacturing the cementitious crystalline waterproofing materials for the required

work. Manufacturers that cannot provide the performance test data specified herein will not be considered for the project.

B. Applicator: Waterproofing applicator shall be experienced in the installation of cementitious crystalline waterproofing materials as demonstrated by previous successful installations, and shall be approved by the manufacturer in writing.

C. Pre-Installation Conference: Prior to installation of waterproofing, conduct meeting with waterproofing applicator, installers of work adjacent to or which penetrates waterproofing, Architect/Engineer, owner's representative, and waterproofing manufacturer's representative to verify and review the following:

1. Project requirements for waterproofing as set out in Contract Document.
2. Manufacturer's product data including application instructions.
3. Substrate conditions, and procedures for substrate preparation and waterproofing installation.

D. Technical Consultation: The waterproofing manufacturer's representative shall provide technical consultation on waterproofing application.

E. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for materials and execution.
1. Build mockup of typical vertical and horizontal surfaces 10 sq. ft. (0.9 sq. m.) in size.
2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.6 DELIVERY, STORAGE AND HANDLING

A. Delivery: Deliver packaged waterproofing materials to project site in original undamaged containers, with manufacturer's labels and seals intact.

B. Storage: Store waterproofing materials in dry, enclosed location, at temperature and humidity conditions recommended by manufacturer.

1.7 PROJECT CONDITIONS

A. Compliance: Comply with manufacturer's product data regarding condition of substrate to receive waterproofing, weather conditions before and during installation, and protection of the installed waterproofing system.

PART 2 – PRODUCTS

2.1 MATERIALS

A. Acceptable Manufacturer:
Xypex Chemical Corporation
13731 Mayfield Place, Richmond, B.C., Canada V6V 2G9
Tel: 800 961.4477 or 604 273.5265 Fax: 604 270.0451

B. Proprietary Products: Xypex crystalline waterproofing materials as follows:
1. Xypex Concentrate
2. Xypex Patch'n' Plug
3. Xypex Megamix I
4. Xypex Megamix II
5. Xypex Xycrylic Admix
6. Xypex Gamma Cure

C. Source Quality: Obtain proprietary crystalline waterproofing products from a single manufacturer.

2.2 MIXES

A. General for Concentrate: Mix Xypex Concentrate waterproofing material by volume with clean water which is free from salt and deleterious materials. Mix waterproofing material in quantities that can be applied within 20 to 30 minutes from time of mixing. As mixture thickens, stir frequently, but do not add additional water. Do not mix bonding agents or admixtures with crystalline waterproofing materials unless specified in Manufacture's Product Data Sheets.

B. Brush Application Mix Concentrate: Measure dry powder and place in mixing container. Measure water and mix into the dry powder with a paddle on a slow speed electric drill (250 RPM) or other type mixer which is acceptable to manufacturer. Mixing proportions shall be as follows:

Coverage	Proportions (by Volume)
1.5 lb./sq. yd. (0.8 kg/m2)	5 powder to 2 water
2.0 lb./sq. yd. (1.0 kg/m2)	3 powder to 1 water

C. Spray Application Mix Concentrate: Mixing shall be same as specified for brush application except that mixture shall be thinner. Use following proportions as a guide only. Adjust proportions to match type of spray equipment and pressures used. Mixing proportions shall be as follows:

Coverage	Proportions (by Volume)
2 lb./sq. yd. (1.0 kg/m2)	5 powder to 3 water

D. Dry-Pac Mix Concentrate: Using a trowel, mix 1 part clean water with 6 parts Xypex Concentrate powder for 10 to 15 seconds. It is acceptable that lumps may be present in mixture. Mix only as much as can be applied in 15 minutes.

E. Mortar Mix Patch'n Plug: Using a trowel, mix 1 part clean water with 3.5 parts Xypex Patch'n Plug powder to a mortar consistency. Mix only as much as can be applied in 3 minutes.

F. Parge Mix Megamix I: Mixing liquid shall consist of 1 part Xypex Xycrylic Admix to 2 parts clean water. Using 1.4 gal of mixing liquid per 60 pound pail of Megamix I measure dry powder and place in mixing container. Measure liquid and mix 90% into the dry powder with a paddle on a slow speed electric drill (250 RPM) or other type mixer which is acceptable to manufacturer. Add additional liquid up to maximum as required. Mix to a creamy, uniform consistency.

G. Mortar Mix Megamix II: Using 0.9 gal of water per 55 pound bag of Megamix II measure dry powder and place in mixing container. Measure water and mix 90% into the dry powder with a paddle on a slow speed electric drill (250 RPM) or other type mixer which is acceptable to manufacturer. Add additional water up to maximum as required. Mix for 3 – 5 minutes to achieve uniform consistency. For increased waterproofness and improved bond, 1 part Xypex Xycrylic Admixture to 2 parts water may be substituted for water as the mixing liquid.

PART 3 – EXECUTION

3.1 EXAMINATION

A. Site Visit: Prior to waterproofing installation, arrange visit to project site with water-proofing manufacturer's representative. Representative shall inspect and certify that concrete surfaces are in acceptable condition to receive waterproofing treatment.

B. Verification of Substrates: Verify that concrete surfaces are sound and clean, and that any materials used to cure the concrete are compatible with waterproofing treatment.

C. Examination for Defects: Examine surfaces to be waterproofed for any holes and structural defects such as honeycombing, rock pockets, faulty construction joints and cracks. Special attention should be given to the condition of the mortar joints. Such defects to be repaired in accordance to manufacturer's product data and 3.02 below.

3.2 PREPARATION

A. Filling of Cores: Fill all cores and voids within the concrete wall or structure by pressure grouting using a Portland cement based grout with Xypex C-500 Admixture added to the mix, dosed at 3% by weight of cement.

For Standard and High Hydraulic Head Applications

A. Concrete Surface Finish: Concrete surfaces to receive waterproofing treatment shall have an open capillary system to provide tooth and suction, and shall be free from scale, excess form oil, laitance, curing compounds, paints, coating and foreign matter. If concrete had been previously coated, all coating must be removed including from the surface pores of the concrete.

B. Surface Preparation: Smooth surfaces or surfaces covered with excess form oil or other contaminants shall be pressure washed, lightly sand-blasted, water-blasted, or acid etched with muriatic acid as necessary to provide a clean absorbent surface. Surfaces to be acid-etched shall be saturated with water prior to application of acid.

C. Repair of Defects: The following procedures are meant for defects that do not have active water flow present. If defects have active water flow, modifications to the following procedures are required. Please contact Xypex Technical Services or your local Xypex representative for additional instructions. Surface defects shall be repaired in accordance with manufacturer's instructions as follows:

1. Mortar Joints: Remove all loose or unsound mortar down to sound material. Clean slot of debris and dust. Soak area with water and remove excess surface water.
   a. If there is no evidence of previous leaking - Refill joint to original depth with Xypex Patch'n' Plug or Xypex Concentrate Dry-Pac.
   b. If there is evident of previous leaking - Apply a slurry coat of Xypex Concentrate at the rate of 1.5 lb./sq. yd. (0.8 kg/m2) to the slot. Allow slurry to reach an initial set, then fill cavity to original level with Dry-Pac Concentrate. Compress tightly into cavity using pneumatic packer or block and hammer. Apply another slurry coat of Xypex Concentrate at a coverage rate of 1.5 lbs per sq.yd (0.8 kg/m2) to the repair area extending to 6 inches on either side. Cure by fog spraying periodically with water for 2 days or apply Xypex Gamma Cure immediately after the slurry coat has set.
2. Holes, cracks: Chip out defective areas in a "U" shaped slot 1" (25 mm) wide and 1.5" (37 mm) deep or as close to this depth a possible without breaking through to the CMU core. Clean slot of debris and dust. Soak area with water and remove excess surface water. Apply a slurry coat of Xypex Concentrate at the rate of 1.5 lb./sq. yd. (0.8 kg/m2) to the slot. Allow slurry to reach an initial set (usually 2 – 4 hours), then fill cavity with Dry-Pac Concentrate. Compress tightly into cavity using pneumatic packer or block and hammer. Apply another slurry coat of Xypex Concentrate at a coverage rate of 1.5 lbs./sq. yd (0.8 kg/m2) to the repair area extending to 6 inches on either side. Cure by fog spraying periodically with water for 2 days or apply Xypex Gamma Cure immediately after the slurry coat has set.
3. Other Defective Concrete: Rout out defective areas to sound concrete and remove loose materials. Soak area with water and remove excess surface water. Apply a slurry coat of Xypex Concentrate at the rate of 1.5 lb./sq. yd. (0.8 kg/m2) to area. Allow slurry to reach an

initial set, then fill cavity to surface level with Xypex Patch'n Plug or Megamix II repair mortars. Cure patch area as required.

D. Wetting Concrete: Prior to application of waterproofing treatment, thoroughly saturate concrete surfaces with clean water as required to ensure migration of crystalline chemicals into voids and capillary tracts of the concrete. Remove free surface water before application.

3.3 APPLICATION

A. Construction Joints at Existing Concrete Walls: Per 3.02 C these instructions are appropriate if there is no active water flow present. Rout out joint in "U" shaped slot 1" wide and 1.5" deep. Remove all loose material and saturate slot and surrounding areas with water. Allow water to soak in then remove all surface water. Apply a slurry coat of Xypex Concentrate at the rate of 1.5 lb./sq. yd. (0.8 kg/m2) to the slot. Allow slurry to reach an initial set, then fill cavity to original level with Dry-Pac Concentrate. Compress tightly into cavity using pneumatic packer or block and hammer. Apply another slurry coat of Xypex Concentrate at a coverage rate of 1.5 lbs./sq.yd (0.8 kg/m2) to the repair area extending to 6" on either side. Cure by fog spraying periodically with water for 2 days or apply Xypex Gamma Cure immediately after the slurry coat has set.

B. Surface Application: After repairs, surface preparation and treatment of construction joints have been completed in accordance with manufacturer's product data and as specified herein, apply Xypex treatment uniformly to concrete surfaces with semi-stiff bristle brush or broom, or suitable spray equipment. Application rates and locations shall be as indicated in the drawings and in accordance with manufacturer's product data. When brushing, work slurry well into surface of the concrete, filling surface pores and hairline cracks. When spraying, hold nozzle close enough to ensure that slurry is forced into pores and hairline cracks.

1. First Coat: Apply Xypex Concentrate slurry coat to locations indicated on drawings in accordance with manufacturer's product data at 2 lb./sq. yd. (1.0 kg/m2).

<u>For Standard Hydraulic Head Applications</u>

2. Second Coat: Apply Xypex Megamix I while first coat of Xypex Concentrate is still "green" but after it has reached an initial set, (best results obtained when applied between 12 and 24 hours) and no later than 24 hours after the application of Xypex Concentrate. Megamix I to be applied by brush, trowel or spray at 1/8" (3 mm) thickness. Use light prewatering between coats when rapid drying conditions exist to maintain a saturated surface dry substrate. Finish surface of Megamix I as desired.
   Note that Xypex Concentrate is to be cured between coats per standard curing procedures.

<u>For High Hydraulic Head Applications</u>

2. Second Coat: Apply Xypex Megamix II while first coat of Xypex Concentrate is still "green" but after it has reached an initial set, (best results obtained when applied between 12 and 24 hours) and no later than 24 hours after the application of Xypex Concentrate. Megamix II to be applied by trowel or spray at 1/2" – ¾"(13 mm – 19 mm) thickness. Use light prewatering between coats when rapid drying conditions exist to maintain a saturated surface dry substrate. Finish surface of Megamix II as desired.
   Note that Xypex Concentrate is to be cured between coats per standard curing procedures.

3.4 CURING

A. General:

If Megamix I Applied: Xypex Megamix I does not normally require any curing. In hot dry conditions where rapid moisture loss is expected curing is required. Begin curing 3 – 4 hours after Xypex coating has hardened. Wet cure Xypex treatment with a mist fog spray of clean water for 1 day, or cover treated surfaces with damp burlap for the prescribed period.

If Megamix II Applied: Begin curing as soon as Xypex coating has hardened sufficiently so as not to be damaged by a fine spray. Wet cure Xypex treatment with a mist fog spray of clean water for a minimum of 3 days, or cover treated surfaces with damp burlap for the prescribed period. If mix liquid used was Xycrylic/water blen allow mortar to dry for 3 – 4 hours after set before starting curing.

B. Air Circulation: Do not lay plastic sheeting directly on the waterproofing coating as air contact is required for proper curing. If poor circulation exists in treated areas, it may be necessary to provide fans or blown air to aid in curing of waterproofing treatment.

C. Protection: During the curing period, protect treated surfaces from damage by wind, sun, rain and temperatures below 36F (2C). If plastic sheeting is used for protection, it must be raised off the waterproofing coating to allow sufficient air circulation.

D. Curing Agent: For Megamix II if moist curing is not possible, use a chemical curing agent that is specifically designed for or compatible with the approved crystalline waterproofing treatment. Curing agent shall have at least two years of successful field use and shall be approved by waterproofing manufacturer in writing.

3.5 INTERFACE WITH OTHER MATERIALS

A. Backfilling: Do not backfill for 36 hours after application. If backfill takes place within three days after application, then backfill material shall be moist so as not to draw moisture from waterproof coating.

B. Paint, Epoxy or Similar Coatings: Do not apply paint or other coatings until waterproofing treatment has cured and dried for a minimum of 28 days. Follow surface preparation and substrate water content guidelines of the coatings manufacture. Washing the Xypex surface with a 3 - 5% muriatic acid solution is recommended before applying the coating.

C. Grout, Cement Parge Coat, Plaster or Stucco: Because the waterproof coating forms a relatively smooth surface and the resulting crystalline formation fills the concrete pores thereby reducing suction characteristics of the concrete, it may be necessary to use a suitable bonding agent for proper bonding of cementitious systems.

D. Responsibility to Ensure Compatibility: It shall be the responsibility of the installer of the surface-applied material that is to be applied over the Xypex waterproofing treatment, to take whatever measures are necessary, including testing, to ensure acceptance by or adhesion to the waterproofing treatment.

3.6 FIELD QUALITY CONTROL

A. Observation: Do not conceal installed waterproofing system before it has been observed by Architect/Engineer, waterproofing manufacturer's representative and other designated entities.

B. Flood Testing:
   1. Perform flood test on completed waterproofing installation before placement of other construction.
   2. Plug or dam drains and fill area with water to a depth of two inches (50 mm) or to within 0.5 inch (12.5 mm) of top of waterproofing treatment.
   3. Let water stand for 24 hours.
   4. If leaks are discovered, make repairs and repeat test until no leaks are observed.

3.7 CLEANING AND PROTECTION

A. Cleaning: Clean spillage and soiling from adjacent surfaces using appropriate cleaning agents and procedures.

B. Protection: Take measures to protect completed Xypex coating from damage afterapplication. Do not permit traffic on unprotected coating.

END OF SECTION 071616.2

SECTION 072500 - WEATHER BARRIERS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:
   1. Flexible flashing.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.
   1. For building wrap, include data on air and water-vapor permeance based on testing according to referenced standards.

1.4 INFORMATIONAL SUBMITTALS

A. Evaluation Reports: For water-resistive barrier and flexible flashing, from ICC-ES.

PART 2 - PRODUCTS

2.1 MISCELLANEOUS MATERIALS

A. Flexible Flashing: Composite, self-adhesive, flashing product consisting of a pliable, butyl rubber or rubberized-asphalt compound, bonded to a high-density polyethylene film, aluminum foil, or spunbonded polyolefin to produce an overall thickness of not less than 0.030 inch (0.8 mm).
   1. Products: Subject to compliance with requirements, provide one of the following:
      a. Hohmann & Barnard, Inc.; Mighty-Flash™ SA, Self-adhering stainless steel fabric flashing.
      b. Or equal manufacturer.

B. Primer for Flexible Flashing: Product recommended by manufacturer of flexible flashing for substrate.

C. Nails and Staples: ASTM F 1667.

PART 3 - EXECUTION

3.1 FLEXIBLE FLASHING INSTALLATION

A. Apply flexible flashing where indicated to comply with manufacturer's written instructions.
   1. Prime substrates as recommended by flashing manufacturer.
   2. Lap seams and junctures with other materials at least 4 inches (100 mm) except that at flashing flanges of other construction, laps need not exceed flange width.
   3. Lap flashing over water-resistive barrier at bottom and sides of openings.
   4. Lap water-resistive barrier over flashing at heads of openings.
   5. After flashing has been applied, roll surfaces with a hard rubber or metal roller to ensure that flashing is completely adhered to substrates.

END OF SECTION 072500

SECTION 072620 - SHEET METAL FLASHING AND TRIM

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section Includes:
   1. Manufactured through-wall flashing with counterflashing.
   2. Formed wall sheet metal fabrications.

B. Related Requirements:
   1. Section 072500 "Weather Barriers" for flexible flashing.

1.3 COORDINATION

A. Coordinate sheet metal flashing and trim layout and seams with sizes and locations of penetrations to be flashed, and joints and seams in adjacent materials.

B. Coordinate sheet metal flashing and trim installation with adjoining wall materials, joints, and seams to provide leakproof, secure, and noncorrosive installation.

1.4 PREINSTALLATION MEETINGS

A. Preinstallation Conference: Conduct conference at Project site.
   1. Review construction schedule. Verify availability of materials, Installer's personnel, equipment, and facilities needed to make progress and avoid delays.
   2. Review requirements for insurance and certificates if applicable.
   3. Review sheet metal flashing observation and repair procedures after flashing installation.

1.5 ACTION SUBMITTALS

A. Product Data: For each type of product.
   1. Include construction details, material descriptions, dimensions of individual components and profiles, and finishes for each manufactured product and accessory.

B. Shop Drawings: For sheet metal flashing and trim.
   1. Include plans, elevations, sections, and attachment details.
   2. Detail fabrication and installation layouts, expansion-joint locations, and keyed details. Distinguish between shop- and field-assembled work.
   3. Include identification of material, thickness, weight, and finish for each item and location in Project.
   4. Include details for forming, including profiles, shapes, seams, and dimensions.
   5. Include details for joining, supporting, and securing, including layout and spacing of fasteners, cleats, clips, and other attachments. Include pattern of seams.
   6. Include details of termination points and assemblies.
   7. Include details of expansion joints and expansion-joint covers, including showing direction of expansion and contraction from fixed points.
   8. Include details of special conditions.
   9. Include details of connections to adjoining work.
   10. Detail formed flashing and trim at scale of not less than 3 inches per 12 inches (1:5).

C. Samples for Initial Selection: For each type of sheet metal and accessory indicated with factory-applied finishes.

D. Samples for Verification: For each type of exposed finish.
   1. Sheet Metal Flashing: 12 inches (300 mm) long by actual width of unit, including finished seam and in required profile. Include fasteners, cleats, clips, closures, and other attachments.
   2. Trim, Metal Closures, Expansion Joints, Joint Intersections, and Miscellaneous Fabrications: 12 inches (300 mm) long and in required profile. Include fasteners and other exposed accessories.
   3. Unit-Type Accessories and Miscellaneous Materials: Full-size Sample.

1.6 INFORMATIONAL SUBMITTALS

A. Qualification Data: For fabricator.
B. Product Test Reports: For each product, for tests performed by a qualified testing agency.
C. Sample Warranty: For special warranty.

1.7 CLOSEOUT SUBMITTALS

A. Maintenance Data: For sheet metal flashing and trim, and its accessories, to include in maintenance manuals.

1.8 QUALITY ASSURANCE

A. Fabricator Qualifications: Employs skilled workers who custom fabricate sheet metal flashing and trim similar to that required for this Project and whose products have a record of successful in-service performance.
B. Mockups: Build mockups to verify selections made under Sample submittals, to demonstrate aesthetic effects, and to set quality standards for fabrication and installation.
   1. Build mockup of typical flashing pieces indicated on drawings.
   2. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
   3. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.9 DELIVERY, STORAGE, AND HANDLING

A. Do not store sheet metal flashing and trim materials in contact with other materials that might cause staining, denting, or other surface damage. Store sheet metal flashing and trim materials away from uncured concrete and masonry.
B. Protect strippable protective covering on sheet metal flashing and trim from exposure to sunlight and high humidity, except to extent necessary for period of sheet metal flashing and trim installation.

1.10 WARRANTY

A. Special Warranty on Finishes: Manufacturer agrees to repair finish or replace sheet metal flashing and trim that shows evidence of deterioration of factory-applied finishes within specified warranty period.
   1. Exposed Panel Finish: Deterioration includes, but is not limited to, the following:
      a. Color fading more than 5 Hunter units when tested according to ASTM D 2244.
      b. Chalking in excess of a No. 8 rating when tested according to ASTM D 4214.
      c. Cracking, checking, peeling, or failure of paint to adhere to bare metal.
   2. Finish Warranty Period: 10 years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 PERFORMANCE REQUIREMENTS

A. General: Sheet metal flashing and trim assemblies shall withstand wind loads, structural movement, thermally induced movement, and exposure to weather without failure due to defective manufacture, fabrication, installation, or other defects in construction. Completed sheet metal flashing and trim shall not rattle, leak, or loosen, and shall remain watertight.

B. Sheet Metal Standard for Flashing and Trim: Comply with NRCA's "The NRCA Roofing Manual" and SMACNA's "Architectural Sheet Metal Manual" requirements for dimensions and profiles shown unless more stringent requirements are indicated.

C. Thermal Movements: Allow for thermal movements from ambient and surface temperature changes to prevent buckling, opening of joints, overstressing of components, failure of joint sealants, failure of connections, and other detrimental effects. Base calculations on surface temperatures of materials due to both solar heat gain and nighttime-sky heat loss.
   1. Temperature Change: 120 deg F (67 deg C), ambient; 180 deg F (100 deg C), material surfaces.

2.2 SHEET METALS

A. General: Protect mechanical and other finishes on exposed surfaces from damage by applying strippable, temporary protective film before shipping.

B. Stainless-Steel Sheet: ASTM A 240/A 240M or ASTM A 666, Type 304, dead soft, fully annealed; with smooth, flat surface.
   1. Finish: 2D (dull, cold rolled).

2.3 MISCELLANEOUS MATERIALS

A. General: Provide materials and types of fasteners, solder, protective coatings, sealants, and other miscellaneous items as required for complete sheet metal flashing and trim installation and as recommended by manufacturer of primary sheet metal or manufactured item unless otherwise indicated.

B. Fasteners: Wood screws, annular threaded nails, self-tapping screws, self-locking rivets and bolts, and other suitable fasteners designed to withstand design loads and recommended by manufacturer of primary sheet metal or manufactured item.
   1. General: Blind fasteners or self-drilling screws, gasketed, with hex-washer head.
      a. Blind Fasteners: High-strength aluminum or stainless-steel rivets suitable for metal being fastened.
   2. Fasteners for Aluminum Sheet: Aluminum or Series 300 stainless steel.
   3. Fasteners for Stainless-Steel Sheet: Series 300 stainless steel.

C. Solder:
   1. For Stainless Steel: ASTM B 32, Grade Sn60, with acid flux of type recommended by stainless-steel sheet manufacturer.

D. Sealant Tape: Pressure-sensitive, 100 percent solids, polyisobutylene compound sealant tape with release-paper backing. Provide permanently elastic, nonsag, nontoxic, nonstaining tape 1/2 inch (13 mm) wide and 1/8 inch (3 mm) thick.

E. Elastomeric Sealant: ASTM C 920, elastomeric polyurethane and silicone polymer sealant; of type, grade, class, and use classifications required to seal joints in sheet metal flashing and trim and remain watertight.

F. Butyl Sealant: ASTM C 1311, single-component, solvent-release butyl rubber sealant; polyisobutylene plasticized; heavy bodied for hooked-type expansion joints with limited movement.

G. Epoxy Seam Sealer: Two-part, noncorrosive, aluminum seam-cementing compound, recommended by aluminum manufacturer for exterior nonmoving joints, including riveted joints.

H. Bituminous Coating: Cold-applied asphalt emulsion according to ASTM D 1187.

I. Asphalt Roofing Cement: ASTM D 4586, asbestos free, of consistency required for application.

2.4 FABRICATION, GENERAL

A. General: Custom fabricate sheet metal flashing and trim to comply with details shown and recommendations in cited sheet metal standard that apply to design, dimensions, geometry, metal thickness, and other characteristics of item required. Fabricate sheet metal flashing and trim in shop to greatest extent possible.
   1. Fabricate sheet metal flashing and trim in thickness or weight needed to comply with performance requirements, but not less than that specified for each application and metal.
   2. Obtain field measurements for accurate fit before shop fabrication.
   3. Form sheet metal flashing and trim to fit substrates without excessive oil canning, buckling, and tool marks; true to line, levels, and slopes; and with exposed edges folded back to form hems.
   4. Conceal fasteners and expansion provisions where possible. Do not use exposed fasteners on faces exposed to view.

B. Fabrication Tolerances: Fabricate sheet metal flashing and trim that is capable of installation to a tolerance of 1/4 inch in 20 feet (6 mm in 6 m) on slope and location lines indicated on Drawings and within 1/8-inch (3-mm) offset of adjoining faces and of alignment of matching profiles.

C. Fabrication Tolerances: Fabricate sheet metal flashing and trim that is capable of installation to tolerances specified in MCA's "Guide Specification for Residential Metal Roofing."

D. Expansion Provisions: Form metal for thermal expansion of exposed flashing and trim.
   1. Form expansion joints of intermeshing hooked flanges, not less than 1 inch (25 mm) deep, filled with butyl sealant concealed within joints.
   2. Use lapped expansion joints only where indicated on Drawings.

E. Sealant Joints: Where movable, nonexpansion-type joints are required, form metal to provide for proper installation of elastomeric sealant according to cited sheet metal standard.

F. Fabricate cleats and attachment devices from same material as accessory being anchored or from compatible, noncorrosive metal.

G. Fabricate cleats and attachment devices of sizes as recommended by cited sheet metal standard and by FM Global Property Loss Prevention Data Sheet 1-49 for application, but not less than thickness of metal being secured.

H. Seams: Fabricate nonmoving seams with flat-lock seams. Tin edges to be seamed, form seams, and solder.

I. Seams for Aluminum: Fabricate nonmoving seams with flat-lock seams. Form seams and seal with epoxy seam sealer. Rivet joints where necessary for strength.

J. Do not use graphite pencils to mark metal surfaces.

2.5 WALL SHEET METAL FABRICATIONS

A. Through-Wall Flashing: Fabricate continuous flashings in minimum 96-inch- (2400-mm-) long, but not exceeding 12-foot- (3.6-m-) long, sections, at shelf angles. Fabricate discontinuous lintel, sill, and similar flashings to extend 6 inches (150 mm) beyond each side of wall openings; and form with 2-inch- (50-mm-) high, end dams. Fabricate from the following materials:
   1. Stainless Steel: 26 gauge thick.

B. Opening Flashings in Frame Construction: Fabricate head, and similar flashings to extend 4 inches (100 mm) beyond wall openings. Form head and sill flashing with 2-inch- (50-mm-) high, end dams. Fabricate from the following materials:
   1. Aluminum: 0.040 inch thick.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates, areas, and conditions, with Installer present, for compliance with requirements for installation tolerances, substrate, and other conditions affecting performance of the Work.
   1. Verify compliance with requirements for installation tolerances of substrates.
   2. Verify that substrate is sound, dry, smooth, clean, sloped for drainage, and securely anchored.

3. Verify that air- or water-resistant barriers have been installed over sheathing or backing substrate to prevent air infiltration or water penetration.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 INSTALLATION, GENERAL

A. General: Anchor sheet metal flashing and trim and other components of the Work securely in place, with provisions for thermal and structural movement. Use fasteners, solder, protective coatings, separators, sealants, and other miscellaneous items as required to complete sheet metal flashing and trim system.
1. Install sheet metal flashing and trim true to line, levels, and slopes. Provide uniform, neat seams with minimum exposure of solder, welds, and sealant.
2. Install sheet metal flashing and trim to fit substrates and to result in watertight performance. Verify shapes and dimensions of surfaces to be covered before fabricating sheet metal.
3. Space cleats not more than 12 inches (300 mm) apart. Attach each cleat with at least two fasteners. Bend tabs over fasteners.
4. Install exposed sheet metal flashing and trim with limited oil canning, and free of buckling and tool marks.
5. Torch cutting of sheet metal flashing and trim is not permitted.
6. Do not use graphite pencils to mark metal surfaces.

B. Metal Protection: Where dissimilar metals contact each other, or where metal contacts pressure-treated wood or other corrosive substrates, protect against galvanic action or corrosion by painting contact surfaces with bituminous coating or by other permanent separation as recommended by sheet metal manufacturer or cited sheet metal standard.
1. Coat concealed side of uncoated-aluminum and stainless-steel sheet metal flashing and trim with bituminous coating where flashing and trim contact wood, ferrous metal, or cementitious construction.
2. Underlayment: Where installing sheet metal flashing and trim directly on cementitious or wood substrates, install underlayment and cover with slip sheet.

C. Expansion Provisions: Provide for thermal expansion of exposed flashing and trim. Space movement joints at maximum of 10 feet (3 m) with no joints within 24 inches (600 mm) of corner or intersection.
1. Form expansion joints of intermeshing hooked flanges, not less than 1 inch (25 mm) deep, filled with sealant concealed within joints.
2. Use lapped expansion joints only where indicated on Drawings.

D. Fasteners: Use fastener sizes that penetrate substrate not less than recommended by fastener manufacturer to achieve maximum pull-out resistance.

E. Conceal fasteners and expansion provisions where possible in exposed work and locate to minimize possibility of leakage. Cover and seal fasteners and anchors as required for a tight installation.

F. Seal joints as required for watertight construction.
1. Use sealant-filled joints unless otherwise indicated. Embed hooked flanges of joint members not less than 1 inch (25 mm) into sealant. Form joints to completely conceal sealant. When ambient temperature at time of installation is between 40 and 70 deg F (4 and 21 deg C), set joint members for 50 percent movement each way. Adjust setting proportionately for installation at higher ambient temperatures. Do not install sealant-type joints at temperatures below 40 deg F (4 deg C).
2. Prepare joints and apply sealants to comply with requirements in Section 07920 "Joint Sealants."

G. Soldered Joints: Clean surfaces to be soldered, removing oils and foreign matter. Pre-tin edges of sheets with solder to width of 1-1/2 inches (38 mm); however, reduce pre-tinning where pre-tinned surface would show in completed Work.
1. Do not solder aluminum sheet.
2. Do not use torches for soldering.
3. Heat surfaces to receive solder, and flow solder into joint. Fill joint completely. Completely remove flux and spatter from exposed surfaces.
4. Stainless-Steel Soldering: Tin edges of uncoated sheets, using solder for stainless steel and acid flux. Promptly remove acid flux residue from metal after tinning and soldering. Comply with solder manufacturer's recommended methods for cleaning and neutralization.

H. Rivets: Rivet joints in uncoated aluminum where necessary for strength.

3.3 WALL FLASHING INSTALLATION

A. General: Install sheet metal wall flashing to intercept and exclude penetrating moisture according to cited sheet metal standard unless otherwise indicated. Coordinate installation of wall flashing with installation of wall-opening components such as windows, doors, and louvers.
B. Opening Flashings in Frame Construction: Install continuous head, and similar flashings to extend 4 inches (100 mm) beyond wall openings.

3.4 ERECTION TOLERANCES

A. Installation Tolerances: Shim and align sheet metal flashing and trim within installed tolerance of 1/4 inch in 20 feet (6 mm in 6 m) on slope and location lines indicated on Drawings and within 1/8-inch (3-mm) offset of adjoining faces and of alignment of matching profiles.
B. Installation Tolerances: Shim and align sheet metal flashing and trim within installed tolerances specified in MCA's "Guide Specification for Residential Metal Roofing."

3.5 CLEANING AND PROTECTION

A. Clean exposed metal surfaces of substances that interfere with uniform oxidation and weathering.
B. Clean and neutralize flux materials. Clean off excess solder.
C. Clean off excess sealants.
D. Remove temporary protective coverings and strippable films as sheet metal flashing and trim are installed unless otherwise indicated in manufacturer's written installation instructions. On completion of sheet metal flashing and trim installation, remove unused materials and clean finished surfaces as recommended by sheet metal flashing and trim manufacturer. Maintain sheet metal flashing and trim in clean condition during construction.
E. Replace sheet metal flashing and trim that have been damaged or that have deteriorated beyond successful repair by finish touchup or similar minor repair procedures.

END OF SECTION 07620

SECTION 079200 - JOINT SEALANTS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
1. Silicone joint sealants.
2. Joint sealant backer rod.

1.2 PRECONSTRUCTION TESTING

A. Preconstruction Compatibility and Adhesion Testing: Submit to joint-sealant manufacturers six samples of materials that will contact or affect joint sealants.
1. Use ASTM C 1087 or manufacturer's standard test method to determine whether priming and other specific joint preparation techniques are required to obtain rapid, optimum adhesion of joint sealants to joint substrates.
2. Submit not fewer than six pieces of each type of material, including joint substrates, shims, joint-sealant backings, secondary seals, and miscellaneous materials.
3. Schedule sufficient time for testing and analyzing results to prevent delaying the Work.
4. For materials failing tests, obtain joint-sealant manufacturer's written instructions for corrective measures including use of specially formulated primers.
5. Testing will not be required if joint-sealant manufacturers submit joint preparation data that are based on previous testing of current sealant products for adhesion to, and compatibility with, joint substrates and other materials matching those submitted.

B. Preconstruction Field-Adhesion Testing: Before installing sealants, field test their adhesion to Project joint substrates as follows:
1. Locate test joints where indicated on Project or, if not indicated, as directed by Architect.
2. Conduct field tests for each application indicated below:
a. Each type of elastomeric sealant and joint substrate indicated.
b. Each type of nonelastomeric sealant and joint substrate indicated.
3. Notify Architect seven days in advance of dates and times when test joints will be erected.
a. Test Method: Test joint sealants according to Method A, Field-Applied Sealant Joint Hand Pull Tab, in Appendix X1 in ASTM C 1193.
1) For joints with dissimilar substrates, verify adhesion to each substrate separately; extend cut along one side, verifying adhesion to opposite side. Repeat procedure for opposite side.
4. Report whether sealant in joint connected to pulled-out portion failed to adhere to joint substrates or tore cohesively. Include data on pull distance used to test each type of product and joint substrate. For sealants that fail adhesively, retest until satisfactory adhesion is obtained.
5. Evaluation of Preconstruction Field-Adhesion-Test Results: Sealants not evidencing adhesive failure from testing, in absence of other indications of noncompliance with requirements, will be considered satisfactory. Do not use sealants that fail to adhere to joint substrates during testing.

1.3 ACTION SUBMITTALS

A. Product Data: For each joint-sealant product indicated.

B. Samples: For each kind and color of joint sealant required.

C. Joint-Sealant Schedule: Include the following information:
1. Joint-sealant application, joint location, and designation.
2. Joint-sealant manufacturer and product name.
3. Joint-sealant formulation.
4. Joint-sealant color.

1.4 INFORMATIONAL SUBMITTALS

A. Product test reports.

B. Preconstruction compatibility and adhesion test reports.

C. Preconstruction field-adhesion test reports.

D. Field-adhesion test reports.

E. Warranties.

1.5 QUALITY ASSURANCE

A. Testing Agency Qualifications: Qualified according to ASTM C 1021 to conduct the testing indicated.

B. Preinstallation Conference: Conduct conference at Project site.

C. Mockups: Build mockups incorporating sealant joints, as follows, to verify selections made under sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution:
   1. Joints in mockups of assemblies specified in other Sections that are indicated to receive elastomeric joint sealants, which are specified by reference to this Section.

1.6 PROJECT CONDITIONS

A. Do not proceed with installation of joint sealants under the following conditions:
   1. When ambient and substrate temperature conditions are outside limits permitted by joint-sealant manufacturer.
   2. When joint substrates are wet.
   3. Where joint widths are less than those allowed by joint-sealant manufacturer for applications indicated.
   4. Contaminants capable of interfering with adhesion have not yet been removed from joint substrates.

1.7 WARRANTY

A. Special Installer's Warranty: Manufacturer's standard form in which Installer agrees to repair or replace joint sealants that do not comply with performance and other requirements specified in this Section within specified warranty period.
   1. Warranty Period: Two years from date of Substantial Completion.

B. Special Manufacturer's Warranty: Manufacturer's standard form in which joint-sealant manufacturer agrees to furnish joint sealants to repair or replace those that do not comply with performance and other requirements specified in this Section within specified warranty period.
   1. Warranty Period: 5 years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MATERIALS, GENERAL

A. VOC Content of Interior Sealants: Sealants and sealant primers used inside the weatherproofing system shall comply with the following limits for VOC content when calculated according to 40 CFR 59, Subpart D (EPA Method 24):
   1. Architectural Sealants: 250 g/L.
   2. Sealant Primers for Nonporous Substrates: 250 g/L.
   3. Sealant Primers for Porous Substrates: 775 g/L.

B. Liquid-Applied Joint Sealants: Comply with ASTM C 920 and other requirements indicated for each liquid-applied joint sealant specified, including those referencing ASTM C 920 classifications for type, grade, class, and uses related to exposure and joint substrates.

C. Stain-Test-Response Characteristics: Where sealants are specified to be nonstaining to porous substrates, provide products that have undergone testing according to ASTM C 1248 and have not stained porous joint substrates indicated for Project.

D. Suitability for Immersion in Liquids. Where elastomeric sealants are indicated for Use I for joints that will be continuously immersed in liquids, provide products that have undergone testing according to ASTM C 1247 and qualify for the length of exposure indicated by reference to ASTM C 920 for Class 1 or 2. Liquid used for testing sealants is deionized water, unless otherwise indicated.

2.2 SILICONE JOINT SEALANTS

A. Medium Modulus Silicone Joint Sealant **(Sealant A)** ASTM C-920 and ASTM C-1248.
1. Subject to compliance with requirements, provide one of the following:
a. 756 SMS, by Dow Corning, Midland, MI
2. Type: One-part, moisture-cure silicone; oxime cure system.
3. Grade: nonsag (NS)
4. Color: Sandstone at the Mankato stone panels and all other locations as selected by Architect from manufacturer's full range of standard colors.
5. Application: Joints within aluminum frame systems, exterior masonry joints and where indicated.

2.3 JOINT SEALANT BACKING

A. Cylindrical Sealant Backings: ASTM C 1330, Type C (closed-cell material with a surface skin) Type O (open-cell material) Type B (bicellular material with a surface skin) or any of the preceding types, as approved in writing by joint-sealant manufacturer for joint application indicated, and of size and density to control sealant depth and otherwise contribute to producing optimum sealant performance.

B. Bond-Breaker Tape: Polyethylene tape or other plastic tape recommended by sealant manufacturer.

2.4 MISCELLANEOUS MATERIALS

A. Primer: Material recommended by joint-sealant manufacturer where required for adhesion of sealant to joint substrates indicated, as determined from preconstruction joint-sealant-substrate tests and field tests.

B. Cleaners for Nonporous Surfaces: Chemical cleaners acceptable to manufacturers of sealants and sealant backing materials.

C. Masking Tape: Nonstaining, nonabsorbent material compatible with joint sealants and surfaces adjacent to joints.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine joints indicated to receive joint sealants, with Installer present, for compliance with requirements for joint configuration, installation tolerances, and other conditions affecting joint-sealant performance.

B. Proceed with installation only after unsatisfactory conditions have been corrected.

3.2 PREPARATION

A. Surface Cleaning of Joints: Clean out joints immediately before installing joint sealants to comply with joint-sealant manufacturer's written instructions.
1. Remove laitance and form-release agents from concrete.
2. Clean nonporous joint substrate surfaces with chemical cleaners or other means that do not stain, harm substrates, or leave residues capable of interfering with adhesion of joint sealants.

B. Joint Priming: Prime joint substrates where recommended by joint-sealant manufacturer or as indicated by preconstruction joint-sealant-substrate tests or prior experience. Apply primer to comply with joint-sealant

manufacturer's written instructions. Confine primers to areas of joint-sealant bond; do not allow spillage or migration onto adjoining surfaces.

C. Masking Tape: Use masking tape where required to prevent contact of sealant or primer with adjoining surfaces that otherwise would be permanently stained or damaged by such contact or by cleaning methods required to remove sealant smears. Remove tape immediately after tooling without disturbing joint seal.

3.3 INSTALLATION

A. General: Comply with joint-sealant manufacturer's written installation instructions for products and applications indicated, unless more stringent requirements apply.

B. Sealant Installation Standard: Comply with recommendations in ASTM C 1193 for use of joint sealants as applicable to materials, applications, and conditions indicated.

C. Install sealant backings of kind indicated to support sealants during application and at position required to produce cross-sectional shapes and depths of installed sealants relative to joint widths that allow optimum sealant movement capability.
1. Do not leave gaps between ends of sealant backings.
2. Do not stretch, twist, puncture, or tear sealant backings.
3. Remove absorbent sealant backings that have become wet before sealant application and replace them with dry materials.

D. Install bond-breaker tape behind sealants where sealant backings are not used between sealants and backs of joints.

E. Install sealants using proven techniques that comply with the following and at the same time backings are installed:
1. Place sealants so they directly contact and fully wet joint substrates.
2. Completely fill recesses in each joint configuration.
3. Produce uniform, cross-sectional shapes and depths relative to joint widths that allow optimum sealant movement capability.

F. Tooling of Nonsag Sealants: Immediately after sealant application and before skinning or curing begins, tool sealants according to requirements specified in subparagraphs below to form smooth, uniform beads of configuration indicated; to eliminate air pockets; and to ensure contact and adhesion of sealant with sides of joint.
1. Remove excess sealant from surfaces adjacent to joints.
2. Use tooling agents that are approved in writing by sealant manufacturer and that do not discolor sealants or adjacent surfaces.
3. Provide concave joint profile per Figure 8A in ASTM C 1193, unless otherwise indicated.

G. Clean off excess sealant or sealant smears adjacent to joints as the Work progresses by methods and with cleaning materials approved in writing by manufacturers of joint sealants and of products in which joints occur.

3.4 JOINT-SEALANT SCHEDULE

A. Joint-Sealant Application: Silicone **(Sealant A)**
1. Joint Locations:
   a. Joints between window frame pieces.
   b. Joints between metal panels.
   c. Joints in glass.
   d. Joints in metal sills.
   e. Control and expansion joints in unit masonry.
   f. Joints between different materials.
   g. Perimeter joints between materials and frames of doors, windows, and louvers.
   h. Other joints as indicated.

END OF SECTION 079200

SECTION 099600 - HIGH-PERFORMANCE COATINGS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 1 Specification Sections, apply to this Section.

1.2 SUMMARY

A. This Section includes surface preparation and field application of high-performance coating systems to existing window lintels and shelf angles.

1.3 DEFINITIONS

A. Standard coating terms defined in ASTM D 16 apply to this Section.

1.4 SUBMITTALS

A. Product Data: For each coating system indicated.
   1. Material List: An inclusive list of required coating materials. Indicate each material and cross-reference the specific coating, finish system, and application. Identify each material by manufacturer's catalog number and general classification.
   2. Manufacturer's Information: Manufacturer's technical information, including label analysis and instructions for handling, storing, and applying each material specified.

B. Certification by manufacturer that products supplied comply with requirements indicated that limit the amount of VOCs in coating products.

C. Samples for Initial Selection: Manufacturer's color charts showing the full range of colors available for each type of finish-coat material indicated.
   1. After color selection, Architect will furnish color chips for surfaces to be coated.

D. Samples for Verification: For each color and material to be applied, with texture to simulate actual conditions, on representative samples of the actual substrate.

1.5 QUALITY ASSURANCE

A. Applicator Qualifications: Engage an experienced applicator who has completed high-performance coating system applications similar in material and extent to those indicated for Project and whose work has a record of successful in-service performance.

B. Source Limitations: Obtain primers and undercoat materials for each coating system from the same manufacturer as the finish coats.

C. Benchmark Samples (Mockups): Provide a full-coat benchmark finish sample of each type of coating and substrate required. Comply with procedures specified in PDCA P5. Duplicate finish of approved sample Submittals.
   1. Final approval of colors will be from benchmark samples.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver materials to Project site in manufacturer's original, unopened packages and containers bearing manufacturer's name and label with the following information:
   1. Name or title of material.
   2. Product description (generic classification or binder type).
   3. Manufacturer's stock number and date of manufacture.
   4. Contents by volume, for pigment and vehicle constituents.
   5. Thinning instructions.

6. Application instructions.
7. Color name and number.
8. Handling instructions and precautions.

B. Store materials not in use in tightly covered containers in a well-ventilated area at a minimum ambient temperature of 45 deg F. Maintain containers used in storage in a clean condition, free of foreign materials and residue.
   1. Keep storage area neat and orderly. Remove oily rags and waste daily. Take necessary measures to ensure that workers and work areas are protected from fire and health hazards resulting from handling, mixing, and applying coatings.

1.7 PROJECT CONDITIONS

A. Apply coatings only when temperature of surfaces to be coated and surrounding air temperatures are between 45 and 95 deg F.

B. Do not apply coatings in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures less than 5 deg F above the dew point; or to damp or wet surfaces.
   1. Allow wet surfaces to dry thoroughly and attain temperature and conditions specified before proceeding with or continuing coating operation.
   2. Work may continue during inclement weather only if areas and surfaces to be coated are enclosed and temperature within the area can be maintained within limits specified by manufacturer during application and drying periods.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Products: Subject to compliance with requirements, provide one the product indicated in the coating system descriptions.

B. Manufacturers' Names: The following manufacturer is referred to in the coating system descriptions by shortened versions of their names shown in parenthesis:
   1. ICI Devoe High Performance Coatings (Devoe).

2.2 COATINGS MATERIALS, GENERAL

A. Material Compatibility: Provide primers, undercoats, and finish-coat materials that are compatible with one another and substrates indicated under conditions of service and application, as demonstrated by manufacturer based on testing and field experience.

B. Material Quality: Provide manufacturer's highest grade of the various high-performance coatings specified. Materials not displaying manufacturer's product identification are not acceptable.
   1. Proprietary Names: Use of manufacturer's proprietary product names to designate colors or materials is not intended to imply that products named are required to be used to the exclusion of equivalent products of other manufacturers. Furnish manufacturer's material data and certificates of performance for proposed substitutions.

C. VOC Classification: Provide high-performance coating materials, including primers, undercoats, and finish-coat materials, that have a VOC classification of 450 g/L or less.

2.3 COLORS

A. Colors: As selected by Architect from manufacturer's full range.

2.4 EXTERIOR HIGH-PERFORMANCE COATING SYSTEMS

A. Product:
   1. Bar-Rust 235; Devoe High Performance Coatings (to be used at concealed locations.)
   2. Devthane 378 Aliphatic Urethane Semi-Gloss; Devoe High Performance Coatings (to be used at exposed locations.)
B. Description: High performance, multi-purpose, surface tolerant, two-component chemically-cured epoxy semi-gloss coating.
   1. Exceptional corrosion protection.
   2. Suitable for salt and fresh water immersion.
   3. Low temperature cure to 0 degrees F.
C. Cleanup Solvent: As recommended per manufacturer, T-10 Thinner.
D. Recommended Film Thickness: As recommended per manufacturer, 4 to 8 mils dry and 5.9 to 11.7 mils wet.
E. Remove paint and rust by sand blast or chemical stripper as recommended by finish manufacturer.
F. Provide finish coats as recommend per finish manufacturer.

PART 3 - EXECUTION

3.1 EXAMINATION

A. With Applicator present, examine substrates and conditions under which high-performance coatings will be applied, for compliance with coating application requirements.
   1. Apply coatings only after unsatisfactory conditions have been corrected and surfaces to receive coatings are thoroughly dry.
   2. Start of application is construed as Applicator's acceptance of surfaces within that particular area.
B. Coordination of Work: Review other Sections in which primers or other coatings are provided to ensure compatibility of total systems for various substrates. On request, furnish information on characteristics of specified finish materials to ensure compatible primers.
   1. If a potential incompatibility of primers applied by others exists, obtain the following from the primer Applicator before proceeding:
      a. Confirmation of primer's suitability for expected service conditions.
      b. Confirmation of primer's ability to be top coated with materials specified.
   2. Notify Architect about anticipated problems before using the coatings specified over substrates primed by others.

3.2 PREPARATION

A. Cleaning: Before applying high-performance coatings, clean substrates of substances that could impair bond of coatings.
   1. Schedule cleaning and coating application so dust and other contaminates from cleaning process will not fall on wet, newly coated surfaces.
B. Surface Preparation: Clean and prepare surfaces to be coated according to manufacturer's written instructions for each substrate condition and as specified.
   1. Use abrasive non-blast-cleaning methods to remove deleterious matter on steel surfaces.
   2. Provide barrier coats over incompatible primers or remove primers and reprime substrate.
   3. Ferrous-Metal Substrates: Clean ferrous-metal surfaces that have not been shop coated; remove oil, grease, dirt, loose mill scale, and other foreign substances. Use solvent or mechanical cleaning methods that comply with SSPC recommendations.
      a. Clean steel surfaces as recommended by coating manufacturer and according to SSPC-SP 10/NACE No. 2.
      b. Clean galvanized surfaces as recommended by coating manufacturer and according to SSPC-SP-1.
C. Material Preparation: Carefully mix and prepare coating materials according to manufacturer's written instructions.

1. Maintain containers used in mixing and applying coatings in a clean condition, free of foreign materials and residue.
2. Stir materials before applying to produce a mixture of uniform density. Stir as required during application. Do not stir surface film into the material. Remove film and, if necessary, strain coating material before using.
3. Use only the type of thinners approved by manufacturer and only within recommended limits.

D. Tint each undercoat a lighter shade to facilitate identification of each coat if multiple coats of the same material are to be applied. Tint undercoats to match color of finish coat, but provide sufficient difference in shade of undercoats to distinguish each separate coat.

3.3 APPLICATION

A. General: Apply high-performance coatings according to manufacturer's written instructions.
1. Use applicators and techniques best suited for the material being applied.
2. Do not apply high-performance coatings over dirt, rust, scale, grease, moisture, scuffed surfaces, or conditions detrimental to forming a durable coating film.
3. Coating colors, surface treatments, and finishes are indicated in the coating system descriptions.
4. Provide finish coats compatible with primers used.
5. The term "exposed surfaces" includes areas visible when permanent steel items are exposed after installation. Extend coatings in these areas to maintain system integrity and provide desired protection.

3.4 CLEANING

A. Cleanup: At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.
1. After completing coating application, clean spattered surfaces. Remove spattered coatings by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.

3.5 PROTECTION

A. Protect work of other trades, whether being coated or not, against damage from coating operation. Correct damage by cleaning, repairing, replacing, and recoating, as approved by Architect, and leave in an undamaged condition.
1. Provide "Wet Paint" signs to protect newly coated finishes. After completing coating operations, remove temporary protective wrappings provided by others to protect their work.
2. At completion of construction activities of other trades, touch up and restore damaged or defaced coated surfaces. Comply with procedures specified in PDCA P1.

END OF SECTION 09960

SECTION 099653 - ELASTOMERIC COATINGS

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section includes surface preparation and application of elastomeric coatings to the following exterior substrates:
   1. Concrete.
   2. Concrete unit masonry.

1.3 ACTION SUBMITTALS

A. Product Data: For each type of product.
   1. Include printout of current "MPI Approved Products List" for each product category specified, with the proposed product highlighted.
   2. Indicate VOC content.

B. Samples for Initial Selection: For each type of elastomeric coating.

C. Samples for Verification: For each type of elastomeric coating indicated and in each color and gloss.
   1. Submit Samples on same type of substrate as that to receive application, 8 inches (200-mm) square.
   2. Apply coats on Samples in steps to show each separate coat, including primers and block fillers as applicable.
   3. Label each coat of each Sample.
   4. Label each Sample for location and application area.

D. Product List: Cross-reference to paint system and locations of application areas. Use same designations indicated on Drawings and in schedules. Include color designations.

1.4 QUALITY ASSURANCE

A. Mockups: Apply mockups of each paint system indicated and each color and finish selected to verify preliminary selections made under Sample submittals and to demonstrate aesthetic effects and set quality standards for materials and execution.
   1. Architect will select one surface to represent surfaces and conditions for application of each paint system.
      a. Vertical and Horizontal Surfaces: Provide samples of at least 100 sq. ft (9 sq. m).
      b. Other Items: Architect will designate items or areas required.
   2. Final approval of color selections will be based on mockups.
      a. If preliminary color selections are not approved, apply additional mockups of additional colors selected by Architect at no added cost to Owner.
   3. Approval of mockups does not constitute approval of deviations from the Contract Documents contained in mockups unless Architect specifically approves such deviations in writing.
   4. Subject to compliance with requirements, approved mockups may become part of the completed Work if undisturbed at time of Substantial Completion.

1.5 DELIVERY, STORAGE, AND HANDLING

A. Store materials not in use in tightly covered containers in well-ventilated areas with ambient temperatures continuously maintained at not less than 45 deg F (7 deg C).
   1. Maintain containers in clean condition, free of foreign materials and residue.
   2. Remove rags and waste from storage areas daily.

1.6 FIELD CONDITIONS

A. Apply coatings only when temperature of surfaces to be coated and ambient air temperatures are between 50 and 90 deg F (10 and 32 deg C) unless otherwise permitted by manufacturer's written instructions.
B. Do not apply coatings in snow, rain, fog, or mist; when relative humidity exceeds 85 percent; at temperatures less than 5 deg F (3 deg C) above the dew point; or to damp or wet surfaces.
C. Allow wet surfaces to dry thoroughly and attain temperature and conditions specified before starting or continuing coating operation.

1.7 WARRANTY

A. Special Warranty: Manufacturer's standard form in which manufacturer agrees to repair or replace elastomeric coatings that fail within specified warranty period.
   1. Failures include, but are not limited to, the following:
      a. Water penetration through the coating.
      b. Deterioration of coating beyond normal weathering.
   2. Warranty Period: Five years from date of Substantial Completion.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Manufacturer: BASF, The Chemical Company.
B. Products: Subject to compliance with requirements, provide product listed in the Elastomeric Coating Schedule for the paint category indicated.
   1. Thorolastic®.
   2. Finish: Smooth.
   3. A+ algae resistant formula.

2.2 MATERIALS

A. MPI Standards: Products shall comply with MPI standards indicated and shall be listed in its "MPI Approved Products List."
B. Moisture-Vapor Transmission: Minimum 10 perms, based on testing according to ASTM D 1653.
C. Material Compatibility:
   1. Materials for use within each paint system shall be compatible with one another and substrates indicated, under conditions of service and application as demonstrated by manufacturer, based on testing and field experience.
   2. For each coat in a paint system, products shall be recommended in writing by manufacturers of topcoat for use in paint system and on substrate indicated.
D. Colors: As selected by Architect from manufacturer's full range.
E. Crack Fillers: Elastomeric coating manufacturer's recommended, factory-formulated crack fillers or sealants, including crack filler primers, compatible with substrate and other materials indicated.
F. Primer: Elastomeric coating manufacturer's recommended, factory-formulated, alkali-resistant primer compatible with substrate and other materials indicated.
G. Concrete Unit Masonry Block Filler: Elastomeric coating manufacturer's recommended, factory-formulated, high-performance latex block filler compatible with substrate and other materials indicated.

PART 3 - EXECUTION

3.1 EXAMINATION

A. Examine substrates and conditions, with Applicator present, for compliance with manufacturer's requirements for maximum moisture content, alkalinity, and other conditions affecting performance of work.

B. Begin coating only when moisture content of substrate is 12 percent or less when measured with an electronic moisture meter.
C. Begin coating no sooner than 28 days after substrate is constructed and is visually dry on both sides.
D. Verify that substrate is within the range of alkalinity recommended by manufacturer.
E. Verify suitability of substrates, including surface conditions and compatibility with existing finishes and primers.
F. Begin coating application only after unsatisfactory conditions have been corrected and surfaces are dry.

3.2 PREPARATION

A. Comply with manufacturer's written instructions and recommendations in the "MPI Architectural Painting Specification Manual" applicable to substrates and coating systems indicated.
B. Remove hardware and hardware accessories, plates, machined surfaces, light fixtures, and similar items already installed that are not to be coated. If removal is impractical or impossible because of size or weight of item, provide surface-applied protection before surface preparation and coating.
   1. After completing coating operations, use workers skilled in the trades involved to reinstall items that were removed. Remove surface-applied protection if any.
C. Clean substrates of substances that could impair bond of coatings, including dirt, oil, grease, and incompatible paints and encapsulants. Do not coat surfaces if moisture content or alkalinity of surfaces to be coated exceeds that permitted in manufacturer's written instructions.
   1. Remove incompatible primers and reprime substrate with compatible primers as required to produce coating systems indicated.
   2. Perform cleaning and coating application so dust and other contaminants from cleaning process will not fall on wet, newly coated surfaces.
D. Crack Repair: Fill cracks according to manufacturer's written instructions before coating surfaces.

3.3 APPLICATION

A. Apply elastomeric coatings according to manufacturer's written instructions.
   1. Use equipment and techniques best suited for substrate and type of material being applied.
   2. Coat surfaces behind movable items the same as similar exposed surfaces.
   3. Apply each coat separately according to manufacturer's written instructions.
B. Primers: Apply at a rate to ensure complete coverage.
C. Block Fillers: Apply at a rate to ensure complete coverage with pores filled.
D. Elastomeric Finish Coat(s): Minimum two coats with a total dry film thickness of 16 to 18 mils (0.41 to 0.45 mm).
E. Tint each undercoat a lighter shade to facilitate identification of each coat if multiple coats of same material are to be applied. Tint undercoats similar to color of topcoat, but provide sufficient difference in shade of undercoats to distinguish each separate coat.
F. If undercoats or other conditions show through topcoat, apply additional coats until cured film has a uniform finish, color, and appearance.
G. Apply coatings to produce surface films without cloudiness, spotting, holidays, laps, brush marks, roller tracking, runs, sags, ropiness, or other surface imperfections. Cut in sharp lines and color breaks.
H. Apply coatings to prepared surfaces as soon as practicable after preparation and before subsequent surface soiling or deterioration.
I. Spray Application: Use spray equipment for application only when permitted by authorities having jurisdiction. Wherever spray application is used, do not double back with spray equipment to build up film thickness of two coats in one pass.

3.4 FIELD QUALITY CONTROL

A. Testing of Paint Materials: Owner reserves the right to invoke the following testing procedures:
   1. Owner will engage the services of a qualified testing agency to sample materials being used. Samples of material delivered to Project site will be taken, identified, sealed, and certified in presence of Contractor.
   2. Testing agency will perform tests for compliance of materials with product requirements.
   3. Owner may direct Contractor to stop coating application if test results show materials being used do not comply with requirements. Remove noncomplying materials from Project site, pay for testing, and recoat

surfaces that were coated with rejected materials. Remove rejected materials from previously coated surfaces if, on recoating with complying materials, the two coatings are incompatible.

B. Field Testing and Inspection: Owner reserves the right to engage the services of a qualified testing agency to verify installed thickness of elastomeric coatings.

3.5 CLEANING AND PROTECTION

A. At end of each workday, remove rubbish, empty cans, rags, and other discarded materials from Project site.
B. After completing coating application, clean spattered surfaces. Remove spattered coatings by washing, scraping, or other methods. Do not scratch or damage adjacent finished surfaces.
C. Protect work of other trades against damage from coating application. Correct damage to work of other trades by cleaning, repairing, replacing, and refinishing, as approved by Architect, and leave in an undamaged condition.
D. At completion of construction activities, touch up and restore damaged or defaced coated surfaces.

3.6 ELASTOMERIC COATING SCHEDULE

A. Concrete Substrates:
    1. Elastomeric Coating System:
        a. Prime Coat: As recommended in writing by topcoat manufacturer.
        b. Intermediate Coat: As recommended in writing by topcoat manufacturer.
        c. Topcoat: Elastomeric, pigmented, exterior, water-based, flat coating.
            1) BASF, Thorolastic A+®.
B. Concrete Unit Masonry Substrates:
    1. Elastomeric Coating System:
        a. Prime Coat: As recommended in writing by topcoat manufacturer.
        b. Block Filler: As recommended in writing by topcoat manufacturer.
        c. Intermediate Coat: As recommended in writing by topcoat manufacturer.
        d. Topcoat: Elastomeric, pigmented, exterior, water-based, flat coating.
            1) BASF, Thorolastic A+®.

BENCHMARK DESCRIPTION

BM #1084 – 759.29
NORTHEAST FLANGE BOLT ON HYDRANT, ±6 FEET WEST OF A SIDEWALK, SOUTHERLY OF THE BASKETBALL COURTS, WESTERLY OF GILBERT HALL.

BM #1191 – 759.29
NORTHEAST FLANGE BOLT ON HYDRANT, ±25 FEET EAST OF A SIDEWALK, EASTERLY OF THE STEVENS HALL BUILDING AND SOUTHERLY OF THE MICHIGAN SCHOOL FOR THE DEAF BUILDING.

DEMOLITION NOTES

1. PRIOR TO BEGINNING OF ANY DEMOLITION WORK THE CONTRACTOR SHALL NOTIFY THE LOCAL GOVERNING AGENCY TO OBTAIN PERMIT. ALL DEMOLITION WORK SHALL CONFORM TO THE REQUIRMENTS OF THE LOCAL GOVERNING AGENCY. ALL DEMOLITION OPERATIONS SHALL COMPLY WITH MIOSHA REGULATIONS.
2. NO ATTEMPT IS MADE TO STIPULATE EVERY REQUIRED ITEM OF DEMOLITION ON THE PLAN. CONTRACTOR MUST VISIT SITE AND STUDY PHYSICAL CONDITIONS OF THE SITE AND REVIEW PROPOSED CONSTRUCTION DRAWINGS AND REACH THEIR OWN CONCLUSIONS ON WORK NECESSARY TO ACCOMPLISH THE INTENDED RESULTS AS DESCRIBED BY THE PROPOSED CONSTRUCTION DRAWINGS.
3. THE CONTRACTOR IS RESPONSIBLE FOR REMOVING ALL EXISTING DEBRIS (WITHIN LIMITS OF DISTURBANCE OR DEMOLITION) AND CONSTRUCTION DEBRIS GENERATED FROM THE SITE AND DISPOSING OF THE DEBRIS IN A LAWFUL MANNER. THE CONTRACTOR IS RESPONSIBLE FOR OBTAINING ALL PERMITS REQUIRED FOR DEMOLITION AND DISPOSAL.
4. THE CONTRACTOR SHALL COORDINATE WITH RESPECTIVE UTILITY COMPANIES PRIOR TO THE REMOVAL AND/OR RELOCATION OF UTILITIES. THE CONTRACTOR SHALL COORDINATE WITH THE UTILITY COMPANY CONCERNING PORTIONS OF WORK WHICH MAY BE PERFORMED BY THE UTILITY COMPANY'S FORCES AND ANY FEES WHICH ARE TO BE PAID TO THE UTILITY COMPANY FOR THEIR SERVICES. THE CONTRACTOR IS RESPONSIBLE FOR PAYING ALL FEES AND CHARGES.
5. THE LOCATIONS OF ALL EXISTING UTILITIES SHOWN ON THIS PLAN HAVE BEEN DETERMINED FROM THE BEST INFORMATION AVAILABLE AND ARE GIVEN FOR THE CONVENIENCE OF THE CONTRACTOR. THE ENGINEER ASSUMES NO RESPONSIBILITY FOR THEIR COMPLETENESS OR ACCURACY. PRIOR TO THE START OF ANY DEMOLITION ACTIVITY, THE CONTRACTOR SHALL CONTACT THE UTILITY COMPANIES TO OBTAIN ONSITE LOCATIONS OF EXISTING UTILITIES.
6. ALL EXISTING SEWERS, PIPING AND UTILITIES SHOWN ARE NOT TO BE INTERPRETED AS THE EXACT LOCATION, OR AS THE ONLY OBSTACLES THAT MAY OCCUR ON THE SITE. VERIFY EXISTING CONDITIONS AND PROCEED WITH CAUTION AROUND ANY ANTICIPATED FEATURES. GIVE NOTICE TO ALL UTILITY COMPANIES REGARDING DESTRUCTION AND REMOVAL OF ALL SERVICE LINES AND CAP ALL LINES BEFORE PROCEEDING WITH THE WORK. UTILITIES DETERMINED TO BE ABANDONED AND LEFT IN PLACE SHALL BE GROUTED IF UNDER BUILDING.
7. ELECTRICAL, TELEPHONE, CABLE, WATER, FIBER OPTIC CABLE AND/OR GAS LINES NEEDING TO BE REMOVED OR RELOCATED SHALL BE COORDINATED WITH THE AFFECTED UTILITY COMPANY. ADEQUATE TIME SHALL BE PROVIDED FOR RELOCATION AND CLOSE COORDINATION WITH THE UTILITY COMPANY IS NECESSARY TO PROVIDE A SMOOTH TRANSITION IN UTILITY SERVICE. CONTRACTOR SHALL PAY CLOSE ATTENTION TO EXISTING UTILITIES WITHIN THE ROAD RIGHT OF WAY DURING CONSTRUCTION.
8. CONTRACTOR MUST PROTECT THE PUBLIC AND THEIR WORKERS AT ALL TIMES WITH FENCING, BARRICADES, ENCLOSURES, ETC., TO THE BEST PRACTICES PER MIOSHA GUIDELINES.
9. DAMAGE TO ALL EXISTING CONDITIONS TO REMAIN WILL BE REPLACED AT CONTRACTOR'S EXPENSE.
10. BURNING OF DEBRIS IS NOT ALLOWED.
11. THE CONTRACTOR IS RESPONSIBLE FOR FOLLOWING ENVIRONMENTAL CLEANUP PROCEDURES IN ACCORDANCE WITH THE SPECIFICATIONS AND WITH STATE AND LOCAL REGULATIONS.
12. THE CONTRACTOR SHALL VISIT THE SITE TO VERIFY THE SIZE AND QUANTITY OF ITEMS TO BE REMOVED PRIOR TO BID.
13. BACK FILL EXCAVATED AREAS WITH MDOT CLASS II GRANULAR MATERIAL COMPACTED TO 95% OF THE MATERIAL MAXIMUM UNIT WEIGHT DETERMINED BY ASTM D-1557 (MODIFIED PROCTOR)
14. THREE BENCHES ARE TO BE RELOCATED, TWO OF WHICH ARE CURRENTLY EMBEDDED IN-GROUND. THE THIRD BENCH IS CURRENTLY NOT INSTALLED. FOUR TABLES ARE TO BE RELOCATED, THREE OF WHICH ARE CURRENTLY EMBEDDED. THE FOURTH TABLE IS CURRENTLY NOT INSTALLED. NOT ALL BENCHES AND TABLES ARE SHOWN ON EXISTING CONDITIONS PLAN, BUT THEY ARE LOCATED ON-SITE. OWNER TO NOTIFY CONTRACTOR OF EXISTING LOCATIONS OF BENCHES AND TABLES TO BE RELOCATED.

SITE PLAN NOTES

1 ALL WORK AND MATERIALS SHALL COMPLY WITH ALL TOWNSHIP/CITY/COUNTY REGULATIONS AND CODES AND O.S.H.A. STANDARDS.

2 ALL ON–SITE UNPAVED AREAS DISTURBED BY GRADING OPERATION SHALL RECEIVE 4 INCHES OF TOPSOIL, SEED/SOD AND MULCH. TOPSOIL SHALL BE PER ASTM D5268 AND SHALL BE NATURAL, FRIABLE, FERTILE, FINE LOAMY SOIL POSSESSING CHARACTERISTICS OF REPRESENTATIVE TOPSOIL IN THE VICINITY THAT PRODUCES HEAVY GROWTH. TOPSOIL SHALL HAVE A PH RANGE OF 5.5 TO 7.4 PERCENT, FREE FROM SUBSOIL, OBJECTIONABLE WEEDS, LITTER, SODS, STIFF CLAY, STONES LARGER THAN 1–INCH IN DIAMETER, STUMPS, ROOTS, TRASH, TOXIC SUBSTANCES, OR ANY OTHER MATERIAL WHICH MAY BE HARMFUL TO PLANT GROWTH OR HINDER PLANTING OPERATIONS. TOP SOIL SHALL CONTAIN A MINIMUM OF THREE PERCENT ORGANIC MATERIAL. IF EXISTING ONSITE TOPSOIL OR IMPORTED TOPSOIL DOES NOT MEET THESE REQUIREMENTS, THE TOPSOIL SHALL BE CONDITIONED UNTIL REQUIREMENTS ARE MET.

3 EXISTING STRUCTURES WITHIN CONSTRUCTION LIMITS ARE TO BE ABANDONED, REMOVED OR RELOCATED AS NECESSARY UNLESS OTHERWISE NOTED ON THE PLANS. ALL COST SHALL BE INCLUDED IN BASE BID.

4 CONTRACTOR SHALL BE RESPONSIBLE FOR ALL RELOCATIONS, (UNLESS OTHERWISE NOTED ON PLANS) INCLUDING BUT NOT LIMITED TO, ALL UTILITIES, STORM DRAINAGE, SIGNS, TRAFFIC SIGNALS & POLES, ETC. AS REQUIRED. ALL WORK SHALL BE IN ACCORDANCE WITH GOVERNING AUTHORITIES REQUIREMENTS AND PROJECT SITEWORK SPECIFICATIONS AND SHALL BE APPROVED BY SUCH. ALL COST SHALL BE INCLUDED IN BASE BID.

5 PLACEMENT OF SLEEVES FOR ANY ELECTRIC OR IRRIGATION SYSTEM SHALL BE COORDINATED WITH OWNER/ARCHITECT PRIOR TO BEGINNING CONSTRUCTION.

PLAYGROUND NOTES

1 NEW PLAYGROUND SURFACING AREA IS 9,894 SQUARE FEET. CONTRACTOR SHALL INSTALL AN INITIAL DEPTH OF 15" OF ENGINEERED WOOD FIBER IN THIS AREA TO ALLOW FOR NATURAL COMPACTION OF MATERIAL DOWN TO A 12" DEPTH (458 CUBIC YARDS). EXISTING PLAYGROUND SURFACING AREA IS 1,200 SQUARE FEET. CONTRACTOR SHALL SUPPLEMENT FIBER IN THIS AREA PER NOTE 5 (ESTIMATED 11 CUBIC YARDS @ 3" THICK). NEW PLAYGROUND SURFACING AREA BY QUERCUS ALBA IS 320 SQUARE FEET AND SHALL BE INSTALLED AT A MINIMUM 3" DEPTH (3 CUBIC YARDS).

2 INSTALL ALL PLAYGROUND EQUIPMENT PER MANUFACTURER'S RECOMMENDATIONS.

3 COLORS OF ALL PROPOSED PLAYGROUND EQUIPMENT TO BE SELECTED BY OWNER

4 RELOCATED TABLES AND BENCHES TO BE EMBEDDED PER MANUFACTURERS RECOMMENDATIONS.

5 CONTRACTOR SHALL SUPPLEMENT EXISTING ENGINEERED WOOD FIBER AT THE EXISTING MIRACLE PLAY STRUCTURE WITH NEW ENGINEERED WOOD FIBER TO ACCOUNT FOR COMPACTION SINCE LAST APPLICATION. EXACT THICKNESS OF FIBER TO BE ADDED TO THIS AREA SHALL BE DETERMINED BY CONTRACTOR AND SHALL BE BASED UPON THE SLIDE EXIT HEIGHT REQUIREMENTS PER THE U.S. CONSUMER PRODUCT SAFETY COMMISSION PUBLIC PLAYGROUND SAFETY HANDBOOK.

6 ALTERNATE 1: REDUCE CONCRETE EDGING FROM 3' WIDE TO 2' WIDE.

BENCHMARK DESCRIPTION

BM #1084 – 759.29
NORTHEAST FLANGE BOLT ON HYDRANT, ±6 FEET WEST OF A SIDEWALK, SOUTHERLY OF THE BASKETBALL COURTS, WESTERLY OF GILBERT HALL.

BM #1191 – 759.29
NORTHEAST FLANGE BOLT ON HYDRANT, ±25 FEET EAST OF A SIDEWALK, EASTERLY OF THE STEVENS HALL BUILDING AND SOUTHERLY OF THE MICHIGAN SCHOOL FOR THE DEAF BUILDING.

LEGEND:

EXISTING CONCRETE	
PROPOSED CONCRETE	
SAND SURFACING	
CONCRETE SEAT WALL	
MEG	MEET EXISTING GRADE
EXISTING SPOT ELEVATION	x (757.94)
PROPOSED SPOT FINISHED GRADE ELEVATION	x 757.25
ROUND CATCH BASIN	
BUILDING OUTLINE	
UNDERDRAIN STORM SEWER	
PROPOSED TREE	

GRADING NOTES

1. SPOT ELEVATIONS SHOWN ARE ALL FINISHED GRADE.
2. CONSTRUCT BENCH CONCRETE SLABS WITH 2% MAXIMUM GRADE WHICH IS CONSISTENT WITH THE CROSS SLOPE OF THE ADJACENT GRADE.
3. CROSS SLOPES SHALL NOT EXCEED 2%. LONGITUDINAL SLOPES SHALL NOT EXCEED 5%.
4. THE CONTRACTOR IS SPECIFICALLY CAUTIONED THAT THE LOCATION AND/OR ELEVATION OF EXISTING UTILITIES AS SHOWN ON THESE PLANS IS BASED ON RECORDS OF THE VARIOUS UTILITY COMPANIES, AND WHERE POSSIBLE, MEASUREMENTS TAKEN IN THE FIELD. THE INFORMATION IS NOT TO BE RELIED ON AS BEING EXACT OR COMPLETE. THE CONTRACTOR MUST CALL THE APPROPRIATE UTILITY COMPANIES AT LEAST 72 HOURS BEFORE ANY EXCAVATION TO REQUEST EXACT FIELD LOCATION OF UTILITIES. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO RELOCATE ALL EXISTING UTILITIES WHICH CONFLICT WITH THE PROPOSED IMPROVEMENTS SHOWN ON THE PLANS.
5. EXISTING GRADE CONTOUR INTERVALS SHOWN AT 1 FOOT INTERVALS
6. IF ANY EXISTING STRUCTURES TO REMAIN ARE DAMAGED DURING CONSTRUCTION IT SHALL BE THE CONTRACTORS RESPONSIBILITY TO REPAIR AND/OR REPLACE THE EXISTING STRUCTURE AS NECESSARY TO RETURN IT TO EXISTING CONDITIONS OR BETTER.
7. CONTRACTOR SHALL ASSURE POSITIVE DRAINAGE AWAY FROM BUILDINGS FOR ALL NATURAL AND PAVED AREAS.
8. ALL ON-SITE UNPAVED AREAS DISTURBED BY GRADING OPERATION SHALL RECEIVE 4 INCHES OF TOPSOIL, SEED/SOD AND MULCH. TOPSOIL SHALL BE PER ASTM D5268 AND SHALL BE NATURAL, FRIABLE, FERTILE, FINE LOAMY SOIL POSSESSING CHARACTERISTICS OF REPRESENTATIVE TOPSOIL IN THE VICINITY THAT PRODUCES HEAVY GROWTH. TOPSOIL SHALL HAVE A PH RANGE OF 5.5 TO 7.4 PERCENT, FREE FROM SUBSOIL, OBJECTIONABLE WEEDS, LITTER, SODS, STIFF CLAY, STONES LARGER THAN 1-INCH IN DIAMETER, STUMPS, ROOTS, TRASH, TOXIC SUBSTANCES, OR ANY OTHER MATERIAL WHICH MAY BE HARMFUL TO PLANT GROWTH OR HINDER PLANTING OPERATIONS. TOP SOIL SHALL CONTAIN A MINIMUM OF THREE PERCENT ORGANIC MATERIAL. IF EXISTING ONSITE TOPSOIL OR IMPORTED TOPSOIL DOES NOT MEET THESE REQUIREMENTS, THE TOPSOIL SHALL BE CONDITIONED UNTIL REQUIREMENTS ARE MET.
9. CONSTRUCTION SHALL COMPLY WITH ALL APPLICABLE GOVERNING CODES AND BE CONSTRUCTED TO SAME.

STORMWATER NOTES

1. ALL 6" PIPES SHOWN ON THIS PLAN ARE 6" ADS N12 STIB PERFORATED PIPE WITH SOCK. INSTALL END CAPS ON THE UPSTREAM END OF THESE PIPES.
2. ALL PIPE CONNECTIONS SHALL BE MADE USING 6"X6" TEES UNLESS OTHERWISE NOTED.
3. SEE CD-1 FOR PLAYGROUND UNDERDRAIN DETAIL AND LAWN UNDERDRAIN DETAIL.
4. ADJUST HORIZONTAL LOCATION OF UNDERDRAINS AS NECESSARY TO AVOID THE PROPOSED PLAYGROUND EQUIPMENT FOOTINGS.
5. ADJUST UNDERGROUND ELECTRIC LINE AS NECESSARY FOR THE INSTALLATION OF UNDERDRAINS, PLAYGROUND EQUIPMENT AND ENGINEERED WOOD FIBER.

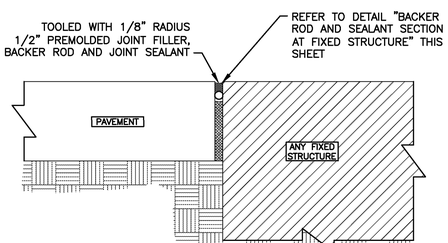
NOTES:
1. THE BACKFILL MATERIAL SHALL BE CRUSHED STONE OR OTHER GRANULAR MATERIAL MEETING THE REQUIREMENTS OF CLASS II MATERIAL AS DEFINED IN ASTM D2321. BEDDING & BACKFILL FOR SURFACE DRAINAGE INLETS SHALL BE PLACED & COMPACTED UNIFORMLY IN ACCORDANCE WITH ASTM D2321. COMPACTED NATIVE MATERIAL MAY BE USED AROUND THE CATCH BASIN ABOVE THE INLET/OUTLET PIPES IF THE MATERIAL IS SUITABLE.
2. DRAIN BASIN TO BE CUSTOM MANUFACTURED ACCORDING TO PLAN DETAILS.

24" NYLOPLAST CATCH BASIN
NOT TO SCALE

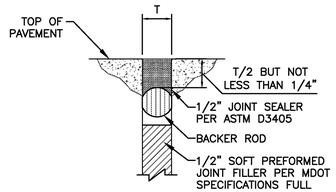


NOTES:

THIS DETAIL IS TO BE USED FOR FIXED STRUCTURES SUCH AS BUILDINGS, RETAINING WALLS/DOCK WALLS, DROP INLETS, MANHOLES, LIGHT POLE BASES, TRAFFIC POLE BASES, DRIP WELLS AND BOLLARDS.

ASPHALT PAVEMENT IS NOT CONSIDERED A FIXED STRUCTURE.

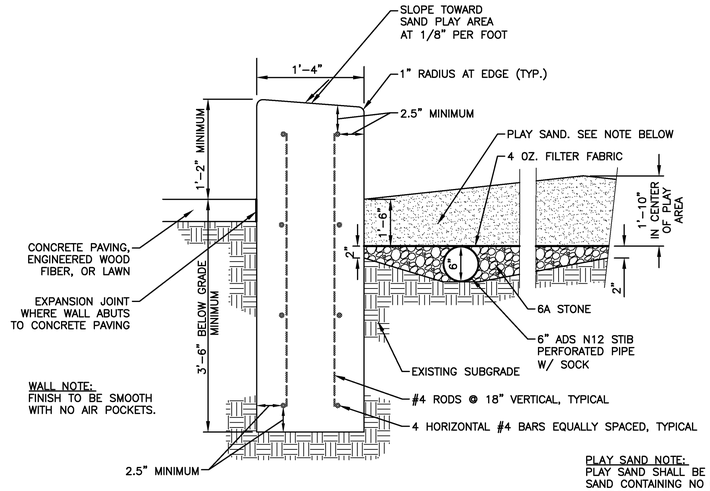
ISOLATION JOINT (IJ) DETAIL
N.T.S.



BACKER ROD AND SEALANT SECTION AT FIXED STRUCTURE

FREESTANDING SEAT WALL NOTES

1. ALL CONCRETE SHALL HAVE A MINIMUM 28–DAY COMPRESSIVE STRENGTH AS NOTED BELOW. FOOTINGS AND FOUNDATIONS – 3000 PSI. ALL EXTERIOR CONCRETE INCLUDING FOUNDATIONS SHALL BE AIR ENTRAINED 5% ± 1%.
2. ASSUMED SOIL BEARING CAPACITY: 2500 P.S.F. CONTRACTOR SHALL VERIFY THE SOIL BEARING CAPACITY AT THE SITE BEFORE THE START OF WORK. IF UNSATISFACTORY SOIL BEARING IS DISCOVERED NOTIFY THE DESIGN PROFESSIONAL BEFORE PROCEEDING WITH WORK. CONTRACTOR TO INCLUDE COST OF AN ON–SITE TESTING ENGINEER FOR ALL FOUNDATION EXCAVATION BEARING CONDITIONS AND CONCRETE STRENGTH TESTING.
3. FILL ALL CONC. BLOCK BELOW GRADE W/ CONCRETE
4. REMOVE ALL TOPSOIL UNDER FOUNDATIONS.
5. ALL EXTERIOR FOOTINGS MIN. 42" DEEP BELOW GRADE.
6. SOFT POCKETS MAY BE ENCOUNTERED IN THE FOUNDATION EXCAVATION, IF FOUND THEY SHOULD BE REMOVED AND REPLACED W/ ENGINEERED FILL OR CONC.
7. ANY ADDITIONAL FILL USED TO INCREASE THE ELEVATION OF THE CONC. SLAB SHOULD BE A MDOT CLASS II GRANULAR BACKFILL, WHICH SHOULD BE PLACED IN LIFTS NOT MORE THAN (6") SIX INCHES IN THICKNESS & COMPACTED TO 95% SPD DENSITY.
8. ALL EXCAVATION MUST BE KEPT DRY PRIOR TO POURING FOUNDATIONS. UTILIZE A TEMP. SUMP PUMP IF NECESSARY. FOOTINGS SHALL ALSO BE PROTECTED.
9. ALL CONCRETE FOUNDATIONS SHALL BEAR ON UNDISTURBED SOIL.
10. ALL CONCRETE WORK AND PLACEMENT SHALL CONFORM TO THE LATEST RECOMMENDATIONS OF A.C.I.
11. ALL REINFORCING BARS, DOWELS AND TIES SHALL CONFORM TO A.S.T.M. A615 GRADE 60. REINFORCING STEEL SHALL BE CONTINUOUS AND SHALL HAVE MINIMUM 36" LAP AND BE FABRICATED AND PLACED IN ACCORDANCE WITH A.C.I. – 315 LATEST EDITION.
12. REINFORCED CONCRETE WALLS AND TRENCH FOOTINGS SHALL HAVE CORNER BARS AT ALL INTERSECTIONS OF THE SAME SIZE AND SPACING AS THE MAIN HORIZONTAL REINFORCING. PROVIDE 2–#5 BARS EACH SIDE OF ALL OPENINGS AND 2–#5 X 4'–0" DIAGONAL BARS AT CORNERS OF OPENINGS.
13. ALL CONCRETE WALLS SHALL HAVE REINFORCING PER DRAWING AND ALL HORIZONTAL WALL STEEL SHALL BEND 2'–0" AROUND CORNERS. BEND VERTICAL WALL STEEL 2'–0" INTO FOOTING.
14. THE LATEST EDITION OF THE FOLLOWING CODES GOVERNS DESIGN, DETAILING, FABRICATION, AND CONSTRUCITON OF ALL REINFORCED CONCRETE.
    A. BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE (ACI 318R–08 & ACI 301–05)
    B. SPECIFICATIONS FOR STRUCTURAL CONCRETE (ACI 301–96).
15. CONCRETE FOOTINGS SHALL NOT BE CAST AGAINST THE EARTH WHERE THE SOIL CONDITIONS WARRANT FORMING IN THE OPINION OF THE BUILDING OFFICIAL, BECAUSE COLLAPSE IS LIKELY. ANY SOIL USED AS A FORM MUST BE ABLE TO SUSTAIN THE INSPECTION AND MACHINES CLOSE TO THE EXCAVATION.
16. WHERE FORMING IS REQUIRED. FORMING SHALL BE IN ACCORDANCE WITH CHAPTER 6, ACI 318.
17. SUBMIT SHOP DRAWINGS FOR CONC. MIX DESIGN, REINFORCING MATERIALS, AND LAYOUT.



SAND PLAY AREA SEAT WALL PROFILE
NOT TO SCALE

PLAY SAND NOTE:
PLAY SAND SHALL BE 100% NATURAL, SCREENED SAND CONTAINING NO CHEMICALS OR MANMADE COMPOUNDS. PLAY SAND SHALL BE "LAKE MICHIGAN BEACH SAND" AS PROVIDED BY HAMMOND FARMS (517–646–8698) OR APPROVED EQUAL.

FIELD BOOK INFORMATION:–

LANDSCAPE NOTES

1. ALL PLANTS TO BE INSTALLED IN ACCORDANCE WITH AMERICAN ASSOCIATION OF NURSERYMEN LANDSCAPE STANDARDS.

2. CONTRACTOR SHALL PROVIDE A PLANTING MIXTURE MEETING THE FOLLOWING REQUIREMENTS. IF THE ENGINEER HAS ANY CONCERNS WITH THE QUALITY OF THE PLANTING MIXTURE, THE ENGINEER SHALL BE ALLOWED TWO WEEKS TO OBTAIN SOIL TEST TO DETERMINE SPECIFICATION COMPLIANCE. NO PLANT MATERIAL SHALL BE PLANTED PRIOR TO ENGINEER APPROVAL OF PLANTING MIXTURE. ALL PLANT MATERIAL SHALL BE MAINTAINED BY THE CONTRACTOR IN A VIGOROUS GROWING CONDITION DURING THIS TIME AT NO ADDITIONAL COST.

3. SPACING OF PLANT MATERIALS SHALL BE AS SHOWN ON DRAWING OR ON PLANT LIST. THE ENGINEER SHALL REVIEW THE PLACEMENT OF PLANT MATERIAL PRIOR TO AND AFTER INSTALLATION, AND RESERVES THE RIGHT TO ADJUST LAYOUT TO ACCOMMODATE SITE CONDITIONS AND DESIGN INTENT.

4. ALL PLANT MATERIALS SHALL CONFORM TO PLANT SCHEDULES. SIZES SHALL BE THE MINIMUM STATED ON THE PLANT LIST OR LARGER. ALL MEASUREMENTS SHALL BE IN ACCORDANCE WITH THE LATEST EDITION OF THE "A.A.N. STANDARDS FOR NURSERY STOCK."

5. NO PLANT SHALL BE PUT INTO THE GROUND BEFORE ROUGH GRADING HAS BEEN FINISHED AND REVIEWED BY THE ENGINEER.

6. FINAL PLANT LOCATIONS SHALL BE MARKED BY CONTRACTOR THREE WORKING DAYS PRIOR TO PLANTING FOR ENGINEER REVIEW.

7. ALL PLANTED PLANTS SHALL BEAR THE SAME RELATIONSHIP TO FINISHED GRADE AS THE PLANTS ORIGINAL GRADE BEFORE DIGGING.

8. PLANT MATERIAL, ESPECIALLY EVERGREENS, TO BE PLANTED HIGHER THAN NORMAL WHEN HEAVY SOIL CONDITIONS (CLAY, ETC.) PREVAIL.

9. IF FOR ANY REASON ANY BALLED AND BURLAPED PLANT MATERIALS NEED TO BE STORED ON SITE LONGER THAN A 24–HOUR PERIOD, THEIR ROOT BALLS SHALL BE PROTECTED. ALL PLANTS SHALL BE THOROUGHLY WATERED EACH DAY THEY ARE STORED ON SITE. PLANTS MAY BE STORED ON SITE FOR A MAXIMUM OF TWO (2) WEEKS, OR 14 DAYS. ANY PLANTS ALLOWED TO DRY OUT AS DETERMINED BY THE ENGINEER WILL BE REJECTED.

10. NO CONTAINER GROWN STOCK WILL BE ACCEPTED IF IT IS ROOT BOUND. ALL WRAPPING MATERIALS MADE OF SYNTHETIC OR PLASTICS SHALL BE COMPLETELY REMOVED AT TIME OF PLANTING.

11. THE CONTRACTOR SHALL FILL PLANT PIT WITH PREPARED PLANT MIX TO ½ DEPTH OF ROOT BALL OR ROOT MASS, PACK FIRMLY, PUDDLE WITH WATER; THEN FOR BALLED AND BURLAPED MATERIAL, THE BURLAP AND ALL LACING (INCLUDING WIRE BASKET IF NECESSARY) SHALL BE REMOVED FROM THE UPPER 1/3 OF ROOTBALL, THEN FINISH BACKFILLING ADDING SOLID FERTILIZER TO THE PLANT MIX, PACK FIRMLY AND WATER. A SAUCER SHALL BE PLACED AROUND EVERY PLANT AND SHALL BE APPROVED PRIOR TO PLACEMENT OF ANY MULCH.

12. ALL DISTURBED LAWN AREAS SHALL BE RESTORED WITH 4–INCHES OF TOPSOIL, SPREAD, FINE GRADED, AND SEEDED WITH MDOT THM SEED MIXTURE CONTAINING 50% CREEPING RED FESCUE, 30% KENTUCKY BLUEGRASS AND 20% PERENNIAL RYEGRASS. PRIOR TO INSTALLATION OF TOPSOIL, LOOSEN SUBGRADE TO A DEPTH OF 2 INCHES. THIS WORK SHALL BE INCIDENTAL TO THE PROJECT.

13. TOPSOIL SHALL CONSIST OF FRIABLE, SHREDDED, AND SCREENED SOIL REASONABLY FREE OF GRASS, ROOTS, WEEDS, STICKS, STONES OR OTHER FOREIGN MATERIALS. THE TOPSOIL MATERIAL SHALL BE APPROVED BY THE ENGINEER PRIOR TO PLACEMENT. SOIL COMPOSITION SHOULD CONTAIN AN ORGANIC CONTENT OF 2 TO 6 PERCENT AND BE CLASSIFIED AS A LOAM OR SANDY LOAM AS SPECIFIED IN THE "GUIDE FOR U.S.D.A. SOIL TEXTURAL CLASSIFICATION'.

14. ALL TREES AND SHRUBS ARE TO BE FERTILIZED ONCE ROOTS SYSTEM IS ESTABLISHED WITH AGRIFORM 21–GRAM FERTILIZER TABLETS AT RATES RECOMMENDED BY MANUFACTURER.

15. TREES SHALL ONLY BE STAKED UPON THE APPROVAL OF THE LANDSCAPE ARCHITECT. IF APPROVED, THE STAKING SHALL BE ADJUSTED AND REPAIRED AS NECESSARY AND REMOVED AT THE END OF THE ESTABLISHMENT PERIOD.

16. ALL PLANTS AND STAKES SHALL BE SET PLUMB UNLESS OTHERWISE SPECIFIED. ALL GUYS AND STAKES MUST BE LOCATED WITHIN EACH TREES MULCHED AREA TO ELIMINATE THE POSSIBILITY OF MOWER CONTACT AND TO REDUCE MAINTENANCE.

17. AT PLANTING TIME, ALL DEAD AND BROKEN BRANCHES SHALL BE PRUNED ON ALL DECIDUOUS TREES.

18. CONTRACTOR SHALL APPLY ENGINEER APPROVED PRE–EMERGENT HERBICIDE, "PREEN" OR EQUAL, TO SHRUB AND GROUND COVER PLANTING AREAS AT THE TIME OF PLANTING (IF SPRING PLANTED) OR THE FOLLOWING SPRING. CONTRACTOR SHALL ENSURE THE PLANT MATERIALS ARE RESISTANT TO THE HERBICIDES PROPERTIES. HERBICIDE SHALL BE APPLIED ACCORDING TO MANUFACTURERS SPECIFICATIONS AND IN ACCORDANCE WITH SOUND HORTICULTURAL PRACTICES.

19. ALL EVERGREEN PLANTS SHALL BE SPRAYED ACCORDING TO MANUFACTURES INSTRUCTIONS WITH AN ANTI–DESICCANT THE FIRST WINTER. THE ENGINEER SHALL BE NOTIFIED THREE DAYS PRIOR TO THIS WORK.

20. ALL TREES, SHRUBS AND PERENNIAL GROUND COVER SHALL RECEIVE A MINIMUM DEPTH OF THREE INCHES DOUBLE SHREDDED HARDWOOD BARK MULCH. WHERE PLANT BEDS MEET PAVEMENTS, LAWN, OR STEEL EDGING, CUT THE GRADE TO ALLOW FOR MULCH AND THREE–INCH DROP FROM ADJOINING FINISH GRADE.

21. ALL PLANT BEDS SHALL BE EXCAVATED TO A MINIMUM DEPTH OF 8–INCHES AND BACKFILLED WITH SPECIFIED PLANT MIX AS PER PLANTING BED DETAILS. BEDS SHALL BE EDGED WITH METAL EDGING AROUND PERIMETER. ALL EDGING SHALL BE 4" WIDE – 12 GAUGE STEEL, COLOR BLACK. CONTRACTOR SHALL LAYOUT EDGING FOR APPROVAL AND INSTALL PER MANUFACTURERS RECOMMENDATIONS.

22. SNOW SHALL NOT BE PUSHED ONTO INTERIOR LANDSCAPE ISLANDS UNLESS DESIGNATED FOR SNOW STORAGE.

23. PLANTS SHALL BE WATERED BEFORE AND AFTER PLANTING IS COMPLETE. ALL TREES MUST BE STAKED, FERTILIZED AND MULCHED AND SHALL BE GUARANTEED TO EXHIBIT A NORMAL GROWTH CYCLE FOR AT LEAST ONE (1) FULL YEAR FOLLOWING PLANTING. ALL DISEASED, DAMAGED, OR DEAD MATERIAL SHOWN ON THE SITE PLAN SHALL BE REPLACED BY THE END OF THE FOLLOWING GROWING SEASON.

24. APPLICATIONS OF FERTILIZER BEYOND THE INITIAL TOPSOIL AND SEEDING SHALL BE A FERTILIZER WITH NO PHOSPHOROUS.

PLANTING MIXTURE NOTES

1. MIXTURE SHALL BE A MIXTURE OF 1/3 TOPSOIL, 1/3 SAND, AND 1/3 PEAT. ADD FERTILIZER AT THE QUANTITY AS RECOMMENDED BY THE MANUFACTURER. PLANTING MIXTURE SHALL BE FREE FROM, STICK, STONES, SOD CLODS, OR OTHER MATERIAL WHICH MIGHT LEAVE POCKETS AROUND THE ROOTS.

2. TOPSOIL
   A. TOPSOIL SHALL BE FERTILE, FRIABLE, SANDY CLAY LOAM WITHOUT ADMIXTURE OF SUBSOIL. TOPSOIL IS TO BE FREE OF GLASS, STONES GREATER THAN ONE (1) INCH IN ANY DIMENSION, WEEDS, UNDESIRABLE GRASSES AND OTHER EXTRANEOUS MATERIALS. TOPSOIL SHALL HAVE THE FOLLOWING RANGE OF VALUES:

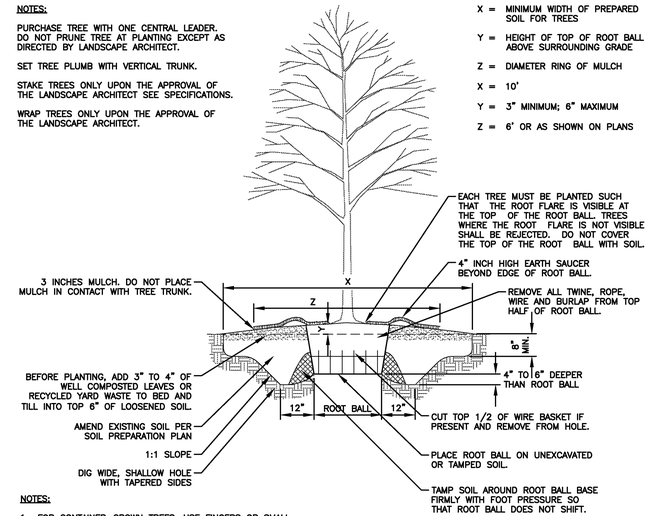
pH	5.0 TO 7.5
SOLUBLE SALTS	500 PPM MAX
ORGANIC CONTENT	5% TO 30%
SILT CONTENT	35% TO 50%
CLAY CONTENT	5% TO 10%
DELETERIOUS MAT'L*	5% MAX

   *ROCK, GRAVEL, STONE, STICKS, ROOTS, SOD, ETC.

   B. COMPOST MAY BE MIXED WITH TOPSOIL TO OBTAIN THE DESIRED CONTENT. TOPSOIL IS TO BE FINAL SCREENED THRU A 5/8" MAXIMUM MESH SCREEN PRIOR TO DELIVERY TO THE PROJECT SITE. ENGINEER SHALL REVIEW SOURCE AND FINAL SCREEN RESULTS PRIOR TO RELEASE OF TOPSOIL. CONTRACTOR SHALL SUBMIT A CERTIFIED ANALYSIS OF THE TOPSOIL FROM EACH SOURCE TO THE ENGINEER. TOPSOIL SHALL BE PLACED IN 4–INCH MINIMUM THICKNESS THROUGHOUT.

3. SAND
   SAND FOR PLANTING MIXTURE SHALL BE CLEAN, COURSE, UNGRADED SAND CONFORMING TO ASTM C3 FOR FINE AGGREGATES.

4. PEAT
   GRANULATED RAW CANADIAN PEAT OR BALED CANADIAN PEAT, CONTAINING NOT MORE THAN 9% MINERAL ON A DRY BASIS. FOR ERICACEOUS PLANTS, BALED PEAT WITH A pH OF 4.0 SHALL BE USED.

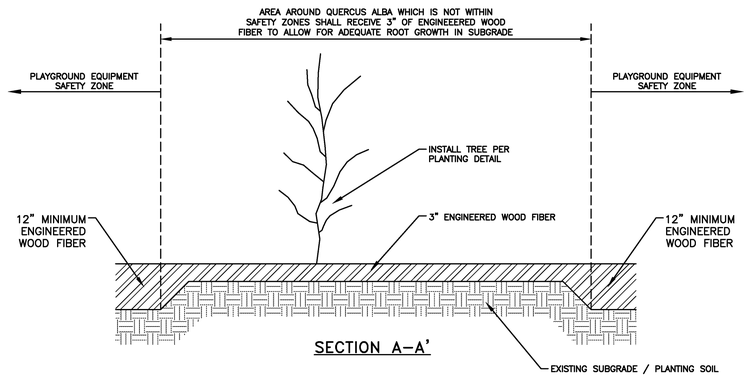


TREE PLANTING DETAIL AND TREE STAKING DETAILS

NOT TO SCALE

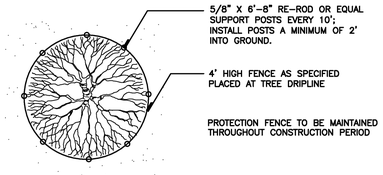
PLANT LIST:

QUANTITY	SIZE	BOTANICAL NAME	COMMON NAME
2	2½" B&B	GYMNOCLADUS DIOICUS 'ESPPRESSO'	ESPRESSO KENTUCKY COFFEETREE
1	2½" B&B	QUERCUS ALBA	WHITE OAK
3	2½" B&B	ZELKOVA SERRATA 'GREEN VASE'	GREEN VASE ZELKOVA



TREE PLANTING SECTION WITHIN PLAYGROUND AREA

NOT TO SCALE



1. APPROVED TREE PROTECTION SHALL BE ERECTED PRIOR TO THE START OF CONSTRUCTION ACTIVITIES, AND SHALL REMAIN IN PLACE UNTIL CONSTRUCTION IS COMPLETE.
2. NO PERSON MAY CONDUCT ANY ACTIVITY WITHIN THE DRIP LINE OF ANY DESIGNATED TREE TO REMAIN, INCLUDING, BUT NOT LIMITED TO, PLACING SOLVENTS, BUILDING MATERIALS, CONSTRUCTION EQUIPMENT, OR SOIL DEPOSITS WITHIN THE DRIP LINE.
3. GRADE CHANGES MAY NOT OCCUR WITHIN THE DRIP LINE OF PROTECTED TREES.
4. DURING CONSTRUCTION, NO PERSON SHALL ATTACH ANY DEVICE OR WIRE TO ANY REMAINING TREE.
5. ALL UTILITY SERVICE REQUESTS MUST INCLUDE NOTIFICATION TO THE INSTALLER THAT PROTECTED TREES MUST BE AVOIDED. ALL TRENCHING SHALL OCCUR OUTSIDE OF THE PROTECTIVE FENCING.
6. SWALES SHALL BE ROUTED TO AVOID THE AREA WITHIN THE DRIP LINES OF PROTECTED TREES.
7. TREES LOCATED ON ADJACENT PROPERTIES THAT MAY BE AFFECTED BY CONSTRUCTION ACTIVITIES MUST BE PROTECTED.
8. TREES TO BE REMOVED SHALL BE FLAGGED WITH ORANGE RIBBON BY THE LANDSCAPE ARCHITECT PRIOR TO SITE GRADING.
9. ROOT ZONES OF PROTECTED TREES SHOULD BE WELL MARKED WITH BRIGHT COLORS AND SURROUNDED WITH RIGIDLY STAKED FENCING.
10. THE PARKING OF IDLE AND RUNNING EQUIPMENT SHALL BE PROHIBITED UNDER THE DRIP LINE OF PROTECTED TREES.
11. THE STRIPPING OF TOPSOIL FROM AROUND PROTECTED TREES SHALL BE PROHIBITED.
12. TREES TO BE REMOVED SHALL BE FELL AWAY FROM TREES TO BE SAVED.
13. GRUBBING OF UNDERSTORY VEGETATION IN CONSTRUCTION AREAS SHOULD BE CLEARED BY CUTTING VEGETATION AT GROUND LEVEL WITH A CHAIN SAW OR MINIMALLY WITH A HYDRO–AXE.
14. THE LANDSCAPE ARCHITECT SHALL BE NOTIFIED IMMEDIATELY IF ANY PROTECTED TREE IS DAMAGED OR REMOVED.
15. TREES TO BE REMOVED SHALL BE FIELD VERIFIED, EVALUATED AND TAGGED FOR REMOVAL BY THE LANDSCAPE ARCHITECT OR THE OWNERS REPRESENTATIVE.

PLOTTED 3/20/2015 12:37 PM BY WHALEY, RUSS

WR Ending July 11, 2014

Section Manager: Irene Henry, Project Management Section 'A'

Revising the Office Design Standard for a Tenant Fit-Out version. Backing up Anne on Buy4Michigan.

Bob Adams:

New Projects:

DMVA Sault Armory Office Renovation and Classroom Addition – Justification and DMB-410 submitted for ISID assignment of Hobbs + Black as requested by DMVA.

DNR Union Bay BAS – Received revised MOP and requested contract modification from UPEA.

Design:

MDOC Alger CF Roof Restoration – Received phase 400 preliminary design report.

DNR Straits SP Lower Campground Toilet/Shower Bldg. Replacement – Received 90% phase 400 preliminary design.

DNR Porcupine Mtns. Ski Chalet Re-Roof – Received PSC proposal and set review date with DNR.

DNR Presque Isle Dam Repair – Held 90% design review meeting. Advertised for construction bids.

DNR Eagle Harbor Boathouse Re-roof – Held 90% design review meeting. Advertised for construction bids.

Bidding:

DNR Mackinac Island SP Steward's Quarters & Morgue Roof Replacement – Attended mandatory pre-bid meeting and prepared addendum.

MSP Negaunee Post Roofing & Ventilation Upgrades – Received bids and submitted contract award for Ad Board approval.

Construction:

DNR Pine River BAS – Assisted DNR with analysis of costs to date and projection of funding needed. Setup pre-con for next week.

Projects Complete:

Bay Nursing Lab – Attended final mechanical balancing with contractor and PSC and received final occupancy permit. Contractor is working on closeout.

Scott DeKorte:

New Projects:

MDOC Michigan Reformatory Gymnasium Roof Replacement – Conducted pre-bid walk-through.

Lottery Building UPS Replacement – Conducted PSC kickoff meeting.

DCH State Laboratory Security Improvements – Conducted PSC pre-proposal meeting.

DNR Holland SP Channel Accessibility – Conducted PSC pre-proposal meeting.

Joel Gordon:

Nothing significant to report.

Gerald Gregorski:

New Projects:

DNR Below Ground Sewer & Water Study at Eight Parks – Received only a single bid for the Hayes SP water system rebuild despite extending the bid due date two weeks. The bid was within budget; however, including both of the bid alternates. The PSC completed their bidder evaluation and the contract award was submitted to the Ad Board. The pre-bid meeting for the Mitchell State Storm Sewers was well attended by eight contractors. Bids are due 7/16 with construction planned for after Labor Day.

Traverse City SOB Renovate Ground Floor Restrooms – The construction bid advertisement was posted with the pre-bid meeting and site walk-through scheduled for 7/14 and bids due 7/23.

DMVA Grand Rapids Home for Veterans Networked Door Access Control and Video Surveillance System – The construction bid advertisement was posted with the pre-bid meeting and site walk-through scheduled for 7/21 and bids due 8/6.

DMVA Grand Rapids Home for Veterans Backup Generators – Received three construction bids. All were very close, but somewhat over budget. The PSC is evaluating the bids and will provide a recommendation for submission to the 8/12 Ad Board with construction targeted for Fall 2014.

Construction Starts:

DNR Harrietta State Fish Hatchery Liquid Oxygen and Supplemental Heat – The pre-construction kickoff meeting was held with the contractor for the reduced work scope of installation of the higher priority liquid oxygen system only. The dehumidification supplemental heat pump system will be re-bid in the fall if DNR receives the additional funding in FY15 as expected.

Jan Miller:

Accomplishments:

Flint State Office Building Interiors Renovations – Met with Treasury and DBI on 7/7 after the construction progress meeting to review the 1st floor changes for the cash window and furniture layouts.

Potential Issues/Solutions:

DNR Proud Lake Recreation Area Toilet Shower Building – DNR and I met with the PSC on 7/11 to discuss outstanding issues. Other than the siding/trim lawsuit, which is awaiting a determination, the only remaining dispute is the cracks in the sanitary line. Antler's cost to repair the line is $3,190.64. The PSC does not agree that it is not the fault of Antler and will respond back.

New Projects:

DNR Maybury SP Trail Improvements – Under a previous trail project with Bob Noble in 2012, Moore & Bruggink took the project through construction documents, but the project was halted due to lack of funding. I met with Bob and Ryan of M&B 7/11 to discuss DNR scope changes, reduced budget and how to submit a proposal to complete the project through their ISID contract.

DNR Silver Lake SP BAS Relocation – Received partial funding for design in work order revision 1. Met with DNR 7/8 to review master plan, scope and project team. Contacted PSC, Beckett & Raeder, and requested a contract modification.

DMVA Camp Grayling Physical Fitness Facility – Held PSC kick-off meeting 7/9. DMVA changed scope to include a master plan based on the Fort Custer plan, and adding on to the existing building rather than site adapting the stand alone facility designed at Fort Custer. C2AE will be submitting a contract modification.

Dave Sproul:

Accomplishments:

MDOC, MR Power Plant, Replace De-Alkalizers and Water Softeners - Continuing to meet with agency staff and Progressive A/E to confirm the system design and equipment replacement scope. It was agreed that the overall system will include new de-alkalizer tanks, water softener tanks and salt brine storage tanks. The project budget was confirmed and we have set a tentative bidding and award schedule dates.

DCH, Caro Center, Building No. 54 Demolition – Progress for the building demolition is on schedule and all of the required asbestos abatement has been removed as planned. The actual building demolition is underway.

DNR, Roscommon Operations Center, Heating System – Visited the Roscommon Operations Center to review a project to provide better heating control valves and thermostats. The current system includes manual control valves and does not provide a good level of control in winter heating conditions.

Potential Issues:
MSP, SEOC – We received five (5) construction proposals for the SEOC with the low bid at $18.4M. Unfortunately, this low bid is approximately $3M over our construction estimate. We are reviewing the low three (3) proposals in detail and the A/E will have a recommendation shortly.

Steve Urban:
Accomplishment:
MDOC Gus Harrison CF – Phase 2, North Side Roof Restorations – Opened construction bids for this project. Only 2 bidders participated; however, the apparent low bidder is the same contractor currently working on the 1st phase of the work. Bids were within project budget.
Potential Issues/Solutions:
Lewis Cass Building, Fire Pump Electrical Changes – DiClemente Siegel Design presented the phase 100 design study for review and approval to proceed. B. Bierwagen will present to BOD management the 3 options as presented in the phase 100 study for the BOD option selection. It would appear the simplest solution and least expensive would make the most sense to undertake; a simple, reefed from the outside, electrical source to the fire pump. The provision of adding a back-up generator to the Cass Building does not make economic sense. Professional will proceed with phase 500 once a design option is selected by BOD. There is a strong possibility that BOD skilled trades could do this work.

Section Manager: Harold Belcher, Project Management B
Staff/Manager's Meetings; 1 on 1 with R. Hall; conference call on Alanson to Mackinaw City Trail Bridges; S. Higgins Lake State Park BAS Grand Re-Opening; DNR Roscommon Operations Service Center Heating investigation.

Chris Bahjet
Nothing significant to report.

Tim Hall
New Projects:
DNR Rose Lake Field Office Renovations – Initial design kickoff conducted with Bergmann and agency representatives.

MDOC Women's HVCF Prisoner Services – Conducted 50% design review meeting for renovation project; expedited re-roof project due to critical roof failures and will have pre-bid meeting on 7/21.

DNR Yankee Springs Garage Replacement – Professional contract executed with Byce and pre-design kick off meeting scheduled for 7/17.

Bruce Hassen
Accomplishments:
Demolition contractor bids were received for the Dept. of Corrections Camp Lehman site near Grayling. We had 8 respondents. All bids were over the budgeted amount set aside for this site, but the program amount has funds left over from other demolitions to cover the difference.
New Projects:
Four rails-to-trails projects will have phase one environmental site assessments done as a first step in the design process. Doing this can alert the designer and the State of potentially contaminated sites in, or along the right-of-way, especially when right-of-way passes through a historically industrial area.

Chris Kulhanek
Potential Issues/Solutions:
Camp Grayling Barracks, Phase 2 – After a delay of a few weeks, the PSC submitted a proposal to update their fees for phase 2 of the project, which were outdated (2008) and included revisions to the original scope of work. DMVA had also requested commissioning and testing be added to the project, but due to funding restrictions, this could not be by separate contracts.

Solution – Met with DMVA and the PSC to come to an agreement on contract mods which included them hiring commissioning and testing consultants as a reimbursable expense which DMVA could get approval for.

Mason Building - Exterior Façade Repairs – Water testing failed on one of the mock-ups. Also, the closest match for color on the new stone was not acceptable.
Solution – An investigation of the existing windows is underway to determine under what conditions the windows are allowing water infiltration. A sample of stone was washed with a cleaning solution which changed the color of the stone to a near-perfect match with the existing.

Rashmi Patel
Accomplishments:
Ionia Correctional Facility Roof replacement - Received recommendation from PSC recommending lowest qualified bidder for project.

Carson City Correctional Facility – VMS System - VMS system installed per documents. Substantial completion form completed.

Various Correctional Facilities – Arc Flash Study Phase II - Evaluated RFP proposals.

Sadi Rayyan
Accomplishments:
DEQ Richfield Landfill Site – Design at 90% complete. A meeting conducted with agency and contractor/PSC to discuss design issues, project details, schedule and concerns under the design build contract.

DEQ Former Wurtsmith Air Force Base Site – Reviewed and recommended changes to continue to address the discovery of perfluorinated compounds (PFC's) at this Air Force Base's 75 environmentally contaminated sites.

DEQ South End Mobil Site – Bid specifications for the excavation of petroleum contaminated soils, backfilling, magnesium sulfate application, city street reconstruction, and site restoration posted on Buy4michigan. Bids due on 8/13.
New Projects:
DEQ Estey Service Station Site – Assigned to Global Remediation Technologies under their ISID contract to perform remedial investigation to define the extent of contamination in soil/groundwater/soil gas and prepare feasibility study/conceptual corrective action plan.

DEQ Warren Site – Assigned to Weston Solution of Michigan under their ISID contract for remedial investigation to define the extent of free product and contamination in the soil/groundwater and determine whether contaminants from the adjacent LUST sites have commingled.

DEQ Haley Street Site – Assigned to URS Corporation Great Lakes under their ISID contract for removal of arsenic-contaminated soils and site restoration.
Non-Project Related Activities:
2011 Environmental PSC ISID Contracts – Contracts expire on 9/2. Nineteen of these contracts have not been fully utilized and we agreed to extend the ones that have not been fully utilized for six more months from this coming September; met with A. Watros to discuss the extension process.

Jud Sorensen
New Projects:
A meeting was held with Lisa Spalsbury at Geagley Laboratory to look at issues with the roof and to look at upgrading the elevator and adding occupancy sensors for building lighting. The building is experiencing major water leaks due to localized roof membrane failures around the building perimeter. Roof replacement is in their capital projections, but funding has not yet been approved. Because of the immediate need to repair water leaks, it was recommended that they contract someone to make temporary repairs. DTMB is

also looking into the roof warranty. It is understood that there was a 10-year warranty on this roof for labor and a 20-year warranty for materials. If so, even though the roof is 12 to 14 years old, roof repairs could be partially covered by warranty. Based on our meeting, I am proceeding with development of a project statement and an RFP for elevator upgrades and lighting improvements.

Projects Complete:

A meeting was held with GRP Engineering and Century A&E on 7/10 to review and sign off on closeout documentation and a final payment request submitted by Windemuller Electric for the Primary Electric Reconfiguration Project at Joint Laboratory. Although work under the contract is complete, Century A&E along with Michigan Cat, is continuing to look into an issue with the main breaker on the Joint Laboratory existing backup generator. During the U.L. field evaluation of the new automatic transfer switches, it was found that there was no way to lock out this existing breaker while work is being performed on the building's electrical system. Examination of the breaker showed that an interlock lever system had never been included in the breaker when it was installed at Joint Laboratory in 1999. This is a potential safety issue for DTMB maintenance staff and outside contractors. A response is expected from Michigan Cat on options to correct this problem within the next 1 to 2 weeks.

John Spencer

Accomplishments:

DNR - Elmdale Rail/Trail project; continued the fieldwork.

DCH/RED - Caro Regional Center: worked with Real Estate Div. on archived records and survey information.

DNR - Holt Tract acquisition survey along Rice Creek, Calhoun Co, gathering information to begin survey.

New Projects:

DNR - Trail survey at Pellston, MI, SE corner of airport.

Terry O'Brien

Accomplishments:

SESC authorization completed for DNR Wilderness Campground. Meeting with Delta Twp. and BOD waste water mercury sampling program. SESC inspection completed for S. Higgins Lake SP.

DIRECTOR AGENDA

DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET

August 8, 2014

. . . . . .

Facilities and Business Services Administration recommends the following items:

AWARD OF CONSTRUCTION CONTRACT

1. DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET, TRAVERSE CITY – Traverse City State Office Building – Renovate Ground Floor Restrooms
   File No. 071/11369.GAG - Index No. 44401 - Contract No. Y 14363
   Recommended Contract Award: Spence Brothers, Saginaw; $68,700.00

Description and Justification
The purpose of this contract is to renovate the ground floor public restrooms. This work will update the existing restrooms to current building codes and ADA Barrier Free requirements. These are the only restrooms on the ground floor for this public building and they do not conform to the ADA Architectural Guidelines or current building codes.
Funding Source
100% Agency Operating Funds - BOC

2. DEPARTMENT OF TRANSPORTATION, NILES – Niles Maintenance Garage – Membrane Roof Repair
   File No. 591/14032.AGY - Index No. 30125 - Contract No. Y 14364
   Recommended Contract Award: Thomas Brown and Son Roofing Company, Bay City; $129,889.00

Description and Justification
The purpose of this contract is to install a new roof system on the garage and office areas. The existing roof system has reached its useful life and is in need of repair. The work is needed in order to maintain and preserve the integrity and weather-tightness of the exterior roof and wall surfaces.
Funding Source
100% Trunkline Funds

3. DEPARTMENT OF TRANSPORTATION, WILLIAMSTON – Williamston Maintenance Garage – Metal Siding and Roof Installation
   File No. 591/14234.AGY - Index No. 30125 - Contract No. Y 14365
   Recommended Contract Award: Day Construction, LLC, Portland; $38,800.00

APPROVED
August 8, 2014
DIRECTOR
DEPARTMENT OF TECHNOLOGY,
MANAGEMENT AND BUDGET

Description and Justification
The purpose of this contract is to install new metal roof and wall panels on both the unheated and heated storage buildings. The work is needed in order to maintain and preserve the integrity and weather-tightness of the exterior roof and wall surfaces.
Funding Source
100% Trunkline Funds

4. DEPARTMENT OF NATURAL RESOURCES, MACKINAC COUNTY – Mackinac Island State Park – Steward's Quarters and Morgue Roof Improvements
   File No. 751/13323.RAA - Index No. 53010 - Contract No. Y 14366
   Recommended Contract Award: Ground Level Masonry, Cheboygan; $59,600.00

Description and Justification
The purpose of this contract is to remove the existing roofing materials and cedar shakes and install new roofing materials, cedar breather and cedar shakes on two buildings. Replacement of these roofs is necessary to protect and maintain these structures and will result in continued use of these structures as park assets.
Funding Source
100% State Parks Endowment Funds

AWARD OF PROFESSIONAL SERVICES CONTRACT

5. DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET, LANSING – Hannah and Ottawa State Office Buildings – Restroom and Piping Upgrade
   File No. 071/14164.SMD - Index No. 11800 - Contract No. Y14367
   Recommended Responsive Proposal: Clark Trombley Randers, Lansing; $87,145.00

Description and Justification
The purpose of this contract is to provide design and construction administration services for restroom and piping upgrades throughout the buildings. The existing restrooms do not meet current ADA requirements, and cracked piping allows vent gases, pests, and other hazards into the buildings.
Funding Source
100% Lump Sum Special Maintenance Funds - GF

ISID ASSIGNMENT

6. DEPARTMENT OF CORRECTIONS, MARQUETTE – Marquette Branch Prison – Water Tower Engineering Evaluation
   File No. 472/14250.SAR - Index No. 54720 - Contract No. Y 14368
   Recommended Firm: Nelson Tank Engineering and Consulting, Inc., Lansing; $3,600.00
   ISID No. 00438 - Assignment No. 4

APPROVED
August 8, 2014
DIRECTOR
DEPARTMENT OF TECHNOLOGY,
MANAGEMENT AND BUDGET

Description and Justification
The purpose of this assignment is to provide professional services for inspecting and evaluating the 250,000 gallon elevated water storage tank. The Department of Environmental Quality maintenance rules for domestic water supply storage tanks require that the tanks be evaluated once every five years to ensure a safe and stable public water supply. The professional will conduct the maintenance inspection and evaluation to comply with the regulations.
Funding Source
100% Agency Operating Funds

7. DEPARTMENT OF CORRECTIONS, JACKSON – Jackson Complex – Water Tower Engineering Evaluation
   File No. 472/14251.SAR - Index No. 18350 - Contract No. Y 14369
   Recommended Firm: Nelson Tank Engineering and Consulting, Inc., Lansing; $2,800.00
   ISID No. 00438 - Assignment No. 5

Description and Justification
The purpose of this assignment is to provide professional services for inspecting and evaluating the 250,000 gallon elevated water storage tank. The Department of Environmental Quality maintenance rules for domestic water supply storage tanks require that the tanks be evaluated once every five years to ensure a safe and stable public water supply. The professional will conduct the maintenance inspection and evaluation to comply with the regulations.
Funding Source
100% Agency Operating Funds

8. DEPARTMENT OF CORRECTIONS, COLDWATER – Lakeland Correctional Facility – Water Tower Engineering Evaluation
   File No. 472/14252.SAR - Index No. 45730 - Contract No. Y 14370
   Recommended Firm: Nelson Tank Engineering and Consulting, Inc., Lansing; $2,800.00
   ISID No. 00438 - Assignment No. 6

Description and Justification
The purpose of this assignment is to provide professional services for inspecting and evaluating the 250,000 gallon elevated water storage tank. The Department of Environmental Quality maintenance rules for domestic water supply storage tanks require that the tanks be evaluated once every five years to ensure a safe and stable public water supply. The professional will conduct the maintenance inspection and evaluation to comply with the regulations.
Funding Source

MANAGEMENT AND BUDGET

Recommended Firm: AMEC Engineering and Consulting of Michigan, Inc., Novi; $68,000.00
ISID No. 00464 - Assignment No. 2

Description and Justification
The purpose of this assignment is to provide professional services for developing a watershed management plan to protect the physical, chemical and biological integrity of Lake Margrethe. Camp Grayling is sited along the southern shoreline of the lake. The work is needed to maintain the integrity of the lake and reduce the loading of pollutants into the lake.
Funding Source
100% Michigan Army National Guard Funds

10. DEPARTMENT OF NATURAL RESOURCES, NORTHVILLE – Maybury State Park – Trail Improvements
File No. 751/14223.JAN - Index No. 58130 - Contract No. Y 14372
Recommended Firm: Moore and Bruggink, Inc., Grand Rapids; $79,626.00
ISID No. 00401 - Assignment No. 1

Description and Justification
The purpose of this assignment is to provide professional services for designing a connector trail from 8 Mile Road to the pond area, including modifying previously created bid documents to reflect phasing and scope changes. The professional will also provide construction staking and construction administration. This work is needed to improve the trails at Maybury State Park.
Funding Source
100% Recreational Trail Program Funds

MODIFICATION TO PROFESSIONAL SERVICES CONTRACTS

11. DEPARTMENT OF CORRECTIONS, IONIA – Ionia Correctional Facility – Video Security and Lighting Upgrade
File No. 472/12215.RMP- Index No. 40630 Contract No. Y13504
Comm Tech Design Inc., Rockford; Modification No. 1, Increase $19,620.00

Description and Justification
The purpose of this modification is to provide additional study, final design and construction administration services to prepare bidding documents for the replacement of all interior analog cameras with the new Internet Protocol cameras. The professional will field verify the existing camera locations, coordinate camera viewing areas, and determine server sizes and storage capacity to record up to 30 days. The agency has increased the project scope to include the interior cameras.

17. DEPARTMENT OF ENVIRONMENTAL QUALITY, SUMNER – Wilson's Grocery Site – Remedial Investigation
File No. 761/12012.SAR - Index No. 44801- Contract No. Y11325
AECOM Technical Services, Inc., Grand Rapids; Modification No. 4, Increase $3,450.00
ISID No. 00279 - Assignment No. 11

Description and Justification
The purpose of this modification is to provide additional residential soil gas sampling and vapor intrusion evaluation. The site operated as a grocery/gasoline station with a leaking underground petroleum storage tank system. The site was assigned to the professional to conduct remedial investigation including soil, groundwater and vapor intrusion sampling to delineate the extent of contamination. Indoor air sampling was conducted at the site but additional sampling and analysis is needed in the residential areas. The professional will conduct one final round of sampling and provide data interpretation. This work will extend the contract until December 31, 2014 and is needed to protect public health, safety, welfare and the environment and comply with the environmental regulations.

Funding Source
100% Refined Petroleum Funds

Base Contract	$31,300.00	Provide remedial investigation including soil, groundwater, and vapor intrusion sampling to delineate the extent of contamination resulting from a confirmed UST release. Approved Director's Agenda 09/30/11
Modification No. 1	$12,800.00	Provide soil gas sampling at a known leaking underground storage tank site. Recent groundwater sampling results implied that gasoline vapor in soil on the site are probable and that the health risk to persons in building on or neighboring the site needs to be evaluated. Approved Director's Agenda 08/31/12
Modification No. 2	$1,900.00	To cover the cost of conducting additional analysis. Indoor air sampling was conducted for Benzene but additional sampling/analysis is needed. The professional will collect more samples for Methylnaphthalene and naphthalene to evaluate the risk. Approved Director's Agenda 09/27/13
Modification No. 3	$13,700.00	Provide residential soil gas sampling

18. DEPARTMENT OF ENVIRONMENTAL QUALITY, LAKEFIELD TWP – C and V Grocery Site – Operation and Maintenance Services
File No. 761/12083.SAR - Index No. 44251- Contract No. Y12074
TriMedia Environmental and Engineering Services, LLC, Marquette; Modification No. 2, Increase $37,032.00

Description and Justification
The purpose of this modification is to operate and maintain the existing remediation system for the 2014 calendar year. The professional will perform quarterly groundwater sampling for June and September 2014 and perform quarterly air quality sampling during the 2014 calendar year. The Department of Environmental Quality will provide analytical services for all sampling events but the professional is responsible for transporting samples to the lab. The professional will provide project support and provide reporting material through June 2015. There is a utility allowance of $4,800.00 and an allowance of $4,000.00 for non-routine maintenance included in the reimbursement amount. The work will extend the contract until June 30, 2015 and is needed to comply with the environmental regulations and protect public health, safety and welfare of the environment.

File No. 761/14191.BDH - Index No. 44251 - Contract No. Y14260
Weston Solutions of Michigan, Inc., Okemos; Modification No. 1, Increase $4,626.74
ISID No. 477 - Assignment No. 2

Description and Justification
The purpose of this modification is to define underground utility locations so that additional contaminated soil investigations may continue. The professional will subcontract to a utilities locating service since all underground utilities are all privately owned. Also, the professional will obtain a permit from Alger County to perform soil borings on a county road right-of-way. The work is required to comply with the environmental regulations, and protect public health, safety and welfare of the environment.
Funding Source
100% Refined Petroleum Funds

Base Contract	$47,477.85	The professional will perform up to 20 soil borings and install five monitor wells to determine the extent of plume of contamination and determine the direction in which the plume is migrating. Approved Director's Agenda 5/30/14
Modification No. 1	$4,626.74	See justification above
Total Contract	**$52,104.59**	

REVISIONS TO CONSTRUCTION CONTRACTS

25. DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET, LANSING – Joint Laboratory – Replace HVAC Controls
File No. 071/11194.GAG - Index No. 44308 - Contract No. Y13444
Johnson Controls, Inc., Auburn Hills; CCO No. 2, Increase $54,307.00

Description and Justification
The purpose of this change order is to complete numerous small changes in work scope encountered during the course of construction due to a combination of design omissions, existing field conditions, and agency requested scope additions. These include items such as adding variable frequency drives to modular lab air handling units, additional control elements and sensors, modifications and repairs to the rooftop exhaust fans distribution ductwork.

DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET

August 8, 2014

. . . . . .

Facilities and Business Services Administration recommends the following items:

AWARD OF CONSTRUCTION CONTRACT

1. DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET, TRAVERSE CITY – Traverse City State Office Building – Renovate Ground Floor Restrooms
   File No. 071/11369.GAG - Index No. 44401 - Contract No. Y 14363
   Recommended Contract Award: Spence Brothers, Saginaw; $68,700.00

Description and Justification
The purpose of this contract is to renovate the ground floor public restrooms. This work will update the existing restrooms to current building codes and ADA Barrier Free requirements. These are the only restrooms on the ground floor for this public building and they do not conform to the ADA Architectural Guidelines or current building codes.
Funding Source
100% Agency Operating Funds - BOC

2. DEPARTMENT OF TRANSPORTATION, NILES – Niles Maintenance Garage – Membrane Roof Repair
   File No. 591/14032.AGY - Index No. 30125 - Contract No. Y 14364
   Recommended Contract Award: Thomas Brown and Son Roofing Company, Bay City; $129,889.00

Description and Justification
The purpose of this contract is to install a new roof system on the garage and office areas. The existing roof system has reached its useful life and is in need of repair. The work is needed in order to maintain and preserve the integrity and weather-tightness of the exterior roof and wall surfaces.
Funding Source
100% Trunkline Funds

3. DEPARTMENT OF TRANSPORTATION, WILLIAMSTON – Williamston Maintenance Garage – Metal Siding and Roof Installation
   File No. 591/14234.AGY - Index No. 30125 - Contract No. Y 14365
   Recommended Contract Award: Day Construction, LLC, Portland; $38,800.00

APPROVED
August 8, 2014
DIRECTOR
DEPARTMENT OF TECHNOLOGY,
MANAGEMENT AND BUDGET

Description and Justification
The purpose of this contract is to install new metal roof and wall panels on both the unheated and heated storage buildings. The work is needed in order to maintain and preserve the integrity and weather-tightness of the exterior roof and wall surfaces.
Funding Source
100% Trunkline Funds

4. DEPARTMENT OF NATURAL RESOURCES, MACKINAC COUNTY – Mackinac Island State Park – Steward's Quarters and Morgue Roof Improvements
   File No. 751/13323.RAA - Index No. 53010 - Contract No. Y 14366
   Recommended Contract Award: Ground Level Masonry, Cheboygan; $59,600.00

Description and Justification
The purpose of this contract is to remove the existing roofing materials and cedar shakes and install new roofing materials, cedar breather and cedar shakes on two buildings. Replacement of these roofs is necessary to protect and maintain these structures and will result in continued use of these structures as park assets.
Funding Source
100% State Parks Endowment Funds

AWARD OF PROFESSIONAL SERVICES CONTRACT

5. DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET, LANSING – Hannah and Ottawa State Office Buildings – Restroom and Piping Upgrade
   File No. 071/14164.SMD - Index No. 11800 - Contract No. Y14367
   Recommended Responsive Proposal: Clark Trombley Randers, Lansing; $87,145.00

Description and Justification
The purpose of this contract is to provide design and construction administration services for restroom and piping upgrades throughout the buildings. The existing restrooms do not meet current ADA requirements, and cracked piping allows vent gases, pests, and other hazards into the buildings.
Funding Source
100% Lump Sum Special Maintenance Funds - GF

ISID ASSIGNMENT

6. DEPARTMENT OF CORRECTIONS, MARQUETTE – Marquette Branch Prison – Water Tower Engineering Evaluation
   File No. 472/14250.SAR - Index No. 54720 - Contract No. Y 14368

File No. 761/12012.SAR - Index No. 44801- Contract No. Y11325
AECOM Technical Services, Inc., Grand Rapids; Modification No. 4, Increase $3,450.00
ISID No. 00279 - Assignment No. 11

Description and Justification
The purpose of this modification is to provide additional residential soil gas sampling and vapor intrusion evaluation. The site operated as a grocery/gasoline station with a leaking underground petroleum storage tank system. The site was assigned to the professional to conduct remedial investigation including soil, groundwater and vapor intrusion sampling to delineate the extent of contamination. Indoor air sampling was conducted at the site but additional sampling and analysis is needed in the residential areas. The professional will conduct one final round of sampling and provide data interpretation. This work will extend the contract until December 31, 2014 and is needed to protect public health, safety, welfare and the environment and comply with the environmental regulations.

Funding Source
100% Refined Petroleum Funds

Base Contract	$31,300.00	Provide remedial investigation including soil, groundwater, and vapor intrusion sampling to delineate the extent of contamination resulting from a confirmed UST release. Approved Director's Agenda 09/30/11
Modification No. 1	$12,800.00	Provide soil gas sampling at a known leaking underground storage tank site. Recent groundwater sampling results implied that gasoline vapor in soil on the site are probable and that the health risk to persons in building on or neighboring the site needs to be evaluated. Approved Director's Agenda 08/31/12
Modification No. 2	$1,900.00	To cover the cost of conducting additional analysis. Indoor air sampling was conducted for Benzene but additional sampling/analysis is needed. The professional will collect more samples for Methylnaphthalene and naphthalene to evaluate the risk. Approved Director's Agenda 09/27/13
Modification No. 3	$13,700.00	Provide residential soil gas sampling

18. DEPARTMENT OF ENVIRONMENTAL QUALITY, LAKEFIELD TWP – C and V Grocery Site – Operation and Maintenance Services
File No. 761/12083.SAR - Index No. 44251- Contract No. Y12074
TriMedia Environmental and Engineering Services, LLC, Marquette; Modification No. 2, Increase $37,032.00

Description and Justification
The purpose of this modification is to operate and maintain the existing remediation system for the 2014 calendar year. The professional will perform quarterly groundwater sampling for June and September 2014 and perform quarterly air quality sampling during the 2014 calendar year. The Department of Environmental Quality will provide analytical services for all sampling events but the professional is responsible for transporting samples to the lab. The professional will provide project support and provide reporting material through June 2015. There is a utility allowance of $4,800.00 and an allowance of $4,000.00 for non-routine maintenance included in the reimbursement amount. The work will extend the contract until June 30, 2015 and is needed to comply with the environmental regulations and protect public health, safety and welfare of the environment.

Funding Source
100% Refined Petroleum Funds

Base Contract	$35,177.00	Provide operation and maintenance Approved Director's Agenda 12/16/11

DIRECTOR
DEPARTMENT OF TECHNOLOGY,
MANAGEMENT AND BUDGET

Mannik and Smith Group, Inc., Canton; Modification No. 2, Increase $147,635.50

Description and Justification
The purpose of this modification is to perform a pilot test, install monitoring wells and provide design/construction oversight of the remediation system. The original assignment was to perform limited remedial investigation and conduct a focused feasibility study. This is the next phase required in addressing the contamination. The activities are needed to protect public health, safety, welfare and the environment and comply with the environmental regulations.
Funding Source
100% Refined Petroleum Funds

Base Contract	$59,340.06	Provide remedial investigation and feasibility study services. Approved Director's Agenda 02/14/14
Modification No. 1	$9,816.61	Provide additional remedial investigation services. Due to unusually inclement weather, additional field efforts were needed to use laser-induced fluorescence drilling technology for the remedial investigation activities. Approved Director's Agenda 04/04/14
Modification No. 2	$147,635.50	See justification above
Total Contract	**$216,792.17**	

23. DEPARTMENT OF ENVIRONMENTAL QUALITY, ALBION – BRANCH, CASS, CALHOUN and ST. JOSEPH COUNTIES – Various Sites (Duck Lake Party Store Site) – Environmental Expanded Triage Services
File No. 761/14148.SAR- Index No. 44213 - Contract No. Y14206
Environmental Resources Group, LLC; Union Lake; Modification No. 1, Increase $4,811.95
ISID No. 00415 - Assignment No. 1

Description and Justification
The purpose of this modification is to provide environmental expanded triage services at the Duck Lake Party Store Site. The change is a change to the scope of work. The professional will investigate and assess the current risks at this leaking underground storage tank site, determine the status of the release, and potentially close the site if it does not pose any risk under the relevant local, state and federal statutes and requirements. The results of the screening activities will be used to evaluate the site for potential additional environmental investigation or abatement activities. The work is needed to protect public health, safety, welfare and the environment.

Facilities and Business Services Administration recommends the following items:

AWARD OF CONSTRUCTION CONTRACT

1. DEPARTMENT OF MILITARY AND VETERANS AFFAIRS, LANSING – Joint Forces Headquarters – ISSC Helpdesk Modifications
   File No. 511/14218.AGY - Index Nos. 13657/13957 - Contract No. Y 14345
   Recommended Contract Award: CSM Mechanical, LLC, Fenton; $19,880.00

Description and Justification
The purpose of this contract is to relocate the helpdesk to better meet client needs, and to repurpose the vacated square footage for the computer repair/distribution area.
Funding Source
50% State Construction Funds
50% Federal Funds

2. DEPARTMENT OF NATURAL RESOURCES, CADILLAC – William Mitchell State Park – Storm Sewer Improvements
   File No. 751/13198.GAG- Index No. 50790 - Contract No. Y 14346
   Recommended Contract Award: Greenscape, Lake; $149,500.00

Description and Justification
The purpose of this contract is to improve the storm water drainage capabilities throughout the campground by installing a high density polyethylene (HDPE) storm drain and HDPE fabricated drainage structures, removing and replacing concrete pipe end sections discharging to Lake Cadillac, and providing camp site grading and aggregate installations. Work includes demolition, storm drain installations, directional drilling, site grading, aggregate placements and site related restoration. Work is proposed to begin following Labor Day 2014, and be completed during the spring of 2015.
Funding Source
100% State Parks Endowment Funds

3. DEPARTMENT OF NATURAL RESOURCES, STRONACH TOWNSHIP – Little Manistee River Weir – Emergency Breach Repairs
   File No. 751/14187.GAG - Index No. 81780 - Contract No. Y 14343
   Recommended Contract Award: Team Elmers, Traverse City; $70,570.67

APPROVED
August 1, 2014
DIRECTOR
DEPARTMENT OF TECHNOLOGY,
MANAGEMENT AND BUDGET

Description and Justification
The purpose of this contract is to perform emergency repairs of the water breach around the Little Manistee River Weir to assure that the structural integrity of the weir is not further compromised by the new diversion channel. The work will follow the recommendations of the Department of Natural Resources Dam Safety Engineer and Fisheries Division staff and will include placement of a temporary rock crossing, and filling and stabilizing the diversion channel removal of the temporary rock crossing when the backfill is complete. The Little Manistee River Weir is the only egg source for the Great Lakes Steelhead stocking program and one of the primary egg sources for the Great Lakes Salmon stocking. The high water level breaching of the weir endangers the facility's structural integrity and threatens the operation of this valuable resource.

AWARD OF PROFESSIONAL SERVICES CONTRACT

4. DEPARTMENT OF COMMUNITY HEALTH, SALINE – Center for Forensic Psychiatry – Maintenance Projects (Repair Patient Showers and Barrier Free Bathrooms)
   File No. 391/13399.JAN - Index No. 61000 - Contract No. Y 14347
   Recommended Responsive Proposal: Wigen Tincknell Associates Architects, Saginaw; $36,125.00

Description and Justification
The purpose of this contract is to provide professional services to discover and repair the source of water leaks in 48 patient showers and to replace the sheet flooring in 8 barrier free patient bathrooms. The water has been leaking into adjacent rooms, causing damage to the facility. The sheet flooring has been peeling up and needs to be replaced with a different, more appropriate product.
Funding Source
100% Agency Operating Funds

5. DEPARTMENT OF CORRECTIONS, L'ANSE – Former Camp Baraga – Site Redevelopment
   File No. 472/13050.BDH - Index No. 11741 - Contract No. Y 14348
   Recommended Responsive Proposal: GEI Consultants of Michigan, P.C., Marquette; $33,576.00

Description and Justification
The purpose of this contract is to provide professional services for selective demolition and site restoration so that this former prison camp site can be returned to the Department of Natural Resources (DNR) in as natural state as practical. The professional will include the removal of four underground storage tanks (USTs) in the scope of work for the demolition contractor but will self-perform the environmental professional services required by the Department of Environmental Quality for a UST removal. The professional will specify and oversee the proper abandonment of two potable water wells. The professional will document the activity with field notes, photographs, and soil sampling results for the UST removal activity.

6. DEPARTMENT OF CORRECTIONS, WHITE LAKE – Former Camp White Lake – Site Restoration
   File No. 472/14060.BDH - Index No. 11783 - Contract No. Y 14349
   Recommended Responsive Proposal: Fishbeck, Thompson, Carr and Huber, Inc., Grand Rapids; $37,350.00

Description and Justification

The purpose of this contract is to provide professional services for demolition and site restoration so that this former prison camp site can be returned to the Department of Natural Resources (DNR) in as natural state as practical. The demolition bid package will include the removal of all buildings on the site, the removal of an in-ground automotive repair hoist and trash piles. The package will include a site restoration plan with finish grade shown on a drawing and specifications for seeding. The professional will specify and oversee the proper abandonment of three potable water wells. The professional will document the activity with field notes, photographs, and tabulate soil sampling results for an assessment of the condition of the septic tank drain fields. The work is required to comply with an agreement made with the DNR, comply with environmental regulations, and protect public health, safety and welfare of the environment.

9. DEPARTMENT OF NATURAL RESOURCES, INDIAN RIVER – Burt Lake State Park – Municipal Service and Park Sewer Upgrade
   File No. 751/14183.GAG - Index No. 53070 - Contract No. Y 14352
   Recommended Firm: Nowak and Fraus Engineers, Pontiac; $33,280.00
   ISID No. 00402 - Assignment No. 3

Description and Justification
The purpose of this assignment is to provide professional services for design development to assist the Department of Natural Resources with the review and assessment of the Tuscarora Township proposed sanitary improvement program, and to review various agreements and legal documents associated with said program. This assignment will also include completion of design and bidding documents for the disconnection and abandonment of the existing sewer lagoon system and the installation of upgraded pump facilities and force main to connect to the proposed sanitary sewer system being constructed by Tuscarora Township. Final design will not include project bidding. Nowak and Fraus Engineers have already completed a Phase 100 review and assessment of the Tuscarora Township proposed sanitary improvement program and its impact on the Burt Lake State Park. This was done as part of a larger study of underground utilities involving eight state parks across the state. This new assignment is a continuation of the original work.
Funding Source

11. DEPARTMENT OF ENVIRONMENTAL QUALITY, BEAVERTON – Jim's Automotive Site – Remedial Investigation
    File No. 761/14273.BDH - Index No. 44601 - Contract No. Y 14354
    Recommended Firm: Superior Environmental Corporation, Marne; $27,048.66
    ISID No. 474 - Assignment No. 3

Description and Justification

The purpose of this assignment is to provide professional services for an environmental investigation. The site was an automotive repair facility with a leaking underground storage tank system. A previous investigation confirmed the presence of petroleum contamination in the site's soils and groundwater. The tasks defined in this work include developing an accurate site plan, performing a remedial investigation to define the extent of contamination, perform a risk assessment, classify the site as required by Part 213 of Act 451 of 1994, and provide a final assessment report. In order to accomplish this, up to 12 soil borings and up to 12 monitor wells will be installed. The work is needed to comply with the environmental regulations and protect public health, safety, and welfare of the environment.

20. DEPARTMENT OF ENVIRONMENTAL QUALITY, DOWAGIAC – Indian Lake Mini Super Site – Remediation System Operation and Maintenance Oversight
File No. 761/10215.SAR- Index No. 44501- Contract No. Y10197
AMEC Engineering and Consulting of Michigan, Inc. (Formerly MACTEC); Novi; Modification No. 2, Increase $54,219.00

Description and Justification
This modification will provide professional services for the monitoring well abandonment and parking lot repaving. The site is a former gas station and grocery/convenience store with leaking underground storage tanks. A remediation system was installed to reduce the environmental and public health risk. The original assignment was to evaluate the performance of the system, prepare bid specifications and provide construction oversight services. Upon achieving the environmental abatement objectives, the remediation system was decommissioned and the post-remdiation quarterly groundwater monitoring was conducted. The well abandonment and site restoration are needed as the site is ready for closure. The work will extend the contract until November 30, 2014 and is needed to protect public health, safety, welfare and the environment.

Funding Source
100% Refined Petroleum Funds

AMENDMENT TO AGREEMENT FOR RANGE AND TRAINING LAND ASSESSMENT

28. DEPARTMENT OF MILITARY AND VETERANS AFFAIRS, AUGUSTA – Fort Custer Training Center Site – Range and Training Land Assessment
File No. 511/12268.SAR - Index No. 22000 - Contract No. Y 12279
Potawatomi Resource Conservation and Development Council, Calhoun County;
Amendment No. 3, Increase $49,500.00
Agreement Date June 15, 2012

Purpose/Business Case
The purpose of this amendment is to conduct invasive species survey and vegetation monitoring on critical areas at the site. The results of the survey and monitoring will be used to evaluate the effect of heavy military training usage on wetlands, soil erosion and threat to endangered species in the area and will therefore shape the timing and duration of the training activities. Potawatomi RC&D is a 501(c)(3) not-for-profit organization with experience in conservation and restoration projects.
Funding Source
100% Federal - National Guard Bureau Funds

Original Agreement	$46,585.00	Monitor, assess, and oversee repairs of impacts incurred due to training on the property at the Fort Custer Training Center. Potawatomi Resource Conservation and Development Council will evaluate various ecological restoration practices used to repair the negative impact on natural resources, the ecosystem, and prepare final reports. Approved Director's Agenda 06/15/12
Amendment No. 1	$44,000.00	100% Scope Change
Amendment No. 2	$44,000.00	100% Scope Change
Amendment No. 3	$49,500.00	100% Scope Change See justification above
Total Agreement	**$184,085.00**	

CONTRACT CHANGE ORDER

29. DEPARTMENT OF HUMAN SERVICES (DHS), LANSING - CCO No. 3 for Lease No. 6233 approved by the State Administrative Board on December 30,1983, between Ingham County, as Lessor, and the State of Michigan by the Department of Technology, Management and Budget for the Department of Human Services as Lessee. This CCO provides for architectural and engineering services needed to devise a detailed and actionable plan for remodeling some of the leased space at a cost not-to-exceed $4,850.00. The space is located at 5303 South Cedar St., Lansing, MI 48911.

APPROVED
August 1, 2014
DIRECTOR
DEPARTMENT OF TECHNOLOGY,
MANAGEMENT AND BUDGET

Purpose/Business Case:
The purpose of this CCO is to have the Lessor contract for architectural and engineering services needed to devise a detailed and actionable plan for remodeling some of the leased space.

Benefit:
This CCO will produce a remodeling plan featuring the addition of staff training rooms that were lost when a Saginaw DHS office was closed and its staff was relocated to the DHS Lansing office.

Source of Funds:
66% Federal Funds
34% General Funds

Commitment Level:
Present through December 31, 2014; however, DHS wishes to formally exercise the Lessee's renewal option in the Lease, which would extend the Lease term to January 1, 2020. This Lease contains a Standard cancellation clause with 60 days' notice.

Risk Assessment:
Non-approval of this CCO will hinder the Department from planning to recover from a lack of adequate staff training space which arose as a result of closing the Saginaw office and consolidating the Saginaw and Lansing staff in Lansing.

Zip Code:
48911

WR Ending August 8, 2014

Section Manager: Irene Henry, Project Management Section 'A'

Meetings on moving the historic Grant House, MVAA Veteran's Home conditions, state Christmas Tree, MICHSpec revisions. Completing updates to the project director position descriptions.

Bob Adams:

Design:

DNR Mackinac Island SP – Road Repairs (Huron, W. Bluff, Rifle & Arch Rock) – Met with Director for project kickoff meeting.

DNR Union Bay BAS – Received agency request for ISID and approval. Issued ISID RFP.

Bidding:

DNR Mackinac Island SP – Visitor's Center Roof – Bids received. Best value process started.

DNR Mackinac Island SP – British Landing Restroom Roof - Bids received. Best value process started.

DNR Mackinac Island SP – Roof Improvements - Steward's Quarters & Morgue – Post bid addenda received. Construction contract award to Director's Agenda for approval.

Construction:

DNR Pine River BAS Development – Construction started.

Scott DeKorte:

New Projects:

DCH State Lab – Security Improvements - Conducted scope review meeting with contractor prior to issuance of ISID contract.

DNR Grant House Relocation – Conducted PPP meeting with agency.

Project Closeout:

MDOC Handlon CF Fire Alarm Upgrade – Conducted substantial completion meeting for phase I.

Joel Gordon:

Annual leave.

Gerald Gregorski:

Annual leave.

Jan Miller:

Accomplishments:

Proud Lake SP Toilet Shower Building – DTMB, DNR and contractor all signed the settlement agreement authored by the Attorney General's Office regarding the siding, trim and caulk issue.

U of M Ann Arbor, G.G. Brown Lab Building Renovation – Reviewed bid tabulations and authorized the University to award construction contracts for the remaining 11 trades.

Potential Issues/Solutions:

Muskegon Community College, Science Laboratory Center – Debbie Roberts and I visited the college on 8/7 to meet with the President, Vice President, Finance staff, Architect and Construction Manager. We discussed their Phase 400 Preliminary Design submittal, SBA bonding limits and schedule. The college would like to expedite phase 1 in order to get the foundations in the ground before winter. We discussed strategies to help them move forward on this.

Flint State Office Building Interior Renovations – B&B Construction has not been able to produce an acceptable overall schedule. Met on site 8/8 with WTA, B&B and Agency to explain scheduling and review their latest draft. It appears to be acceptable.

New Projects:
DNR Silver Lake SP BAS Relocation Design – DNR Waterways released funds to continue the project for phases 400 & 500. Project had been on hold for a couple of years after the concept plan was developed. Received a contract modification from the PSC and submitted it for the Director's Agenda for the 8/15 approval.

Dave Sproul:
Accomplishments:
MDOC, MR Power Plant, Replace DeAlkalizers and Water Softeners – Completed review of the final bid documents. Beginning advertisements the week of 8/11. The pre-proposal meeting has been set for 8/18 and bids are due on 8/27.

DCH, Caro Center, Fire Alarm Replacement – Completed my review and comments concerning bid documents to provide for asbestos abatement to support the fire alarm system at Caro Center. Building No. 15 has asbestos materials that will require abatement has part of the new fire alarm system.
New Projects:
DCH, Hawthorn Center, Maintenance Projects – Met with Hawthorn Center agency staff and Century A&E to continue our review and development of bid documents concerning the numerous small scope projects. We are working to have a bid document ready shortly to install a new outdoor recreation area and increased security fencing.
Potential Issues:
MSP, SEOC – We met with State Police to discuss a plan and strategy to investigate possible scope reductions to resolve the $3M bid overage. PARTNERS In Architecture has the task of developing cost estimates for various scope reductions and State Police will need to provide direction accordingly.

Steve Urban:
Accomplishment:
DNR Shiawassee Game Area Bridge Design – Conducted project design kickoff meeting with DNR and design professional (Williams & Works).
Construction Starts:
MDOC Gus Harrison Roof Renovations – South Side Phase I – Conducted roofing pre-installation meeting at facility. Work to begin 8/12.
Potential Issues/Solutions:
SOS Bldg. LSHC Transformer Settling – Provided IT and BOD with 2 construction cost estimate options to correct the out of plumb switch gear. The cost of the first option of $27,500 would split 50/50 between IT and BOD. This option would involve removal and reinstallation of switch and providing new pad. The cost of the second option in the amount of $35,000 would be funded entirely by IT and would involve the addition of a yard drain as well as regrading of the areas near the gear. If option 2 is selected option 1 must also be implemented.

MSP - PTA Shooting Range Ventilation Study and Unit Replacement – Met with MSP and BOD to discuss scope of work. It is desired that the entire shooting range ventilation system be entirely replaced due to age and operating issues (this will be confirmed by the study). Replacement can only occur between October 2014 and end of January 2015 due to recruit school training. At this point it seems that there may not be sufficient time to procure engineering services, design a new system, solicit construction bids and remove and replace the system. Engineering funds are currently in place; however, construction funds are not yet available. Construction costs are estimated at $650,000 minimum. I will be meeting again with BOD and MSP this week to discuss further.

Section Manager: Harold Belcher, Project Management B
DCD Manager's meeting; attended Port Austin Harbor Ribbon Cutting; 1x1 with Mr. Hall; meeting with DMVA to discuss new statewide security project; HAL database.

Chris Bahjet

Accomplishments:

Macomb Correctional – Replace Air Handling Unit (Design/Build) – The agency supported the idea of recording the training on electronic media. Since the training on this unit will be applicable to other facilities using the same system, the agency supported the concept of recording the session professionally on a CD to be used by other facilities. No other bulletins of changes were needed for this contract. This contract will end with a credit to the State minus the cost of the recording.

New Projects:

DMVA- Detroit Light Guard Armory – Phase 5 - Held the PPP meeting together with the agency and PSC. The agency requested using the same PSC currently working on phase 4 and also on the ISID list. Their request was approved. At this meeting we reviewed the new work scope which includes mainly the roofing, site repairs and also indoor modifications. Timeline, budget and other expectations were reviewed as well.

DTMB – Cadillac Place - Connecting the snow melt under sidewalks to existing steam source. A recent request was made by building management to add this work scope to existing contracts to encumber funds before end of fiscal year. Met with the professional who designed the snow melt system (ending at a header at the basement) and the contractor who installed the boilers and derived a project scope. All efforts will be made to complete this request.

Potential Issues/Solutions:

DCH – Walter Reuther Hospital – Potential issue is the need to separate sources of funding and yet make timely payments to vendors. Solution - Arrange for another meeting with DCH to continue the efforts in this regard.

DCH – Walter Reuther Hospital – Activity Building - Potential Issue - Compliance with NFPA and the requirements to keep exits open during construction. Solution - Met with team and we agreed to install a concrete sidewalk to allow for an emergency exit.

Tim Hall

New Projects:

MDOC Women's HVCF Prisoner Services – Conducted 90% design review for renovation project with CHMP and MDOC; release for bids targeted late August.

MDOT Blue Water Bridge HVAC Replacement – Conducted design review with DB contractor and scheduled design review with MDOT and BWB staff.

MDOT SW Region Lab Renovation – Design review meetings with Tower Pinkster preparing for 90% review with MDOT and SW Region lab staff and final funding approval from MDOT.

MDOC Women's HVCF Utility Tunnel Upgrades – Conducted pre-proposal meeting for seven PSC firms to design and engineer steam, condensate, chilled water and compressed air replacements in tunnel systems.

Bruce Hassen

Accomplishments:

A bid addendum was issued to answer questions and circulate the attendance list for the Camp Cusino demolition project.

New Projects:

The Camp Shawono LUST project is being re-launched. The professional will meet with DTMB to discuss the DEQ closure rejection issued in 2010 and what to do next.

Chris Kulhanek

Accomplishments:

Forest Fire Experiment Station – The contractor has agreed to accept DCD's decision on splitting the cost of the change request for the ground thaw equipment. This saved the State approximately $43,000.

Construction Starts:
New Buffalo Weigh Station – Pre-con meeting held on 8/6. The design/build contractor has requested a time extension due to equipment lead times. MSP is considering.

Rashmi Patel
Accomplishments:
Jackson State Office Building, Parking Lot - Received Electronic copy of as built drawings.

MDOC – DWH and C-Unit Entrance Road - Contractor has started phase II work. Notified contractor to clean fence debris at the end of each working day.

MSP Training Academy - Storm Drain Upgrade – Attended mandatory pre-bid meeting and issued addendum. Bid is due next week.

MDARD - Metrology Laboratory - Resurface Parking Lot - Advertised project for construction bid.

Sadi Rayyan
Accomplishments:
DMVA/MDOC Former Jackson Armory – Met with PSC and agency to discuss work plan and closure strategy. The goal of the closure is to satisfy the requirements of the environmental regulations, allow the current owner maximum flexibility in future developments, and result in human health exposures that are consistent with the Michigan State Housing Development Authority (MSHDA) funding polices.

Former Flint State Police Post – Discussed with PSC results of the recent soil/groundwater sampling and remediation options to clean up the site.

DEQ Manistique River AOC Site – Reviewed and recommended changes to the contract with ARCADIS for Installing passive flux meters in monitoring wells and sampling for PCB analysis.

DEQ Tel-Khi Truck Auto Plaza Site – Reviewed and recommended changes to the contract with Manik & Smith to perform pilot test, install monitoring wells and provide design/construction oversight.

DEQ Nolichucky Industrial Corp Site – Reviewed and recommended a contract award to EVR to remove and dispose of contaminated soils/groundwater and restore the site.

DEQ Memphis Shell Site – Reviewed and recommended changes to the contract with ERG to prepare specs/bid documents for in-situ chemical remediation and provide construction oversight and sampling.
New Projects:
MDOC Water Tower Engineering Evaluation at Various Facilities – Assigned to Nelson Tank Engineering & Consulting under their ISID contract for inspecting and evaluating the 250,000-gallon elevated water storage tanks at Marquette, Jackson and Coldwater Correctional Facilities.

DMVA Watershed Management Plan at Camp Grayling Training Center Site – Assigned to AMEC under the ISID contract for developing a watershed management plan to protect physical, chemical and biological integrity of Lake Margrethe.

Jud Sorensen
Annual leave.

John Spencer
Accomplishments:
DNR - Holt Tract acquisition survey along Rice Creek, Calhoun Co. continue survey, dealing with multiple funding sources among agency and County agency request for information.

DNR/MDOT - Met with MDOT over project at Cadillac, MI Railroad Corridor. We completed some survey work on it for DNR, which the DNR requester cancelled. MDOT gathered information at this meeting to

complete what we started as the owner of this corridor. Our file and CD of CAD file was presented and loaned for surveyor to scan and return to us when finished. This project is quite political at MDOT.
Non-Project Related Activity:
We completed 1 on 1 meeting with staff over IPM reviews and objectives for new IPM's to be completed in HRMN by 9/1.

Terry O'Brien
Accomplishments:
SESC inspection completed for DNR Wilderness SP and DNR Oden Fish Hatchery. SESC plan review completed for MDARD Metrology Lab.

Bruce Watkins
Nothing significant to report.

Section Manager: Dennis Stamm, Project Supervision
Nothing significant to report.

Section Manager: Pat Mullen, Contract Services

Section Manager: Irene Henry, Project Management Section 'A'

Preparing and revising RFP language for Belle Isle Aquarium and Conservatory; DNR now wants the project to be solely for the heating system as the Belle Isle Conservancy is now going to seek Kresge Foundation funding for the restoration planning. Completing sign-offs on staff performance reviews and plans. Participated in a kickoff walk-through at the Grand Rapids Home for Veterans to assist MVAA with part of its Strategic Plan relating to their infrastructure planning.

Bob Adams:

New Projects:

DNR Tahquamenon Falls SP Upper Falls Overlook Inspection – Initiated project statement for PSC proposal solicitation.

DNR Union Bay BAS – Reviewed PSC ISID proposals with agency and recommended award to OHM.

Design:

DNR Straits SP Lower Campground Toilet Shower Buildings Replacement – Received 50% phase 500 design report and initiated review.

Bidding:

DNR Presque Isle Dam Repair – Conducted conference call regarding bids received over budget with PSC and agency. PSC issued post bid addendum.

Construction:

DNR Thompson Fish Hatchery Asphalt Repairs – Attended substantial completion meeting and walk-through.

DNR Brimley SP Sewer Repairs – Attended substantial completion and closeout meeting with contractor.

Projects Complete:

DNR Stateline Rail Trail – Reviewing final closeout package with PSC.

Scott DeKorte:

New Projects:

MDOC Brooks CF Roof Renovation – Conducted pre-bid meeting.

DTMB Hannah/Ottawa Piping and Restroom Renovations – Conducted kickoff meeting with PSC.

DTMB GOB Piping and Restroom Renovations – Conducted kickoff meeting with PSC.

Joel Gordon:

Nothing significant to report.

Gerald Gregorski:

New Projects:

DMVA Grand Rapids Home for Veterans Networked Door Access Control and Video Surveillance System – The PSC completed the interviews and evaluations of the two lowest bidders. Their recommendation for contract award to the low bidder, Parkway Electric, was submitted to the 9/11 State Ad Board Agenda.

DMVA Grand Rapids Home for Veterans Chiller Replacement – The PSC completed the interviews and evaluations of the two lowest bidders. Their recommendation for contract award to the low bidder, Robbert Construction, was submitted to the 9/11 State Ad Board Agenda.

DMVA Grand Rapids Home for Veterans McLeish Building 4th Floor Remodel – The two firms with the top scoring proposals were invited to give presentations to the selection team to help further evaluate their capabilities. The selection team met after the second of the two presentations and unanimously decided to recommend TowerPinkster for the contract award, the firm with the highest scoring proposal.

DTMB Grand Tower AHU Replacement – The pre-bid meeting and site walk-through was well attended by over twenty contractors. The construction bids are due 9/10.

Construction Starts:
DMVA Grand Rapids Home for Veterans Backup Generators – The contract award for the recommended bidder, Robbert Construction, was approved on the State Ad Board Agenda and a pre-construction kickoff meeting has been setup for 9/23.

MDOT Metro Region Office HVAC Replacement – The construction is proceeding on schedule. The new LED lighting fixtures have been delivered, the new supply air distribution trunk ductwork is in place above the ceiling, and the new ceiling grid installation is 50% complete. All major mechanical equipment in the penthouse is installed, piped, and wired. The hydronic heating system is complete and pressure tested.
Non-Project Related Activities:
I participated in a joint facility infrastructure and capital planning review at the Grand Rapids Home for Veterans (for the MVAA's Strategic plan) with representatives of DTMB Building Operations and Design and Construction divisions and DMVA facilities.

I participated in the initial TRIM work session as part of the team implementing electronic record keeping for the Design and Construction Division.

Jan Miller:
Annual leave & family leave.

Dave Sproul:
Accomplishments:
DCH Hawthorn Center Outdoor Sports Fields – Conducted the mandatory pre-bid meeting concerning new basketball and baseball fields for Hawthorn Center. The project will also include upgrading the existing outdoor fence system with additional height. This initial bid package is part of the overall maintenance project for Hawthorn Center.

DCH Caro Center Fire Alarm Replacement – Received five bids for the asbestos abatement scope to support the new fire alarm system within Caro Center. The bids are being reviewed by our design professional and a recommendation will be provided shortly.

MDOC Ionia Energy Performance Project – Met for our regularly scheduled progress meeting and ESG presented their short term schedule outlining their on-site engineering and design development activities. We will be meeting every 2nd and 4th week of each month as regularly scheduled progress meetings. MDOC is assessing and developing their options to provide the required security escorts.
New Projects:
DNR Roscommon Customer Service Center – DNR is preparing the required MOP to fund the heating control valve work requested at the Roscommon Customer Service Center.
Potential Issues:
MSP SEOC – Met with PARTNERS In Architecture and Daniels Building Company/Christman Company to review and discuss the proposed post bid cost reductions. Daniels Building Company/Christman Company will be confirming the actual reductions provided by PARTNERS.

Steve Urban:
New Projects:
DHS Maxey School for Boys, Maintenance Pole Barn – Held initial design kickoff meeting with DHS at Maxey. Due to the small size of the project, an ISID contract with a design professional makes the most sense to utilize.
Potential Issues/Solutions:
SOS Bldg. LSHC Transformer Setting –Held pre-bid meeting with 3 invited contractors for the project. Bids are due 9/8.

MSP - PTA Shooting Range Ventilation Study and Unit Replacement – Submitted PSC contract for Directors Agenda approval.

Mason Building Renovations – Heavy rain events during the week had caused flooding to occur at Mason Building entrance lobbies and Allegan Ramp lower level. At this time it has been determined that flooding was due to Board of Water & Light storm/sewer system operational issues. There is a possibility that the sudden storm water surge pressure has damaged BOD storm water line in Allegan Ramp. BOD, DCD and CSM team will discuss today and develop an action plan.

Section Manager: Harold Belcher, Project Management B

DCD/BOD Subgroup meeting; Michigan Asset Executive Information System (MiALEIS) review meeting; HAL; IPM's

Chris Bahjet

Potential Issues/Solutions:

DNR – Pointe Mouillee – Shop Addition – The issue is Monroe County sent a letter to the owner expanding on their original requests to issue a permit and it was not clear who will be handling which issue. Solution: Held a conference call to address each issue and assigned a party to handle.

DNR – Selfridge BAS – Issue: The discovery of many buried large pieces of concrete and trash made grading difficult. DNR made a request to provide power to the beacon as requested from Border Control to keep the beacon lit. Solution: Visit the site and review the test pits to examine the extent of the buried trash and possibility of providing temporary power. Result is we made an agreement to compensate the contractor for the cost of trucking only and not the cost of disposal. Contractor agreed to expedite the permanent power to the beacon with no need for temporary power.

Tim Hall

Accomplishments:

MDOC Women's HVCF Utility Tunnel Upgrades – Conducted committee evaluations of PSC proposals and completed selection and preparation of agenda recommendation.

MDOC Women's HVCF Paving – Reviewed documents and work remaining to be completed from prior contract with Dennis Stamm; received approval for ISID PSC to accommodate MDOC expedited requirement to comply with Dept. of Justice and scheduled review meeting with PSC to confirm scope for proposal preparation.

DNR Rose Lake Field Office Renovations – Conducted pre-bid meeting, issued addendum and bids on schedule for submittal next week.

Bruce Hassen

New Projects:

The kickoff meeting for the professional that will prepare bid documents and oversee the demolition and site restoration at Camp White Lake (formerly the Gilman Technical Rules Violation Center) was held on 8/25 at the site.

Chris Kulhanek

Nothing significant to report.

Rashmi Patel

Accomplishments:

Jackson State Office Building, Parking Lot - Contractor has completed asphalt paving for the phase one. Building entrance traffic will be re-routed on Monday and phase II work started.

MDOT Photo Lab Electrical Upgrade – Attended progress meeting. Contractor replaced main distribution panel and switched back building power. Remaining work will be scheduled to be completed within next month.

MDARD Metrology Laboratory - Resurface Parking Lot - Received construction bid. Sent copy to MDARD for review, funding and alternate options.

Sadi Rayyan

Accomplishments:

MDOC Western Wayne Correctional Facility – Met with the agency and PSC at the facility. PSC collected information to update the Waste Distribution Study Report. Report is due by mid-September. Received a proposal to conduct hazardous materials survey at the facility. The cost of the survey is estimated around $23K!

DEQ Alcott St. Dam Removal Site – Met with agency to review the bids received to remove the dam. All bids are over the allocated fund and will be rejected. Bids were compared with the PSC's estimated project cost and options to proceed with the project were discussed.

New Projects:

DEQ Abandoned Pipeline Assessment Site – Assigned to Fleis & VandenBrink Engineering under their ISID contract to conduct a survey of the area of concern and collect necessary data to evaluate options for the removal of the pipeline while minimizing disruptions to the ecosystem along the shoreline/river.

Non-Project Related Activities:

Attended DTMB Town Hall meeting.

Jud Sorensen

Potential Issues/Solutions:

Due to added scope, including the addition of fencing around one of the new HVAC units and the need to replace 16 plugged reheat coils within the existing supply ducts for the Cooper Street Correctional Facility Administration Building HVAC Renovation project, it has been agreed to extend the Shaw Winkler contract date of substantial completion from 7/29 to 9/5. Due to poor project management and supervision, Shaw Winkler may or may not meet this new date. The professional's punchlist prepared 7/24 was considered to be beyond a list of minor items that would not materially impair the use of the work by the agency and Shaw Winkler's subcontractors have been very slow in making the necessary corrections. In addition, Shaw Winkler had failed to include contract required duct cleaning and is now scrambling to get that completed. Shaw Winkler has been notified that failure to achieve substantial completion by 9/5 will result in the issuance of a notice of non-compliance including a notification to their bonding company and the assessment of liquidated damages against their contract.

John Spencer

Nothing significant to report.

Terry O'Brien

Nothing significant to report.

Bruce Watkins

Nothing significant to report.

Section Manager: Dennis Stamm, Project Field Representatives

Accomplishments:

Filled in for the Project Director at the Flint State Office Renovation progress meeting.
Visited the St. Charles DNR field office and project site.

Projects Status:

WHVCF – Parking & Sidewalk Replacement – I held a meeting with the contractor on site to discuss project closeout.

Small Projects Status:

Bellamy Creek Propane Conversion – Bids came in above project budget, so I've asked MDOC what they want to do about a contract award.

MSP – Monroe State Police Window Replacement – I reviewed and approved all the project shop drawings this week.

MSP – Airport Hanger Door Snow Melt System – MSP issued an increased MOP to cover the bid price of the contract. I made a recommendation with a justification to award a contract to be approved on the next Director's Agenda.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending September 12, 2014
Section Manager: Irene Henry, Project Management Section 'A'
Sharepoint training two days; phone conference with DNR to set Belle Isle dates and completed the Belle Isle RFP/bid set, continuing with office design standards.

Bob Adams:
New Projects:
DNR Cusino Wildlife Research Station Pole Building – Conducted pre-scope site visit and met with DNR project contact to discuss scope and site history.
Design:
MDOC Camp Baraga Demolition – Attended design kickoff meeting.
Bidding:
DNR Presque Isle Dam Repair – Attended township board meeting with DNR to provide bid document, bidding process and budget information to assist in the process of deeding the dam from DNR to Marenisco Township after construction is complete.
Construction:
DNR Mackinac Island SP Steward's Quarters and Morgue Roofs – Conducted pre-con meeting.
Projects Complete:
DNR Thompson Fish Hatchery Asphalt Repairs – Performed site visit to verify that all final completion items had been done.

DNR Iron Industry Museum New Highway Sign – Conducted final inspection to confirm completion of punch list and agency satisfaction. Closeout in process.

Bay College Nursing Lab – All work is complete; PSC and contractor working on closeout documents.

Scott DeKorte:
New Projects:
DNR Holland SP Accessibility Project – Conducted kickoff meeting with PSC.
Construction Starts:
MDOC Michigan Reformatory Gymnasium Roof Renovations – Conducted pre-construction meeting.
Project Closeout:
MDOC Bellamy Creek Dormitory Fire Alarm Upgrade – Conducted substantial completion meeting.

Joel Gordon:
Nothing significant to report.

Gerald Gregorski:
New Projects:
BOD Grand Tower AHU Replacement – All three bids received for the construction were within about 15% of the low bid which was within 5% of the engineers estimate. The PSC has begun scheduling post bid interviews and evaluations for all three bidders. The service agreement with BWL for the new chilled water service line was signed by BOD and BWL held the pre-construction meeting for its construction. The project has only been funded for design and the BWL service line. A significant amount of funding needs to be added to the project in FY15 to proceed with the construction.

DMVA Grand Rapids Home for Veterans Networked Door Access Control and Video Surveillance System – The contract award recommendation for the low bidder, Parkway Electric, was approved on the 9/11 State Ad Board Agenda.

DMVA Grand Rapids Home for Veterans Chiller Replacement – The contract award recommendation for the low bidder, Robbert Construction, was approved on the 9/11 State Ad Board Agenda.

Construction Starts:
DNR Below Ground Sewer and Water Study at Eight Parks – The pre-construction kickoff meeting was held at William Mitchell State Park for the storm water system upgrades. The contractor plans to mobilize on site by mid-September.

DNR Fisheries Little Manistee Weir Enhancements – The project team held a meeting on-site to identify additional work that could be included in the trust fund grants funding balance. The PSC will issue a bulletin to the contractor with any approved extra work proceeding after the fall salmon egg-take.

BOD Traverse City SOB Renovate Ground Floor Restrooms – Held the pre-construction meeting with Spence Brothers. The contractor will not mobilize on site until long lead time materials are delivered to minimize the down time of the only public accessible restrooms.

DNR Interlochen State Park – North Campground Electrical System Replacement/Orchard Beach State Park – Utilities Replacement and Upgrade – The project team held a special site meeting at Orchard Beach State Park to review the wash out at the new storm water outfall to Lake Michigan caused by the weekend's heavy rain event. Repair of the wash out and long term correction of the problem will probably be a combination of warranty and added scope work. The team also discussed some additional grading and drainage improvements at four camp sites and possible re-seeding of some areas.

Jan Miller:
Accomplishments:
Attended DTMB Director David Behen's Town Hall Meeting 9/8 as he discussed the Strategic Plan FY2015 – FY 2019.

Attended "How to Survive a Troubled Project" webinar 9/10.

Flint State Office Building Interiors Renovations – Mary Kay Hawes, DTMB Real Estate, has been assigned as move manager to assist with agency moves in the building.

DNR Shooting Ranges New Toilet Facilities – Held final punchlist meeting on site at Sharonville 9/12. Still waiting for final inspection from Amerigas before certificate of occupancy will be issued for this location; the other 2 sites have been completed.
New Projects:
DNR Maybury State Park Trail Improvements – Held PSC kickoff meeting on site 9/9. Project is scheduled to be bid in January with construction starting in April 2015.

Dave Sproul:
Nothing significant to report.

Steve Urban:
Accomplishment:
MDOC Saginaw Roof Replacement Project – Conducted a construction pre-bid meeting at the site for Roof Repair Project. Bids are due Sept. 17.
Potential Issues/Solutions:
Pine Street Parking Lot Renovations – Conducted a construction warranty walk-through inspection with engineer (Nowak & Fraus), contractor (Rieth-Riley), BOD, parking office to review construction problem areas prior to construction warranty expiration. Contractor will re-stripe phase I parking lot area, provide concrete curb and parking lot asphalt surface repairs in select areas, re-seed lawn in selected areas and replace dead trees in selected areas. These defects are not serious in nature. A concern is ongoing soil erosion at rain garden area due to heavy rain events during the past few weeks. Engineer is to review and access the existing parking lot underdrain system. This problem may be due to Board of Water & Light existing storm sewer system design at Pine Street.

Section Manager: Harold Belcher, Project Management B

HAL; Staff/Manager meetings; meeting with Noresco regarding Jackson EPC; meeting regarding Camp Cusino FOIA.

Chris Bahjet

Accomplishments:

DCH – Walter Reuther Hospital – Multiple Projects – Met with Kris Garrison, Rob Telesz and Kristen Jordan. The aim is to review the status of the current seven MOPS and work orders, three projects and eight contracts. The goal is to separate funding for each funding source, make timely payments and recognize the balance for potential change orders. Met with the project PSC to review PSC's obligation.

DTMB – Cadillac Place - Sidewalks Phase 2 – Continue meetings with the project team to look into the recently discovered issue of the brick ledge supporting the new granite. The aim is to find a solution and keep the schedule of having the project completed this year. It may be best not to start demolition on the 4th side (2nd Ave) this year before completing Grand Blvd & Cass Ave. Operations would like to see the project finished this year.

Other non-project activity:

Attended a seminar, How to Survive a Troubled Project.

Tim Hall

Nothing significant to report.

Bruce Hassen

Construction Starts:

A kickoff meeting was held for the redevelopment project at Camp Baraga at the site on 9/9. The meeting was attended by DTMB, the professional, the Department of Corrections, the DNR and DEQ. We tentatively planned to bid the demolition work late in 2014, but will not begin that work until winter road restrictions are lifted next year.

Chris Kulhanek

Accomplishments:

Local television station WILX News 10 did a special report recently on Camp Grayling which featured several of our projects designed for training soldiers such as the Combined Arms Collective Training Facility (CACTF). The story and video can be viewed at this link:
http://www.wilx.com/news/localnews/headlines/Special-Report-War-Games-274034171.html

Projects Complete:

Kalamazoo Psychiatric Hospital – IP Surveillance System – Project is complete and final payments have been made to the contractor and PSC.

Potential Issues/Solutions:

Roscommon Operations Service Center – Window Replacement – Complaints about fumes from interior caulk were received from the facility late last week.
Solution – A special meeting was held on 9/8 to discuss. Client Agency demanded immediate action and by Tuesday afternoon the contractor had personnel on site removing material. An alternate product was approved which is a non-VOC "green" material and should be installed by the end of the day, 9/22.

Rashmi Patel

Accomplishments:

MDOC-DWH and "C" Road - Attended progress meeting, received contract change order recommendation for top layer of non-lethal electric fence and scope change by MDOC.

MDOC- Various facility, Security System Improvements - Mandatory walkthrough meeting for the Security System Improvements with PSC.

MDOC- Southern Business Office, Resurface Asphalt Pavement - Progress meeting at the site, contractor is one week behind due to the milling machine scheduled. Phase one work is scheduled to be completed this week, phase 2 will start on 9/15.

MDOC- Southern Business Office, Masonry Restoration – Attended progress meeting at the site. Contractor is revising schedule of values. Progress is on schedule.

Sadi Rayyan

Accomplishments:

DEQ Richfield Landfill Site – Met with agency to discuss changes to the contract and payment requests submitted by the contractor.

DEQ South End Mobil Site – Reviewed and recommended an award of construction contract to MacKenzie to remove and dispose of contaminated soils and restore the site.

DEQ Flint Odyssey House & Tabers Oil Sites – Reviewed and recommended changes to the contract with ECT to assist the agency in the bidding process for the removal of the USTs, construction oversight, sampling and reporting.

DEQ AMCO Group#1209 Site – Bid specifications for installation of a groundwater recovery/treatment/infiltration system; excavation of petroleum impacted soils; backfilling with RegenOx PetroCleanze product and site restoration posted on Buy4michigan. Bids due on 10/1.

DEQ McLeieer Oil Site – Bid specifications for excavation of petroleum impacted soils; backfilling and site restoration posted on Buy4michigan. Bids due on 10/8.

New Projects:

DEQ Clear Lake Site – Assigned to Manik & Smith under their ISID contract for remedial investigation and feasibility study services.

DEQ 103 Market Site – Assigned to Manik & Smith under their ISID contract for remedial investigation and feasibility study services.

Construction Starts:

DEQ H&Z Oil Site – Field activities for building demolition, soil excavation and site restoration begin 9/3 with substantial completion by 12/2.

Non-Project Related Activities:

Attended How to Survive a Troubled Project Webinar.

Jud Sorensen

New Projects:

A pre-proposal meeting was held with interested professionals for the Department of Agriculture and Rural Development Geagley Laboratory facility to provide design and construction administration services for the upgrade of the existing elevator and to add lighting control occupancy sensors. In addition, this project will study and provide recommendations on ways that exterior walls within the original 1957 building can be insulated to improve occupant comfort.

Construction Starts:

A pre-construction meeting was held on 9/10 for the Records Building Loading Dock Roof Replacement. Work will include total deck removal and replacement, new insulation and a new roof membrane. Work will likely start in early October and is to be complete by mid-November.

A pre-construction meeting was held on 9/11 for Walnut Street Pedestrian Bridge improvements. Concrete within the existing bridge concrete abutments and beams has experienced significant deterioration requiring that the bridge be temporarily supported as deteriorated concrete is chipped away, steel reinforcement is cleaned of rust and repaired and concrete is replaced. Work is scheduled to start the week of 9/15 and be complete by mid-December.

John Spencer

Nothing significant to report.

Terry O'Brien
Nothing significant to report.

Bruce Watkins
Accomplishments:
Shiawassee State Game Area – Water Level Control Structure – The acceleration by the contractor appears to have been successful. The flooding of the game area was begun on 9/8 and the area should be full by the end of the week. The backfilling of the dam and the removal of the temporary cofferdams is completed and the dam is holding water very well at the design water level for flooding. Next week the contractor will be installing rip-rap and the remaining downstream (tailwater) restoration.
Construction Starts:
Michigan Reformatory – Alternate Fuel AST Upgrade – Held pre-construction meeting. Construction will begin this month.

Lakeland Correctional Facility - Alternate Fuel AST Upgrade – Held pre-construction meeting. Construction will begin this month.
Potential Issues/Solutions:
Harrisville State Park – Held a late meeting to discuss the remaining items on the punchlist that became evident over the summer use season. A final meeting will be scheduled for early October to see everything completed. Also, there is still discussion about the repairs to the building to remove the drooping eaves. The contractor and PSC are still working on a repair method that will work.
Non-Project Related Activities:
DNR-PRD – Port Crescent State Park – Assisted park staff to review iron removal treatment system. Discussed proposed unit with contractor to identify method of iron removal. Discussed the proposed work with the contracting agent for DNR and concurred with the contracting agent that the local health department should provide clearance for this product in lieu of use of a design professional. The unit introduces air as the source of oxygen as the oxidizing agent for the iron. Health agencies typically require post chlorination in systems that introduce outside air. Staff were made aware of this typical requirement and will post chlorinate should it be deemed necessary.

Section Manager: Dennis Stamm, Project Supervision

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

New Projects:

DNR Warren Dunes SP Day Use Area – Proposals have been received from 9 PSC firms. A proposal review meeting will be conducted the week of 10/6.

Construction Starts:

DNR Oden State Fish Hatchery Emergency Glass Replacement – The replacement glass has successfully been installed and the stream returned to its original course. This has been a very interesting, well-coordinated effort by all parties. The substantial completion meeting is scheduled for 10/1.

Projects Complete:

DNR Hoeft SP Pavilion Restoration – The work of the original contract is substantially complete. The DNR has added funding to the project and a contract change order has been approved to change the scope of the project to include re-roofing the pavilion. It is expected that this work will be completed in less than four weeks.

Gerald Gregorski:

Construction Starts:

MDOT Metro Region Office HVAC Replacement – A recommendation for contract change order number three, for ultra violet protective window film coating, was submitted to the next Ad Board. The substantial completion, including added ceiling, LED lighting and window work, is still on schedule for 10/31.

DTMB Joint Lab Replace HVAC Controls – A recommendation for contract change order number three, for a number of small work scope additions, was submitted to the next directors' agenda. All base scope of work is nearly complete with the substantial completion meeting scheduled for 10/1.

MDOC Personal Emergency Location Systems at Eight Locations – All hardware installation is nearly complete at Egeler and the contractor expects to start system calibration within the next couple of weeks pending delivery of the last four sensors. System calibration is a long detailed process that will require several weeks to complete. Egeler should be the first of the eight sites included in this project to have a complete fully functional system.

Projects Complete:

DMVA/Grand Rapids Home for Veterans - Exterior Window Replacement in McLeish Building – The final substantial completion meeting and punchlist walk-through was held. All windows have been successfully installed with minimal disruption to the facility operation. The punchlist contained only a small number of minor items.

Non-Project Related Activities:

I participated in the TRIM work session as part of the team implementing electronic record keeping for the Design and Construction Division.

I participated on the professional services proposal review and interview team for the BOD Controls and Commissioning Specification Development project.

Jan Miller:

Accomplishments:

Muskegon Community College, Science Laboratory Center – Reviewed and approved final design on 9/18 and authorized the college to proceed to bidding for bid release #2.

Potential Issues/Solutions:
Flint State Office Building Interiors Renovations – The contractor, B&B, has not been following their schedule and falling behind. In an attempt to help them, I introduced Dean Barr to the project team as an expert scheduler. He will assist B&B in working with their software. He will try to help them expedite and stay on schedule as it is impacting the SOM flooring, furniture and IT forces.

Dave Sproul:
Accomplishments:
MDOC Thumb CF Water & Sewer System Improvements – Conducted a design kick-off meeting. The City of Lapeer has issued 2 directives to MDOC to repair the existing bar screen and grinder systems and install a new code compliant reduced pressure backflow preventer (RPZ) on the incoming domestic water supply for the facility. The project team of C2AE, MDOC agency staff and DCD met with the city to establish contacts and review the scope requirements as we move forward.

DCH Hawthorn Center Various Maintenance Projects – Finalized the construction bid documents and released them for advertisement. DCH requested some last minute scope changes that required specification revisions and ranking of the listed deductive alternates. Project bid will be due on 10/1.
New Projects:
DNR Roscommon Operations Service Center – Reviewed and discussed construction scheduling, installation details and work process for the heating system upgrades at the Roscommon Facility. The contractor is set to begin on 9/22 and complete the upgrades in one week.
Potential Issues:
MSP SEOC – Continuing to confirm proposed cost reductions and met with the Daniels/Christman team, continuing to make progress for confirming project cost reductions. Daniels/Christman is working to have final cost reduction numbers by 9/25.

Steve Urban:
Accomplishment
MDOC Saginaw Roof Replacement – Construction bids were due on 9/16. Royal West Roofing is the apparent low bidder. Recommendation for award has been placed on the Ad Board Agenda. The contract was within budget.

Section Manager: Harold Belcher, Project Management B
HAL; Wind Funnels; Emergency Dredging.

Chris Bahjet

Bruce Hassen
Accomplishments:
We agreed to begin the project closure process for selective demolition at the former Newberry State Hospital this week.
New Projects:
A project to remove an underground storage tank at the Special Alternative Incarceration Facility (a.k.a. Camp Cassidy Lake) was approved and a kickoff meeting is being scheduled.

Chris Kulhanek
Annual leave.

Rashmi Patel
Accomplishments:
MDOC - Various Facilities, Security System Improvements - Received proposal from PSC firms.

MDOC - Southern Business Office, Resurface Asphalt Pavement - Contractor remobilized to start phase II work. Found concrete pavement under existing asphalt driveway and parking areas. PSC will issue bulletin to change pavement thickness and material to resolve issue.

MSP Training Academy – Storm Drainage Upgrade – Pre-construction meeting.

Sadi Rayyan

Accomplishments:

DEQ Alcott St. Dam Removal Site – The bids for the removal of the dam exceeded DEQ's funding ceiling and were rejected. Discussed with DEQ and PSC options to modify scope of work/removal process and re-bid it.

MDOC Western Wayne Correctional Facility – Received draft summary update for the Waste Distribution Study. Reviewed and discussed with PSC revising the summary to include other options for addressing the contamination and provide an estimate for the hazardous materials survey, abatement and demolition.

DEQ Richfield Landfill Site – Progress meeting for the design/build contract held at the site. Discussed budget, changes, work stages, safety and schedule concerns. Project is within the budget and on schedule.

DMVA Fort Custer Training and Camp Grayling Training Centers – Reviewed and recommended changes to the contract with AMEC to support the agency in processes with due care needs at the Centers.

DEQ Bay Harbor Site – Reviewed and recommended changes to the contract with DLZ to provide mercury statistical analysis in groundwater, compare/analyze flux data for mercury including baseline, statistical trend monitoring and compliance.

DEQ Former Northern Oil Site – Reviewed and recommended changes to the contract with Environmental Quality Company to provide additional helical piles and increase the depth of the helical piles.

DEQ Americhem Site – Reviewed and recommended changes to the contract with Weston to remove the infiltration drain field and provide technical support for recovery system shut down activities.

DEQ Americhem Site – Reviewed and recommended changes to the contract with ECT to provide the support needed for the North and South Plumes bio-stimulation feasibility pilot test and provide O&M services for the expansion pilot systems through 9/30/15.

DEQ Frank's Services Site – Reviewed and recommended changes to the contract with AECOM to prepare specifications/bid documents, provide construction oversight, gas/groundwater monitoring and reporting.

DEQ Coe's Cleaners Site – Reviewed and recommended changes to the contract with Weston to provide design and construction specifications for the remediation system upgrade and additional O&M contractor oversight.

DEQ Thomas White Site – Bid specifications for excavation of contaminated soils; backfilling and site restoration posted on Buy4michigan. Bids are due on 10/22.

Non-Project Related Activities:

Attended "How to Terminate a Difficult Project Webinar".

Jud Sorensen

New Projects:

Sigma Associates, Larkin Engineering and Tower Pinkster were interviewed as a part of a PSC selection process for evaluation of the DTMB building automation system (BAS) controls implementation, recommendations for improvements, and BAS controls technical specification development. Based on proposal reviews, interview presentations and responses, the selection committee will be recommending that a contract be awarded to Tower Pinkster.

Construction Starts:
A pre-construction meeting was held on 9/17 for the Cotton Correctional Facility Administration Building HVAC renovations. Work will include replacement of HVAC and chiller equipment including replacement of pumps and VAV boxes and replacement of the building HVAC control system. Work will likely start in mid to late October and is to be complete by March 2015.

John Spencer
Accomplishments:
DNR - Holt Tract acquisition survey along Rice Creek, Calhoun Co. continue with survey research and field work activities.

SBA - Alpena CC; Electrical Power Technology; Completed additional carve out of Construction Technology building to finalize the survey for this SBA project. Delivered both the carve out survey and the SBA survey.

Terry O'Brien
Accomplishments:
SESC authorization completed for MSP Training Academy.

Bruce Watkins
Accomplishments:
Holly Recreation Area – Day Use and Campground Roads – Had a meeting with DNR, PSC and contractor to establish areas of repair for the day use roads, not repaired as part of the original work. DNR has additional funds remaining and would like as much repair work completed as possible.
New Projects:
Marquette Correctional Facility - Alternate Fuel AST Upgrade – Held pre-bid meeting. There were 6 contractors/subcontractors present for the meeting. This is a pretty good number for the fuel system specialty involved. The PSC (UP Engineers) was pleased with the quality of contractors available.
Construction Starts:
Michigan Reformatory – Alternate Fuel AST Upgrade – Held pre-construction meeting. Construction will begin this month.

Lakeland Correctional Facility - Alternate Fuel AST Upgrade – Held pre-construction meeting. Construction will begin this month.
Potential Issues/Solutions:
Dansville (DNR-WLD) - Shooting Range Improvements – The contractor has not done any work since the change order modification was completed. The vault toilet structure specified has a 60-90 day delivery date. The contractor will install the unit upon it arrival. The consultant has been instructed to continue with inspection reports to identify the work being complete and to keep on top of the construction schedule.

Highland Recreation Area – North-South Trail Connector – The contractor identified issues they are having with their main subcontractor (due to an illness in the family of the subcontractor). They have notified the sub of their contractual responsibilities and has assured the State that they have alternative action plans in place. The State has indicated that while we have sympathy for the subcontractor's situation. The project completion date has already been pushed back a number of times and the general contractor is responsible for the work to be completed. The reasonable completion date determined by the PSC (based on weather delays, etc.) will not be (admittedly) met by the general contractor. The project team will develop a stance on liquidated damages and substantial completion requirements.

Section Manager: Dennis Stamm, Project Supervision

Section Manager: Irene Henry, Project Management Section 'A'

Attended Construction Owners Association workshop, posted an information meeting for the Escanaba Bay Shore Road Bridge Demolition, working on lists of demolished or sold facilities and a crosswalk for buildings that have changed names to assist with records retention and electronic document storage. Reviewed 65 pages of lists of as-built files for the Records Center.

Bob Adams:

New Projects:

MDOC Newberry CF Enhancement of Interior Perimeter Security Systems – Initiated PPP process with MDOC project contact.

MDOC Kinross CF Perimeter Fence Security System Replacement – Initiated PPP process with MDOC project contact.

MDOC Baraga Max Level 1 H.U. Cube Enclosure – Initiated PPP process with MDOC project contact and set meeting up with UPEA to provide ISID proposal.

DNR Pioneer Trail – Initiated PPP process with DNR project contact.

Design:

DNR Cusino Wildlife Research Station Pole Building – Prepared design-build scope and contract documents in preparation for advertisement.

Bidding:

MSP Sault St. Marie Post HVAC Upgrades – Addendum posted on Buy4Michigan.

DNR Presque Isle Dam Repair – Received verbal from DNR that they have an agreement with Marenisco Township and to accept the low bid from IMS. We have requested from DNR a written notice to proceed with implementing the contract and have directed the PSC to provide the recommendation letter.

Construction:

DNR Pine River BAS – Attended progress meeting. Date was set for substantial completion walk-through.

MSP Negaunee Post Roof Replacement – Per a request from MSP, we have directed the contractor to provide a mold test at the facility due to the sensitivity of an occupant.

Projects Complete:

MDOC Newberry CF Boiler No. 1 Replacement – Final item of change order work was completed by contractor so that closeout can be finalized.

DNR Mclain S.P. Water System Upgrades – Sent closeout documents and final payment request to Lansing for processing.

Scott DeKorte:

Project Closeout:

MDOC Bellamy Creek CF Dormitory Fire Alarm Replacement – Conducted closeout meeting for the project.

Joel Gordon:

Nothing significant to report.

Gerald Gregorski:

Accomplishments:

DTMB Joint Lab Replace HVAC Controls – Construction was completed on schedule with the substantial completion meeting held 10/1. This was a complex project which replaced the entire building control system while keeping the laboratories operating safely. It required multiple short shutdowns of the various sub-systems which had to be closely scheduled and coordinated between the various contractors and BOD facilities and laboratory staff. Both the original and the new control systems were operating side-by-side throughout the installation as mechanical sub-systems were methodically cut over to and commissioned on the new controls over the space of a year. The fact that this project went so smoothly, in spite of having

such a high potential for both operational and safety issues, is a testament to the teamwork and attention to detail of everyone involved.

DNR Little Manistee Weir Enhancements – A ribbon cutting was held for the new viewing platform and accessibility enhancements with the DNR Fisheries Division Director attending along with representatives of "Explore The Shores", the group that acquired the DNR Trust Fund Grant.

New Projects:

DTMB Grand Tower AHU Replacement – A contract award recommendation for the low bidder, Laux Construction, was submitted to the 10/14 State Ad Board Agenda. The service agreement with LBWL for the new chilled water service line was signed by BOD and LBWL has begun construction of the new service line. A work order revision was issued from FY-15 funds supplying the significant amount of additional funding needed to cover the construction costs.

Grand Rapids Home for Veterans McLeish Building 4th Floor Remodel – The professional services contract award recommendation for Tower Pinkster was approved on the 9/26 Director's Agenda. The facility requested putting a hold on the contract execution pending a review of their overall capital budget and funding availability.

DNR Harrietta State Fish Hatchery Liquid Oxygen and Supplemental Heat – The bid advertisement for the dehumidification supplemental heat pump system for the indoor tank room was posted on Buy4Michigan with a voluntary pre-bid meeting scheduled for 10/13 and the bids due 10/22. DNR received the additional funding required in FY15.

Construction Starts:

DTMB Capitol Complex Controls Integration/EBI Replacement – The contractor has completed the change order additions to integrate the Hall of Justice lighting control panels and several stand-alone VAV box controls in the Hannah-Ottawa building in addition to the original base work scope. The substantial completion meeting was held on 10/9. Some minor additional work may be approved if funding allows.

MDOT Metro Region Office HVAC Replacement – The construction is proceeding on schedule with the substantial completion meeting scheduled for 10/29. This includes the added ceiling replacement, LED lighting, wall repairs, and window film coating. All major mechanical equipment replacements in the penthouse, added air supply distribution ductwork installation, and hydronic heating system improvements are completed with final startup and commissioning scheduled for the next week.

DTMB Capitol Complex Controls Integration /Utility Metering – Cochrane Supply hosted an All Agency Statewide Benchmarking Software Presentation at the GOB to demonstrate the internet accessible energy benchmarking tools they recently completed as an addition to this projects scope.

MDOC Personal Emergency Location Systems at Eight Locations – Held on-site project meetings and walk-throughs at Alger and Baraga, two of the facilities in the U.P. Delays in sensor production and delivery from SenStar are not yet affecting the project schedule, but have the potential to do so if not addressed soon.

DNR Below Ground Sewer and Water Study at Eight Parks – Storm water system repair work began at Mitchell State Park. The original scope of work called for only rehabilitation of the piping drainage cover layer for the majority of the piping system with full pipe replacement only identified for a few select areas. During the course of the pipe water jetting, video inspection, and covering removal, it was determined that the entire piping system is in much poorer condition than originally expected. Extensive root clogging, perforations, and corroded pipe walls are evident throughout the system. Full piping replacement is required to restore the storm drainage system to full functionality. The contract change order request to cover the full piping replacement was submitted to the 10/10 Directors Agenda.

Grand Rapids Home for Veterans – Chiller Replacement – The contract for construction of the full chilled water plant upgrades with Robbert Construction was executed and the pre-construction kickoff meeting held 10/7. Construction will be completed by April 2015 in time for the cooling season.

Projects Complete:
DNR Interlochen State Park North Campground Electrical System Replacement/Orchard Beach State Park Utilities Replacement and Upgrade – The final project closeout meeting and site walk-through was held at Interlochen State Park. This portion of the project will be closed out pending delivery of all final record drawings and O&M manuals, both paper and electronic versions.
Potential Issues/Solutions:
Grand Rapids Home for Veterans Backup Generators – The contract award for the recommended bidder from the best value bid evaluation process, Robbert Construction, was approved on the 8/12 State Administrative Board Agenda. The actual low bidder, Cadence Construction, protested the contract award prompting a review by DTMB Design and Construction Division management. The review lead to a decision to rescind the original contract award to Robbert Construction and to re-award the contract to Cadence Construction. The revised contract award recommendation was submitted to the 10/28 State Administration Board Agenda.

Jan Miller:
Accomplishments:
Flint State Office Building Interior Renovations – Contractor B&B Construction confirmed DHS move-in dates for 3rd and 2nd floors as 11/21 & 12/5 respectively. South entrance, skywalk and curb cuts will be complete by 12/5. Permit for the curb cuts was issued by the City of Flint on 10/9.

DCH Center for Forensic Psychiatry Maintenance Projects, Repair Patient Showers & Barrier Free Bathrooms – Held PSC kickoff meeting on 10/7 with Wigen Tincknell Associates Architects and the agency.

DMVA Midland Armory, FMS Additions & Renovations Phase 2 – Held pre-construction meeting on 10/8 with Cadence Construction and the agency.

Muskegon Community College, Science Laboratory Center – Reviewed and approved bid release #1 bid tabulations and authorized college to award construction contracts for this portion of the work.

Dave Sproul:
Accomplishments:
MSP Northville Forensic Laboratory Boiler Replacement – Reviewed and accepted the substantial completion concerning the boiler replacement for the Northville Forensic Laboratory. The contractor has some minor punchlist items to correct on the condensate piping and should be completely finished within a couple of weeks.

DCH Hawthorn Center, Various Maintenance Projects – Hawthorn Center has provided direction to proceed with the overall base bid scope for this project. The bid recommendation has been submitted for State Ad Board approval.

MDOC Ionia Energy Performance Project – Met for our regularly scheduled progress meeting and ESG is continuing with on-site engineering and design development activities. ESG will also be developing more details on the actual construction packages and bid schedule for required subcontractors. MDOC is also continuing to develop their options to provide the required security escorts.
Potential Issues:
DCH Reuther Hospital, Boiler Controls Replacement – DCH is working to identify additional funding to cover the received construction bid for the boiler controls replacement. Unfortunately, the bid is over budget by approximately $160,000 and DCH is evaluating their options.

Steve Urban:
New Projects:
MDOC St. Louis CF Door Replacement – Met with warden and facilities staff to review the scope of work. There are a number of security doors with frames and hardware that need replacement at housing units as well as dining areas and classroom areas. This may take some creativity in coming up with a design, procurement and construction methodology.

Construction Starts:
SOS Building Lake Superior Hosting Center Primary Electrical Switch Revisions – Held a final pre-construction meeting on 10/9 since construction is to start on Friday 10/10 at 5:30 pm. Work is to be completed by Sunday afternoon at which time the center will be placed back on standard power. LSHC will be operating on generator power during the course of this repair work.
Projects Complete:
Lewis Cass Building Fire Pump Electrical Revisions – Completed construction punchlist inspection with design professional and BOD skilled trades. BOD skilled trades completed all the work involved at a cost savings to the SOM, (at least $30,000). There were minimal items on the punchlist. BOD skilled trades did a great job in coordination and execution.
Potential Issues/Solutions:
MDOC Saginaw CF Pole Barn – Construction bids were due on 9/1. Only one bid received. MDOC would like to re-bid this work next spring due to the fact only one bid was received and the price seemed rather high.

Section Manager: Harold Belcher, Project Management B
HAL; MiALEIS testing meeting; meeting with DNR on siphon tube; meeting with Ed Vallad of MDOC on security projects.

Chris Bahjet
Accomplishments:
DMVA – Detroit Light Guard – Phase 4 – Completed and had the approval for an emergency change order to repair the boilers.

DNR-Point Mouillee – Shop Addition – Contacted Berlin Twp. regarding a citizen complaint regarding permits.
Non Project Related Activities:
Attended Town Hall meeting.

Tim Hall
New Projects:
MDOC Women's HVCF Emergency Bed Remodeling of Jennings – Received request from MDOC, met with staff and PSC to review scope for proposal and recommended ISID award to begin design to meet MDOC request.

MDOC Women's HVCF Utility Tunnel Upgrades – Conducted design kickoff meeting with PSC (FTC&H), MDOC and WHVCF project team.

DNR Rose Lake Field Office Renovations – Construction mobilized and completed approximately 60% of the re-roofing at Rose Lake and Maple River sites. Remodeling of offices for Wildlife Biologists also began.

MDOC Women's HVCF Prisoner Services Building – Project released for bidding on Buy4Michigan.

MDOT SW Region Laboratory – Project released for bidding on Buy4Michigan.

Bruce Hassen
New Projects:
A kickoff meeting for the professional who will lead the review of air permits for the various Dept. of Corrections heating plants was held on 10/8. New regulations may have caused some permits to need changes in reporting, metering, stack sampling, or fuel analyses.
Construction Starts:
A kickoff meeting was held for the demolition and restoration project at the Dept. of Corrections Camp Lehman facility on 10/6.

Chris Kulhanek

Projects Complete:

Camp Grayling – ISBC – After working with the Federal government for over a year, DMVA finally secured funds to pay for the claim filed by, and determined in the favor of the PSC. Project is finally able to be closed out.

Camp Grayling – MPRC Retaining Wall Repairs – Project is complete and closed out.

Kalamazoo Psychiatric Hospital – IP Surveillance System – Project is complete and closed out.

Mid-Michigan Community College – Mt. Pleasant Campus Unification – Toured completed facility with College President and VP of Finance. Building is complete and occupied and the college is very pleased with the finished project.

Potential Issues/Solutions:

Camp Grayling – Replace Helicopter Parking Pads – Second low bidder has objected to award of contract to low bidder, claiming their bid provided a better per unit cost.
Solution – Second low bidder's number exceeded budget, no changes will be made to award.

Rashmi Patel

Nothing significant to report.

Sadi Rayyan

Annual leave.

Jud Sorensen

Projects Complete:

A punchlist and closeout meeting was held for the Cadillac Place Annex Building Horizontal Lifeline Fall Protection Replacement project on 10/9. At the same time, the professional services contractor provided system specific training to the building maintenance staff for the new lifeline. During the punchlist walk-through, the facility supervisor asked that the contractor provide a cabinet for storage of fall protection equipment and that the contractor make repairs on the existing annex roof walkway as this walkway has loosened since being installed approximately 15 years ago. Also, the contractor had damaged a DTMB pickup when a tool dropped from the roof hitting the truck hood. The contractor is working with the facility supervisor to have repairs completed.

Potential Issues/Solutions:

SDVGC, the contractor awarded a contract to replace the DTMB records building loading dock roof, failed to submit his project schedule in a timely manner and when finally received late last Tuesday, wanted to commence work in two days without a coordination meeting with the agency. He was told that he could not mobilize until a meeting could be held with the agency. This meeting is scheduled for 10/13. Due to weather issues, SDVGC will likely not start roof removal until the week of 10/20.

John Spencer

Accomplishments:

SBA - U of M; Flint, Murchie Hall, survey CAD and descriptions being completed.

Completed Projects:

SBA - WRPH delivered survey and description for title work.

Non Project Related Activities:

Matt Miles attended Town Hall meeting; John Spencer and Matt Miles attended MiALEIS database testing meeting and began testing, many items to resolve. Attended Paper to Paperless webinar.

Terry O'Brien

Accomplishments:

SESC authorization issued for MDARD Metrology Lab.

Bruce Watkins

Construction Starts:

Michigan Reformatory – Alternate Fuel AST Upgrade – Held first progress meeting. Contractor is anxious to get started.

Projects Complete:

Dansville (DNR-WLD) - Shooting Range Improvements – The majority of the work is completed with the installation of a vault toilet not scheduled until December.

Harrisville SP – Toilet/Shower Building – Held final punchlist meeting. Provided final tasks for contractor to address issues.

Potential Issues/Solutions:

Dansville (DNR-WLD) - Shooting Range Improvements – There is a ponding issue at the end of the 100 yard range. This will require corrective action. DNR, DTMB and Wolverine dug 30-40 auger holes to see if the water could be removed by increasing percolation. We are awaiting a final recommendation from Wolverine following review of the results of the auger holes.

Harrisville State Park – Toilet/Shower Building – Met on site to discuss corrective action to fix the drooping eaves. The design professional (Progressive) is to provide final plans for the actions to be taken. We will stay on task with the professional until this is resolved.

Nothing significant to report.

Bob Adams:
Design:
MDOC – Pugsley Correctional Facility – Fire Alarm System Upgrades - Participated in phase 500 100% design review meeting and scheduled advertising and bidding. Reviewed and processed PSC Mod related to additional Bureau of Fire Services plan review.

MDOC – Newberry Correctional Facility – Fire Alarm System Upgrades - Participated in phase 500 100% design review meeting and scheduled advertising and bidding.

MDOC – Chippewa Correctional Facility – Fire Alarm System Upgrades - Participated in phase 500 100% design review meeting and scheduled advertising and bidding.

DNR – Muskallonge St Pk – PSC forwarded Mod request and proposal for HMA to be conducted. DNR expressed approval.

DNR - Porcupine Mtns S.P. Toilet/Shower Building – Held "Go to Meeting" with DNR to review options for toilet/shower building replacement.
Bidding:
DNR – Palms Book St Pk – Toilet Bldg. Replacement – Conferenced with DNR to review PSC bid recommendation.
DNR – Conely Point – BAS Development – DNR has made additional funds available. Discussed with DNR's plan to go forward.
MSP – Sault Post – HVAC Upgrades – Met with MSP to review PSC bid recommendation and funding.

MDOC – Alger Correctional Facility – Roof Repairs & Restoration - Scheduled advertising and bidding.
Construction:
DNR – Pine River - BAS Development– Participated in substantial completion meeting.

MSP- Negaunee Post Roof and Ventilation Upgrades – Conducted progress meeting – project is near complete.
Projects Complete:
DNR - Brimley St Pk – Sewer System Repairs – Received and reviewed final pay request and closeout documents and forwarded for processing.

Scott DeKorte:
New Projects:
DTMB – GSB – AHU Replacement - Conducted pre-bid meeting with contractors.

DCH – State Lab – Security Improvements – Reviewed the revised scope of work on site with the client, PSC, and contractor.

Joel Gordon:
Nothing significant to report.

Gerald Gregorski:
New Projects:
DNR/Parks & Recreation Div. – Below Ground Sewer and Water Study at Eight Parks – FY15 funding has been allotted to construction at the two remaining locations included in the original study, Petoskey State Park and Pontiac Lake Recreation Area. A planning meeting was held with DNR staff and the PSC to determine the best way to proceed with these. The team decided to include both sites in the overall project. The PSC will issue a contract modification request to add design, bidding, and construction administration for these two sites. The DNR will issue a work order revision to add the funding for the two sites.

MDOC – Personal Emergency Location Systems Phase 2 at Six Locations – An RFP for PSC design and construction administration services was posted on Buy4Michigan. The pre-proposal meeting was attended by seven professional firms and proposals are due 11/13.

DNR/Fisheries Division – Harrietta State Fish Hatchery -- Liquid Oxygen and Supplemental Heat – Three bids were received for construction of phase 2 for the new water source heat pump system. The post-bid interview and bid evaluation was completed and the PSC's recommendation letter received. Submission of the contract ward recommendation is pending DNR additional funding to cover the costs.

Construction Starts:

DMVA - Grand Rapids Home for Veterans – Chiller Replacement – The first construction progress meeting was held on site. The chilled water system has been shut down for the season and demolition of the old chiller, cooling tower, and piping has begun. The upgraded system will be back in operation for the spring 2015 cooling season.

Projects Complete:

MDOT - Metro Region Office – HVAC Replacement – The substantial completion meeting was held on site. All MDOT facility maintenance staff training was completed, O&M manual sets and record drawings were received, and the final punch list of cleanup items was created. The DTMB modular crew has completed installing the new carpet and is well underway rebuilding the offices. MDOT is still scheduled to move in the first weekend of December.

Non-Project Related Activities:

Attended the DTMB town hall meeting.

Jan Miller:

Accomplishments:

Flint State Office Building, Interior Renovations – Held a meeting 10/30 on site to discuss schedule. B&B still does not have an accepted completion schedule. They have hired a scheduler and are working to that end.

Southwestern Michigan College, Science and Allied Health Labs Project – Reviewed additional information received from the bid tabulations and authorized the college to proceed with the award of the construction contracts.

Potential Issues/Solutions:

DCH Center for Forensic Psychiatry, Maintenance Projects – Met with Irene and the CFP staff 10/28 to discuss the DTMB process and review roles and responsibilities. The Director of Administrative Services is new at this position and was appreciative of the time we spent with her explain the process.

Dave Sproul:

Accomplishments:

MSP, SEOC – The SEOC Groundbreaking was successfully conducted on 10/23 as planned. Key note speakers included Governor Rick Snyder, Col. Kriste Kibbey Etue, Director David Behen and Capt. Chris Kelenske. After brief opening, remarks, and closing statements, these four individuals proceeded to cast the first shovels to mark the beginning of this project. The official pre-construction meeting and notice to proceed was conducted on 10/30 after the required construction contract was executed. The project is scheduled to be complete by late 2015.

Potential Issues:

DCH, Caro Center, New Fire Alarm System Replacement – Attended our regularly scheduled progress meeting and we have encountered additional asbestos that will need to be addressed in the Administration Building. The good news is that Quality Environmental Services will be able to assist us with proper abatement and disposal.

DCH, Hawthorn Center, Outdoor Sports Fields – Attended our regularly scheduled construction progress meeting and the overall progress is being slowed by weather. We are working to have the new asphalt basketball court paving installed by mid-November.

Administrative Activities:
Attended a DTMB Town Hall meeting and Design and Construction Division's two (2) day in-house fall training program.

Steve Urban:
Accomplishment:
MSP PTA Gun Range Ventilation Upgrades - Held pre-bid meeting with Laux Construction and with 3 mechanical contractors for the short term ventilation modifications.
Construction Starts:
MSP PTA Swimming Pool Renovations - As scheduled construction work began on 10/27.

MDOC Saginaw Correctional Facility, Roof Renovations - Held pre-construction meeting on 10/26. It appears that a minimal amount of roof work will be able to be completed this season with only one building expected to be completed by 12/1. The terms of the construction contract were set up with this in mind.
Potential Issues/Solutions:
Department of Treasury, Executive Office Renovations - After touring available swing spaces at Cass Building, Con Hall and Hollister Building, Treasury is most interested in Con Hall and Cass Building as a swing space for their Human Resources Group and their Executive Office support staff. Both spaces are currently available and meet the timeline for project start and completion times and will require a minimal amount of re-work. Treasury is to confirm the week of 11/2.

Section Manager: Harold Belcher, Project Management B
Annual leave; Strategic Plan meeting; MDOC Surveillance project meeting; HAL, meeting with Doug Sharp.

Chris Bahjet
Accomplishments:
Port Austin - West Harbor – Held a conference call to discuss remaining budget and final payments and obligations. Additional lights will be installed by the agency.
New Projects:
DNR - Grant House Move & Architectural Services. This project is to move the historical house of former President Grant from the State Fair Grounds to Edison Academy in Detroit.

Tim Hall
Nothing significant to report.

Bruce Hassen
New Projects:
Some leaking underground storage tank clean-up projects were launched, namely the Tiel Oil Site [Reed City], the Winterhawk Site [Onaway], the Leon Bonner Site [South Lyon], and the Cole's Garage Site [Coleman].
Construction Starts:
The kickoff meeting for the construction phase of the Camp Cusino demolition and site redevelopment project was held at the Cusino Wildlife Experiment Station in Shingleton on 10/28.

Chris Kulhanek
Accomplishments:
Attended the renovated facility's dedication on 10/31. The college is very pleased with the project which they described as providing, "State-of-the-Art Laboratories and Clinics…to prepare tomorrow's healthcare workers with the best facilities available."
Projects Complete:
Fort Custer – Urban Training Buildings – Design is complete. Project has been closed out as there is no construction funding available at this time.

Camp Grayling – Retaining Wall Repairs – After DMVA increased the project scope significantly several times, work has been completed and the project is closed out.

Non-Project Related Activities:
Attended DTMB Town Hall Meeting on 10/27.

Rashmi Patel
Nothing significant to report.

Sadi Rayyan
Annual leave.

Jud Sorensen
Potential Issues/Solutions:
Two safety issues were raised last week concerning the roof replacement over the loading dock and building entry at the DTMB Records Building. First, the contractor was constructing a tunnel at the building entry area to allow visitors and staff to come and go from the building while work was being performed overhead. Unfortunately, he was constructing this tunnel during normal business hours as people were entering and exiting the building. This work was stopped and the contractor will finish tunnel construction off hours when the building is empty. Second, a person on the Records Management staff found potentially asbestos containing dust and debris on overhead beam flanges after the contractor removed the north end of the loading dock roof and decking. The area was temporarily closed off to building operations, the contractor came back in after hours and cleaned the area of concern and additional air clearance samples were taken showing that air quality met MIOSHA clearance standards.

John Spencer
Accomplishments:

Preparing new MOU structure. Prepared a draft "Superintendent Designation". Continuing with list and research on buildings no longer owned and crosswalk on names of facilities; sorted out and disposing of drawings no longer required. Finding drawings for Huron Valley Center and sending for scanning for MDOC.

Bob Adams:

New Projects:

MDOT Ironwood Travel Center Roof Replacement – Received MOP, gathering record documents and back up for drafting the project statement.

Design:

DNR Straits SP Lower Campground Toilet/Shower Building Replacement – Review of 90% phase 500 design document submittal.

DNR Porcupine Mountains SP Toilet/Shower 2013 – Received revised MOP to cover costs associated with PSC mod to Bowman Associates and processed the mod.

Bidding:

DNR Palms Book SP Toilet Bldg. Replacement – Notice of award sent to contractor.

MDOC Pugsley, Newberry, and Chippewa CF Fire Alarm System Upgrades – Submitted for posting on Buy4MI.

Projects Complete:

MSP Negaunee Post Roof and Ventilation Upgrades – Conducted substantial completion meeting.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

Accomplishments:

DTMB Capital Complex Greening America's Capitals – Participated in a three day public design charrette with the EPA, City of Lansing, consultants and DTMB. The charrette successfully concludes the public portion of the project.

New Projects:

DNR Wilderness SP O'Neal Lake Dam Emergency Repair – Met with the DNR and selected PSC to define the project scope and implement a strategy to collect field data before the winter season begins. The PSC gathered the topographical and geotechnical data on 11/12 & 11/13.

DNR Wilderness SP Lake Shore Campground Redevelopment – Conducted the first phase two design meeting with the project team. The project is scheduled to be bid in late winter 2015 and construction is to start in the spring of 2015.

Projects Complete:

DNR Hoeft SP Pavilion Restoration – Conducted the project substantial completion meeting and found the project to be substantially complete.

DNR Oden State Fish Hatchery New Fishing Pier & Walkway – Conducted the project substantial completion meeting and found the project to be substantially complete.

DNR Wilderness SP Lake Shore Campground Redevelopment Phase One – Conducted the project substantial completion meeting and found the project was not substantially complete. The contractor was given a list of items to complete or resolve prior to meeting again.

Gerald Gregorski:

New Projects:

MDOC Personal Emergency Location Systems Phase 2 at Six Locations – Proposals were received from four professional service firms. The proposal scoring team is tentatively scheduled to meet the week of 12/1.

MDOC Pugsley Housing Units Security Enclosures – The on-site project kickoff meeting was held with Landmark Design, the A&E firm that did the original design work for the site. Landmark will provide an ISID contract assignment request for the design work.

DNR Below Ground Sewer and Water Study at Eight Parks – An on-site design kickoff meeting was at Pontiac Lake Recreation Area to define the scope of work for sewer and water system improvements at the day use area. Design and bidding is currently being planned for a Fall 2015 construction start.

DNR Harrietta State Fish Hatchery Liquid Oxygen and Supplemental Heat – DNR supplied additional funding for construction of phase 2 for the new water source heat pump system to replace the interior tank room heating system. A contract award recommendation for Temperature Controls, Inc. was submitted to the DCD director for approval.

Construction Starts:

DTMB Grand Tower AHU Replacement – The pre-construction kickoff meeting was held on site with Laux Construction. They plan to begin mobilization and demolition work on 11/17. Substantial completion is still set at 5/15/15.

Potential Issues/Solutions:

DMVA/Grand Rapids Home for Veterans – Backup Generators – The contract award for the recommended bidder from the best value bid evaluation process, Robbert Construction, was approved on the 8/12 State Administrative Board Agenda. The actual low bidder, Cadence Construction, protested the contract award. The Attorney General's office reviewed the situation and recommended proceeding with the original contract award to Robbert Construction. Robbert's contract was executed and a notice to proceed letter was issued.

Jan Miller:

Accomplishments:

Flint State Office Building, Interior Renovations – Partial schedule has been issued for everything except floors 4 – 7. DHS will be moving into the 3rd floor on 11/21 and the 2nd floor on 12/5.

Ludington State Park Beach House Exhibits – Met with DNR to discuss project scope for the different exhibits and delivery methods. Several of the items will be bundled into 1 RFP.

Potential Issues/Solutions:

DCH Center for Forensic Psychiatry Maintenance Projects, Upgrade Stun Fence Controls – Met with CFP and Beckett & Raeder, Inc. to review project scope. Two controllers have already failed and due to its sense of urgency B/R will submit a proposal using an ISID contract.

DCH Center for Forensic Psychiatry Maintenance Projects, Parking Lot – The project has been bid twice; bids came in over budget the first time and no bids were received the second time. The project will be rebid a third time in January 2015.

Lake Superior State University, School of Business – Project was re-bid after value engineering from the first bid. Bids again came in over budget. The University is discussing funding the higher cost and going back to the legislature for approval. The schedule will be affected.

Dave Sproul:

Construction Starts:

MSP SEOC – Daniels/Christman has commenced work activities on site. The initial work includes installation of the new loading dock access drive pavement. Daniels/Christman is also developing the overall detailed project schedule and schedule of values. Construction progress meetings will be held every

2nd and 4th Wednesday of each month through the construction period. Substantial completion is required by December 2015.

Accomplishments:

MDOC Ionia Energy Project – ESG is continuing to perform site investigations and surveys. We are developing and reviewing 2 of the 3 overall major construction bid packages. These 2 bid packages include the lighting fixture retrofit and water fixture replacement conservation measures. The plan is to begin the subcontractor bidding process in December.

DCH Caro Center, Utility Service Backup Generator – Work is continuing to develop and review the final design/bidding documents to provide a campus wide backup electrical generator at Caro Center. Plans and specifications are being submitted to LARA for their required code review prior to initiating the bidding process. This project is estimated at approximately $3.3M.

New Projects:

MDOC Thumb CF Water and Sewer Improvements – C2AE presented their findings and recommendations to upgrade the water system and correct deficiencies with the sewer system outlet. The required repairs will include a new code compliant reduced back pressure assembly on the water system and needed repairs to the existing sewer out flow building and equipment.

Potential Issues:

DCH Caro Center New Fire Alarm System – Continuing to address asbestos abatement needs to support the new fire alarm system. The overall installation schedule has been adjusted to permit abatement and maintain the overall progress. Quality Environmental Services will be assisting us with proper abatement and disposal.

Steve Urban:

Accomplishments:

MDOC Saginaw Correctional Facility Fire Alarm Upgrades – Attended construction pre-bid meeting.

Construction Starts:

Lake Superior Hosting Center Electric Disconnect Switch Revision – Construction started and was completed on the 2nd phase of this project, including re-grading areas adjacent to the disconnect switch and installing a new yard drain and catch basin to improve drainage in this area during rain events.

Potential Issues/Solutions:

MSP PTA Pool Renovations – Elevated lead levels were found on the top side of ceiling tiles of the pool requiring that the state's abatement contractor remove them in lieu of the contractor for this renovation work. Work will be done over the course of this weekend. This will not impact the pool renovation construction schedule. Once ceiling tiles have been removed we will be able to determine how lead particles from the firing range located in the floor above the pool found their way into the ceiling cavity.

Section Manager: Harold Belcher, Project Management B

DEQ Webinar regarding Michigan mercury discharge limits; HAL meeting and testing.

Chris Bahjet

Nothing significant to report.

Tim Hall

New Projects:

DNR Wolf Lake State Fish Hatchery – Completed RFP preparation and posting for professional was advertised on Buy4Michigan.

MDOC Women's HVCF ADA Walk & Paving Completion – Conducted pre-design kickoff meeting with Nowak & Fraus and WHVCF project team. Established short term design schedule and action plan.

MDOC Prisoner Services Building Renovation – Bids were received and MDOC has determined they will increase funding to allow the full project to proceed forward; recommendation for award is being prepared for placement on agenda for approval.

MDOT SW Region Laboratory - Bids were received and in line with budget allocation; recommendation for award is being prepared for placement on agenda for approval.

Construction:

DNR Rose Lake Field Office Renovations – Project completion meeting conducted ahead of contract date; budget has allowed agency to elect several added value improvements consistent with the WO scope that are being processed and will be completed upon formal approval.

Potential Issues/Solutions:

MDOC Women's HVCF Prisoner Services Building Roof Replacement – Several punchlist issues relating to the painting of existing metal roof panels have been identified, but weather/temperature conditions will likely not permit correction until spring; reviewed need for 2 phase substantial completion with MDOC. Membrane roofing which comprises the majority of the contract has been substantially completed and completion meeting will be conducted next week.

Bruce Hassen

Nothing significant to report.

Chris Kulhanek

Potential Issues/Solutions:

Washtenaw Armory Renovations – The contractor has been continuing installation of the new roofing and masonry caulk in temperatures that are below minimum required in the specifications.
Solution – The PSC is in consultation with the roofing manufacturer to assure the system warranty will be met. Cold weather measures have been instigated. Caulk installed that was not rated for cold weather conditions will be replaced.

Forest Fire Experiment Station – The project is approaching six weeks past the completion date. Latest schedule by the contractor is projecting completion by the last week of November.
Solution – Liquidated damages have been applied to the latest payment request and will continue to be applied until the project is complete.

Rashmi Patel

Accomplishments:

Lewis Cass Building, Stairway Pressurization - Received revised as-built drawings with photos and electronic copies.

MSP Training Academy – Storm Drainage Upgrade - Contractor received backflow preventer. Scheduled to install next week.

Ionia Correctional Facility – Roof Restoration - Building 300 roof is completed. Building No. 5 and No. 6 metal roofs are repaired. Contractor started working on building 200, but is delayed by weather.

MDOC – Southern Business Office – Resurface Parking Lot - Punched out project/substantial completion.

MDOC – Southern Business Office, Administration Building – Masonry Restoration - Punched out project/substantial completion.

Sadi Rayyan

Accomplishments:

DNR Otsego Township Dam – Kickoff meeting held with PSC for dam repair study. Discussed scope of work, schedule and alternative solutions to be evaluated in the study.

DEQ Richfield Landfill Site – Progress meeting held at the site. The field work activities under the design build contract are almost complete. Substantial completion walk-thru is scheduled on 11/20.

DEQ Muskegon River Pipeline Site – Reviewed and recommended changes to the contract with Fleis & VandenBrink Engineering to provide construction oversight and assist the agency with the joint permit modifications.

DEQ Harbor Plating Site – Reviewed and recommended changes to the contract with EnviroSolutions to provide additional maintenance, sampling, and reporting for the groundwater treatment.

New Projects:

MDOC Various Correctional Facilities – Received MOPs to refurbish the water towers at the Macomb and Oaks Correctional Facilities. Contacted the agency and requested proposals from Nelson Tank Engineering to prepare specifications under their ISID contract.

Construction Starts:

DEQ D&L Fuels Site – Field activities for soil excavation and site restoration begin 11/17 with substantial completion by 1/16/15.

Jud Sorensen

Projects Complete:

In a progress meeting held for repairs to the Walnut Street Pedestrian Bridge, the general contractor is indicating that he should be complete with all work with the exception of temperature dependent concrete sealer by the end of next week. Concrete sealer will be applied in the spring when the temperature meets minimum product requirements.

John Spencer

Accomplishments:

DNR - Pellston, MI Rail to Trail easement CAD, legal description and delivery.

Terry O'Brien

Accomplishments:

SESC plan and spec review for DNR Bolles Harbor BAS.

Bruce Watkins

Potential Issues/Solutions:

Highland Recreation Area – North-South Trail Connector – The contractor is well beyond any extensions requested and continuing work with winter weather arriving.

Pinckney Recreation Area – Bruin Lake Campground – Met on site with DNR and the PSC to review the condition of the repair activities for the unacceptable work done by Skabardis.

Section Manager: Dennis Stamm, Project Supervision

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending November 21, 2014
Section Manager: Irene Henry, Project Management Section 'A'
Preparing new MOU drafts. sorting expired drawings and finding drawings to send for scanning.

Bob Adams:
New Projects:
MDOC Alger CF – Perimeter & Sally Port Security Improvements

MDOC Chippewa CF – Replace Perimeter Security System and Provide Upgrades

MDOC Ojibway CF – Perimeter Fence Security Upgrades & Sally Port Improvements – Contacted facility to propose kickoff meeting per PPP.

MDOT Ironwood Welcome Center Re-roofing – Drafted RFP package and sent to MDOT for review.
Design:
DMVA Sault Armory Phase 2 Additions and Renovation – Held a follow up to the 20% design meeting.

MDOC Baraga Cube Enclosure – Requested design schedule from UPEA for the design contract
Bidding:
DNR Conely Pt BAS Development – Submitted post-bid addendum to bidder for consideration.

MDOC Pugsley CF Fire Alarm System Upgrades – Conducted pre-bid meeting.

MDOC Alger CF Roof Restoration – Conducted pre-bid meeting.
Construction:
MSP Marquette Crime Lab – Conduct meeting to review design options to resolve humidification issues.

Scott DeKorte:
New Projects:
DNR Belle Isle Aquarium/Conservatory HVAC Improvements – Met on site to further define the scope of the project with the design-build contractor and multiple subcontractors.

Joel Gordon:
New Projects:
DTMB Governor's Residence Master Plan – Met with DTMB BOD staff and Governor's Residence staff to define and plan the implementation of phase one improvements. The project scope is expected to include masonry repairs and replacement of garden walls and planter boxes. The project will also include development of the raised terrace area in the backyard. These improvements are in line with the master plan's suggested phasing.

Gerald Gregorski:
New Projects:
DNR Harrietta State Fish Hatchery Liquid Oxygen and Supplemental Heat – The contract award recommendation for Temperature Controls Inc. to complete the phase 2 heat pump installation was approved by the DCD Director.

DNR Petoskey SP Trail Development – The PSC completed and issued the critical dunes permit application to DEQ for permitting.
Construction Starts:
DNR Below Ground Sewer & Water Study at Eight Parks – Project meetings were held at both Mitchell & Hayes State Parks. Construction work at Mitchell should be complete within a couple of weeks. The contractor will pull off site for the winter and return in the spring to complete site restoration work. Work at Hayes will continue through December to complete the directional drilling work which can take place under winter conditions. They will return in the spring to complete site restoration and paving/concrete work.

MDOC Personal Emergency Location Systems at Eight Locations – System sensor calibration work has started at Egeler. This will be the first of the six sites to be completed and should take approximately four to six weeks.

Jan Miller:
Accomplishments:
Flint State Office Building, Interior Renovations – DHS moved into the 3rd floor on 11/21. Window treatment was selected.

DNR Silver Lake SP Day Use & BAS Relocation – Beckett & Raeder submitted the joint permit application to the DEQ for permitting.
Potential Issues/Solutions:
Muskegon Community College, Science Laboratory Center – Received the 1st monthly construction progress report. The report was not consistent with the requirements of the Capital Outlay Design Manual. Issued review comments and the report will be revised and resubmitted.

Dave Sproul:
Nothing significant to report.

Steve Urban:
Construction Starts:
MSP PTA Gun Range Ventilation Revisions – Held construction kickoff meeting with Laux Construction, MSP and PSC. Gun range must be back on line by 1/1/15.
Potential Issues/Solutions:
MSP PTA Pool Renovations – Existing ceiling tiles containing the elevated lead levels were removed by State's abatement contractor. It could not be determined how lead dust found its way into the ceiling plenum for the gun range above. (No floor penetrations were discovered).

MSP PTA Gun Range Ventilation Study – The final draft version of the study was presented. The long term solution to the ventilation issues at the gun range involves the complete removal and replacement of the entire ventilation system for the gun range which also will entail the removal and replacement of the gun range targeting, communication and lighting systems and the range bullet traps. The final version of the ventilation study is recommending that approach. MSP and BOD are to discuss funding for these improvements. As an option to the study a cost estimate was presented for a new stand-alone indoor gun range facility located on the same site as the proposed MSP exterior gun range. MSP will discuss this option internally.

Section Manager: Harold Belcher, Project Management B
HAL; Shiawassee State Game Area Siphon Tube Meeting

Chris Bahjet
Accomplishments:
DMVA – Detroit Light Guard Armory Phase 4 – Visited the site to review site conditions where additional significant structural support is needed to support the slab and beams due to the weight of vaults. An allowance will be specified to allow progress without delays.

DTMB – Cadillac Place Sidewalks Phase 2 – Coordinating efforts to start a new small project; connects the sidewalk snow melt coils to a heat source at the concourse level. When issued, plans will need to be submitted to LARA.

DNR – Selfridge BAS Phase 2 – Met at site to determine the feasibility, pros and cons of paving during the coming days due to warmer weather. Decision was made to postpone to next year. Site which has the 21 AA all compacted will be open to the public. This is a popular ice fishing location.
Non-Project Related Activities:
Attended an office meeting hosted by Anne Watros to review the new file naming guidelines.

Tim Hall

New Projects:

MDOC WHVCF Jennings Temporary Housing Renovation – Design nearing completion and review documents distributed for input from DTMB and MDOC staff. Discussion of work to be conducted "in-house" by MDOC vs. that to be contracted will be conducted as part of review to determine implementation plan for project.

MDOC Prisoner Services Building Renovation – Recommended award placed on Ad Board Agenda.

MDOT SW Region Laboratory - Recommended award placed on Ad Board Agenda.

Construction Starts:

MDOT Blue Water Bridge HVAC Replacement – Contractor completed initial crane lifts to install new roof top air handling equipment, but wind speeds/weather conditions forced delay of final units until next week. Coordination of building evacuation during lifts went very well with minimal impact on US Customs operations at the facility.

Potential Issues/Solutions:

MDOC Women's HVCF Prisoner Services Building Roof Replacement – Meeting conducted to evaluate partial completion and punchlist. Field measurements to confirm as-built elevations were taken in attempt to resolve potential dispute over installed slope conditions. All parties have agreed weather/temperature conditions will likely not permit correction of painting deficiencies until spring and have agreed to partial extension of contract completion for those issues. Membrane roofing which comprises the majority of the contract will be evaluated for partial substantial completion if slope conditions above are resolved.

Bruce Hassen

Nothing significant to report.

Chris Kulhanek

Construction Starts:

Camp Grayling Airfield – Helicopter Parking Pad Replacement – Pre-con meeting held on 11/19. Meeting took place at Grand Ledge Aviation Support Facility so contractors could observe military standards for pads that are in place.

Projects Complete:

Montcalm Community College – Advanced Technology Center – Project is complete and in use. Final cost was below total budget.

Rashmi Patel

Accomplishments:

MSP Training Academy – Storm Drainage Upgrade - Backflow preventer is installed. Punchlist meeting is scheduled next week.

MDARD – Metrology Lab – Resurface Parking Lot - Punch out project; substantially completion.

Sadi Rayyan

Accomplishments:

DEQ McDonald's Crosstown Service Site – Reviewed and recommended changes to the contract with DLZ Michigan to provide 2 years of additional O&M services of the existing pump and treat system.

DEQ North 34th St. Area Richland Site – Reviewed and recommended changes to the contract with URS Corporation to evaluate the effectiveness of potential source area soil/groundwater remediation to address the impact of hexavalent chromium and nickel contamination at the site.

DEQ Commercial Street Industrial Site – Reviewed and recommended changes to the contract with DLZ Michigan to provide chemical re-injection to assist in remediating the site.

New Projects:
DEQ East Garfield Site – Assigned to AECOM under their ISID contract to conduct environmental sampling/investigation activities to determine the extent of soil/groundwater contamination.
Construction Starts:
DEQ Flint Odyssey & Taber's Oil Comp Sites – Field activities for UST decommissioning and limited soil abatement begin 11/17 with substantial completion by 2/15/15.

DEQ Tiel Oil Co Site – Field activities for soil excavation and site restoration begin 11/17 with substantial completion by 2/15/15.
Projects Complete:
DEQ Richfield Landfill Site – Conducted substantial completion walk thru for the landfill closure and the punchlist was established. Final project completion is due by 12/21.
Non-Project Related Activities:
Met with the vendor AKT Peerless to answer questions about the DEQ & DCD contracting process!

Jud Sorensen
Nothing significant to report.

John Spencer
Nothing significant to report.

Terry O'Brien
Nothing significant to report.

Bruce Watkins
Accomplishments:
Michigan Reformatory – AST Removal and Replacement – Held progress meeting for the removal. Progress is going well, but a contamination issue may delay completion. The owner would like all contamination removed, but we need to work within the budget and not delay the work. Waiting for a cost proposal from the contractor for further investigation, to define the limits of contamination.

Lakeland CF – AST Removal and Replacement – Project is going well. Early cold weather may add work items to be sure concrete can be placed and properly cured.

Bruin Lake CG Water System – Met on site with owner and contractor to discuss the reason the new pump keeps kicking off and not restarting. Contractor located a programming error and made the correction. The owner requested that the faults that cause the pump to kick-out continue to stay in the operational mode, so they can formulate a complaint to Consumers Energy as to why we keep dropping one leg of the three phase power. Also, the park staff will contact Consumers to request why there is such a significant drop in voltage caused by the pumps kicking on. There is a very small amperage draw from this pump and the transformers are very close and are dedicated to this service.

MCTI – Solidyne Controls Replacement – Contractor has located many more actuators that were inoperable than was expected. There is funding to cover the additional actuators and will be made based on a cost proposal.
New Projects:
Roscommon Forest – Wildlife Division - Townline Dam – Held pre-proposal meeting with the PSC (Wade Trim) and the client agency (DNR-WLD)
Potential Issues/Solutions:
Shiawassee SGA – Siphon Tube – Held an initial meeting with the contractor, the PSC and the owner. This was an initial meeting to describe the problems discovered, not to establish responsibility. Goal of the meeting was to discuss possible corrections to the work.

Harrisville State Park – New Toilet/Shower Building – Contractor has shored up the drooping eaves, it was discovered that the force required to realign the eaves was not that great, a proposal has been floated (no

pun intended) to replace the concrete based soffit material (hardie plank) with a much lighter material (perforated aluminum).

Section Manager: Dennis Stamm, Project Supervision
Nothing significant to report.

Section Manager: Pat Mullen, Contract Services
Nothing significant to report.

WR Ending December 5, 2014

Meeting with staff on IPM and workloads, working Office Design/Const Stds, records retention, and MOUs. Met with BOD on Con Hall front plaza planning. JCOS meeting. Met with Procurement and DEQ on contracts.

Bob Adams:

New Projects:

DNR Presque Isle Dam Repair – Received construction contract and set up precon mtg.
DNR Eagle Harbor Boathouse Roof Replacement – Received construction contract and set up precon meeting.

Design:

DNR Indian Lake SP Shoreline Restoration – Construction documents 50% review meeting.
DNR Tahquamenon Falls Upper Falls Brink Study – Study 50% review meeting.
DNR Fayette Historic SP Structural Repairs to Furnace Corners – Construction docs 100% review meeting.
MDOC Baraga Cube Enclosure – Reviewed 90% documents and commented.
DNR Porcupine Mnts. SP Toilet/Shower – Provide updated draft RFP for DNR review.

Bidding:

MDOC Newberry CF and Chippewa CF Fire Alarm System Upgrades – Participated in pre-bid meetings.
MDOC Pugsley CF Fire Alarm System Upgrades – Worked with MDOC, PSC and DTMB and 2 addenda were posted.
MDOC Alger CF Roof Restoration – Worked with MDOC and PSC and 2 addenda were posted.

Construction:

MSP Negaunee Roof and Ventilation Upgrades – Reviewed PSC Mod Request with Geoff Bowman and agency. Current conditions and ice formation are being reviewed. Worked with contractor and agency to resolve damaged office equipment claim due to roof leak during construction.

Projects Complete:

DMVA Kingsford Armory Roof Replacement – Reviewed and commented on final closeout package.
DNR/MIHSP Steward's Quarters & Morgue Roof Replacement – Held substantial completion meeting.

Scott DeKorte:

New Projects:

MDOC Multiple Security Corrections Projects – Met with corrections personnel to strategize the most efficient methods to procure and implement the multiple security systems, fencing, and sally port projects at correction facility locations across the state.

Project Closeout:

MDOC Multiple Fire Alarm Projects – Met with entire project teams to discuss the disparities regarding the requested indemnification clause/warranty work. An acceptable understanding was worked with all parties to close out the various projects.

Joel Gordon:

Nothing significant to report.

Gerald Gregorski:

New Projects:

MDOC Personal Emergency Location Systems at Eight Locations – The initial design kickoff and site walk-through was held at Women's Huron Valley Correctional Facility.

Construction Starts:

BOD Grand Tower AHU Replacement – Routing of the new chilled water piping was changed from running above the ceiling through the first floor main conference room. It will now run entirely through the basement before heading vertically to each floor. The entire piping run will be installed at night and partially over the weekend during the next three weeks. This will minimize disruption to the tenants and building operations.

DNR Below Ground Sewer and Water Study at Eight Parks – The bid advertisement for the Petoskey SP lift station, equipment only, was posted on Buy4Michigan. This is a long lead item and will be procured in parallel with the design and bidding for the actual equipment installation work to meet the required seasonal

schedule. The Lenawee County Drain Commissioner is recommending replacement of the municipal sewer lift station that serves the Hayes State park sanitary dump station. They are hoping to free up funding from the State's maintenance account in time to add the lift station replacement to the planned dump station rebuild. This is desirable to improve both the funding efficiency and construction process.

Projects Complete:

MDOT Metro Region Office HVAC Replacement – The MDOT regional staff is scheduled to begin moving back into the building the weekend of 12/6. A final punchlist walk-through has been scheduled with MDOT and the contractor for 12/115.

Jan Miller:

Accomplishments:

Flint SOB Interior Renovations – DHS moved into the 2nd floor on 12/5 as scheduled. The skywalk and south entrance are behind schedule. B&B are consistently not updating the schedule as required.

DCH Center for Forensic Psychiatry Maintenance Projects, Repair Showers and Barrier Free Bathrooms – Met on site 12/3 with DCH & PSC to review phase 100 study.

DNR Maybury SP Trail Improvements – Reviewed 50% drawings and submitted comments to the PSC. The team met with Northville Charter Township 12/5 to review how the trail will connect to the Township sidewalk and cost sharing possibilities. The Township would like to help finance the connector by using Metro Funds. The Director of Public Service will have further discussions with their board.

Dave Sproul:

Construction Starts:

DCH Hawthorn Center – Conducted the pre-construction meeting for the various maintenance projects. This will involve five different work scopes including refrigeration, pool filtration, ceiling tile, gymnasium flooring and carbon monoxide sensors throughout the facility.

Accomplishments:

MDOC Ionia Energy Project – Met to review the 50% drawings for the water and lighting energy improvement ECM's with the MDOC operating staff. The review included meeting with each prison staff separately to discuss individual issues and design intent. We have received ESG's first progress payment for review and approval.

State Police SEOC – Held a special meeting to review and outline the overall requirements for the quality control testing for this project. A majority of the new construction must be built in compliance with strict FEMA requirements and thus quality control is critical.

DTMB Thermal Ice Storage – Met to review the design intent to provide additional equipment platforms within the Energy Center. BOD has requested new platforms and ladders to both the cool towers and Co-Gen units. These proposed equipment platforms will provide staff with a more safe and efficient access to perform normal maintenance and operations. Our professional is finalizing the design and preparing a construction cost estimate for BOD's consideration.

Potential Issues:

DCH Hawthorn Center Outdoor Sports Fields – We have elected to delay the completion of this project until the spring of 2015 due to unfavorable weather. The new basketball court and fence upgrades will be completed then.

Steve Urban:

Potential Issues/Solutions

MSP PTA Gun Range Ventilation Upgrades – State's abatement contractor (DMC Group) was able to complete the remediation of suspended ceiling tiles system at the gun range on short notice which will allow the general contractor to maintain the construction schedule. Completion on track for 1/1/15.

MDOC Saginaw Fire Alarm System Upgrades – Project professional submitted recommendation letter recommending award of construction contract for this work to William F. Nelson Electric. Countyline Power submitted the lowest bid; however, they were not recommended award of contract due to the fact that they

did not meet the contractor qualification requirements as noted in the bid documents. Countyline Power has only been in business since June 2014. Bid documents required contractors to have at least 3 years of similar experience. William Nelson Electric had the second lowest bid price. No Qualified Disabled Veterans firms participated in the bidding process.

Section Manager: Harold Belcher, Project Management B

Staff/Manager meetings; HAL; Liberty Harbor – Quanicassee Emergency Dredging pre-construction meeting.

Chris Bahjet

Accomplishments:

DTMB – Cadillac Place – Snow Melt – Coordinated a conference call to coordinate with all parties concerned to implement the design and then the installation of the snow melt system at the sidewalk to the building steam lines.

Projects Complete:

DTMB - Cadillac Place Sidewalks Phase 2 – Completed the replacement of all granite and all sidewalks. Punchlist planned next week.

Tim Hall

Accomplishments:

MDOT Blue Water Bridge HVAC Replacement – Contractor has completed all crane lifts installing new roof top air handling equipment and following final connections, unit start-up will begin next week. Complicated coordination for toll booth system replacements has started with initial booth, with intention of beginning 2 booth cycles after the initial booth.

New Projects:

MDOC WHVCF Jennings Temporary Housing Renovation – Conducted final design review with PSC and MDOC staff. Conducted review of work for "in-house" by MDOC to be contracted and scheduled final determination meeting for next week.

DNR Wolf Lake Fish Hatchery – Conducted pre-proposal meeting for PSC selection; proposals due next week.

MDOC Women's HVCF Utility Tunnel Upgrades – Conducted 50% design review meeting with PSC, MDOC and WHVCF project team.

Potential Issues/Solutions:

MDOC Women's HVCF Prisoner Services Building Roof Replacement – Potential dispute over installed slope conditions of a section of the roof continues to be reviewed and evaluated. Weather/temperature conditions will prohibit final correction of painting deficiencies until spring and may influence completion of membrane issues once resolution is agreed upon.

Bruce Hassen

New Projects:

A MOP to launch a project to demolish and redevelop the former Nokomis Center near Prudenville was established, but the funding offered by DCH was about half of our recommended budget. We will meet with DCH to explain why their funding, based on an informal quote by a contractor, is not realistic.

Projects Complete:

The closure report for the LUST Site at the State Police Post in Wakefield, MI, which is Brownfield #150, was accepted so this brownfield is finished.

Chris Kulhanek

Projects Complete:

Camp Grayling – Replace Roofs in 200 and 500 Area (3 Projects) – Projects are complete and closed out.

Roscommon Operations Service Center – Window Replacement – Project is complete and closed out. The contractor has declined to file a claim for caulk replacement. DNR conducted air quality tests and found samples were all at non-detected levels.

Potential Issues/Solutions:
Forest Fire Experiment Station – The contractor has again missed scheduled completion dates.
Solution – Progress meetings continue to be held every two weeks. Liquidated damages will continue to be applied to each payment request until complete.

Rashmi Patel
Accomplishments:
MDOC Ionia, MTU and St Louis Correctional Facility - VMS System - Progress meeting – Contractor has brought cameras on line, initial agency training is scheduled and led lighting fixtures are installed. Waiting for manufacturer to receive damaged lighting fixtures. Lighting control training for maintenance staff is scheduled next week.

MDOC – Ionia Correctional Facility Roof Replacement - Contractor has completed building 300 roof; emergency repair work on building 6 and 7 is completed. Contractor will complete medical unit roof this week and close area for winter and will complete remaining roof on building 200 and 100 next spring season.

Sadi Rayyan
Accomplishments:
DNR Lead Reclamation at Shooting Ranges – The MOP was revised to include funding for lead recovery at the Pontiac Lake & Sharonville Shooting Ranges. Met with agency to discuss options to implement lead recovery at these 2 shooting ranges.

Former Flint State Police Post Site – Discussed with the PSC performing pilot test and additional sampling to address the contamination at the site. Reviewed and discussed the PSC proposal.

MDOC Various Correctional Facilities – Discussed with Nelson Tank Engineering scope of work to refurbish the water towers at the Macomb and Oaks Correctional Facilities. Negotiated a price reduction of ~$13k in the proposals to prepare specifications under their ISID contract.
Non-Project Related Activities:
DTMB (DCD & Purchasing) met with DEQ-RRD to discuss the available DTMB contracting tools and if they could be used to replace the Haz Waste Services Contracts. Scheduled a meeting with DEQ-RRD to explain the terms and conditions of the current contracting tools.

Reviewed draft MOU with MDOT/DMVA/DEQ and provided comments.

Jud Sorensen
New Projects:
A kickoff meeting was held with Byce and Associates, Inc. and the Department of Agriculture and Rural Development on 12/3. Byce is now proceeding with a study of the exterior walls as well as preliminary design for an elevator upgrade as well as the installation of occupancy sensors for lighting control. The study and design should be complete within 2 to 3 months with construction to start in the spring of 2015. Coordination with the Agency will be critical as this is the only elevator in the building. If possible, elevator work will need to be scheduled around times when the second floor labs are not extremely busy.

John Spencer
Accomplishments:
DMVA - Alma Armory boundary for parcel leasing CAD, legal description and delivery.

DNR - Holt Tract, Marshall, MI Rice Creek boundary fieldwork including creek ties.
Completed Projects:
DMVA - Alma Armory boundary for parcel leasing.
New Projects:
DMVA - Property neighboring Saginaw NOSC for boundary survey.

Terry O'Brien
Accomplishments:
Nothing significant to report.

Bruce Watkins
Nothing significant to report.

Section Manager: Irene Henry, Project Management Section 'A'

Preparing RFP document for urgent Capital Area Reconfiguration project, circulated it for comments, and met with other parts of FBSA, scheduled pre-proposal meeting for several ISID firms. Attended a meeting with LARA BCC and DNR, All-Manager Meeting, and Project Directors' meeting.

Bob Adams:

Nothing significant to report.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

Annual and sick leave.

Gerald Gregorski:

New Projects:

MDOC – Gus Harrison Perimeter Enhancements – The on-site project kickoff meeting was held for three perimeter fencing related projects; north sallyport gate replacement, extension of the outer buffer fence, and E-field perimeter security system replacement. The team decided to combine all three of these into a single project. MDOC will issue MOP revisions to combine funding under the sallyport gate project file number. The sallyport gate replacement is critical as they have almost daily failures of the gate drive and controls and need to then operate it manually. The facility requested using a PSC ISID contract to expedite the sally port replacement design work. Since the other two projects are closely related the team would like to package the entire work scope under a single PSC ISID assignment with a single construction contract. MDOC recommended the firm of Beckett & Raeder since they were familiar with the facility from previous projects and have successfully completed several other perimeter fencing projects. Representatives from Beckett & Raeder attended the meeting and will provide an ISID contract assignment request for the professional services work.

MDOC – Personal Emergency Location Systems Phase-2 at Six Locations – The proposal scoring team met to score the four professional services proposals received and select a PSC firm. A recommendation for contract award for the highest scoring firm, Tower-Pinkster, was submitted to the 1/15/15 State Administration Board for approval.

DNR/Parks & Recreation Div. – Below Ground Sewer and Water Study at Eight Parks – The 50% design review for the Petoskey State Park lift station installation was held. The bid advertisement for the lift station equipment was previously posted on Buy4Michigan. This is a long lead item and will be procured in parallel with the design and bidding for the actual equipment installation work to meet the required seasonal schedule.

Jan Miller:

Accomplishments:

Flint State Office Building, Interior Renovations – B&B submitted an updated schedule 12/8 for review. The 2nd floor move appears to have gone smooth. Floors 4-6 are being emptied out for the contractor to start 4th floor on 12/22.

Potential Issues/Solutions:

DCH Center for Forensic Psychiatry Projects – All CFP projects that are not nearing completion have been reassigned to Tim Hall due to my workload since just receiving the new Capital Area Reconfiguration project.

New Projects:

Capital Area Reconfiguration Project – Met with DTMB team 12/12 to get a better understanding of the project. Scheduled pre-proposal meeting with ISID PSCs for 12/15. Proposals will be due 12/29 with an anticipated contract date the first week of January.

Dave Sproul:
Nothing significant to report.

Steve Urban:
Potential Issues/Solutions:
Mason Building – BOD and DCD met to review status of project budget, status of cost changes related to CSM contract and those items outside of CSM contract (furniture and IT). Funding for furniture is a key issue; however, Keith is looking into funding sources for this. There are no new surprises as far as budget and scope. There will be some surplus funds from CSM Con Hall contract available for Mason project. Once the tenants have been identified for Mason Building a clearer picture of the budget will emerge.

Section Manager: Harold Belcher, Project Management B
GoToMeeting on Alpena to Hillman Trail bridge inspections; space reallocation meeting; All Managers Meeting; Project Directors Meeting, Paint recycling webinar.

Chris Bahjet
Potential Issues/Solutions:
DCH - Walter Reuther Hospital– Activity Building – The issue is neither Daniels Building Co. nor WRPH is willing to pay Modernistic invoice that resulted from the flood cleanup. Solution: I held a conference call among all parties to find a solution. It was suggested that WRPH is to contact DCH. In the immediate aftermath of the flood, I had contacted the SBA and Builders Risk and both indicated the flood recovery cost doesn't fall under any rules that they manage.
Projects Complete:
DTMB – Cadillac Place Sidewalks Phase 2 – Held the substantial completion for the granite and sidewalk replacement. The project will continue to install snow melt system as an extension to this project.

Tim Hall
Accomplishments:
MDOC WHVCF Jennings Temporary Housing Renovation – Conducted final coordination review with MDOC staff to determine scope of work responsibilities and external contracting requirements. PSC submitting plan review sets.

DNR Wolf Lake Fish Hatchery – Proposals received from 5 PSC candidates and distributed to selection committee for review.

DNR Yankee Springs Shop/Garage – Final bid document review with PSC conducted and release for bidding approved.

Bruce Hassen
Nothing significant to report.

Chris Kulhanek
New Projects:
Mason Building Exterior Repairs – Contract mod for PSC was approved for special Ad Board Agenda, so window repairs project could proceed and be bid ASAP. Goal is to complete work by the time interior renovation project finishes.
Potential Issues/Solutions:
Forest Fire Experiment Station – Questions on floor sealer threaten to delay equipment move scheduled for next week.
Solution – Conference call was set up to expedite approval of a substitute product. Contractor to apply sealer over weekend, so moving schedule is not affected.
Non-Project Related Activities:
Attended project director's meeting on 12/9.

Rashmi Patel

Accomplishments:

MDOC Jackson, DWH and C Unit Road Improvement - Progress meeting – Contractor will complete remaining work by end of this week and schedule substantial completion meeting next week.

Alger and Baraga Correctional Facility VMS System - Contractor has provided cost estimate to replace existing analog cameras with new IP cameras. PSC will review and provide recommendation.

Sadi Rayyan

Accomplishments:

DMVA Former Jackson Armory Site – Reviewed and recommended changes to the contract with AMEC to provide free product source removal, soil and groundwater investigation, site conceptual model development and technical support.

DEQ McLeieer Oil Site – Reviewed and recommended a construction contract award to E.T. MacKenzie with AMEC to excavate, remove and dispose of approximately 500 tons of contaminated soils and restore the site.

New Projects:

MDOC Macomb and Oaks Correctional Facilities – Assigned to Nelson Tank Engineering under their ISID contract to prepare bid specifications and provide construction oversight to paint/repair the 200,000 gallon elevated water storage tanks.

DEQ Kauppi Oil Enterprises Site – Assigned to Weston under their ISID contract to perform subsurface investigation to define the extent of free product and conduct a feasibility study of alternatives to recover and mitigate risks posed by the free product.

Non-Project Related Activities:

Attended the meeting for the project directors.

Attended “Remedy Selection for Contaminated Sediments” Webinar.

Jud Sorensen

New Projects:

The first on-site meeting was held at Camp Grayling between DMVA, DTMB and ENG, Inc. for the Cantonment Waste Water Treatment Study. This consisted of a fact finding meeting and facility tour to get a better understanding of Camp Grayling's future plans and existing and anticipated issues with the facility's waste water treatment system. Where in the past, Camp Grayling has predominantly served as a training facility during the summer months, it is now doing more and more programs throughout the year with long range plans showing significant increases in camp population especially during the winter months. As the wastewater spray irrigation system cannot be operated during the winter months, there is a question of whether the facility has sufficient lagoon capacity or if major expansion and/or redesign may be required. There is also a concern that there may be significant infiltration of ground water into the wastewater system reducing capacity and adding operating costs. These answers will come out of this study now being commenced by ENG, Inc.

Projects Complete:

A warranty inspection was completed by Carlisle, Inc. and a punchlist Inspection was completed by PSI on 12/8 for the new roof system installed by SDVGC at the Records Building Loading Dock. Carlisle has no issues. PSI noted that there should have been eight walk pads and the contractor had only installed one. In addition, the existing hot stack umbrella collars for the two unit heater exhaust vents appear to have been reset, but the specifications call for new larger collars. SDVGC has been instructed to add the additional walking pads and to replace the umbrella collars. In addition, SDVGC has been asked to provide a quote to repair cracks that opened up in the loading dock masonry walls. These cracks were the result of the weight of the original roof system being removed from the structural steel framing. The masonry walls are not load bearing, but cracks will allow outside air and moisture to enter into the building.

John Spencer

Accomplishments:

DNR - Holt Tract, Marshall, MI Rice Creek boundary, CAD and Riparian Rights questions sent to Assistant Attorney General for clarification.

DTMB - Veterans Memorial ties to check movement fieldwork, CAD and delivery.

DTMB - Residence additional survey request from PSC; Nowak and Fraus, meeting scheduled on-site 10 a.m. on 12/15 with PSC and others.

Editing Tenant Fit-Out version of Office Design Standard. Uploading as-built documents to TRIM library. Reviewed proposals for Capital Area Reconfiguration and made selections.

Bob Adams:

New Projects:

MDOC Hiawatha CF Perimeter Security System Replacement – Obtained approval for ISID PSC use. Prepared and submitted draft project statement to agency and reviewed.

Design:

MDOT Ironwood Welcome Center Roof Replacement – Received ISID proposal from OHM, reviewed with agency and submitted for contract award.

DNR Straits SP Toilet Shower Building Replacement – Conducted 90% phase 500 design review.

DNR Mackinac Island Road Repairs – Reviewed preliminary design document with agency.

Bidding:

DNR Porcupine Mountains SP Union Bay Campground Toilet/Shower Building Replacement – Conducted mandatory pre-bid conference for design-build contract.

MDOC Alger CF Roof Improvements – Received PSC recommendation. Prepared SAB agenda justification for contract award.

DNR Conely Point BAS – Received notice from DNR of full funding for the entire project. Prepared SAB agenda justification for contract award.

Construction:

DMVA Sault Armory Maintenance Shop Renovation and Addition – Worked with agency and PSC to address final outstanding work item to be completed by contractor.

Projects Complete:

DNR Mackinac Island Steward's Quarters and Morgue Roof Improvements – Obtained all outstanding closeout paperwork and resolved issues for submittal of final payment.

MDOC Newberry Boiler No. 1 Replacement – Processed final change order for contract time adjustment needed to complete project.

DNR Detour Harbor – Continued discussions with PSC and contractor for completion of closeout documents and submittal for final payment.

Scott DeKorte:

New Projects:

MDOC Muskegon CF Vocational Welding Program – Conducted pre-bid meeting for general construction bids.

MDOC Lakeland CF Electrical Distribution Project – Attended meeting with MDOC and PSC.

Joel Gordon:

Accomplishments:

DNR Fisheries Project Administration – Was asked by DNR Fisheries Division to meet with them to review administrative process for WO/MOP's, contracts. change orders and payment applications. Asked Pat Mullen to attend the meeting; the successful meeting brought new DNR staff up to speed with project procedures and built client relationships.

New Projects:

DNR Yankee Springs Recreation Area Historic Pavilion Restoration – Conducted a design team meeting to refine the project scope align with the restricted budget. The limited scope project will include only the structural repairs and limited roof repairs. The project will be issued for bidding on 2/12.

DTMB Capital Complex Master Plan Governor's Residence Renovations – The design team met with the Governor's residence staff to review budget and project scope and establish a schedule for implementation of phase one of the landscaping and grounds improvements.

Gerald Gregorski:

New Projects:

DNR Below Ground Sewer and Water Study at Eight Parks, Petoskey SP – Received a single bid for pre-purchase of the Petoskey State Park lift station equipment and the contract was approved. The bid for the actual equipment installation work was advertised with bids due 1/28.

DNR Below Ground Sewer and Water Study at Eight Parks, Hayes SP –The Lenawee County Drain Commissioner will be handling the replacement of the municipal sewer lift station that serves the Hayes State Park sanitary dump station using the State's maintenance fund. It will be coordinated with the dump station rebuild and is planned to be completed in time for the summer camping season. Other water and sewer upgrades at Hayes are proceeding on schedule. The 50% design review meeting for sewer and water upgrades at Pontiac Lake Recreation Area was held. Construction is planned for Fall 2015.

MDOC Gus Harrison Perimeter Enhancements – The ISID assignment for professional services from Beckett & Raeder was approved. The design kickoff meeting is scheduled for 1/14.

DNR Hart-Montague Trail Rebuild – The project construction is being funded by MDOT and MDOT is handling the bidding and construction administration. Approved a contract modification for the design firm originally contracted through DTMB, MC Smith & Associates, to provide participation in the MDOT grade inspection meeting, provide additional design details required by MDOT, and provide a minimal level of technical support (if required) during construction.

MDOC Pugsley Housing Units Security Enclosures – An ISID contract assignment was approved for Landmark Design, the A&E firm that did the original design work for the site. Landmark will provide the design and submit to LARA for plan review. MDOC facility personnel will perform the actual remodeling work.

Construction Starts:

DTMB Grand Tower AHU Replacement – The new chilled water piping system is in place and tied into the LBWL service lines. Temporary air handling units have been set up on the 2nd and 3rd floors to provide supplemental cooling while the existing refrigerated air handling units are removed and the new chilled water air handlers are installed on those floors. This should be completed over the next two to three weeks. Once completed, the temporary units will be moved to the next floors on the construction schedule, proceeding with converting two or three floors at a time to LBWL chilled water cooling. The contractor has been asked to provide bulletin pricing for replacing the control system for all VAV boxes in the building. Original plans called for only updating a small number of units on each floor to coordinate cooling with perimeter heating.

DMVA Grand Rapids Home for Veterans Chiller Replacement – Construction is progressing well. The new cooling towers have been installed; all piping and pumps demolition is complete; new pump pads have been poured and new process piping is well underway.

DMVA Grand Rapids Home for Veterans Backup Generators – The new generator mounting pads have been poured and preparations for electrical tie-ins are complete. Waiting for delivery of the new generators scheduled for March 2015.

Projects Complete:

MDOT Metro Region Office HVAC Replacement – The project is substantially complete and all MDOT staff have moved back into the facility. A final punch-list review meeting was held and found that the contractor still has some items to complete before the final payment request will be approved.

Jan Miller:

Accomplishments:

DNR Maybury State Park Trail Improvements – Held 90% design review meeting 1/6. Project will be posted on Buy4Michigan 1/12, pre-bid meeting 1/26 with bids due 2/4.

DNR Dodge #4 State Park & BAS Improvements – DNR has received funding and authorization to proceed with both the Beach Erosion and the BAS projects. Since Beckett & Radar is the PSC on both, the projects will be combined into 1 larger project making it more attractive to bidders. Meeting was held on site 1/8 to review project and establish a schedule.

Flint State Office Building, Interior Renovations – Contractor began demolition 12/22/14 as scheduled; however, the skywalk and south entrance are still not complete. Issues with the lighted handrail in the skywalk and the south entrance vestibule sprinkler requirements are being addressed.

New Projects:

Capital Area Reconfiguration Project – Received and evaluated 5 proposals. Recommended award of 2 PSC contracts; Bergman Associates for Moves 1 & 2 (Mason & Ottawa Buildings), and Hobbs + Black Architects for Move 4 (MSP Headquarters).

DNR Ludington State Park Beach House Exhibits – Working with DNR on writing the project descriptions for 3 separate RFPs.

Dave Sproul:

Accomplishments:

MDOC Ionia Energy Project – ESG is continuing to develop the bid documents for the water and lighting energy improvements for submittal to LARA. We are working to bid the subcontractor portion of the water and lighting packages in January/February 2015. ESG is also working on the major heating system improvements and this scope will be bid later this spring.

MSP SEOC – Daniels/Christman has begun installation of the building foundations and site drainage piping. With the holidays and extreme cold weather the last couple of weeks, outdoor construction progress has been slowed.

DCH Caro Center New Fire Alarm System – Additional asbestos abatement was completed within the Administration Building just before Christmas. SimplexGrinnell has been working in several buildings simultaneously to maintain the schedule.

DCH Caro Center Utility Service Backup Generator – Completed the review and released the bid documents for advertisement. This work will include a new generator, new switchgear, primary cabling, and code compliant exit and egress lighting within the facility. We anticipate construction bids at $3M plus.

Jackson College, Bret Walker Hall Renovations – Received and approved the Preliminary Design. This $15.2M project provides a major renovation to the existing facility to meet current college program requirements.

New Projects:

DTMB, Capital Area Reconfiguration – Received, reviewed, and accepted a proposal from PARTNERS In Architecture to provide programming and schematic design to move State Police from their Headquarters into the General Office Building.

Steve Urban:

Accomplishments:

BOD/Treasury Austin Building, Treasury Executive Office Area Renovations – Construction bids were due 1/7. Apparent low bid from Antler Construction was below construction cost estimate. The construction contract will be on the State Ad Board agenda for 2/3 approval.

Projects Complete:
BOD MSP PTA Shooting Range Ventilation Improvements – Construction was completed on time for DNR trooper school start up. The MSP Industrial Hygienist has conducted air monitoring of lead levels during live fire exercises. Report to be completed in 2 weeks. Contractor (Laux) did a good job in keeping project on schedule and on budget.

BOD MSP PTA Swimming Pool Renovations – Construction was completed on time and the pool is open for training exercises. Contractor (Laux) did a good job keeping project on schedule and on budget.
Potential Issues/Solutions:
BOD Mason Building Renovations – Conducted IT/Phone construction coordination meeting with IT, contractor and DTMB agencies to determine requirement and schedule for BOD building automation systems communication needs. IT is in the process of ordering material and it has been confirmed that IT system will be installed in mid-late March. Coordination with IT/Telecom has been a strong point for CSM.

Section Manager: Harold Belcher, Project Management B
Project Closeout; HAL

Chris Bahjet
Accomplishments:
DMVA – Taylor Armory – Modification 2012 – Although the project scope in essence was complete, the commissioning remained. Contractor could not start this phase due to inadequate gas pressure. DMVA is currently working on rectifying the issue.

DCH – Walter Reuther Hospital – Facility Condition Assessment – Met to discuss the final report. The report analyzed all systems and assigned priorities and costs. Upon examining the cost estimates and comparing them with recent bids and quotes, the estimates were about 30% of what recent experience is. Upon discussion, it was revealed the PSC was using its own data, but with a modifying factor that needs to be adjusted. Another matter discussed was the smoke detectors the patient rooms where there is a current work order calling for installing such at patient rooms. Citing patient disruptions and possible confusion, the report advises (and the hospital administration concurs) otherwise. Consequently, I asked WRPH administration to discuss this issue with DCH. Code doesn't require this installation.
Potential Issues/Solutions:
DCH – Walter Reuther Hospital – Showers – Met to discuss possible solutions to shower angle being too wide, spraying away from the patient. The shower heads are fixed anti ligature style and they are not adjustable. Solution - PSC will specify wider angle shower head. Another issue is the water temperature at the showers is tempered and not hot enough. Solution - Upon research, it was apparent the mixing valves are pressure activated and there is not enough hot water pressure coming from the first floor. PSC will specify alternate mixing valves that are temperature activated.

Tim Hall
Accomplishments:
MDOT Blue Water Bridge HVAC Replacement – Contractor has completed all major system replacements and start-up of equipment. Progressing with remaining work for toll/inspection booth HVAC replacements and should be complete next week. Added scope HVAC unit replacement in Truck Cargo Facility is ordered and scheduled for replacement late February.

MDOC WHVCF Jennings Temporary Housing Renovation – Received LARA plan review approval, but still awaiting Fire Marshal review. Reviewing quotes for work which Corrections cannot perform in house to assist them in confirming scope prior to issuance of PO.

DNR Rose Lake & Maple Rapids – Received final Certificate of Occupancy and PSC sign off on all punch list items for the project. Contractor will deliver final closeout package next week to fully complete project.

DNR Wolf Lake Fish Hatchery – Scheduled PSC proposal review with committee for evaluation and recommendation next week.

DNR Yankee Springs Shop/Garage – Project released for bids, pre-bid meeting conducted and bids to be submitted next week.

DCH Center for Forensic Psychiatry Miscellaneous Improvements – Parking Lot Upgrades - Released for bidding and remaining projects reviewed for upcoming planning meeting with DCH team.

Bruce Hassen

Accomplishments:

A bid walk-thru was held at the Dept. of Corrections SAI Facility (a.k.a. Camp Cassidy Lake) for contractors interested in removing the last UST from that site on 1/9.

New Projects:

A kickoff meeting for DTMB-D&C, DNR-Forestry, and DCH for the redevelopment of the Nokomis Challenge Center (Prudenville) will take place at Constitution Hall the week of 1/12.

Chris Kulhanek

Potential Issues/Solutions:

Forest Fire Experiment Station – A dispute has risen regarding concrete floor stain. The color approved on the submittal was incorrect. DNR has not accepted it and as a fix they have requested it be covered with an epoxy finish. They will pay for the difference in the cost for the upgrade only. The GC and PSC disagree as to who's at fault.

Solution – The contractor has agreed to proceed with the new epoxy finish with the stipulation the meeting minutes state they do not agree that they should cover the cost. The issue needs to be negotiated with the PSC.

Mason Building Exterior Repairs – BOD requested window repairs recommended by the PSC be bid as a separate project from the exterior masonry repairs. The completion date to do this is estimated to be in mid-August, which is unacceptable for BOD.

Solution – To expedite, the PSC will issue a bulletin to the GC to expand their scope of work to cover the window repairs.

Rashmi Patel

Accomplishments:

Cooper Street Correctional Facility - Video Cameras System - Received contract modification to install 3 PTZ cameras.

Thumb and Macomb Correctional Facilities - VMS System - Received construction bids.

Sadi Rayyan

Accomplishments:

DEQ Belgravia Site – Reviewed and recommended changes to the contract with Global Remediation Technologies to perform pre-design sampling and piping removal, design residential vapor protection barrier and thermal treatment system, oversee the construction/implementation of the remediation system and provide post remediation monitoring.

DEQ Former Performance Paper Site – Reviewed and recommended changes to the contract with URS Corporation Great Lakes to conduct a site survey and provide in-stream weirs (riffles) hydraulic modeling/design modifications.

Construction Starts:

DEQ Clark Service Station Site – Field activities for soil excavation and site restoration begin 1/5 with substantial completion by 3/5.

Non-Project Related Activities:

DEQ ISID Lab Contracts – The five contracts extended to 2/7/16.

2015 Environmental ISID Contracts – RFP advertised.

Attended "Green & Sustainable Remediation" Webinar.

Jud Sorensen

Construction Starts:

A pre-construction meeting was held on 1/5 with Laux Construction LLC for the installation of a new roof access and an above ceiling maintenance platform at the General Services Building. The new roof access and the new equipment maintenance platform are required to assure that roof and above ceiling mounted equipment can be accessed and maintained in a safe manner. It is anticipated that work will be complete by early May.

Potential Issues/Solutions:

DTMB was made aware by the Department of Corrections that the new HVAC Unit installed last summer by Shaw-Winkler and their subcontractor, The Trane Company, for the Cooper Street Correctional Facility Administration Building Visitor's Room experienced an ignition failure the weekend of 12/27/14 and failed to achieve the room heating set point on 1/4. This resulted in the Agency cancelling prisoner visitation. Trane was on site 1/4 and 1/5 to resolve issues. The unit experienced another ignition failure the weekend of 1/10 and Trane was again called to the site the Monday morning, 1/12. So far they have found a bad ground on the ignition module due to loose bolts and a minimum set point for the outside air damper at a level exceeding the engineer's recommendation. A meeting has been tentatively scheduled with Trane, Shaw-Winkler and the Agency to review findings and to assure that these problems do not continue to happen.

John Spencer

Accomplishments:

SBA - GVSU made changes requested by title work and Dickinson-Wright.

Non-Project Related Activities:

HAL training for an hour entry of Site Section time on projects.

Terry O'Brien

Accomplishments:

SESC plan and spec review for DNR Silver Lake BAS.

Bruce Watkins

New Projects:

Waterloo RA – Lagoon Repairs – Setup PPP meeting with DNR for next week.

Waterloo SGA – Heating System for Two Pole Barns – Setup PPP meeting with DNR for next week.

Projects Complete:

Waterloo State Game Area – Cold Storage Building – Held punchlist meeting for project closeout. Project came in under budget and on time.

Section Manager: Dennis Stamm, Project Supervision

Nothing significant to report.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending January 16, 2015
Section Manager: Irene Henry, Project Management Section 'A'
Final drafts of agency MOUs, final editing Tenant Fit-Out version of Office Design Standard. Uploading as-built documents to TRIM library.

Bob Adams:
Design:
MDOC Hiawatha CF – Assisted MDOC at meeting with ISID PSCs to scope the work of the multiple projects re-directed from Kinross CF.

DNR Muskallonge SP Shoreline Erosion – Received and initiated review of 90% phase 500 design documents.
Bidding:
MDOC Newberry CF Fire Alarm System Upgrades – Received PSC recommendation, prepared and submitted the agenda justification for construction contract award.

MDOC Chippewa CF Fire Alarm System Upgrades – Issued post-bid addendum.

MDOC Pugsley CF Fire Alarm System Upgrades – Received PSC recommendation for bid award. Prepared Ad Board Agenda justification.
Construction:
DNR Palms Book State Park Toilet Building Replacement – Conducted pre-construction conference.

DMVA Sault Armory Maintenance Shop Renovation and Addition – Contractor provided submittal to address final outstanding work item, pending review by PSC.
Projects Complete:
DNR Detour Harbor – Continued discussions with contractor for completion of closeout documents.

Scott DeKorte:
Nothing significant to report.

Joel Gordon:
New Projects:
DTMB Michigan Law Enforcement Officer Memorial (MLEOM) – Construct a New Fallen Officer Memorial – Met with the successful design consultant and reviewed their cost proposal structure and amount. The PSC (David Milling Architects) will reformat their proposal and resubmit for DTMB consideration.

DTMB Capital Complex Master Plan Governor's Residence Renovations – The design team met with the Governor's residence staff members to review budget and project scope. After careful study of the cost estimate and value engineering options it was established that the project scope would be reduced by excluding the "upper terrace" improvements.

Gerald Gregorski:
Nothing significant to report.

Jan Miller:
Accomplishments:
DNR Silver Lake State Park Day Use & BAS Improvements – Held 50% design review meeting 1/16. Plan review, cost estimate and deduct alternates were discussed.

Flint State Office Building, Interior Renovations – The contractor removed one of the 2 superintendents from the site and requested approval for replacement with a senior project manager. His resume has been submitted and is being reviewed.

Capital Area Reconfiguration Project – Held kick-off coordination meeting 1/12 with all 3 professionals; Bergman Associates (moves into Mason & Ottawa Buildings), Hobbs + Black Architects (moves into MSP

Headquarters) and Partner (moves into GOB). Working with Mary Kay & Jim Clark on writing Move Manager and Construction Manager RFPs.
DNR Ludington State Park Beach House Exhibits – Issued 3 separate RFPs. The Interpretive Exhibit RFP has been posted on Buy4Michigan and the other two, Aquarium Exhibits and Topographic Map have been issued as invitation only due to project size and specialty.
Potential Issues/Solutions:
DNR Dodge #4 State Park & BAS Improvements – PSC and DTMB became aware via email by DNR that a portion of the project site is privately owned by others. DNR Real Estate was notified of this in 2011; however, it appears as if nothing was done. Project was scheduled to be posted on Buy4Michigan 2/2; however, it cannot be bid until property ownership is resolved. Awaiting correspondence from DNR.

Dave Sproul:
Nothing significant to report.

Steve Urban:
Accomplishments:
DTMB Mason Building Renovations Project – Participated in tenant programming design kick-off meeting with RED and new tenants; ORS and DIFS. Both groups have been most cooperative. Bergmann Assoc. has received requested programming surveys from both groups. First pass of block plans to occur the week of 1/19. Conducted 2 site tours of the Mason Building for each group. JLL will be responsible for the move management of the ORS and DIFS moves. Have instructed JLL to draft a pre-move newsletter for ORS and DIFS employees.
Potential Issues/Solutions:
MSP-PTA Swimming Pool Renovations – Construction was completed on time per contract term (12/23/14); however, Lansing Tile, the installer of the new epoxy flooring, has asked for $11,000 in additional labor and material due to an estimating oversight on their part. This was requested 2 weeks after substantial completion. Both DCD and BOD have agreed to deny this request due to the fact that this oversight was never brought up until now and their supporting documentation was very weak.

Section Manager: Harold Belcher, Project Management B
Defective Plans and Specs webinar; HAL status meeting.

Chris Bahjet
Accomplishments:
DTMB – Cadillac Place – Shelter In Place/Lobby Security – Met to discuss the second version of the study report. Discussed turnstile location options with each pros and cons. Also included the option of having access cards on elevators in lieu of turnstiles. Next report to develop these thoughts with costs.

DCH – Walter Reuther Hospital Activity Building and Showers Projects - Met with Daniels to discuss potential claims due to delays to foundation and parapet wall steel changes. Weighing pros and cons of providing heat and building enclosure and examining if it will provide a meaningful cost benefit.

Tim Hall
Nothing significant to report.

Bruce Hassen

New Projects:
Camp Grayling – Light Demo Range – DMVA has provided construction funding for this project. The design was completed a few years ago and it has been on hold since.
Projects Complete:
Montcalm Community College – Advanced Technology Building - The project is complete and occupied.

Rashmi Patel
Nothing significant to report.

Sadi Rayyan
Accomplishments:
MDOC Various Correctional Facilities – Met with Nelson Tank Engineering and agency to discuss details and special working conditions for contracting to refurbish the water towers at the Macomb and Oaks Correctional Facilities.

DEQ Frank's Service Station Site – Reviewed and recommended an award of construction contract to Ripman Construction Company to remove and dispose of approximately 450 tons of contaminated soils and restore the site.

DEQ Alcott Dam Site – Reviewed and recommended changes to the contract with URS to provide additional design and technical support services.

DEQ Residential Wells Torch Lake Site – Reviewed and recommended changes to the contract with AECOM to perform a pilot test using a trailer-mounted air sparge/soil vapor extraction system to evaluate the applicability of this technology to the site.
New Projects:
DEQ Marcy's Cleaners Site – Assigned to Global Remediation under their ISID contract to design an in-situ chemical injection treatment, provide construction oversight and monitor the effectiveness of the treatment.

DEQ Broekhuizen Produce Site – Assigned to Superior Environmental under their ISID contract to perform environmental investigation and prepare focused feasibility study.
Non-Project Related Activities:
MOU with DEQ – Reviewed and commented on the final draft.

DEQ Expanded Env. Remediation ISID Contracts – Debriefed Cardno ATC on the results of the selection.

2015 Environmental ISID Contracts – Issued and posted Addendum #1 to answer questions received from the potential bidders.

Attended "Contractor Strategies for Dealing with Defective Plans and Specs" Webinar.

Jud Sorensen
Potential Issues/Solutions:
Based on review of a 11/20/14 study prepared by Partners in Architecture, DTMB Operations has decided to have Partners in Architecture proceed with design and bid documents for roof replacement of the main roof at the DTMB Records Building. Roof replacement is estimated at approximately $1.8 million. Currently, funds are not available to fund the construction phase within the 2015 fiscal year. The existing roof has a number of leaks and has exceeded its expected life.

A meeting was held with Tower Pinkster, UIS and the Department of Corrections to review the preliminary report and findings for maintenance of primary switchgear at the Women's Huron Valley Correctional Facility. UIS pointed out a number of minor to significant issues with the current electrical distribution system, the worst of which is located in a utility tunnel with limited access where a steam leak has destroyed a medium voltage junction box. If the cable within this box would fail, this would shut down power to a good portion of this facility. Repair of this junction box and cable are not currently funded, but will need to be addressed prior to or as a part of the tunnel pipe replacement project as piping work in this area of the tunnel will not be safe unless power is shut down of the junction box and cable are repaired.

John Spencer

Provided review drafts of the Tenant Fit-Out versions of the Office Design Standard to RED and BOD. Toured Mason Building. DCD financial/budget meeting. Uploading as-built documents to TRIM library.

Bob Adams:
Design:
MDOC Hiawatha CF – Attended walk-through with agency and PSC to scope out needed fire alarm system upgrades.

DNR Muskallonge SP Shoreline Erosion – Participated in 90% phase 500 design review meeting.

DNR Fayette Historic SP Toilet and Shower Building, Sanitation Station and Sewage Disposal – Participated in a design status and planning meeting with the agency and PSC.

DNR St Louis Creek Culvert - Conducted phase 500 50% review.
Bidding:
MDOC Chippewa CF Fire Alarm System Upgrades – Issued post bid addendum to clarify bid schedule requirements.

DNR Straits SP Toilet and Shower Building Replacement – Finalized 100% design documents with PSC and submitted for advertising on Buy4Michigan.

DNR Union Bay Campground Toilet and Shower Building – Issued addendum #6 and #7 for posting on Buy4Michigan.

Scott DeKorte:
Nothing significant to report.

Joel Gordon:
New Projects:
DNR Marquette and Thompson State Fish Hatcheries Raceway End Closures – Met with Hatchery staff and reviewed project scope and schedule. This will be the final phase of the raceway end closure project. The documents were completed three years ago and require minor updates. The project is scheduled to be bid in late February.

DNR O'Neil Lake Dam Emergency Dam Repair – Met with the project team and reviewed options and probable costs. The DNR has taken the options under advisement and will respond with their desired course of action. The project team would like to be in position to begin construction as early in the spring of 2015 as the weather allows.

Gerald Gregorski:
New Projects:
MDOC Personal Emergency Location Systems Phase 2 at Six Locations – The recommendation for contract award for Tower-Pinkster was approved by the State Ad Board and the contract was executed. A design kickoff meeting has been scheduled for 2/3.

MDOC Gus Harrison Perimeter Enhancements – The professional services contract with Beckett & Raeder was executed and the design kickoff meeting was held. Design activities are progressing toward a June 2015 start of construction target.
Construction Starts:
DNR Below Ground Sewer and Water Study at Eight Parks – The pre-bid on site meeting for the Petoskey State Park lift station equipment installation was well attended. Bids are due 1/28 with project completion planned to meet the summer camping season. Construction activities at both Mitchell and Hayes state parks have stopped for the winter season. Both are in very good shape schedule wise with the majority of work completed.

MDOC Personal Emergency Location Systems at Eight Locations – System calibration was completed at Egeler. Facility staff training is scheduled for 1/30. Work has been discontinued at Kinross with plans being made to re-allocate resources to Hiawatha.

DTMB Capitol Complex Controls Integration/EBI Replacement – Additional integration work required for the Hall of Justice lighting control panels has been completed and tested.

DTMB Traverse City SOB Renovate Ground Floor Restrooms – Ground floor public restroom renovation work is nearly completed with the substantial completion scheduled for 1/30. The toilet replacement trial for the other restrooms is successful. Funding is being added to replace all of the toilets with new style that flushes properly.

Jan Miller:

Accomplishments:

DTMB Flint State Office Building Interior Renovations – Met 1/23 to discuss the issues with Paul Krysinski, the proposed new project superintendent/project manager; reviewed his information and accepted as the new superintendent. The south entrance is scheduled to be opened 2/2 and the skywalk temporarily 1/28.

DTMB Capital Area Reconfiguration Project – Completed the Move Manager RFP and a draft of the Construction Manager RFP. They will not be issued until funding is available.

DNR Ludington State Park Beach House Exhibits – Extended the bid date on all 3 projects for 1 week; from 1/28 to 2/4.

New Projects:

DNR Ludington SP Cedar Campground Drainfield Replacement – Received approved work order from DNR. Due to urgency and limited scope the project will be bid out as invitation only. Construction needs to be completed before Memorial weekend.

Dave Sproul:

Accomplishments:

MDOC Ionia Energy Performance Contracting Project – The water and lighting energy improvements portion may be ready for release of subcontractor bidding by mid-February. The drawings are complete with some minor specification comments to finalize. ESG is continuing to develop the major heating system improvements and this scope will be bid later this spring. We are considering a new addition to the MTU maintenance building to house the new heating boilers.

MSP SEOC – Installation of the new building addition foundations are progressing. Demolition within the existing first floor GOB building is underway. Partners in Architecture have provided direction on the required modifications to the new utility tunnel floor elevation issue and Daniels/Christman is evaluating the cost impact.

DCH Caro Center Utility Service Backup Generator – Conducted the mandatory pre-bid meeting. Eleven potential contracting firms attended the walk-thru and construction bids are due on 2/4.

DCH Hawthorn Center Various Maintenance Projects – Contractor is completing the gym floor repairs and installation of new ceilings. The new pool filtration system components are on order and installation is scheduled to start next month.

MDOC Thumb Correctional Facility Water & Sewer Improvements – Continuing to review and analyze the pressure effects of the proposed new back pressure assembly. The new back pressure assembly will cause a 10 psi drop within the entire facility that may be problematic for MDOC. C2AE is evaluating the recommendation to provide a new booster pump station as well.

MDOC MR Power Plant Replace De-Alkalizers and Water Softeners – The new de-alkalizer and softener tanks have been delivered and the contractor is progressing with installation. The new softeners are to be operational by the end of January and it appears the schedule will be met.

New Projects:
DTMB Capital Area Reconfiguration – Have initiated the program analysis and schematic design effort for the relocation of State Police from their current Headquarters to the GOB. We are scheduled to meet with State Police on 2/18 to officially begin the programming work. State Police will be first internally to define their program needs and requirements.

Steve Urban:
Accomplishment:
Met with Doug Church from BOD to brief him on my projects located in Zone 3. Doug being re-assigned as the new Zone 3 Facilities Supervisor.
Potential Issues/Solutions:
DTMB Mason Building Renovations – Weekly programming progress meetings with ORS, DIFS and Bergmann Associates occurred. First pass of a block plan for DIFS was presented. Approval of a finalized version no later than 2 weeks out. The executive suite area is the only non-typical area. This area would be the last area to relocate. Other hard wall offices are typical.

The initial ORS programming information submitted came up short of expectations. However, after our progress meeting ORS forwarded additional meaningful information.

Section Manager: Harold Belcher, Project Management B
HAL; DCD Financial Meeting; MDOC Thumb CF bid recommendation meeting.

Chris Bahjet
Accomplishments:
DCH – Walter Reuther Hospital – Activity Building – Completed negotiating with Daniels Building Company to add site lights which will be partially funded by the SBA and another part by the agency.

Tim Hall
New Projects:
DNR Wolf Lake Fish Hatchery – PSC contract award recommended and approved. Design kickoff to be scheduled as soon as all documents fully executed.

DNR Yankee Springs Shop/Garage – Received 9 bids for project; reviewing budget/funding options with agency and project team due to bids exceeding initial funding allocation.

DCH Center for Forensic Psychiatry Miscellaneous Improvements – On-site warehouse released for bidding and scheduled a meeting with DCH team to review all remaining projects to refine action planning and priorities for implementation.

MDOC Women's HVCF ADA Walks & Paving – Conducted 50% phase 400 design review meeting with PSC and WHVCF/MDOC staff. Follow up review will confirm scope and direction required to progress to bidding and maintain desired spring construction start.

MDOC Women's HVCF Prisoner Services Building – Contract fully executed and preconstruction meeting scheduled with project team to launch the project.

MDOT SW Region Laboratory - Contract fully executed and preconstruction meeting scheduled with project team to launch the project.
Potential Issues/Solutions:
MDOT Blue Water Bridge HVAC Replacement – Several start up challenges occurred with smaller booth systems and contractor has convened engineer and manufacturer to determine required actions to resolve the issues and successfully commission the systems. Additionally, a coil was frozen on a recently installed unit at the truck cargo inspection area and water damage occurred to US Customs and Border Patrol equipment and materials. The contractor responded quickly to clean up and address damaged materials. An error in connection of system controls was discovered and corrected as well as replacement of damaged system components.

Bruce Hassen

Accomplishments:

A site walk-thru was held at the former Nokomis Challenge Center for the four expanded environmental ISID professionals who were pre-approved for demolition projects and responded to DNR's invitation to come. We believe all four will offer pricing and resumes for key staff that would be assigned to this project.

Chris Kulhanek

Accomplishments:

Mason Building Exterior Repairs - The process to get change order approval for window repairs was expedited in order to make the 2/3 Ad Board. This will save valuable time in getting this work done by the time tenants move into the building later this year.

Potential Issue/Solutions:

Forest Fire Experiment Station – The contractor was directed to apply an epoxy coating over parts of the concrete floor in the office area which were stained the wrong color. The DNR agreed to only pay the difference in the two finishes.

Solution – The PSC was informed they would have to share the cost of this error due to the submittal being approved. They subsequently have submitted a letter denying fault in the situation. A pending contract modification remains on hold until this issue can be resolved.

A request for a time extension was also submitted by the General Contractor.

Solution – The request needs to be reviewed and negotiated with DNR and the GC.

Rashmi Patel

Accomplishments:

Cooper Street Correctional Facility - Video Cameras System - Received fiber testing report for work included in contract change order work.

Thumb and Macomb Correctional Facilities - VMS System - Post bid interview with qualified low bidder, address issue of project schedule, delays quality and fiber optic cable installation and testing requirement.

Ionia, MTU and St. Louis Correctional Facilities - Video Cameras Systems - Progress meeting at the site. Contractor stated the he completed preliminary list of work prepared by PSC and is ready to punch-out work included on original contract. PSC is reviewing bulletin price for additional work, interior cameras as requested by MDOC.

Sadi Rayyan

Accomplishments:

DNR Otsego Township Dam – The PSC submitted to the agency draft report for the dam repairs. Discussed with agency report and alternatives presented to the agency.

DEQ Star Watchcase Site – Reviewed and recommended changes to the contract with Mannik & Smith Group to perform additional remedial investigation using sonic drilling to install 12 monitoring wells for sampling.

DEQ White Star Tavern Site – Reviewed and recommended changes to the contract with Manik & Smith Group to complete the implementation of a pilot study using an air sparge/soil vapor extraction trailer system owned by the agency, provide routine maintenance for two years and completion of a final pilot study report.

New Projects:

DEQ Schultz's Market and Gas Station Site – Assigned to Sagasser & Associates under their ISID contract to conduct environmental investigation, evaluate site conditions/potential remediation options and reporting.

DEQ Leatherman Oil Company Site – Assigned to Manik & Smith Group under their ISID contract to perform remedial investigation including ground-penetrating radar (GPR) survey, soil/groundwater/gas sampling, risk assessment/pathway evaluation and the development of limited feasibility study.

DEQ Former Fred & Margaret Munger Sunoco Site – Assigned to Manik & Smith Group under their ISID contract to perform expanded remedial investigation services including soil/groundwater/gas sampling, risk assessment/pathway evaluation and the development of conceptual corrective action plan to reduce source soil/groundwater contamination and mitigate uncacceptable risk.

Jud Sorensen

New Projects:

A project planning and partnering meeting was held with DTMB Operations for the design, furnishing and installation of new disconnect switches on the primary electrical feeds entering the Romney Building. Currently there is no way to isolate portions of the primary switchgear within the Romney Building for cleaning and maintenance without the involvement of the Lansing Board of Water and Light and without shutting down power to several other buildings within the downtown Lansing area. It was decided because of the project's limited scope and budget that it would be best to have engineering services provided through an existing ISID contract. Late last week, Orion Engineering was walked through the Romney Building switchgear room and will now be submitting a request that the required professional services be added as an assignment to their current ISID contract.

Potential Issues/Solutions:

A meeting was held with MDOC and with Shaw Winkler and the Trane Company at the Cooper Street Correctional Facility to review issues that have been experienced with the new HVAC unit installed last summer for heating and cooling of the visitor's room within the Cooper Street Correctional Facility Administration Building. There appears to have been issues both with a failure to properly torque the grounding cables on the ignition control module causing the burner to fail and there also appears to be issues on how Trane programmed the unit's sequence of operation. Trane is continuing to correct the problems, working with the professional to correct issues associated with the unit's sequence of operations.

WR Ending February 6, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Attended mandatory labor relations training. Held a webinar on Documentation Best Practices. Marketing meeting with DLZ Michigan.

Bob Adams:

Design:

MDOC Hiawatha CF Personal Emergency Locator System – Met with design-build contractor and engineer at facility for planning and walk-thru.

DNR Pioneer Trail – Forwarded the OHM ISID Proposal to DNR for review.

Iron Industry Museum Roof Upgrade – Reviewed 90% documents and commented.

Bidding:

MDOC Chippewa CF Fire Alarm System Upgrades – Received agency acceptance of PSC proposal and submitted agenda justification for PSC modification approval.

Construction:

MSP Negaunee Post Roof and Ventilation Upgrades – Conducted a site meeting to review the roof during current winter conditions. Subsequently, the PSC issued a bulletin for quotation.

DMVA Jacobetti Veterans Home – Visited site and contacted the contractor to complete outstanding punch list items in the main lobby. Received quotation for new roof at F wing.

Projects Complete:

DNR Detour Harbor Renovation – Held meeting with contractor regarding closeout and final payments. Contractor is planning 21 days for completion of remaining closeout items.

DMVA Sault Armory Maintenance Shop Addition and Renovation – Reviewed final pay request and closeout documents with contractor.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

Accomplishments:

DTMB Michigan Law Enforcement Officers Memorial – After receiving a fee proposal from the selected (design competition) PSC I met with the consultant and reviewed the project scope, scope of PSC services needed and format for the proposal. This review resulted in fee reduction of nearly $90,000 and services more closely aligned with our project needs.

Bidding:

DTMB Grand Rapids State Office Building Install a Back-up Chiller System – A pre-bid meeting was conducted at the project site on 2/2. Bids are due 2/11.

Gerald Gregorski:

New Projects:

DNR Below Ground Sewer and Water Study at Eight Parks – The contract award recommendation for the Petoskey State Park lift station equipment installation, to the low bidder McKerchie Enterprises, was approved on the DCD Directors Agenda.

MDOC Personal Emergency Location Systems Phase 2 at Six Locations – The design kickoff meeting was held with the PSC Tower-Pinkster and MDOT Physical Plant. The PSC will be using two separate design teams by geographical location to facilitate the design process.

MDOC Pugsley Housing Units Security Enclosures – The design plan review has been approved by LARA. MDOC facility personnel will perform the actual remodeling work.

Construction Starts:
DTMB Grand Tower AHU Replacement – Air handler replacement has been completed on the 2nd and 3rd floors with the new AHU's in operation. Laux is proceeding with demolition of the AHU's on the 1st floor and basement. Temporary cooling units will only be used on the 1st floor. Bulletin pricing for various options for full VAV Box / Controllers replacement is being evaluated by the PSC and BOD.

Jan Miller:
Accomplishments:
Flint State Office Building, Interior Renovations – The south entrance opened as scheduled 2/2 and the skywalk opened temporarily on 1/28. The project seems to be running smoother since our meeting in December with B&B owner Bernice, Bob Hall and Larry Scates.

Capital Area Reconfiguration Project – Held DCH programming kickoff meeting with Hobbs + Black and DCH 2/4.

DNR Ludington State Park Cedar Campground Drainfield Replacement – Due to the limited size and simplicity of the project, it has been issued for bid as invitation only. Bids are due 2/25.
Potential Issues/Solutions:
DNR Dodge #4 State Park & BAS Improvements – At the state's direction, the PSC conducted a boundary survey to assure that the project is on state property. The layout had to be slightly revised as the result of the survey. Project was posted on Buy4Michigan 2/3 with pre-bid meeting scheduled for 2/13.

DNR Ludington State Park Beach House Exhibits – Received bids on all 3 projects 2/4. No bids were received for the Aquarium or the Topographic Map Exhibits. Only 1 bid was received for the Interpretive Exhibits, which was in budget. Discussions with DNR are underway.

DNR Maybury State Park Trail Improvements – 7 bids were received 2/4; all over budget. A conference call with DNR, PSC and DTMB has been scheduled for 2/9 to review bids and budget.

Dave Sproul:
Nothing significant to report.

Steve Urban:
Accomplishment:
Mason Building Renovations – Conducted information tour of the Mason Building with representatives of both Senate and House Fiscal Agencies, BOD and RED.
New Projects:
LSHC 208V to 480V Upgrades at SOS Building – Met with LSHC management and BOD to discuss scope of work. This scope of work is the final phase of the electrical upgrades planned for the LSHC facility. It was agreed that EAI, Engineering Applications Inc. would be best suited as the design professional for the project since they were the design professional for the last 2 phases of the electrical upgrades.
Potential Issues/Solutions:
Mason Building Renovations Project – ORS programming is ongoing. Good back and forth exchange of ideas between Bergmann and ORS. ORS to take 3 full floors along with partial 1st floor for training and large conference room spaces. Final block plan to be presented to ORS week of 2/9. DIFS is pressing for occupying 3 full floors; however, there does not appear to be an adequate justification. Further program development will determine the need. LARA will require more than 1 floor to meet their programming needs. Programming results by the week ending 2/13 will determine how LARA will fit into Mason.

Austin Bldg. Treasury Executive Office Renovations – The construction contract was approved on 2/3. It was discovered this past week that concrete vault contains asbestos fireproofing material on seams of interior steel plate liner panel at walls of the vault. This information was not documented as part of the building wide asbestos report. Abatement of this material along with asbestos floor tile and adhesive (which were known about prior to the start of this project) to occur week of 2/9. Abatement will occur on midnight shift. Adjacent office areas have been vacated to swing space with the exception of the executive office

areas (they insist on not moving). It does not appear at this time that the additional abatement work will affect the construction completion date.

Section Manager: Harold Belcher, Project Management B
HAL; SIGMA familiarization; webinar on support of claims.

Chris Bahjet
Nothing significant to report.

Tim Hall
New Projects:
DCH Center for Forensic Psychiatry Miscellaneous Improvements – Conducted pre-bid meeting for on-site warehouse project; 14 bidders attended on the Monday snow day. A 2nd pre-bid opportunity was scheduled for 2/9 due to the weather conditions and several bidders not attending due to announcements of State Office closings.

MDOC Women's HVCF Prisoner Service Building – Conducted pre-construction kickoff and issued Notice to Proceed for B&B Construction to begin work on the project.

MDOC Women's HVCF Emergency Housing Jennings – Finalized quotes for MDOC direct purchase orders and transmitted to MDOC team. Participated in WHVCF Fire Alarm pre-construction meeting to facilitate coordination of that contract with MDOC construction needs in Jennings.
Potential Issues/Solutions:
MDOT Blue Water Bridge HVAC Replacement – Contractor continues to advance final actions to address start up challenges with the small toll/inspection booth systems and monitor. Several issues with existing electrical service sources have been identified that have contributed to challenges and those are being address as well. Evaluating design and construction cost to upgrade access tunnel systems omitted from original scope.

Bruce Hassen
Accomplishments:
MDOC Camp White Lake - The 70% review meeting for the demolition and restoration bid package was held 2/6.

DHHS Nokomis – Price proposals were received from the four ISID candidates who attended the site walk.

MDOC Air Permit Renewals – A progress meeting was held on 2/6 where MDOC's preferences on permit alternatives were clarified. Also, the professional was assigned an additional scope item where each incarceration facility with a central heating plant will get templates and instructions on how to renew their permits and submit the required annual forms to DEQ.

Chris Kulhanek
New Projects:
Camp Grayling SIRE Projects – DMVA has requested design contracts for two projects be expedited so they can be prepared to have a construction contract in place before the end of the fiscal year. A request for proposals was prepared and sent to three companies with ISID contracts to quicken the selection process.
Potential Issue/Solutions:
Forest Fire Experiment Station – Project needs to be complete by last week of February when DNR plans to move in. Little progress is being made and no progress on the phone system which is critical to moving in. Solution – DNR has agreed to release withheld liquidated damages to date with assurance from the contractor that the telecom sub will be paid along with other subs with outstanding billings and the deadline will be met.

Rashmi Patel

Accomplishments:

Marquette Correctional Facility (MBP) - VMS System - Advertised project for construction.

Egeler Correctional Facilities (RGC) - VMS system - Advertised project for construction.

Women's Huron Valley Correctional Facility – Fire Alarm System – Attended pre-construction meeting with contractor, PSC and MDOC to review project procedures, working conditions and scope of the work. MDOC has requested to install Building J fire alarm system first. Contractor has pulled building permits and is planning to start providing shop drawings. Contractor has scheduled walk-thru for all buildings next week and is planning to provide progress schedule by the end of next week.

Sadi Rayyan

Accomplishments:

DNR Lead Reclamation at Shooting Ranges – Reviewed and updated DB RFP for lead recovery at the Pontiac Lake & Sharonville Shooting Ranges. Prepared tentative implementation schedule for the agency's review.

DNR Otsego Township Dam – Discussed with agency potential issues with the dam and EPA's inclusion in implementing repairs.

DMVA Former Jackson Armory Site – Discussed with PSC the new owner's conditions for signing site access agreement. Informed the PSC that we only agree to remove the newly installed wells when the facility is closed or if required by DEQ to comply with the environmental regulations.

New Projects:

DEQ Wayland Recycling Site – Assigned to DLZ Michigan under their ISID contract to assess the possibility of vapor intrusion into the commercial/residential buildings on seven surrounding properties.

DEQ Stan's Trucking Landfill Site – Assigned to AMEC Engineering and Consulting of Michigan under their ISID contract to inspect existing methane extraction equipment quarterly for five years, sample methane monitoring points four times a year and provide technical support.

Non Project Related Activities:

2015 Environmental ISID Contracts – Reviewed and scored proposals.

Attended a meeting with the vendor DLZ.

Jud Sorensen

Accomplishments:

Proposals for Building Commissioning Services were reviewed by an Ad-Hoc Advisory Committee for award of Building Commissioning ISID Contracts. A total of twelve proposals were received of which five proposals were selected for contract award. The Committee has recommended that these five firms will be awarded four-year term contracts which will be available to provide professional building commissioning services for new building construction, building alterations and additions, various facility upgrades, and special maintenance projects whether minor, emergency and/or routine to validate and document that facilities and their systems are designed, installed, tested and capable of being operated and maintained to perform in conformity with owner expectations and anticipated energy efficiency.

John Spencer

Nothing significant to report.

Terry O'Brien:

Nothing significant to report.

Bruce Watkins

Accomplishments:

Roscommon Cold Storage Building – Building repairs are completed, still awaiting final plans and bid package from D&C for exterior grading work. Plan to hold pre-bid meeting in March for exterior grading.

New Projects:

Waterloo SGA – Building Heat – Held pre-proposal meeting with DNR and Design Build Contractor to outline budget and work required.

Construction Starts:

Pigeon River State Forest – Footbridge Repairs – Held pre-construction meeting. The contractor (Porath) and PSC (Wade Trim) are prepared to begin work immediately. Final in-river restoration work will need to wait until after the flood season to assure success.

Potential Issues/Solutions:

Highland RA – North-South Regional Trail Connector – Held a conference call meeting with the contractor, PSC (Nowak & Fraus), and the DNR-PRD Park Manager to outline tasks required to meet the consent letter published in December.

Proud Lake RA – Campground Water & Sewer – Phone meeting with PSC (Nowak & Fraus) and DNR staff to review the project final work and change orders for project closeout. Also, discussed testing of generator connection with park staff.

Bob Adams:

New Projects:

DNR Pioneer Trail Upgrades – Received revised ISID proposal from OHM to include additional trail length; received DNR approval and sent to Lansing for processing.

Design:

MDOC Alger CF Perimeter Security and Sally Port Improvements – Met with MDOC manager, facility personnel and professional for walk-thru and project scope development.

DNR Cusino Wildlife Research Station Pole Building – Received review comments from agency for completion of design-build bid documents.

DNR Union Bay BAS – Conduct 50% phase 500 review meeting.

MDOT Ironwood Welcome Center Re-Roof – Received draft copy of phase 100 50% review and provided comments to PSC for next week's meeting.

Bidding:

DNR Fayette Historic SP Snail Shell Harbor Improvements – Received awaited SHPO determination of no-adverse-effects which allowed the project to be advertised for bids.

DNR Straits SP Toilet Shower Building Replacement – Conducted mandatory pre-bid meeting at the site.

MDOC Marquette Above Ground Storage Tank Removal – Held pre-bid meeting.

DNR Union Bay Toilet Shower Building Replacement – Received and reviewed DB proposals with agency; then scheduled Best Value interviews with all bidders.

Construction:

DMVA Jacobetti Veterans Home – Processed a change order for re-roofing F-wing.

Projects Complete:

DNR Detour Harbor Renovation – Met with subcontractors regarding closeout items. Received pay request from contractor, forwarded to professional and contacted professional regarding processing. Professional also advised to submit a final pay request.

Scott DeKorte:

New Projects:

MDOC St. Louis / Central MI / Thumb / Cooper / Huron Valley Correctional Facilities – Held PPP/kickoff meetings at each facility to review the security, fencing and sallyport projects to be implemented at each location.

Construction Starts:

DCH State Lab Security Improvements – Conducted pre-construction meeting.

Joel Gordon:

Nothing significant to report.

Gerald Gregorski:

Nothing significant to report.

Jan Miller:

Accomplishments:

Flint State Office Building, Interior Renovations – Received a new updated overall schedule. Completion date has been moved up 3 months from Feb. 2016 to Nov. 2015.

Capital Area Reconfiguration Project – RFPs for Move Manager and Construction Manager have been posted on Buy4Michigan. Pre-proposal meetings will be held 2/23 and proposals due 3/5.

DNR Dodge #4 State Park & BAS Improvements – Held pre-bid meeting 2/13. Twenty (20) General Contractors attended. Bids are due 2/25.

Dave Sproul:
Accomplishments:
MDOC, Ionia Energy Project – Continuing to review and finalize the water and lighting energy improvement bid packages. We are working to release the bids beginning on 2/23. There will be separate walk-thru(s) for both the water and lighting improvements and bids will be due on 3/30.

State Police, SEOC – Attended our normal construction progress meeting and due to the extreme cold weather conditions, the exterior site work is behind schedule. The Daniels/Christman team will continue to monitor the progress and attempt to provide better progress in the spring.

DCH, Caro Center, Utility Service Backup Generator – Received multiple bids concerning the new campus wide electrical backup generator for the Caro Center. Our design professional is completing the required review and is recommending award to the low bidder. The bid of $1,804,000 is within our estimate and available funds. Actual construction should start by the end of March.

MDOC, Thumb Correctional Facility, Water & Sewer Improvements – Continuing to evaluate the booster pump requirements and C2AE is also communicating with the Fire Marshal's Office for their input concerning applicable code requirements for MDOC.

State Police, Metropolitan Detroit Forensic Lab – Met with the project team to discuss the intent of building out the remaining shell space. MSP has requested that we consider building out this space for general office type of environment. In addition, State Police is considering moving some Computer Crimes Unit staff into the existing Biology Laboratory space. White/Turner and SmithGroup will provide their estimate for services and construction for our consideration to move forward. Once the estimate is developed, State Police can provide their direction accordingly.
Potential Issues/Solutions:
MDOC, MR Power Plant, Replace DeAlkalizers and Water Softeners – The new softener tanks have not been performing as required. We held a special meeting to review the issues and the manufacture has been directed to provide recommendations to bring their equipment up to the specifications.

Steve Urban:
Accomplishments:
Mason Building Renovations – Programming progress meetings with DIFS, ORS and LARA are ongoing. DIFS and ORS block plans are close to finalization. LARA is split between basement, 1st floor and 5th floor which will cause operational inefficiencies.
New Projects:
Lake Superior Hosting Center 208V to 480V Upgrades at SOS Building – Met with LSHC management, EAI and BOD to discuss scope of work. EAI to provide cost proposal for their work. EAI will be utilizing Bergmann Assoc. for architectural services.

MDOC St. Louis, Roof Restorations – MDOC has requested that roof restoration work for all buildings be included in the scope of work. MDOC initially requested that minor maintenance repair work be provided on 2–3 buildings on the complex. This will require a significant change in the method of PSC selection. RFP will now have to be solicited.

Section Manager: Harold Belcher, Project Management B
HAL; Meeting with SIGMA committee; MDOC Video Management Meeting.

Chris Bahjet

Accomplishments:

DCH – Walter Reuther Hospital – Hosted a conference call among all concerned to insure the phone system change into the Cysco System will mesh into the new project at the Activity Building.

Projects Complete:

Cadillac Place – Exit/Entrance Study – Reviewed the final report which was found to be well detailed and complete.

Projects Start:

DNR – Relocation of the Grant House – Hosted the design kickoff meeting.

Tim Hall

New Projects:

DCH Center for Forensic Psychiatry Miscellaneous Improvements – Conducted pre-bid meeting for Parking Lot Improvement project; bids due 2/18. Conducted 50% phase 500 design review meeting for toilet/shower improvements; minor scope clarification and Agency to prioritize scope alternates to achieve budget.

DCH Center for Forensic Psychiatry On-site Warehouse – Conducted 2nd pre-bid meeting for project due to weather conditions on 2/9; 21 bidders attended between two pre-bid meetings.

DCH Center for Forensic Psychiatry Bar Screen – Conducted phone conference design review to clarify scope, budget and code considerations to finalize PSC recommendation to Agency for bidding.

MDOC Women's HVCF ADA Walks & Paving – Conducted 50% phase 500 design review meeting with MDOC/WHVCF staff; minor scope clarification and adjustments determined for final bid scope and tentative 95% final review set for 2 weeks.

Bruce Hassen

Accomplishments:

DHHS Nokomis – Submittals were evaluated for the four ISID professionals who were invited and submitted price proposals.

Projects Complete:

MSP UST Removals – Closeout change orders were processed for Adrian and Sandusky posts, returning unused funds to DTMB – VTS.

Chris Kulhanek

Projects Complete:

New Buffalo Weigh Station – Project complete and closed out on time and within budget.

Non-Project Related Activities:

Pre-con procedures committee met on 2/12 and put together a list of recommendations for pre-con meetings.

Rashmi Patel

Nothing significant to report.

Sadi Rayyan

Accomplishments:

DEQ The Pit Stop Site – Reviewed and recommended changes to the contract with AECOM to conduct groundwater sampling, evaluate contamination fate and transport, and prepare reports.

DEQ Broad & Bridge Site – Reviewed and recommended changes to the contract with ECT to provide technical support, repairs, system modification/enhancement, permitting and routine maintenance through December 2016.

New Projects:
MDOC Various Correctional Facilities – Received MOPs to provide maintenance/repairs of the water towers at the Jackson Complex and Marquette Branch Prison. Contacted the agency and requested proposals from Nelson Tank Engineering to prepare specifications under their ISID contract.
Non-Project Related Activities:
2015 Environmental ISID Contracts – Reviewed and scored proposals.

Met with DEQ, DTMB Purchasing and Pat Mullen to discuss assignments under the Geotechnical Environmental Drilling Services Contracts.

Attended "Beneficial Re-use of Non-Hazardous Industrial By-Products" Webinar.

Jud Sorensen

WR Ending February 20, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Met with BOD and RED to review comments on the revised Office Tenant Fitout Design and Construction Standards. RED asked to use the revised standard in an RFP being issued at the end of the month, along with New Building Design and Construction Standards. Completed both standards and assisted RED in incorporating these and related documents into the RFP. Held One on One meetings with most of the staff.

Bob Adams:

New Projects:

DNR Oman Creek BAS – Drafted ISID RFP Project Statement and forwarded it to DNR for review.

Design:

DNR Indian Lake SP Shoreline Restoration – Received DEQ permit and set up final review meeting with agency and professional in preparation to advertise for bids.

DNR Muskallonge SP Facilities Relocation – Addressed remaining project manual issues with the professional. Drawings were released for LARA plan review.

MDOT Ironwood Welcome Center Roof Replacement – Conducted phase 100 - 50% review meeting.

Bidding:

DNR Union Bay BAS – Conducted Design Build Best Value Interviews with all bidders and provided recommendation to DNR for approval with OHM Contracting, DNR agreed with the recommendation – this is for a site-built building.

Projects Complete:

DNR Detour Harbor Renovation – Met with professional regarding contractor's latest pay request and status of closeout issues, including schedule for submittal of professional's final payment.

DNR Sault Field Office ADA Upgrades – Conducted site visit prior to 1-year warranty expiration and assisted facility with unresolved key issue.

DMVA Ishpeming Armory Paving – Approve final close out package and forward to Lansing for processing.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

Nothing significant to report.

Gerald Gregorski:

New Projects:

MDOC Gus Harrison Perimeter Enhancements – Held the 50% design review meeting. Design activities are progressing toward a June 2015 start of construction target.

DNR Below Ground Sewer and Water Study at Eight Parks – Scheduled the pre-construction meeting for the Petoskey State Park lift station equipment installation for 2/26. Lift station equipment has been ordered previously under a separate contract with project completion planned to meet the summer camping season schedule. The 90% design review meeting for the Pontiac Lake Rec Area sewer and water improvements was held. The local municipality is mandating a slight change in work scope; they are requiring a change from a pressurized force main to a gravity drain line for sewer hookup. This will allow tie-ins from any future development along the route. The estimated additional cost for the larger line and open-cut installation can be covered under project funding.

MDOC Woodland Center CF Perimeter Fence Security System Upgrades – Held the PPP meeting. The agency is requesting a specific PSC through an ISID assignment and they also attended the meeting. The amount of funding provided in the MOP is totally insufficient for the original work scope of extending the non-lethal electric fence to the full perimeter. Instead the project will focus on resolving a prioritized list of perimeter security issues. These include preventing access to the building roofs and utility tunnel at multiple vulnerable locations.

Construction Starts:
DNR Harrietta State Fish Hatchery Liquid Oxygen and Supplemental Heat – Held the pre-construction kickoff meeting for the phase-2 heat pump installation. Equipment delivery is expected the last week of February. The gas unit heater for the tank room temporary/supplemental heat has been installed.

DMVA Grand Rapids Home for Veterans Chiller Replacement – Construction is progressing well. The new cooling towers have been installed; the old chiller has been removed and the new one set in place; all process pumps are installed; piping, controls, and electrical work continues. Need to coordinate new transformer installation with new generators project. Construction is still on schedule for April startup.

DMVA Grand Rapids Home for Veterans Backup Generators – Construction is proceeding on schedule. All preparation work is completed. The Automatic Transfer Switches are being delivered in February and the Generators are still set for mid-March delivery. Installation of the new powerhouse transfer switch is being coordinated with the chilled water plant upgrades project.

Jan Miller:
Accomplishments:
Flint State Office Building, Interior Renovations – Cost estimates for two and three lane turnstiles were received and forwarded on to Keith Paasch, Larry Scates and Jeff Pratt to review.
Potential Issues/Solutions:
DNR Ludington State Park Beach House Exhibits – Discussed bid results with DNR 2/17. Although only 1 bid was received for the Interpretive Exhibits, which was in budget, I recommended a contract be awarded. Since no bids were received for the Aquarium or the Topographic Map Exhibits, DNR will work with their Purchasing agent and to issue a P.O. for the work. I have offered to assist as needed.

DNR Maybury State Park Trail Improvements – Since all bids were over budget, a Post Bid Addendum (reducing scope), was issued to the 7 bidders.

Dave Sproul:
Nothing significant to report.

Steve Urban:
Accomplishments:
Mason Building Renovations – Programming progress meetings with DIFS, ORS and LARA are ongoing. Approved block plans of floor 6 and 7 for DIFS were forwarded to CMS so that they can pre-order doors, frames and VAV boxes. ORS block plans are close to finalization.
Construction Starts:
MDOC Saginaw Correctional Facility Fire Alarm Upgrades – Held construction kickoff meeting on 2/19.

Section Manager: Harold Belcher, Project Management B
One on one; meeting to discuss Grand Rapids Home for Veterans Home MIR project.

Chris Bahjet
Accomplishments:
DCH- Walter Reuther Hospital – Showers – Attended the progress meeting, updated/distributed the latest budget. Arranged for a conference with DCH and WRPH to review the latest budget. There is a potential shortage to manage potential future changes. There are four funding MOPS/WO and eight design/construction/testing elements that share this unified fund.

DNR – Selfridge BAS – Collaborated with the PSC to respond to the contractor on the issue of sidewalks and the need to comply with ADA.

DTMB – Grant House Relocation – Reviewed the Asbestos & Lead Report from 2009 to extract the relevant information related to the Grant House from the overall report which covered all State Fairgrounds.

New Projects:
DNR – Pointe Mouillee Pumps and Causeway Repairs- Hosted the pre-proposal meeting which was attended by three professionals. Toured the site and shared the as-builts with attendees.

Tim Hall
Accomplishments:
DCH Center for Forensic Psychiatry Miscellaneous Improvements – Received bids for Parking Lot Improvement project and began PSC evaluation, all bids within budget and recommendation for award expected next week.

DCH Center for Forensic Psychiatry On-site Warehouse – Received bids and began PSC evaluation, recommendation expected for next Ad Board as all bids were within budget.

DNR Wolf Lake Fish Hatchery Fishing & Viewing Access – Conducted design kickoff meeting with Abonmarche (PSC) and Wolf Lake staff.

Bruce Hassen
Nothing significant to report.

Chris Kulhanek

Rashmi Patel
Nothing significant to report.

Sadi Rayyan
Accomplishments:
DNR Lead Reclamation at Shooting Ranges – Met with agency to discuss design build RFP to implement lead recovery at the Pontiac Lake & Sharonville Shooting Ranges. Finalized RFP for posting on Buy4Michigan.
Construction Starts:
DEQ McLeieer Oil Site – Field activities for contaminated soil excavation and site restoration begin 2/5/15 with substantial completion by 5/16/15.
Non-Project Related Activities:
2015 Environmental ISID Contracts – Reviewed and scored proposals. Chaired meeting by the evaluation committee to select firms for awards. The committee selects 41 firms for awards.

Jud Sorensen
Projects Complete:
A closeout meeting was held with DTMB Operations, DTMB Records Management, the General Contractor (SDVGC) and the Professional (PSI, Inc.) associated with roof replacement for the DTMB Records Building Loading Dock. The Contractor is in the process of submitting closeout documents to the Professional along with his final payment request.
Potential Issues/Solutions:
I met with DTMB Operations to look at water leaks and ice buildup within the upper level of the Allegan Parking Ramp near the southeast corner of the Williams Building and am currently reviewing previous ramp and expansion joint repairs within this area. Several attempts have been made to seal these leaks with little success. I will be meeting with the Facility Supervisor to look at possible options including the addition of a heated trough below the leak area to collect and channel water away from the center drive.

A meeting was held to review the study and preliminary design for elevator upgrades, lighting occupancy sensors and insulation of exterior walls at Geagley Laboratory. Due to estimated costs and a limited budget, the work scope is being modified to reduce and possibly eliminate the proposed lighting occupancy sensors and to add design and construction administration services for exterior wall insulation which had initially been included as a study only.

John Spencer
Nothing significant to report.

Terry O'Brien
Nothing significant to report.

Bruce Watkins
Accomplishments:
Shiawassee SGA – Water Level Control Structure – Processed final contract change orders and modifications for L.J. Construction and Williams & Works.
New Projects:
Cass City Field Office – Cold Storage Building – Scheduled predesign meeting with DNR and Mayotte Group Architects.

Waterloo SGA – Building Heating – Set up meeting with Design Build Contractor (Allied) to review the project and prepare proposals.

WR Ending March 27, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Completed draft RFP for the 2015 round of General A/E ISID contracts; Contracts Section advertised. Began updates to DCD Procedures Manual. Entered contracts and payments into HAL for pre-2014 running, UP projects.

Bob Adams:

New Projects:

MSP Calumet Post Roof Replacement – Assisted MSP Physical Plant with project estimate to initiate the Work Order process.

Design:

MDOC Hiawatha Correctional Facility (CF) Fire Alarm System Upgrades – Participated in 50% Phase 500 design review meeting.

DNR Oman Creek Boating Access Site (BAS) – Issued PSC ISID RFP Addendum #3.

DNR Union Bay BAS – Conducted 90% review meeting.

Bidding:

MDOC Hiawatha CF Video Management and Perimeter Surveillance Enhancements – Participated in pre-bid meeting and walk-through. Assisted with review of addendum.

DNR Muskallonge State Park (SP) Headquarters Relocation Phase 1 - Participated in pre-bid meeting and walk-through.

DNR Fayette Historic SP Furnace Corner Repairs – Participated in meeting to address issue of timber corner preservation or replacement and historic concerns.

DNR Indian Lake SP Shoreline Restoration – Worked through bidder questions with PSC and agency for issuance of pre-bid addendum.

Construction:

MDOC Alger CF Roof Restoration – Participated in pre-construction meeting.

MDOC Alger CF Video Management and Perimeter Surveillance Enhancements – Participated in progress meeting.

MSP Negaunee Post Roof and Ventilation Upgrades – Process CCO #4 for additional architectural and mechanical modifications and coordinate work with agency and contractor.

MDOC Baraga Max Video Management – Progress Meeting. CCO #4 is on Ad Board Agenda for 3/31 approval.

Projects Complete:

DNR Craig Lake SP, 3 Bridges – Notified PSC to submit Contract Modification to balance unused hours and close out project.

DNR Stateline Rail Trail Bridges #20, 21, 27 - Notified PSC to submit Contract Modification to balance unused hours and close out project.

Potential Issues/Solutions:

Worked with DIT for 5 hours to install Citrix/HAL on office computer – Final installation successful.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

Nothing significant to report.

Gerald Gregorski:

New Projects:

DNR Petoskey SP Trail Development – The Critical Dunes Permit application was approved and a design/ planning meeting for the first phase of trail construction was held. Funding for the first phase of trail construction, from the campground road intersection to the beach day use area, is being released to the project by DNR.

DTMB Energy Star Certification of DTMB Owned Buildings – The professional firm Matrix Engineers completed the first audit at the Cass Building. The application and data have been submitted to Energy Star for certification approval. BOD is setting up the next audit visits at the Lottery Building and Constitution Hall.

MDOC Pugsley CF Waste Water Treatment Plant Engineering Study – The on-site Project Planning and Partnering Meeting was set up for 4/6.

Construction Starts:

DMVA Grand Rapids Home for Veterans Chiller Replacement – The new cooling towers and condenser water systems were filled and started up successfully. The new chilled water system is scheduled to start up the week of 3/30 using the free-cooling heat exchanger until outside temperatures allow startup of the first chiller and factory rep startup and checkout of the new chiller.

DMVA Grand Rapids Home for Veterans Backup Generators – The generators' delivery and setting is currently scheduled for the week of 3/30. The automatic transfer switches are on site; however, they were supplied as top feed units when the specifications called for bottom feed. The contractor and PSC are working with the switch supplier to either replace the units or determine an acceptable modification.

DTMB Grand Tower AHU Replacement – System changes to accommodate the lower than expected LBWL supply pressure are underway. The LBWL control valve was moved from the supply to return lines during a weekend shutdown. A bulletin pricing request was issued for adding booster pumps between the LBWL supply and internal building loop. The alternate for installing a heat exchanger to isolate the building loop from the LBWL loop was not pursued. Engineering analysis showed that this solution would reduce the systems cooling capacity significantly.

MDOC Personal Emergency Location Systems at Eight Locations – SenStar provided firmware and software updates to correct problems with personal transmitter communications and identification that were uncovered during the course of the 30-day system trial at Egeler. The contractor will be uploading these updates. Construction has started at the old Hiawatha facility to meet the planned re-commissioning and switch from Kinross in October 2015.

Projects Complete:

DTMB Traverse City State Office Building (SOB) Renovate Ground Floor Restrooms – The final close out and inspection meeting was held on site. All work has been satisfactorily completed and the contractor's final payment application was submitted.

Jan Miller:

Accomplishments:

Capital Outlay – Facilitated University and Community College Capital Outlay Projects Status Meeting held 3/25. This activity is one of my performance objectives.

Potential Issues/Solutions:

Flint State Office Building, Interior Renovations – Agency has requested adding solar panels and ice storage to the project scope. Met with WTA and Agency 3/26 to discuss details prior to issuing a Bulletin. Jamie Phillippo is replacing Mary Kay Hawes as move manager and Cassandra Kimmerer is replacing Katie Sundberg as designer at DBI. Held coordination meeting with them and the agencies 3/27 to assure a smooth transition.

Dave Sproul:

Annual leave.

Steve Urban:
New Projects:
DTMB OPS Center Parking Lot Repairs – Developing scope of work with BOD for parking lot repair work located at the OPS Center. Due to the urgency of completing parking lot repairs by 6/1, a Construction ISID contact will be utilized. I will have the ISID contractor solicit bids from 3-5 paving contractors.

DNR Shiawassee River State Game Area Bridge – PSC contract modification was approved which will allow the PSC to begin the re-design work of a vehicular bridge at the game area. The design criteria is to be modified to accommodate lighter bridge loading thus reducing construction costs. Initial design was based upon a very heavy vehicular load design criteria.

LARA Commission for the Blind Food Concessions Facility, Mason Building – Funding for the design and construction of a new food concessions facility at the Mason Building has been approved by LARA. A signed MOP has been issued. CSM will be assigned to do the design and construction of the facility.
Projects Complete:
DHS Maxey Training School New Pre-engineered Maintenance Building – DHS has placed this project on hold due to the likelihood that the Training School may be closed due to budget issues. PSC is 95% complete with the construction bid documents. I have instructed the PSC (Landmark Design) to incorporate my owner comments and shelve the project for now.
Potential Issues/Solutions:
DTMB Mason Building Renovations – DIFS, ORS and LARA have signed off on block plans and furniture plans. ORS's need for a large conference room is yet to be resolved. This will be handled through Jim Clark and possibly DTMB Director's level. Move schedules have been accepted by the agencies involved.

Section Manager: Harold Belcher, Project Management B
Shiawassee State Game Area Siphon Tube Meeting; HAL, meeting with Doug Sharp.

Chris Bahjet
Accomplishments:
DMVA – Detroit Light Guard Phase 4 - Conferred with project team to issue the latest structural steel change order and agreed on ways to minimize the cost's impact.
Non-Project Related Activities:
Participated in the SBA projects status meeting in Dimondale.

Tim Hall
Accomplishments:
MDOT Blue Water Bridge HVAC Replacement – Conducted meeting with contractor to review closeout requirements/progress and evaluate solutions implemented and tested for toll booth systems. Also, reviewed implementation plans for corrections to existing power services to north booths and the upcoming tunnel upgrades scheduled for approval next week.

MDOT Southwest Region Laboratory – Participated in bi-weekly progress meeting and site review. Demolition is essentially complete and new construction is progressing well. Project team reviewed and resolved several potential issues in advance and is performing well together.
New Projects:
DMVA Jackson Armory Maintenance Bay Addition – Conducted PPP meeting with DMVA and held conference call with potential PSC to review scope and expectations for proposal preparation.

Bruce Hassen
Nothing significant to report.

Chris Kulhanek
Accomplishments:
MLHC – Automation Upgrade – Rebates offered from the Lansing BWL for the new controls system and mechanical equipment were credited to the contract. The State received over $17,000 in rebates.

Projects Complete:
Camp Grayling - CACTF – Project is complete and closed out under budget. The project has been a showcase for DMVA for urban training facilities.

Rashmi Patel
Accomplishments:
Cooper Street, Ionia, MTU, Carson City and St. Louis Correctional Facilities - Phase II VMS - Mandatory walk-through meeting was held at each site to replace interior cameras.

Hiawatha Correctional Facility – VMS System - Received bids from construction contractors.

Ionia Correctional Facility – Roof Replacement - Progress meeting was held with contractor on buildings 200 and 300 roof replacement. Construction was stopped and re-scheduled due to the winter weather condition.

Sadi Rayyan
Accomplishments:
DMVA Owosso Armory Site – The site was added to the State Sites Cleanup Program. Requested from DEQ to transfer $35K from the former Jackson Armory Site to this site to identify and eliminate any threat of fire/explosion or direct contact hazards.

DNR Lead Reclamation at Shooting Ranges – No bids received for this design build RFP. Contacted the potential bidders to find out their concerns/reasons that discouraged them from submitting bids. Two contractors indicated that their resources were currently allocated to other projects for most of year 2015 and they could not commit to this project's schedule. Will discuss with the agency our options to proceed with the project.

DEQ Kavco Landfill Site – Reviewed and recommended changes to the contract with EnviroSolutions to provide operation and maintenace services of the landfill gas management system for three years.
New Projects:
DEQ Various Sites – Assigned to Mannik & Smith under their Expanded Triage ISID contract to screen, investigate and assess the current risks at 32 LUST sites.

MDOC Various Correctional Facilities – Assigned to Nelson Tank Engineering under their ISID contract to prepare specifications for maintenance/repairs of the water towers at the Jackson Complex and Marquette Branch Prison.
Construction Starts:
DEQ Thomas White Property Site – Field activities for contaminated soil excavation and site restoration begin 3/23 with substantial completion expected by 7/21.
Projects Complete:
DEQ Nolichucky Site – Construction activities for remediation services completed under budget. Decreased the contract amount ~$126K and closed out the construction contract with EVR.

DEQ Flint Odyssey House Site – Construction activities for UST decommissioning completed under budget. Decreased the contract amount ~$23K and closed out the construction contract with TSP Construction.

DEQ Former DME Facility Site – Construction activities for hazardous soil excavation completed under budget. Decreased the contract amount ~$252K and closed out the construction contract with Mackenzie.

DEQ Former Northern Oil Site – Construction activities for soil excavation and site restoration completed under budget. Decreased the contract amount ~$37K and closed out the construction contract with EQ The Environmental Quality Company.

DEQ Taber's Oil Company Site – Construction activities for UST decommissioning completed under budget. Decreased the contract amount ~$16K and closed out the construction contract with TSP Construction.

DEQ D&L Fuels Site – Construction activities for soil excavation and site restoration completed under budget. Decreased the contract amount ~$22K and closed out the construction contract with Mackenzie.
Non-Project Related Activities:
2015 Env. Remediation ISID Contracts – 22+ contracts have been executed and ready for assignments. Debriefed EnviroSolutions and GEI Consultants on the results of the selection.

Jud Sorensen
Nothing significant to report.

John Spencer
Accomplishments:
SBA - SVSU delivered.

SBA - Macomb CC and Jackson College field work and CAD.
Potential Projects:
Estimated and delivered time and cost to DNR for rail to trail project adjoining past Gaylord Railroad project.

Terry O'Brien
Accomplishments:
Nothing significant to report.

Bruce Watkins
Accomplishments:
Shiawassee State Game Area – Water Level Control Structure – Made final payment recommendations to DNR for the contractor and PSC to allow for closure of the Federal Grant. The Grant spanned 5 years of work with three separate projects with a designed and constructed value of $960,000.
New Projects:
Roscommon Customer Service Center – Cold Storage Building – Exterior Re-grading – Held re-bid meeting for re-grading the exterior of the building to eliminate water problems. Plans & specifications were prepared by DCD for this work. Three good contractors were present for the pre-bid meeting.

Sharonville Culvert Replacement – Received cost proposal from Design Build Contractor (Laux Construction/DLZ). The cost proposed was double the budget. A follow-up meeting is scheduled to discuss with the owner if the culvert truly needs to meet HL93 modified loading (the cost of this is likely due to the statement that logging trucks will use this route, which makes this a highway class culvert). With the cost out now, it may be good to discuss more realistic loading.
Potential Issues/Solutions:
Harrisville SP – Toilet/Shower Building – Ripman Construction will be on site to repair the sagging roof next week.

Shiawassee State Game Area – Siphon Tube Repairs – Held meeting with Spicer Group to discuss possible repair solutions and for them to state their position. They will provide options for repairs or replacement of the failed siphon tube liner by the end of April. A meeting has been scheduled with DNR to bring them up to speed on the status of our activities to resolve this problem.

Section Manager: Dennis Stamm, Project Supervision
Nothing significant to report.

Section Manager: Pat Mullen, Contract Services
Nothing significant to report.

The Cardno/ATC contract is for industrial hygiene testing/sampling at DTMB owned/managed facilities. Other agencies can use ATC for requested services, ATC will bill the requesting agency directly for provided services. Cardno/ATC provides sampling analysis, asbestos management, and environmental sampling/investigation. Environmental services include indoor air quality investigations/sampling, mold investigations/sampling, lead inspection/sampling, and general industrial hygiene investigations/sampling. Requests for services in DTMB facilities should come through the Zone Facility Supervisor/Building Trades Supervisor who will then contact me. In my absence or emergency situation, the Zone Facility Supervisor/Building Trades Supervisor should contact Cardno/ATC directly for services. The contact information is:

Cardno/ATC
46555 Humboldt Drive, Suite 100
Novi, MI 48377
P 248-669-5140
F 248-669-5147

Contact personnel at Cardno/ATC:
Robert Smith, tele: 248-669-5140 ext. 127, [redacted], email: robert.smith@cardno.com

The Trust Thermal Abatement contract is for the abatement of identified asbestos containing materials in DTMB owned/managed facilities (Northern Region, Central Region, Southwest Region) . Refer to attached Attachment C Building Location Sheets. Other agencies can use Trust Thermal Abatement for requested services. Trust Thermal Abatement will bill the requesting agency directly for provided services. Trust Thermal Abatement provides abatement of floor tiles, pipe insulation, and ceiling tiles. The DMC Consultants contract is for the abatement of identified asbestos containing materials in DTMB owned/managed facilities (Capitol Complex, Secondary Complex, North Complex, Metro Region). Refer to attached Attachment C Building Location Sheets. Other agencies can use DMC Consultants for requested services. DMC Consultants will bill the requesting agency directly for provided services. DMC Consultants provides abatement of floor tiles, pipe insulation, ceiling tiles. Requests for services in DTMB facilities should come through the Zone Facility Supervisor/Building Trades Supervisor who will then contact me. In my absence or emergency situation, the Zone Facility Supervisor/Building Trades Supervisor should contact Trust Thermal Abatement or DMC Consultants (depending on facility location) directly for services (email me location, proposal and scope). All jobs should have a cost proposal submitted before any work is approved/begins. **These two contracts are not to be used for the abatement of lead or mold.** The contact information is:

Trust Thermal Abatement
210 S. Water Street
Owosso, MI 48867

WR Ending April 10, 2015
All staff attended two days of meeting/training.

Section Manager: Irene Henry, Project Management Section 'A'
Working with the State Land Bank to develop RFP documents for tax-reverted property demolition in Hamtramck, Highland Park, Inkster, and Pontiac.

Bob Adams:
Design:
MDOC Hiawatha CF Perimeter Fence Security System Replacement – Conducted 50% phase 500 design review.
Bidding:
MDOC Hiawatha CF Fire Alarm System Upgrades – Participated in pre-bid conference.

DNR Muskallonge Lake SP New Headquarters Facility Phase 1 – Bids were received and the recommended Best Value bid is within the available budget.

MDOC Camp Baraga Demolition – Conducted pre-bid walk-through.

Scott DeKorte:
New Projects:
Thumb CF Security Upgrades – Conducted pre-bid walk-through meeting.
Project Closeout:
Lakeland CF Fire Alarm Upgrade – Conducted substantial completion meeting.

Joel Gordon:
New Projects:
DNR Marquette Fish Hatchery Raceway End Closures – The design team conducted the 90% design review meeting on 4/23. The project is scheduled to be issued for bids 5/11.

DNR Thompson Fish Hatchery Raceway End Closures – The design team conducted the 90% design review meeting on 4/23. The project is scheduled to be issued for bids on 5/11.

Gerald Gregorski:
New Projects:
DNR Lincoln Hills Bridge Engineering Design for Replacement or Rehabilitation – Held the PPP meeting at the bridge site. DNR requested an ISID assignment due to the relatively small scope of work and the specialized nature of the required PSC services. They suggested firms with extensive experience on DNR trails and that have offices in the general geographical area.

DNR Petoskey SP Trail Development – The Threatened and Endangered Species permit application was submitted to the DNR Wildlife Division by the PSC. It primarily presents plans for dealing with the pitchers thistle identified in the area. The 70% design review meeting was also held with phase-1a construction targeted for Fall-2015.

MDOC Woodland Center Correctional Facility - Perimeter Fence Security System Upgrades – After the 50% design review meeting, MDOC expanded the scope of the project and requested accelerating the bid schedule to meet target dates required to receive additional funding for the increased scope of work. The bid advertisement was posted with the bid due date moved up to 5/13.

MDOC Gus Harrison Perimeter Enhancements – The pre-bid meeting was attended by several fencing contractors. A pre-bid addendum was posted a few days later addressing the bidder's submitted questions and adding work scope requested by MDOC for replacing the exterior perimeter fence shaker sensing system which was identified during the pre-bid walk-through. Bids are still due 4/29.

Construction Starts:
DNR Below Ground Sewer and Water Study at Eight Parks – The county drain commission completed installation of a new sanitary sewer lift station at the WJ Hayes SP Dump Station. The State's contractor is now proceeding with rebuild of the dump station and tie-in to the new lift station. The existing paving of the dump station access road was found to be in very poor condition because of the very thin asphalt layer originally applied. The contractor provided pricing to replace the entire road paving. The cost was reasonable and funds are available in the project budget so a change order will be issued to have this work completed before camping season.

DTMB Grand Tower AHU Replacement – Laux Construction submitted a cost quote to provide booster pumps on the chilled water supply to increase system pressure. This includes an expansion of the mechanical room to house the pumps. The delivery of the selected pumps will coordinate with the completion time extension to mid-summer already approved for the energy recovery unit pre-heat addition. Work is proceeding well with AHU replacement on floors 13 through15 nearly complete with work on the final floors 7 through 9 starting soon. The first design meeting was held for the projects phase-2 for replacing the VAV boxes, perimeter heat system, and controls.

Jan Miller:
Accomplishments:
Capital Area Reconfiguration Project – Facilitated a tour of the MSP Headquarters Building (333 Grand) with DHHS and Hobbs + Black on 4/24.

DNR Silver Lake SP Day Use & BAS Improvements – Held pre-bid meeting at the site on 4/20. Seven general contractors attended. Bids are due 5/6.

Dave Sproul:
Accomplishments:
MDOC Ionia Energy Project – ESG received five construction proposals for the electrical scope and is currently evaluating the proposals for their award recommendation. We are continuing to review the heating/energy conservation design, specifically the construction details for the new MTU heating plant building. Soil borings are indicating that the proposed location may not be the best location due to poor soil conditions. We will continue to evaluate this building design. We are also investigating the extent and cost associated with the required asbestos abatement to support the overall project. A majority of the known asbestos is located within MTU and the Reformatory Power Plant.

Capital Area Reconfiguration Project, State Police – PARTNERS In Architecture has developed the proposed block space plans for the entire GOB and provided them to MSP for their review/comment and acceptance. We are scheduled to meet with State Police on 5/1 to obtain acceptance and approval.

Jackson College, Bert Walker Hall Renovations – Completed review and transmitted my approval of the Jackson College 90% construction bid documents. Jackson College will be proceeding with the bidding process and construction proposals will be due the end of April.

DCH, Caro Center, Utility Service Backup Generator – Conducted the pre-construction meeting and the contractor is submitting his schedule of values, project schedule, and initiating shop drawings to our design professional. The project is set to be completed within nine months.
Potential Issues/Solutions:
State Police, SEOC – Results of the air sampling and additional bulk material samples have indicated that there is no asbestos materials found in the SEOC work area. Separate reports are on file documenting these findings and copies are being transmitted to our contractor for their files and records. We will continue to investigate and monitor the continuing construction area to maintain a safe working environment.

Attended an all-day Construction Owners Association of America spring workshop concerning project collaboration, Michigan's economic outlook, and payment auditing practices.

Steve Urban:
Accomplishments:
DTMB OPS Center Parking Lot Repairs – Bids received for parking lot repairs. There were a total of 4 bidders. Apparent low bid was within the project budget of $70,000.
New Projects:
DTMB Austin Building, Traverse Bay Hosting Center Study – Held kick-off meeting with IT management and project professional EAI to clarify project scope. The first phase of this project (phase 100) will look at options and costs to provide a new dedicated generator for TBHC, new 650W UPS system, and new power distribution units. These upgrades will support NGDI (Next Generation Digital Information) technology that may be required to be on line in the next 2-5 years.
Construction Starts:
MDOC Saginaw, Roof Restorations – Held construction kick-off meeting with contractor, design professional and MDOC staff. Due to an early set-in of winter weather last fall, construction that was scheduled to start up last fall never occurred. Roof work is now under way.
Potential Issues/Solutions:
DTMB Austin Building, Treasury Executive Area Renovations – Additional office areas will require that abatement take place to remove old carpet mastic that was tested positive for asbestos. This area was previously abated several years back when the area was re-carpeted; however, new test results came back mixed so the entire area must be treated as containing asbestos mastic. The abatement process with associated tenant relocations will be handled separate from this renovation project.

Section Manager: Harold Belcher, Project Management B
DCD Spring Training; HAL (2013 push); DEQ Wastewater Webinar.

Chris Bahjet
Accomplishments:
DNR – Grant House Relocation – Met with SME, DNR and my section manager to clarify project scope and establish DNR's priorities. DNR asked to hold off on any more design work until the MOU is established between the DNR and the Detroit Edison School to insure the school's agreement to move the house into their property.

DTMB – DTMB – Sidewalks Phase 2 – Completed negotiating with the general contractor and the PSC on the terms and conditions to add the snow melt equipment. The work is planned to start and complete this summer.

Tim Hall
Accomplishments:
MDOC Women's HVCF Utility Tunnel Upgrades – Bids were received and within budget, PSC conducted evaluations and justification prepared for Ad Board to expedite this important project for WHVCF.
Potential Issues/Solutions:
MDOT Blue Water Bridge HVAC Replacement – Conducted meeting with contractor to review closeout requirements/progress. Commissioning and adjustments with BWB staff now have most everything running effectively. Implementation of electrical upgrades to north booths is complete and the tunnel HVAC upgrades are in progress toward as-planned completion.

Bruce Hassen
Accomplishments:
A bid walk-through was held at Camp Baraga, an abandoned level 1 detention facility near L'Anse. This is a demolition and restoration project. It was well attended.

Chris Kulhanek
Non-Project Related Activities:
Met with contracts group to discuss SIGMA.

Rashmi Patel

Accomplishments:

Ionia, MTU, St. Louis Correctional Facilities - PSC reviewed bulletin and provided recommendation letter.

Cooper Street, Ionia, MTU, Carson City and St. Louis Correctional Facilities, Phase II Video Management Systems - Received bids and PSC recommendation. Submitted to next ad board for approval. MDOC will revise MOP to fund all work included in contract.

Marquette Correctional Facility - Video Management Systems - Received bond, insurance and section 500 documents for contract. Pre-construction meeting is scheduled next week at the site.

Sadi Rayyan

Accomplishments:

DEQ Alcott St. Dam Removal Portage Creek – Met with agency and PSC to discuss design bid specifications and develop a cost effective path forward for dam removal.

MDOC Various Correctional Facilities – Received 3 bids for paint/repairs of water tower at Marquette Branch Prison and 7 bids for paint/repairs of water tower at Jackson Complex Facility.

Former Flint State Police Post Site – An enhanced vacuum extraction pilot test was conducted to evaluate the technology for remediating the contamination at the site. Discussed with the PSC adjusting the test procedure for better results.

Non-Project Related Activities:

Attended "Hazardous Waste Operations (HAZWOPER) 8-Hour Refresher" training.

Attended "Wastewater Treatment Technology" Webinar.

Met with DEQ and DTMB procurement to discuss contract for hazardous wastes.

Jud Sorensen

Accomplishments:

On 4/21, Dan Morgan and I provided a presentation on roof fall protection at the MDOC Physical Plant Division Conference held at Kettunen Center in Tustin Michigan. The MDOC is currently commencing projects at a number of their correctional facilities to complete roof replacements and repairs. As a part of these projects, MDOC is looking at how fall protection can be incorporated into the roof replacement work scope. Unfortunately, MDOC already has more roof repair and replacement issues than they have funds to address. In further conversation with MDOC Physical Plant staff, they are looking to DTMB and DTMB's fall protection program to see how fall protection can be incorporated in high roof maintenance and traffic areas and how other control measures may be instituted (administrative controls), where funding is not currently available to incorporate guardrail or fall arrest/restraint systems.

Potential Issues/Solutions:

DTMB Operations has requested, if possible, that the professional services contract and construction contract for the Pine Street pedestrian bridge repairs be modified to address deterioration of a number of columns in the Hall of Justice west parking structure. A meeting was held at the Hall of Justice with Steve Doty, the DTMB Operations Facility Supervisor, Don Heck with Wolverine Engineering and Surveying and Casey Collings with Great Lakes Engineering Group on 4/20 to look at the extent of deterioration. Wolverine Engineering and Surveying in conjunction with Great Lakes Engineering Group is now preparing a proposal in the form of a contract modification request to further investigate and provide engineering recommendations for column repairs.

John Spencer

Accomplishments:

MDOC - Completed CAD and square footage of new area ties at HVCF, Dennis requested additional information to be completed, Matt will assist Dennis with this next week..

SBA - Muskegon CC & Southwestern College - Delivered survey and legal descriptions.

Non-Project Related Activities:
PIMS completed for survey charges through this pay period.

John Spencer wishes you all well and sends a Big Thank You to FBSA for all the fond memories and the Tuesday send off as this is the last weekly report he will do as he heads into an enjoyable retirement.

Terry O'Brien
Accomplishments:
SESC authorization DNR Indian Lake State Park.

DNR Dodge #4 State Park - MDEQ NPDES storm water permit applied for.

Bruce Watkins
Nothing significant to report.

Section Manager: Dennis Stamm, Project Supervision
Nothing significant to report.

Section Manager: Pat Mullen, Contract Services
Nothing significant to report.

WR Ending May 1, 2015
Section Manager: Irene Henry, Project Management Section 'A'
Completed and posted the environmental engineering RFP and the contractor RFP for Land Bank Demolitions.

Bob Adams:
New Projects:
MSP Calumet Post – Received MOP and ISID approval. Issued project statement to OHM.
Design:
MDOC Hiawatha Perimeter Security – Conducted 90% phase 500 review.

MDOT Ironwood Welcome Center Roof Replacement – Conducted 90% phase 500 review meeting.
Bidding:
Escanaba River Bridge – Posted project on Buy4Michigan.
Construction:
MDOC Newberry – Conducted pre-construction meeting for boiler abatement.

DMVA Jacobetti Veterans Home - Conducted kick-off meeting for F wing roof.
Projects Complete:
MSP Negaunee Roof – Contractor completed work and demobilized.

DMVA Ishpeming Armory Paving – Met with agency and contractor regarding completion of minor site work warranty items.

Scott DeKorte:
New Projects:
Holland SP Channel Accessibility and Amenities – Conducted pre-construction meeting.

Joel Gordon:
New Projects:
DNR Wilderness SP Phase 2 Lakeshore Campground Redevelopment – The project pre-bid meeting was conducted on site on 4/27. The meeting was well attended. Bids are due 5/6.

DNR Warren Dunes SP Day Use Area Redevelopment – The project team conducted the 50% phase 400 design review meeting on 4/30.

Gerald Gregorski:
New Projects:
MDOC Gus Harrison Perimeter Enhancements – Received three bids. Additional funding is being added to cover the costs as they came in higher than originally anticipated due to scope increases requested by MDOC during design.

DMVA/Grand Rapids Home for Veterans Kitchen Exhaust Replacement – Tower-Pinkster submitted their phase 100 study report on the kitchen exhaust system. They provided a recommended scope of work with a budget estimate of $180k.

DTMB Energy Star Certification of DTMB Owned Buildings – Matrix Engineers has completed site investigations at Jackson, Saginaw, Flint, Lottery, and Constitution Hall.
Construction Starts:
DNR Below Ground Sewer and Water Study at Eight Parks – Mitchell SP storm sewer work is proceeding well. The next project meeting on 5/15 will be the substantial completion. Work on the Hayes SP sewer and water system is also proceeding on schedule. A change order was approved to repave the access road to the rebuilt sanitary dump station due to its poor condition and substandard original thickness. The next project meeting on 5/13 will be the substantial completion. The construction contract for the Pontiac Lake RA water system renovation was approved on the Ad Board with work starting in October.

DMVA Grand Rapids Home for Veterans – Networked Door Access Control and Video Surveillance System – A contract change order was approved for Parkway Electric which extends the completion date to 7/8. This is due to changes in the patient wandering system required to correct operational concerns identified by the nursing staff during pre-construction review. The video surveillance and door access control systems are proceeding according to the original schedule.

DTMB Grand Tower AHU Replacement – New AHUs on floors 13 through15 were started up. Work on the final floors 7 through 9 will be starting 5/4 with work being done on the night shift to avoid interference with tenant operations on the 7th floor. The crane lift for the old cooling tower removal from and energy recovery unit placement on the roof is still scheduled for 6/20, a Saturday, so the building can be vacated. Early budget quotes from the phase-2 design meeting estimate a cost of $2.5M for replacement of the perimeter heat, VAV boxes, and VAV controls.

Jan Miller:
Nothing significant to report.

Dave Sproul:
Accomplishments:
MDOC Ionia Energy Project – Met to review with ESG their cost estimate for the heating/energy conservation measures throughout the complex. ESG's cost evaluation has them concerned the proposed construction bids may be above the construction budget of their design/build energy performance project. We instructed ESG that they will need to incorporate all required measures as required and we will work with them to provide any value engineering items to keep costs within their budget.

Capital Area Reconfiguration (State Police) – Met with State Police leadership to review and discuss the proposed block plans for the entire GOB. PARTNERS In Architecture will assemble some minor changes and issue the revised block space plans for State Police approval. The overall block plan was found to be acceptable.

DCH Hawthorn Center Various Maintenance Project & Outdoor Sports Fields – Met to review the construction progress. The various maintenance project is on track to be completed by mid-May and we are waiting for favorable weather to complete the new basketball court and playground area fence.

State Police SEOC – Met to review in more detail the IT requirements, network, and server room and telecommunications for the SEOC. This meeting was attended by DTMB IT Staff, MSP, our design professional, and user agencies. The purpose of the meeting was to discuss and confirm the detailed IT needs for both State Police and MPSCS groups.
Potential Issues/Solutions:
MDOC, DeAlkalizer and Water Softener System Replacement – Met for our regularly scheduled construction progress meeting and the contractor is struggling to complete all the required installation. The new salt brine tank requires steam cleaning and additional filter gravel to provide a complete system. We continue to monitor the progress and the new water softeners are installed and operating.

Steve Urban:
Nothing significant to report.

Section Manager: Harold Belcher, Project Management B
HAL; DCD financial meeting.

Chris Bahjet
Accomplishments:
DNR – Pointe Mouillee – Pump Replacement & Causeway Repairs - Held the design kick-off meeting and toured the site. Aim is to accelerate the design basics in order to get cost estimates for DNR.

MSP – Livonia – Re-roofing of Facility - Held the pre-bid meeting, collected questions and answers and issued an addendum. Since the number of existing roofing layers was not known, one of the roofers

volunteered and cored and then sealed holes at several locations to find out. This will help in eliminating uncertainties regarding demolition volume.

Tim Hall

Accomplishments:

DCH Center for Forensic Psychiatry Parking Improvements – Conducted pre-construction meeting and issued notice to proceed to Belden USA to begin project; mobilization not expected for several weeks.

DCH Center for Forensic Psychiatry Warehouse Addition – Conducted pre-construction meeting and issued notice to proceed to Antler to begin project; mobilization expected next week.

MDOC Women's HVCF ADA Walks & Paving II – Contract awarded, distributed and preconstruction meeting scheduled for next week to expedite construction start for this crucial project for WHVCF.

New Projects:

DMVA Fort Custer Vehicle Storage Addition CST - Received MOP funding construction for this project which had been designed and pending for several months; notified C2AE to release final bid document preparation for posting to Buy4Michigan next week.

Bruce Hassen

Accomplishments:

The underground storage tank and gasoline dispensing system at the Dept. of Corrections Special Alternative Incarceration Facility (a.k.a. Camp Cassidy Lake) was removed. No fuel release was noticeable.

Potential Issues/Solutions:

An addendum was issued for the Nokomis Crisis Center demolition project to define the roles for contractor for obtaining the soil erosion and sedimentation control permit and to finalize the seed mix for restoration.

Chris Kulhanek

Accomplishments:

Bolles Harbor - Received approval to proceed from DNR on issuing a post-bid addendum, so a contract can still be awarded for this construction season.

Potential Issues/Solutions:

Mason Building Exterior Repairs – Window repairs are behind schedule. Delays are due to lead time on new trim extrusions.

Solution – Contractors will have all equipment and supplies removed from north side of the building two days before the Open House. Window contractor will be working after hours to catch up on schedule. Masonry and window contractors are coordinating efforts to combine use of scaffolding and swing staging wherever possible.

Rashmi Patel

Nothing significant to report.

Sadi Rayyan

Accomplishments:

MDOC Various Correctional Facilities – Reviewed and recommended the award of two construction contracts to Seven Brothers Painting, Inc. to paint/repair the water towers at Marquette and Jackson Facilities.

MSP Various Posts – Received and reviewed summary reports for addressing the contamination at the Bridgeport and Houghton Lake State Police Posts. Discussed with the PSC issues and concerns with regard to requesting closures from DEQ.

DNR Lead Reclamation at Shooting Ranges – Met with agency to discuss options to move forward and re-bid the work as no bids received for the design build RFP. Contacted potential contractors to discuss their interest in performing the work next year.

DEQ Graham Oil Bulk Plant Site – Reviewed and recommended an award of construction contract to Environmental Excavating and Contracting to remove a UST/contaminated soils and restore the site.

DEQ Village of Douglas Site – Reviewed and recommended changes to the contract with Weston Solutions to provide conceptual site model, ecological assessment, private well survey, surface water and groundwater monitoring, vapor intrusion evaluation and reporting.

New Projects:

DEQ Various Sites – Assigned to Superior Environmental under their Expanded Triage ISID contract to screen, investigate and assess the current risks at 18 LUST sites.

DEQ Various Sites – Assigned to Soils and Materials Engineers under their Expanded Triage ISID contract to screen, investigate and assess the current risks at 22 LUST sites.

DEQ Various Sites – Assigned to PM Environmental under their Expanded Triage ISID contract to screen, investigate and assess the current risks at 12 LUST sites.

Projects Complete:

DEQ P.T. Plus Site – Activities for investigation and remediation services completed under budget. Decreased the assignment amount ~$5K and closed out the assignment with Fleis & VandenBrink.

DEQ Village of Ravenna Site – Activities for investigation and remediation services completed under budget. Decreased the assignment amount ~$6K and closed out the assignment with Superior.

DEQ Ravenna Sunoco Site – Activities for investigation and remediation services completed under budget. Decreased the assignment amount ~$4K and closed out the assignment with Superior.

Jud Sorensen

Construction Starts:

A pre-bid meeting was held for the Women's Huron Valley Correctional Facility Primary Electrical Distribution Replacement project on 4/27, a project estimated at approximately $4 million. Although there were 11 contractors and suppliers that attended, there was a definite lack of what would normally be considered general or prime contractors, with only three attending and two likely bidding as Qualified Disabled Veteran Owned Companies.

Projects Complete:

Final record drawings and closeout documentation were received from the professional and the contractor for the HVAC renovations within the administration building at the Cotton Correctional Facility. Once final payment requests have been made, the project will be closed.

Terry O'Brien

Accomplishments:

MDOC Women's Huron Valley NPDES permit termination submitted to DEQ.

Bruce Watkins

Nothing significant to report.

Section Manager: Dennis Stamm, Project Supervision

Nothing significant to report.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending May 8, 2015
Section Manager: Irene Henry, Project Management Section 'A'
Editing Land Bank Demolitions demo contract.

Bob Adams:
New Projects:
MDOC Kinross CF K-Unit Roof System Renovation – Contacted agency to setup PPP meeting.
Michigan Land Bank – Visit site in Iron River to document conditions and send report.
Design:
DMVA Jacobetti Boiler Replacement – Conduct 50% phase 500 design review meeting.
DNR – Hancock to Calumet Rail Trail – Process PSC mod #3 and attend 90% phase 100 study presentation.
Bidding:
DNR Cusino Wildlife Research Station Storage Building – Participated in mandatory pre-bid meeting and walk-through.
Construction:
DNR Straits SP Lower Campground Toilet/Shower Building Replacement – Participated in pre-construction conference.
MDOC Newberry CF Boiler 2&3 Abatement and Demolition – Participated in pre-construction conference.

Lake Superior State University School of Business Renovation – Attended pre-construction conference.

MDOC Pugsley CF Fire Alarm System Upgrades – Participated in pre-construction conference.

DNR Indian Lake SP Shoreline Restoration – Participated in pre-construction conference.
Projects Complete:
Completed Hazwop training in Escanaba.

Scott DeKorte:
New Projects:
Belle Isle SP Casino HVAC Upgrades – Conducted substantial completion meeting for the new boilers and water heaters portion of the work.

Various Correctional Facility Fencing/Security Upgrade Projects – Conducted 90% design reviews with MDOC personnel.

Joel Gordon:
Nothing significant to report.

Gerald Gregorski:
New Projects:
MDOC Woodland Center CF Perimeter Fence Security System Upgrades – The on-site pre-bid meeting and walk-through was attended by several security system installers. Questions were submitted and a bid addendum was posted later in the week. Bids are due 5/13.

MDOC Personal Emergency Location Systems Phase 2 at Six Locations – The final design review and planning meeting was held and the schedule for pre-bid meetings and bidding was set. A central pre-bid meeting, including SenStar bidder certification training, will be held at the GOB on 5/13. Individual site walk-throughs will be held the following week. Bids are due 6/10.

DNR Petoskey SP Trail Development – The 90% design review meeting was held and a bidding schedule was setup for phase 1a. The bid advertisement will be posted 6/1, the pre-bid meeting will be 6/15, and bids due 6/24 with construction targeted for Fall-2015.

Construction Starts:
DMVA Grand Rapids Home for Veterans Backup Generators – A schedule of partial facility shutdowns is underway to tie-in the new generators and transfer switches. Systems startup and checkout will take place before the end of May.
Projects Complete:
DNR Below Ground Sewer and Water Study at Eight Parks – The substantial completion meeting was held on site for the Petoskey State Park lift station and electrical service replacement.

Jan Miller:
Accomplishments:
Capital Area Reconfiguration Project – Held a meeting and tour of the Vital Records with DHHS, Hobbs + Black, and Christman on 5/6. Added the State Warehouse Facility Building 100 to the program statement for Christman before their contract was executed.
Potential Issues/Solutions:
Flint State Office Building Interior Renovations – Operations staff had been monitoring T&M fireproofing work. Conflicts between the contractor and Operations staff arose over actual time being spent. I met the professional on site 5/4 to review the work and decided to have the PSC monitor the work instead of Operations staff.

DNR Silver Lake State Park Day Use & BAS Improvements – Although seven general contractors attended the pre-bid meeting, only 1 bid was received 5/6. The bid was over budget. A meeting is scheduled for 5/18 to discuss options.

Dave Sproul:
Accomplishments
MDOC Ionia Energy Project – Met with Consumers Energy and ESG to review and discuss the required gas service changes to support the project. Consumers Energy has indicated a preliminary estimate of $1.2 to $1.4M in potential gas line changes within the Ionia Complex. This estimate is above the anticipated budget costs from ESG. Consumers Energy will continue to review their estimate and investigate areas to reduce the cost accordingly.

Capital Area Reconfiguration, State Police – Met with State Police to review the programing requirements of the Communications Division. The Communications Division is currently located within the existing MDOT Photo Lab building; however, MSP has requested this group be evaluated for relocation into the GOB. PARTNERS In Architecture is evaluating this request for MSP's approval.

MDOC, Thumb Correctional Facility, Water and Sewer Improvements – Conducted the mandatory pre-proposal meeting, bids are due on 5/13. We had a good turn out and there were some minor items to be clarified within an addendum. The cost estimate for this project is approximately $600,000.

DTMB, Energy Center, Access Platforms – Met with Century A/E to finalize bid documents to provide some miscellaneous access platforms within the Energy Center. These requested platforms will provide a safer access to perform needed maintenance and repairs on plant equipment and systems. The estimate for this project is approximately $80,000. The project advertisement will be released the end of May.
Potential Issues/Solutions:
State Police, SEOC – Met with DMVA to review the progress of the overall National Guard modules. DMVA is continuing to work through their purchasing requirements to secure and release the PO for the module construction. We are working to have all six modules built and delivered by November/December this year.

Steve Urban:
Preparing for Mason Building moves.

Section Manager: Harold Belcher, Project Management B
Nothing significant to report.

Chris Bahjet
Accomplishments:
DNR – Belle Isle – Lake Musocday Canoe/Kayak – Held the pre-proposal meeting for this design bid project.

Tim Hall
Nothing significant to report.

Bruce Hassen
Construction Starts:
The demolition of the Camp Lehman site at Hartwick Pines was restarted after a break for winter.
Potential Issues/Solutions:
The demolition and redevelopment package for the Nokomis Crisis Center was bid, but all 8 bids were over the budget. We plan to issue a post-bid addendum to delete asphalt paving and some other items from the scope and see if we can award after we receive the re-submittals.

Chris Kulhanek
Nothing significant to report.

Rashmi Patel
Accomplishments:
Egeler Correctional Facility - VMS System – Attended the pre-construction meeting at the site.

Various Correctional Facilities – Rounding System - Mandatory walk-through meeting at the GOB. Reviewed project scope and contractor questions and answers. Addendum will be issued next week.

Sadi Rayyan
Accomplishments:
DNR Otsego Township Dam – Met with agency to discuss proposed schedule for design services and options to stabilize the dam and mitigate the risk of failure.

DEQ Countywide Landfill – Met with agency to discuss funding and schedule for the leachate hauling contract with ARR and options to keep the landfill in compliance with the environmental regulations.

DEQ 405 Bridge Street Site – Reviewed and recommended an award of construction contract to MacKenzie to excavate, remove and dispose of contaminated soils and restore the site.

DEQ Donald Johnson Site – Reviewed and recommended changes to the contract with Fleis & VandenBrink Engineering to prepare specifications, provide construction oversight and conduct verification sampling.

DEQ 1801 South Fort Site – Reviewed and recommended changes to the contract with AECOM Technical Services to install and sample soil vapor pins and sample groundwater monitoring wells.
New Projects:
DEQ Jack's Auto Repair Site – Assigned to Fleis & VandenBrink Engineering under their ISID contract to perform remedial investigation, develop feasibility study/conceptual corrective action plan and prepare specifications for the implementation of interim response activities.
Non-Project Related Activities:
Attended “Issues and Options in Human Health Risk Assessment” webinar.

Jud Sorensen

Construction Starts:

A pre-bid meeting was held on 5/4 for the Geagley Laboratory Exterior Curtain Wall Insulation and Elevator Upgrade project. This project has been estimated by the professional to be approximately $140,000 with a 90 day duration after authorization to proceed. Although there were eight contractors and suppliers that attended, there were only three that would normally be considered general or prime contractors with the rest being specialty contractors or suppliers.

Potential Issues/Solutions:

At the request of DTMB Operations, I had Wolverine Engineers & Surveyors and their consultant, Great Lakes Engineering Group look at an issue with cracked and spalled columns within the west ramp at the Hall of Justice. Wolverine Engineers is already under contract with the State of Michigan providing design and construction administration services for repairs to the Pine Street Bridge. In meeting with them on Friday, it was their opinion that the columns of concern may have been under designed. Further review of the issue with the previous DTMB Operations Facility Supervisor showed very similar distress back in 2007 and 2008 that was repaired by RAM Construction with design of repairs being provided by Carl Walker, Inc. Carl Walker, Inc. had indicated in correspondence at that time a potential design problem with the columns being too rigid and not allowing sufficient flexibility for expansion and contraction of the deck. I have now set up a meeting for 5/18 with Albert Kahn and with the Christman Company to review this issue further. Albert Kahn and Christman are involved with the Hall of Justice original construction.

Terry O'Brien

Accomplishments:

SESC authorization for MDOC Women's Huron Valley Correctional Facility and DNR Holland State Park and DNR Wilderness State Park.

Bruce Watkins

Accomplishments:

Cass City Field Office – Cold Storage Building – The design professional (Mayotte Group) held a siting meeting with DNR field staff for this work. Mayotte is moving this forward fairly quickly. We are expecting a budget estimate soon, so that I may request additional funds from DNR to construct the work. The project is underfunded, we just don't know how much yet.

Harbor Design Manual – Continue to meet with DNR and Prein & Newhof to finalize the upgrade to the Harbors Design Guide. This process seems to be dragging on as each item is reviewed in significant detail. I have a meeting with DNR next week and will identify this issue and let them know P&N may request additional hours.

New Projects:

Shiawassee State Game Area – B2 Pump Station – Held pre-proposal meeting for the design of the pump station. There were five recognized design firms in attendance.

Roscommon Customer Service Center – Cold Storage Building – Exterior Re-grading – Held pre-bid meeting for re-grading the exterior of the building to eliminate water problems. Plans and specifications were prepared by DCD for this work. Three good contractors were present for the pre-bid meeting.

Projects Complete:

Highland Trail – Held final inspection meeting for the construction of the trail. The trail finished four months (construction months) late, with approximately $35,000 in liquidated damages, but the finished product looks good and DNR is happy with the work.

Roscommon Storage Building – This project may finally be coming to a close, with it being completed this week. There are only a few items remaining to repair on the roof, then this one can be closed.

Peshawbetown Marina – Finished review of the DNR Grants-in-Aid plans and specifications and submitted to DNR.

MCTI – Tridium/Solidyne Conversion – Work completed, held completion meeting and held meeting to discuss extras incorporated into the work. It appears local staff may have committed to covering extra work and contractor did not contact this office for approval. In light of the way this occurred, I offered to the contractor to cover only their out of pocket costs without overhead and profit and they agreed along with MCTI. Their quotation dropped by 25%, so I have no need for further discussion. We will execute a contract change order for the additional work.

Section Manager: Dennis Stamm, Project Supervision
Nothing significant to report.

Section Manager: Pat Mullen, Contract Services
Nothing significant to report.

WR Ending May 29, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Completed draft bid packages for MLB demolitions and sent for review. Reviewing a PSC claim. Assisted the MLB with a Section 106 Review submittal for the Highland Park HS demolition. Posted several projects on Buy4Michigan.

Bob Adams:

Design:

MDOC Chippewa CF Perimeter Security Upgrades – Participated in phase 500 50% design review meeting.

MDOC Chippewa CF Video Management and Perimeter Surveillance Enhancements – Participated in PSC kickoff meeting.

DNR Mackinac Island SP Road Repairs – Forwarded agency request to utilize ISID PSC and it was approved.

MDOC Kinross CF Housing Unit K Roof System Upgrades – Submitted justification for PSC assignment on Director's Agenda.

DMVA Jacobetti – Received ISID approval and forwarded justification to Lansing for processing design contract.

Construction:

MDOC Newberry CF Boiler 2&3 Abatement and Demo – Construction started.

MDOC Camp Cusino Site Redevelopment – Participated in pre-construction startup meeting for construction start next week.

MDOC Hiawatha CF Video Management and Perimeter Surveillance Enhancements – Participated in pre-construction startup meeting.

MDOC Hiawatha CF Perimeter Security Upgrades – Received PSC's best value bid evaluation and recommendation for award, obtained agency approval, solicited and received MOP funding revision, and submitted for inclusion on special SAB Agenda.

MDOC Marquette Water Heater Circulation Pump Replacement – Gathered data for RFP.

DNR Eagle Harbor Boathouse Roof – Authorize additional work under allowance.

Projects Complete:

DNR Mackinac Island SP Pier Repair – Conducted site visit and meeting with agency for closeout verification.

DNR Cheboygan Dam Seepage Repair – Conducted pre-warranty expiration site visit and met with agency representative to discuss.

MSP Negaunee Post Re-roof – Reviewed and processed final contractor invoice.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

New Projects:

DNR Wildlife Division – Repair Various Existing Dams – A 50% design review meeting was conducted for Stoney Creek Impoundment Dam and the gathering of field data for Dog Lake and Cannon #1 Dams was completed.

DNR Fisheries Division – Repair Various Existing Dams – A 50% design review meeting was conducted for the Foch Lake Dam Repair project and a project kickoff meeting was conducted for the Big Creek Dam Repair project.

DTMB – Capital Complex Master Plan – Governor's Residence Retaining Wall Reconstruction – Contract documents have been issued for bidding, bids are due on 6/10.

Gerald Gregorski:

New Projects:

MDOC / Perimeter Security Improvements at Four Locations – Received four new project assignments for replacement of the I-Flex detector cable system with Shaker Box cable systems at the following sites: St. Louis CF, Ionia CF, Detroit Re-Entry Center, and the Special Alternative Incarceration Center in Chelsea. Discussed the projects' scope and delivery method with the MDOC physical plant representative. Decided to proceed with an ISID assignment to Straub Pettit Yates which is currently doing a very similar type project at the Thumb Correctional Facility.

MDOC / Gus Harrison CF Asphalt Reconstruction - Received new project assignment for replacement of the asphalt paving of several roads and parking areas around the facility. Discussed the project's scope and delivery method with the MDOC physical plant representative. Decided to proceed with an ISID contract assignment to Beckett & Raeder which is currently doing perimeter fencing and security enhancement projects at the facility.

Construction Starts:

DTMB Energy Star Certification of DTMB Owned Buildings – Matrix Engineers has completed site investigations at the Traverse City State Office Building, the last of the buildings to be Energy Star certified.

Jan Miller:

Accomplishments:

DTMB Flint State Office Building Interior Renovations – Project team met on site 5/29 to punch out the 4th floor at the request of the contractor. The PSC determined that the floor was not ready to conduct a punch list and rescheduled for 6/2. The PSC did issue a brief general list of work that needs to be completed before 6/2.

DTMB Capital Area Reconfiguration Project – Met DHHS key personnel team 5/27 since Suzanne Brownell retired. H+B will be meeting separately with each group to complete the programming.

Dave Sproul:

Nothing significant to report.

Steve Urban:

Accomplishments:

DTMB Mason Building, DIFS build-out and move – 8th floor is complete with DIFS move scheduled for this weekend (5/30 & 5/31). Everything looks good. This is the last group of DIFS that will be relocating into the Mason Building.

Construction Starts:

DTMB OPS Center Parking Lot Repairs – East parking lot area (largest section) underwent repair work and sealing on the weekend of 5/23. 2 remaining sections are scheduled for repair and resealing the weekend of 5/30 and 6/6 weather permitting.

Projects Complete:

Austin Building, Treasury Executive Area Renovations

Section Manager: Harold Belcher, Project Management B

Teleconference regarding Alanson to Mackinaw City Trail bridges; teleconference regarding DMVA Wind Funnels.

Chris Bahjet

Accomplishments:

DNR – Selfridge BAS – Met at site to look into areas that need deeper cuts in preparation of the asphalt placement. In negotiating with the contractor, they agreed to place portion of the added fill at transportation cost only. It yet remains to be seen if this partial fill replacement will be sufficient to give the required compaction; SME will continue to monitor.

DTMB – Cadillac Place – Façade Study & Emergency Repairs – Resumed the inspection after a brief stoppage to survey safety measures.

Tim Hall

New Projects:

MDOC Women's HVCF W. Admin & Field House Roof Replacement – Conducted PPP meeting with MDOC and developed preliminary procurement/design plan to respond to MDOC request for ISID and prompt project implementation to address emergent issues recently discovered.

DCH Center for Forensic Psychiatry Perimeter Lighting Upgrade – Prepared and posted RFP for PSC to provide services for this project and potentially several smaller related project elements.

DTMB State Warehouse Facility Building 100 Renovation – Participated in design team kickoff meeting, scheduled initial programming meetings and coordinating with BOD to establish team to evaluate overall site planning for St. Joseph Street complex.

DMVA Fort Custer Vehicle Storage Addition CST - Conducted pre-bid meeting for approximately 7 prime bidders for scheduled 6/3 bids.

Potential Issues/Solutions:

MDOC Women's HVCF Prisoner Service Building – Project is being delayed while pricing of solutions for numerous concealed existing conditions is completed for change order evaluation and recommendation. Agency/facility leadership have been advised of rough magnitude of issue costs and completion impact.

DCH Center for Forensic Psychiatry On-Site Warehouse – Unforeseen conflicts with underground duct bank and electrical service conduit which were not identified by preliminary ground penetrating radar studies have delayed the project; however, after reviewing several alternatives, the project team has determined a solution which offsets a small area of the new addition and eliminates conflicts while limiting the delay to 2 weeks and reducing the overall project cost.

MDOT Blue Water Bridge HVAC Replacement – Conducted meeting with contractor to review commissioning and closeout issues/progress. Booth system operations have been very troublesome and there have been some operational issues with several areas as cooling requirements have increased. Not unexpected during initial season but frustrating for agency/users. Emphasized and received commitment from contractor to respond quickly and maintain effort to resolve all areas of concern.

Bruce Hassen

Accomplishments:

The demolition of the Camp Lehman site at Hartwick Pines has reached the demobilization stage. Only closure documentation remains for contractor. There are some minor environmental concerns to be addressed before MDOC can return the site to DNR Parks & Recreation, but we should get those concerns addressed and reach closure with DEQ this calendar year.

Construction Starts:

A kickoff teleconference for the demolition and restoration of the Camp Cusino prison camp site was held on 6/27. The contractor will be on site setting his trailer on 6/1 and the work begins. This work will involve the main part of site which is defined as all of it north of M-28 & M-94.

Potential Issues/Solutions:

The demolition and redevelopment of the Nokomis Crisis Center should proceed to the award stage since the contractor's price was acceptable if we accepted all of the deductive alternates and reduced the provisional allowance by 25%.

Chris Kulhanek
Nothing significant to report.

Rashmi Patel
Accomplishments:
Carson City Correctional Facility - Upgrade Perimeter Security Systems - Reviewed ninety percent design documents with the agency. Advertised project for competitive bidding.

Various Correctional Facilities - Rounding Systems - Reviewed and posted addendum to answer contractor question and answers.

Sadi Rayyan
Accomplishments:
MDOC Jackson Correctional Facility – Pre-construction meeting held with agency, PSC and construction contractor at the site to paint/repair the water tower.

DEQ Clare's County Corner Site – Bids received on 3/18 rejected. A post bid addendum issued to all companies submitted bids with a modified scope of work.

DEQ Ott Story Site – Discussed agency concerns with the current PSC and options to continue O&M activities.
Construction Starts:
DEQ Graham Oil Bulk Plant Site – Field activities for UST removal and site restoration begin 5/19 with substantial completion by 8/17.

DEQ Residential Wells Holly Road Site – Field activities for remediation system rehabilitation begin 5/27 with substantial completion by 8/9.

Jud Sorensen
New Projects:
A kickoff meeting was held with Tower Pinkster, Cochrane Supply and a committee from the DTMB Operations Division Control staff for the development of building automation system (BAS) standards including technical specifications to be used in future construction and renovation projects. This is being completed jointly with Cochrane Supply as DTMB Operations has contracted with Cochrane Supply to create standard tridium template files. These standard template files would be used in house by the DTMB Controls staff, but would also be used by contractors in the installation and programming of BAS control systems. Tower Pinkster, in their development of standard technical specifications for BAS controls will incorporate the tridium template files through reference to make these files available to both professionals and contractors under contract to work on DTMB's buildings including the various BAS controls.

Terry O'Brien
Accomplishments:
SESC authorization for DNR Conely Point BAS.

Bruce Watkins
Accomplishments:
Ionia Recreation Area – Entrance Road Paving – Reviewed plans at 90% complete for bidding out the work. The engineers estimate suggests the majority of the remaining roads will be able to be repaved and the guardrail along the dam will be able to be reinstalled with new support posts.

Sharonville Shooting Range Improvements – Reviewed the preliminary design plans. DNR is please that 4 stations at 10 yards will be able to be constructed.

Kawkawlin Dam Study – Reviewed study recommendations by the design professional with DNR WLD staff and DEQ Dam Safety.

Section Manager: Dennis Stamm, Project Supervision

Projects:

MDOC - Marquette Branch Prison – New Hot Water Booster Pump System – Currently developing the Design Build documents.

MDOC - Carson City Corrections – Underground Electrical Cable Replacement – New assignment.

MDOC – Bellamy Creek Corrections – Propane Conversion – Expect closeout and final payment within the next two weeks.

DTMB – GSB Painting the Exterior of Building – Have scheduled a pre-construction meeting for the first week of June.

Accomplishments:

Site Visits:

Flint State of Michigan Office Building – Reviewed the renovation with staff members.

Kalamazoo DHHS Office – Completed an evaluation of the existing lease facility.

Kalamazoo DHHS New Lease Proposals – Visited four proposed RFP sites and completed a rating of the four sites.

Other Accomplishments:

Highland Park High School Demolition – Completed a demolition estimate.

Chaired meetings with the DCD Closeout Committee & Safety Committee.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending June 5, 2015
Section Manager: Irene Henry, Project Management Section 'A'
Nothing significant to report.

Bob Adams:
New Projects:
MDOC – Baraga Correctional – Perimeter fence upgrades.

MSP – Calumet Post – Roof Replacement – Forward executed PSC contract to OHM and request design schedule.
Design:
DNR Mackinac Island SP Road Repairs – Submitted ISID PSC proposal for agenda approval.

DNR – Union Bay Toilet Shower Building – Conduct 90% plan review meeting.
Bidding:
MDOT – Ironwood Welcome Center – Roof Replacement – Conducted pre-bid walk-thru.

DMVA - Jacobetti Veterans Home – Boiler and Water Heater Replacement – Conduct pre-bid walk-thru.
Construction:
MDOC Hiawatha CF Perimeter Security Improvements – Scheduling pre-construction conference.

MDOC Hiawatha CF Fire Alarm System Upgrades – Scheduling pre-construction conference.

DNR Muskallonge Lake SP – HQ Relocation – Scheduling pre-construction conference.

MDOC Newberry CF Boiler 2&3 Abatement and Demo – Participated in progress meeting.

MDOC Hiawatha CF Video Management and Perimeter Surveillance Enhancements – Participated in meeting to coordinate construction with the personal emergency locator system (PELS) and perimeter security improvement projects with respect to the termination of fiber optic cable.

MDOC Newberry CF Fire Alarm System Upgrades – Participated in progress meeting.

MDOC Chippewa CF Fire Alarm System Upgrades – Participated in progress meeting.

DNR Conely Pt BAS – Participated in progress meeting.

DNR – Eagle Harbor Roof Replacement – Conducted progress meeting #2.

DNR – Presque Isle Dam Repair – Conduct meeting with contractor and PSC – Process CCO for replacement of deteriorated structural steel channels concealed during design.

Scott DeKorte:
Nothing significant to report.

Joel Gordon:
Nothing significant to report.

Gerald Gregorski:
Nothing significant to report.

Jan Miller:
Accomplishments:
Flint State Office Building, Interior Renovations – 4th floor was successfully punched out 6/2. The overall schedule was updated showing the final completion date as 12/31. Met with BOD 6/1 to review schedule and budget for solar panels, ice storage and re-roof which will all be bid out as a separate contract. Met

with DHHS 6/4 to discuss occupying the 6th and 7th floors. In order to meet the schedule DBI stated they needed the design layout signed off by 6/18. DHHS agreed.

Capital Area Reconfiguration Project – Programming continues; met with Epidemiology and Vital Records 6/5.

DNR Silver Lake State Park Day Use & BAS Improvements – Recommended the award of a construction contract to Hallack Contracting after the post-bid addendum bid came in within budget. Recommendation is on the 7/7 Ad Board Agenda.

Dave Sproul:

Accomplishments:

Capital Area Reconfiguration, State Police – Facilitated a meeting between PARTNERS In Architecture and The Christman Company to begin the coordination of developing the schematic design cost estimate for the MSP move into GOB. Our discussion topics included a review of the current programing layouts, potential move schedules, and overall strategy for the construction estimate. We are working to the conceptual construction estimate submitted by the mid to end of July.

MDOC, Michigan Reformatory Power Plant, Water Softeners and DeAlkalizer System Replacement – Continuing to work through the refinements and modifications to the new brine system storage tank installation and place all new systems in proper operating condition. Sterling Water Treatment has been on site providing checkout and startup inspections.

Jackson Community College, Bert Walker Hall Renovations – Received for review and approval two additional bid packages concerning this project. These packages include Structural Steel and Hydraulic Elevators.

Potential Issues/Solutions:

State Police, SEOC – Attended our regularly scheduled construction progress meeting and the Daniels Building Company JV continues to make progress on exterior construction scope including structural steel and major block installation. State Police and I personally met with State Representative Phil Potvin to provide him with an update on the project construction and schedule. We informed Representative Potvin that we are scheduled to be complete by the end of December and construction is progressing more effectively with the warmer weather conditions.

Steve Urban:

Accomplishments:

Mason Building, DIFS Build-out and Move - Move by DIFS onto the 8th floor took place over the weekend of 5/30. This was the last DIFS group to move into the Mason Building.

Met with DEQ Water Resources Division to provide a lessons learned presentation to 15 DEQ specialists regarding the green initiatives that were installed as part of the Pine Street Parking Lot Renovations. The rain garden as well as pervious pavement installation were the main topics of conversation.

MDOC St. Louis, Door Replacement Project - Construction bid documents were posted on Buy4Michigan on 6/5.

Construction Starts:

OPS Center Parking Lot Repairs - 3 additional parking lot sections will be repaired and resealed this weekend (6/6, 6/7) leaving 1 parking lot area to be addressed. This would mean that of the 6 parking lot sections there will be only 1 section that will not be completed in time for the Oldsmobile Car show taking place the weekend of 6/13 and 6/14.

Section Manager: Harold Belcher, Project Management B

HAL meeting with new IT personnel; FM Systems demo.

Chris Bahjet

Accomplishments:

DMVA – Detroit Light Guard – Phase 4 Renovations - Met for substantial completion. Although substantial was declared, the agency would like to replace major parts of the boiler and install furniture. This work will be in a future bulletin. The agency agreed the building and the project as planned is ready for occupancy.

Potential Issues/Solution:

DNR – Selfridge BAS – The issue is the potential of uncovering unsuitable soils during the removal and repaving of Rosso Hwy at the portion of where the storm line was replaced. Since the budget is limited to cover all possibilities, we were looking for ways to reduce risk. We invited the county representative asking him to consider reducing the permit's work scope. The solution was the county representative agreed to look into this request after the removal of one entrance and examine the subgrade and make a decision then.

Tim Hall

Accomplishments:

DMVA Fort Custer Vehicle Storage Addition CST – Bids received slightly above PSC estimate and DMVA Federal funding limits; DMVA evaluating funding options to release project for award.

DCH Center for Forensic Psychiatry Parking Lot Upgrades – Contractor mobilized and began upgrades in phase I; conducted team progress meeting.

New Projects:

DTMB State Warehouse Facility Building 100 Renovation – Design team held initial programming meetings and completed field data visits; coordinating with BOD to establish team to evaluate overall site planning for St. Joseph Street complex.

DNR Wolf Lake Fish Hatchery Fishing & Viewing Access – Conducted 50% design review meeting with Abonmarche (PSC) and Wolf Lake staff. Design on track with DNR direction and minor comments will be integrated into ongoing design completion.

Potential Issues/Solutions:

MDOC Women's HVCF Prisoner Service Building – Project is being delayed while pricing of solutions for numerous concealed existing conditions is completed for change order evaluation and recommendation. Agency/facility leadership have been advised of rough magnitude of issue costs and completion impact.

MDOT Blue Water Bridge HVAC Replacement – Design/build contractor continuing adjustments to troublesome booth system operations, but still have not achieved consistent/reliable operation meeting contract requirements. Other commissioning "issues" continue to arise in the main buildings and contractor response and resolution is under careful watch.

Bruce Hassen

Accomplishments:

A pre-bid walk-thru for painting the tankage, vessels, and piping at the Ott-Story-Cordova Superfund site was conducted and at least two attending bidders are known to be well qualified to perform the work.

New Projects:

The Cole Tire site in Lakeview, a closed tire recycling facility, was inspected so that the scope of work for redeveloping the site could be defined.

Chris Kulhanek

New Projects:

Rose Lake Shooting Range – Education Center - Project has been re-assigned from Steve Urban to Chris Kulhanek. PPP meeting set for 6/9. The plan is to approve a contract mod for the PSC that did the initial study, so the project can still start construction this year.

Potential Issues/Solutions:

MLHC Rotunda Window Replacement – Pre-con meeting was held on 6/3. GC submitted a schedule that extends about two months beyond the original completion date due to long lead times on several materials.

Solution – BOD is working with the events coordinator to make sure planned events are either able to proceed with the temporary construction barrier in place, or can be re-scheduled after completion. Additionally the GC is looking for ways to expedite the installation time.

Mason Building – Exterior Façade Repairs – The masonry repairs are expected to be completed within the next week or two, but the window trim repairs are now scheduled to extend into August due to longer than anticipated fabrication time and the degree of difficulty meeting the specifications with the installation, along with numerous weather delays.
Solution – The contractor will provide a price quote to work two shifts which will essentially cut the installation time in half.

Rashmi Patel
Nothing significant to report.

Sadi Rayyan
Nothing significant to report.

Jud Sorensen
New Projects:
The Department of Corrections requested that Engineering Applications, as a part of their on-going work at Cotton Correctional Facility and their recently completed project at Copper Street Correctional Facility, look at an issue with a chiller for the school building at the Cassidy Lake SAI Facility. This facility is under the Cooper Street warden and physical plant supervisor. The chiller, approximately 40 years old, broke down at the end of the 2014 cooling season. An evaluation by the Agency's refrigeration mechanic showed that to repair this chiller would cost approximately $80,000 in parts only using in-house labor. DTMB has set up a meeting at the Cassidy Lake SAI Facility with Engineering Applications for 6/9.
Construction Starts:
A pre-construction meeting was held on 6/2 with the general contractor, AnLaan Corporation, the professional, Wolverine Engineering and Surveying, and DTMB Operations Division. Work is anticipated to commence on or about 7/6 with the contract requiring work to be completed by no later than 9/30.

Matt Miles
Accomplishments:
Caro Center - Performed fieldwork on water main location project.

SEOC SBA Survey - Performed fieldwork and started drafting the survey. I also made contact with Eaton County Road Commission engineer in order to define Billwood Highway alignment for this project.
Other:
Assisted Dave Sproul over questions on Ionia Department of Correction steam line concerns.

Terry O'Brien
Annual leave.

Bruce Watkins
Accomplishments:
Kawkawlin Dam – Held conference call with the owner, PSC (Wade Trim) and the dam safety unit to discuss minimum requirements for work to repair the temporary plug and final solution to the inadequate flood flows.
New Projects:
North & South Higgins Lake State Parks – Trail Connectors – Held design kickoff meeting with PSC (C2AE) and the owners to get the project design started. Walked the North Higgins Lake State Park and RAM Center portions of the trail to re-iterate the project scope of work for the team.
Projects Complete:
Lakeland Correctional – Above Ground Storage Tanks Removal – The project is substantially complete as of 6/2.

Section Manager: Dennis Stamm, Project Supervision

Projects:

MDOC - Carson City Corrections – Underground Electrical Cable Replacement – Scheduled a planning partnering meeting for 6/12.

DTMB – GSB Painting the Exterior of Building – A preconstruction meeting was held on 6/3. I have not given a notice to proceed as the executed contract is expected the week of 6/8.

Accomplishments:

Completed a renovation estimate for the Hamilton DHHS lease in Detroit.

Completed a renovation estimate for the Kalamazoo DHHS lease in Kalamazoo.

Wrote draft copies of 2 staff yearly IPM performance reviews.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending June 12, 2015
Section Manager: Irene Henry, Project Management Section 'A'
Annual leave.

Bob Adams:
New Projects:
MDOC – Baraga Max – Perimeter Fence Security Enhancement (shaker wire) - Made verbal and e-mail contact with MDOC to determine options for design.
Design:
DNR – Union Bay Campground – Toilet/Shower Building D.B. – Processed change request #1.

DNR Union Bay BAS - Finalize documents, provide NIGP codes, received DEQ permit and requested permit status from USACOE.

DNR – Pioneer Trail Phase 100 Study – Processed PSC mod for scope change to add 3 miles of trail to the study.
Bidding:
DMVA Jacobetti Veterans Home – Boiler Replacement – Received bids and conducted contractor interviews. Project is within budget. Processing recommendation for next week's agenda.

MDOT – Ironwood Welcome Center Roof Replacement - Received bids and conducted contractor interviews. Project is within budget. Processing recommendation for next week's agenda.

Scott DeKorte:
New Projects:
MDOC – RMI – Sally Port Security Upgrades – Conducted pre-bid meeting.

Reviewing bids on four MDOC security upgrade projects.

Joel Gordon:
Nothing significant to report.

Gerald Gregorski:
Nothing significant to report.

Jan Miller:
Accomplishments:
Flint State Office Building, Interior Renovations – Started installing carpet tiles on the 4th floor 6/8. DHHS approved the 6th floor layout 6/12, 6 days ahead of schedule. Only 1 floor to ceiling office will be added which should not impact the schedule.

Capital Area Reconfiguration Project – Programming continues; met with administration and epidemiology for the second time. Held a team kick-off meeting 6/12 with Helen Dennis of 300 Decisions, the move manager for MSP, DHHS and FBSA.

Dave Sproul:
Nothing significant to report.

Steve Urban:
Accomplishments:
Mason Building, ORS Move - First move of ORS to 4th and 5th floors to take place this weekend.

Met with representative with BWL to review the status of the job and determine as-built information to submit to them for SOM to receive cost rebates due to electrical and HVAC upgrades.

OPS Center Parking Lot Repairs - Paving contractor was able to crack-fill and seal coat the remaining 4 lots over the weekend of 6/6 ahead of schedule. Contractor took advantage of ideal weather conditions. Patching of road surfaces took place during the course of the week. All work is complete for the Oldsmobile Car show on 6/13 and 6/14.

Potential Issues/Solutions:

MDOC Gus Harrison Roofing Restorations Project - Roofing contractor violated MDOC construction security protocol which lead to the contractor's project superintendent being removed from the job. A number of roofing insulation screws (8 inches long) were inadvertently dropped on site. It could not be determined if all screws were accounted for.

Section Manager: Harold Belcher, Project Management B

Shiawassee State Game Area Siphon Tube meeting with Spicer; MadDog Energy Solutions vendor visit; HAL.

Chris Bahjet

Accomplishments:

DCH - WRPH – Showers Renovations – Held the substantial completion meeting and reviewed closing requirements.

DCH – Walter Reuther Hospital – New Activity Center – Held a meeting to coordinate between the agency and the contractor to review the new system at the demarcation point. When the project was in design the phone conversion plans were not clear, now that the existing has converted the planning will be simple.

Tim Hall

Nothing significant to report.

Bruce Hassen

Nothing significant to report.

Chris Kulhanek

Accomplishments:

Forest Fire Experiment Station – Close-out meeting held on 6/10. A few punch list items need to be completed and the rest of the close-out documents submitted, but the project is otherwise complete. A final no-cost change order was negotiated with the contractor to take care of outstanding issues and resolve unused balances. The project was completed within the overall budget.

Potential Issues/Solutions:

Washtenaw Armory – The project missed the substantial completion date. A walk-through on 6/12 revealed that there were too many items to complete for the project to be substantially complete.
Solution – DMVA has agreed to extend the substantial completion date by two weeks due to the large number of changes that have been requested. The facility personnel has agreed to stay out of areas that have had final cleaning done.

Matt Miles

Nothing significant to report.

Rashmi Patel

Nothing significant to report.

Sadi Rayyan

Accomplishments:

MDOC Marquette Branch Prison – Pre-construction meeting held at the site with agency, PSC and construction contractor to paint/repair the water tower.

DEQ Market 103 Site – Reviewed and recommended an award of construction contract to TSP Construction to excavate, remove and dispose contaminated soils and restore the site.

DMVA Climate Preparedness Planning Project – Reviewed and recommended changes to the agreement with LIAA to provide adaptation planning for Selfridge Guard Base.

Construction Starts:

DEQ State Road Service Site – Field activities for petroleum impacted soil removal and site restoration begin 6/8 with substantial completion by 9/6.

Non-Project Related Activities:

Attended a meeting with the vendor MadDog Energy.

Attended "IKEA Taps Geothermal" Webinar.

Jud Sorensen

Construction Starts:

A pre-bid meeting was held for the installation of primary disconnect switches at the Romney Building. Five potential bidders along with the Lansing Board of Water and Light were in attendance. This project was specified to be complete by 10/30, but due to an issue with lead time on disconnect switches, an addendum has been issued extending project completion to 12/18.

A pre-construction meeting was held for the Geagley Laboratory elevator upgrades and curtain wall insulation on 6/11 with the general contractor, Laux Construction Company, the professional, Byce and Associates, and MDARD representatives. Work is anticipated to commence in early July and be complete by September.

Terry O'Brien

Accomplishments:

Survey at Caro.

Bruce Watkins

Accomplishments:

Kawkawlin Dam – Held conference call with the owner, PSC (Wade Trim) and the dam safety unit to discuss minimum requirements for work to repair the temporary plug and final solution to the inadequate flood flows.

New Projects:

North & South Higgins Lake State Parks – Trail Connectors – Held design kickoff meeting with PSC (C2AE) and the owners to get the project design started. Walked the North Higgins Lake State Park and RAM Center portions of the trail to re-iterate the project scope of work for the team.

Projects Complete:

Lakeland Correctional – Above Ground Storage Tanks Removal – The project is substantially complete, as of 6/2.

Section Manager: Dennis Stamm, Project Supervision

Nothing significant to report.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending June 19, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Started environmental surveys for Hardest Hit Fund Demolitions; issued Addendum 1 for demo bids; and created/populated the MLB's spreadsheet. Met with AG to review the first section of MICHSpec revisions.

Bob Adams:

New Projects:

MDOC - Baraga Correctional – Perimeter Security Fence B Upgrades – Provide draft ISID project statement to MDOC for review and comment.

Design:

MDOC Kinross CF Housing Unit K Roof System Upgrades – Received and initiated review of phase 500 50% design documents, schedule and cost estimate.

MSP – Calumet Post – Roof Replacement - Conduct design kickoff meeting with agency and PSC.

Bidding:

MDOT – Ironwood W.C. Roof Replacement – PSC provided contractor interviews and recommendation for award. Submitted construction contract justification for Red Jacket to Lansing.

DMVA - Jacobetti Boiler Replacement - PSC provided contractor interviews and recommendation for award. Submitted construction contract justification for United Contractors to Lansing.

Construction:

DNR Pigeon River SF Footbridge and Streambank Restoration – Participated in substantial completion site visit.

LSSU School of Business Renovation – Participated in progress meeting and site visit.

DNR Muskallonge Lake SP HQ Relocation – Submitted justification for SAB approval of owner-added scope.

DNR – Presque Isle Dam Repair – Visit site and report on progress. Project is ahead of schedule and weather permitting should be complete 6/26. A substantial completion meeting is pending.

Projects Complete:

Otter Lake Dam Repair – DNR Fisheries indicates the project has been put on hold and requests the MOP be closed out.

MSP – Negaunee Roof Replacement – Sent PSC and contractor evaluations to Anne.

Scott DeKorte:

New Projects:

Nothing significant to report.

Joel Gordon:

New Projects:

DNR – Warren Dunes State Park – Day Use Area Redevelopment – The project team conducted the 50% design review meeting. The project is scheduled to be issued for bidding the second full week of July.

DTMB – Michigan Law Enforcement Officers Memorial – Construct a New Monument – I attended the monthly MLEOM Commission meeting to review project status with the full commission.

Construction Starts:

DNR – Wilderness State Park – Lakeshore Campground Redevelopment, Phase 2 Bluffs Campground – The pre-construction meeting was conducted on site with the PSC, contractor, DNR and DTMB.

Gerald Gregorski:

New Projects:

DNR/Parks & Recreation Div. - Lincoln Hills Bridge – Engineering Design for Replacement or Rehabilitation – An on-site scope review meeting was held with DNR staff and a structural engineer from Northwest

Design Group. It was decided from the obviously poor condition and age of the bridge that an engineering study was not required and rehabilitation was not practical. NDG will provide an ISID assignment request to provide design and construction administration services for total bridge replacement.

MDOC – Woodland Center Correctional Facility - Perimeter Fence Security System Upgrades – The contract award recommendation for the low bidder, Midstate Security, was approved by the State Administrative Board.

MDOC – Gus Harrison Perimeter Enhancements – The contract award recommendation for the low bidder, American Fence, was approved by the State Administrative Board.

DNR/Parks & Recreation Div. – Petoskey State Park Trail Development – The pre-bid meeting for the first phase of the trail was well attended by ten contracting firms. Bids are due 6/24 with construction targeted for Fall-2015.

MDOC – Personal Emergency Location Systems Phase-2 at Six Locations – Bids were received for the three separate bid packages which combined sites according to geographic location. Three bids were received for both the Chippewa site and the combined Brooks and Central Michigan sites. Contract award recommendations for the low bidder, Master Electric in both cases, were submitted to the 7/21 State Administrative Board Agenda. Only a single bid was received for the third bid package combining the Cooper Street, Parnall, and Gus Harrison sites. The bid amount was significantly above budget and the contract will not be awarded at this time.

Construction Starts:

DTMB/BOD – Grand Tower AHU Replacement – AHU replacement on all 16 floors is completed and the units are in operation. The crane lift for the old cooling tower removal and new energy recovery unit placement on the roof was successfully completed without incident on Saturday while the building was vacated. This required partial closure of Grand Avenue and the sidewalk around the building. Approval was received for the chilled water supply booster pumps CCO and work is underway. The PSC contract modification for phase two design and construction, replacement of the VAV boxes, controls, and perimeter hot water heating, was approved by the Ad Board.

DMVA/Grand Rapids Home for Veterans – Backup Generators – Full systems startup testing and checkout was performed on all three new generators and transfer switches. Proper transfer switch sequencing from the utility, to new generators, to existing life safety systems generator, was successfully verified. Testing was performed by both Cummins, the equipment supplier, and a required third party independent testing firm.

DMVA - Grand Rapids Home for Veterans – Networked Door Access Control and Video Surveillance System – Work on the video surveillance system, door access control, and new security office is nearly complete. The patient wandering system installation is in progress with completion expected by July. The substantial completion meeting is tentatively planned for 7/2.

DMVA - Grand Rapids Home for Veterans – Chiller Replacement – Carriers factory rep was not able to start chiller-1 after being shut down all winter, which was installed last spring in the first phase, because of a suspected freon leak. After some discussions, Carrier finally agreed to perform the repairs under warranty.

Jan Miller:

Accomplishments:

Flint State Office Building, Interior Renovations – Worked with WTA and DHHS on laying out the 7th floor build out. We anticipate a sign off the week of 6/22 so a bulletin can be issued for pricing and DBI can layout the cubicles.

Capital Area Reconfiguration Project – Attended a programming session for the DTMB relocation to the LTA. Furniture options and images were presented.

DNR Silver Lake State Park Day Use & BAS Improvements – ISID contract was awarded to PSI for material testing. Pre-construction meeting is scheduled for 6/30.

Dave Sproul:

Accomplishments:

Capital Area Reconfiguration, State Police – Met with PARTNERS In Architecture and The Christman Company to review the schematic design cost estimate. PARTNERS In Architecture presented the final programing layouts for the GOB and Christman has begun their detailed take-offs and estimating. We are scheduled to meet periodically within the next several weeks to continue reviewing and completion of the schematic cost estimate. In addition, we met with the DTMB cyber group to begin the programing process for their space within the GOB. We have previously held space within the 2nd floor GOB in anticipation of their inclusion with the project.

MDOC, Michigan Reformatory Power Plant, Water Softeners and DeAlkalizer System Replacement – The new brine system silo tank has been professionally cleaned and we are working to be substantially complete by the end of June. Sterling Water Treatment has been on site providing checkout and startup inspections.

Jackson College, Bert Walker Hall Renovations – Completed and approved the release of construction subcontracts for the structural steel and hydraulic elevators.

Potential Issues/Solutions:

MDOC, Ionia Energy Project – Met with ESG and MDOC staff to review and discuss the final construction documents for the mechanical retrofit and heating system conservation measures. Major discussion points included the new heating building for MTU and boiler floor design within the Michigan Reformatory power plant. We are working to have the final construction bid package ready for release within July. Construction activities may begin tentatively by September.

Steve Urban:

Accomplishments:

Mason Building Renovations - Met with ORS management to discuss their need for a main lobby toilet room. It was agreed that a uni-sex toilet room will be provided at the main lobby in the MIOSHA waiting area. MIOSHA has agreed to give up this area for the toilet room. MIOSHA's waiting area will now be located in the 1st floor east wing. CSM was given authorization to proceed with the design and cost estimates.

Food Concessions Area - Met with LARA to confirm that a new food concessions area was/was not to be provided. LARA has decided that even a downsized food concessions area is not economically justifiable. Vending machines only will be provided in the building.

ORS – Accessibility Issues - Met with parking office, BOD, and ORS to discuss accessibility issue to the ORS Retirement Outreach Center located on Mason 1st floor. Signage/way finding is to be provided along Allegan St. as well as other feeder streets to the Capital Complex ORS Outreach Center. Nowak & Fraus will be providing signage and way finding options based upon their Capital Complex signage/way finding study.

DNR, Porter Ranch Barn Re-roofing - Posted design/build proposal on Buy4Michigan. This project involves re-roofing of an historically significant barn structure.

Projects Complete:

OPS Center Parking Lot Repairs - Conducted construction punch list inspection. Contractor completed all parking lot repairs in time for the car show which is to take place the weekend of 6/18-6/19.

Potential Issues/Solutions:

MDOC St. Louis Door Replacement Project - Conducted construction pre-bid meeting; only one bidder attended. It was decided that the bid period will be extended and another mandatory pre-bid meeting is to occur. St. Louis personnel have notified potential bidders to attend.

Section Manager: Harold Belcher, Project Management B
DCD/DNR quarterly meeting (met with Janice Hebekeuser and Pat Avendt); HAL.

Chris Bahjet
Nothing significant to report.

Tim Hall
New Projects:
DTMB State Warehouse Facility Building 100 Renovation – Design team meetings to advance programming and review prior "Purposeful Facilities" workshop visions for new workplace designs completed in 2014 by DCD, RED and BOD staff. Conducted preliminary programming estimate workshop with Christman and Hobbs+Black to kick off initial cost estimate preparations.

DCH Center for Forensic Psychiatry Perimeter Lighting Upgrades – Conducted pre-proposal meeting for PSC selection, received proposals and distributed to evaluation committee to prepare for selection and contract recommendation.

DCH Center for Forensic Psychiatry Shower/Toilet Upgrades – Conducted 90% construction document review meeting with WTA and agency. Established schedule for bid document completion, advertisement and bidding.
Bidding/Construction:
DMVA Fort Custer Vehicle Storage Addition CST – DMVA provided MOP revision adjusting funding to support bids received; C2AE proceeding with bidder evaluations and will forward contract award recommendation.

MDOC Women's HVCF ADA Walks & Paving – Contractor mobilized and began work on initial sequences of phase 2 walk and paving work; minor detail coordination with facility during first few days, contractor worked weekend to complete first segment of east ring road and will begin segment 2 next week.
Potential Issues/Solutions:
DCH Center for Forensic Psychiatry On-site Warehouse – Contractor re-mobilized after resolution of unforeseen underground interferences were resolved with no additional costs; foundation installation completed and block wall installation is now underway.

MDOC Women's HVCF Prisoner Service Building – Multiple pricing of solutions for numerous concealed existing conditions is under review for change order evaluation and recommendation. Agency/facility leadership have been advised of preliminary costs and funding needs as well as completion impact. Expect recommendations next week with projected time extension of roughly 115 calendar days.

Bruce Hassen
Accomplishments:
The successful contractor for the Camp Baraga demolition and redevelopment contract was selected; MD Contracting, Inc. of Baraga.

Chris Kulhanek
Nothing significant to report.

Matt Miles
Nothing significant to report.

Rashmi Patel
Accomplishments:
Saginaw, Oaks and Chippewa Correctional Facility - Video Management Systems - Initial meeting with PSC at the Saginaw Correctional Facility. MDOC met at Oak and Chippewa Correctional Facility. Reviewed

scope for the project and MDOC master plan to cover all existing cameras, perimeters and lighting improvements. PSC will provide contract modification.

Macomb Correctional Facility - Video Management Systems – Attended progress meeting. Contractor is ahead of schedule. PSC has received cost estimate for bulletin #1.

Thumb Correctional Facility - Video Management Systems – Attended progress meeting. Contractor is on schedule. PSC has received cost estimate for bulletin #1.

Carson Correctional Facility - Security Fence Upgrade - Received bids and received PSC recommendation to award contract.

Ionia Correctional Facility - Restore Roofing, Housing Units 1-7 – Attended mandatory walk-through meeting at site for roofing contractors.

Parnall Correctional Facility - Food Service Roof Replacement - Received bidding documents.

Sadi Rayyan
Accomplishments:
DEQ Ott Story Site – Met with agency and Bruce Hassen to discuss contracting terms and options for operating the system if and when staff employment issues within the current O&M contractor escalate.

DEQ Memphis Shell Site – Reviewed specifications for free product removal utilizing chemical injection and vacuum extraction. Discussed with agency scope of work and recommended putting the construction activities on hold. The PSC to conduct a pilot test before implementing the designed system.

DEQ Generic Exposure Assumption Values Project – Reviewed and recommended an agreement with SRC to compile, evaluate, select, document and tabulate the best available generic exposure assumption values used to derive the Part 201 generic residential and nonresidential cleanup criteria.

DMVA Fort Custer Training Center – Reviewed and recommended an agreement with KNC to conduct research activities on Cerulean Warbler and other migratory birds.

DMVA Fort Custer Training Center – Reviewed and recommended changes to the agreement with Potawatomi RC&D to provide erosion and sediment control activities for the repair of eroded maneuver trails in training areas 6 and 8.
Non-Project Related Activities:
Met with DEQ to discuss new ISID contracts for the environmental expanded triage.

Attended "Cut Costs with Cool Roofs" Webinar.

Jud Sorensen
Nothing significant to report.

Terry O'Brien
Accomplishments:
Survey at Gaylord. SESC plan and spec review for DNR Petoskey State Park.

Bruce Watkins
Nothing significant to report.

Section Manager: Dennis Stamm, Project Supervision
Projects:
MDOC - Carson City Corrections – Underground Electrical Cable Replacement – Draft copy of the Design Build bid documents completed. Design meeting scheduled for 6/26.

DTMB – GSB Painting the Exterior of Building – Performance bond received, so a notice to proceed will be issued to the contractor the week of 6/22.

DMTB – ISID Insulation of Pipe and Duct Insulation Project – Completed final draft of bid proposal documents to be posted on Buy4Michigan.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending June 26, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Took bids for MLB demolitions. Attended DTMB All-Manager's Meeting. Pulled stored records from the US Bankruptcy Court for Real Estate, reviewed them and uploaded the as-builts into TRIM. Met with Byce and Jerry Gregorski to discuss a request for additional fee.

Bob Adams:

New Projects:

MDOC Marquette CF Generator – Held PPP and issued ISID project statement to Matrix Consulting.

MDOC AMF Fence B Upgrade – Held PPP and issued ISID project statement to Tower Pinkster.

Design:

MDOC Kinross CF Housing Unit K Roof System – Participated in phase 500 50% design meeting.

DNR Mackinac Island SP Road Repairs – Participated in PSC kickoff design meeting.

DNR Fayette Historic SP Snail Shell Harbor Dock Replacement – Prepared draft project statement based on new direction from agency.

MSP Calumet Post Roof Replacement – Conducted 50% design review meeting with PSC and agency.

Bidding:

DNR Mackinac Island SP Visitors Center and British Landing Roof Upgrades – Advertised on Buy4Michigan.

Construction:

DNR Indian Lake SP Shoreline Restoration – Participated in substantial completion meeting.

DNR Palms Book SP Toilet Building Replacement – Participated in progress meeting and review for substantial completion.

Projects Complete:

DNR Presque Isle Dam Repair – Conducted substantial completion meeting.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

Nothing significant to report.

Jerry Gregorski:

Nothing significant to report.

Jan Miller:

Accomplishments:

Flint State Office Building, Interior Renovations – The 5th floor was punched out 6/25. DHHS signed off on the 7th floor build out 6/24, WTA is working on the bulletin for the change.

Potential issues/Solutions:

DNR Maybury State Park Trail Improvements – The contractor is behind schedule. The PSC notified Pavex, the contractor, that liquidated damages would be assessed starting 6/29.

New Projects:

DNR Island Lake Recreation Area Connector Trail – Held the project planning partnering (PPP) meeting 6/22 with DNR regional planner and park manager.

Dave Sproul:

Nothing significant to report.

Steve Urban:

Nothing significant to report.

Section Manager: Harold Belcher, Project Management B
Annual leave.

Chris Bahjet
Nothing significant to report.

Tim Hall
New Projects:
DTMB State Warehouse Facility Building 100 Renovation – Conducted design meeting for campus site planning with all tenant users of the warehouse complex to begin development of master campus plan for integration of FBSA offices on the campus with all other on-going activities.

DMVA Jackson Armory Maintenance Bay Addition – PSC has performed a site evaluation and is completing expedited 90% design for final review and release for bidding as per DMVA requested schedule.
Potential Issues/Solutions:
MDOC Women's HVCF Prisoner Service Building – Initial reviews completed for various significant field conditions and recommendation from PSC in final review. Agency/facility leadership have been advised of probable costs and funding needs as well as completion impact and are preparing necessary revisions. Expect time extension of roughly 115 calendar days due to unforeseen conditions.

MDOT Blue Water Bridge HVAC Replacement – Design/build contractor continuing adjustments to troublesome booth system operations and have made significant progress resolving the operational concerns. Building systems are operating consistently and coordinating with BWB team to adjust booth approach for final operation.

Bruce Hassen
Construction Starts:
The demolition of Camp Cusino has been delayed because LARA – Bureau of Construction Codes has demanded that we get a permit from them and pay an estimated $4,676 in fees. We will comply.
Potential Issues/Solutions:
Three professionals were invited to provide price proposals for preparing bid package and overseeing the demolition of a structure in Iron River. The pricing was unaffordable so D&C will have to work with the agency to scale down the scope of work definition and try again.

The effort to renew all the air permits for the many MDOC central heating plants have been underway for half of a year. There are paperwork deficiencies associated with the current permits and these have been discussed during this period. At the most recent high-level meeting between DEQ-AQD, MDOC, and MDOC's professional (FTCH), the penalty phase was discussed and the schedule for the formal meetings pursuant to this phase will be scheduled soon. MDOC needs to know all options before selecting the path to compliance and AQD agreed to supply the information.

Chris Kulhanek
New Projects:
Ham Creek Trail Bridge Replacement – Set up PPP meeting at site in early July. Most likely will be considering an ISID assignment due to urgency of project.
Potential Issues/Solutions:
MSP Training Academy – Window Replacement – Existing frames at cafeteria windows have been cut out to accommodate supply lines to fin tube radiators.
Solution – Rather than move the lines, which would be quite costly, the window frames are going to be shifted to avoid the supply lines altogether.

Matt Miles
Accomplishments:
Completed field work for DNR Gaylord Railroad project.

Attended All Manager's Meeting.

Completed SEOC State Building Authority drawing.

Rashmi Patel
Nothing significant to report.

Sadi Rayyan
Accomplishments:
DEQ Crystal Refinery Site – Reviewed and recommended an award of construction contract to Clean Harbors Environmental Services to provide 2 years of system O&M of the ozone/airsparge and bioreactor treatment system.

DEQ Torch Lake Superfund Site – Reviewed specifications for removing contaminated soils for posting on Buy4Michigan website. Discussed with agency scope of work and provided comments.

DEQ Fort Gratiot Sanitary Landfill Site – Reviewed specifications to repair erosional issues, modify/add structures to improve water flow/drainage and plant trees/grass for posting on Buy4Michigan website. Discussed with agency scope of work and provided comments.

DEQ Helmer I-94 Site – Reviewed specifications for installing AS/SVE remediation system and providing O&M services for posting on Buy4Michigan website. Discussed with agency scope of work and provided comments.

DEQ Americhem Site – Reviewed and recommended changes to the contract with Environmental Consulting & Technology to perform multi-phase extraction (MPE) event and provide additional maintenance/monitoring/sampling.

DEQ Tiel Oil Bulk Site – Reviewed and recommended changes to the contract with Mannik & Smith Group to install monitoring wells, conduct vapor intrusion assessment and complete the remediation design.

DEQ Slagg's Auto Service Site – Reviewed and recommended changes to the contract with Global Remediation Technologies to install 3 monitoring wells for soil/groundwater sampling to complete the contaminant boundry.
New Projects:
DEQ Various Sites – Assigned to Sagasser & Associates under their expanded triage ISID contract to screen, investigate and assess the current risks at 10 LUST sites.
Non-Project Related Activities:
Attended "New Building Delivery: Constructed, Commissioned, Warrantied and Inefficient" webinar.

Jud Sorensen
Construction Starts:
A pre-bid meeting was held for the installation of roof top HVAC units for the Jackson State Office Building. To expedite this project, these roof top units had been purchased under a separate contract. It is anticipated that this contract will be awarded in August 2015 with work to be completed by January 2016. The project is being expedited due to an existing chiller that is in poor condition and subject to failure. Due to the age of this unit, repair is not an option.
Potential Issues/Solutions:
Materials Testing Consultants, Inc. was contacted and requested to provide a proposal for an assignment to their ISID contract to perform an inspection of those portions of the building that will be disturbed by the proposed installation, including demolition of the existing chiller and cooling tower, demolition of existing air handling units and modification of existing duct work. A walk-through of the facility with Materials Testing Consultants was completed on 6/17. Although this building was constructed in 1982 at a time when asbestos containing building materials were being regulated and banned, inspection, sampling and testing is being performed to assure that asbestos will not be disturbed during the execution of this project.

Terry O'Brien

Accomplishments:

SESC authorization for DNR Muskallonge Lake State Park and DNR Ionia State Recreation Area.

Bruce Watkins

Accomplishments:

Harrisville State Park – Restroom/Shower Building – Held an 11 month warrantee review meeting. The meeting was well received by the DNR staff in attendance and lessons learned portion of the discussion was helpful to new DNR staff to hear and for the design professional to provide input on how design decisions were made.

New Projects:

Portland State Game Area – Trail Repairs – Met on site with the contractor and DNR to review erosion of work completed last year. Contractor will prepare cost quotation to make the repairs and to construct culverts.

Sharonville SGA – 10 Yard Shooting Stations – Held 90% review meeting.

Potential Issues/Solutions:

Marquette Branch Prison – AST Replacement – Contractor provided excessive cost quotation for asbestos removal. We removed abatement from their contract and had the design professional contract separately for the work. We only saved about $2,000, but we are hoping the contractor will use a sharper pencil for any future change orders. Thanks to Dave Sproul for the idea.

Section Manager: Dennis Stamm, Project Supervision

Projects:

MDOC - Carson City Corrections – Underground Electrical Cable Replacement – Design meeting held on 6/26. Discussed alternates to keep the cost of the project in line with the budget.

DTMB – GSB Painting the Exterior of Building – Notice to proceed issued to the contractor. Work will likely start within 2-3 weeks on site.

DMTB – ISID Insulation of Pipe and Duct Insulation project – RFP posted on Buy4Michigan.

Accomplishments:

Continued with staff yearly IPM reviews.

Attended DTMB All Managers Meeting.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

APPROVED
July 7, 2015
Michigan State
Administrative Board

A G E N D A

BUILDING COMMITTEE / STATE ADMINISTRATIVE BOARD

June 23, 2015 / July 7, 2015
11:00 A.M. Forum Room, 1st Floor
Michigan Library and Historical Center

. . . . . .

This agenda is for general informational purposes only. At its discretion, the Building Committee may revise this agenda and may take up other issues at the meeting.

AWARD OF CONSTRUCTION CONTRACT

1. DEPARTMENT OF CORRECTIONS, VARIOUS LOCATIONS - Various Correctional Facilities - Security Rounding Equipment
   File No. 472/12434.RMP – Index No. 11107 – Contract No. Y 15284
   Recommended Contract Award: MKC Group, Inc., Bay City; $1,398,066.00

Description and Justification
The purpose of the contract is to provide, install and configure all equipment, software and training required for the implementation of a system to monitor and track prison guards as they make their rounds at various correctional facilities statewide.
Funding Source
100% Agency Operating Funds

2. DEPARTMENT OF NATURAL RESOURCES, MEARS – Silver Lake State Park – Day Use and Boating Access Site Improvements
   File No. 751/10373.JAN - Index Nos. 56060 and 58060 - Contract No. Y 15285
   Recommended Contract Award: Hallack Contracting, Hart; $1,069,960.16

Description and Justification
The purpose of this contract is to relocate the boat access site, improve the beach, picnicking and parking for the day-use areas. The Department of Natural Resources has recently acquired the adjacent property in order to increase boating parking and provide for an efficient and safe access to the lake and beach area. Currently the campers and beach users have to pass through the boat launch area causing an unsafe condition.
Funding Source
50% Waterways Funds
50% Recreation Passport Fees

3. DEPARTMENT OF NATURAL RESOURCES, GARDEN, Fayette Historic State Park – Structural Repairs of Fayette Furnaces
   File No. 751/14043.RAA - Index Nos. 51023 and 52100 - Contract No. Y 15286
   Recommended Contract Award: Northern Restoration and Waterproof Systems, Inc., Grawn; $530,213.00

APPROVED
July 7, 2015
Michigan State
Administrative Board

Description and Justification
The purpose of this contract is to complete structural repairs of the deteriorating historic furnaces. This project is necessary to preserve these historic structures and improve site safety. This work will provide necessary maintenance to the historic focal point of the site and is key to continued public interest.
Funding Source
100% Waterways Funds

4. DEPARTMENT OF ENVIRONMENTAL QUALITY, WYOMING – Spartan Chemical Superfund Site – Soil Removal AS/SVE System Installation
   File No. 761/10107.SAR - Index No. 44061 - Contract No. Y 15287
   Recommended Contract Award: E.T. MacKenzie, LLC, Grand Ledge; $1,869,127.00

Description and Justification
The purpose of this contract is to remove/dispose of contaminated soils, install an air sparging/soil vapor extraction (AS/SVE) system and restore the site. Originally, the site was a bulk chemical transfer, blending, and repackaging plant that processed a variety of chemicals including aromatic solvents, naphthas, alcohols, ketones, ether, chlorinated solvents, and lacquer thinners. Groundwater and soil contamination, including solvents, have been detected at the site and surrounding areas. The project is funded through a cooperative agreement with EPA. The soil removal and remediation activities will reduce the potential risk posed by the presence of soil/groundwater contamination. The work is needed to protect public health, safety, welfare and the environment.
Funding Source
90% Federal Funds
10% Strategic Water Quality Initiative Funds

AWARD OF DESIGN BUILD CONTRACT

5. DEPARTMENT OF NATURAL RESOURCES, DETROIT – Belle Isle (Lake Muscoday and Detroit Yacht Club Canal) - Canoe and Kayak Development
   File No. 751/15126.MNB - Index No. 59715 - Contract No. Y 15288
   Recommended Contract Award: WCI Contractors, Inc., Detroit; $287,920.00

Description and Justification
The purpose of this contract is to design and construct an ADA compliant kayak and canoe launch facility on a strip of land connecting the Detroit River to an inland lake at Belle Isle. The current undeveloped location where citizens launch their canoes and kayaks does not comply with the American with Disabilities Act (ADA).
Funding Source
65.27% Michigan Natural Resources Trust Fund
34.73% Coastal Zone Management Funds

MODIFICATION TO PROFESSIONAL SERVICES CONTRACTS

WR Ending July 3, 2015
Section Manager: Irene Henry, Project Management Section 'A'
Revised the bidding documents and re-bid the MLB demolitions, reviewed proposed demolition properties.

Bob Adams:
Nothing significant to report.

Scott DeKorte:
New Projects:
Belle Isle Building Assessments – Conducted pre-proposal meeting and subsequent tour of the six buildings.

Handlon CF Security Upgrades – Attended meeting to strategize possible reduction of the total scope of work to re-bid the project.

Joel Gordon:
Nothing significant to report.

Jerry Gregorski:
New Projects:
DNR Petoskey State Park Trail Development – Received bids from five construction contractors for phase-1a trail development. Unfortunately all five bids were significantly above the funded amount, even if all five deductive alternates were accepted. The DNR is looking into the possibility of additional funding, but that does not seem likely. The PSC is investigating strategies to reduce the scope of work and/or lowering bid costs.

DMVA Grand Rapids Home for Veterans Kitchen Exhaust Replacement – Held the 95% design review. The bid advertisement will be posted the week of 7/6 with bids due 7/29. This work will require a five day shutdown with around the clock work to minimize kitchen down time.

MDOC Ionia CF Perimeter Fence Security System Upgrades – The project planning and partnering meeting was held on site along with the PSC to develop the scope of work for their ISID assignment request.
Construction Starts:
DNR Below-Ground Sewer and Water Study at Eight Parks – A contract modification was approved for the PSC to perform sewage effluent and soil testing on the existing lagoon while in operation this summer. This will allow them to categorize the waste stream and develop plans with the DEQ for lagoon closure in the fall after connecting to the municipal sewer system.

DTMB Grand Tower AHU Replacement – Received bulletin pricing for upgrading VAV box controllers on each floor to integrate with perimeter heat zone controls, along with a new communications network to integrate the controllers with the building automation system. This new network cable will be routed so that it can accommodate future replacement of VAV boxes with controller upgrades in phase two. This work will be done completely after hours to avoid tenant disruption from the overhead work. The proposal is being evaluated by the PSC and BOD.

DMVA Grand Rapids Home for Veterans Backup Generators – Substantial completion has been delayed until 7/9. The powerhouse generators automatic transfer switch requires field repairs and then additional testing. The other two generator and transfer switch pairs have been commissioned and are in operation.

DMVA Grand Rapids Home for Veterans Networked Door Access Control and Video Surveillance System – Substantial completion has been delayed until 7/23 for the contractor to meet all requirements, including training and final system turnovers to the facility.

Potential Issues/Solutions:
DMVA Grand Rapids Home for Veterans Chiller Replacement – Carrier's factory service were on site to complete warranty repairs to chiller #1. The repairs were completed at no charge and the unit was successfully put back into operation.

Jan Miller:
Accomplishments:
DNR Island Lake Recreation Area Connector Trail – Posted the request for proposal on Buy4Michigan. Pre-proposal meeting is scheduled for 7/20 with proposals due 7/30.

DNR Silver Lake State Park Day Use & BAS Improvements – Held pre-construction meeting on site 6/30.
Potential issues/Solutions:
Flint State Office Building, Interior Renovations – Concerned about the contractor meeting the 6th floor completion date due to lack of manpower. Scheduled a meeting for 7/9 with B&B to discuss.

Dave Sproul:
Accomplishments:
Capital Area Reconfiguration, State Police – Continuing to develop the schematic design cost estimate. We are meeting with PARTNERS In Architecture and The Christman Company to review the final programming layouts and Christman has begun initial detailed take-offs.

Attended the 24 hour, 3-day, Hazwoper training program. The course included regulatory overview, chemical hazard identifications, handling procedures, personnel requirements, levels of protection, and actual demonstrations with protective suits.

MDOC, Michigan Reformatory Power Plant, Water Softeners and DeAlkalizer System Replacement – Continuing to complete the overall installation of the new systems. Sterling Water Treatment is required to provide some additional onsite training and inspections.

SEOC – Exterior construction continues to make good progress and there is notable structural steel and CMU block throughout the building site. Interior drywall and finishes is progressing in both the first and second floors of the GOB. DMVA is completing the contract award for the National Guard modules, we may need to make some minor adjustment to coordinate the delivery and installation.

DCH, State Laboratory, New Waste Incinerator – UL has completed their required inspection of the new incinerator and we are now beginning to schedule the actual on-site installation effort. The on-site activities may begin by late July.
Potential Issues/Solutions:
MDOC, Ionia Energy Project – ESG is incorporating comments and revisions to the proposed heating building to serve MTU. We are continuing to work to have the final construction bid package ready for release within the month of July. The water construction activities and pre-construction meeting is scheduled to begin in July as well.

Steve Urban:
Nothing significant to report.

Section Manager: Harold Belcher, Project Management B
DCD Budget meeting.

Chris Bahjet:
Accomplishments:
DCH - WRPH – Activity Building – Held a conference call with the PSC to address delay issues that are current with the contractor, Daniels Building Co.

DNR – Selfridge BAS – Substantial completion was declared, site was turned over to DNR. Remaining issue is the handrail. Currently being galvanized in Ohio.

DMVA – Selfridge Building 1416 – Attempting to collect as-built after the PSC changed their business. Contacting same engineers and architects who used to work at the firm in an effort to collect any as-builts. PSC has not responded to registered letters and they still have a $20,000 balance to be paid.

Tim Hall

New Projects:

DTMB State Warehouse Facility Building 100 Renovation – Conducted preliminary estimating workshop meeting with Christman and Hobbs+Black to confirm scope and intent upon which Christman is basing their estimate preparation. Preliminary estimate will be reviewed over the next few weeks and ready to present to DTMB team later in July.

DCH Center for Forensic Psychiatry Perimeter Lighting Upgrades – Conducted proposal evaluation, made recommendation and PSC contract to Peter Basso Associates was approved on this week's agenda.

Bidding/Construction:

DNR Yankee Springs Shop/Garage Replacement – Contractor mobilized, laid out and installed foundations and prepared to begin wall construction.

MDOT Southwest Region Laboratory – Participated in bi-weekly progress meeting and site review. Construction is progressing very well and nearing completion on schedule for early August move in. MDOT has recently authorized additional scope to incorporate bid alternates due to very limited changes impacting the budget as the project has advanced.

Bruce Hassen

Construction Starts:

A notice to proceed was issued for the Nokomis Challenge Center demolition. A kickoff meeting will be held at 10:00 a.m. on 7/6.

Chris Kulhanek

Potential Issues/Solutions:

Rose Lake Shooting Range – New Education Building - Pre-design meeting held after contract mod was expedited to get a PSC on board. The PSC expressed concerns that even if the project were to be bid for fall construction, it is unlikely materials with long lead times such as roof trusses would be delivered before winter. He also cautioned about the costs and pitfalls of cold-weather construction. Solution – PSC will review their schedule for preparing documents, design review time will be minimized and the bidding/contract delivery will be shortened as much as possible. Despite these actions, the DNR project manager will inform his division leadership that a spring start of construction is a more likely scenario.

Matt Miles

Nothing significant to report.

Rashmi Patel

Accomplishments:

Cooper Street Correctional Facility - Phase II Video Management System – Attended pre-construction meeting for phase II construction.

Charles Egeler Reception and Guidance Center - Video Management System – Attended progress meeting. Contractor is on schedule, installing foundation for lighting and camera poles and control cabinet.

MDOT C and T Building Masonry and Window Repair - Met with agency and PSC to discuss scope for the design and construction phase. PSC will provide contract modification based on previously prepared phase 100 study and recommendation under option 4.

Sadi Rayyan

Accomplishments:

DNR Otsego Township Dam Project – Reviewed request for qualifications (RFQ) to construct water control structure, construct a new spillway and stabilize the existing spillway. Discussed with agency and PCS contracting issues and provided comments. Posted on Buy4Michigan website.

DMVA Fort Custer Training Center Site – Reviewed and recommended changes to the contract with DLZ to perform forest inventory/evaluation, clearing and removing invasive/exotic plants.

DEQ Sunshine Foods #119 Site – Reviewed and recommended changes to the contract with Mannik & Smith Group to conduct annual groundwater sampling events for two years.

New Projects:

DEQ Howard Jameson A & H Racing Site – Assigned to AKT Peerless under their ISID contract to prepare design/bid specifications for the removal of the contaminated soils and provide construction oversight services.

Jud Sorensen

Potential Issues/Solutions:

In a 7/2 progress meeting with J. Ranck Electric for the primary cable replacement between housing units 3 and 5 at the Women's Huron Valley Correctional Facility, the project superintendent indicated that he was approximately 10 to 14 calendar days behind schedule with only 17 calendar days remaining in his contract. Failure to complete this project on time will delay the start of the utility tunnel steam piping replacement project which could leave housing units without heat during the upcoming heating season. A notice requiring assurance of due performance has been issued by Tower Pinkster to J. Ranck Electric on 7/6 and a meeting with J. Ranck to review their plan to correct the issue is scheduled for 7/8.

Terry O'Brien

Nothing significant to report.

Bruce Watkins

Accomplishments:

Ionia Recreation Area – Sessions Creek Bridge Replacement – Contactor has prepared forms for installation of bridge footings. Area was wet for most of the past two weeks so installation was delayed for the area to dry out and be accessible for concrete delivery. Project is on time and no budget changes or other unforeseen conditions were encountered.

Construction Starts:

Hayes State Park – Lake Hudson Dam Improvements – Established bid schedule for this work. Budget is in place to move forward.

Section Manager: Dennis Stamm, Project Supervision

Nothing significant to report.

Section Manager: Pat Mullen, Contract Services

. . . . . .

This agenda is for general informational purposes only. At its discretion, the Building Committee may revise this agenda and may take up other issues at the meeting.

AWARD OF CONSTRUCTION CONTRACT

1. DEPARTMENT OF CORRECTIONS, CARSON CITY – Carson City Correctional Facility – Upgrade Perimeter Fence Security Systems
   File No. 472/14202.RMP- Index No. 51220 - Contract No. Y 15307
   Recommended Contract Award: RMD Holding, Ltd., dba Nationwide Construction, Chesterfield; $338,000.00

Description and Justification
The purpose of this contract is to provide enhancements to the perimeter security systems. The upgrades will correct existing deficiencies, increasing security at this facility.
Funding Source
100% Agency Operating Funds

2. DEPARTMENT OF CORRECTIONS, IONIA – Bellamy Creek Correctional Facility – Security Upgrades
   File No. 472/14326.SMD - Index No. 62240 - Contract No. Y 15308
   Recommended Contract Award: Midstate Security Company, LLC, Wyoming; $264,600.00

Description and Justification
The purpose of this contract is to provide enhancements to the perimeter security systems. The upgrades will correct existing deficiencies, increasing security at this facility.
Funding Source
100% Agency Operating Funds

3. DEPARTMENT OF CORRECTIONS, MUSKEGON – Earnest C. Brooks and West Shoreline Correctional Facilities – Security Upgrades
   File No. 472/14329.SMD - Index No. 37180 - Contract No. Y 15309
   Recommended Contract Award: MKC Group, Inc., Bay City; $931,948.00

APPROVED
July 14, 2015
Michigan State
Administrative Board

Description and Justification
The purpose of this contract is to provide enhancements to the perimeter security systems. The upgrades will correct existing deficiencies, increasing security at this facility.
Funding Source
100% Agency Operating Funds

4. DEPARTMENT OF CORRECTIONS, MUSKEGON – Muskegon Correctional Facility – Security Upgrades
   File No. 472/14346.SMD - Index No. 38570 - Contract No. Y 15310
   Recommended Contract Award: Midstate Security Company, LLC, Wyoming; $649,500.00

Description and Justification
The purpose of this contract is to provide enhancements to the perimeter security systems. The upgrades will correct existing deficiencies, increasing security at this facility.
Funding Source

AMENDMENT TO AGREEMENT FOR TRAINING AREA 5 MANEUVER TRAIL REPAIR

9. DEPARTMENT OF MILITARY AND VETERANS AFFAIRS, AUGUSTA – Fort Custer Training Center Site – Maneuver Trail Repair
File No. 511/11202.SAR - Index No. 22000 - Contract No. Y 11136
Potawatomi Resource Conservation and Development Council, Calhoun County;
Amendment No. 4, Increase $145,750.00
Agreement Date April 22, 2011

Purpose/Business Case
The purpose of this amendment to the agreement is to provide additional erosion and sediment control activities for the repair of eroded maneuver trails at the site. Heavy use of trails has degraded them and the trails are in need of repairs. Under this amendment, Potawatomi Resource Conservation and Development will grub, grade and resurface sections of the maneuver trails; install erosion control near stream crossings, ditch bottoms and critical slopes; and grade/stabilize with erosion mats critical areas in Training Areas 6 and 8 as needed due to training damage. Potawatomi Resource Conservation and Development is a 501(c)(3) not-for-profit organization with experience in conservation and restoration projects. The work is needed to prevent soil erosion and comply with the Soil Conservation Act of 1935.
Funding Source
100% Federal - National Guard Bureau Funds

Original Agreement	$60,000.00	Purpose of this agreement is to provide for repair of an eroded maneuver trail near a high quality wetland area to meet the standards of the natural resources conservation specifications. Approved Director's Agenda – 4/22/2011
Amendment No. 1	$37,000.00	Purpose of this amendment to the agreement is to provide additional erosion and sediment control activities for the repair of the maneuver trail near a high quality wetland area. Approved Director's Agenda – 8/12/2011
Amendment No. 2	$100,000.00	Purpose of this amendment to the agreement is to provide additional erosion and sediment control activities for the repair of eroded maneuver trails at the site.

Total Contract	**$442,750.00**	

GRANT OF EASEMENT

10. DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET (DTMB) FOR THE DEPARTMENT OF CORECTIONS, TOWNSHIP OF KINROSS, CHIPPEWA COUNTY, MI recommends that the State Administrative Board grant to Cloverland Electric Cooperative, whose address is 2916 West M-28, Dafter, MI 49783, a permanent non-exclusive easement for the purposes of electric power transmission utility construction, repair, maintenance and operation. Said easement is described as follows:

Section 1:

A 10.00 foot wide easement for the purposes of underground electric power utility construction, repair, maintenance and operation located in the Northeast 1/4 of Section 32, Township 45 North, Range 1 West, Kinross Township, Chippewa County, Michigan, more particularly described as commencing at the East 1/4 corner of said Section 32; thence N02°16'00"W along the East line of said Northeast 1/4 a distance of 112.95 feet to the POINT OF BEGINNING; thence lying 5.00 feet on both sides of the following described line with shortened and extended side lines to meet property lines:

thence S89°12'16"W a distance of 162.85 feet;
thence N54°12'13"W a distance of 172.16 feet;
thence N48°21'35"W a distance of 167.53 feet;
thence N25°59'12"W a distance of 440.68 feet;
thence S63°48'33"W a distance of 82.12 feet to the POINT OF ENDING, said point bears N45°40'53"W a distance of 976.87 feet from the East 1/4 corner of said Section 32.
Section 2:

A 30.00 foot wide easement for the purposes of above-ground electric power utility construction, repair, maintenance and operation located in the Northeast 1/4 of Section 32, Township 45 North, Range 1 West, Kinross Township, Chippewa County, Michigan, more particularly described as commencing at the East 1/4 corner of said Section 32 and considering the East line of said Northeast 1/4 as bearing N02°16'00"W;

APPROVED
July 14, 2015
Michigan State
Administrative Board

thence N45°40'53"W a distance of 976.87 feet to the POINT OF BEGINNING; thence lying 15.00 feet on both sides of the following described line with shortened and extended side lines to meet property lines:

thence N57°35'50"W a distance of 252.31 feet; thence S78°36'57"W a distance of 21.30 feet to a point on the West line of the East 900.00 feet of said Northeast 1/4, said point is the POINT OF ENDING and bears N48°54'33"W a distance of 1237.71 feet from the East 1/4 corner of said Section 32.

The easement (all sections) is subject to easements, conditions, reservations, exceptions and restrictions of record, if any.

The Attorney General's office has approved this easement agreement as to legal form.

Purpose:
The grant of this easement will allow the construction and operation of above and below ground electric power transmission infrastructures that will primarily serve nearby private property owners/developers.
Benefit:
Granting of this easement will allow the State to help facilitate economic development in the area while earning $1,850.20 in revenue for the General Fund in accordance with the Easement Fee Schedule adopted by the State Administrative Board on January 19, 2011. It is not deemed to be a hindrance or burden for the State to grant this easement and it does bring accessible electric power to State Property should the State ever need it there.
Funding Source:
Revenue from Grantee
Commitment:
This easement will be a permanent, non-exclusive easement subject to existing easements and restrictions of record, if any. If the easement remains unused for a continuous period of two years, it will revert to the Grantor.
Risk Assessment:
Failure to grant this easement will preclude the State from earning the easement revenue specified above for the General Fund.
Zip Code:
49788

CONTRACT CHANGE ORDER

11. DEPARTMENT OF LICENSING AND REGULATORY AFFAIRS, OKEMOS – CCO No. 6 for Lease No. 10469 approved by the State Administrative Board on April 15, 1997, between Van W. Martin and William G. Martin, and subsequently assigned to MWC Associates LLC, as Lessor, and the State of Michigan by the Department of Technology, Management and Budget for the Department of Licensing and Regulatory Affairs, as Lessee.

APPROVED
July 14, 2015
Michigan State
Administrative Board

This CCO provides for the building-out of client/attorney rooms and hearing rooms and will also provide new floor-to-ceiling walls and doors with a new key card access system, as requested by the Department of Licensing and Regulatory Affairs at a cost not-to-exceed $44,964.42. The space is located at 2501 Woodlake Circle, Okemos, MI 48864.

Purpose/Business Case:
The purpose of this CCO is to provide a floor-to-ceiling office, client/attorney rooms and hearing rooms including a new key card access system added to all doors.
Benefit:
This CCO allows the judges and staff to be secured behind locked doors within a safe working environment in case a hearing becomes disorderly.
Source of Funds:
48.7% Securities
48.6% Corporations Funding
2.7% General Funding
Commitment Level:
Present through July 31, 2017; however, this Lease contains an Executive Legislative cancellation with 180-days' notice.
Risk Assessment:
Non-approval of this CCO will hinder the Department from being in a safe, controlled environment in which to conduct business.
Zip Code:
48864

12. DEPARTMENT OF MICHIGAN STATE POLICE, FLINT - CCO No. 8 for Lease No. 10235 approved by the State Administrative Board on June 6, 1995, between Genesee County 911 Consortium, as Lessor, and the State of Michigan by the Department of Technology, Management and Budget for the Department of Michigan State Police, as Lessee. This CCO provides for conversion of the current garage into offices at the MSP Flint Post as requested by the Department of Michigan State Police at a cost not-to-exceed $32,769.00. The space is located at 4481 Corunna Road, Flint, MI 48532.

Purpose/Business Case:
The purpose of this CCO is to provide demolition and reconstruction of the current garage area into additional offices at the Michigan State Police Flint Post.
Benefit:
This CCO allows the offices to be expanded to provide long-term offices for the overcrowded conditions at this Post.
Source of Funds:
100% General Funds
Commitment Level:
Present through December 19, 2025; however, this Lease contains an Executive cancellation clause with 60-days' notice through December 19, 2015 and a Standard cancellation clause with 90-days' notice after December 20, 2015.

APPROVED
July 14, 2015
Michigan State
Administrative Board

Risk Assessment:
Non-approval of this CCO will hinder the Department from having adequate space for staff to perform their investigative work.
Zip Code:
48532

WR Ending July 10, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Reviewing inspection reports on demolition properties. Working on updating procedures. Investigating the IT standard for sizes of telecom closets; 8 x 10 is stated as the minimum size and this seems large for small leased offices of a couple thousand square feet.

Bob Adams:

New Projects:

MSP St. Ignace Cold Storage Design – Received work order. PPP meeting setup for 7/20.

DNR Spring Dam Demo – Held PPP, wrote project statement for ISID proposal from Ohm and distributed.

MDOC Baraga Fence B Security – Held PPP on site and processed an ISID assignment with Tower Pinkster.

MDOC MBP Circulating Pumps – Held PPP and processed an ISID assignment with Matrix Consulting.

MDOC MBP Generator Upgrade – Held PPP and processed an ISID assignment with Matrix Consulting.

Design:

DNR Mackinac Island SP Road Repairs – 50% phase 500 design meeting.

DNR Union Bay BAS – Held the 100% review meeting and posted project for bidding.

DNR Snail Shell Harbor – Provided draft project statement to DNR for comment.

Bidding:

DNR Mackinac Island SP Visitors Center Roof Upgrades – Conducted mandatory pre-bid meeting.

Scott DeKorte:

New Projects:

Riverside/Deerfield CF Storm Water Cross Connection - Conducted 90% design review meeting.

Huron Valley CF East Sally Port Security Upgrades – Conducted 90% design review meeting.

Lakeland CF Perimeter Security Upgrades – Conducted pre-bid meeting.

Construction Starts:

Thumb CF - Perimeter Security Upgrades – Conducted pre-con meeting.

Joel Gordon:

New Projects:

DNR Thompson State Fish Hatchery Raceway End Closures – Bids were received on 7/8. The letter of recommendation is forthcoming from the PSC.

DNR Hoffmaster SP Construct New Dune Stairs – Bids were received 7/8. The letter of recommendation is expected from the contractor this week.

DNR Stoney Creek Flooding Reconstruct Existing Dam – The pre-bid meeting was conducted at the project site. Bids are due 7/22.

DTMB Michigan Law Enforcement Officers Memorial – I attended the monthly MLEOM Commission meeting to review project status with the full Commission.

Construction Starts:

DNR Wolf Lake Fish Hatchery Erosion Control – A preconstruction meeting was conducted at the project site. On site work is expected to begin the week of 7/13.

Jerry Gregorski:
New Projects:
DNR Harrietta Fish Hatchery Wells #2 & 4 Generator Backups and VFD Controls – The pre-bid meeting was held on-site and the bids are due 7/15.

MDOC St. Louis CF Perimeter Fence Security System Upgrades – Held the PPP with the prospective ISID PSC to develop the scope of work for their ISID assignment proposal.

DMVA Grand Rapids Home for Veterans Kitchen Exhaust Replacement – Advertised for bids with the pre-bid meeting scheduled for 7/20 and the bids are due 7/29. This work will require a five day shutdown with around the clock work to minimize kitchen down time.

MDOC Woodland Center CF Perimeter Fence Security System Upgrades – The construction contract with Midstate Security was executed and the preconstruction kickoff meeting was setup for 7/22.

MDOC Gus Harrison CF Perimeter Security Enhancements – The construction contract with American Fence was executed and the pre-construction kickoff meeting was setup for 7/22.
Construction Starts:
DTMB Grand Tower AHU Replacement – Submitted a contract change order request to the 8/4 State Administration Board Agenda for upgrading VAV box controllers on each floor to integrate with perimeter heat zone controls, along with a new communications network to integrate the controllers with the building automation system. The base scope of work is currently targeted for substantial completion on 7/23. The change order will extend the additional work approximately three months past this date.

DMVA Grand Rapids Home for Veterans Backup Generators – Substantial completion is still delayed pending successful field repairs and additional testing of the powerhouse generators automatic transfer switch. The other two generator and transfer switch pairs have been commissioned and are in operation.

Jan Miller:
Annual leave.

Dave Sproul:
Annual leave.

Steve Urban:
Accomplishments:
DNR Porter Ranch Barn Re-roofing – Construction bids received on 7/8; only 1 bid submitted.

MDOC St. Louis Door Replacement Project – Construction bids received on 7/8; 2 bids submitted.

DTMB Mason Building Renovations – Final ORS move took place the weekend of 7/11.
New Projects:
Lake Superior Hosting Center, Electrical Upgrades – IT upper management has authorized DTMB to proceed with design phases 400 and 500.

Section Manager: Harold Belcher, Project Management B
Meeting with Financial Services regarding performance contracting fees.

Chris Bahjet
Nothing significant to report.

Tim Hall
New Projects:
DMVA Jackson Armory Maintenance Bay – Conducted 90%+ final design review with C2AE and DMVA, minor modifications will be implemented and release for bidding is expected within 2 weeks.

DTMB State Warehouse Facility Building 100 Renovation – Conducted preliminary estimating and programming reviews in preparation for team evaluations and preliminary budget/scope package for presentation to DTMB team.

Potential Issues/Solutions:

MDOC Women's HVCF ADA Walks & Paving – Contractor has struggled to meet the contract requirements for phasing and continuous access for the facility during initial weeks and has submitted several requests for additional compensation. Conducted review of requests with Nowak Fraus and Dave Woods to discuss prompt response; all of the issues were deemed clear contract requirements or very minor in nature.

Bruce Hassen

New Projects:

The DEQ staff is going through their files looking for idle projects that are not completed or formally closed. This resulted in their Southeast Michigan office (Warren) calling about the heating oil release at Camp Pontiac (Brownfield #101) and the Flint office sending a form letter to Tracy Clark at Real Estate essentially saying get back to work on the Flint School for the Deaf LUST Site (Brownfield #195). DTMB has no funding to do either (at least not for fiscal year 2015). More of these are expected from DEQ.

Construction Starts:

The demolition work at the Nokomis Challenge Center began on the morning of 7/6 after the local TV station conducted a photo-op for one of the local politicians who took a few ceremonial sledgehammer swings at the building.

Potential Issues/Solutions:

The funding available for the demolition of Highland Park High School is not adequate per DTMB – D&C. The idea put forward at last meeting is to get the bid package out and find out for sure. We are in agreement that the firm that did the environmental evaluation, and who has an ISID contract besides, would be the best choice to produce the bid package.

Chris Kulhanek

Nothing significant to report.

Matt Miles

Non-Project Related Activities:

I attended the DTMB New Supervisor Training administered by the DTMB HR.

Arranged interview appointments for the candidates who wish to fill the Land Surveyor 9, 10 and 11 position.

Rashmi Patel

Nothing significant to report.

Sadi Rayyan

Accomplishments:

DEQ Ott/Story/Cordova Superfund Site – Reviewed and recommended an award of construction contract to Quality Maintenance Contractors to paint/repair the components of the existing groundwater remediation system.

DEQ U.S. Aviex Superfund Site – Reviewed and recommended changes to the contract with Weston to provide vapor intrusion risk evaluation and technical support.

DEQ Utica Landfill Site – Reviewed and recommended an award of construction contract to E. T. MacKenzie to excavate, remove and dispose of soil/waste and restore the site.

DEQ Riverside Park-Parcels Site – Reviewed and recommended changes to the contract with Global Remediation Technologies to conduct pilot tests and install seven monitoring wells for soil/groundwater sampling to complete the contaminant boundry.

DMVA Fort Custer Training Center Site – Reviewed and recommended changes to the contract with DLZ for conducting archeology/bat/butterfly/wetland hydrology surveys as part of the EIS activities.

DEQ Cal's Car Care Site – Reviewed and recommended changes to the contract with AMEC to provide evaluation of vapor intrusion risks in off-site areas.

DEQ Logan's Gas & Deli Site – Reviewed and recommended changes to the contract with AECOM to conduct one year of quarterly monitoring and subsequently abandon the site monitoring wells.

DEQ Coe's Cleaner's Site – Reviewed and recommended changes to the contract with Weston to provide O&M contractor oversight, sampling, bulletin preparation and technical support.

New Projects:

DEQ Former Wickes TCE Plume Site – Assigned to AMEC Engineering under their ISID contract for expanded pressure transducer testing, semi-annual groundwater monitoring, well network expansion and technical support.

Construction Starts:

MDOC Oaks Correctional Facility Site – Field activities for elevated tank painting and repairs begin 7/6 with substantial completion by 8/31.

AWARD OF CONSTRUCTION CONTRACT

1. DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET, LANSING – Michigan Library and Historical Center – Restroom Upgrades
   File No. 071/13014.CAK - Index No. 44121 - Contract No. Y15337
   Recommended Contract Award: Laux Construction, Holt; $495,000.00

Description and Justification
The purpose of this contract is to renovate eight existing restrooms on the first floor of the Michigan Library and Historical Center. The existing plumbing fixtures use higher amounts of water to function, which causes capacity problems with existing sanitary sewer lines. Renovation work includes removal and replacement of all existing plumbing fixtures, toilet partitions, toilet accessories, tile flooring, counter tops, lighting, and modifications to gypsum board metal framed partitions.
Funding Source
47% Agency Operating Funds - BOC
53% Lump Sum Special Maintenance - GF

2. DEPARTMENT OF TECHNOLOGY, MANAGEMENT AND BUDGET, JACKSON – Jackson State Office Building – HVAC Renovations – Installation of Roof Top Units 1 and 2
   File No. 071/15103.JNS - Index No. 11814 - Contract No. Y15338
   Recommended Contract Award: Laux Construction, LLC, Holt; $532,700.00

Description and Justification
The purpose of this contract to provide HVAC renovations to the Jackson State Office Building including the installation of two new Roof Top Cooling Units purchased by the State of Michigan under a separate contract.
Funding Source
94% Lump Sum Special Maintenance - General Fund
6% Agency Operation Funds – General Fund

File No. 472/14343.SMD - Index No. 41670 - Contract No. Y15339
Recommended Contract Award: Robbert Construction, Inc., Lakeview; $707,000.00

Description and Justification
The purpose of this construction contract is to provide new security upgrades for the perimeter fencing and sally port areas. The new security upgrades will correct the existing deficiencies within the perimeter fencing.
Funding Source
100% Agency Operating Funds

4. DEPARTMENT OF CORRECTIONS, Jackson – Cooper Street Correctional Facility – Perimeter Security Upgrades
File No. 472/14363.SMD - Index No. 70110 - Contract No. Y15340
Recommended Contract Award: Midstate Security Company, LLC, Wyoming; $397,300.00

Description and Justification
The purpose of this construction contract is to provide new security upgrades for the perimeter fencing and sally port areas. The new security upgrades will correct the existing deficiencies within the perimeter fencing.
Funding Source
100% Agency Operating Funds

5. DEPARTMENT OF MILITARY AND VETERANS AFFAIRS, BATTLE CREEK
Fort Custer – Civil Support Team – Construct Vehicle Ready Bays
File No. 511/14114.TMH - Index No. 22000 - Contract No. Y15341
Recommended Contract Award: Frederick Construction, Inc., Vicksburg; $822,000.00

Description and Justification
The purpose of this contract is to provide construction services for a Vehicle Ready Bay addition to the Civil Support Team Building. The bays will provide workspace and storage required to maintain readiness and provide security/protection of the critical and valuable equipment the Civil Support Team utilizes as first responders to potential nuclear and biological events.
Funding Source
91% Federal Funds
9% State Funding

6. DEPARTMENT OF LICENSING AND REGULATORY AFFAIRS, KALAMAZOO – Bureau of Services to Blind Persons - Kalamazoo Training Center – Exterior Upgrades
File No. 641/14224.BDW- Index No. 36400 - Contract No. Y15342
Recommended Contract Award: To Be Determined (TBD), TBD; $TBD

Description and Justification

APPROVED
August 4, 2015
Michigan State
Administrative Board

The purpose of this contract is to provide parking lot seal coating, bituminous patching, grading and drainage work, concrete flatwork, supply and installation of textural indicator pavers and bollards, restoration seeding, and exterior ramp/retaining wall replacement. The work is necessary to provide access to the building that meets the Americans with Disabilities Act (ADA).

Funding Source

ADDENDUM TO LEASE FOR PRIVATE PROPERTY

22. DEPARTMENT OF HEALTH AND HUMAN SERVICES, TRAVERSE CITY - Addendum No. 5 to Lease No. 10301 approved by the State Administrative Board on December 5, 1995, between River Front Plaza, Inc., 8692 M-32 Highway, Elmira, MI, 49730, as Lessor, and the State of Michigan by the Department of Technology, Management & Budget for the Department of Human Services, subsequently named the Department of Health and Human Services, as Lessee, for 25,813 square feet of space located at 315 E. Front Street, Traverse City, MI 49684. This Addendum provides for the modification of the floor plan; however the square footage and rental rates remain the same. This Addendum is effective upon obtaining State Administrative Board approval and required signatures and continues to the termination date of the Lease, or any extension. The annual per square foot rental rate for this space, is $18.54 ($39,878.00 per month). This Lease contains two 5-year renewal options with a per square foot rental rate of $18.54 ($39,878.00 per month). This Lease contains an Executive cancellation clause with 60-days' notice until February 9, 2016. A Standard cancellation clause with 60-days' notice is effective February 9, 2016, if the renewal option is exercised. The Attorney General has approved this Addendum as to legal form.

Purpose/Business Case:
The purpose of this Addendum is to modify the floor plan due to a change to the space occupied by the Department.
Benefit:
The benefit of this Addendum will allow the Lessor to lease the adjacent space while still providing the required space to the Department.
Source of Funds:
100% Federal funds.
Commitment Level:
Eight months; however, this Lease contains an Executive cancellation with 60-days' notice.
Risk Assessment:
Non-approval of this Addendum will hinder the Lessor from being able to rent out the adjacent space.
Zip Code:
49684

23. DEPARTMENT OF STATE, St. Clair Shores - Addendum No. 1 to Lease No. 11111 approved by the State Administrative Board on April 19, 2005, between NGP/24000 HARPER, LLC, subsequently assigned to Danford Properties, LLC, 27172 Woodward Avenue, Suite 150, Royal Oak, MI, as Lessor, and the State of Michigan by the Department of Technology, Management & Budget for the Department of State, as Lessee, for 5,007 square feet of space located at 24040 Harper Avenue, St. Clair Shores, MI 48080. This Addendum provides for reducing the rental rate in the option period of July 1, 2015 through June 30,

Michigan State
Administrative Board

2020, updating the Civil Rights language, removing the reference to lease adjustments, updating the notifications language, and adding the EFT requirements to the Lease. This Addendum is effective upon obtaining State Administrative Board approval and required signatures and continues to the termination date of the June 30, 2020, or any extension. The annual per square foot rental rate for this space beginning July 1, 2015, is $27.25 ($11,370.06 per month). This Lease contains an additional 5-year renewal option with an annual per square foot rental rate of $31.00 ($12,934.75 per month). This Lease contains a Standard cancellation clause with 60-days' notice. The Attorney General has approved this Addendum as to legal form.

Purpose/Business Case:
The purpose of this Addendum is to decrease the rental rate in the renewal option that will begin on July 1, 2015, to add the EFT language to the Lease, update the Civil Rights language, and update the notifications language.
Benefit:
The Department will remain at their current location with a substantial savings over the next renewal period, allowing them to provide uninterrupted service to the citizens of St. Clair Shores.
Source of Funds:
26.3% General Fund; 73.7% Restricted Fund (TACF 60.4%; Auto Repair Facilities Fees 1.3%; Driver Fees 7.3%; Parking Ticket Court Fines 4.4%; Enhanced Driver License & personal ID 0.3%)
Commitment Level:
Five years; however, this Lease contains a Standard cancellation clause with 60-days' notice.
Risk Assessment:
Non-approval of this Addendum will hinder the Department from recognizing the negotiated lease savings, possibly forcing them to relocate at a higher overall cost.
Zip Code:
48080

CONVEYANCE OF SURPLUS STATE REAL PROPERTY

24. THE DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET (DTMB) recommends the conveyance of surplus state real property described below, located in Plymouth Township, Wayne County, Michigan (the "Property") to the Michigan Land Bank Fast Track Authority, for consideration of One Dollar ($1.00). The office of the Attorney General has approved the quitclaim deed and the affidavit of jurisdictional transfer of land, as to legal form.

Legislative Background
2014 Public Act 427 (the "Act") authorizes the State Administrative Board to convey the following property, located in the Township of Prairieville, County of Barry, Michigan, more particularly described as follows:
DESCRIPTION OF PROPERTY - WESTERN WAYNE CORRECTIONAL FACILITY
LAND DESCRIPTION

APPROVED
August 4, 2015
Michigan State
Administrative Board

A parcel of land in the N ½ of section 20, T1S, R8E Plymouth Township, Wayne County, Michigan, more particularly described as beginning at the NW corner of said section 20; thence N89°50'10"E 2650.86 feet on the north line of said section to the N ¼ corner of said section; thence continuing on said north line S89°45'02"E 1319.14 feet; thence S01°03'21"W 2532.18 feet to the northerly right of way of the Chesapeake and Ohio Railroad; thence along said northerly right of way for the following four (4) courses:

1) 116.58 feet on a curve to the right with a radius of 2596.27 feet, a central angle of 02°34'22" and a long chord bearing and distance of N56°44'27"W 116.57 feet
2) N55°27'04"W 1052.13 feet
3) 672.28 feet on a curve to the left with a radius of 3889.51 feet, a central angle of 09°54'12" and a long chord bearing and distance of N60°24'17"W 671.45 feet
4) N65°21'16"W 2614.21 feet to the west line of said section 20;

thence N00°05'01"E 447.57 feet on said west line to the point of beginning, containing 127.27 acres, more or less.

EXCEPT a parcel of land described as commencing at the N ¼ corner of said section 20; thence S89°45'02"E 1119.14 feet on the north line of said section to the point of beginning of this description; thence continuing on said north line S89°45'02"E 50.00 feet; thence S01°03'21"W 225.00 feet; thence S89°45'02"E 150.00 feet to the east line of a parcel recorded at Liber 22436, Page 520; thence S01°03'21"W 200.00 feet on said east line; thence N89°45'02"W 200.00 feet; thence N01°03'21"E 425.00 feet to the point of beginning, containing 1.18 acres, more or less.

Subject to a 60 foot wide easement adjacent and parallel to the west and north section lines for roadway purposes.

The property description is approximate and is subject to adjustment as the State Administrative Board or Attorney General considers necessary by survey or other legal description.

Purpose/Business Case

The conveyance satisfies the criteria set forth in P.A. 427. That Act authorizes the conveyance of vacant property that has been declared surplus. The Property is not being utilized and the recommended conveyance will allow the Michigan Land Bank Fast Track Authority to return the Property to productive use.

Benefit

The approval of this recommendation releases vacant surplus property into full utilization and relieves the State of further ownership responsibilities.

Funding Source

The net revenue received from the sale of the Property must be distributed as follows: 100% General Fund.

Risk Assessment

Failure to approve this conveyance would result in the property not being placed back into productive reuse, with loss of potential tax revenue to the local community and ongoing financial responsibility to the State.

APPROVED
August 4, 2015
Michigan State
Administrative Board

CONTRACT CHANGE ORDER

25. DEPARTMENT OF EDUCATION, FLINT - CCO No. 6 for Lease No. 11530 approved by the State Administrative Board on May 3, 2011, between Lurvey White Ventures 1, LLC, as Lessor, and the State of Michigan by the Department of Technology, Management and Budget for the Department of Education, as Lessee. This CCO provides for a new playground and new playground equipment expenditures, as requested by the Department of Education at a cost not-to-exceed $208,751.40. The space is located at the Michigan School for the Deaf Campus, Flint, Michigan 48502

Purpose/Business Case:
The purpose of this CCO is to provide a new playground and new playground equipment for outdoor activities for the Michigan School for the Deaf (MSD) school children.
Benefit:
This CCO allows the Department to provide equipment for the students who occupy the school during the week.
Source of Funds:
100% Federal Funds
Commitment Level:
Present through June 30, 2032; however, this Lease contains a Legislative cancellation clause with 90-days' notice.
Risk Assessment:
Non-approval of this CCO will hinder the Department from obtaining the necessary equipment to meet the needs of its students.
Zip Code:
48502

WR Ending July 24, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Met with MSP and RED on proposed St. Ignace MSP Storage Building; the building would be on Bridge Authority Land and can be done as part of the MSP lease with the Bridge Authority. Meeting with staff for IPMs and workload reviews. Debriefed prospective ISID PSC. Met with AGs on MICHSPEC revision.

Bob Adams:

New Projects:

MDOC Baraga Max Roof Coating – Received MOP and conducted PPP.

MDOC Marquette CF Fence Upgrades – Reviewed contract status - Matrix and Commtech.

Design:

MDOC Kinross CF Housing Unit K Roof Improvements – Participated in phase 500 90% design meeting.

DNR Mackinac Island SP Road Repairs – Reviewed phase 500 100% design documents.

DNR Hancock to Calumet Rail Trail Lake Linden Washout – Received contract modification draft and forwarded to DNR for review.

Bidding:

MSP Calumet Roof Replacement – Received bids and directed PSC to conduct interview.

Construction:

DNR Pigeon River Footbridge Stabilization and Stream Bank Restoration – Participated in a meeting to review a request for equitable adjustment regarding helical pier work.

DNR Union Bay Toilet/Shower – Conducted progress meeting at site.

Projects Complete:

DNR Eagle Harbor Boathouse Roof – Final inspection.

MSP Negaunee Roof – Processed final contract modification to PSC.

Scott DeKorte:

Construction Starts:

DOE Camp Tuhsmeheta Miscellaneous Repair Projects – Conducted pre-construction meeting.

Joel Gordon:

Nothing significant to report.

Jerry Gregorski:

New Projects:

DNR Campground Electrical System Study Statewide at Eight Locations – A request for proposals for professional services was posted on Buy4Michigan. The pre-proposal meeting will be held at Petoskey State Park on 8/3 and the proposals are due 8/12.

DMVA Grand Rapids Home for Veterans Kitchen Exhaust Replacement – The pre-bid meeting and site walk-through was attended by only a single prospective bidder. The bidder is a well-qualified reputable mechanical contractor and so a single bid may be acceptable if the pricing is reasonable. The bids are due 7/29 and this work will require a five day shutdown with around the clock work to minimize kitchen down time.

MDOC Personal Emergency Location Systems Phase-2 at Six Locations – Contract awards to Master Electric were approved by the Ad Bd for both the Chippewa site and the combined Brooks & Central Michigan sites. Plans are underway to re-package and re-bid the Cooper Street, Parnall, and Gus Harrison sites individually with a staggered release schedule to increase bidder response.

DNR Petoskey SP Trail Development – All five bids for the phase-1a trail development were significantly above the funded amount. The PSC has provided cost estimates for construction of the full phase-1 trail,

both phase-1a and 1b, for requesting additional FY16 funding. Plans are to re-bid the entire phase-1 during the fall/winter with construction scheduled for spring and/or fall 2016. It is hoped that the better bidding schedule and economy of scale of the full phase-1 will improve the bid results.

Construction Starts:

MDOC Gus Harrison CF Perimeter Security Enhancements – Held the pre-construction meeting with American Fence. The 120 day contract time was started with substantial completion set for 9/18. MDOC is currently evaluating a technology upgrade to change the replacement shaker box cable perimeter security system to the new SenStar Flex-Zone system. If this decision comes within the next two to three weeks the project schedule should not be impacted.

MDOC Woodland Center CF Perimeter Fence Security System Upgrades – Held the pre-construction meeting with Midstate Security. The 120 day contract time was started with substantial completion set for 11/18. MDOC is currently evaluating a technology upgrade to change the replacement shaker box cable perimeter security system to the new SenStar Flex-Zone system. If this decision comes within the next two to three weeks the project schedule should not be impacted.

DTMB Grand Tower AHU Replacement – The contractor was not quite ready for substantial completion at the regular project meeting this week. A punch-list walk-through and substantial completion meeting for the base scope of work was scheduled for 7/31. The added VAV controller and communication network will not begin until after approval of the contract change order on the 8/4 Ad Bd Agenda.

DMVA Grand Rapids Home for Veterans Networked Door Access Control and Video Surveillance System – Substantial completion has again been delayed until 8/20. Internally creating and distributing the photo ID door access cards to all facility staff has been a bottle neck. The final door access control tie-ins cannot be made until all staff have been issued their door access cards.

Jan Miller:

Accomplishments:

Flint State Office Building, Interior Renovations – Received an updated schedule from B&B showing the 6th floor completion date of 9/1, as agreed upon. We'll have to closely monitor progress relative to the schedule in order to meet the critical deadline set by DHHS.

DNR Dodge #4 SP Boat Access Site and Park Improvements – The contractor, Blue Spader, has completed 2 of the 4 phases of the project on schedule. Phase 3 is underway without issue.

DNR Island Lake Recreation Area Connector Trail – Held the pre-proposal meeting 7/20, 13 professional firms attended. Proposals are due 7/30.

Dave Sproul:

Accomplishments:

Capital Area Reconfiguration, State Police – The Christman Company has completed their initial take-offs and released the construction estimate of $7.2M total to move MSP into the GOB. This initial construction estimate includes the base building scope with the proposed fitness and locker room estimated at $1.4M. Overall professional fees, furniture and IT costs are being assembled as well.

MDOC, Michigan Reformatory Power Plant, Water Softeners and DeAlkalizer System Replacement – All construction activities have been completed and we are scheduling some additional onsite training and inspections by the water treatment manufacture.

MSP/DMVA SEOC – Exterior construction continues with better weather conditions and the roof panels are scheduled to begin installation the last week of July. The site has very little standing water remaining. DMVA has completed the award of the final secure modules and they are now in the manufacturing stage; however, the delivery schedule for the secure units is now projected for next March, 2016. We are working to have the SEOC substantially complete by the end of December.

DCH, State Laboratory, New Waste Incinerator – The contractor is tentatively scheduled to begin installation of the new incinerator the week of 8/17. Complete installation shall be provided within 45 days.

Wayne State University, Multidisciplinary Biomedical Research Building – We have received from WSU the Certificate of Tenantability for the project.

MDOC, Ionia Energy Project – ESG is incorporating comments and revisions to construct a new separate heating building to serve MTU. This design is being incorporated within the bidding documents and we are working to have the final construction bid package ready for release within August. The water and electrical construction activities have begun with the pre-construction meetings as well.

Potential Issues/Solutions:

MDOC, Thumb Correctional Facility, Water & Sewer System Improvements – Conducted the pre-construction meeting for this project. However, DTE has now indicated they will not provide a new primary power feed as originally planned. We are working with DTE to develop a new plan that will result in a bulletin and change order to our contractor.

Steve Urban:

New Projects:

DNR Shiawassee State Game Area Bridge – DNR management would like to pursue the design and construction of a pre-engineered/pre-fabricated pedestrian bridge in lieu of a more robust vehicular bridge to save cost. I instructed the professional (Williams & Works) to provide a preliminary construction cost estimate.

Potential Issues/Solutions:

DNR Porter Ranch Barn Re-roofing – The only construction bid submitted exceeded the MOP amount. Waiting for DNR to provide additional funding before proceeding with the contract approval process.

Section Manager: Harold Belcher, Project Management B

Surveying position interviews; review Bruce Watkins project status preparatory to his going on annual leave; DCD Financial Report meeting.

Chris Bahjet

Nothing significant to report.

Tim Hall

Nothing significant to report.

Bruce Hassen

Nothing significant to report.

Chris Kulhanek

Accomplishments

Au Sable River Foot Bridge Replacement – Pre-design meeting held on 7/22. Design is finally underway after long delays that resulted from revising work scope to fit limited budget. Contract was executed before grant funds expired.

Potential Issues/Solutions:

Alma Armory Modifications – DMVA sent letter to contractor warning of liquidated damages due to incomplete project.

Solution – By working with DMVA, the PSC and the contractor, it appears an agreement is in place to waive damages if the contractor completes punch list and change order work as expected.

Matt Miles

Nothing significant to report.

Rashmi Patel

Accomplishments:

E.C. Brooks, Correctional Facility - Video Management System – Attended mandatory walk-through meeting at the site with contractors.

West Shoreline Correctional Facility - Video Management System – Attended mandatory walk-through meeting at the site with contractors.

Parnall Correctional Facility - Food Service Building Roof Replacement - Received bids, recommended low bidder.

Ionia Correctional Facility - Food Service Building Roof Replacement - Received recommendation letter and recommended 2nd bidder per PSC best value evaluation.

Sadi Rayyan

Accomplishments:

DNR Otsego Township Dam Project – Received 7 SOQs to construct water control structure and stabilize the existing spillway.

DNR Lead Reclamation at Shooting Ranges – Received an estimate from the PSC to implement lead recovery at the Pontiac Lake & Sharonville Shooting Ranges. Discussed options and available funding with agency.

DEQ Commercial Steel Industrial Area Site – Reviewed and recommended changes to the contract with Nova Consultants to provide 1 year of O&M services of the existing groundwater treatment system.

DEQ Marshall Iron & Metal Site – Reviewed revised specifications for monitoring well abandonment and excavation, transportation, and disposal of waste oil and impacted soils for posting on Buy4Michigan website.

DMVA Fort Custer Training Center Site – Reviewed and recommended changes to the contract with DLZ for soil/sediment/surface water/groundwater sampling activities associated with the wetlands.

New Projects:

DEQ Kihn's Superette Site – Assigned to Sagasser & Associates under their ISID contract to provide environmental investigation, conduct environmental risk assessment/contamination pathway evaluation and reporting.

DEQ Van Stolen Shell Site – Assigned to Sagasser & Associates under their ISID contract to provide focused feasibility study, bid specifications for interim response, construction oversight and reporting.

Construction Starts:

DEQ Spartan Chemical Site – Field activities for contamination source removal and AS/SVE system installation begin 7/21/15 with substantial completion by 2/24/17.

Potential Issues/Solutions:

DOE Flint School for the Deaf & Blind Site – DEQ sent RED a letter requesting that DTMB must comply with the environmental regulations with regard to a confirmed release from the USTs. The site was sold "As Is" back in 2011 and it appears that the release was confirmed/reported to DEQ in 2014. RED is waiting for a legal advice from the attorney general about the purchase agreement & liability issue. DEQ agreed to meet with us to discuss our options after we hear back from the AG.

Non-Project Related Activities:

Attended "Presenting 5 Critical Roofing Performance Considerations" Webinar.

Jud Sorensen

Sick leave.

Terry O'Brien

Accomplishments:

SESC authorization for DNR Ionia State Rec Area. Surveys at U of M Dearborn and Gaylord.

Bruce Watkins

Nothing significant to report.

Section Manager: Dennis Stamm, Project Supervision

Nothing significant to report.

Section Manager: Pat Mullen, Contract Services

Nothing significant to report.

WR Ending July 31, 2015

Section Manager: Irene Henry, Project Management Section 'A'

Starting to prepare IPMs in HRMN. Working on the IT telecom closet/infrastructure design/construction standard. Prepared and issued a bid set for demolitions of four residences for the Land Bank. Reviewing proposals for Belle Isle Historic Buildings Evaluations. Attended a design workshop for the new FBSA office space.

Bob Adams:

Design:

DNR Hancock to Calumet Rail Trail – Processed PSC mod #5 for additional DNR requested design services to address a washout at Hammel Creek.

DNR Spring Dam Removal – Requested approval from DNR for the OHM ISID proposal.

Bidding:

DNR Mackinac Island SP Visitors Center and British Landing Roof Improvements – Conducted Best Value Evaluation of bids.

Construction:

MDOC Alger CF Roof Restoration – Submitted CCO justification for SAB Agenda approval.

Palms Book SP Toilet Building Replacement – Submitted CCO justification for Director's Agenda approval.

DMVA Jacobetti Boiler Replacement – Processing CCO #1.

MDOT Ironwood Welcome Center - Processing CCO #1.

Projects Complete:

DNR Eagle Harbor Boathouse – Conducted final inspection to verify punch list is complete.

Potential Issues/Solutions:

DNR must close accounting for Detour State Harbor; however, the PSC has not invoiced in approximately 4 years and is unresponsive. Will research and prepare a settlement invoice in order to close out this project, retrieve the contractor's markup as-builts, and close the project.

Scott DeKorte:

Nothing significant to report.

Joel Gordon:

New Projects:

DNR Marquette State Fish Hatchery Raceway End Closure – The pre-bid meeting was conducted on site on 7/27. Bids are due 8/5.

DNR Foch Lake Flooding Reconstruct Existing Dam and Outlet Structure – The pre-bid meeting was conducted on site on 7/28. Bids are due 8/5.

Jerry Gregorski:

New Projects:

DMVA/Grand Rapids Home for Veterans Kitchen Exhaust Replacement – Only a single bid was received for this work. Unfortunately the bid price was much higher than expected and the bidder was unable to meet the five day shutdown requirement, proposing a fifteen day window instead. A meeting with the PSC and bidder is scheduled for 8/4 at the facility to discuss recommendations for reducing the price and shutdown window.

MDOC Pugsley Correctional Facility Waste Water Treatment Plant Engineering Study – Additional funding was added to the project to cover the full scope of the proposed engineering study. An ISID assignment for Gosling-Czubak to perform the study was approved on the DCD Directors Agenda.

DNR Harrietta Fish Hatchery Wells #2&4 Generator Backups and VFD Controls – The construction contract award recommendation for the low bidder, Top Line Electric from Traverse City, was approved on the DCD Directors Agenda.

Construction Starts:

MDOC Personal Emergency Location Systems Phase-2 at Six Locations – A PSC contract modification request was submitted to the 8/18 Ad Board Agenda. This modification will add design and construction administration for another seven facilities to the overall project. The Cooper Street Facility will be posted for re-bidding individually next week with Gus Harrison and Parnall to follow with one being released each month.

DTMB Grand Tower AHU Replacement – The punch-list walk-through and substantial completion meeting for the base scope of work was held on-site. The added VAV controller and communication network work will begin after approval of the contract change order on the 8/4 Ad Board Agenda. Design work for phase two, for full replacement of all VAV boxes and the heating hot water distribution system, is underway.

Jan Miller:

Accomplishments:

DTMB FBSA Relocation to the LTA – Attended the design workshop 7/31 that was facilitated by Karen DeShon.

DNR Island Lake Recreation Area Connector Trail – Received 8 proposals. Evaluation committee is scheduled to meet 8/12 to select a professional.

Potential Issues/Solutions:

Flint State Office Building, Interior Renovations – The 6th floor construction is progressing somewhat per the critical schedule; however, the contractor stated that little has progressed in the lobby due to lack of manpower. Alternate options are being discussed internally.

DNR Maybury State Park Trail Improvements – Held substantial completion meeting 8/31; however, at the meeting it was determined that the contractor was not substantially complete. The contractor was again notified that liquidated damages continue to be assessed, which began 6/29 at $500/day.

Dave Sproul:

Carp River Bridge Go To Meeting; HAL.

Chris Bahjet

Nothing significant to report.

Tim Hall

Nothing significant to report.

Bruce Hassen

Potential Issues/Solutions:

At the Nokomis Center demolition site, a bulletin was issued to enable the completion of the demolition of one part of the building having vermiculite inside of block walls. This will enable the contractor to keep working while funding is arranged to cover the vermiculite inside the gymnasium block walls.

The recent recommendation by USEPA that vermiculite insulation be treated as asbestos-containing material, no matter what lab results indicate, will cost the state an extra $26.4K in demolition costs at the Nokomis site and twice to five times that at the Camp Cusino Site.

Chris Kulhanek

Construction Starts:

Camp Grayling – Light Demo Range – Pre-con meeting held on 7/27. DMVA has completed access road so project can move ahead.

Bolles Harbor – BAS Re-Paving – Pre-con meeting held on 7/31. It was decided in the meeting that it would be best to close the park during the construction of the drive due to the tight working area and to avoid liability issues with the public trying to pass through the construction area.

Matt Miles

Nothing significant to report.

Rashmi Patel

Nothing significant to report.

Sadi Rayyan

Accomplishments:

DNR Otsego Township Dam Project – Bid specs to construct water control structure and stabilize the existing spillway distributed to 4 preselected contractors. Walk-through conducted at the site. Bids are due on 8/12.

DEQ Memphis Shell Site – Reviewed and recommended changes to the contract with Environmental Resources Group to conduct two pilot tests and six quarterly groundwater monitoring.

DEQ Clare's Country Corners Site – Reviewed and recommended an award of construction contract to Ripman Construction Company to demolish the existing on-site building, remove/dispose of contaminated soils and restore the site.

New Projects:

DEQ Former MDOC Optical Property Site – Assigned to Hamp, Mathews & Associates under their ISID contract to conduct environmental investigation/vapor intrusion and reporting.

DEQ 216 Millbrook Site – Assigned to compliance under their ISID contract to remove and dispose of the two USTs, abate contaminated soil and restore the site.

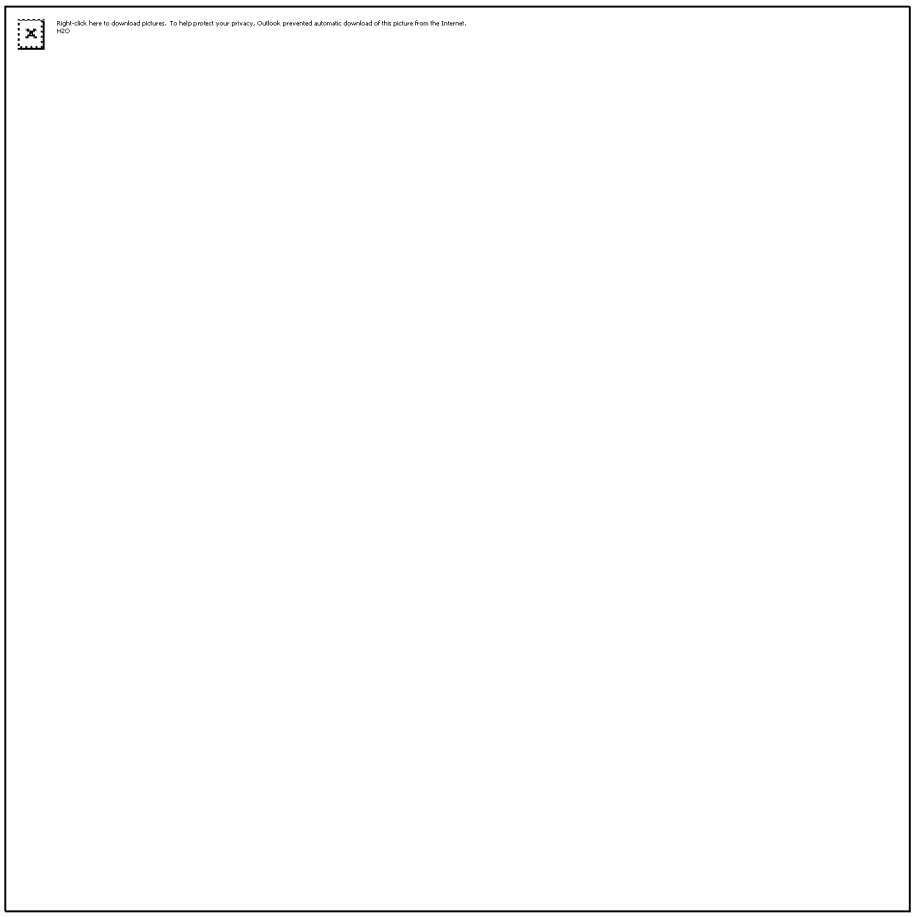
From: Dept. Technology, Management & Budget <dtmb@govsubscriptions.michigan.gov>
Sent: Tuesday, January 26, 2016 8:39 AM
To: Lach, Adam (DTMB)
Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.



Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community.Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. Administrative Policy 200.37 establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

Sorting/scanning drawings. HR matters for selecting and acquiring new Owner's Field Representative.

Bob Adams:
New Projects:
DNR Mclain SP Master Plan – Review 3 PSC proposals, create evaluation spreadsheet and distribute to DNR. Held evaluation meeting with project team.
Design:
DNR Fayette SP Toilet and Shower Building Shower – Met to review DEQ permit application.

DNR Craig Lake Culvert – Held 50% review meeting.

MDOC Baraga Max Roof – Received PSC Mod Request to revise roof coating process to new membrane roofing; forwarded this to MDOC for approval and revised MOP status. Sent to Logan for processing PSC Mod #2.

DNR Porkies Chalet Roof – Held conference call to review PSC structural evaluation.
Bidding:
MDOC Baraga Maximum New Classroom – Received construction bids within budget. PSC performed bidder interviews. Sent to Logan for processing construction contract.
Construction:
DMVA – Jacobetti Remodel – Forwarded LARA fire safety inspection report to PSC and contractor for resolution of issues.

Scott DeKorte:
DNR – Belle Isle Aquarium / Conservatory Heating Systems – Kickoff meeting with project team members to discuss phase 2 requirements.

DNR – Belle Isle Casino Fire Suppression Replacement – Met with PSC to discuss their initial proposal prior to awarding an ISID contract.

DNR – Belle Isle Various Additional Projects – Reviewed several future projects with DNR and how they might be combined into a larger more encompassing project.

Joel Gordon:
Nothing significant to report.

Jerry Gregorski:
New Projects:
DMVA / Grand Rapids Home for Veterans – Backflow Preventers on Two Municipal Water Mains – The construction bid advertisement was posted with the pre-bid site meeting scheduled for 2/4 and bids due 2/17.

MDOC – St. Louis Correctional Facility - Perimeter Fence Security System Upgrades –The contract award recommendation was approved by the Ad Board.

DTMB/BOD – Grand Tower AHU Replacement – The construction bid advertisement for the second phase replacement of all VAV boxes and hot water heating system improvements was posted with the pre-bid meeting scheduled for 2/4 and bids due 2/17.

MDOC – Special Alternative Incarceration Facility - Perimeter Fence Security System Upgrades – The 90% design review meeting was held with the project team. The construction bid advertisement will be posted by 2/4 with bids due 3/2.

MDOC – Detroit Re-Entry Center - Perimeter Fence Security System Upgrades – The 90% design review meeting was held with the project team. The construction bid advertisement will be posted by 2/11 with bids due 3/9.

MDOC / Gus Harrison Correctional Facility – Asphalt Reconstruction – Bids were received from five contractors. The low bidder is well within budget and none of the deductive bid alternates need to be accepted.

MDOC – Gus Harrison Correctional Facility - Perimeter Security Enhancements – Bids were received from three contactors for second phase security system upgrades. The apparent low bidder is within budget after accepting the two deductive bid alternates.

Construction Starts:

MDOC – Personal Emergency Location Systems Phase-2 & 3 at Multiple Locations – Fiber-optic conduits underground work at the Central Michigan site is encountering issues with frozen excavation spoils causing safety and security issues in the yard. The construction contract award recommendation for the Parnall site was approved by the Ad Board. Construction bid advertisements were posted for the Muskegon and West Shoreline facilities. Pre-bid site meetings will be held 2/8 with bids due 2/17.

Jan Miller:

Accomplishments:

Flint State Office Building, Re-Roofing, Ice Storage and Solar Panel Installation – Held pre-construction meeting 2/28 with WTA, DTMB and Blue Spader Contractors, Inc.

Flint State Office Building, Interior Renovations –The lobby completion date has been moved back from 3/11 to 4/5. Working with B&B to try and get a majority of the lobby earlier if it's only the metal panels holding up the schedule.

Tom Pawlowski:

New Projects:

MDOC Alger CF Asphalt Maintenance and Repair – Finalized project statement and forwarded to ISID professional for proposal development.

MDOC Alger CF Housing Unit Heating Boiler Replacement – Finalized project statement and forwarded to ISID professional for proposal development.

DNR Prout Road Bridge Replacement – Finalized project statement and forwarded to ISID professional for proposal development.

Bidding:

DNR Mackinac Island Visitor Center Roof Improvements – Assisted agency with completion of bid documents and posting on Buy4Michigan.

Construction:

DNR Fayette Historic State Park Floating Dock Replacement – Assisted contractor with project budget submittal for Design Build Contract.

MSP Sault Ste. Marie Post HVAC Upgrades – Assisted MSP by providing asbestos abatement scope to the SOM-contracted abatement contractor and scheduled pre-bid walk-through.

Dave Sproul:

Nothing significant to report.

Steve Urban:

Accomplishments

MDOC Saginaw Paving Project – Mandatory pre-bid meeting was conducted with Design Professionals on 01/27/16. Representative from 8 engineering companies participated. RFP is due 02/11/16. .

Potential Issues/Solutions:
DTMB Scenario 3 Renovation, Lake Superior Hosting Center 208v to 480v Upgrades – Pre-award meeting with Moore-Trosper was conducted on 1/28. Representative from the LSHC project team were satisfied with Moore-Trosper being awarded the construction contract. I received the recommendation letter from Engineering Applications. The approval of project funding by IT upper management is still an open issue.

Section Manager: Harold Belcher, Project Management B
DCD Quarterly Financial Meeting.

Chris Bahjet
Accomplishments:
DHHS – Walter Reuther Hospital – Activity Building – We are benefiting now from prior planning to switch the hospital phone system to the new system. Now the added phones and computers at the new Activity Building will simply be added to the new system. This planning started in November 2013 at a time when there was no active physical plant manager at the hospital.
Projects Complete:
DNR – Belle Isle – Bathymetry Study Lake Okanoke – Received and discussed final report from the PSC. The report was helpful to show variance in lake depths and location of fallen tree trunks at the bottom of the lake. The results of this study will help in future lake recreation plans.

Tim Hall
Accomplishments:
DTMB State Warehouse Building 100 FBSA Renovation – Achieved FBSA team review of final finish/color palette; conducted final door hardware and security coordination with DTMB OIP with construction and design team; conducted successful review to kick off final stage of logistical adjustments of buildings 600/100 and overall campus flow due to FBSA operation coming into complex as part of CAR.

DCH Center for Forensic Psychiatry Patient Shower & Bathroom Repairs – Project team reached final acceptance of phase 1 and owner will be moving patients between wings next week; construction of phase 2 expected to start week of 2/8.

DNR Yankee Springs Shop/Garage Replacement – Received all final closeout documents and coordinated for delivery to DNR team and final project closeout and records archiving.

MDOT Blue Water Bridge HVAC Replacement – Conducted 6 month warranty review meeting with contractor and agency operations team to review operations to date, maintenance procedures and requirements, etc. Very beneficial training and best practices review for BWB user team to improve their O&M processes, particularly with several newer staff since the project completed. Toll booth HVAC operations have encountered numerous different concerns and Design/Build contractor will perform additional engineering evaluation and recommend actions.

Bruce Hassen
Nothing significant to report.

Chris Kulhanek
Accomplishments:
Washtenaw Armory – Boiler Replacement – Pre-bid meeting held on 1/25. Project is on track to be completed after the current heating season is over.
New Projects:
Camp Grayling – Modify Control Tower Systems – Project involves improvements to electronic and infrastructure systems as well as providing a back-up generator for the recently completed control tower. Improvements must be completed before the old tower can be demolished.

Matt Miles
Nothing significant to report.

Rashmi Patel
Nothing significant to report.

Sadi Rayyan
Accomplishments:
DEQ Osceola Refinery Site – Reviewed and recommended award of construction contract to Clean Harbors to decommission/remove the SVE/AS remediation system and wells.

DNR Otsego Dam Repairs Site – Contractor removed powerhouse and installed spillway boulders.

DEQ Manistique River Site – Met with agency and PSC to discuss issues with draft design and schedule.

DNR Au Gres State Harbor Site - Reviewed and recommended changes to the contract with Superior to install/sample soil borings/monitoring wells and submit to DEQ an initial assessment report.

DEQ Ralph Herman Farm Site - Reviewed and recommended changes to the contract with Mannik & Smith to provide additional sampling and construction oversight services.
Non-Project Related Activities:
ISID Contracts for Expanded Triage Services – Recommended that contracts be awarded to 5 firms.

ISID Contracts for Lab Services – Proposals review and scoring.

Jud Sorensen
Potential Issues/Solutions:
A kickoff meeting was held at the MDOC Jackson Complex with Facility Wardens, Physical Plant Managers and NORESCO on 1/29 to introduce the facilities being impacted to the proposed work scope and project schedule. NORESCO is very anxious to get started being ready to walk contractors through the facilities for solicitation of bids, but at this point they have not provided any documents for DTMB or Agency review. Another meeting is scheduled with the facilities and NORESCO on 2/10 to coordinate work activities and review lighting and water design bid packages.

A meeting was held with the Detroit Water and Sewer Department in an attempt to get a better understanding of charges being assessed to the MDOC Detroit Detention and Detroit Reentry Centers. Unfortunately, little new information was provided. They indicate that when the facilities were first constructed in the late 1980's that any charges for storm water discharge to the Detroit Combined Sewer System was included in the bill for domestic water and sanitary sewer charges. Storm water discharge was apparently separated from this bill in 2003. The Detroit Water and Sewer Department apparently then failed to bill a number of their customers for storm water until 2013. At that time, the assessment of storm water charges to the Detroit Detention and Detroit Reentry Centers was re-established and MDOC started receiving bills for storm water discharge at approximately $19,000 per month. MDOC is in disagreement with these monthly bills and nothing has been paid with Detroit Water and Sewer indicating that charges have now accumulated to approximately $600,000. There are apparently no good records of any agreements that the State of Michigan may have made with the City of Detroit when the decision was made to construct the Detroit Correctional Facilities on old contaminated Chrysler Property that was otherwise unbuildable without a considerable cost for environmental cleanup. This is unlikely to get resolved until MDOC is provided detailed information on how billing rates are determined, agrees that the rates are reasonable, and the City of Detroit Assessors office and the Detroit Water and Sewer Departments correct property descriptions to better represent that property actually owned by the State of Michigan. Currently, the Detroit Water and Sewer Department appears to be making no reduction in rates for three detention basins at the facilities which are designed to reduce peak discharge rates.

Terry O'Brien
Accomplishments:
SESC plan and spec review for DNR Burt Lake SP and DNR Wilderness SP.

Bruce Watkins
Nothing significant to report.

Section Manager: Dennis Stamm, Project Supervision
Nothing significant to report.

Section Manager: Pat Mullen, Contract Services
Nothing significant to report.

Subject: Staff Meeting Notes 2-8-16
Attachments: Staff Meeting Notes 2016-2-8.doc; Flint Emergency Purchasing Procedures.pdf

FYI.....

Design & Construction Division

Staff Meeting Notes – February 8, 2016

Facilitator-Pat Mullen

1. **New Projects List:**
   Posted by the copier & on the Intranet SharePoint
   - **Master List of Projects Intranet Link:**
     This is the pdf on SharePoint 2-8-16.pdf

2. **Flint Emergency Procurement:** (e-mail attached)
   This doesn't apply to anything we are doing, but they want all staff to be aware. Anything purchased through the state has to be approved from the SEOC.

3. **"Contract Info:" in HAL – Include Base & Revised contract amount**
   In order to see the base and revised contract amount on the contract order, must be entered in the upper right corner of HAL. When doing the contract order, if you need help, talk with Logan.

   - **Agenda Justification:**
     Reminder: Pat indicated that we don't have to be as specific for Bob Hall's agenda, but we need more detail of the what/why we are doing for the Director and Ad Board agendas.

4. **Year-End Payments:**
   DNR Financial Services is asking that contract payments that end on September 30 be sent to them by October 10. This is for the work that is being billed in the fiscal year. This is the same thing being done by Kris.

5. The LTA move is on schedule, move expectancy is the end of April, 2016.

6. Scoreboard Metrics – PPP meetings & contractor evaluations: PPP meetings are from 80% to 75% & contractor evaluations are from 71% to 83%.

7. **Bob's Time:**
   - The SEOC is in their space and now using it; they are operational with the Flint situation.
   - Jim Clark from Real Estate is retiring March 11, 2016.

The next staff meeting is on February 22 with Dennis Stamm as facilitator.
See Dennis if you have topics for a discussion or presentation.

If you cannot attend the meeting in person, you can call in and participate:
Call 1-888-363-4735 and enter the access code 1455994.

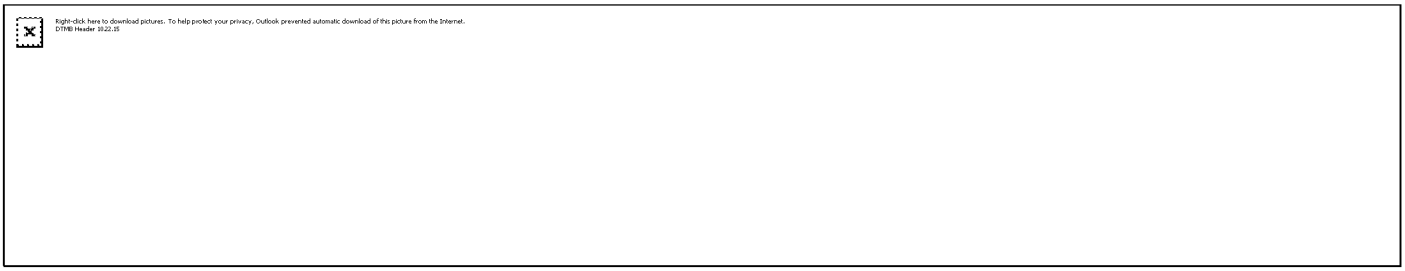
Subject: The Gov. Snyder's Budget Proposal



Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the $54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates $1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of $1.3 billion for department operations and a one-time allocation of $32.4 million.

A few highlights include:

- $502 million for information technology support for all state agencies and $132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by $7 million, from $65 million to $72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional $5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of $6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

WR Ending February 12, 2016

Section Manager: Irene Henry, Project Management Section 'A'

Finalized response to HopkinsBurns on porch leaks at Governor's Residence with Bob Adams and Tom Pawlowski.

Bob Adams:

New Projects:

DNR - Mclain S.P. Master Plan – Received executed design contract and scheduled kickoff meeting.

Design:

DNR – St. Louis Creek Culvert Repair – DNR provided preliminary easement documents for inclusion in the bid documents.

DNR - Mackinac Island S.P. – Governor's Residence Roof - Consulted with Irene Henry regarding the response to Hopkins and Burns' work on the leaks at the Governor's Residence.

Marquette B.P. – Generator Replacement – Conducted 75% plan review on site.

Construction:

Baraga Correctional – Fence B Upgrades – Submitted construction contract to Master Electric for Ad Board Agenda.

Projects Complete:

MDOT – Ironwood Welcome Center – Roof Replacement – Processed final PSC modification.

DNR – Presque Isle Dam Repair – Processed final PSC invoice.

Scott DeKorte:

New Projects:

DOE – Camp Tuhsmeheta – Swim Dock Decking Replacement – Design kickoff meeting with Landmark Design on site.

Project Closeout:

MDOC – Lakeland CF – Window Replacement Project – Conducted punch list review meeting.

Joel Gordon:

Nothing significant to report.

Gerald Gregorski:

Nothing significant to report.

Jan Miller:

Accomplishments:

Capital Area Reconfiguration Project – Held 1st construction progress meeting for 333 Grand on 2/9. Meetings will be held bi-weekly. Met with each project director and contracts division that will be moving into LTA to review preferred office location and filing needs.

Flint State Office Building Reroofing, Ice Storage and Solar Panel Installation – Construction contract has been executed and notice to proceed issued. Schedule has been submitted showing an 8/10 completion date. Structural steel supports above the 7th floor started 2/8, ahead of schedule, in order to complete the work prior to the floor being occupied.

Flint State Office Building Interior Renovations – Seventh floor is still on schedule for 3/18 move in date. DTMB is working closely with the contractor and professional in an attempt to expedite the turnover of the lobby.

Tom Pawlowski:

New Projects:

MDOC Alger CF Asphalt Repair and Maintenance – Provided site condition photos in an addendum to the RFP/project statement for PSC consideration.

Design:
MSP Sault Post HVAC Upgrades – Conducted pre-proposal site visit with blanket-contract asbestos abatement contractor.
Bidding:
MDOC Alger CF Perimeter Fence Security System Upgrades – Initiated prevailing wage request and post bid addendum with PSC to extend bid acceptance period.

DNR Mk Isld SP Visitors Center Roof Replacement – Conducted mandatory pre-bid walk-through and initiated preparation of addendum.
Construction:
LSSU School of Business Renovation – Attended project team meeting and conducted site visit. Met newly appointed Vice President of Finance and explained DTMB-DCD's role in the project.
Projects Complete:
Mk Isld SP British Landing Roof Replacement – Continued pursuing closeout issues with contractor.

Dave Sproul:
Accomplishments:
MSP to GOB, CAR – The Christman Company continues to work within multiple areas of the GOB. The next major move is set for 3/11. We have been working through some minor unforeseen as built issues that will require bulletins to resolve and keep the project moving as required. We are continuing to hold construction progress meetings to review issues.

MDOC, Thumb Correctional Facility – Final preparations for the week-end tie-in have been completed by the contractor to install the new booster pump system. The actual tie-in will be completed over the week end on 2/13.

MDOC, Ionia Energy Project – ESG has been working to provide recommended value engineering items to reduce the mechanical and control packages. Once recommended major reduction scope item is to construct the new MTU boiler building on site rather than provide through a pre-manufactured assembly. ESG has reviewed and is moving forward with the natural gas installation sub-contract. We continue to install scope of the water and electrical conservation measures.

MSP, Northville Forensic Laboratory – Reviewed and accepted substantial completion of the polygraph unit improvements within the Northville Forensic Laboratory. There are only two minor punch list items to complete.
New Projects:
DTMB, Energy Center, Electrical Automation Study – It has been determined that this project will not meet requirements of FEMA for grant funding. We will however continue with the study to provide the recommended scope and cost estimate to complete the study of a micro grid system.
Potential Issues:
State Police, SEOC – State Police and DTMB staff did successfully move into the SEOC and their portions of the GOB on 2/1. We are still working on some remaining scope items, completing start-up and training requirements. State Police is utilizing a major portion of the SEOC while mobilized for the Flint water issue.

Steve Urban:
Nothing significant to report.

Section Manager: Harold Belcher, Project Management B
Nothing significant to report.

Chris Bahjet:
Nothing significant to report.

Tim Hall:

Accomplishments:

DTMB State Warehouse Building 100 FBSA Renovation – Participated in BIM above ceiling coordination review with Christman team; coordinated all doors hardware & access control with DTMB-OIP; coordinated IT-telecom meeting to confirm budgets/orders and process for completion; initiated programming evaluation with Hobbs-Black for logistical adjustments of buildings 600/100 and overall campus flow due to FBSA operation coming into complex as part of CAR.

DCH Center for Forensic Psychiatry Patient Shower & Bathroom Repairs – Owner moved in and occupied phase 1 and contractor has taken control, set up and begun demolition of phase 2. Construction is expected to be much more efficient for this and following phases.

DCH Center for Forensic Psychiatry On-Site Warehouse – Conducted punch list verification review with agency and PSC; certificate of occupancy is issued and only remaining activity is added scope requests of agency. Final scope additions reviewed with agency and released to contractor for pricing.

MDOC Women's HVCF Utility Tunnel Upgrades – Contractor completed final phase and final section of tunnel cap; punch list issued and completed by contractor pending only repairs and added scope concrete sidewalk, restoration and replacement of deficient phase 2 tunnel cap which have been mutually deferred until spring to ensure a quality result.

Bruce Hassen:

Accomplishments:

The Highland Park High School Demolition project was approved during the supplemental agenda session of 2/9. Homrich will be the contractor. Upon completing this approval process, $2 million dollars in committed federal HUD funds were formally released the next day to help sponsor the project.

New Projects:

A kickoff meeting conference call was held on 2/9 for the hardest hit bid package #2 project which involves the demolition of 70 houses and will be done by the Adamo Group.

Projects Complete:

For the demolition and restoration of the former Camp Baraga site near L'Anse, the professional and DTMB agreed to close the project with the agreement that the site seeding would be treated as a warranty item in 2016.

Chris Kulhanek:

Nothing significant to report.

Rashmi Patel:

Accomplishments:

MDOT C & T Building, Masonry Repair – Attended mandatory walk-through meeting with construction contractor and issued addendum.

MDOC, Pugsley Correctional Facility Video and Perimeter Surveillance Enhancement - Attended mandatory walk-through meeting with construction contractor.

New Projects:

Received PSC proposal for video and perimeter surveillance enhancement system for following facilities: Michigan Reformatory, Ojibway Correctional Facility and Lakeland Correctional Facility.

Potential Issues/Solutions:

MDOC requested to use EMT with compress fitting raceway instead of rigid conduit up to 10 ft. above furnish floor.

Sadi Rayyan:

Accomplishments:

DMVA Fort Custer Training Center - Reviewed and recommended changes to the contract with DLZ Michigan to provide forest inventory/evaluation, timber stand improvement, removing invasive/toxic/noxious plants and management/reporting for the year 2016.

DEQ Verona Well Field Site - Reviewed and recommended changes to the contract with F&V Operations & Resource Management to provide treatment system maintenance, sampling and reporting.

DEQ Nolichucky Industrial Corp Site - Reviewed and recommended changes to the contract with DLZ to provide geophysical survey, limited remedial investigation and focused feasibility study.

DEQ AMCO Group #1209 Site - Reviewed and recommended changes to the contract with Mannik & Smith to provide deep aquifer investigation and report preparation.

Non-Project Related Activities:

ISID Contracts for Expanded Triage Services – Debriefed several firms on the results of the review/selection process.

Jud Sorensen:

Projects Complete:

A closeout meeting was held on 2/9 for the installation of primary electrical switches at the Romney Building.

Potential Issues/Solutions:

An advertisement and design review meeting was held at the MDOC Jackson Complex with Facility Wardens, Physical Plant Managers and NORESCO on 2/10. NORESCO is very anxious to get the lighting and water portions of this project advertised, but did not have design bid documents prepared for DTMB and MDOC review. They felt that they could advertise and pre-qualify bidders, but would not have bid documents prepared until the week prior to the walk-through. As DTMB and MDOC have not seen bid documents from NORESCO in the past, DTMB and MDOC were not in agreement with proceeding with the advertisement until bid documents could be reviewed.

Matt Miles:

Nothing significant to report.

Terry O'Brien:

Nothing significant to report.

Bruce Watkins:

New Projects:

Cass City Field Office – DNR – New Cold Storage Building – Held pre-bid meeting for the cold storage building. There were only three contractors present, two were of a known good quality. Bids are due 2/17.

Highland RA – North-South Regional Connector Trail – Had a meeting with DNR to identify the remaining work that can be done under a minor construction contract versus DTMB bidding process. Some work will be procurement, such as signs, benches and additional aggregate, but guardrail and guard fence will be via construction.

East Tawas State Harbor – Issued final addenda for contract 1 and contract 2. Bids are due 2/17.

Construction Starts:

Kalamazoo Training Center – LARA-BSBP – Exterior Upgrades – Held pre-construction meeting – see problems below.

Potential Issues/Solutions:

Kalamazoo Training Center – LARA-BSBP – Exterior Upgrades – During review of scope of work at the pre-construction meeting, center staff became concerned about the scope of work and expressed disbelief that some elements were deleted from the work during the post bid addenda phase of the bidding process. While there was some poor communication of the scope during this phase, the removal of some of the work of concern turned out to have been identified (and later forgotten) by center staff. LARA Lansing Administration initially requested cancelling the project, but a meeting will be scheduled to identify whether cancelling the project and re-bidding is in the centers best interest.

Portage Lake Campground – Lagoon Reconstruction – Held phone meeting to discuss design parameters with respect to the need to enlarge the lagoon, or if it can get smaller in volume. Rowe will revise

construction estimate for slightly deeper, but smaller in plain view Lagoon. Intent is to bring the work within budget.

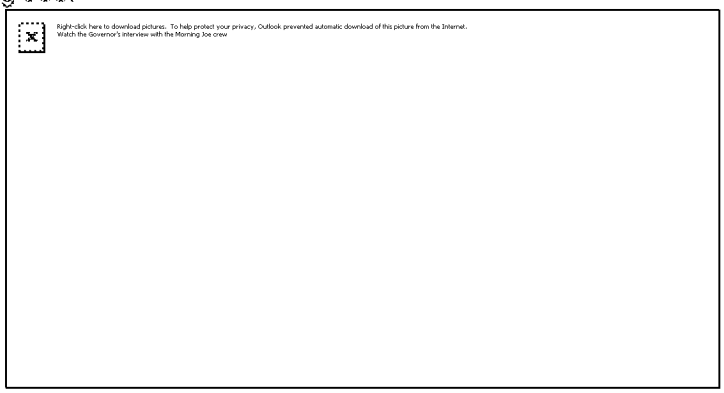
How we are fixing the Flint water crsis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

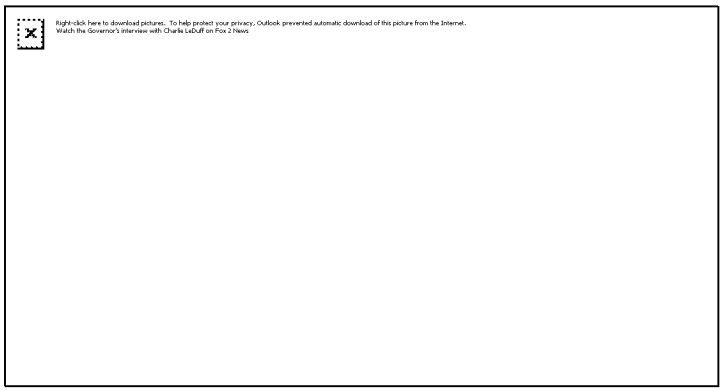
"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.



Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

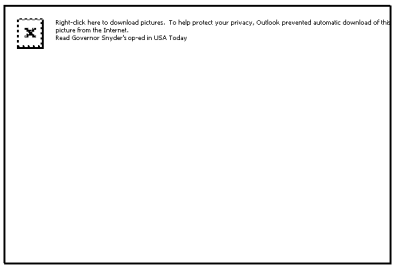
came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.



Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."



"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click here to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. Click here to read the full story in the Washington Post.

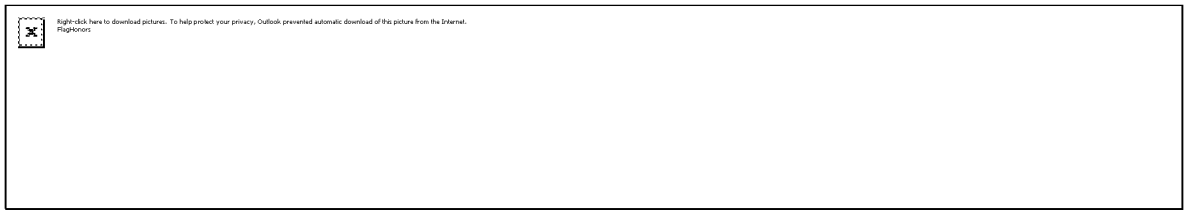
From: Governor's Office <governorsoffice@govsubscriptions.michigan.gov>
Sent: Friday, January 29, 2016 9:47 AM
To: Lach, Adam (DTMB)
Subject: Thank you for your service



THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Governor Rick Snyder
